Re: STATE OF WISCONSIN vs. Steven A. Avery
DA Case No.: 2005CA000607
Agency Case No.: 05-0157-955
Court Case No. 05-CF-381

Dear District Attorney Kratz:

Enclosed are selected annotated (on the back) copies of digital photographs I have taken of the human and non-human remains presented for analysis in the above matter. Attached to the set of photographs taken on November 16, 2005 of the packaging and contents prepared for mtDNA analysis, I have included a copy of my two-page evidence transmittal memo and a copy of the Division of Criminal Investigation Property Receipt #6258 that references Item No. 2 (Tag 7926) as the material I transferred to the FBI's Special Agent. I have also attached the listing of those present on November 17, 2005 during the X-ray of bone fragments at the V.A. Hospital in Madison for your information to those images.

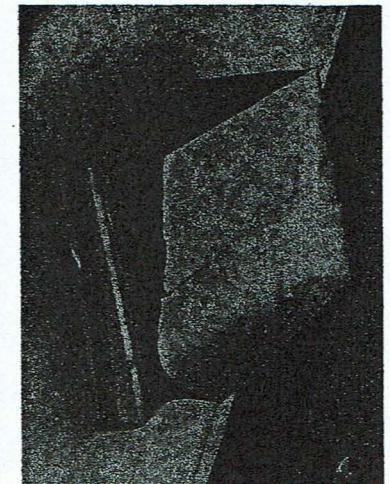

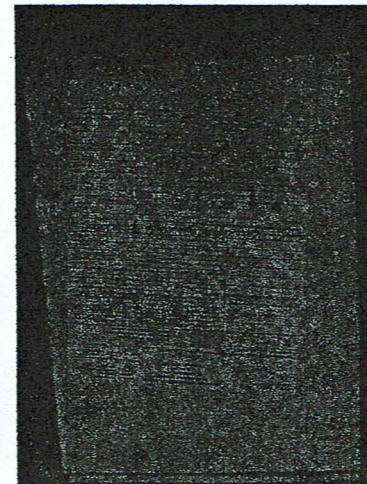

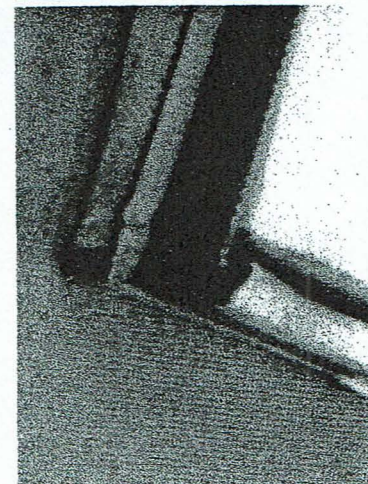

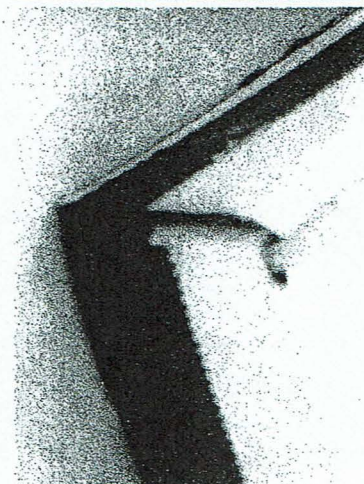

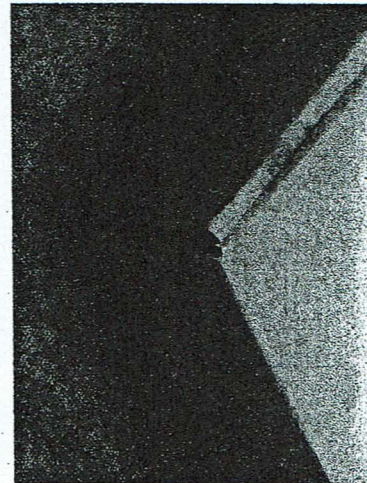

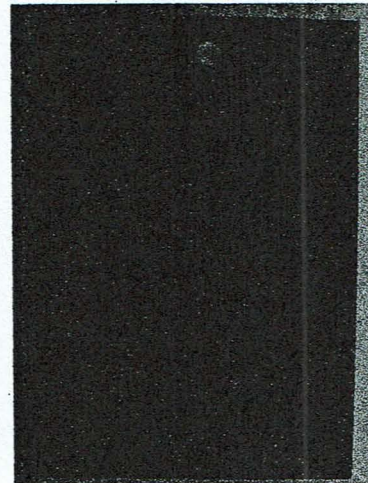

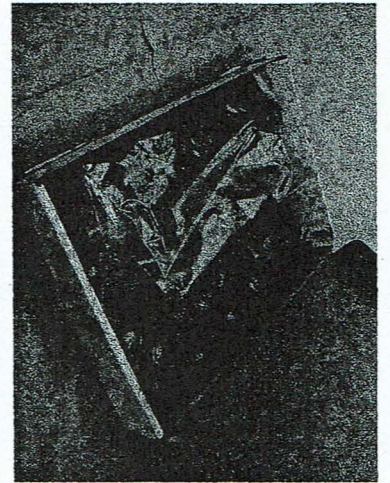

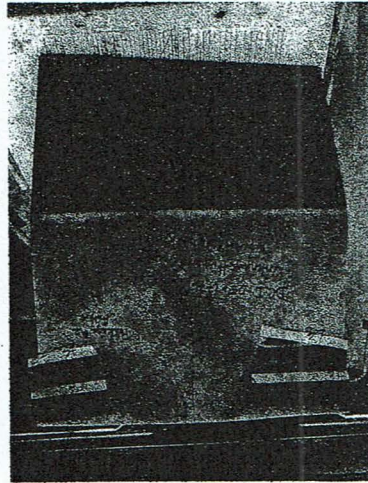

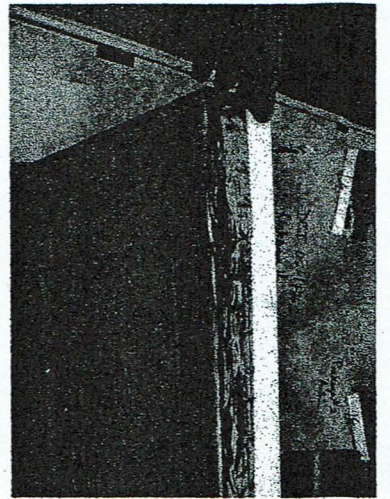

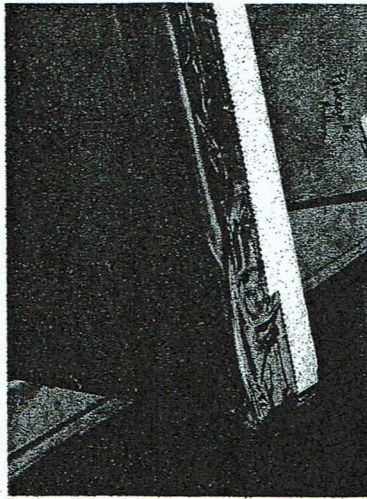

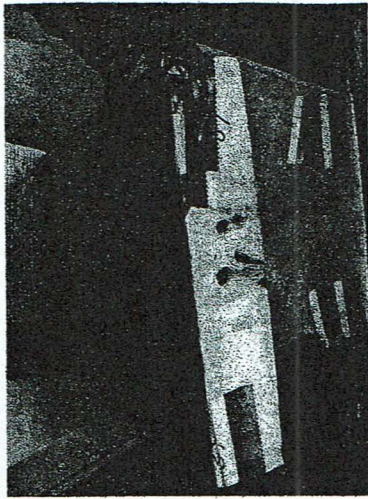

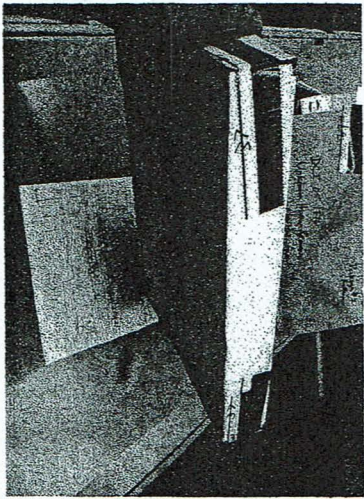

As requested, I am currently working on a preliminary report that I will mail as soon as it is completed. In the interim, if you have any questions regarding the images and information included with this letter please let me know.

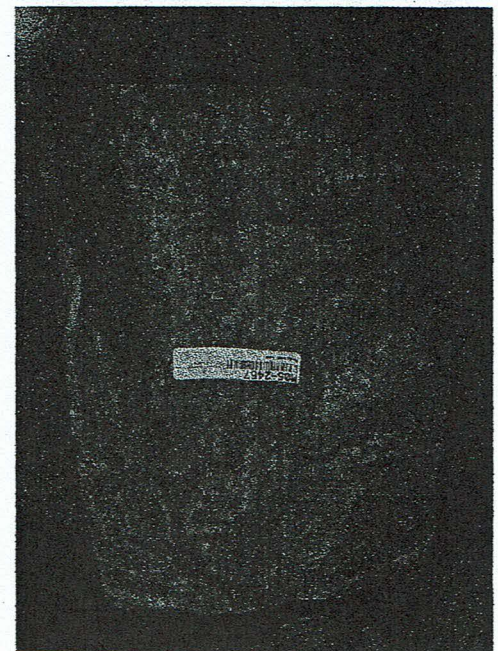

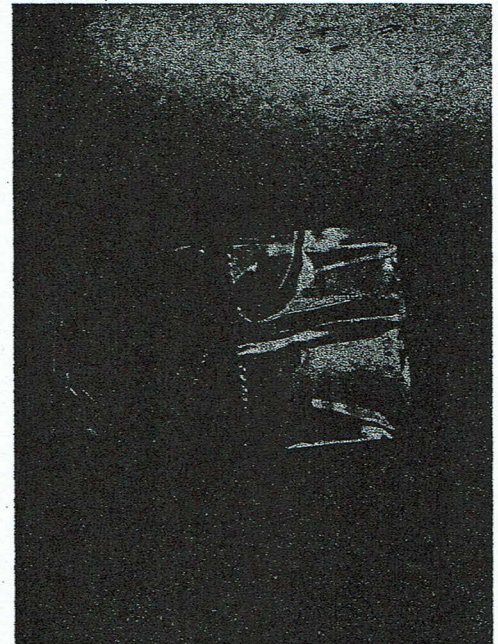

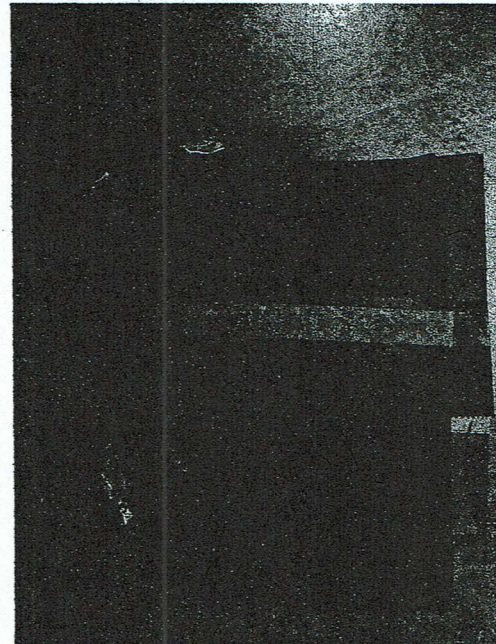

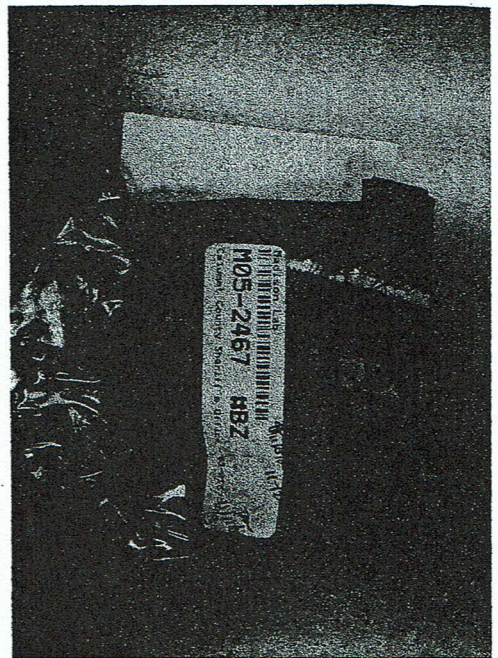

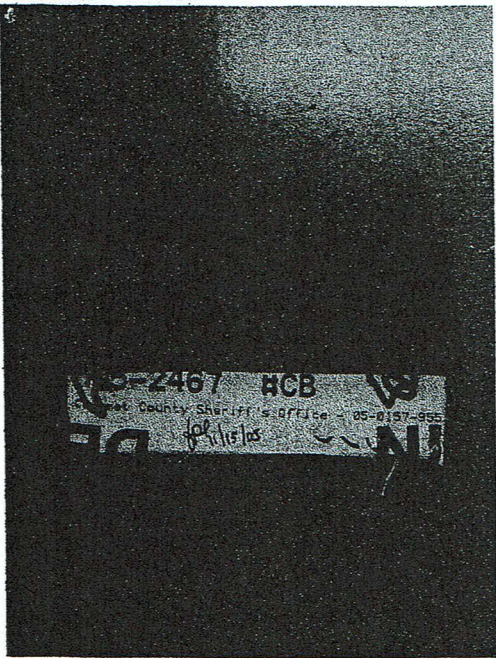

Sincerely,

Leshje E. Eisenberg, Ph.D., D-ABFA
Consulting Forensic Anthropologist

DATE: November 17, 2005

Enclosed within the sealed plastic lidded container accompanying this letter of transmittal is a sealed package identified as Item 2 on Wisconsin Department of Justice, Division of Criminal Investigation, Property Receipt D 6258, dated 11-15-2005, as "1 Paper Bag, U/I charred material." I attach a copy of that Receipt to this letter for your files. There is a large (appx. 61.3 mm x 30.0 mm) piece of desiccated tissue and several other pieces of tissue of varying sizes as well as a human bone fragment within the package. I received the evidence on November 15, 2005 at 1635h from Special Agent James Homes of the Wisconsin Department of Justice, Division of Criminal Investigation, at the Dane County Coroner's Office and the package has been refrigerated since that time.

I have taken every care to avoid contamination when handling the evidence. I examined the contents of the package on November 16, 2005 wearing a gown, mask, gloves (that were changed frequently) and a hair covering. The interiors of both the plastic lid and container were disinfected with full-strength 'Clorox-brand' bleach before placing the evidence inside (per your guidance) and the container was sealed with evidence tape and

photographed. Case numbers for the Wisconsin Department of Justice-DCI, the Wisconsin State Crime Laboratory and the Calumet County Sheriff's Office were written, using an indelible marker, on the lid of the container.

If you find that you must section the human bone fragment to extract a sample for mtDNA analysis, please take care to retain the edge profile at both ends of the bone fragment in case I am able to re-associate the enclosed fragment with other fragments of human bone recovered in this case once your analysis is complete.

If you have any questions when you receive the evidence for analysis, or before you harvest any of the bone, please contact me using the cellular telephone number provided above.
