SUPPLEMENTAL REPORT

A buccal (oral) swab (item W) reportedly collected from Steven A. Avery was submitted for comparison to a DNA profile previously generated from an apparent pubic hair (item D10b) collected from the pubic hair combings (item D10) of Penny Beerntsen (See Laboratory Report No. M85-1051, issued September 4, 2003).

The profile generated from the buccal swab (item W) reportedly collected from Steven A. Avery is **not consistent** with the profile from the questioned pubic hair (item D10b).

CONCLUSION

Steven A. Avery is eliminated as a possible source of the DNA from the pubic hair (item D10b).

Evidence Disposition: All items will be returned to the submitting agency.
