16 the bench or we can approach the witness at that
17 time. Does that sound fair, Judge?

18 ATTORNEY STRANG: Your Honor, this actually
19 will be Mr. Buting's witness, but we did have an
20 agreement, we do have an agreement, that for
21 purposes of this trial, we'll not identify specific
22 telephone numbers at least without conferring
23 further.

24 THE COURT: Very well.

25 BY ATTORNEY KRATZ:

1 Q. Ms Dohrwardt, the first document that you have in
2 front of you, which is actually quite small
3 print, I would ask you to identify that document
4 number for me, please; what exhibit number is it?

5 A. Exhibit 359.

6 Q. And could you tell the jury, please, what
7 Exhibit 359 is?

8 A. It is a call record that I produced.

9 Q. And was this the call record, again, for both
10 incoming and outgoing telephone calls for the
11 cellular telephone records for Steven Avery?

12 A. Yes.

13 Q. Again, do these include calls on October 31st of
14 2005?

15 A. Yes.

16 Q. If I ask you at a specific time and if you have
17 another record next to you, which I think is
18 Exhibit No. 360, please feel free to refer to
19 that if that will assist you; does that sound
20 okay?

21 A. Fine.

22 Q. Let me ask you, then, Ms Dohrwardt, at 8:12 a.m.
23 on October 35 (sic), 2005, was a cellular
24 telephone call placed from that cellular
25 telephone of Steven Avery?

1 A. Yes.

2 Q. And again, referring to Exhibit No. 360, since
3 that will refer to subscriber names rather than
4 numbers, could you tell us who that call went to,
5 please?

6 A. That call was to *Auto Trader*.

7 Q. And how long or what was the duration of that
8 call?

9 A. Two minutes, forty-seven seconds.

10 Q. I would next ask you to review a outgoing
11 telephone call at 2:24 p.m.; do you note that
12 calling having been made?

13 A. Yes.

14 Q. And again, referring to Exhibit No. 360 and
15 Exhibit 359, in conjunction, are you able to tell
16 who that telephone call was made to?

17 A. To Teresa Halbach.

18 Q. What is the duration of that call?

19 A. Seven seconds.

20 Q. Now, Ms Dohrwardt, I'm going to ask you about a
21 specific cellular telephone feature, which is
22 called the *67 feature; are you familiar with
23 that?

24 A. Yes.

25 Q. Could you explain that to the jury; what is a *67

1 feature?

2 A. It is a remote feature activation that will allow
3 the outbound number to be blocked or restricted
4 on the terminating end.

5 Q. If the individual on the receiving end had, let's
6 say, caller ID, you may have a better term than
7 that, but if they had what we all know as caller
8 ID, would they be able to see who the call is
9 being made from?

10 A. No, it would appear as blocked, or restricted,
11 private, something like that.

12 Q. And next, Ms Dohrwardt, I'm going to ask you to
13 review those records, again, Exhibit 359 and 360.
14 Ask, at 2:35 p.m., if another call, outgoing
15 call, was attempted from the cellphone of
16 Mr. Steven Avery?

17 A. Yes.

18 Q. And who was that call placed to?

19 A. Teresa Halbach.

20 Q. Is there a duration or was that a completed call?

21 A. There was no duration.

22 Q. All right. Now, both the 2:24 call and the 2:35
23 call, do your records reflect that any specific
24 call feature was used on those two calls?

25 A. Yes.

1 Q. Which call feature was used?

2 A. The *67 blocking feature.

3 Q. At 4:35 p.m., Ms Dohrwardt, does another outgoing

4 call appear on those records?

5 A. Yes.

6 Q. Who was that call made to?

7 A. Teresa Halbach.

8 Q. And is there a duration noted on that call?

9 A. No duration.

10 Q. So duration would be zero?

11 A. Zero.

12 Q. All right. At 5:57 p.m., do your records reflect

13 another call being made?

14 A. Yes.

15 Q. And who was that call made to?

16 A. Charles Avery.

17 Q. And can you describe for the jury the duration of

18 that call?

19 A. Five minutes, twenty-three seconds.

20 Q. Finally, Ms Dohrwardt, at 9:20 p.m., do your

21 records reflect a final outgoing call that day?

22 A. Yes.

23 Q. And who is that call made to?

24 A. Barb Janda.

25 Q. And is there a call duration associated with that

1 call?

2 A. Zero.

3 Q. Now, we have talked about Exhibit No. 359 being
4 your records, that is, the records of Cellcom;
5 does Exhibit No. 360 appear to be, legal term is
6 a summary exhibit, of what you have testified to
7 here today?

8 A. Yes.

9 Q. And do the numbers or times of the calls, type of
10 call, and call durations, all appear consistent
11 with not only the records in 359, but also with
12 what you have testified here today?

13 A. Yes.

14 ATTORNEY KRATZ: With that, then, Judge, I
15 will move the admission of Exhibits 359,
16 provisionally 360, and maybe an additional
17 stipulation with that exhibit. But I don't believe
18 I have any further questions of Ms Dohrwardt at this
19 time. Thank you.

20 THE COURT: Any objection to the exhibits?

21 ATTORNEY BUTING: No objection.

22 THE COURT: All right. The exhibits are
23 received.

24 ATTORNEY BUTING: Can we approach, your
25 Honor?

1 THE COURT: Sure.

2 (Side bar taken.)

3 THE COURT: All right. Members of the
4 jury, we're going to take our afternoon break at
5 this time. We'll resume in about 15 minutes.

6 (Jury not present.)

7 THE COURT: All right. We'll resume in 15
8 minutes.

9 (Recess taken.)

10 (Jury present.)

11 THE COURT: Mr. Buting, you may proceed.

12 ATTORNEY BUTING: Thank you, your Honor.

13 **CROSS-EXAMINATION**

14 BY ATTORNEY BUTING:

15 Q. Good afternoon, Ms Dohrwardt. Just a couple
16 quick questions, first, and then I'm going to
17 return to these exhibits that you have been
18 referring to. All right?

19 A. All right.

20 Q. This *67 feature, that's actually available on
21 other lines as well, land lines, right?

22 A. Right.

23 Q. And that's something that the caller uses if they
24 would want to not allow the receiving party to
25 see what that phone number they are calling from

1 is, right?

2 A. Right.

3 Q. But it doesn't remove it from your phone bill; it
4 still shows up on the customer's own phone bill,
5 right?

6 A. Right.

7 Q. Okay. So it's not like it's a call that becomes
8 invisible if you use *67, it is still in your own
9 records, the customer's own calling records would
10 show the phone number, that the phone call was
11 made, right?

12 A. Are you referring to Cellcom, how they bill, or
13 another carrier?

14 Q. Just in general, if you get an itemized bill, it
15 will be on there as an outgoing call, right?

16 A. Cellcom only bills for answered calls, with
17 duration.

18 Q. All right.

19 A. So --

20 Q. So if it was answered, if you use the *67 call to
21 somebody and it's answered, it will show up on
22 your bill as an outgoing call?

23 A. Yes --

24 Q. Okay.

25 A. -- but it would not show the restriction.

1 Q. Pardon?

2 A. It would not -- It would not separate from --

3 Q. Sure, it will be on there, though?

4 A. Right.

5 Q. Okay. So, Mr. Avery's bill would show he made a
6 phone call to Teresa Halbach, each one of those
7 times, whether or not the *67 feature is used,
8 correct?

9 A. If it was answered and there was duration, yes.

10 Q. Sure. Okay. Well, let's go into that little
11 issue that you just brought up, answered or not.
12 Do you have 360 -- Exhibit 360 in front of you?

13 A. Yes.

14 Q. And then, I'm going to put this up on the ELMO
15 because this is testing the limits of my eyes.
16 Exhibit 359, that's the basis really of your
17 testimony today, your knowledge, right?

18 A. Right.

19 Q. Exhibit 360 was not prepared by you, though,
20 right?

21 A. Right.

22 Q. That was prepared by the prosecutor, just as sort
23 of a summary exhibit of what your testimony would
24 be?

25 A. Right.

1 Q. Okay. If you don't mind, I'm going to take both
2 of these away from you for a moment and I'm going
3 to put them up on the screen. Okay?

4 A. All right.

5 THE COURT: Counsel, one thing, weren't we
6 trying to avoid the numbers? Are you going to show
7 the telephone numbers on the screen?

8 ATTORNEY KRATZ: Yes, I would prefer,
9 Judge, that only 360 be put up on the screen.

10 ATTORNEY BUTING: There is no other way,
11 Judge. If you want to order the cameras not to --

12 THE COURT: All right. I will ask the
13 television cameras in the courtroom, then, not to
14 show the screen while the telephone numbers are on
15 there. That would be Exhibit 359?

16 ATTORNEY BUTING: That is correct.

17 THE COURT: Okay. Or Exhibit 360, when
18 it's back to the names, if the television cameras
19 wish to show the screen, they can. Which one are
20 you doing first, Mr. Buting?

21 ATTORNEY BUTING: I'm going to do 359
22 first.

23 THE COURT: All right. 359.

24 Q. I just want to show you first, make sure we know
25 what we're talking about here; 359, which has

1 this very small font because you are trying to
2 get -- whoever printed it is getting a long line
3 of columns onto a little 8 1/2 X 11 piece of
4 paper, right?

5 A. Correct. Actually both pages, side by side,
6 would be the entire record.

7 Q. Oh, it actually goes out two full pages, you're
8 right.

9 A. Correct.

10 Q. Okay. All right. I'm going to zoom in here,
11 first column -- Well, it has a number -- like a
12 sequential number of the phone call for this
13 particular record, right? Seventy, seventy-one,
14 seventy-two?

15 A. Right.

16 Q. The next column is seize date and time. Now, if
17 I understand what that is, is when someone makes
18 a call and it gets connected to one of the cell
19 towers, the time begins running, right?

20 A. Correct.

21 Q. That's -- The call is seized, whether or not it
22 goes on beyond that, right?

23 A. Correct.

24 Q. And then, if you look at the fourth one up from
25 the bottom; do you see the number here, 14:35?

1 A. Yes.

2 Q. That is a time, right?

3 A. Right.

4 Q. That is, 2:35, right?

5 A. Right.

6 Q. And the third one up from the bottom is 16:35,
7 which actually is 4:35 p.m., correct?

8 A. Right.

9 Q. Okay. Now, and the one right above -- I'm sorry,
10 I should have started with this one, the fifth --
11 the sixth one -- or fifth one up from the bottom,
12 14:24, this call that's placed by Mr. Avery's
13 cell at -- I hate these military time. I'm
14 sorry. 14:24 is 2:24 p.m., right?

15 A. Right.

16 Q. That's call number 61?

17 A. Eighty-one.

18 Q. Eighty-one. Okay. I should have blown it up
19 more. If we follow along here, the next column
20 is the answer date and time, right?

21 A. Right.

22 Q. And then the next one over is the release date
23 and time, right?

24 A. Right.

25 Q. And then the answer -- the next column is the

1 answer indicator column, right?

2 A. Right.

3 Q. And that call says answered in that column,
4 doesn't it?

5 A. It does.

6 Q. And the call right below it, which is the one
7 that was made at 2:35 p.m., says not answered,
8 correct?

9 A. Correct.

10 Q. And the call at 4:35 p.m., to Ms Halbach's phone,
11 also says answered, correct?

12 A. Yes.

13 Q. Now, we're going to have to remember the order of
14 these, because I have got to turn to the next
15 page. And I don't think you have numbers on
16 there. So, let's look at, first, call number
17 83, which is the third one up from the bottom
18 okay?

19 A. All right.

20 Q. That's the call that was made at 4:35 p.m. from
21 Mr. Avery's cellphone to Teresa Halbach, right?
22 Still with me?

23 A. Yes.

24 Q. The one that says answered over here in that --
25 in that column. I'm going to turn to the last

1 page, because of this exhibit. Because the last
2 columns -- almost the last columns of this
3 exhibit give us the duration of the phone call,
4 right?

5 A. Right.

6 Q. And if we look, then, at the third to the bottom
7 call -- line here, the call from Mr. Avery's
8 phone at 4:35 p.m. on October 31st, to Teresa
9 Halbach's phone, has a seized duration of 62
10 seconds, right?

11 A. Sixty-two hundredths of a minute.

12 Q. Oh, okay.

13 A. Three one.

14 Q. And it does not have a duration of zero, does it?

15 A. It does not.

16 THE COURT: Is that the third one up or the
17 fourth one up?

18 ATTORNEY BUTING: This is the third one up.
19 Do you want to see the first page again?

20 THE COURT: Yeah.

21 ATTORNEY BUTING: Okay.

22 THE COURT: Okay. So it's the 4:35 call
23 you are talking about?

24 ATTORNEY BUTING: 4:35 call.

25 THE COURT: Okay.

1 ATTORNEY BUTING: Is the third one up.

2 THE COURT: Very well.

3 Q. (By Attorney Buting)~ And would you agree with me
4 that this exhibit shows that it has a duration, a
5 seized duration of 62, 062, and a call duration
6 of .18?

7 A. I do.

8 Q. Okay. And the next one above it has a duration
9 of zero?

10 A. Right.

11 Q. And the one above that has a duration of .12?

12 A. Correct.

13 Q. And back to the first page, the one directly
14 above the 4:35 call that we were talking about,
15 is the one that's made at 14:35, or 2:35 p.m.,
16 that's the one that says it's not answered?

17 A. Right. There's more to these calls, though.

18 Q. And that one is clearly not answered at all?

19 A. Not answered. And the release cause shows the
20 calling party hung up before anything answered
21 the call, voice mail or a person.

22 Q. Okay. The one above it, though, at 2:24 p.m., is
23 answered, right?

24 A. Yes. But, again, I can't say by a person or by
25 voice mail.

1 Q. All right. So we don't know whether the call
2 goes -- These records don't tell us whether the
3 call goes into voice mail or whether it's
4 answered by a live person?

5 A. If it was a Cellcom customer, I could see that,
6 but not when it's another carrier.

7 Q. All right. And let me just go back to this call,
8 you also testified about a call at 5 -- or your
9 Exhibit 360 refers to a call to Charles Avery at
10 5:57 p.m., that would be the second to the last
11 row, right?

12 A. Right.

13 Q. Seventeen fifty-seven. and that one is answered,
14 right?

15 A. Right.

16 Q. And your Exhibit 360 says the duration was 5
17 minutes and 23 seconds. This exhibit says 538?

18 A. It says 5.38 minutes.

19 Q. Okay. So you divide that into -- you do a
20 calculation and figure out that .38 minutes is 23
21 seconds; is that how you did it?

22 A. Right.

23 Q. Well, in the call above it, it says point -- it
24 says 0.18, you said the duration is zero on this
25 Exhibit 360. It's really not zero, is it?

1 A. The call duration is, yes.

2 Q. Call duration says 0.18, correct?

3 A. Well, I'm confused on which call we're on now.

4 Q. The third from the bottom, where it says, we have
5 established is, the call at 4:35 p.m. from Mr.
6 Avery's call to Teresa Halbach's?

7 A. That would be 11 seconds.

8 Q. So this exhibit, then, 360, is wrong?

9 ATTORNEY KRATZ: Judge, I'm going to object
10 as argumentative. She clearly wanted to explain it;
11 Mr. Buting hasn't let her.

12 ATTORNEY BUTING: We're going to that right
13 this moment.

14 ATTORNEY KRATZ: Well, then don't call it
15 wrong.

16 THE COURT: All right. I -- That question,
17 to me, allows an answer, so you can explain --

18 ATTORNEY KRATZ: Thank you, Judge.

19 THE COURT: -- your answer.

20 A. Answered, as far as an answered call, being able
21 to tell if it was answered actually by a phone or
22 by voice mail, unable to tell that. And the
23 durations on Exhibit 360, since I have a seized
24 duration and call duration, both columns on my
25 report; I'm not sure which -- which of those

1 numbers was taken for 360, to say that it was
2 right or wrong.

3 Q. All right. Well, what we have just established
4 now, though, today, is that the call that was
5 made from Mr. Avery's cellphone to Teresa
6 Halbach's cellphone, at 4:35 p.m., according to
7 your records in Exhibit 359, Cellcom records, is
8 marked as answered, right?

9 A. Correct.

10 Q. And has a duration, not of zero, but of 11
11 seconds, right?

12 A. Correct.

13 Q. And, similarly -- Well, that's okay. We'll leave
14 it with that. So, would you suggest that we
15 correct Exhibit 360 so that in that last column,
16 where it says duration, on that call to Teresa
17 Halbach, that it actually say 11 seconds instead
18 of duration zero?

19 ATTORNEY KRATZ: Objection, Judge, it's a
20 mischaracterization.

21 THE COURT: Well, I'm going to let her
22 explain -- or answer the question.

23 A. Looking at that specific call, something did have
24 answer with the call.

25 Q. Okay.

1 A. Whether, again, I can't say a phone or a voice
2 mail system, either would cause that result. But
3 the connection was up for 11 seconds.

4 Q. So then why does Exhibit 360 say duration zero?

5 A. I don't know if that's because of how the other
6 carrier shows whether it was answered or not.
7 And how -- I can't explain how their records
8 work, how these numbers came to be.

9 Q. All right. Well, if this Exhibit 360 is being
10 introduced through you, presumably it's based on
11 your knowledge of Cellcom's records --

12 A. Correct.

13 Q. Or is it?

14 A. Well, I just saw this for the first time today,
15 so I apologize, I did not see that particular
16 call.

17 THE COURT: Just for the Court's
18 clarification; did you prepare Exhibit 360?

19 THE WITNESS: No.

20 ATTORNEY BUTING: Okay.

21 Q. (By Attorney Buting)~ I'm not trying to beat up
22 on you, ma'am, I'm just trying to clarify. I
23 understand that you didn't prepare 360. What I'm
24 asking you is, now, looking at the record
25 yourself, from your own records; would you

1 suggest that perhaps that Exhibit 360 in front of
2 you be amended, if not corrected, amended to show
3 on the duration column, 11 seconds?

4 A. Yes.

5 ATTORNEY STRANG: Thank you. That's all I
6 have.

7 ATTORNEY KRATZ: Let me ask --

8 THE COURT: Mr. Kratz.

9 **REDIRECT EXAMINATION**

10 BY ATTORNEY KRATZ:

11 Q. Ms Dohrwardt, if you reviewed, as you have in
12 this case, other records, that is, records other
13 than records from Cellcom, would you be able to
14 give the jury a full explanation of what happened
15 with that call at 4:35?

16 A. I don't understand the question.

17 Q. Are there other records that you have reviewed,
18 regarding that specific call at 4:35 p.m., that
19 better explains what happened with that call,
20 other than your Cellcom records?

21 A. Yes.

22 Q. What other records --

23 ATTORNEY BUTING: Judge, let me object. If
24 she's not testifying from her own records, she's
25 unable to authenticate or explain someone else's

1 records. This witness -- If another witness can do
2 that, fine. This witness, as I understand it, is
3 qualified to interpret Cellcom records and she's
4 done that.

5 ATTORNEY KRATZ: Let's ask her, Judge.

6 THE COURT: Yeah, we don't know yet whether
7 she -- I mean, in a sense, both of you are right.
8 She hasn't been qualified yet, but I can't say for
9 sure that she won't be qualified. So, Mr. Kratz,
10 you may proceed.

11 ATTORNEY KRATZ: Thank you, Judge.

12 (Exhibit No. 361 marked for identification.)

13 ATTORNEY KRATZ: Is 359 still floating
14 around somewhere?

15 ATTORNEY BUTING: Did I grab it?

16 Q. (By Attorney Kratz)~ Ms Dohrwardt, I have now
17 handed you what has been marked for
18 identification purposes as Exhibit No. 361 have
19 you seen that document before?

20 A. Yes.

21 Q. In providing the information for Exhibit No. 360,
22 the summary exhibit, which as Mr. Buting
23 correctly indicates, is an exhibit created as a
24 summary of voluminous information, did you look
25 at Exhibit 361 and assist in the interpretation

1 of those records, together with your records, of
2 Exhibit 359?

3 THE COURT: Just a second, before we go
4 further, I think we should identify what Exhibit 361
5 is.

6 ATTORNEY KRATZ: I would be happy to do
7 that, Judge.

8 Q. (By Attorney Kratz)~ What is Exhibit No. 361?

9 A. Exhibit 361 is a type of call record activity
10 from Cingular.

11 Q. And do you know what Cingular is?

12 A. They are another cellphone provider.

13 Q. And do you know -- do you know if the Cingular
14 wireless records that are contained in
15 Exhibit 361 tell the other side of the story, for
16 lack of a better term, for what the caller
17 records from 359 tell?

18 ATTORNEY BUTING: Objection, she's still
19 not been qualified to be able to interpret these
20 records.

21 THE COURT: I assume that she's in the
22 process of being qualified. You may be right, maybe
23 she won't be qualified, but I think this is a
24 foundational question, as I understand it.

25 A. These records have a lot of the same information

1 that ours -- that Cellcom records have, but a lot
2 that we don't. They are missing a lot that our
3 records have.

4 So you can't see, on the calls at these
5 particular times, who actually the calling number
6 was on those; where ours show inbound and
7 outbound. But these do show communication
8 between the phone and the network; durations;
9 outbound numbers, if they were dialed. And
10 that's it. That's all that's on these records.

11 Q. Exhibit 361 also shows something called a tower
12 site, or a tower designation; is that correct?

13 A. Correct.

14 Q. Now, let's go back to the qualification, your
15 qualifications; as technical research team
16 leader, as in fact the manager of tech support
17 for Cellcom, are you familiar with interpreting
18 that kind of data and that kind of information?

19 A. Yes.

20 Q. In fact, you do that every day?

21 A. Correct.

22 ATTORNEY BUTING: Which kind of data are we
23 referring to? The question is not clear.

24 THE COURT: She has to be qualified to
25 interpret the -- Exhibit 361, the records from a

1 competitor.

2 ATTORNEY KRATZ: I understand that, Judge.

3 THE COURT: That's where you are going?

4 ATTORNEY KRATZ: Yes.

5 Q. (By Attorney Kratz)~ Are you asked to interpret
6 information -- And the specific column that I'm
7 interested in is cell designation and cell site
8 information. Are you asked to interpret that
9 kind of information every day?

10 A. Yes.

11 Q. And, specifically, as you look at Exhibit
12 No. 331, are you able --

13 THE COURT: 361?

14 ATTORNEY KRATZ: 361, I'm sorry, Judge.

15 Q. (By Attorney Kratz)~ Ms Dohrwardt, are you able,
16 in looking at Exhibit No. 361, to provide
17 assistance, to provide an explanation as to a
18 call made at 4:35 p.m. on March 31st of 2005?
19 I'm sorry, 4:35 p.m.

20 A. What I can --

21 Q. October 31st, I'm sorry.

22 A. What I can say about these records is that
23 communication between the phone and some cell
24 site, which I can't convert, because I don't have
25 a chart to tell what these numbers mean, as far

1 as what cell site, but they clearly show that
2 there's communication between the phone and a
3 site, for every call up until that call. And
4 then there's no further communication with that
5 phone and any cell site after that time.

6 Q. Based upon your training, based upon -- I assume
7 you have been doing this for a while?

8 A. Yes.

9 Q. How long have you been doing this?

10 A. Four and a half years.

11 Q. And are you trained to interpret and provide
12 opinions on data such as in Exhibit 361?

13 A. I have not been trained in other carriers records
14 and how they pull them, but being how similar
15 that they are, I feel comfortable with what I'm
16 looking at.

17 Q. All right. Ms Dohrwardt, recognizing it is
18 Cingular and not Cellcom, recognizing that
19 difference, okay, which is I think what you
20 testified about?

21 A. Yes.

22 Q. Are you able -- I'm not going to ask yet for your
23 opinion, but are you able, looking at those
24 records, at Exhibit No. 361, to provide an
25 opinion as to whether that particular call had a

1 duration, that is, as to whether that was a
2 completed call, that is, completed with a human
3 being on the other end of the line?

4 A. There is no cell site on that call, but there is
5 the duration matching --

6 ATTORNEY BUTING: Objection, your Honor.

7 ATTORNEY KRATZ: I'm just asking, yes or
8 no, if you are able to render that opinion.

9 THE WITNESS: Oh, yes.

10 ATTORNEY KRATZ: Judge, I don't know if
11 Mr. -- and I want to give Mr. Buting an opportunity
12 to voir dire. I am going to ask that opinion, but
13 if there's --

14 THE COURT: Well, let me ask this, do you
15 have a Cingular person coming in.

16 ATTORNEY BUTING: Yeah, why don't we do it
17 then?

18 THE COURT: Is there going to be a witness
19 from Cingular?

20 ATTORNEY KRATZ: Yes, Judge, but I want to
21 be heard. This -- We can't -- If this witness is
22 qualified, I think I'm entitled to ask her that
23 question.

24 ATTORNEY BUTING: Well, he's asking for an
25 expert opinion now, she's not just a custodian. If

1 there's a witness available, let's just move on.

2 THE COURT: She's indicated that it's not
3 her company and they don't have all the information
4 on the form; however, she's also said she's
5 qualified to interpret this particular information.
6 And I believe, under our rules for expert witnesses,
7 I believe that's sufficient, so I'm going to let her
8 do it.

9 Q. (By Attorney Kratz)~ Did you understand my
10 question?

11 ATTORNEY BUTING: Your Honor, there's been
12 no disclosure --

13 (Court reporter couldn't hear.)

14 ATTORNEY BUTING: There's been no
15 disclosure of her report, then, under 971.23, if
16 she's (sic) now going to convert this witness, a
17 custodian, into an expert.

18 ATTORNEY KRATZ: She's just interpreting
19 the data, Judge. And I don't know that she's issued
20 a report, or written report, on this. In fact, I'm
21 quite sure she hasn't.

22 ATTORNEY BUTING: Or any summary of her
23 opinions that are anticipated to be presented. We
24 have been through this before.

25 THE COURT: All right. Let's save it for

1 the next witness. Your -- Your -- As I understand
2 it, your summary exhibit is a compilation of
3 information that you anticipate eliciting from more
4 than one witness, correct.

5 ATTORNEY KRATZ: Yes. And it's from two
6 witnesses, Judge. This witness is necessary to
7 complete Exhibit 360.

8 THE COURT: As is the next witness.

9 ATTORNEY KRATZ: I understand that, but the
10 suggestion that is now left before this jury, is
11 that it's somehow an error. And with this witness,
12 I can clear that up. She's qualified to do that and
13 I'm asking for leave to do that. If the Court is
14 saying no, then we'll move on.

15 THE COURT: I don't agree with your
16 characterization. I think what it -- the only
17 conclusion it draws at this stage, Exhibit 360 is
18 incomplete, because it's a compilation of
19 information you are going to be eliciting from two
20 separate witnesses. So let's limit this witness to
21 what the witness has to say about Cellcom. And then
22 you be can go back to Exhibit 360 when you bring in
23 the Cingular witness.

24 ATTORNEY KRATZ: I will, at this time,
25 Judge, not ask this witness any questions. I'm

1 alerting counsel and the Court that I may recall
2 this witness after our next witness.

3 THE COURT: Fair enough. Any more
4 questions, Mr. Buting?

5 ATTORNEY BUTING: No, I don't believe so,
6 all the questions were regarding the other witness,
7 so we'll wait for the witness.

8 THE COURT: All right. You are excused at
9 this time. And the State may call it's next
10 witness.

11 ATTORNEY KRATZ: Thank you, Judge. We'll
12 call Laura Schadrie to the stand.

13 (Exhibit No. 362 marked for identification.)

14 THE CLERK: Please raise your right hand.

15 **LAURA SCHADRIE**, called as a witness
16 herein, having been first duly sworn, was
17 examined and testified as follows:

18 THE CLERK: Please be seated. Please state
19 your name and spell your last name for the record.

20 THE WITNESS: Laura Schadrie,
21 S-c-h-a-d-r-i-e.

22 **DIRECT EXAMINATION**

23 BY ATTORNEY KRATZ:

24 Q. Ms Schadrie, what is your occupation?

25 A. I am manager of a Cingular store.

1 Q. Where is your business located? Where is your
2 home office?

3 A. Home office is located in Atlanta, Georgia.

4 Q. Where are you physically located?

5 A. Fond du lac, Wisconsin.

6 Q. All right. Ms Schadrie, as a manager --
7 Cingular, by the way, is a wireless phone
8 service; is that correct?

9 A. Yes.

10 Q. Ms Schadrie, as a manager, as a person in
11 management for Cingular, are you familiar with,
12 and have you been asked to review, various
13 cellular phone records, specifically for a
14 Cingular customer by the name of Teresa Halbach?

15 A. Yes.

16 Q. Ms Schadrie, were you asked to review those
17 records and calls placed, both incoming and
18 outgoing calls, for October 31st, 2005, for that
19 Cingular customer?

20 A. Yes.

21 Q. And prior to coming to court this afternoon, have
22 you, in fact, reviewed those business records?

23 A. Yes.

24 Q. Are you what's called a custodian of those
25 records?

1 A. Yes.

2 Q. Ms Schadrie, I'm going to have you look in front
3 of you at -- I believe it's Exhibit 361; do you
4 recognize those records?

5 A. Yes.

6 Q. What is Exhibit No. 361?

7 A. It is the call records for -- that I have
8 reviewed.

9 Q. Now, I understand that, and so that the Court is
10 clear about your last answer, you have been asked
11 not to discuss or broadcast any specific
12 telephone numbers in this case; is that right?

13 A. Yes.

14 Q. Because of that, there are two other documents in
15 front of you, one is Exhibit No. 360 and I think
16 is Exhibit 362; do you see those?

17 A. Yes.

18 Q. Ms Schadrie, are you able, in reviewing Exhibit
19 No. 361 and in conjunction with 362, at least as
20 that relates to names rather than telephone
21 numbers, of providing this jury with a summary of
22 telephone calls, both incoming and outgoing, from
23 Teresa Halbach's cellular records dated
24 October 31, 2005?

25 A. Yes.

1 Q. I'm first going to ask you to look at a telephone
2 call at 9:46 a.m. And, again, feel free to
3 compare and to use both documents if they will
4 assist you. I'm going to ask you first of all if
5 that was an incoming or an outgoing call?

6 A. That was incoming call.

7 Q. And who was that received from?

8 A. *Auto Trader*.

9 Q. Time of the call?

10 A. Thirty-three seconds.

11 Q. And you're meaning the duration of the call; is
12 that right?

13 A. Yes.

14 Q. All right. And just so the jury understands,
15 those records wouldn't provide you with any
16 detail as to the content of the call, or what it
17 was about, or anything like that; is that right?

18 A. Right.

19 Q. Just the time of the call and the duration of the
20 call and who it may be from, at least a telephone
21 number or a name; is that right?

22 A. Yes.

23 Q. All right. Second call I'm going to ask you to
24 refer to is a call at 11:04 a.m.; do you see that
25 call?

1 A. Yes.

2 Q. Was that incoming or outgoing?

3 A. That was an outgoing call.

4 Q. And who was that call to?

5 A. Voice mail.

6 Q. And how long was that call?

7 A. 1 minute and 55 seconds.

8 Q. The next call I'm going to ask you to describe is

9 a call at 11:27 a.m.; do you see that?

10 A. Yes.

11 Q. And was that incoming or outgoing?

12 A. That was an outgoing call.

13 Q. And who is that to?

14 A. Voice mail.

15 Q. And how long was that call?

16 A. 2 minutes and 55 -- 2 minutes and 56 seconds.

17 Q. All right. Now, when you talk about voice mail,

18 those of us in the courtroom and those jurors

19 that don't have voice mail, what is a voice mail?

20 A. A voice mail is when a caller leaves you a

21 message if you are not able to answer your phone

22 call, and when you would call your voice mail to

23 retrieve any of your unheard messages.

24 Q. Okay. Next call I'm going to ask you to refer to

25 is at 11:43 a.m.; do you see that?

1 A. Yes.

2 Q. Is that incoming or outgoing?

3 A. That was an outgoing call.

4 Q. And who is that too?

5 A. Barb Janda.

6 Q. And how long was that call?

7 A. 1 minute and 5 seconds.

8 Q. Next call I'm going to ask you to identify is at
9 12:39 p.m.; was that incoming or outgoing?

10 A. That was an outgoing call.

11 Q. And to whom?

12 A. That was to voice mail.

13 Q. And what was the duration of that call?

14 A. Thirty-three seconds.

15 Q. The next call I'm going to have you identify is
16 at 12:51 p.m. First of all, was that incoming or
17 outgoing?

18 A. That was an outgoing call.

19 Q. From -- Or to whom, I'm sorry?

20 A. Steven Schmitz.

21 Q. And for how long was that call duration?

22 A. Forty-six seconds.

23 Q. Do you see another call at 2:12 p.m.?

24 A. Yes.

25 Q. And was that incoming or outgoing?

1 A. That was an outgoing call.

2 Q. To whom?

3 A. George Zipperer.

4 Q. And how long was that call?

5 A. 1 minute and 9 seconds?

6 Q. Next call is at 2:13 p.m., can you describe that

7 for me, please.

8 A. That was an outgoing call to voice mail.

9 Q. And how long did that take?

10 A. Thirty-seven seconds.

11 Q. Now, do you see a call at 2:24 p.m.?

12 A. Yes.

13 Q. And do you know if that was incoming or outgoing?

14 A. That was an incoming call.

15 Q. Now, are you able, from your records, to

16 determine who it was from?

17 A. No.

18 Q. And how long was that call?

19 A. Eight seconds.

20 Q. Next call I'm going to have you identify is at

21 2:27 p.m.; do you see that?

22 A. Yes.

23 Q. And was that incoming or outgoing?

24 A. That was an incoming call.

25 Q. And from whom?

1 A. *Auto Trader*.

2 Q. And how long was that call?

3 A. Four minutes and forty-five seconds.

4 Q. And, finally, I'm going to have you refer to a
5 call at 4:35 p.m.; do you see that?

6 A. Yes.

7 Q. Was that incoming or outgoing?

8 A. That was an incoming call.

9 Q. And from whom?

10 A. Steven Avery.

11 Q. And what was the duration of that call?

12 A. Thirteen seconds.

13 Q. Now, your -- The summary exhibit, that is,
14 Exhibit No. 362, does that set forth the type of
15 calls, who they were sent or received from, the
16 time of the call, and the duration, as you have
17 testified here in court?

18 A. Yes.

19 Q. And have you looked back, however, at Exhibit No.
20 361, those are your Cingular records themselves;
21 is that right?

22 A. Yes.

23 Q. I want you to look at the column that deals with
24 cell site information, or where a call may -- may
25 be placed off of, or what's called hit off of; do

1 you see that column?

2 A. Yes.

3 Q. All right. Specifically, the call at 4:35 p.m.,
4 do you see that call on your records, 361?

5 A. Yes.

6 Q. Now, does the call at 3 -- at 4:35 p.m., does
7 that appear to have been a completed call,
8 meaning, did that call hit off of any cell sites
9 that your records reflect?

10 A. I don't know.

11 Q. Does it show on the exhibit whether or not it hit
12 off of any cell sites?

13 A. No.

14 Q. No it doesn't, or no it didn't?

15 A. It doesn't show that it hit any cell site.

16 Q. Okay. Now, as a manager, are you required, or do
17 you perform any technical research, or provide
18 any technical opinions for Cingular?

19 A. No.

20 Q. Are there tech people, in other words, are there
21 technicians or people in your Technical Research
22 Department that do that kind of thing and render
23 those kinds of opinions?

24 A. Yes.

25 Q. So you are here today just as the custodian of

1 these records; is that right?

2 A. Yes.

3 ATTORNEY KRATZ: With that, Judge, at least
4 with Ms Schadrie, that's all the questions I have.
5 I would move the admission of 361 and 362 at this
6 time.

7 THE COURT: Any objection?

8 ATTORNEY BUTING: Yes, but I would like to
9 be heard outside the jury as to the summary of those
10 only. But we can hold off on that and do the cross.

11 THE COURT: By summary exhibits, we're
12 talking 360 and 362.

13 ATTORNEY BUTING: Yes.

14 THE COURT: Very well. Other exhibits are
15 okay?

16 ATTORNEY BUTING: 361 and 359, I have no
17 objection.

18 THE COURT: Okay. Those are admitted. And
19 Mr. Buting, you may commence your cross.

20 ATTORNEY BUTING: Thank you.

21 **CROSS-EXAMINATION**

22 BY ATTORNEY BUTING:

23 Q. Good afternoon, ma'am.

24 A. Hi.

25 Q. Do you still have the exhibits in front of you

1 there?

2 A. Yes.

3 Q. 361 has a call on it, call No. 7, that's

4 4:35 p.m., right?

5 A. Yes.

6 Q. Doesn't actually have a number, in the column it

7 says dial number, there's nothing listed there,

8 right?

9 A. Yes. Correct.

10 Q. And that's true of a lot of these calls that are

11 on this particular exhibit, right?

12 A. Yes.

13 Q. But anyway, in this one, it does show that a

14 duration is 13 seconds, correct?

15 A. Yes.

16 Q. It's not zero, right?

17 A. Right.

18 Q. Okay. And you can't tell from this whether the

19 call went into voice mail or not? Possible?

20 A. Right.

21 Q. Okay. And just so we're clear, Exhibit 362

22 that's in front of you, the summary exhibit, does

23 not include all of the calls that were made to

24 and from Teresa Halbach's phone on October 31st,

25 does it?

1 A. Right.

2 Q. And, in fact, if you look at Exhibit 361, there
3 is a call at 2:41 p.m., that has a duration of 1
4 minute and 20 seconds, correct?

5 A. Yes.

6 Q. And that does show a cell site, right?

7 A. Yes.

8 ATTORNEY KRATZ: Judge, I'm going to object
9 as irrelevant, unless Mr. Buting wants to admit that
10 there is a relevance that it shows a cell site in
11 there.

12 ATTORNEY BUTING: I'm just pointing out
13 what's on the record at this point.

14 THE COURT: Does it have any relevance?

15 ATTORNEY BUTING: Well, how about this
16 relevance, it's the last phone call on Teresa
17 Halbach's record that shows an actual cell site
18 location. I think that's pretty relevant.

19 ATTORNEY KRATZ: I will absolutely
20 stipulate to that, Judge, that's the last call that
21 ever made it to Ms Halbach, that's right.

22 ATTORNEY BUTING: I'm not stipulating to
23 that. I'm just saying it's the last one with a cell
24 site on it.

25 THE COURT: I'm gathering from what you are

1 saying -- both saying, that at least it has some
2 relevance, so I'm going to allow the question.

3 Q. (By Attorney Buting)~ So, for instance, the 2:41
4 calls says a minute and 20 seconds duration,
5 right?

6 A. Yes.

7 Q. And these records don't tell us, if I understand,
8 whether or not a phone call gets sent into voice
9 mail or not?

10 A. Correct.

11 Q. And there's also a call -- I'm just going to --
12 this may be compound, but I will ask it any way.
13 There was a call at 1:52 p.m., right?

14 A. Yes.

15 Q. That's not on Exhibit 362, correct?

16 A. Correct.

17 Q. There was a call at 12:45 p.m., right?

18 A. Yes.

19 Q. It's not on Exhibit 362, right?

20 A. Correct.

21 Q. And neither of those calls show the number that
22 it's coming from?

23 A. Correct.

24 Q. There's another one at 12:29 p.m., correct?

25 A. Correct.

1 Q. And all three of those last numbers I mentioned
2 are incoming calls?

3 A. Yes.

4 Q. You can tell that because an outgoing call -- or
5 outgoing call from her phone would have the phone
6 number that's dialed?

7 A. Right.

8 Q. So, for instance, that last actually dialed
9 number that's reflected on here is at 2:13 p.m.,
10 that is on Exhibit 362, and that has a long
11 number, that apparently is the voice mail?

12 A. Yes.

13 Q. Which is actually a 4-1-4 number?

14 A. Yes.

15 Q. Okay. Is there anything in this exhibit, No.
16 361, that tells you the names of these people
17 that you testified to, that are on Exhibit 362?

18 A. No.

19 Q. So, when you said, for instance, a phone call to
20 George Zipperer at 2:12, that is not actually
21 reflected on 361, is it?

22 A. Correct.

23 Q. And you didn't prepare 362, did you?

24 A. No.

25 Q. And the phone call that you mentioned that 362

1 says was to Steven Schmitz, you can't tell that
2 from your record, Exhibit 361, either, can you?

3 A. Correct.

4 Q. And even the call to Barb Janda at 11:43 a.m.
5 reflected on 362, you cannot tell that from your
6 own records, 361?

7 A. Correct.

8 Q. All right. Let's talk about voice mail for a
9 minute, you are familiar with that, right.

10 A. Yes.

11 Q. If somebody wants to call their own voice mail,
12 from their own Cingular phone; do they have to
13 enter a password?

14 A. No.

15 Q. So you just push some buttons and it goes
16 automatically?

17 A. Correct.

18 Q. Okay. If somebody wants to call voice mail from
19 a land line, though, say the owner of a cellphone
20 is trying to pick up their messages on a land
21 line, they would have to enter some password,
22 right?

23 A. Yes.

24 Q. And when one does that, if you are on a land line
25 or -- I will broaden that a little bit, whether

1 you are calling for a land line or your own
2 cellphone, when you call in it will tell you --
3 give you a message, you have five new messages,
4 something like that, right?

5 A. Yes.

6 Q. And then you push a button and you listen to all
7 five of those messages, right?

8 A. Yes.

9 Q. Once you do that, in your records, those are
10 considered opened and listened to. They are
11 still on your system, but they are considered
12 opened and read, right?

13 A. Yes.

14 Q. If there are phone messages in your voice mail
15 that you don't open and read, they are reflected
16 in your records as unopened?

17 A. Yes.

18 Q. So, if your records show that on a certain date,
19 let's say, we'll just pick a date, November 5th
20 of 2005, okay. If your records were to show that
21 messages were opened all the way up to that date,
22 on Teresa Halbach's phone, that would mean that
23 somebody had listened to those voice messages?

24 ATTORNEY KRATZ: Objection, speculation,
25 Judge.

1 ATTORNEY BUTING: I guess she can answer
2 it.

3 ATTORNEY KRATZ: I haven't heard a
4 foundation, perhaps he could lay some foundation
5 with this witness.

6 THE COURT: All right. That's fair.

7 Q. (By Attorney Buting)~ You understand Cingular
8 records, right?

9 A. Yes.

10 Q. You understand Cingular's voice mail process,
11 right?

12 A. Yes.

13 Q. And you understand how they mark messages,
14 incoming opened, or incoming unopened, right?

15 A. Yes.

16 Q. And incoming old, you know what that means as
17 well, right?

18 A. Yes.

19 Q. Incoming old would mean messages that have been
20 already listened to and are still on the system?

21 A. Right.

22 Q. Incoming unopened would be messages that are on
23 the system that no one has ever listened to?

24 A. Right.

25 Q. All right. And then incoming new would be a

1 brand new message that's come in, probably the
2 most recent one, right?

3 A. Correct.

4 Q. If --

5 ATTORNEY KRATZ: Judge, I would like to be
6 heard outside the presence of the jury, please.

7 THE COURT: All right. At this time the
8 Court will excuse the members of the jury.

9 (Jury not present.)

10 THE COURT: We'll excuse the witness from
11 the courtroom as well. You can step out in the
12 hallway.

13 (Witness not present.)

14 ATTORNEY BUTING: Judge, actually --

15 THE COURT: All right. I believe the jury
16 and the witness are both out of the courtroom at
17 this time.

18 ATTORNEY BUTING: Actually, I think we
19 might need this witness to be able to make this
20 argument, but. What is Mr. Kratz's objection?

21 THE COURT: Mr. Kratz.

22 ATTORNEY KRATZ: These are voice mail
23 messages that were retrieved, I think it's clear,
24 and I think Mr. Buting knows, from family members of
25 Teresa Halbach, after she was missing on the second,

1 or third, or something like that. And Mr. Buting's
2 position, if his theory of defense is that Teresa
3 Halbach is alive on the 2nd of November, we're
4 entitled to know that. We're entitled to notice of
5 that. That's my objection, is that it's irrelevant.
6 He is about to show her some retrieved voice mails
7 on the 2nd. It absolutely is meant to mislead this
8 jury and I want an offer of proof, Judge.

9 THE COURT: Mr. Buting.

10 ATTORNEY BUTING: There's no -- Mr. Kratz
11 may draw the conclusion that because messages are
12 opened as of November 2nd that means that Teresa
13 Halbach was alive on that date, I don't. And I
14 don't think the jury needs to either, but I do
15 intend to introduce records that show that her voice
16 mail was picked up at 8 a.m. on November 2nd and
17 that she was not reported missing for 36 hours more.
18 Somebody listened to her messages, waited 36 hours
19 before she was reported missing.

20 That's relevant and this jury has a
21 right to know it. And this witness will
22 establish that through this exhibit that I am
23 about to introduce.

24 ATTORNEY KRATZ: I'm thrilled to hear how
25 that's relevant, Judge. I'm thrilled to hear how,

1 if Teresa's brother waited 24 hours to report her
2 missing, how that has anything to do with whether
3 Mr. --

4 (Attorneys and Court talking over each other.)

5 THE COURT: I'm not sure --

6 ATTORNEY KRATZ: -- whether --

7 THE COURT: -- you will have to explain the
8 relevance to me.

9 ATTORNEY BUTING: Somebody --

10 (Court reporter stops them.)

11 ATTORNEY BUTING: I'm sorry.

12 ATTORNEY KRATZ: I would like to know how,
13 whether her brother waiting 24 hours to report her
14 missing, has anything to do with a fact in
15 consequence, that is, whether Mr. Avery killed
16 Teresa Halbach.

17 ATTORNEY BUTING: Okay. Judge, what we
18 have heard, at the very beginning of this trial, is
19 that nobody reported this young woman missing until
20 about 5:00 p.m. on Thursday, November 3rd. In fact,
21 nobody even started calling each other, or friends
22 about it, until sometime in the afternoon, I think 1
23 or 2:00 was the testimony from Mr. Pierce, of
24 November 3rd.

25 Somebody listened to Teresa Halbach's

1 messages. They are opened, from October 31st
2 through November 2nd, at 8:00 a.m. This witness
3 has established that you have to have a password
4 to be able to do that. Somebody with a password
5 listened to her phone messages and yet no steps
6 were taken, no other references.

7 I'm not saying it's her brother; I don't
8 know who it is. But I do know that the police
9 have had this report in their custody and it's
10 another example of the police investigative bias
11 by their failure to follow up on this. There's a
12 lot of unanswered questions about what was
13 happening in Teresa Halbach's life in those last
14 few days, and why there is this kind of a delayed
15 report. And here we have evidence that should
16 have directed their investigation further and
17 it's pretty obvious now, to hear Mr. Kratz, that
18 it wasn't done.

19 THE COURT: Mr. Kratz.

20 ATTORNEY KRATZ: I invite the Court to also
21 look at 904.03. If there is any -- any probative
22 value, it is substantially outweighed by the danger
23 of unfair prejudice. But also, more than that, the
24 danger of confusion of this jury to the real issues
25 in this case.

1 If, in fact, Mr. Buting is suggesting,
2 which I think is the only reason for this, that
3 Ms Halbach may not have perished on the 31st of
4 October, that it doesn't go to law enforcement
5 bias, since Mr. Buting can't tie this up with law
6 enforcement, 904.03, if nothing else, Judge,
7 should exclude this particular evidence.

8 THE COURT: I don't recall if there was
9 testimony earlier about someone retrieving her phone
10 messages earlier or not. Has there been any
11 testimony about that in the record?

12 ATTORNEY BUTING: There was testimony that
13 someone retrieved her messages on the evening of
14 November 3rd.

15 ATTORNEY KRATZ: They got a phone bill to
16 look at who she called on the 3rd.

17 ATTORNEY BUTING: I believe somebody
18 listened to the messages, but they didn't --

19 ATTORNEY KRATZ: That may be.

20 ATTORNEY BUTING: There is no confusion,
21 there is no unfair prejudice. I don't see any way
22 the State is prejudiced by this. This is just
23 simply a phone record that will attempt to establish
24 something that was going on with this phone, in a
25 very, very critical period of time for this trial,

1 which is between October 31st and November 5th when
2 her car was found, or November 3rd, when she was
3 found missing.

4 ATTORNEY KRATZ: How does that help this
5 jury decide who killed her? That's what the jury is
6 here to do, Judge.

7 ATTORNEY BUTING: Because unless the State
8 is prepared to establish that Mr. Avery had her
9 password, then he's not the one who is listening to
10 her messages on Wednesday November 2nd at 8:00 a.m.

11 ATTORNEY KRATZ: You said --

12 ATTORNEY BUTING: Somebody who knew her,
13 somebody who may have had a motive that he doesn't
14 have and somebody who may have had opportunity, was
15 doing that.

16 ATTORNEY KRATZ: Sounds like --

17 ATTORNEY BUTING: I'm not suggesting
18 that --

19 ATTORNEY KRATZ: -- third party liability,
20 Judge.

21 ATTORNEY BUTING: -- she was still alive.

22 ATTORNEY KRATZ: That's what it sounds
23 like.

24 THE COURT: I don't --

25 ATTORNEY BUTING: No, but I'm saying -- I

1 mean, I'm not going to argue that part to the jury,
2 because that's what the Court says we're not going
3 to do. But as far as what's relevant is, the police
4 have had this report and the police have not
5 followed up to find out what's up here.

6 Who was accessing Teresa Halbach's phone
7 mail on November 2nd, at 8 a.m. Either she was
8 alive and doing it herself, or somebody who had a
9 password to her voice mail was doing it. It's
10 got to be one or the two.

11 And I have a right to introduce this to
12 the jury as a another example of how the focus
13 was all on Mr. Avery. And they knew Mr. Avery
14 didn't have the password. So -- And their theory
15 is, that he's already destroyed the phone.

16 So, again, this is an investigative lead
17 that could be critical, that the State has --
18 prosecution and police have not followed up. And
19 the jury has a right to see that, it's part of
20 this defense. I obviously will limit -- we're
21 not going to get into motive -- I will limit it
22 to that.

23 THE COURT: Does the State know who
24 accessed the voice mail?

25 ATTORNEY KRATZ: I suppose we -- If there

1 was an inkling that Mr. Buting was going to suggest
2 that Ms Halbach was alive at that time, this is
3 something that could have been looked into
4 investigatively. That's another thing that we can
5 do, if the defense is, once again, changing its
6 theory.

7 ATTORNEY BUTING: This is not changing
8 theory at all. This fits perfectly to show that
9 they have not followed up this investigative lead,
10 because this investigative lead points elsewhere
11 than Mr. Avery. Doesn't fit with their theory. And
12 here we are in the middle of the trial and it hasn't
13 been investigated. The jury has a right to know
14 that.

15 THE COURT: All right. I'm, I guess,
16 having trouble tying it's relevance or probative
17 value. I'm not going to allow it at this time. But
18 I'm not going to automatically exclude it either. I
19 want a little time to think about it. It will give
20 some -- the State some time to see if they have an
21 explanation for who listened to it, or under what
22 circumstances someone listened to it. But I'm --
23 It's -- I'm having trouble seeing the apparent
24 relevance of it at this stage of the trial.

25 Let's bring the jurors back in. Do I

1 take it that you have another technical person
2 from Cingular who's going to be testifying?

3 ATTORNEY KRATZ: No, that's what -- that's
4 what Ms Dohrwardt was for, Judge. She's that
5 technical person who is able to testify about the
6 cell sites and about there was no cell site that
7 this hit off of and explain what that means, the
8 significance of that.

9 THE COURT: All right.

10 (Jury present.)

11 THE COURT: You may be seated. Mr. Buting,
12 you may continue.

13 BY ATTORNEY BUTING:

14 Q. Just a couple of other questions I need to ask
15 you. Does the -- Are you familiar with the
16 Cingular wireless dot com access site?

17 A. Yes.

18 Q. A customer can go online and access information
19 about their account?

20 A. Yes.

21 Q. To do that, you type in the website, when you get
22 to the website you have to put in a user name and
23 a password, right?

24 A. Right. You have to first set up the account.

25 Q. Okay. So in order to access those records, you

1 would have to -- someone would have to know the
2 user name and password, right?

3 A. Yes.

4 Q. And before you can find out, online, whose
5 making -- or what calls someone has been making
6 on a particular Cingular account, you would have
7 to get past that screen?

8 A. Yes.

9 Q. That requires a user name and a password?

10 A. Yes.

11 Q. There is no other way for me, or anyone else, to
12 find out who you have been calling on your
13 account, as an example?

14 A. Right.

15 Q. And in Teresa Halbach's case, the focus here,
16 since I don't know if it's a different type of
17 account, but to your knowledge, for one to access
18 Teresa Halbach's wireless account and find out
19 who was calling her or who she called on October
20 31st, one would have to enter a user name and a
21 password?

22 A. Yes.

23 Q. Okay. All right. Maybe I better put this up on
24 the ELMO so the jury can follow.

25 ATTORNEY BUTING: I just put an exhibit

1 back up on the Elmo again, Judge, that's got
2 numbers.

3 THE COURT: It has phone numbers. Is that
4 going to be the first one you put up there?

5 ATTORNEY STRANG: Yes, that will be the
6 first one.

7 THE COURT: All right. Then the TV camera
8 is instructed not to show the screen for this next
9 exhibit.

10 Q. (By Attorney Buting)~ Exhibit 361 is -- is now on
11 the screen, correct? Is that correct, ma'am?

12 A. Yes.

13 Q. Okay. I'm sorry. And this is the report that --
14 this is the record that you were testifying
15 about, on direct, as to information on Teresa
16 Halbach's wireless account?

17 A. Yes.

18 Q. I'm going to zoom it in a little bit because it's
19 hard to see here, but, for instance, in the --
20 what would be the second column, its says call
21 date, call time, it's got dialed number,
22 duration, etcetera, right?

23 A. Yes.

24 Q. Okay. And this column that says dialed number
25 has a lot of blanks in between the numbers. It

1 has got some numbers there and there are some
2 that are blank, right?

3 A. Yes.

4 Q. And even the numbers that are there don't give a
5 name, right?

6 A. Right.

7 Q. So this document doesn't really tell you who made
8 a call, for instance, at 12:29:08 p.m. that
9 lasted 40 seconds?

10 A. Correct.

11 Q. And this document doesn't tell you whose number
12 is 755-8715, does it?

13 A. Correct.

14 Q. So Exhibit 362, where it says sent and received
15 and has a whole lot of names in it, how did you
16 get those names; how did you tie those names to
17 any of these numbers, or to any of these calls, I
18 should say, since some of them don't even have
19 numbers?

20 ATTORNEY KRATZ: Judge, that's a summary
21 exhibit, this witness did not create. I think
22 that's been established.

23 THE COURT: I'm going to excuse the jury
24 again for a couple of minutes here. The witness may
25 stay.

1 ATTORNEY BUTING: I -- Do I take that down
2 or leave it up?

3 THE COURT: You can leave it up.

4 (Jury not present.)

5 THE COURT: You may be seated. Counsel,
6 maybe I'm missing something here, but if the parties
7 agreed to have exhibits that only had names and not
8 numbers, I guess I don't understand the significance
9 of questions that are asking why these exhibits show
10 numbers and not names.

11 ATTORNEY BUTING: Judge, let me clarify. I
12 misspoke when I mentioned the one that's up there
13 that has the 755 number. My question is as to the
14 ones that are blank, where there is no phone number,
15 some of which are on this exhibit, I believe.

16 THE COURT: I understand that, I wasn't
17 second guessing that. But this is not the first
18 time we have had some questions about why the
19 summary exhibit show names, but the phone records
20 show only numbers. And I think it's unfair to
21 suggest to the jury that there's anything untoward
22 about that if the parties have agreed that they want
23 the summary exhibits to show names and not numbers.

24 ATTORNEY KRATZ: The Court directed us to
25 do this and that's why this exhibit was created. We

1 were in chambers and the defense agreed. There's
2 not a stipulation, that's great. Let us know.

3 ATTORNEY BUTING: Bear with me, just one
4 moment, your Honor. Judge, I think we have this
5 worked out, I apologize. The summary exhibit
6 includes phone numbers from other records and other
7 exhibits, that have already been introduced, this
8 witness doesn't know that.

9 I just want to clarify, through this
10 witness, that the absence of numbers on this
11 exhibit, where it says dialed, numbers in. That
12 doesn't, for instance, mean that it's a *67 call
13 or anything like that. The absence of those
14 numbers is just because, as I understand, they
15 are not Cingular customers; is that right?

16 THE WITNESS: The absence of the numbers
17 dialed? You mean, are you talking about like on --

18 ATTORNEY BUTING: Yeah.

19 THE WITNESS: Just the missing numbers?

20 ATTORNEY BUTING: Right.

21 THE WITNESS: Those would be *67, or
22 incoming calls.

23 ATTORNEY BUTING: Oh, so --

24 THE WITNESS: In our records, incoming
25 calls are not shown.

1 ATTORNEY BUTING: Unless they are a
2 Cingular person; if they are a Cingular person do
3 they show up on incoming?

4 THE WITNESS: No.

5 ATTORNEY BUTING: Oh.

6 THE WITNESS: No incoming calls show on the
7 records, just the outgoing calls.

8 ATTORNEY BUTING: *67 or otherwise?

9 THE WITNESS: Right.

10 ATTORNEY BUTING: Okay. We'll just clarify
11 that point for the jury --

12 THE COURT: Right.

13 ATTORNEY BUTING: -- and we'll also
14 explain.

15 THE COURT: I think counsel should explain
16 to the jurors that those summary exhibits have names
17 and not numbers because the parties agreed that's
18 how it's going to be done. Now, if there's -- if
19 there's any disagreement about a number matching a
20 name, that's a separate issue, but assuming that
21 there's no disagreement about that, I think that
22 should be clarified for the jury.

23 ATTORNEY KRATZ: I would appreciate it.
24 Thank you.

25 THE COURT: Who wants to do it?

1 ATTORNEY STRANG: We will.

2 THE COURT: Very well. All right. Let's
3 bring the jurors back in.

4 (Jury present.)

5 THE COURT: You may be seated. Members of
6 the jury, I apologize for the extra exercise we have
7 been giving you this afternoon. There was an issue
8 about the use of telephone numbers and the names of
9 the person -- persons associated with those numbers.
10 And I believe the attorneys wish to put a
11 stipulation on the record for you.

12 ATTORNEY BUTING: Judge, we have agreed
13 that the summary exhibits, which would be 362 and
14 360, would not include phone numbers of the persons
15 called, or calling in, for privacy reasons. And
16 they would be -- the summary exhibits would be
17 substituted with the names of the parties.

18 And having had some discussion now, we
19 clarified that the -- this witness doesn't
20 actually know all the information that's on 362,
21 because some of that information comes from other
22 exhibits. So that explains some of the confusion
23 that we were having.

24 THE COURT: All right. Mr. Kratz.

25 ATTORNEY KRATZ: Judge, I just wanted to

1 include in that stipulation that the Court and the
2 attorneys had been asked to substitute what would
3 have been phone numbers for names. Exhibits No. 360
4 and 362 were created by the State, at the suggestion
5 of the Court and the acquiescence of the defense.

6 We believed those to be, and still
7 believe them to be accurate reflections of not
8 only the type of calls, the times, and the
9 durations of the calls. If there continues to be
10 any questions about that, we will call other
11 witnesses to explain them.

12 But with Mr. Buting's acknowledgement
13 that there was a confusion, at least with this
14 witness and perhaps with others, we hope that
15 that explanation for the jury suffices and that
16 360 and 362 can be admitted as Exhibits, as if
17 approved as summary exhibits. And if there are
18 any further questions, those can certainly be
19 asked, but certainly there shouldn't be any
20 further question as to the authenticity or
21 accuracy of these two exhibits.

22 ATTORNEY BUTING: Judge, just so we're
23 clear, we are stipulating as to the sent/received
24 column, the names that are there. We still do
25 dispute, because the exhibits are inconsistent as to

1 the 4:35 p.m. phone call, one of which says the
2 duration is zero seconds and another exhibit says 13
3 seconds.

4 So with that, otherwise, we don't have a
5 problem with these two exhibits.

6 ATTORNEY KRATZ: I understand that. And we
7 may recall that witness --

8 ATTORNEY BUTING: Okay.

9 ATTORNEY KRATZ: -- just to explain that
10 one call, Judge.

11 THE COURT: Very well. Mr. Buting, do you
12 have further questions?

13 ATTORNEY BUTING: Just one or two last
14 ones.

15 Q. (By Attorney Buting)~ Exhibit 361, which is still
16 on the screen here, just so we're clear, the
17 dialed number column there that has some phone
18 numbers and also has some blanks --

19 A. Yes.

20 Q. The ones that are blank are not blank because
21 somebody uses the *67 necessarily, right?

22 A. Correct.

23 Q. Those are simply all incoming calls of any sort.
24 Cingular doesn't print out the phone numbers?

25 A. Correct.

1 Q. All right.

2 ATTORNEY BUTING: That's all I have.

3 THE COURT: All right. Anything else from
4 the State?

5 ATTORNEY KRATZ: Not of this witness. I
6 will recall Ms Dohrwardt.

7 THE COURT: This witness -- You are
8 excused. And then we'll allow the State to recall
9 Ms Dohrwardt.

10 You may be seated. And, Ms Dohrwardt,
11 you are still under oath. Mr. Kratz.

12 ATTORNEY KRATZ: Thank you.

13 **DIRECT EXAMINATION**

14 BY ATTORNEY KRATZ:

15 Q. Ms Dohrwardt, the exhibit that is now being
16 shown, Exhibit No. 361, you see a column that's
17 called Icell, do you see that?

18 A. Yes.

19 Q. Do you know what that column represents?

20 A. I don't know for a fact, but by cell and the
21 numbers, I would interpret that to be cell site
22 numbers.

23 Q. All right. So the jury --

24 ATTORNEY BUTING: Objection, your Honor, if
25 she doesn't know, she doesn't know.

THE COURT: Mr. Kratz.

ATTORNEY KRATZ: I can ask her what cell site numbers are and how she believes that column relates to that, Judge. I would be happy to do that, or I can call somebody from the Department of Justice. We can do it either way.

THE COURT: Well, you may ask additional foundation questions if you believe it will help.

ATTORNEY KRATZ: I do.

Q. (By Attorney Kratz)~ Ms Dohrwardt, what are cell sites?

A. Those would be towers and sectors of towers. Ours are numbered, one tower could have up to six different numbers.

Q. On a cellular telephone is used, how does that cellular telephone communicate with a cell tower?

A. By registration.

Q. Does that happen --

A. There are certain events that cause registration.

Q. Why don't you explain that for us, if you can.

A. When a phone is powered on, it creates registration; when it makes or receives a call, it will show registration; sends or receives a message, it will show registration. And when it's powered down, physically powered down, that

1 would be the last registration and it would show
2 at that time that it was physically powered off.

3 Q. And what can physically power off a telephone or
4 a cellphone?

5 A. For where I'm talking, it would be holding the
6 power button.

7 Q. Okay. If a cellular phone is no longer operable,
8 that is, if a cellular telephone is somehow
9 destroyed, will it show that it is somehow off,
10 or powered down, or will it continue to bounce
11 off of or hit off of a cell tower?

12 A. No, it will no longer have a registration.

13 Q. And if a cellphone no longer has a registration,
14 that's two questions. First of all, can you
15 still send a call, like a voice mail message, to
16 that particular cellphone?

17 A. Yes.

18 Q. Physically, however, if it is no longer in
19 service, if it's destroyed, as an example; could
20 you physically answer or communicate with that
21 cellphone?

22 A. No.

23 Q. And do you know or do you have an opinion as to
24 how that may be reflected in cell records,
25 specifically in record No. 361?

1 A. I believe that the numbers in the Icell column do
2 represent cell site numbers, that represent the
3 cell site for each of those calls. And that at a
4 point there is no longer any communication with
5 the phone for the subsequent calls.

6 ATTORNEY KRATZ: Mr. Fallon can move that a
7 little bit to the left.

8 Q. Are you able --

9 ATTORNEY KRATZ: To the left, Mr. Fallon,
10 there you go, and up a little bit. The other way
11 Mr. Fallon. If I could see the cell site, there we
12 go.

13 Q. (By Attorney Kratz)~ Are you able, now looking at
14 Exhibit 361, to see at which time is the last
15 telephone call regarding this particular phone,
16 Ms Halbach's phone, that actually was hitting or
17 using a cell tower?

18 A. That would be the 2:41 p.m. call.

19 Q. After 2:41 p.m., on the 31st of October, has Ms
20 Halbach's phone ever again, as this exhibit shows
21 you, receive or send a phone message?

22 A. No.

23 Q. So the 4:35 call, specifically, do you see that
24 on there?

25 A. Yes.

1 Q. Says 13 seconds; is that right?

2 A. Yes.

3 Q. But do you see a cell tower that's associated
4 with that?

5 A. No.

6 Q. What does that tell you?

7 A. That tells me that that duration was spent in
8 voice mail.

9 Q. That it wasn't -- Does it tell you whether or not
10 it was physically answered?

11 A. It could not have been. There's no cell site
12 communicating with the phone for that call.

13 Q. So if a cell call doesn't physically ever bounce
14 off a tower, it can't physically ever be
15 answered; is that what you are saying?

16 A. Correct.

17 Q. And is that the 4:35 call that is shown in
18 Exhibit No. 361?

19 A. Yes.

20 Q. And, in fact, every call thereafter, that phone
21 never bounces off a cell site, does it?

22 A. Correct. There's no registration.

23 ATTORNEY KRATZ: That's all I have got,
24 Judge. Thank you.

25 THE COURT: Mr. Buting.

1 ATTORNEY BUTING: Just a couple of points
2 of clarification. Sorry, I'm an idiot on this
3 stuff, bear with me.

4 **CROSS-EXAMINATION**

5 BY ATTORNEY BUTING:

6 Q. You said that when the phone is powered down,
7 there is no registration, right?

8 A. There is an event that shows --

9 Q. Okay.

10 A. -- that it's physically powered down. And that
11 we would see in the switch.

12 Q. But you can't tell that from these records?

13 A. No.

14 Q. Okay. And if someone calls you when your phone
15 is powered down, it goes into -- their phone
16 still pings off some sort of tower, right?

17 A. Who's theirs?

18 Q. The calling party.

19 A. The calling party calling a powered down phone?

20 Q. Sure.

21 A. Yes.

22 Q. It still goes to a tower?

23 A. The calling phone, yes.

24 Q. And then that tower, what, searches for the
25 other -- for the receiving phone? If it doesn't

1 find it, it goes to voice mail, is that how it
2 works?

3 A. It depends on whether you're same carrier or not
4 same carrier, that you are calling.

5 Q. So, here it was a phone call from your carrier
6 that goes to a tower trying to reach a phone
7 that's not answering it, or not picking it up,
8 will it go to that voice -- to that other
9 carrier's voice mail, or how does that work?

10 A. The other carrier switch would have conditions or
11 triggers that, certain conditions are met, send
12 the call to voice mail, such as no answer after
13 25 seconds.

14 Q. Okay.

15 A. It knows the phone is powered off and then it
16 would send it immediately to voice mail, not --

17 Q. Okay.

18 A. -- 13 seconds typically.

19 Q. Okay. So this -- your best estimate is this
20 probably went to voice mail?

21 A. Right.

22 Q. As did the other ones after that?

23 A. Right.

24 Q. And the only way then to retrieve those messages
25 if -- let's say if the phone was destroyed,

1 somebody would have to be calling in on a land
2 line and using and accessing that through a
3 password?

4 A. Right. From any other phone, you can access
5 voice mail.

6 Q. With a password?

7 A. With a password?

8 ATTORNEY BUTING: All right. Thank you.

9 THE COURT: Anything else?

10 ATTORNEY KRATZ: No, Judge. I didn't know
11 if -- if those four exhibits have been received. I
12 believe they have, but if not, I would offer them at
13 this time.

14 THE COURT: Any objection at this time?

15 ATTORNEY BUTING: Yes, we can talk about --
16 We do have an objection to summary exhibits, but I
17 think we can probably work that out with counsel,
18 during a break.

19 THE COURT: All right. I'm going to excuse
20 the witness at this time. And members of the jury,
21 I'm going to excuse you for the day as well.
22 Remember not to discuss the case among yourselves or
23 with anyone else. And make sure not to watch any
24 news media accounts of the case. We will see you
25 tomorrow morning at the normal time.

(Jury not present.)

THE COURT: You may be seated. We're still on the record here. Counsel, with 360 and 362, are you referring to the phone numbers that the defense may want to add to the exhibits, or something else?

ATTORNEY STRANG: What we would like to do is, I think talk to the State about modifying the exhibits. They may well agree. Just, you know, to include the information that -- that we want on and have elicited.

There's no reason the jury would have to know that the exhibit has been modified. The jury hasn't seen 360 or 362. Assuming we can reach an agreement with the State, as I expect we will, then we would not have an objection to the admission of 360 or 362 and the jury can see them at that point.

THE COURT: All right. Well, let's make sure to take that up first thing tomorrow morning. I would like to meet briefly with counsel in chambers before you leave today.

ATTORNEY KRATZ: Just, Judge, if I can just complete the record. 360 and 362 were both shown by Mr. Buting, to the jury. I promised the Court I wouldn't show them until we made any changes that

1 there was going to be. I suspect none of them are
2 going to pick up on that. And I don't have any
3 objection to Mr. Buting and Mr. Strang and I trying
4 to refine those exhibits. And if the Court has no
5 objection and Madam Clerk doesn't as well and we can
6 come to some agreement, we'll simply substitute
7 those exhibits.

8 ATTORNEY STRANG: I stand corrected,
9 Mr. Buting says he did briefly swipe them past, but
10 we'll see what we can work out.

11 THE COURT: All right.

12 (Proceedings concluded.)

1 (Reconvened at 9:12 a.m., jurors not present.)

2 THE COURT: At this time the Court calls
3 State of Wisconsin vs. Steven Avery, Case No.
4 05 CF 381. We're here this morning, uh, outside the
5 presence of the jury at this time for the
6 continuation of the trial in this matter. Will the
7 parties state their appearances for the record,
8 please?

9 ATTORNEY KRATZ: Good morning, Judge.
10 The State appears by the Calumet County District
11 Attorney, Ken Kratz, Assistant Attorney General,
12 Tom Fallon, Assistant D.A. Norm Gahn, appearing
13 as special prosecutors.

14 ATTORNEY STRANG: Steven Avery's present
15 in person, Jerome Buting and Dean Strang on his
16 behalf.

17 THE COURT: All right. I'll indicate for
18 the record that I met with counsel, uh, in chambers
19 before beginning today, uh, to discuss the schedule
20 for today, uh, and, uh, the Court also discussed
21 with counsel the, um, issue relating to the, uh,
22 victim's, uh, voicemail records, which the Court
23 reserved ruling on, uh, yesterday, uh, and I'd like,
24 uh, counsel to indicate the status of that matter as
25 they see it, uh, this morning.

1 Um, Mr. Buting, you were offering the
2 evidence, so I'll have you go first.

3 ATTORNEY BUTING: Yes, Judge. Uh, my
4 understanding is that, uh, there may or may not
5 be a -- a explanation that -- acceptable to the
6 defense as to the, uh, nature of these particular
7 records, which seem to indicate that messages
8 were listened to only through November 2 at eight
9 a.m.

10 Um, the State is going to be following
11 up on this and attempting to confirm, or get some
12 information, or actually present a -- a witness
13 from Cingular who can explain their records,
14 which clearly seem to indicate that, to me, if
15 the records are -- can be explained otherwise,
16 then we'll have that answer, and, if not, then
17 it's something that we will be raising and asking
18 the Court to permit, um -- to be admitted at
19 this -- in this trial.

20 THE COURT: Mr. Kratz?

21 ATTORNEY KRATZ: Judge, we, uh, will
22 have a combination of witnesses that will explain
23 Mr. Buting's misinterpretation of these records.
24 Uh, we intend to do that before the close of our
25 case, just as soon as those witnesses, which we

1 expect to be remote witnesses, that is, from out
2 of state, uh, are, uh, available. I'll alert the
3 Court and Counsel of that fact and we will be
4 calling them, as I mentioned, before the close of
5 our case.

6 THE COURT: All right. Uh, anything else
7 before we bring in the jurors?

8 ATTORNEY BUTING: One thing I wonder is
9 whether we might want to at least mark the
10 exhibit that we were, uh -- that's the subject of
11 this issue so that it could be not presented to
12 the jury, obviously, unless it's so ruled, but at
13 least it is part of the record?

14 THE COURT: Oh, um, I agree. I wasn't
15 aware it hadn't been marked. Uh, it definitely
16 should be.

17 (Exhibit No. 372 marked for identification.)

18 ATTORNEY BUTING: All right. So this
19 is --

20 THE COURT: What is the exhibit number?

21 ATTORNEY BUTING: It's 372, but the,
22 uh -- Exhibit is 372 and it's a, uh -- a computer
23 record of voicemails from Teresa Halbach's
24 Cingular phone covering the period of October 31
25 through November 3. I think there actually is

1 one two weeks later even, November 16. Um, a
2 record from Cingular, and the interpretation or
3 explanations of it will have to wait until we can
4 find out further information.

5 THE COURT: Very well. Anything else
6 before we bring in the jury?

7 ATTORNEY KRATZ: Your Honor, I think I
8 need that exhibit number again. I'm sorry.
9 Three --

10 THE CLERK: Three seventy-two.

11 ATTORNEY KRATZ: Three seventy-two.
12 Thank you.

13 THE COURT: All right. You can call in the
14 jury.

15 (Jurors in at 9:17 a.m.)

16 THE COURT: You may be seated. Uh, good
17 morning, members of the jury. Uh, Mr. Kratz, at
18 this time you may call the State's next witness.

19 ATTORNEY FALLON: Um, yes, Your Honor.
20 Um, the State would call, uh, to commence
21 testimony today, Special Agent Tom Sturdivant.

22 **THOMAS STURDIVANT,**
23 called as a witness herein, having been first duly
24 sworn, was examined and testified as follows:

25 THE CLERK: Please be seated. Please state

1 your name and spell your last name for the record.

2 THE WITNESS: Thomas Allen Sturdivant,
3 S-t-u-r-d-i-v-a-n-t.

4 **DIRECT EXAMINATION**

5 BY ATTORNEY FALLON:

6 Q What do you do for a living?

7 A I'm a special agent with the Wisconsin Department of
8 Justice, Division of Criminal Investigation.

9 Q How long have you been employed with the
10 Department of Justice?

11 A Since November of 1998.

12 Q What is your current assignment?

13 A I am currently assigned to the Narcotics Bureau.

14 Q And how long have you held that assignment?

15 A Approximately two years now.

16 Q And where are you based?

17 A I'm based out of Wausau.

18 Q Prior to receiving a narcotics assignment, what
19 else -- what other assignments have you held in
20 the employ of the Department of Justice?

21 A I worked in the Arson Bureau, as well as the
22 Financial Crimes Bureau.

23 Q Prior to joining the Wisconsin Department of
24 Justice, had you had other law enforcement
25 experience?

1 A Yes. I was -- I worked in the Maine State Police
2 from 1998 -- I'm sorry -- 1988 until 1998.

3 Q And that is the state of Maine?

4 A That is correct.

5 Q And what did you do for them?

6 A I was a uniformed trooper for approximately seven
7 years and a detective for three years.

8 Q Generally, what kinds of cases did you
9 investigate for the, uh, Wisconsin State Patrol
10 in Maine?

11 A The Maine State Police. I investigated a variety of
12 things from basic line patrol duties, uh, traffic
13 accidents, to investigating, uh, organized crime.

14 Q Agent Sturdivant, were you called upon to assist
15 other law enforcement entities in the
16 investigation of the, uh, death of Teresa
17 Halbach?

18 A I was.

19 Q How did you become involved?

20 A On November 8, 2005, I assisted with executing a
21 search warrant at the Avery business, and later that
22 afternoon I also assisted in looking at, um, areas of
23 interest that were marked by search teams.

24 Q All right. What types of, uh -- or what --
25 what -- what -- Excuse me. What were some of the

1 areas of interest that you, um, investigated
2 further?

3 A During that day, we looked at vehicles, we looked at
4 earthen piles, we looked at things that were marked
5 by flags that might have been discovered by the State
6 Patrol, or we were just looking at things to
7 determine if they had any evidentiary value.

8 Q Directing your attention, then, to the afternoon
9 of November 8, approximately 1:30 in that
10 afternoon, did you have, uh, occasion to, um,
11 meet with a Manitowoc County Sheriff's Officer by
12 the name of Jason Jost?

13 A I did.

14 Q Tell us about that encounter.

15 A Prior to that, we were at the command post and we
16 were asked to go out and take a look at a variety of,
17 uh, different things; the earthen piles, the
18 vehicles, and so forth. And, along the way, um, we
19 came across Jason Jost who was standing in front of a
20 red flag that had marked an item on the ground.

21 Q And where was that particular item marked?

22 A That item was, uh, located behind Steven Avery's
23 garage and south of the earthen pile, uh, behind the
24 garage, approximately 80 feet from the so-called burn
25 pit.

1 Q And we're going to show you, um, a photograph. I
2 believe it's been received as Exhibit 86.
3 Directing your atten -- uh, attention to Exhibit
4 86, we're zooming in on what has previously been
5 identified as the, uh, portion of the property
6 attributed to Mr. Avery.

7 Um, directing your attention, then, to
8 Exhibit 86, does that assist you in illustrating
9 where your attention was drawn to by, uh, Deputy
10 Jost?

11 A Yes, it does.

12 Q All right. Would you, with the laser pointer,
13 indicate, uh, where you and Deputy Jost were,
14 uh -- where your attention was drawn to?

15 A If this is -- this -- this is the earthen pile here,
16 we were standing just beyond it about, uh, eight
17 feet, um, beyond that earthen pile.

18 ATTORNEY FALLON: Would the record
19 reflect the, uh, witness has indicated with the
20 laser pointer, uh, a direction a few feet,
21 apparently, uh, eight feet south of the pile,
22 which would be the top of the picture, uh, as
23 zoomed in here on Exhibit 86?

24 THE COURT: Does the defense agree?

25 ATTORNEY STRANG: I don't have any

1 quarrel. It's up to the jury in the end.

2 THE COURT: All right. Uh, the record will
3 so reflect.

4 ATTORNEY FALLON: Thank you.

5 Q (By Attorney Fallon) After Deputy Jost do --
6 drew your attention to this particular, um,
7 matter, um, first of all, could you describe a
8 little more fully what you and he were looking at
9 at that point?

10 A Excuse me. Deputy Jost was standing in front of what
11 appeared to be, in my opinion, a piece of bone
12 fragment. It was approximately one inch in length.
13 And, um, my opinion was, and I think we kind of
14 agreed, that it was a, uh -- a -- a piece of bone
15 fragment. And after looking at that, I looked at
16 this so-called burn pit at the end of that pile of
17 gravel and also noticed other -- what in my opinion
18 were bone fragments, um, that were obvious, uh,
19 around that, uh, pile of debris.

20 Q All right. And, um, I'd like to, uh, show you
21 some exhibits now. While we retrieve one exhibit
22 already introduced, I'm going to have Agent
23 Fassbender provide some additional photos for
24 your examination.

25 First of all, though, before we look at

1 those photos, I'd like to direct your attention
2 to Exhibit No. 50 as, um -- as portrayed on the
3 scene. Do you recognize that particular area?

4 A Yes.

5 Q Is that a photograph of how the burn area looked
6 when, uh, you first, um, began to inspect it?

7 A That is correct.

8 Q All right. And I note that there is a, uh,
9 German Shepherd, uh, prominently featured in the
10 center of this photograph?

11 A That is correct. It was a large, uh, in my opinion,
12 intimidating, big German Shepherd that stood on top
13 of that pile.

14 Q All right. And, um, was that, uh, German
15 Shepherd there when you first approached the area
16 to, uh, examine the article found by Deputy Jost?

17 A Yes, he was.

18 Q All right. Now, you indicated the dog was large
19 and intimidating. Could you elaborate on that?

20 A As you walked towards the mound of dirt, the dog
21 would come out and, um -- and, at times, um,
22 aggressively, um, charge towards the people that were
23 walking towards the earthen pile.

24 Q All right. Um, I believe we have some additional
25 photographs in front of you? So would you take

1 the first one on the pile, uh, turn it over, and
2 tell us what exhibit number that is?

3 A Exhibit 363.

4 Q All right. And do you recognize Exhibit 363?

5 A I do.

6 Q And what is Exhibit 363?

7 A It is a picture of -- of the dog, the earthen pile,
8 and this is a pile of, uh, sand, rock, and stone that
9 stood probably a, uh, foot to two feet above the
10 grass where the natural landscape.

11 Um, and the left -- or the low left-hand
12 corner of this, you can see in part of the burn
13 pit, um, can see the hammer that was, uh -- was
14 at the site as well, as well as the burned out
15 frame -- uh, what appeared to me a metal frame
16 seat from a motor vehicle, and lots of
17 steel-belted, uh, wire from what I thought
18 were -- were -- were steel-belted tires.

19 Q Very well. I'm going to have, um, uh -- go back
20 to Exhibit No. 50, and, um, see if we can get a
21 perspective that I'd like you to identify.

22 Again, looking at Exhibit 50, can you
23 indicate with your laser pointer the approximate
24 location of the first bone that you and Deputy
25 Jost, um, examined?

1 A The first -- the first bone is approximately out
2 here. It's about eight feet, as I estimated, from
3 the beginning of the burn pit.

4 Q All right. So it would be in -- in -- what is in
5 our picture here, would be in the -- the front
6 foreground of the picture?

7 A That's correct. It would actually be in the grassy
8 area away from the burn pit.

9 Q And that would be, uh -- So as you indicated with
10 your pointer, the, uh, lower right-hand corner of
11 the photograph?

12 A That is correct.

13 Q Thank you. All right. Uh, again, and, um, to,
14 uh, direct your attention to the next, uh,
15 photograph, uh, which has been -- The photographs
16 have been presented to you there. What's the,
17 uh -- the next photograph that, uh, you have?

18 A Exhibit 364.

19 Q All right. And what is Exhibit 364?

20 A Exhibit 364 is a -- just a different angle, um, of
21 the earthen burn, if you will. Um, you can see the
22 doghouse within that, um, and you can see the metal
23 seat, the burned out metal seat, um, metal frame of
24 the vehicle seat if -- in my opinion.

25 Q All right.

1 A Um, and you can see the -- you can see the pile.
2 This is the pile of sand and gravel that stood above
3 the landscape, and the doghouse.

4 Q All right. And there's also a propane tank
5 prominently featured in this photograph?

6 A That is correct.

7 Q All right. And, uh, the next photograph?

8 A Next exhibit is, uh, 365.

9 Q Do you recognize Exhibit 365?

10 A I do.

11 Q Okay. And Exhibit 365 is what?

12 A Exhibit 365, um, represents what I initially saw.
13 Um, the bone was out here that I initially looked at.
14 I looked at the burn pit, walked over, this is where
15 I saw charred debris to include what I believed to
16 be, um, bone fragments, a shovel, um, the large dog,
17 a seat, a -- a tire out here, lots of, um -- in my
18 opinion, lots of, um, steel belts from burned tires.

19 I believe there was a hammer in here,
20 but, uh, this -- this is -- would be the debris
21 that I focused on right here.

22 Q Uh, does that -- uh, again, does that picture, as
23 does, uh, the last exhibit, truly and accurately
24 portray the scene before any, uh, further
25 investigation took place?

1 A Yes, it does.

2 Q All right. Now, um, you began to describe -- And
3 I think we may have interrupted you. Can you
4 estimate for us the approximate size of the area
5 where the burn is, itself, in terms of its, uh,
6 dimensions?

7 A I estimated this pile of dirt to be 30 feet by
8 30 feet. It was easily the width of this garage, and
9 I estimated it to be about 30 feet in length.

10 In the center of this pit -- We'll
11 consider this the bottom of the south side, if
12 you will, is a burn pit right here. Was a -- I
13 described that as being six feet in rectangular
14 shape. It appeared to me as though somebody had
15 taken a, um -- some sort of a construction
16 vehicle with a front end loader on it, and gone
17 in there and taken approximately six feet of that
18 out and created a concave area that looked just
19 like a -- a -- a pit.

20 Um, so it was, again, about six feet
21 wide, looked like somebody had taken a big shovel
22 from a bobcat or a front end loader and scooped
23 out dirt, and removed it, and -- and, um, dumped
24 it elsewhere.

25 Q All right. Now, I note in the -- in the far

1 background of this picture, we're going to zoom
2 in, um, is there a vehicle depicted there?

3 A Yes, there is.

4 Q All right. And was that vehicle, uh, in the area
5 as well?

6 A I do not recall.

7 Q Okay. All right. Next photograph, please?

8 A Next Exhibit is 366.

9 Q What is Exhibit 366?

10 A Again, this, uh, depicts the, uh -- a portion of the,
11 um, pile of dirt, as well as, um, I believe to be
12 that -- uh, Steven Avery's trailer, the, uh, propane
13 tank and a portion of the, uh, detached, uh, two-car
14 garage.

15 Q And, uh, in -- in the foreground in front of the
16 garage is a red box-like item? What is that?

17 A Yes. That would be the doghouse.

18 Q All right. And, again, is that, generally, the
19 layout of the scene and the burn area of -- uh,
20 when you came upon the scene, on Tuesday
21 afternoon, November 8?

22 A Yes, it is.

23 Q All right. Very well. Um -- All right. Let's
24 talk, uh, again, about what you did after you and
25 Deputy Jost examined this particular, um, um,

1 bone fragment? What did you do?

2 A After looking at the bone fragment, I then walked
3 towards this burn pit. So I walked from the bone --
4 from the, uh -- the piece of bone fragment out here
5 to the burn pit. I looked at the burn pit. I
6 observed what I thought were other bone fragments in
7 and around that burn pit. I picked up a twig. I
8 moved some leaves and other things, and I could see
9 other bone fragments within that -- within the
10 charred debris. Um, I noticed what I believed to be,
11 uh, skull fragments, uh, in that debris and
12 intertwined within the steel-belted tires.

13 Um, aside from that, I didn't do much
14 with that burn pit. Um, at that point we were
15 trying to, uh, uh, get in contact with the, uh --
16 the, uh, folks from the Crime Lab, as well as
17 some of our arson folks.

18 Q All right. And, uh, were you able to, uh, get a
19 hold of anyone in the Arson Bureau, uh, that
20 particular afternoon?

21 A Myself and another agent were, uh, trying to contact,
22 uh, the arson folks. I spoke with Kevin Heimerl. I
23 believe Deb Straus -- Straus spoke with the -- I
24 think, uh, Special Agent Fassbender, as well as one
25 of our other arson agents that happened to be, um,

1 working the investigation.

2 Q All right. And, um, you mentioned something
3 about the Crime Lab? Tell us about their
4 involvement if any?

5 A Um, and we -- we attempted, um, to get those folks to
6 the, uh -- to the scene. I understood that the Crime
7 Lab was busy retrieving or collecting other, um,
8 evidence from burn barrels and so forth, so that they
9 would not be available for a bit. Um, the arson
10 agents that we spoke with were also busy, um, with
11 other, um, investigative activities, uh, so we, uh --
12 we waited for the, uh, Crime Lab to, uh, show up.

13 Q All right. And, um, at approximately three p.m.,
14 were you assisted by members of the Crime Lab?

15 A Yes. Uh, I don't have the exact time, but at some
16 point later on, um, in the afternoon, the Crime Lab
17 did show up. Um, I believe it was John Ertl, Guang
18 Zhang, um, and Chuck Cates who arrived with a van and
19 set up a sifting apparatus, a large sifting
20 apparatus, on a tripod that required two and three
21 people to assemble it.

22 Q All right. And, um, after they came with their
23 equipment -- Well, first of all, before they came
24 with their equipment, were -- were there -- was
25 there anything removed, or any shovels taken to

1 that pit, anything disturbed in the fire pit
2 area, before the arrival of the Crime Lab, by
3 yourself or any other law enforcement officer in
4 your presence?

5 A Nothing was introduced, um, between the time that we
6 discovered the pit and the time that the Crime Lab
7 arrived. We did not have proper equipment, gloves
8 or, uh, proper clothing to, uh -- to, uh, process
9 that.

10 Q Did the Crime Lab provide the necessary equipment
11 to begin processing?

12 A They did.

13 Q In addition to, um -- Tell us about the sifting
14 apparatus?

15 A Well, the sifting apparatus is a large tripod that
16 has these large, I think they're maybe three foot in
17 length, a couple of feet wide, different strains of
18 different sizes so the debris, as you -- as you moved
19 it around, certain things would fall through, certain
20 things would remain above.

21 And so as -- After setting that up
22 and -- and getting it all set up, we then took
23 the debris from that debris pile, put it on top
24 or shoveled it on top of these screens as in
25 sifted through it, and, again, the small

1 particles would fall through, the large ones
2 would remain.

3 There were two different types of
4 strains. And we picked out what we thought were
5 bone fragments. Um, other things to include
6 metal grommets, as well as a, uh, zipper. And
7 all of those items that -- Again, we -- I'm not
8 an anthropologist. I'm not trained in that
9 field. We picked out things that we thought
10 might be bone fragments, to include teeth, and
11 placed them in a box which was then, um, taken by
12 the Crime Lab.

13 Q I'm going to have an exhibit marked, for your,
14 uh, examination, by Investigator Wiegert.

15 (Exhibit No. 373 marked for identification.)

16 ATTORNEY FALLON: Want to -- Would you
17 show Counsel, please?

18 Q (By Attorney Fallon) I'm showing you what has
19 been marked for identification purposes as
20 Exhibit 360 --

21 THE CLERK: Three hundred seventy-three.

22 Q (By Attorney Fallon) -- 373. Sorry. Do you
23 recognize that particular item?

24 A I do. It's the, uh -- the zipper that was retrieved
25 from the debris as we sifted through it and placed in

1 a larger box.

2 Q All right. Very well. I'm -- I'm going to have
3 you place that back in the box and have, uh,
4 Investigator Wiegert put it on the, uh, ELMO for
5 projection.

6 ATTORNEY FALLON: Leave it in the box
7 unless you don't think it will portray. Could
8 you zoom and adjust that light for us,
9 Investigator? Little out of focus. You'll have
10 to zoom out. Very good.

11 Q (By Attorney Fallon) Is, uh, portrayed on this,
12 uh, screen now for the benefit of our jurors, is
13 that the, uh -- the piece of zipper that you, uh,
14 discovered?

15 A Yes, it is.

16 Q Thank you. In your examination of that zipper,
17 did you notice any markings on that zipper?

18 A Yes. There were three letters on the zipper.

19 Q And do you recall those letters?

20 A I don't recall them, no.

21 Q I'll have the Investigator show you the exhibit.
22 Would a pair of reading glasses assist you?

23 A They -- they might. Thank you.

24 Q Age is a terrible thing, isn't it?

25 ATTORNEY STRANG: It's better than the

1 alternative.

2 THE WITNESS: The letters are Y, K, K.

3 Q (By Attorney Fallon) Thank you. Approximately
4 how long did this, uh, sifting, um, process, uh,
5 take?

6 A The sifting process went on until, uh, just about
7 dark. Um, because of the darkness we were, um,
8 moving along, um, rapidly, trying to get -- we were
9 trying to retrieve, um, as much of the bones that we
10 could recognize and get those things to the Crime Lab
11 for examination.

12 Q All right. And why was that?

13 A Well, at this point in time, quite frankly, we don't
14 know if Teresa Halbach is alive or dead. So I had
15 made the decision that we need to get these bones,
16 um, off to the Crime Lab to determine whether or not
17 these bones were human bones and belonged to Teresa
18 Halbach.

19 Q And, um, generally, how did you and, uh,
20 Mr. Ertl, and, uh, Mr. Zhang, and Mr. Cates, and
21 I think you were -- said you were assisted by
22 Agent Straus?

23 A No. In terms of the sifting?

24 Q Yes.

25 A The sifting involved, uh, John Ertl, Chuck Cates,

1 and -- and, uh, uh, Guang Zhang from the Crime Lab,
2 myself and -- and Deputy, uh, Jason Jost.

3 Q Okay. And, um, how did the, um -- how was the
4 material taken from the pit and brought to the,
5 um, sifting apparatus?

6 A We set up the tripod. The tripod was, uh, just a
7 short ways from the burn pit, if you will. Um, might
8 have been, uh, maybe six feet from the burn pit. So
9 you've got this tripod device set up, you've got
10 these long, um -- elongated sifting devices that were
11 supported by -- by, uh, chains, and beneath that we
12 put a brown tarp.

13 John Ertl, or someone else from the
14 Crime Lab, took the shovelful of debris up,
15 placed it on top of the sifter. As we spread it
16 out with our -- with our hands and with our
17 gloves, and we sifted through it and picked out
18 those things that we felt were either bones, in
19 some cases the metal grommets, and the, uh -- the
20 zipper that, uh -- that we could discern, uh,
21 from -- from the pile of debris.

22 Other things -- you know, things that
23 fell through were placed on -- or fell to the
24 tarp. Um, the debris that could not fall through
25 was picked up and then dumped on that tarp. So

1 everything that we sifted was collected on top of
2 that tarp.

3 Other things like, uh, maybe a seat
4 belt, a metal seat belt fastener was -- was left
5 there, a hacksaw blade, other things that came
6 out of that debris, to include the, uh -- the
7 steel-belted, uh, uh, metal from the tires, that
8 was left there as well.

9 Um, so we -- we always sifted those
10 things that fit on the shovel, um, and the things
11 that we took out of that were placed in a large
12 box that the Crime Lab -- Crime Lab had and took
13 with them.

14 So we did it relatively fast due to the,
15 uh, darkness, uh, impending darkness, and, um --
16 and -- and -- and, again, carefully picked the
17 stuff up, put it on top of the, uh -- the
18 sifters, and sifted through it, and picked out
19 what we thought, was, uh, bone material and other
20 items of interest.

21 Q What did you do with the material that was left
22 on the tarp?

23 A The material that was left on the tarp was picked up,
24 collected, folded inside the tarp. There was another
25 tarp placed over it, and then we double-bagged it and

1 placed it inside a locked van at the crime scene. It
2 was basically turned over to -- to, uh, Deputy, uh,
3 Rick, uh, um, Riemer from the, uh, Calumet County
4 Sheriff's Department.

5 Q What did you do with the, um -- the -- the, um,
6 burn pit area, itself, uh, when it became too
7 dark to continue the processing?

8 A We -- we examined the scene and removed the stuff
9 down -- down to the ground surface. We did not dig
10 in the ground. We left, um, other items that we
11 found there, the shovel, and the hammer, the hacksaw
12 blade, the screw driver, um, the seat belt fastener,
13 the burned out frame, the tire, and other things were
14 left at the scene. The scene was covered with a
15 tarp.

16 And my decision was, if this turned out
17 to be Teresa Halbach, and we -- and we called
18 Special Agent Fassbender, that we should then
19 come back and more thoroughly examine this scene.
20 But our intention at that point in time were to
21 determine whether or not Teresa Halbach was alive
22 or dead at that point in time, and that's why it
23 was important to me just to get those bones off
24 to the Crime Lab to see if -- if, in fact, that,
25 uh, we discovered Teresa Halbach.

1 Q All right. Did you have any other concerns
2 regarding, um, the evidence, or the weather, or
3 anything else that factored into your
4 decision-making that afternoon?

5 A Well, um, part of that, uh, you know -- I mean, the
6 bones could have been carried off by animals, there
7 were a lot of things that could have happened, to
8 include rain or other in climate weather. I didn't
9 know the forecast at the time. Um, but, uh, we --
10 we -- we did make some preparations to cover the --
11 the, uh, burn pit, um, and pick up as many bones as
12 we could to prevent, the -- you know, the loss or --
13 or being carried off by an animal. Um, so that was,
14 uh, that -- that's what I did.

15 Q All right. I think you can remove your gloves.
16 I'm sure they're getting a little uncomfortable
17 at this point.

18 A Didn't know if there was other evidence or not.

19 Q Um, if you would, uh, examine, again, the
20 remainder of the photographs in front of you,
21 what's the -- the next photograph on the list?

22 A Yeah. That would be Exhibit 367.

23 Q All right. And what is Exhibit 367, please?

24 A That is the hammer that was, uh, um, beside the burn
25 pit. Um, that, um, was sitting, um, up on the ridge.

1 If you're facing the burn pit, up on the right-hand
2 side.

3 Q In the gravel portion?

4 A Yes.

5 Q All right. And, um, what's the next photograph?

6 A The next exhibit is, uh, 368.

7 Q And what is Exhibit 368?

8 A That's the, uh, screwdriver that was also, uh,
9 located in the pit.

10 Q Was that actually in the burn area, itself, or
11 was that in the surrounding gravel?

12 A I believe this was down inside the pit.

13 Q And what is the next item?

14 A Uh, a masonry trowel or a little pull, if you will.
15 And this was also, uh, in the, uh, burn pit area.

16 Q And that is Exhibit 3 --

17 A I'm sorry. Exhibit 369.

18 Q All right. And, finally, what else do you have
19 there?

20 A I got Exhibit 370 and 371. Exhibit 370, that's the,
21 uh -- the spade or shovel that was sitting on top of
22 the, uh, dirt and sand just to the left of the burn
23 pit.

24 Q All right.

25 A And the final exhibit I have is 371, and that is a

1 picture of the -- in my opinion, a -- a metal frame
2 of a, uh, seat from a motor vehicle. Um, this was
3 the seat that was seated -- If you're looking at the
4 pit, to the right of the pit, um, with, uh, a -- a
5 tire and some other -- other debris, to include the,
6 uh -- more metal from, uh, steel-belted tires.

7 Q All right. Um, and, finally, I'm going to
8 redirect your attention, I guess, back to, uh,
9 Exhibit No. 50, uh, which is one of the first
10 photographs. You don't have that in front of
11 you.

12 But, um -- Now, if we could, um, I
13 believe in Exhibit, uh, 50 there is a shovel,
14 which is depicted, uh, right there. Is that the,
15 uh, shovel that we just saw a picture of?

16 A That is correct.

17 Q All right. Very well. And, uh, in terms of the,
18 um -- I believe you have an exhibit in front of
19 you, uh, a photograph, uh, with the hammer and
20 its location?

21 A Yes. The hammer would have been located
22 approximately right here to the right of the pit
23 on -- on the, um, top of the mound.

24 Q All right. And now we have zoomed in on Exhibit
25 No. 50. Is that the, uh, hammer that we've just

1 examined in an evidence photo?

2 A That is correct.

3 Q Very well.

4 ATTORNEY FALLON: I have no further
5 questions for the witness. Subject to cross, I
6 would move into evidence the exhibits that we've
7 marked and identified during Agent Sturdivant's
8 testimony.

9 THE COURT: Any objection?

10 ATTORNEY STRANG: Uh, no objection to
11 any of the exhibits, which I think are 363
12 through 371, and then, numbers 373.

13 THE COURT: Very well. Those, um, exhibits
14 are admitted. Um, Mr. Strang?

15 ATTORNEY STRANG: Thank you, Your Honor.

16 **CROSS-EXAMINATION**

17 BY ATTORNEY STRANG:

18 Q Good morning.

19 A Morning, sir.

20 Q How many days were you out at the Avery property?

21 A I was out there, uh, one day, fully, and then just,
22 uh, partially for, um, a -- a morning.

23 Q The 8th was the full day out there?

24 A Yes.

25 Q November 10 was the other day?

1 A I believe so.

2 Q You were gone in between for court obligations or
3 something?

4 A That is correct.

5 Q How many, uh, sites did -- did you see while you
6 were at the Avery property at which you found
7 actual or suspected human bone fragment?

8 A Just one.

9 Q The one you've described here?

10 A That's correct. Yes.

11 Q Now, this site, though, uh, the first fragment
12 that you saw, uh, was next to a red flag?

13 A Yes, sir.

14 Q The red flag was next to a sheriff's deputy?

15 A That's correct.

16 Q The sheriff's deputy was Jason Jost or Jost?

17 A Yes, sir.

18 Q From Manitowoc County Sheriff's Department?

19 A Yes, sir. Correct.

20 Q That red flag and Deputy Jost were about eight
21 feet south of the burn pit or the burn area
22 you've described?

23 A That's correct.

24 Q Eight feet south onto grass?

25 A That's correct. Yes.

1 Q There did not appear to be burnt ground or burnt
2 grass in the area of that first bone fragment?

3 A There was not.

4 Q Didn't look like it had been used as a burn area?

5 A No.

6 Q Did the, uh, dog leash, so far as you know,
7 extend that far south to the, uh -- to the red
8 flag of the bone fragment?

9 A It did not, to the best of my knowledge.

10 Q While we're at it, um, the dog we saw in the
11 picture, did he or she stay there the entire time
12 you folks were sifting and going through this
13 burn pit?

14 A No. It's my recollection that the dog was removed, I
15 believe, prior to the sifting. So I thought the dog
16 was removed at some time between, uh, the time that
17 we contacted the Crime Lab and the time that we began
18 our sifting.

19 Q And that was a matter of asking an officer to
20 come and remove the dog?

21 A I'm not certain who did that, but I believe the dog
22 was removed by -- could have been the animal control
23 officer.

24 Q Okay. That was a matter of just simply making a
25 phone call and getting somebody to do it?

1 A Yes.

2 Q You had some prior experience as an arson
3 investigator with -- with our Crime Lab?

4 A I had never worked with the Crime Lab at a crime
5 scene prior to that.

6 Q I'm sorry. I -- I --

7 A I misunderstood the question, perhaps, but --

8 Q I may have misunderstood the testimony. I
9 thought -- I thought I had understood you to say
10 that you had experience as an arson investigator
11 prior to November 8, 2005?

12 A I did, but I never used the services of the Crime Lab
13 or the Field Team.

14 Q My mistake. My mistake. I'm -- I said Crime
15 Lab. What I meant was DCI, Division of Criminal
16 Investigation.

17 A That's correct. Yes.

18 Q Same Wisconsin Department of Justice, two
19 different entities within the Wisconsin
20 Department of Justice; right?

21 A Yes, sir.

22 Q Crime Lab, what we'll -- we will call DCI, the
23 Division of Criminal Investigation?

24 A Yes, sir.

25 Q All right. My mistake. You're with DCI?

1 A That's correct.

2 Q The Crime Lab people help process more
3 challenging scenes?

4 A Correct.

5 Q Uh, your work, though, with DCI had -- it had
6 included a stint as an arson investigator?

7 A Yes, sir.

8 Q Had you ever dealt with what -- what's called a
9 body cremation or a suspected body cremation site
10 before this one?

11 A Yes.

12 Q On how many occasions if you remember?

13 A Uh, maybe three or four different occasions. Not to
14 this extent, though.

15 Q Okay. And I -- and when -- when I say "body
16 cremation" I mean the distinguishing those from
17 what you'd -- what I -- I would call an arson
18 site. Are you also drawing a distinction?

19 A I would -- I would draw the distinction between we
20 talking about charred remains or somewhat decomposed
21 bodies from fire scenes?

22 Q Right. And let's develop that. I want to
23 develop that with you just a little bit more, all
24 right?

25 A Yes.

1 Q An -- an arson scene, uh, sometimes,
2 unfortunately, will -- will involve one or more
3 human fatalities?

4 A Correct. Yes.

5 Q In your experience with an arson scene, what has
6 happened is either you suspect, or someone
7 actually has, set fire deliberately to some
8 structure or property?

9 A Yes.

10 Q In your experience, as an arson investigator,
11 sometimes a murder has occurred in the structure
12 or at the scene and fire is set to try to dis --
13 disguise the murder?

14 A Correct. Yes.

15 Q In other situations, the fire is set and someone
16 inside the property perishes in the fire?

17 A Yes.

18 Q Whether intended by the arsonist or not?

19 A Yes.

20 Q What is common to arson scenes involving a
21 fatality, in your experience, is that, typically,
22 if there's a death, that body simply lies where
23 it falls, so to speak?

24 A Yes.

25 Q Uh, the -- the person may have died before a fire

1 was set, but the arsonist has set the fire and
2 left?

3 A Yes.

4 Q Or if the arsonist has started the fire and
5 somebody's unfortunate enough to be in the
6 building, or not be able to get out, the person
7 falls where the smoke or the flames overcome
8 them?

9 A As well, correct.

10 Q Uh, so, typically, in an arson scene that would
11 involve the recovery of charred human remains,
12 those remains, again, typically, in your
13 experience, simply are -- are in place and have
14 not been tampered with unless firefighting
15 personnel inadvertently have disturbed that
16 scene?

17 A There is typically a body or a -- somewhat of a, um,
18 um, body remain because, typically, that body remains
19 on a surface and is protected. In this case, um --
20 I'm sorry. And -- and, you know, in the arson scenes
21 I've been in, if the body remains on a surface, the
22 body is somewhat protected, um, so that there is a --
23 there is, um, somewhat, uh -- or often a -- a --
24 could be a complete body, could be a partially
25 decomposed body.

1 Q Sure. And in this -- I -- I don't mean to be
2 unnecessarily in a cob here, uh, this morning,
3 but, um, it -- when you say "protected", there
4 may be fallen debris or other materials from the
5 burnt property that are atop the body.

6 A That's correct. Typically, whatever the body is
7 lying on, or if there's something lying on the body,
8 that body will be protected. There will be a body.
9 My experience, of all the arsons I've been to, that
10 body is always protected on at least one side, and
11 you will see -- or have a body or a partially
12 decomposed body.

13 Q Right. Not something that's been re -- reduced
14 entirely to charred bone?

15 A Correct.

16 Q So when you say "protected", you'll have tissue
17 on at least one side of the body?

18 A Tissue, clothing, whatever's protected.

19 Q Sure. Because, for example, if someone falls
20 facedown on the floor, uh, the -- the -- the
21 thermal injury, the heating, has no access to,
22 then -- to the -- what would be the front side of
23 my body if I'm lying facedown on the floor?

24 A Correct.

25 Q Uh, and, again, barring inadvertent disturbing

1 of -- of that scene by firefighting efforts, um,
2 you would expect the -- the body or the remains,
3 essentially, to be contained within the area in
4 which the person fell or laid?

5 A For the most part, yes.

6 Q That's your experience --

7 A Yes.

8 Q -- for the most part in arson investigations?

9 Now, cremation, on the other hand -- And let's --
10 let's make clear that we're talking about illegal
11 cremation. We're not talking about the proper
12 disposal of a -- of a dead body. But a cremation
13 scene is different in a number of ways. One of
14 those is that cremation, as you understand it,
15 typically involves the intentional effort to
16 disguise a dead body?

17 A I'm not an expert in cremation, um, um, so it --
18 it's -- it's hard for me to say what actually goes on
19 with a cremation, but, um, you know, yes.

20 Q Cremation sites you've seen, in other words, uh,
21 you've understood, in your experience, to involve
22 someone's effort to conceal or destroy a human
23 body?

24 A Yes.

25 ATTORNEY FALLON: Your Honor, I'm going

1 to, uh, ask -- I have an objection. It might be
2 just a brief foundation question, but it's not
3 clear to me exactly how many cremation sites as
4 opposed to arson sites he's been to, and what
5 their condition was before those questions can be
6 elicited.

7 ATTORNEY STRANG: I -- I did ask. I'm
8 happy to ask again and develop that a little
9 further.

10 Q (By Attorney Strang) Maybe for Mr. Fallon's
11 benefit you can repeat the answer about the
12 number of cremation sites?

13 A Based on your, um -- what you're saying, I would -- I
14 would say that I've been to two cremation sites. One
15 being the Teresa Halbach site, as well as another
16 one.

17 Q Okay. And was the other one previous?

18 A The other one was previous, which also involved
19 sifting.

20 Q All right. And, uh, was that an outdoor site as
21 well?

22 A No. That was a vehicle, uh, scene. Body was inside
23 a motor vehicle.

24 Q All right. Um, but you viewed it as a cremation
25 site because you concluded that a deliberate

1 effort had been made to destroy a body by fire or
2 heat?

3 A I didn't consider it a cremation. I guess I
4 considered it at the, uh -- the fire scene. So...

5 Q Okay.

6 A Not being an expert in cremation.

7 Q No. No. And I -- And I'm not suggesting you are
8 an expert in cremation. I'm just trying to
9 distinguish --

10 A Right.

11 Q -- sort of a typical arson scene as you
12 understand it, where there may be a fatality from
13 a cremation sense.

14 A Yes.

15 Q A -- another distinction you made -- or you
16 make -- I think you suggested in discussing the
17 arson scene, where, uh, in the arson scene,
18 there -- there ordinarily would be at least one
19 protected side or area of the body. In a
20 cremation scene, the purpose is, uh, that -- that
21 the body not be protected and an effort made to
22 reduce the body to charred remains all the way
23 around?

24 A Not necessarily effort, but just the way the body's
25 positioned and elevated, for instance, under the

1 motor vehicle seat.

2 Q That could happen?

3 A Yes.

4 Q Um, and if the, um -- if the attempt in cremation
5 is to disguise or conceal the fact of the death
6 or the existence of the body, you may see
7 someone, then, disturbing the remains during or
8 after the fire?

9 A Yes.

10 Q Now, here, uh, you described for us the bone
11 fragment found eight feet, roughly, to the south
12 of the pit?

13 A Yes.

14 Q During the course of the day, day-and-a-half,
15 whatever it is, that you were involved in
16 sifting, uh, you also found suspected bone
17 fragments to the east of the burn area you
18 described?

19 A I'm not certain what you're speaking of. Within the
20 pit or outside the pit?

21 Q Let's go back, if we could, to Exhibit 50. Is
22 that possible? I have Exhibit 50 up?

23 A Yes.

24 Q Did you find fragments, uh, to the east, which
25 would be to the right in this photograph?

1 A This would be east, correct? Okay. The bone
2 fragment -- One was out here. There were bone
3 fragments intertwined in the steel belts, um --

4 Q Now, those belts are hard to see, um, but I think
5 the material you're referring to as -- as belts
6 almost looks like a -- a tumbleweed or a bramble
7 bush or something?

8 A Exactly.

9 Q Down in the --

10 A Crater.

11 Q Exactly. All right. Those -- You've seen burned
12 tires before?

13 A Yes.

14 Q And recognize the unraveling of the steel-belted
15 radial?

16 A Yes.

17 Q In heat. All right. And so you had bone
18 fragments to the east of the burn area?

19 A The bone fragments were concentrated within the pit,
20 but there were some bone fragments intertwined within
21 the steel belts, and I -- so the -- the -- the bulk
22 of -- of the debris, or bone fragments, were located
23 within the pit.

24 Q Sort of in a pile, in effect?

25 A Yes.

1 Q Did you find any fragments -- I understand that's
2 where the bulk were. Did you find any fragments
3 to the west of the burn area or the pit?

4 A The -- the bone fragments I concentrated on, and
5 there could have been others, but the bone fragments
6 that we concentrated on were the bone fragments
7 located in the pit.

8 Q So whether -- whether other officers picked up
9 fragments outside the immediate pit area and
10 tagged them separately, you don't know one way or
11 other?

12 A I don't know. I know that the scene was reprocessed
13 again, and that's when they could have picked up
14 those other bone fragments.

15 Q All right. Um, what is clear to you, or was
16 clear to you, when you were there on November 8,
17 is that the -- the area that appeared, uh, to
18 have been used for burning seemed to be in what
19 you're calling the pit?

20 A Yes, sir.

21 Q The pit, actually, appears to be more or less at
22 grade with the surrounding yard or lawn; correct?

23 A That is correct.

24 Q And then it looks like, uh, some dirt and -- or
25 gravel, uh -- doesn't look like topsoil,

1 necessarily, but dirt and gravel, rocks, at some
2 point were piled atop the yard or the grass?

3 A Yes.

4 Q So that -- so the dirt is what's elevated, and
5 what you're calling the pit is actually simply at
6 yard level?

7 A That's correct.

8 Q But burned on the bottom?

9 A Yes. And there's some burning along the sides as
10 well.

11 Q Signs of some heat?

12 A Correct.

13 Q All right. Now, the, uh -- You mentioned a
14 propane tank in one of these pictures. There was
15 no feed from the propane tank to this entire burn
16 area that you saw?

17 A Not to my knowledge, no.

18 Q The propane tank you understood to be for home
19 utilities and the trailer?

20 A That would be my guess.

21 Q Well, actually, more than a guess. You did not
22 see anything that looked like a -- a propane
23 feed --

24 A I did not.

25 Q -- heat source to the burn area?

1 A No.

2 Q Now, the, um -- You've learned that it was about
3 9:15 in the morning on November 8 that Manitowoc
4 Deputy Jost first alerted someone, Mr. Fassbender
5 or someone, at the, uh, site to this possible
6 bone fragment?

7 ATTORNEY FALLON: Objection. That's
8 incorrect statement of the testimony. 9:15?

9 ATTORNEY STRANG: I -- I don't think it
10 is a statement of the testimony.

11 Q (By Attorney Strang) Um, is that -- is that
12 something you learned?

13 A Absolutely not. I have no information on that.

14 Q When it happened?

15 A No.

16 Q Okay. What you know is that you got to the Avery
17 property, in general, about eight in the morning
18 on November 8?

19 A I think so. I'm not sure.

20 Q And give or take, uh, to this burn area at about
21 1:30?

22 A That's correct. My first duty was to conduct a
23 search warrant. I was standing around the command
24 post with myself, uh, Special Agent Deb Straus, and
25 uh, our supervisor, Pete Thielen (phonetic), who

1 was -- was, uh, requested to go out and take a look
2 at different things that had been discovered.

3 Q Sure. And, obviously, then, you have no way of
4 knowing at all who had been near this general
5 area described in Exhibit 50 for the three days
6 or so preceding November 8 at about 1:30 in the
7 afternoon?

8 A I had no prior information with respect to that until
9 I arrived, um, on scene.

10 Q Fair enough. Now, um, you mentioned in -- in
11 passing, um -- I'm going to go back to it just so
12 people didn't miss it, you -- you very candidly
13 told the jury, briefly, that you're not an
14 anthropologist?

15 A That's correct.

16 Q Uh, an anthropologist, you understand, to be a
17 scientist engaged in the study of the behavior
18 and culture of human beings, generally?

19 A Yes.

20 Q Neither are you an archaeologist, meaning a
21 subspecialty within the field of anthropology?

22 A Correct.

23 Q Archaeologists would be concerned with, among
24 other things, the, uh, preservation and recovery
25 of burial sites?

1 A Yes.

2 Q This is not something in which you have any
3 expertise at all?

4 A Absolutely none.

5 Q All right. Um, neither have you had any training
6 in human skeletal anatomy?

7 A None.

8 Q Okay. Uh, so what you -- what you did, and I
9 want to get into the -- And you call this a
10 recovery?

11 A If you'd like, yes.

12 Q Is that -- or do you have a -- a term you'd
13 prefer?

14 A No, that's fine.

15 Q Okay. Uh, so let -- let's get into the recovery
16 efforts on the afternoon of November 8. You get
17 there at about 1:30, and from that time on you're
18 at least in the area?

19 A Yes, sir.

20 Q Here? Um, but before doing anything, you want
21 the Crime Lab folks?

22 A That's correct. Yes.

23 Q That takes about another hour-and-a-half, give or
24 take. It's around three o'clock that the Crime
25 Lab team appears here?

1 A Yes.

2 Q Now, um, there -- there -- there isn't a delicate
3 way to say this, but, um, if what you were seeing
4 here was human bone --

5 A Yes.

6 Q -- whether it's Teresa Halbach or not, the --
7 the -- the -- the person whose bones they are is
8 beyond aid?

9 A Yes.

10 Q Um, so to the extent that people are hoping
11 Teresa Halbach is still alive or didn't know
12 about her fate at that point, uh, those searches
13 would have, and could have, continued elsewhere
14 outside of this burn area?

15 A I think they were.

16 Q There would have been no reason here to worry
17 about a living person in the immediate area
18 depicted in Exhibit 50?

19 A No.

20 Q When you folks, uh, started in on the recovery
21 effort, you focused on this six-by-six -- roughly
22 six-by-six rectangular area that you described
23 for us?

24 A That's correct. Yes.

25 Q All right. Um, now, you did not set up a -- a

1 grid, a stringed grid around that area?

2 A We did not. No.

3 Q You did not set up a contamination path to
4 control how people were going into or near that
5 area?

6 A No.

7 Q Uh, what you did was, uh, found that most of the
8 fragments, or things of interest, were sort of --
9 I don't know if pile is the right word -- but
10 sort of in the center of that six-by-six foot
11 area?

12 A The items I thought were bone fragments were the
13 items within this six-by-six pit. Yes.

14 Q And they were more or less centrally deposited?
15 At least the bulk of them? Is that --

16 A Most of them, in my opinion and my recollection, were
17 within the pile, yes.

18 Q All right. Um, so you folks, uh, set up the
19 sifting apparatus somewhere to the side or close
20 by?

21 A Sifting apparatus was set up just in front, maybe
22 just off to the right of the pile.

23 Q All right. You did -- You did not take
24 photographs up close of fragments in place?

25 A No, we did not.

1 Q Uh, in fact, you didn't take any of the
2 photographs you're seeing today?

3 A I -- I did not. No.

4 Q Do you -- Do you know whether the photographs
5 even were taken on November 8?

6 A These photographs here?

7 Q That you've identified?

8 A I don't know when they were taken.

9 Q Yeah. And clearly some of them show items in
10 the -- in a garage somewhere? Uh, you know, an
11 evidence garage? But you --

12 A Yes.

13 Q You don't know when any of the photographs were
14 taken?

15 A I do not. No.

16 Q The scene, though, was -- was generally as you
17 recall seeing?

18 A Yes, sir, it was.

19 Q All right. And, um, I think you observed some
20 additional suspected charred bone material both
21 within and around the debris pile --

22 A Correct.

23 Q -- which you've described?

24 A Yes.

25 Q So the sifting screens are set up just to the

1 south, and then what you folks do is you
2 undertake some shoveling?

3 A That's correct. Yes.

4 Q You go in -- do -- with that shovel or one of
5 your own?

6 A No. The Crime Lab brought out, uh, shovels to
7 process the scene.

8 Q And they also brought out some smaller sort of
9 hand trowels or scoops?

10 A I believe so. Yes.

11 Q So you -- you folks sort of wade in and scoop up
12 or shovel up --

13 A Well, I would --

14 Q -- a shovelful and take it to the sifter?

15 A I believe it was John Ertl and another Crime Lab
16 technician, if you will, that actually shoveled up
17 the debris and placed it on top of the sifter.

18 Q Okay. It's just -- just in the normal manner of
19 shoveling and then carried over and put it on top
20 of the sifting screen?

21 A Yes. We walked up, scooped up a shovelful of
22 debris, and placed it on top of the, uh, sifting
23 screen.

24 Q And, again, there's -- there's -- there's no
25 attempt to photograph fragments in place before

1 that?

2 A There were -- there -- I -- I took no photographs.
3 That's correct.

4 Q Okay. Uh, no attempt to mark, you know, as with
5 nail polish or some other, uh, color spot, any of
6 the fragments in place?

7 A There was not. No.

8 Q Okay. So you -- you go -- you -- you described
9 for us going through, uh -- you know, the shovel
10 goes to the sifting screen and that would be
11 probably the screen with the largest mesh first?

12 A Yes, sir.

13 Q You shake the screen on its chains that's
14 suspended from this tripod?

15 A Yes.

16 Q Sort of, you know, this kind of a motion?

17 A Exactly.

18 Q And then that falls down to a tarp or to a -- to
19 a -- a second sifting screen with smaller mesh?

20 A I believe there might have been a second smaller
21 sifting screen, which then the debris fell through
22 onto the ground tarp. Yes.

23 Q All right. And then you think there was a third
24 sifting screen somewhere with the finest mesh?

25 A No. Just -- just two screens.

1 Q Okay. Fair enough.

2 A Just picked out the things that we thought might be
3 bone fragments.

4 Q And the -- the things that are too small to get
5 caught in either of the two screens with the --
6 the second one with smaller mesh, go through to
7 the tarp?

8 A That's correct.

9 Q So the second, uh, sifting screen also would be
10 shaken a little bit?

11 A That's correct. Yes.

12 Q To -- to get stuff to fall through?

13 A Yes.

14 Q And what's left in the -- in the screen you would
15 examine by -- by eye and hand?

16 A Yes.

17 Q And if something looked like a pebble or a rock,
18 presumably you would leave it?

19 A If it didn't look like a bone fragment or a metal
20 grommet or a zipper or something, it was left to be
21 re-examined if, in fact, that turned out to be Teresa
22 Halbach.

23 Q Sure. And the things that to the eye looked like
24 they might be important, conceivably, you would
25 pluck out and put in the box?

1 A Correct.

2 Q And there, again, it -- it simply would go in the
3 box. There wasn't an identification or a -- a
4 nail polish dot or anything like that done at
5 that point?

6 A No, there was not.

7 Q All right. And then what was left on the tarp,
8 though, you -- you did keep?

9 A That's correct. Yes.

10 Q Yeah. The tarp you bundle up, sort of fold up,
11 and then double-bag in black, plastic garbage
12 bags?

13 A Yes.

14 Q Put that in a locked truck?

15 A Correct. Yes.

16 Q And all of that eventually goes to the Crime Lab?

17 A I don't know where it went to.

18 Q Okay. But -- but the purpose was to keep all of
19 this material so that it go -- could go to
20 someone who might identify it, if possible,
21 whether these are human bones?

22 A The intent was to protect it and keep it if it needed
23 to be re-examined.

24 Q During the time that you spent there at the scene
25 in Exhibit 50, you were not aware of a forensic

1 anthropologist being present at anytime?

2 A No.

3 Q Weren't involved in calling a forensic
4 anthropologist?

5 A I was not. No.

6 Q No photos were taken by anyone at the site during
7 the sifting process, itself?

8 A I did not take any photos. I'll take responsibility
9 for that and I'll take the criticism that comes along
10 with it. No.

11 Q Well, I -- I don't know that I'm really here to
12 criticize you. Uh, I -- you know, I understand
13 you're on cross-examination and --

14 A Yes, sir.

15 Q I -- I'm simply trying to elicit the fact --

16 A (Inaudible.)

17 Q Yeah. And when you say you didn't take any
18 photos, you didn't see anyone else taking --

19 A I did not. No.

20 Q -- photos either? Um, now, the -- the nature of
21 the sifting process, obviously, is to sort of
22 shake or rearrange whatever's in the sifting tray
23 from its original position?

24 A Correct.

25 Q Although the shovel would have done that as well,

1 obviously?

2 A Well, the sifter allows us to spread the debris out,
3 you know, because there's -- there were ashes in
4 there, there's other things in there that will fall
5 through, and allows to more closely look at those
6 items.

7 Q Right. Understood. But when I say -- You know,
8 by the time they get to the sifting tray, they've
9 already been scooped up with a shovel that picks
10 up whatever the shovel will hold?

11 A That's correct.

12 Q And from whatever area the person with the shovel
13 decides to next strike the shovel?

14 A Yes.

15 Q Were you in -- Were you involved on Thursday,
16 November 10, yourself, in sort of going back
17 and -- and reprocessing or continuing this?

18 A No. I -- I did sift, um, other material here at the
19 Sheriff's Department that we had collected.

20 Q But that was somewhat later or was --

21 A Yes, it was.

22 Q Not on -- not on November 10?

23 A Not on scene. No.

24 Q Okay. Um, I -- I probably covered this, but I --
25 but I just want to nail it down because I think I

1 asked you about potential sites of human bone
2 fragments on the Avery property. Um, were you --
3 were you sent to any potential sites or sites
4 where potential human bone was found off of the
5 Avery property?

6 A I was not. No.

7 Q Were you aware of any such sites?

8 A I was not.

9 Q Okay. That's all I have for you at the moment.
10 Thank you.

11 A Thank you.

12 THE COURT: Mr. Fallon, any, uh, redirect?

13 ATTORNEY FALLON: No redirect.

14 THE COURT: Very well. The witness is
15 excused.

16 THE WITNESS: Thank you.

17 THE COURT: Members of the jury, I think
18 we'll take our morning break at this time. I'll
19 remind you again, as usual, not to discuss the
20 case, uh, during the break.

21 (Jurors out at 10:27 a.m.)

22 THE COURT: Then, counsel, let's be
23 ready to go at quarter to eleven.

24 (Recess had at 10:28 a.m.)

25 (Reconvened at 10:54 a.m.)

1 THE COURT: Mr. Fallon, are you going to be
2 taking the next witness as well?

3 ATTORNEY FALLON: Yes.

4 THE COURT: You may call your witness.

5 ATTORNEY FALLON: State would call
6 Dr. Don Simley.

7 THE CLERK: Please raise your right hand.

8 **DONALD SIMLEY,**
9 called as a witness herein, having been first duly
10 sworn, was examined and testified as follows:

11 THE CLERK: Please be seated. Please state
12 your name and spell your last name for the record.

13 THE WITNESS: My name is Donald O. Simley,
14 S-i-m-l-e-y, II.

15 **DIRECT EXAMINATION**

16 BY ATTORNEY FALLON:

17 Q Good morning.

18 A Morning.

19 Q What do you do for a living?

20 A I'm a general dentist in Madison, Wisconsin.

21 Q And, uh, how long have you been a, uh, general
22 dentist in Madison?

23 A Uh, since 1976 when I graduated from Marquette.

24 Q Uh, generally, what does, uh, uh, that type of
25 practice entail?

1 A Uh, just the general taking care of, uh, individual
2 patients with their restorative needs and their oral
3 hygiene.

4 Q Does that include any orthodontia work or is --
5 just regular dental care?

6 A Uh, no, sir. Uh, just gen -- general dental care.

7 Q Do you have any areas of specialization within
8 the field of dentistry?

9 A Yes, sir.

10 Q And what would that be?

11 A Uh, forensic dentistry or forensic odontology they
12 call it also.

13 Q All right. And, uh, for the benefit of those of
14 us who don't spell well, could you tell us how to
15 spell odontology?

16 A Odontology is o-d-o-n-t-o-l-o-g-y.

17 Q Now, you mentioned the word "forensic dentistry"
18 or "forensic odontology". Could you tell us what
19 that is?

20 A Forensic dentistry, uh, is just the application or
21 science of dentistry to the field of law. And there
22 are a number of different areas that we can become
23 involved in in forensic dentistry.

24 Uh, the most common area that I've
25 become involved in is -- is in dental

1 identifications. Routine dental identifications
2 of individuals that are usually not identifiable
3 by traditional means.

4 Uh, also involvement is in mass
5 disasters, uh, bite mark evidence, child abuse
6 cases, uh, dental malpractice in negligence, in
7 trauma or injury that are involved in litigation.
8 Although, the last two areas I -- I usually don't
9 get involved in very often. But the other areas
10 we certainly do.

11 Q And how did you get involved in this particular
12 case, Doctor?

13 A On November 9, I believe it was, of 2005, I received
14 a phone call from Special Agent, uh, Dol -- Dorlin --
15 Duranda Freymiller from DCI, Division of Criminal
16 Investigation, uh, requesting assistance in the
17 identification of an individual who was burned.

18 Q And what were you asked to do, generally?

19 A Uh, to attempt to identify the remains of this
20 individual.

21 Q And, uh, why are you here today?

22 A Uh, to offer my opinion on, after my examination and
23 analysis of the evid -- analysis of the evidence, uh,
24 to give an opinion as far as what I found.

25 Q All right. Well, before we get to your opinion,

1 Doctor, let's, uh, find a little bit about your,
2 um, background if we may. Um, you indicated you
3 received a degree in -- in dentistry from
4 Marquette; is that correct?

5 A Yes, sir.

6 Q And when did you receive that degree?

7 A That was in 1976.

8 Q And prior to receiving your dental degree at
9 Marquette, did you receive an undergraduate
10 degree?

11 A Yes, sir.

12 Q And in -- from what institution?

13 A That was Elmhurst College in Illinois. That was in
14 1972.

15 Q And what was the degree in?

16 A Uh, it was a BS degree.

17 Q Bachelor of Science?

18 A Bachelor of Science. Yes, sir.

19 Q Um, after receiving your, uh, uh, Doctor of
20 Dental Surgery -- Is that what it is?

21 A Yes, sir.

22 Q From Marquette? Did you pursue any additional,
23 um, training?

24 A Uh, I became interested in -- in forensic sciences
25 and started taking classes in 1979 at the Armed

1 Forces Institute of Pathology out in Washington, DC.

2 Q What kind of institution is that?

3 A Um, they just have an annual course in forensic
4 dentistry. Uh, that's one of the -- supposed to be
5 one of the premier courses in forensic dentistry.

6 Q Um, did you receive any certificates associated
7 with that particular course?

8 A Yes, sir.

9 Q And what certificate did you receive?

10 A It's just a certificate in forensic dentistry.

11 Q Um, currently, um, do you heard -- do you hold
12 any certifications in the field of forensic --
13 forensic dentistry?

14 A Yes, sir.

15 Q What, uh, certifications do you hold?

16 A I'm board certified in forensic dentistry from the
17 American Board of Forensic Odontology.

18 Q All right. What does it mean to be board
19 certified?

20 A Well, you have to undergo kind of a rigorous, uh,
21 examination. You have to submit an application. Um,
22 and then you have to take an examination before a
23 national board.

24 Q All right. And, um, if you know, how many board
25 certified forensic dentists are there in the

1 state of Wisconsin?

2 A There's only two of us. An individual in Milwaukee
3 and myself.

4 Q And are you aware of approximately how many, uh,
5 are board certified in North America?

6 A There are approximately around a hundred dentists
7 that are board certified in the United States and
8 Canada.

9 Q Are -- are -- Do you belong to any professional
10 organizations that are particularly germane to
11 the field of forensic dentistry?

12 A Yes, sir.

13 Q And what are those?

14 A There's a number of them. Um, the American Society
15 of Forensic Odontology; uh, I'm a Fellow in the
16 American Academy of Forensic Sciences; I'm a member
17 of the Wisconsin Association for Identification; I'm
18 a member of the Wisconsin Coroners and Medical
19 Examiners Association; uh, I'm a member of the
20 National Disaster Medical System. Uh, under that is
21 a subgroup of what they call DMORT, which is the
22 Disaster Mortuary Operational Response Team. And I
23 think those are the ones that pretty much pertain to
24 the forensic sciences.

25 Q All right. If you could, uh, tell us, what is

1 the, uh, National Disaster Medical System? I
2 think you used the acronym DMORT?

3 A Under the NDMS -- NDMS, the National Disaster Medical
4 System, is DMORT, which stands for the Disaster
5 Mortuary Operational Response Team, which is a
6 subdivision of -- of the NDMS.

7 Q All right. And what -- what kinds of, uh -- what
8 type of involvement do you have with that
9 organization?

10 A That's pretty much for mass disaster involvement.
11 Um, if a plane crash would go down -- If a
12 jurisdiction would have more individuals to identify
13 than their local jurisdiction can handle, uh, they
14 would call in DMORT.

15 Q All right. And have you actually been involved
16 in any disaster response operations?

17 A Yes, sir.

18 Q And what have you been involved in?

19 A Uh, I went out to New York after the World Trade
20 Center and spent two-and-a-half weeks out there. And
21 af -- after Katrina, went down to New Orleans and
22 spent two-and-a-half weeks down there at temporary
23 morgues.

24 Q And was that all part of our country's, uh,
25 national disaster response -- coordinator

1 response to those incidents?

2 A Yes, sir.

3 Q How long have you been, uh, board certified by
4 the American Board of Forensic Odontology?

5 A That was in 1993.

6 Q Have you maintained that certification?

7 A Yes, I have. You have to recertify every five years.

8 Q Um, are you a member of any disaster response
9 teams, um, confined to the midwest part of our
10 country?

11 A Yes, sir.

12 Q And what are those?

13 A I'm co-leader of the Wisconsin Dental Association's
14 Dental Identification Team. Um, I'm a member of the
15 Cook County, in Chicago, their Mass Disaster Dental
16 Identification Team. Uh, Lake County, Illinois, just
17 north of Chicago, has a team also. And Minnesota.

18 Q All right. Um, have you ever testified in a
19 court of law regarding a dental identification
20 issue or a bite mark issue?

21 A Yes, I have.

22 Q Approximately how many times?

23 A I believe there are 31 times that I've testified.

24 Q And have you been asked to render what people
25 refer to as expert opinions regarding the

1 identification of either a bite mark or of human
2 remains?

3 A Yes, sir, I had.

4 Q Um, I believe you have in front of you Exhibit
5 374?

6 A Yes.

7 Q And, uh, what is Exhibit 374?

8 A Uh, this is a copy of my Curriculum Vitae or CV.

9 Q All right. Uh, and, uh, it's current as of what
10 date?

11 A January 1 of '07?

12 Q All right. Is that a true and accurate copy of
13 your, uh, Curriculum Vitae, uh, detailing your
14 experiences, history and training?

15 A Yes, sir, it is.

16 ATTORNEY FALLON: Subject to, um,
17 cross-examination later on, we would move for the
18 Exhibit, uh, 374, move its admission.

19 THE COURT: Any objection?

20 ATTORNEY STRANG: No, I -- No,
21 there's -- there's no objection.

22 THE COURT: All right.

23 ATTORNEY FALLON: Thank you.

24 THE COURT: The exhibit's admitted.

25 Q (By Attorney Fallon) Doctor, um, you indicated

1 you first received a call in this case on
2 November 9. Um, how did you actually become
3 involved?

4 A Well, Special Agent, uh, Freymiller called me and
5 asked if I would be willing to assist in the
6 examination and identification of these remains. Uh,
7 on the same date another individual from the Division
8 of Criminal Investigation, Special Agent, uh, Matthew
9 Joy, brought, uh, a box of -- of evidence to my
10 office for me to examine.

11 Uh, I also talked with -- I believe he's
12 an assistant district attorney from Calumet
13 County, Jeff Froehlich, and he asked me,
14 specifically, if the remains that I examined were
15 human or nonhuman, which I said they were human.
16 And, also, asked some, uh, questions regarding my
17 expertise and qualifications.

18 And at the same time I also discussed,
19 uh, what I had found so far with, uh, Sheriff
20 Pagel.

21 Q All right. And all in all, um, were there
22 several, uh, deliveries of items for -- submitted
23 to you for examination?

24 A Yes, sir, there were.

25 Q Approximately how many different deliver?

1 A There were six deliveries, of, uh, dental fragmentary
2 evidence, and then one delivery of -- of dental
3 records.

4 Q And, overall, approximately how many items were
5 you asked to identify? Approximately?

6 A There were 52 items of potential evidence.

7 Q And what did these items consist of?

8 A Of the 52 items, there were 24 dental fragments that
9 I was asked to look at. Um, of the 52 -- Sometimes
10 when you have a -- a -- a burned piece of wood, uh,
11 it -- it may look like a burnt piece of tooth,
12 because there wasn't a whole tooth, uh, as we can
13 visualize, that the crowns of the teeth had been
14 destroyed.

15 So when I was asked to look at was, uh,
16 the 52 pieces, there were 24 that were actually
17 tooth fragments. Not a whole tooth, but 24 tooth
18 fragments. There were three bone fragments, uh,
19 all from the lower jaw, and there were 24 pieces
20 of wood, and then there was one piece of -- of
21 plastic that looked like a crown of a tooth, but
22 when we were able to clean it up, we were easily
23 to tell it was a piece of plastic.

24 Q All right. Um, now, you mentioned something
25 about, uh, not unusual for wood to be mistaken

1 for teeth. Can you kind of explain that?

2 A When -- When the remains of an individual are -- are
3 burned to the extent that they were in this
4 particular case, you get a lot of fragmentation of
5 the teeth.

6 And so if you've ever had a wisdom tooth
7 extracted or another tooth extracted, and you see
8 the -- the crown of the tooth sticking up and you
9 have the root structure, when you have the degree
10 of, um, destruction or devastation that's
11 associated with the intensity of the temperature
12 of the fire and the prolonged duration of -- of
13 exposure to the fire, uh, this dental evidence
14 can become very brittle, it can fracture,
15 fragment, and, um, due to the burning aspects, it
16 can become charred and blackened. And so you can
17 have a piece of wood, a small piece of wood, that
18 can look very similar, and almost exactly alike,
19 to -- to some of the root fragments that are
20 associated there, also. And when the recovery
21 was taking place, it's difficult for somebody
22 who's not a -- a dentist to -- to discern between
23 some of these, uh, fragmented, burned dental
24 structures and, uh, burned pieces of wood.

25 In fact, even with me looking at them,

1 sometimes -- I mean, I can't always tell, and
2 that's why I rely on x-rays to really make a
3 definitive decision on some of them. Some of
4 them I could look at very easily and discern and
5 some of them I had to rely on the x-rays to
6 discern.

7 Q All right. And, uh, while we're at that, can you
8 describe in more detail the condition of the
9 tooth and bone fragments that you were asked to
10 examine and you were able to determine as tooth
11 and root fragments?

12 A Again, they were, um, blackened, they were charred,
13 uh, they were very brittle, they were very
14 fragmented, um --

15 Q In terms of a level of destruction, uh, based on
16 your experience in terms of your disaster relief
17 effort -- efforts and other forensic, uh,
18 experience, um, how badly damaged were these, uh,
19 fragments?

20 A Um, again, I've been doing this work since 1981.
21 And, I mean, I -- I've seen other cases very similar
22 to this, but, um, even most burn victims that I see
23 from -- from car fires or house fires, they're not
24 burned to the extent that these indi -- these
25 individual dental fragments were burned. They're

1 right up there at the top of the list as far as the
2 worst I've seen.

3 Q All right. Are you familiar with a term called
4 "fracture matching"?

5 A Yes, sir.

6 Q Tell us what that is.

7 A Again, with some of these dental fragments that I
8 examined, if I can take two pieces of a tooth, and if
9 I can fracture match them back together, in other
10 words, if I can say that they came from a common
11 source, I would put them back together.

12 Um, again, some of these fragments
13 are -- are very, very brittle, where if I take my
14 fingers and -- and just squeeze them, I could
15 destroy that piece of evidence, and if that
16 evidence is lost, it could preclude an
17 identification from being made.

18 So to pervert -- preserve that evidence,
19 if I could fracture match those pieces back
20 together and keep -- say that they came from a
21 common source, I would put them back together and
22 use a little cyanoacrylate or Super Glue and fix
23 them together. Um, and then that preserves the
24 evidence, it makes it stronger, makes it more
25 durable and less likely to be damaged or

1 destroyed.

2 Q Okay. And, uh, were you able to engage in this
3 fracture matching process with, um, the tooth
4 fragments and bone fragments that you received?

5 A There were -- On one particular date there were two
6 root fragments that I could fracture match back
7 together. I put those back together.

8 And there was a piece of bone fragment,
9 uh, that was also associated with that box or bag
10 of evidence that I received in that particular
11 day, and I could actually re-associate that now,
12 two root fragments that are -- are super glued
13 back together as one now, and I could
14 re-associate that with the bone fragment and put
15 back to the bone.

16 And then there was another date when
17 there were two other root fragments that I could
18 super glue back together. So there were two
19 roots that I could put back together and then
20 that one root back with the bone.

21 Q Um, of -- After you were done with your fracture
22 matching process, were any of the fragments
23 suitable for comparison?

24 A Yes, sir.

25 Q And what was, uh, suitable for comparison? What

1 did you have to work with?

2 A The best evidence that I had was the evidence that
3 was recovered, uh, the second time I was -- the
4 evidence was delivered to my office, and that was by
5 Special Agent Jim Holmes, and that was the -- the
6 fragments that I was able to fracture match back
7 together and the associated fragment of bone, which
8 was from the lower right quadrant, and that was the
9 best piece of evidence for comparison.

10 Some of the other dental fragmentary
11 pieces of evidence, even after x-rays and
12 studying these things for a long time, I mean,
13 you really couldn't even tell exactly which tooth
14 it was. Um, so this was the best piece.

15 Q All right. Now, um, in effort to make a dental
16 comparison, I'm assuming you had to have
17 something to compare this fracture fragment with?

18 A Correct.

19 Q What did you have?

20 A Special Agent Holmes, on, uh, November 10 of '05,
21 brought dental records to my office for comparison.
22 Uh, the record specifically were x-rays, which are
23 the main type of dental record that I look for in a
24 comparison.

25 And there was a -- a panorex x-ray from

1 2001. A panorex x-ray, um, is an x-ray that goes
2 around the outside of the mouth and picks up
3 everything from ear to ear.

4 There were also 16 bitewing x-rays. The
5 kind that when you normally go in to see your
6 dentist, and they take an x-ray, and they have
7 you bite down on the film, and they shoot the
8 x-ray in from the side, uh, is a bitewing x-ray,
9 which shows the most amount of tooth structure
10 with the least amount of x-rays. So it shows the
11 top and bottom teeth. It doesn't show the root
12 structure, the end of the root structure, but it
13 sometimes shows some of the root structure. And
14 those x-rays ranged from 1998 to 2004.

15 Um, and then there were other x-rays
16 that I received at a later date. Uh, on that
17 same date, on November 10, I was looking for some
18 additional x-rays, and I called the dentist
19 involved, a Dr. Krupka, I believe his name was,
20 and --

21 Q Who was Dr. Krupka, by the way?

22 A That was the -- the treating dentist for Teresa
23 Halbach.

24 Q Okay.

25 A And all the x-rays were labeled with the name Teresa

1 Halbach.

2 Q All right. And so you then received the
3 additional x-rays to assist in making this
4 comparison?

5 A Well, I -- I called him and asked if they had any
6 other x-rays, and they did have some older x-rays
7 from 1997. They had four bitewing x-rays. But he
8 said they were positioned a little further down in
9 the mouth, and so they actually showed more root
10 structure, uh, specifically, in the lower right
11 quadrant, which is the area I was concerned about,
12 and so he sent those to me and I received those on
13 the -- November 15.

14 Q All right. So you indicated you were concerned
15 with the, uh, uh, lower right quadrant. Uh, were
16 you able to specifically identify the tooth or
17 root fragment that you were, uh, focusing your
18 comparison on?

19 A Yes, sir, I did.

20 Q And what was that?

21 A That root fragment was from the lower right second
22 molar. And we refer to that as Tooth No. 31. Um,
23 there's what they call a universal numbering system,
24 and so that if I'm talking to a dentist in New York
25 City, or in Los Angeles, or in Florida, and I talk

1 about Tooth No. 31, they'll know I'm talking about
2 the lower right second molar.

3 Um, all the teeth have numbers from --
4 There's 32 teeth in the mouth. And from the
5 upper right, which would be Tooth No. 1, the
6 upper right wisdom tooth. The lower right wisdom
7 tooth would be Tooth No. 32. And the upper right
8 central incisor would be Tooth No. 8. So we have
9 a numbering system that we refer to. So this
10 specific tooth was a -- a lower right second
11 permanent molar.

12 Q All right. Now, uh, Doctor, did you have
13 occasion to have, uh, the Crime Lab assist you in
14 preparing a Power Point, uh, presentation to
15 further illustrate your, um, comparison process?

16 A Yes, sir, I did.

17 Q All right. Um, I believe it's -- is there a
18 exhibit in front of you that's, uh, marked?

19 A Just the CV.

20 Q Just the CV?

21 ATTORNEY FALLON: I believe the Court --

22 ATTORNEY KRATZ: I'm showing these now,
23 Exhibits 376 and 377.

24 Q (By Attorney Fallon) Um, Doctor, uh, first of
25 all, if you would identify Exhibit, uh, 376. Uh,

1 377, please?

2 A 377 is a, uh, copy of the pictures that are used in
3 the Power Point presentation.

4 Q All right. And, uh, if we now -- if we could
5 direct your attention, then, to the screen, we
6 have a depiction -- Um, one second.

7 ATTORNEY FALLON: We're going to provide
8 the Court with a copy. Very good.

9 Q (By Attorney Fallon) Um, Doctor, on the screen we
10 have a -- an item depicted. I believe there's a
11 laser pointer to your right --

12 A Yes, sir.

13 Q -- there if need be?

14 A Um-hmm.

15 Q Can you tell us what, uh, we're looking at here,
16 Tooth No. 31, and the word "buccal". What --
17 what does that mean?

18 A Well, again, Tooth No. 31 is -- uh, refers to that
19 lower right second molar, and buccal refers to the
20 side of the tooth. Each tooth has, like, five
21 surfaces that we can examine. We have the cheek
22 side, the tongue side, the biting surface, and then
23 what they call the mesialer, towards the front of the
24 mouth, the distal, towards the back of the mouth.
25 The buccal surface is the cheek side aspect that

1 we're looking at here.

2 Q All right.

3 A So the tooth that I'm looking at is right here. We
4 have two roots that are associated. This would
5 actually be where the roots would be for Tooth No.
6 30, which would be the first molar, which was not
7 recovered. So this fragment actually comes from the,
8 uh -- this bony fragment here comes from the second
9 molar, or second bicuspid, goes back to beyond the
10 second molar.

11 Q All right.

12 A But the cheek side aspect, or the buccal aspect,
13 sometimes it can be difficult to -- When you take
14 x-rays on a fragment, you have to make sure that the
15 x-ray film is on the tongue side. So it's very
16 critical to be able to identify which is the cheek
17 side, which is the tongue side, and -- and sometimes
18 on burned fragments they can be very difficult.

19 In this particular case, it would
20 really -- is -- is pretty easy for me to do that
21 because usually the cheek side aspect is a part
22 that's going to be destroyed and burned the
23 worst.

24 Q Why is that?

25 A Well, in a burn victim, as the -- Again, with the

1 intensity and the temperature of the fire, and the
2 prolonged duration of exposure, the -- actually, the
3 cheek will be destroyed first and then -- Again, the
4 crowns -- Again, if we look to the part that would be
5 in the mouth here, would be up here, and that part is
6 missing. So the crown has been destroyed and
7 essentially all the crowns have been destroyed in
8 this evidence. There was one portion of a crown that
9 was recovered and that was on a cuspid, or an
10 eyetooth, uh, which was really non -- not critical at
11 all in the comparison or identification here.

12 But the cheek side aspect is -- is
13 further protected from the bone. The roots of
14 the teeth are going to be protected from the
15 bone. The crown has been destroyed. But once
16 that fire -- Again, with the intensity and the
17 temperature of the fire, and the prolonged
18 duration of exposure, and the cheek is now gone,
19 we now just have the bone structure protecting
20 that tooth.

21 The crown doesn't have the bone support
22 protecting the crown of that tooth. The part
23 that's in the mouth. So that part has been
24 destroyed. But the root structure is being
25 further protected, insulated, uh, from the, um --

1 from the, uh, effects of the fire.

2 Q All right. In looking at that, how -- where,
3 exactly, is the -- would we call that the jaw
4 bone or not, or --

5 A That's a portion from that lower right corner of the
6 mouth. The lower white crad -- quadrant.

7 Q Could you point on the exhibit what part is bone
8 and what part is root fragment, just so that
9 we're clear?

10 A This is root fragment from Tooth No. 31. The rest of
11 this is all bone.

12 Q All right. Next one. All right. We have, uh,
13 another slide here, 231, lingual. What does that
14 mean?

15 A Lingual is the tongue side aspect. And this is where
16 it was, again, very easy, uh, to determine which was
17 tongue side, which was cheek side, because the tongue
18 side, while it's -- while it's blackened, where it's
19 been burned, but it's completely intact, as opposed
20 to the cheek side aspect, or the buccal aspect, that
21 was -- was rough and had burned -- burned away down
22 to the root structure in there.

23 Q All right. Excellent. And what are we looking
24 here on the third slide marked "occlusal"?

25 A "Occlusal" means the biting surface. So now we're

1 looking down directly on the tooth. And, again, the
2 crown has been destroyed, so what we're looking at is
3 really the top of the roots of the teeth. And the
4 fracture matching was done in here where originally
5 that was two roots, and, again, I fracture matched
6 them and super glued them back together. And, again,
7 the cheek side aspect has been destroyed up in here,
8 and the tongue side aspect is still intact.

9 Q All right. Excellent. And what are we looking
10 at here?

11 A This is the 2001 panorex x-ray that Special Agent
12 Holmes brought to me on, uh, November 9 -- or 10,
13 and, again, it -- it goes from ear to ear. I mean,
14 the -- one ear would be over here, the other one
15 would be over here, and it shows all the teeth.

16 The one that I'm concerned about is this
17 lower right quadrant, or lower right corner, and
18 the tooth that I'm going to be comparing is Tooth
19 No. 31.

20 Q All right.

21 A Tooth No. 32 had been removed after this x-ray had
22 been taken.

23 Q All right. And, um, what are we looking at on
24 the next slide?

25 A Uh, this is just a cropped picture of just 31.

1 Q All right.

2 A And it just shows Tooth No. 31.

3 Q All right. Again, now, what is, uh, postmortem
4 x-ray Tooth No. 31? Please explain.

5 A Uh, postmortem x-ray is one of the x-rays that I had
6 obtained. There were, like, 46 x-rays that I had
7 taken of all the remains and this is one of the
8 x-rays that I had taken on Tooth No. 31 after the --
9 the roots had been fracture matched back together and
10 have been placed in the bone.

11 Q And just so that we're all clear, postmortem
12 means?

13 A Postmortem is after death. Antemortem is prior to
14 death.

15 Q All right. The next slide, please. This would
16 be the, uh, Slide No. 7, top of page three, um,
17 what are we looking at here?

18 A Uh, this shows that cropped picture of Tooth No. 31
19 from the 2001 panorex. So this would be an
20 antemortem film over here, and this is the postmortem
21 x-ray over here. What I'm doing is comparing the
22 root structure that's associated with Tooth No. 31 to
23 the postmortem.

24 And it's not just one root structure,
25 it's actually two root structures. Uh, one

1 tooth, but there's -- there's two structures
2 associated with it. We have the mesial root, or
3 the front root, and the distal root, or the back
4 root.

5 And there are a number of things I can
6 look at here and compare. And, again, the
7 panorex x-ray does show the whole root down here.
8 But I can see it -- a little bend to the root
9 down here on the mesial root, on the distal root,
10 also has a slight curvature, and I can see the
11 same curvature here and the same bend over here.

12 Q All right.

13 A The pulp tissue in the middle of the tooth we also
14 can compare. And we'll see that later on --

15 Q All right.

16 A At --

17 Q Okay. And -- and what are we looking at on, uh,
18 the next slide?

19 A What I've done here is just to take, uh, and
20 superimposing one x-ray on top of the other, and the
21 one on the left just shows what it's going to look
22 like if it does not match. Uh, where I -- I put the
23 postmortem x-ray on top of the antemortem x-ray, and
24 just had it slightly askew or just off a little bit,
25 and we can see that the pulp tissue -- The pulp is

1 the blood vessel nerve in the middle of the tooth, so
2 if you have a root canal done, they go in and they
3 remove that pulp tissue, and the lines don't line up
4 over here, uh, the width between the roots is not
5 consistent.

6 Whereas, if I slide it over just a
7 little bit, that pulp tissue is very consistent,
8 uh, the width between the roots is very
9 consistent. Again, this back root is very
10 consistent, and it's -- it's -- the dimension of
11 the root, itself, the dimension of this root, the
12 space in between the roots, and the pulpal tissue
13 that I'm looking at.

14 Q All right. Thank you. All right. Now, we have
15 another slide, uh, a panorex postmortem slide.
16 What are we looking at here? These are all with
17 respect to tooth 31?

18 A Correct.

19 Q Okay.

20 A This is actually the same picture that we just saw.
21 It's just an enlargement. Again, showing, again
22 that -- what it's going to look like if it doesn't
23 match or doesn't line up.

24 Q All right. And, um, next slide?

25 A And, again, where it, in my opinion, is -- is very

1 consistent, uh, where, again, you can put one on top
2 of the other and you can -- you can superimpose one
3 x-ray on top of the other, and see how the x-ray --
4 that crown of the tooth up here, again, has been
5 destroyed. That's on the antemortem film. The
6 postmortem, but it comes up and it just -- it's one
7 solid line as it comes up.

8 Q All right. Next slide, please. All right. We
9 have an antemortem bitewing, um, displayed here.
10 What does this tell us?

11 A This was the -- Again, it was the oldest of the
12 bitewings. It was a 1997 bitewing, but it was the
13 one that showed the most tooth structure. And so
14 that's what I was concerned about. So it doesn't
15 show the end of the root down here, but it shows more
16 than the other bitewings, which may have come up
17 about here.

18 Q All right.

19 A And this is just a -- a cropped version of -- of that
20 particular x-ray, that bitewing x-ray, so this is the
21 part that we're zeroing in on on that Tooth No. 31.

22 Q All right. Next one. And we're looking at --

23 A And this is the postmortem x-ray, again, that we saw
24 before.

25 Q All right. And now we have an antemortem and

1 postmortem, uh, slide? Please explain.

2 A Okay. Again, this is the cropped antemortem picture.
3 This is the one from the bitewing x-ray. Again, it
4 does not show the entire root structure down here,
5 but it shows a fair amount of it. And, again, we can
6 compare the pulp tissue in the middle of the tooth,
7 uh, there's actually a little constriction of the
8 pulp up here. A little constriction of the pulp
9 down -- up here, and then it gets a little bit wider,
10 gets a little bit wider here. Uh, the bend to the
11 root here. We can see the bend of the root over
12 here.

13 So this x-ray, again, it's cutting off
14 part of that root there, so this x-ray's probably
15 coming across right about in here. But it does
16 show that bend in there.

17 Q All right. Excellent. What are we looking at at
18 these particular slides?

19 A Um, same thing I did with the panorex x-ray. Um,
20 I've superimposed one on top of the other, and I
21 have, again, the antemortem film, I have a postmortem
22 film on top of it, and, again, just showing what it
23 would look like if it does not match, if the pulp
24 tissues and the root structures do not, uh, coincide.

25 And then I slide it over a little bit,

1 and, again, it -- it -- it's the -- the way it
2 comes up into the tooth over here, the way the --
3 the -- Again, this part of the tooth is missing,
4 but it's a perfect match as it comes across down
5 here, uh, to the end of the roots down here. You
6 can see where the root kind of just goes from the
7 postmortem into that antemortem film. Uh, the
8 pulpal tissues line up nicely, the width between
9 the roots, uh, everything is very consistent.

10 Q All right. And to the final slide then?

11 A Uh, there's two more that -- It just -- just shows,
12 again -- This is the -- the same pictures that we
13 just looked at, but a larger version of it where it's
14 blown up, where it does not match. And on the next
15 one, uh, again, it's just a larger version of -- of
16 when you can take those fracture matched pieces, and
17 pieces that I've re-associated, put back together,
18 and then compare them to the antemortem, uh, x-rays,
19 and, uh, everything lines up.

20 Q Now, do you have, um -- Investigator Wiegert is
21 going to bring you a --

22 ATTORNEY FALLON: Uh, first, would you
23 show, uh, Counsel before you --

24 Q (By Attorney Fallon) And you've been handed an
25 exhibit. What number is that for the record?

1 A No. 375.

2 Q All right. Would you, uh, examine Exhibit 375,
3 please?

4 A This is the -- the fragment that I -- I compared, um,
5 with --

6 Q Would you take it out and hold it?

7 A Sure.

8 Q Display it for us, please?

9 A This is the original bag that I received this
10 particular evidence in that was received on -- from
11 Special Agent Holmes on November 11, and it has that
12 section of the mandible from the lower right
13 quadrant. There's actually another fragment in there
14 of the -- what they call the coronoid process, which
15 is the top part of the -- the lower jaw, and another
16 root fragment in there, but this is the fragment that
17 was critical to the comparison for that Tooth No. 31
18 and that -- that lower right quadrant of the lower
19 jaw.

20 Q So what you have there are the remains of Tooth
21 No. 31 from which you made your comparison?

22 A Correct.

23 Q All right. Now, Doctor, do you have an opinion
24 on whether the root fragments from tooth 31
25 recovered from the burn pit are consistent with

1 the dental x-rays of Teresa Halbach obtained from
2 Dr. Krupka?

3 A Yes, sir.

4 Q And what is that opinion?

5 A In my opinion, the remains are very consistent.

6 Q All right. And, uh, were you able to obtain a
7 positive identification?

8 A I'm kind of reluctant to use the word "positive".
9 Uh, there were -- there were not a lot of remains
10 that were recovered. Uh, there were no crowns that
11 were critical, there were no dental fillings that I
12 could compare. Uh, when I make a positive
13 identification, and I do use that term quite
14 frequently in reports, a positive identification to
15 me would indicate to the exclusion of all others in
16 the world. Um --

17 Q So you would be one -- you would have to be one
18 hundred percent beyond any doubt for you to make
19 a positive identification?

20 A Correct. I'm very conservative on my opinion, and I
21 just was reluctant to use the word "positive".

22 Q How close were you to making a positive
23 identification in this particular case?

24 A Um, I was very close. I mean it -- it -- it was --
25 when you can superimpose, uh, evidence, one on top of

1 the other, and they look to be as one fragment, um,
2 you can't get much closer.

3 Q All right. Um, Doctor, the opinion that the
4 fragments from tooth 31 are very consistent with
5 the dental x-rays that you obtained from Teresa
6 Halbach displaying tooth 31, do you hold that
7 opinion to a reasonable degree of scientific
8 certainty?

9 A Yes, sir, I do.

10 Q All right.

11 ATTORNEY FALLON: Um, subject to
12 Counsel's right to cross-examination, I would
13 move into evidence, the, uh, actual CD-ROM of the
14 Power Point presentation. Um, the, um, handout
15 of -- which is Exhibit 377. I believe the Power
16 Point ROM is 376. His, uh, CV has already been
17 received, and, uh, would move into evidence the,
18 uh -- the root fragment which he's displayed.

19 THE COURT: Any objection?

20 ATTORNEY STRANG: I -- I don't -- No,
21 there -- there's no objection. The 376 is a
22 CD-ROM; is that right?

23 ATTORNEY KRATZ: It's the disk, itself.

24 ATTORNEY STRANG: Okay. No -- no
25 objection to --

1 THE COURT: Very well. Um, those exhibits
2 are admitted.

3 ATTORNEY FALLON: Pass the witness.

4 THE COURT: Mr. Strang?

5 **CROSS-EXAMINATION**

6 BY ATTORNEY STRANG:

7 Q I don't have a lot for you. I've just -- I've
8 got a few questions in -- in one area that you
9 brought up, um, with us, Dr. Simley, on direct
10 examination, and that's the -- the heat.

11 Um, are you able, as a matter of your
12 experience and learning, uh, to tell us what --
13 what, um, temperature range would be required to
14 render, uh, to the State, you saw them, the 24
15 tooth fragments that you examined here?

16 A No. Um, the only thing I would say is that, uh,
17 again, I, during the course of my 26 years of
18 involvement in forensic dentistry, seen a number of
19 individuals from, uh, car accidents, um, house fires,
20 and under the understanding that temperature ranges
21 there can be over a thousand degrees Fahrenheit, and,
22 uh, this individual -- either -- either the prolonged
23 duration of exposure or a higher temperatures, uh, I
24 don't like to get into temperatures, but, again,
25 this -- this is more than the average burn victim

1 that I normally see.

2 Q All right. Have you, uh -- have you also
3 examined at least the dental remains of burn
4 victims in which the, uh, fire was fed by a
5 volatile fuel? Jet Fuel A, or 8 gas or some --
6 some other -- You know what I mean by a volatile
7 fuel?

8 A Yes, sir. Yes, sir. Yes, I have.

9 Q Uh, roughly how many times have you done that?

10 A Tell you the truth, I -- I -- I don't -- I'm not
11 always privy to that information, um, but I know that
12 there's one other case that I can think of where
13 there were five individuals involved, and I know
14 there were accelerants used there. Uh, again,
15 remains look very similar from my point of view, but
16 I'm the lay person when you talk -- when you talk
17 about there.

18 Q Sure. Um, by an accelerant, we're talking about
19 a -- a flammable fluid of some sort?

20 A Correct.

21 Q Okay. And would -- would the -- the burning that
22 you see here, the level of -- it's called thermal
23 destruction or thermal damage --

24 A Okay.

25 Q -- that you see here, be high -- worse than,

1 about the same as, or not as bad as, the
2 instances in which you've seen, uh, dental
3 remains where there was a -- you know, a fire fed
4 by some accelerant, as you say?

5 A To me, they -- they would look about the same as --
6 as what I have seen with accelerants used.

7 Q Can you -- Based -- Drawing on your experience
8 and your learning, can you give us -- I think --
9 I think -- It sounded like you wanted to shy away
10 from a -- from a temperature estimation or range;
11 is that right?

12 A Probably be fairly safe to say that, yes.

13 Q Safe because you just don't feel competent to do
14 that or --

15 A Well, I know that the temperature ranges -- Again,
16 from what I understand on -- on house fires and --
17 uh, again, a thousand to twelve hundred degrees. I
18 think in cremation you're looking at around eighteen
19 hundred degrees Fahrenheit or so. Um, are -- are
20 these -- Again, from a temperature point of view, uh,
21 they certainly appear to me -- Again, uh, there are
22 other people more qualified to answer that question
23 than myself, but, uh, from my point of view, they're
24 more than the typical house fire, which would either
25 put the temperature range either higher or the

1 prolonged duration of exposure longer.

2 Q Let's take those in -- in the two -- two separate
3 categories --

4 A Fine.

5 Q -- you started with.

6 A I agree.

7 Q When you use the term "cremation", which we were
8 using earlier this morning, you mean a, uh -- a
9 lawful cremation?

10 A Correct.

11 Q Uh, which you know to occur in a -- in a closed
12 chamber of some kind?

13 A Correct.

14 Q Fed by, um, jets or an --

15 A Yes, sir.

16 Q -- active accelerant?

17 A Yes, sir.

18 Q Okay. And that, you understand, to produce a
19 temperature range something close to eighteen
20 hundred degrees Fahrenheit?

21 A Correct.

22 Q Do you have an understanding about how long the
23 lawful, you know, the ordinary cremation process
24 takes if that's how someone, you know, or a
25 relative likes to dispose of remains?

1 ATTORNEY FALLON: Objection, foundation.

2 Q (By Attorney Strang) I -- I -- I -- I mean this

3 to be a foundational question.

4 A From what I understand, about an hour-and-a-half or

5 so --

6 Q Okay.

7 A -- of cremation.

8 Q And that -- that -- that's knowledge you've

9 acquired through your work as a forensic

10 odontologist?

11 A Through continuing education and lectures and talking

12 to funeral directors, yes.

13 Q Fair enough. Okay. And so about an

14 hour-and-a-half, give or take. I'm sure, um, we

15 can assume that all people are different sizes

16 and structures; is that correct?

17 A Right.

18 Q Uh --

19 A I've never actually seen a cremation, though.

20 Q Sure. And about eighteen hundred degrees

21 Fahrenheit, although we can -- we can agree that

22 all crematory facilities are going to be a little

23 bit different too?

24 A Correct.

25 Q Okay.

1 A And I think the individuals can make a difference on
2 the temperatures also.

3 Q Sure. So I'm -- I'm looking for ball parks
4 just --

5 A Right.

6 Q -- based on your training and experience. Uh,
7 and then if we're -- if we're talking about a
8 house fire, you've -- you've sounded comfortable
9 using a range of about a thousand to twelve
10 hundred degrees Fahrenheit generated by a typical
11 house fire?

12 A Again, there -- other people that are more qualified
13 than myself to -- to render that opinion. But from
14 what I've talked with other individuals, and from
15 what I've heard, that seems like a -- I think a
16 fairly reasonable --

17 Q A reasonable --

18 A -- estimation.

19 Q -- range?

20 A Yes.

21 Q Okay.

22 A But, again, that's out of my area of expertise.

23 Q Understood. And I don't want to -- don't want to
24 take you farther --

25 A No, that's fine.

1 Q -- than you can go. Uh, and then let's go to the
2 second category or factor, uh, variable that you
3 described, which is time of exposure to this sort
4 of intense heat or thermal, uh -- dynamic thermal
5 energy; all right? Um, I take it, then, that if
6 what you were seeing here, uh, in range, in
7 temperature range, may be closer to the cremation
8 sort of temperature range?

9 A I'm -- Again, I think that gets closer to putting an
10 actual degree on it and I -- I -- I hate to do that.

11 Q All right. But if not that, then a longer period
12 of time exposed to maybe a lower level of heat?

13 A From the dental remains that I saw, it -- it's one or
14 the other, I think, and I think there arson
15 investigators that can probably give a better idea as
16 far as the, uh, temperatures involved. But, again,
17 from my point of view, um, it either had to be an
18 extremely hot fire or -- or prolonged duration of
19 exposure.

20 Q And by "prolonged duration of exposure" can
21 you -- can you give us any estimate, and -- and
22 just tell me if you can't, uh, but can you give
23 us any, uh, estimate of a time, or a duration, if
24 we posited a fire of something in more -- you
25 know, in the thousand to twelve hundred degree

1 Fahrenheit range?

2 A I -- I don't think I could. No, sir.

3 Q Fair enough. Thanks.

4 A Sure.

5 THE COURT: Any redirect?

6 ATTORNEY FALLON: Uh, no redirect for
7 this witness.

8 THE COURT: All right. You are excused,
9 sir.

10 ATTORNEY FALLON: Could, uh, counsel
11 approach to decide how we're going to --

12 THE COURT: Sure.

13 ATTORNEY FALLON: -- use the remainder
14 of our time?

15 (Discussion off the record.)

16 ATTORNEY KRATZ: State's going to call
17 Karen Halbach, Judge.

18 THE COURT: Very well.

19 THE CLERK: Please raise your right hand.

20 **KAREN HALBACH,**

21 called as a witness herein, having been first duly
22 sworn, was examined and testified as follows:

23 THE CLERK: Please be seated. Please state
24 your name and spell your last name for the record.

25 THE WITNESS: Karen Halbach, H-a-l-b-a-c-h.

1 DIRECT EXAMINATION

2 BY ATTORNEY KRATZ:

3 Q Good morning, Mrs. Halbach. Thank you for
4 agreeing to testify on -- on such short notice.
5 I have a couple of easier questions for you and I
6 have some difficult questions.

7 The first questions that I need to talk
8 to you about regard your daughter, Teresa. Could
9 you tell us, please, first of all, how many --
10 um, many children you've had?

11 A Five.

12 Q And where, within those five, um, did Teresa
13 fall?

14 A She was -- She was the second oldest.

15 Q We've heard from your son, Mike. Uh, do you have
16 any other sons?

17 A Yes, I have. My oldest is a boy.

18 Q His name?

19 A Tim.

20 Q What does Tim do for a living?

21 A He's an attorney.

22 Q And you have two other daughters; is that right?

23 A Yes.

24 Q We've heard from one of them in this trial; is
25 that correct?

1 A Yes.

2 Q What's her name?

3 A Katie.

4 Q And how old is Katie?

5 A Fifteen.

6 Q And you have a younger daughter?

7 A Yes.

8 Q And what's her name?

9 A Kelly.

10 Q How old is Kelly?

11 A Thirteen.

12 Q Is -- When your oldest daughter, um, Teresa -- we

13 have a -- a picture up here in court -- was

14 killed, how old was she?

15 A Twenty-five.

16 Q Tell the jury about, um, your relationship with

17 Teresa? And I'll -- How often would you talk to

18 her?

19 A Um, at least once a week. She'd come over a lot on

20 the weekends to spend time with us and her two

21 sisters. Um, she took pictures for us. She did our

22 family picture, and she was always taking pictures of

23 the girls and around the farm. She liked to take

24 pictures a lot.

25 And we'd spend a lot of time together.

1 We'd go out, out to eat, or -- it seems like the
2 kids were always over on a Sunday afternoon, and
3 we'd talk, sit around the island in our kitchen
4 and talk a lot. We did spend a lot of time
5 together.

6 Q Was Sundays a day that the family would typically
7 get together?

8 A Yeah. Yes.

9 Q In fact, the Sunday before Teresa -- Teresa's
10 death, a Sunday, the one day before her death on
11 the 30th of October, do you recall all getting
12 together for a birthday party that day?

13 A Yes. It was my father's birthday on Halloween, but
14 we got together that Sunday before and celebrated his
15 birthday at his house.

16 Q Okay. So Teresa was actually killed on your
17 dad's birthday?

18 A Yes.

19 Q I think you told us, um, Mrs. Halbach, that
20 Teresa lived close to you in -- in physical
21 proximity. Who owned the property in which she
22 lived?

23 A My husband and I do.

24 Q And do you know at the time of her death who she
25 lived with?

1 A Uh, with a friend, Scott Bloedorn.

2 Q Sometime on the 3rd of November of 2005, did you
3 receive a telephone call from a gentleman by the
4 name of Tom Pearce?

5 A Yes, I did.

6 Q Could you describe that call for the jury,
7 please?

8 A He called about one o'clock in the afternoon and he
9 told me he was worried about Teresa because, not only
10 had she not shown up for work Tuesday or Wednesday,
11 but he had tried calling her on her cell phone, and
12 it said the voicemail was full, and that concerned
13 him because her cell phone was her business phone.
14 She used that. It was easiest for her. And then
15 I -- I said that concerned me, too. I was worried
16 about her then, too.

17 Q Were you familiar with the, uh, phone? Uh, that
18 is, the, um, cell phone that Teresa had?

19 A A little bit I was.

20 Q You -- you've been asked and, in fact, after, uh,
21 Teresa's death, investigators asked you to go
22 through and actually find some things at her
23 residence; is that correct?

24 A Right.

25 Q I'm going to show you two exhibits. One is

1 Exhibit No. 379 and one is Exhibit 380.

2 ATTORNEY KRATZ: Mr. Strang, have you
3 seen these?

4 ATTORNEY STRANG: I've seen them. All
5 three. I've seen all three, yeah.

6 Q (By Attorney Kratz) I think there's a
7 stipulation, uh, Mrs., uh, Halbach, meaning
8 there's an agreement with the attorneys, but I
9 just want you to tell the jury what Exhibit 379
10 is, please?

11 A It's a receipt for her cell phone that she bought.

12 Q And what is Exhibit No. 380?

13 A It's the contract for her cell phone.

14 Q With what carrier? What, uh, wireless carrier?

15 A Cingular.

16 Q I'd like you to turn to the back page of the
17 contract, and on the very bottom do you see that
18 it indicates what kind of a cell phone she had?

19 A Right.

20 Q What does it say?

21 A It's Motor V3.

22 Q Motorola V3?

23 A Yeah.

24 Q All right. Do you know that to be, uh, something
25 called a RAZR -- Motorola RAZR cell phone?

1 A Yes.

2 Q Now, had you seen your daughter, Teresa, with
3 that cell phone before?

4 A Yes, I have.

5 Q You've also heard evidence about Teresa owning
6 something that's generically called a -- a -- a
7 Palm Pilot. I'm sure the Palm Pilot people would
8 be happy that we're calling it that. But it's a
9 personal data assistant. Were you familiar that
10 she owned one of those?

11 A Yes.

12 Q I'm showing you another exhibit.

13 ATTORNEY KRATZ: Mr. Fallon, what's that
14 exhibit number, please?

15 ATTORNEY FALLON: Three-seven-eight.

16 Q (By Attorney Kratz) Three seventy-eight. Can
17 you tell the jury what that is, please?

18 A It's a receipt from a Palm Pilot from Target.

19 Q On the, um, top of the receipt, does it indicate
20 the date in which she bought that Palm Pilot or
21 that Palm Zire 31, and does it indicate
22 November 15 of 2004?

23 A Yes.

24 Q During the course of the investigation, the
25 missing person's investigation, and later, uh,

1 what you unfortunately found out was a, uh -- a
2 murder homicide investigation, were you asked to
3 provide samples -- biological samples from
4 yourself, something called a buccal swab, um, a
5 sample of your DNA?

6 A Yes, I was.

7 Q And did you provide that for investigators?

8 A Yes, I did.

9 Q Mrs. Halbach, were you also asked to assist
10 investigators, if you could, and have your
11 children, Mike and other children, helping with,
12 um, trying to determine cell phone records and --
13 and things like that? Do you remember that being
14 asked of you?

15 A Yes, I do.

16 Q Your, um, daughter, Katie, who we've heard from,
17 um, were you familiar with Katie's relationship
18 with your daughter, Teresa?

19 A Yes.

20 Q Would you describe that? What -- what you
21 noticed about that relationship?

22 A Um, Teresa was very close to both of her sisters.
23 Um, you know, they spent a lot of time laughing and
24 picking on each other. Uh, it kind of became
25 tradition, Teresa would come over Sunday after --

1 Sunday night, and three of her favorite TV shows were
2 on that night, and they'd watch it together and laugh
3 and have a good time. You know, she took them
4 shopping.

5 Q All right. When you heard that Katie knew about
6 Teresa's clothing, when she knew that she owned a
7 pair of Daisy Fuentes jeans, do you have any
8 doubts that, uh, they were close enough that
9 she'd know that?

10 A Oh, yeah. Teresa, um -- The girls would go over to
11 Teresa's house and they would try on her clothes,
12 because if Teresa had jeans that wouldn't fit her,
13 she'd give them to the girls. So I'm sure Katie
14 knows she had them.

15 Q All right. There's been at least some suggestion
16 that on, perhaps, the 2nd or 3rd of November,
17 that your daughter, Teresa, may still have been
18 alive. May have been accessing her cell phone.
19 After the 31st of October, Mrs. Halbach, um, did
20 you ever hear your daughter, Teresa's voice
21 again?

22 A No, I did not.

23 Q Is Teresa -- or was Teresa the kind of girl that
24 would have taken off, or would have left, or
25 would have, um, vanished without talking to you,

1 or talking to her family?

2 A No, she would not.

3 Q The last difficult area of inquiry I have with
4 you, Mrs. Halbach, has to do with notification.
5 That is, um, how you've been notified of, um,
6 this investigation. At the beginning of this
7 case I told the jury that it was my
8 responsibility as a district attorney to meet
9 with you, and to meet with your family, and to
10 tell you about the evidence that's been found in
11 this case. Do you remember me saying that?

12 A Yes.

13 Q Do you remember those things happening in this
14 case?

15 A Yes.

16 Q The physical evidence, no matter how disturbing
17 it's been to you, have you been, and your family
18 been, kept informed throughout this
19 investigation, uh, of all the developments, do
20 you feel?

21 A Yes.

22 ATTORNEY STRANG: Your Honor, this is
23 needlessly difficult and it's -- the case is not
24 about Mr. Kratz.

25 THE COURT: Court agrees.

1 ATTORNEY KRATZ: Judge, I would move the
2 admission of the three, uh, exhibits that have,
3 uh, been identified by Mrs. Halbach, and, um,
4 with that, I would pass the witness to
5 Mr. Strang.

6 THE COURT: Any objection to the exhibits?

7 ATTORNEY STRANG: Your Honor, I have no
8 objection to the three exhibits, and I'm not going
9 to make Mrs. Halbach answer any questions.

10 THE COURT: Very well. The exhibits are
11 admitted. Ma'am, you are excused.

12 Uh, members of the jury, at this time
13 we'll take our, uh, lunch break and, uh, resume
14 at one o'clock. I will remind you, as usual, not
15 to discuss the case among yourselves during the
16 lunch hour. Uh, then, counsel, we can resume
17 with the next State witness at one o'clock?

18 ATTORNEY KRATZ: We'll do that, Judge.
19 Thank you.

20 (Recess had at 11:56 a.m.)

21 (Reconvened at 1:04 p.m.; jurors not present.)

22 THE COURT: At this time we're back on the
23 record outside the presence of the jury. Uh,
24 counsel, uh, I understand there's some business you
25 wish to take up before we bring the jurors back?

1 ATTORNEY STRANG: I do. Uh, Your Honor,
2 there have been, uh, I don't know, a number of
3 occasions, most recently on the direct
4 examination of, uh, Karen Halbach just before
5 lunch, in which the prosecution has posed
6 questions on direct examination that, um, assume
7 as a fact, or presuppose, either a killing, um,
8 in the case of the question as posed here today,
9 or that it is somehow established beyond, uh,
10 dispute, or tacitly conceded that, um, the murder
11 alleged here actually did occur on October 31.

12 Those kinds of questions, um, not only
13 invade the province of the jury, I mean, as --
14 assume the ultimate facts to be decided here, and
15 the, uh, the actual elements of the, uh, most
16 serious charge, but, also, tend to suggest
17 superior knowledge on the part of the State or --
18 or of vouching, in effect.

19 I don't think they're properly put. Um,
20 I don't think that's a -- a, uh, proper question.
21 Um, we are coming up on three weeks into a trial,
22 and not only has the State not established beyond
23 dispute, um, the death, uh, of Ms. Halbach, or on
24 any specific day, but almost three weeks in, we
25 don't know -- we don't know at all how she died,

1 when she died, uh, where, exactly, they say she
2 died or why. Uh, the State says she died.

3 So, uh, I -- I -- I'd like the Court to
4 instruct, um, Counsel that questions ought not be
5 phrased in a way that tends to vouch for or
6 invade the, uh, province of the jury in that way
7 or to suggest some superior knowledge on the part
8 of the, uh, State and its agents.

9 THE COURT: Mr. Kratz or Mr. Fallon?
10 Who's going to be responding?

11 ATTORNEY KRATZ: Certainly is the theory
12 of the prosecution, Judge, that Ms. Halbach, uh,
13 was murdered. As I recall, uh, that was not
14 going to be disputed by the defense. If they,
15 once again, changed their theory of defense,
16 then, once again, we'd like to know that.

17 That, notwithstanding, Your Honor,
18 phrasing the question regarding Ms. Halbach's
19 murder is consistent with our theory of the
20 prosecution, what we think is that the evidence
21 that has already been, uh, elicited, uh, at this
22 trial, both, uh, through expert and, uh -- and
23 lay witnesses.

24 Uh, if Mr., um, Strang would like to
25 argue to the -- the jury upon closing that Ms.

1 Halbach, um, uh, was not, in fact, uh, murdered,
2 uh, if some other reason exists for her not being
3 in this courtroom, then I guess, uh, we, uh, can
4 hear it at that time. But until that moment, uh,
5 I do believe that it is, uh, within our province
6 to frame those questions in that regard.

7 I suppose I could, um, always use the
8 word "alleged" but since we are an advocate in
9 this case, since we advocate for a position, we
10 are advocating the position that Ms. Halbach was,
11 in fact, murdered, and until the Court tells us
12 we can't, uh, I intend to, um, um, elicit
13 questions that, uh -- that presuppose that fact,
14 because at least up to this point, the State
15 believes that that has, in fact, been proven or a
16 reasonable inference of -- can be drawn by this
17 jury that that has occurred.

18 THE COURT: I don't remember the specific
19 comments. I thought, going back to the defense
20 opening statement, that there wasn't a dispute that
21 the victim was murdered. But I -- When the date,
22 October 31, was used, I guess that's what I thought
23 that Mr. Strang's comments were going to be directed
24 to. Mr. Strang?

25 ATTORNEY STRANG: Well, that -- that is

1 primarily, you know, killed on October 31, killed
2 on your father's birthday, um, you know, and
3 there -- there's a difference between what we may
4 choose to argue to a jury and the State's burden
5 of proof on every essential element.

6 There's only one essential element of
7 the four charges here that we've stipulated.
8 That's it. One, that he was a convicted felon as
9 of the relevant date in 2005.

10 Um, so what we actually choose to be --
11 argue to the jury has nothing to do with the form
12 in which the State poses questions on direct
13 examination of witnesses who are not hostile and
14 are not appropriate either for leading or for
15 vouching.

16 Uh, so I -- You know, it -- it's not the
17 evidence that is objectionable, it is the form of
18 the question that purportedly seeks to elicit the
19 evidence, uh, that causes me to, um -- to ask for
20 the Court's instruction.

21 THE COURT: All right. Well, um, as the
22 trial has gone on, and I can only respond to
23 objections as they're made, if I -- I may have
24 misunderstood the, um -- the extent to which the
25 defense was not contesting some of the items

1 alleged by the State, but I understand your point
2 and, um, if, uh, another question is made that
3 the defense's feel objectionable, uh, object to
4 it at the time and I'll rule on it.

5 Anything else before we bring the jury
6 back in?

7 ATTORNEY STRANG: No, Your Honor.

8 ATTORNEY FALLON: I think we're just
9 waiting for the clerk to finish marking exhibits.

10 (Jurors in at 1:10 p.m.)

11 THE COURT: You may be seated, and, uh,
12 Mr. Fallon, you may call your next witness.

13 ATTORNEY FALLON: State would call
14 Leslie Eisenberg.

15 THE CLERK: You can step over there.
16 Please raise your right hand.

17 **LESLIE EISENBERG,**
18 called as a witness herein, having been first duly
19 sworn, was examined and testified as follows:

20 THE CLERK: Please be seated. Please state
21 your name and spell your last name for the record.

22 THE WITNESS: My name is Leslie Eisenberg,
23 E-i-s-e-n-b-e-r-g.

24 **DIRECT EXAMINATION**

25 BY ATTORNEY FALLON:

1 Q Good afternoon.

2 A Good afternoon.

3 Q What do you do for a living?

4 A I am currently employed, and have been since June of
5 1993, for the State of Wisconsin, Wisconsin
6 Historical Society, as the State's, uh, Burial Sites
7 Preservation Program Coordinator. I am, likewise,
8 employed privately as a forensic anthropologist.

9 Q Would you tell us what an anthropologist does?

10 A I'd be happy to. Uh, a -- an anthropologist, and in
11 particular, a forensic anthropologist, uses
12 techniques from physical anthropology, uh, including
13 knowledge of the human skeleton and knowledge of
14 human variation and applying that knowledge in a
15 legal context.

16 Q Are there any particular areas or subspecialties
17 of forensic anthropology or anything like that?

18 A Um, I, uh, have a bit of -- quite a bit of experience
19 with trauma reconstruction and with, um, identifying
20 and, um, recognizing burned human remains.

21 ATTORNEY FALLON: Um, Judge, either the
22 witness should lean back a little or if you could
23 turn the volume down a tad. She seems to be more
24 comfortable leaning forward so, perhaps, less
25 volume. Thanks.

1 THE COURT: Sure.

2 Q (By Attorney Fallon) How are you involved in
3 this case?

4 A I was, uh -- In early November of 2005, I was
5 requested, uh -- my assistance was requested by the
6 Calumet County Sheriff's Office, uh, to examine some
7 human remains that had been recovered.

8 Q And, uh, in terms of today, um, why are you here
9 today?

10 A I am here to explain the work I've done, and my
11 findings, um, with particular reference to a
12 determination of, um, the sex and the age of the
13 burned human remains I was asked to examine, uh, as
14 well as to render a professional opinion with respect
15 to the manner of death.

16 Q Now, before we get to your findings and opinions,
17 Doctor, um, I'd like to find a little bit about
18 yourself, please. Um, first of all, uh, tell us
19 your educational background?

20 A I received a Master's Degree in anthropology in 1981,
21 a Doctorate, or Ph.D, in anthropology in 1986, uh,
22 and in 1997 was awarded what's called "diplomat"
23 status or board certification in forensic
24 anthropology.

25 Q And if you could tell us, what does diplomat

1 status, or bird cer -- board certification status
2 what -- why is that significant?

3 A It's significant, uh, to a forensic anthropologist
4 because it means that you have gone through a very
5 rigorous process in submitting case reports for
6 review to an organization called the American Board
7 of Forensic Anthropology, who will review your
8 application and determine your fitness to sit for a
9 very rigorous day-long written and practical
10 examination.

11 Q From which institutions did you receive your
12 Masters and Doctoral Degrees?

13 A Both degrees were received from New York University
14 in New York City.

15 Q Tell us, if you would, um, your, uh -- Well, how
16 long have you been with the Wisconsin Historical
17 Society? We'll start there.

18 A I, uh, moved to Wisconsin in, uh -- at the end of May
19 of -- of 1993 to accept the position with the
20 Wisconsin Historical Society. So I've been here
21 almost 14 years.

22 Q Did you say '83? '93?

23 A '93.

24 Q What, um, positions have you held which, uh,
25 benefit you in the performance of your

1 anthropological, uh, duties and opinions that you
2 render?

3 A Well, there have been a number. Uh, for me, one of
4 the most important positions I held before coming to
5 Wisconsin, uh, began in 1986, and that was as a
6 consulting forensic anthropologist, one of two for
7 the Office of Chief Medical Examiner in New York
8 City.

9 Uh, I have also, uh, been fortunate and
10 honored to be asked to be part of a federal
11 disaster mortuary team that goes by the name --
12 the full name is, um, Disaster Mortuary
13 Operational Response Team. And that's a team
14 made up of different kind of professionals,
15 including dentists and pathologists and, uh,
16 other specialties like forensic anthropology,
17 that are most useful in identifying, um, remains
18 that have sustained effects from disasters,
19 whether they be, um, an explosion, a burning
20 episode, um, more -- most recently Hurricane
21 Katrina, uh, the World Trade Center, plane
22 crashes, things like that.

23 Q And this, uh, Disaster Mortuary Operational
24 Response Team, is that known by the acronym
25 DMORT?

1 A It is.

2 Q D-M-O-R-T?

3 A That's correct.

4 Q And, now, you mentioned some disaster relief
5 efforts. Have you participated in any disaster
6 relief efforts, uh, involving the need for, uh,
7 expertise in the field of forensic anthropology?

8 A Yes, I have.

9 Q Uh, tell us about those responses that you've
10 been involved in?

11 A Well, of the requests made to me to assist, um, I --
12 I have been asked to assist on multiple occasions.
13 Of those requests I've been able to, uh, actually
14 help with three of them. The first one was regarding
15 a train derailment, train crash, in Bourbonnais,
16 Illinois, uh, where, uh, a number of individuals on
17 that train, um, sustained, um, trauma from -- from
18 the crash and also from the subsequent burning
19 episode.

20 I also was called, uh, the day of the
21 World Trade Center disaster, excuse me, to
22 respond to New York to help with the
23 identification of the extremely fragmented and,
24 in many cases, very badly burned human remains
25 from that attack.

1 Uh, and more recently, in September of
2 2005 to -- I was asked to go down to
3 Mississippi -- to, Gulf Port, Mississippi to
4 assist with the identification of, uh, in some
5 cases, cemetery remains that had been washed out,
6 and in other cases, to assist, uh, with remains
7 of unidentified individuals, um, who were either
8 washed up or recovered subsequent to, uh,
9 Hurricane Katrina and Rita, which followed on its
10 heels.

11 Q Are you, uh -- Do you -- Are you a member of any
12 committees or belong to any boards of, uh -- that
13 are particular interest with respect to the field
14 of forensic anthropology?

15 A Yes, I am, um, a board member of the American Board
16 of Forensic Anthropology. Uh, for six years, uh, I
17 served on that board as an elected member. Uh, the
18 last three years of that six-year term as the board
19 secretary.

20 Q Currently, do you belong to any, um, uh, national
21 professional organizations?

22 A Yes, I do.

23 Q And what, uh, are those organizations?

24 A Um, may I refer to my resumé so that I don't leave
25 anything out that may be of interest?

1 (Exhibit 381 marked for identification.)

2 Q Sure. Showing you what has been marked for
3 identification purposes has Exhibit 3-8-1. Could
4 you identify that for us, please?

5 A Exhibit 381 is my resumé, also known as a Curriculum
6 Vitae, um, which consists of 17 plus pages. Um, with
7 regard to my professional affiliations, um, I do
8 belong to a number of national and regional
9 organizations.

10 Um, I am a, um -- a fellow of the
11 American Academy of Forensic Sciences, which is
12 basically the umbrella organization of forensic
13 professionals in this country, in Canada and
14 membership also, uh, spans the globe. Uh, being
15 a fellow of that organization means that you have
16 attained the highest level of membership, uh,
17 that the American Academy of Forensic Sciences,
18 um, has.

19 Uh, as I mentioned, I am also a board
20 certified forensic anthropologist with an
21 affiliation with the American Board of Forensic
22 Anthropology.

23 I am also a member of the International
24 Association for Identification, which most
25 recently has begun a forensic anthropology

1 section, and I am, uh, acting, uh, with other
2 colleagues to begin, uh, that section for the
3 organization.

4 Q All right. Um, if I may interrupt you. And,
5 again, continuing the field of anthropology, um,
6 are you a member of any, uh, regional
7 professional organizations?

8 A Yes, I am, sir.

9 Q What would those be?

10 A Um, with respect to my qualifications here, the -- I
11 am a member of the Wisconsin Association for
12 Identification, the Wisconsin Association of Homicide
13 Investigators, and the Wisconsin Coroners and Medical
14 Examiners Association.

15 Q Have you received, uh, any, um, particular
16 research grants, awards, or honors of, um,
17 particular importance with respect to your field
18 of forensic anthropology?

19 A Uh, yes, I have. If I may refer, again to --

20 Q Sure.

21 A -- Exhibit 381?

22 Q You may.

23 ATTORNEY STRANG: Your Honor, that
24 exhibit can be admitted without --

25 ATTORNEY FALLON: I --

1 ATTORNEY STRANG: -- objection.

2 ATTORNEY FALLON: Thank you. I was just
3 about to do that in a moment or two.

4 THE COURT: All right. The exhibit is
5 admitted.

6 ATTORNEY FALLON: Thank you.

7 A Most recent for 2006, I am, uh, proud to say that my
8 peers, uh, in the DMORT organization in, uh, the, uh,
9 federal disaster team have named me the distinguished
10 member of the year.

11 Um, and among other, uh, awards and
12 honors, in the year 2000, the Wisconsin State
13 Assembly, uh, presented me with a citation, uh,
14 recognizing my work in another forensic case, uh,
15 from Sauk County, Wisconsin.

16 Q All right. So is the, uh, Curriculum Vitae, uh,
17 that you have there a -- a summary of your
18 professional training and experience awards,
19 publications, etc.?

20 A It is, sir.

21 Q Thank you. Uh, turning now to this particular
22 case, when did you first become involved, uh, in
23 this case, involving, uh, Teresa Halbach?

24 A My involvement with this case began with a telephone
25 call. Actually a voicemail message that was left for

1 me on November 9 of 2005. Uh, there was a call
2 placed to me, uh, by special agent of the Wisconsin
3 Department of Justice, uh, Division of Criminal
4 Investigation, uh, asking for my assistance in
5 examining some, um, items that had been collected,
6 uh, with -- and the specific request had to do with
7 looking at those items to determine if any human
8 remains were part of that in -- uh, ini -- initial
9 collection of items.

10 Q I'd like to direct your attention to, uh, the
11 time frame of November 5, which we've established
12 is a Saturday, through November 10th, which we
13 have also established as a Thursday. Uh, during
14 that time frame, uh, were you in the state of
15 Wisconsin?

16 A I, uh, left, uh, on that Sunday, which I believe
17 would have been the --

18 Q Sixth?

19 A -- 6th of, uh, November, returning on Wednesday, the
20 9th. I was, along with four or five other
21 individuals, who's representing the state of
22 Wisconsin at a -- at a missing persons conference in
23 Denver, Colorado.

24 Q All right. You returned to the 9th and your
25 first day back at work would have been the 10th?

1 A Would have been Thursday, November 10 of '05.

2 Q What were you asked to do, initially? What were
3 your primary tasks?

4 A My primary task was to examine the contents of a
5 sealed box, um, and to provide information about the
6 con -- the contents of that box.

7 Um, when I opened the box, uh, on,
8 Thursday, November 10 at the Dane County
9 Coroner's Office Morgue where I do most of my,
10 uh, laboratory work, um, I opened the box to find
11 many, uh, blackened, highly fragmented and
12 incomplete human bone fragments.

13 Q All right. Upon making that examination and
14 after receiving the request from law enforcement,
15 what did you attempt, or what was your -- what
16 were you attempting to do with respect to, uh,
17 evaluating these, uh, fragments?

18 A Well, the first task at hand in this case, and in --
19 in other cases, uh, as well, sometimes, uh, one of
20 the tasks that a forensic anthropologist is often
21 asked to do, is to look at, um, remains, whether
22 they're fragmentary or complete, and render an
23 opinion as to whether or not the remains are human
24 and, if you can answer yes to that question, to then,
25 uh, distinguish or determine, um, can you also

1 distinguish other kinds of items that are associated
2 with those.

3 So one of the -- one of the key roles
4 for forensic anthropologists is to determine or
5 distinguish human from nonhuman remains, whether
6 they're biological or otherwise.

7 Q I've -- I've just been informed you might have to
8 pull that microphone just a little bit closer.

9 A Okay. I'll try and do better. Thank you.

10 Q At some point were you attempting to develop a
11 biological profile of, uh -- of the person, if
12 there was, in fact, a determination that they
13 were human remains?

14 A Yes. One of the other key roles of a forensic
15 anthropologist is to develop what's called a
16 biological profile. And that often includes, and
17 should include, a determination of the sex of the
18 individual, the age of the individual, um, the
19 stature or height of the individual, the ancestry or
20 race of the individual, um, a determination as to
21 whether or not, um, there are any, uh -- the remains
22 have sustained trauma of any kind, whether they
23 occurred before death or after death, and, also, um,
24 to re-fit any fragments that might be re-approximated
25 or put back together.

1 Q Are you familiar with the terms "antemortem",
2 "postmortem" and "perimortem"?

3 A Yes, I am.

4 Q Could you explain those terms to us --

5 A I --

6 Q -- please, at least as you apply them in your
7 field of anthropology?

8 A I would be happy to. The term "antemortem", the
9 prefix "ante" means "before", "mortem" means "death",
10 so antemortem means before death.

11 Perimortem, P-e-r-i-m-o-r-t-e-m, "peri"
12 means at or near the time of death. So that's
13 what perimortem means.

14 And postmortem, "post" means "after" so
15 postmortem means after death.

16 Q All right. In terms of your task, could you tell
17 us, please, what were -- what were the condition
18 of the bones and fragments and materials that
19 were sent to you?

20 A The material that I initially examined, and virtually
21 all of the subsequent material presented to me for
22 examination, um, the human bone fragments that I
23 identified and sorted and inventoried was incomplete,
24 highly fragmented, burned, and in some cases what we
25 call calcined, and calcined is -- is a state or a

1 condition, um, along a continuum or a progression of
2 what happens to bone, human bone, when it's exposed
3 to heat.

4 Um, and it's -- it's -- so if you can
5 break that down into three different kind of
6 general periods, when bone is initially exposed
7 to heat, it begins to lose moisture. Um, many
8 people think of bones as, uh -- as inert, kind of
9 as a -- like a piece of wood, but, in fact, there
10 are blood vessels that run through bone, and bone
11 is a very dynamic substance. As anyone who may
12 have broken a bone knows, it -- it hurts a lot
13 when that happens.

14 So when bone is exposed to heat, it
15 first begins to lose its moisture. It will then
16 begin, um, as time goes on, as more heat or, um,
17 is -- is applied or the duration of the exposure
18 to heat is extended, the organic content of the
19 bone, um, what makes you and me human, begins
20 to -- to disappear from the bone.

21 And then the third phase, when a bone is
22 calcined as I mentioned, is when it begins to
23 lose all of its minerals, um, that keep the bones
24 strong. And so when that happens, the bone
25 begins to function not so much as a living bone,

1 but more as a brittle material.

2 Q All right. Now, in the field of, um, disaster
3 relief and forensic anthropology, are there,
4 uh -- is there a standard, or are there levels of
5 destruction or degradation that are, uh, assigned
6 to particular samples when you're asked to
7 examine them?

8 A Well, again, um, different -- different researchers
9 have -- have written about this and have assigned,
10 um, or developed these, um, protocols or continuums
11 where, um, the initial level is that, uh, a body may
12 have been exposed to heat, continuing up to the final
13 level where you are left with cremated remains. And
14 it's, um -- the phases that have been defined by
15 researchers are -- are fairly discreet or stand alone
16 phases, but we know that -- that there's a continuum.
17 There's a -- there's a continual progression from
18 recognizably burned individual, to an individual
19 whose remains have been, for all intents and
20 purposes, cremated.

21 Q All right. Uh, I'd like to show you some
22 exhibits, and to begin with, uh, some, uh,
23 preliminary questions.

24 THE COURT: Doctor, I think I'm going to
25 ask you to move the microphone just a little further

1 away. There's a little distortion coming through
2 the --

3 THE WITNESS: My apologies.

4 THE COURT: That's okay.

5 Q (By Attorney Fallon) If you would be so kind to
6 uh -- to begin with the, uh -- the first
7 photograph. I believe it's marked as Exhibit,
8 uh, 382?

9 A That's correct.

10 Q All right. And, uh --

11 A Exhibit 382 is a -- what appears to be a four-by-six
12 inch color photograph of myself and other
13 investigators sorting through what appears to be burn
14 material. And, uh, if memory serves, uh, I believe
15 this photo was taken at the Wisconsin Crime
16 Laboratory in Madison in December of -- of 2005.

17 Q All right. Um, and the next, uh, photograph?

18 A The next four-by-six color photograph, marked Exhibit
19 383, depicts the, uh, contents of the initial box
20 that was submitted to me, uh, for examination, uh,
21 under Calumet County Sheriff's Office Tag 8318.

22 This was a box that was left for me, um,
23 at my office on November 9 of 2005. That on the
24 following day, I brought it to the Dane County
25 Coroner's Office Morgue, uh, to examine.

1 Q All right.

2 A And -- and I would also note, um, the darkened color
3 of -- of the bones, um, and the fact that some of the
4 lighter colored bones, the bones that almost look
5 white, have taken on or have reached that phase, that
6 calcine phase, where the mineral content and the
7 moisture of the bone, uh, has already dissipated or
8 is gone.

9 Q All right. If you could take -- I believe
10 there's -- should be a, um, laser pointer --

11 A Yes.

12 Q -- up there? If you could just point to the box
13 and just give the jury an example, if you would,
14 of some of these calcined bones that you just
15 described for them? If you could pick out from
16 the box there?

17 A Um, there's one.

18 Q All right.

19 A Um --

20 Q Toward the bottom of the --

21 A There's another.

22 Q Toward the bottom of the box on the edge there?

23 A Correct.

24 Q All right.

25 A And a fragment here, a fragment there. And I would

1 also note that some of these fragments, um, as you
2 probably can see, uh, in some cases have a calcine
3 portion and maybe a charred portion all part of the
4 same bone.

5 Q All right. What is the, uh, next, uh,
6 photograph? This is Exhibit --

7 A This is Exhibit 384.

8 Q All right. And what are we looking at here?

9 A You are looking at, um, uh, a sampling of skull
10 fragments, uh, of different sizes, um, that were part
11 of that initial submission that came in that white
12 box to me that I initially examined on November 10 of
13 2005.

14 Um, they look, I'm sure, very irregular
15 to all of you, um, but I would call your
16 attention to some, uh, characteristic, um, traits
17 that I -- that stand out to me immediately. Um,
18 these -- these areas of projections, um, these
19 are all part of cranial sutures, where many of
20 the bones of the skull fit together.

21 Q All right. If we were to zoom in, would that
22 assist you in further illustrating the point
23 you're making?

24 A Thank you, yes. Here and here.

25 Q So you're pointing to pieces what -- what appear

1 to be very irregular shaped?

2 A That's correct.

3 Q All right. And those are cranial sutures?

4 A They, um -- they represent parts of cranial sutures
5 and there are different cranial sutures around the
6 skull.

7 Q All right. Now, do you recall approximately, um,
8 how many, um, diagnostic, uh, human skull
9 fragments you did examine or look at?

10 A If memory serves, there were 58 diagnostic skull
11 fragments. Um, and when I use the word "diagnostic",
12 uh, to me that means there was en -- there was enough
13 about the bone, either given its shape or its
14 contours, where I could say, yes, this bone fragment
15 came from the skull.

16 Q And, uh, it -- I may not be clear enough in my
17 own head, so what, exactly, is a cranial suture?

18 A We, um -- All of us, hopefully, as -- as, uh -- as
19 we're born, develop into kids and -- and get older.
20 Um, hopefully our heads grow to accommodate our
21 growing brains. And, uh, essentially, what happens
22 is that -- the skull is made up of multiple bones,
23 and as your brain grows, um, your skull is able to
24 accommodate that growth at these open sutures or
25 these, um -- I don't want to call them a zipper, but

1 in a sense, you could think of them as the teeth of a
2 zipper, um, that as you get older, um, those teeth or
3 these sutures sometimes fuse or grow together. But
4 in -- in younger children, even, uh, in adults,
5 hopefully my age, those sutures are still pretty open
6 even though my -- my brain has stopped growing.

7 Um, for little kids or for babies, um,
8 you can sometimes feel a soft spot on the top of
9 the head. That's because the bone, uh, has not
10 grown to the point where, um, that soft spot is
11 covered up yet.

12 Q All right. Are they somewhat reflected, or some
13 people refer to those as growth plates? Or they
14 assist in the growth of the head and this -- the
15 brain? Skull?

16 A Most people, uh, refer to growth plates with respect
17 to growing long bones. The leg bones and the arm
18 bones. But less so, really, with the skull.

19 Q All right. All right. Uh, next, uh, exhibit,
20 please? This is Exhibit No. three eighty --

21 A This is Exhibit 385. Um, this photograph was taken,
22 um, as part of my preparations in preparing, um, a
23 submission or a package for a transfer to the FBI
24 for -- for examination. What you are looking at in
25 this image, um, is a bone fragment that's -- that's

1 kind of charred but, um, perhaps not really burned,
2 and certainly not to the degree of the other, uh --
3 of all of the other bone fragments found in this
4 case.

5 ATTORNEY FALLON: I'm going to ask my
6 colleague, if I could, to zoom in on the one that
7 you seem to be pointing at. Pointing your laser
8 pointer at.

9 A Thank you. This -- this is the bone, um, and
10 although there's no scale in this particular
11 photograph, it was really meant as a -- as a, um -- a
12 reminder to me what the contents of that evidence tag
13 number, uh, contained.

14 And this is -- was the largest bone that
15 was collected as part of this evidence tag. It
16 is, uh, unquestionably human, um, and -- and
17 the -- the color of this bone is more typical of
18 what you would expect to see, um, in a nonburn
19 case. In other words, it was somehow protected,
20 um, and if you could zoom out to the larger photo
21 for me, please, was protected by some of, um,
22 this dried or desiccated muscle tissue that
23 surrounded this bone.

24 Q All right. Now, the one we've been examining
25 more closely here, is that the bone that you, uh,

1 had sent or arranged to be sent to the FBI, or
2 excuse me, to the Crime Lab for further analysis?

3 A No, this -- um, the contents of all of the items you
4 see on this screen, um, this larger bone, which is
5 only about two-and-a-half inches long, and some of
6 these other bone fragments, and this muscle tissue,
7 uh, was packaged by me and transferred directly to
8 the FBI in November of 2005.

9 Q All right. Um, what type of bone, uh -- Is that
10 all bone, or is it tissue, or what, exactly, is
11 that one to the far left there?

12 A This?

13 Q Yes.

14 A This entire fragment is human bone.

15 Q All right. All right. Based on your examination
16 of the bones and fragments recovered, uh, from
17 the, um, burn pit behind the garage of Mr. Steven
18 Avery, did you find evidence of human remains?

19 A Yes, sir, I did.

20 Q And what did you determine?

21 A I was able to determine --

22 Q Were they human or nonhuman? Human?

23 A They were human.

24 Q Were you able to determine, uh, the -- or
25 identify the relative age of the person whose

1 remains you examined?

2 A Yes, I was. And it -- it's, uh, with a reasonable,
3 uh, degree of scientific certainty, based on an
4 examination of certain preserved parts of the
5 skeleton, um, my assessment is that the, uh,
6 fragmentary and burned remains that I was asked to
7 examine from behind Mr. Steven Avery's garage were
8 those, um, of someone, uh, probably no older than
9 between 30 to 35 years of age.

10 Q When you -- when you say "no older" can you
11 explain that? No older than the range of 30 to
12 35. Can you explain how anthropologists use
13 dates like that so that we're not confused?

14 A I -- I will. And, um, I -- I would say that any
15 reasonable and professional forensic anthropologist
16 will always provide an -- an age range, as opposed to
17 a particular year, um, because we can never really
18 know for sure. But there are certain
19 characteristics, certain things we expect to see
20 happening to bone at certain ages, and as we -- as we
21 age, as we start to look a little different every
22 year on the outside, on the inside our bones also
23 start to look a little different.

24 And what I'm referring to in particular
25 is the onset of a degenerative bone condition

1 known as arthritis.

2 Q All right. So when you say, uh, 30 -- of an
3 individual less than 30 to 35, in other words,
4 it's someone who's younger than -- I assume you
5 have different levels? There's a 30 to 35,
6 there's a 20 to 25, or a 40 to 50, so they --
7 these remains of this person was somebody who was
8 clearly less than 30 to 35 years of age?

9 A That's correct. And I say that because there were no
10 bony signs of arthritis on several of the joint
11 surfaces that I was able to recognize and examine.

12 Q Were you able to determine the sex of the person
13 whose remains were recovered?

14 A Yes, I was.

15 Q And what was that?

16 A That in my professional opinion these remains are
17 those of an adult female.

18 Q And why were you able to make that determination?

19 A I was able to make that determin -- determination
20 based on, um, certain characteristics, traits and
21 measurements of various portions of the body that had
22 been recovered and could be recognized as to where in
23 the body they come from. Actually, which bone they
24 came from.

25 Q All right. I would like to direct your attention

1 to, I believe, the next photograph? And that
2 would be Exhibit 386?

3 A Three-eight-six. That's correct.

4 Q And, uh, it's now being displayed on the screen.
5 What are we looking at in Exhibit 386?

6 A Um, I -- I would ask, um, you to -- as you're facing
7 me, um, we are facing this image, and -- and what we
8 are looking at is, um, the recognizable, what I call
9 diagnostic, portions of human facial bones, and --
10 and I'd like to take you through what it is I see in
11 the hopes that you can orient yourselves as well.

12 Q Sure.

13 A Um, if you, um -- if you're looking at this head-on
14 or face-on, if you will, this would be the top of the
15 left eye socket. This would be the top of the right
16 eye socket. This is the left nasal bone. Um,
17 everyone's nose has a right side and a left side. We
18 recovered the left nasal bone. We also have the
19 entire, or virtually the entire, right cheekbone, as
20 well as a portion of the left cheekbone, and a
21 portion of bone that begins in the cheekbone area and
22 continues over and above the left op -- the opening
23 for the left ear.

24 Q All right.

25 A And -- and I must say, if I can add, that, um, in

1 burn situations like this one, it is sometimes
2 unusual to find the -- the facial structures because
3 they are thin and easily damaged. And the fact that
4 we have these bones and they are as recognizable as
5 they are, to me is -- is, in part, a testament to the
6 recovery that occurred at the scene.

7 Q I note from examining, uh, Exhibit 386 that there
8 appear to be some red dots on the fragments which
9 are displayed?

10 A That's correct.

11 Q Can you explain what those dots are and who --
12 how they came to be?

13 A Yes. Um, I would be happy to do that. As -- as part
14 of the investigation and the sorting, um, I needed to
15 find a way to, um -- to mark from what location
16 certain bones came. And what I initially decided to
17 do was to go out to Walgreens, buy some very brightly
18 colored nail polish in different colors, different
19 enough so that each color could be distinguished from
20 one another, and mark certain recovered items whose
21 tag numbers or identification numbers we knew so that
22 if I was, over time, be able -- was able to re-fit
23 fragments, I would know if one match and another
24 match came from the same, uh, evidence collection or
25 came from two different evidence collections, for

1 example.

2 Um, the red dots you see here, um,
3 indicate that all of these fragments, all of
4 these, recognizable to a forensic anthropologist,
5 facial fragments, came from that initial recovery
6 Tag No. 8318, uh, in that white box that I was
7 initially asked to examine.

8 Um, I would also like to say that I took
9 great pains on these fragments, and other
10 fragments that may have been so marked, to place
11 these dots in areas that did not ob -- obscure
12 any kind of anatomical landmark or that might be
13 needed later on for examination purposes.

14 Q All right. If you would turn to the next
15 photograph? This would be Exhibit 387?

16 A Yes, sir.

17 Q And 387 is what?

18 A Three eighty-seven is a close-up of a portion, uh, of
19 facial bones that we saw in the previous, uh, slide.
20 Uh, what you are looking at, uh, we're doing the same
21 thing. We're looking face-on at somebody, and what
22 you are looking at, this area is actually the area
23 just above and between your eyes. And, again, this
24 area is the portion of the frontal bone or the
25 forehead that demarcates or forms the boundary for

1 the top of the left eye socket.

2 You are also looking at -- at the left
3 nasal bone. Uh, and while you can't see it here,
4 um, actually -- which actually fit with this
5 frontal bone.

6 Q All right. If you would, uh, turn to the next,
7 uh, photograph, I believe it would be Exhibit
8 388?

9 A Yes, sir.

10 Q And Exhibit 388 is, um -- First of all, you have
11 to tell us a little bit about this exhibit. Um,
12 um, how was this -- with whom did you work to
13 prepare this particular exhibit?

14 A Um, I had the opportunity, uh, to work with, uh, a
15 Wisconsin State Trooper by the name of Timothy
16 Austin, who prepared many of the graphics for this
17 case, um, using software that, uh, I wouldn't have
18 the first idea about how to make work, but he -- he
19 did, uh, a wonderful job in -- in helping me depict
20 certain areas of -- of the body that had been
21 recovered, uh, from -- from Mr. Avery's property.

22 Um, what this slide depicts is a graphic
23 of a human skull. We are essentially looking,
24 again, face-on at that skull, and each of these
25 identifying labels, uh, points to the portion of

1 the facial bone that was depicted and was
2 recognized and was inventoried, uh, in this
3 particular case.

4 If you remember, we had virtually the
5 entire right cheekbone, um, that we call the
6 malar bone, but it's essentially a cheekbone, um,
7 we had the left nasal bone, um, we had this
8 portion of the left cheekbone, the left malar
9 again. We had that, um, linear or stick-looking
10 piece of bone that forms part of the cheekbone
11 that continues over and above the -- the opening
12 for the left ear.

13 Um, and a very, very characteristic
14 portion of the left frontal bone that contains,
15 uh, a continuous surface demarcating the top of
16 the left eye socket.

17 We also had, uh, fragments from the --
18 the top of the right eye sockets, but,
19 unfortunate -- unfortunately, given their
20 fragmentary nature, they could not be
21 re-approximated or fit one right next to another.

22 Q All right. If we could have you turn to one
23 more, uh, photograph, and then, um, I'll ask a
24 couple of questions regarding the ones we just
25 looked at. Uh, Exhibit, I believe it would be

1 389?

2 A Yes, sir.

3 Q All right. Um, the question at hand, as we began
4 the analysis of these, uh, facial bones, was your
5 ability to determine a female from male, and, um,
6 if you would then, uh, illustrate further, uh,
7 making a compare and contrast, uh, Exhibit, uh,
8 389, with, uh, the male and female anatomy and
9 tell us how you were able to determine that the
10 remains you examined were, in fact, female?

11 A In fact, there were multiple indicators of -- of, uh,
12 these remains having come from a female. Um, the
13 first, um -- the first evidence of that actually came
14 from that left frontal bone fragment that you saw a
15 minute ago with, um, the sharp, um, upper boundary of
16 the left eye socket, and that is, uh, characteristic,
17 and actually the hallmark, uh, for, um, being able to
18 dis -- distinguish -- well, one of the
19 characteristics and one of the hallmarks for allowing
20 anthropologists to make a distinction between males
21 and females.

22 Q So I take it, then, by your description, you're
23 pointing that the skeletal figure depicted on the
24 left-hand of our screen is a male?

25 A No, actually, uh, facing the screen --

1 Q Oh. Our -- our looking -- look -- right-hand
2 side, excuse me.

3 A Yes. The skeleton graphic on the right-hand side is
4 the male --

5 Q Right.

6 A -- and on the left-hand side depicts, in a general
7 way, a female.

8 Q Okay. Now, you said, uh, in addition to the, uh,
9 facial bone, uh, that you've just described,
10 there were other, uh, bone, uh, material that you
11 examined that, um, further supported your opinion
12 that, uh, the remains were of a female?

13 A Yes, sir.

14 Q Tell us --

15 A Um --

16 Q -- about that.

17 A As we move from, um, the head down the body to what
18 are called the post-cranials, anything neck and
19 below, post, again, after, so below the -- below the
20 skull, uh, one of the, um, fragments that was
21 actually recovered and in very, very good shape was
22 part -- was a bone that forms part of the elbow
23 joint, and the elbow joint is made up of three bones;
24 the lower end of the upper arm bone, that's called
25 the humerus, and the upper end of the two lower arm

1 bones, the one on the thumb side of the arm, called
2 the radius, and the one on the other side, called the
3 ulna.

4 And what I was able to identify was the
5 elbow, and of the radius, it's called the radial
6 head, which is, um, a rounded lozenged-shaped
7 portion of the bone that forms part of the elbow
8 joint.

9 Q All right. And, um, did you recover, uh, any
10 other bones? For instance, a femur shaft or
11 anything like that which would be of -- would be
12 of some assistance in determining the sex?

13 A Yes. Along with the head of the radius, um, that
14 actually I can try and point out in this graphic,
15 it's -- well, maybe not. Um, may I -- may I approach
16 the --

17 Q Sure. I think that --

18 A -- graphic? I think I might be able to do a little
19 better.

20 Q Sure. Would you like to use a pen to, uh, point
21 or --

22 A Well, no, this -- this should work. Um, it's that
23 lozenged-shaped area right there. You have one on
24 the left and one on the right, um, but I was only
25 able to identify one of those radial heads and -- and

1 I do not know from what side that came.

2 Um, along with the head of the radius
3 there was also a femur shaft. The femur is the
4 thigh bone. And, um, most long bones, the arm
5 bones and the leg bones, as you can see in this
6 photograph, the upper arm bones, there's an upper
7 end at the joint, a lower end at the joint, and
8 in between those two joint ends is usually the
9 cylindrical or rounded part of the bone that's
10 called the shaft.

11 And there was a femur shaft fragment
12 that was found in with the initial recovery Tag
13 No. 8318 whose circumference measurement or the
14 measurement around the tubular part of the bone
15 falls well within the expected range, uh, for
16 females.

17 Q Now, early on in -- when we were talking about
18 your experiences, you say -- uh, you said that
19 oftentimes the ancestry or stature of a person
20 could be determined. Were you able to make any
21 of those determinations upon your examination in
22 this case?

23 A I was not. Uh, stature is, um -- was not possible.
24 There were no complete long bones or no bones long
25 enough to even, um, estimate stature from. Uh,

1 likewise, there was nothing indicative of, um,
2 ancestry.

3 There's certain parts of the body that
4 anthropologists typically look at, um, skull
5 shapes and proportions, as well as areas of the
6 femur and some other bones that often assist us
7 in determining ancestry or race. And, in fact,
8 unless you can make a determination as to
9 ancestry, um, no good forensic anthropologist
10 would even attempt stature because many of the
11 equations we use to plug in the length of a long
12 bone require that you know the ancestry
13 beforehand.

14 Q I take it that's because there are different
15 standards associated with age?

16 A There are different standards because different
17 populations, um, are proportioned differently, and
18 those equations take that into account.

19 Q Doctor, I want to switch gears a little bit from
20 some of your, uh, findings here, and, uh, ask you
21 this, um, uh, question: As a forensic
22 anthropologist, are you -- um, are you familiar
23 with the concepts of cause and manner of death?

24 A Yes, I am.

25 Q Are you, um, sometimes asked to render such

1 opinions based on your training, your experience
2 and your findings?

3 A Uh, I am. Uh, and in particular, in cases where
4 remains are too -- either too badly decomposed or
5 have been otherwise compromised to the point where
6 traditional autopsy cannot be performed.

7 Q So, uh, for the benefit, uh, of all of us here,
8 in your mind, please distinguish cause of death
9 and manner of death.

10 A When -- when, uh, someone uses the terms "cause of
11 death" it's, um, why -- why did the person die? Um,
12 but "manner of death", um, is -- is how did they die?
13 And, um, most people would agree that there -- in
14 general, there are, um, four main categories that
15 people look to when they talk about manner of death.
16 And, um, one of those categories is, uh, a natural
17 death. Another category is an accidental death. A
18 third category would be, uh, suicidal. Someone takes
19 their own life. And the fourth major recognized
20 category is homicide. That is, someone takes the
21 life of someone else.

22 Q Um, based on your findings and examination of the
23 materials submitted to you in your training, do
24 you have an opinion as to the manner of death of
25 this individual?

1 A I do, sir.

2 Q And what is that opinion?

3 A In, um, my professional opinion, the manner of death,
4 uh, in this case was by homicidal violence.

5 Q Could you explain that term for us, please?

6 A Yes, sir. Um, in -- in inventorying and examining
7 every fragment, um, every piece that was recovered
8 from this scene, and in separating the human bone
9 from the nonhuman bone, from the nonbone, whether it
10 was metal, fiber, whatever, um, there were two
11 fragments in particular, two skull fragments, that
12 showed, in my mind, unmistakable, um, defects or
13 unnatural openings, openings that were not caused
14 either by some disease process, they weren't
15 pathological nor were they caused by any congenital
16 condition or some kind of condition that someone
17 might have been born with.

18 Q Now, if you would turn to the next, uh, exhibit
19 you have there? And that is Exhibit 3 --

20 A That is Exhibit 3-9-0.

21 Q What are we looking at?

22 A We are looking at one of the cranial fragments. Um,
23 obviously, it's unrecognizable to most people who --
24 who haven't spent many years looking at -- at bone
25 fragments, but this is a human bone fragment that has

1 been burned, that is fragmented. You are looking,
2 uh -- If you think of the skull kind of as a ball
3 that has an inside surface and an outside surface,
4 you are looking at the inside surface of a skull bone
5 that I know comes from the side of the skull, and I
6 know that because of these anatomical landmarks here.

7 These, um, what looks like -- look like
8 tracks in the sand are actually impressions in
9 the bone in which, um, vessels sit. Um, and when
10 you hear that someone has meningitis, these --
11 these, uh, tracks are the -- the, uh, areas in
12 which the meningeal -- middle meningeal vessels
13 sit. The vessels that become inflamed when
14 someone does have meningitis.

15 So the fact that we see these vessel
16 markings mean that this bone has come from one of
17 the two bones on the side of the skull, and these
18 bones, they're matched bones. They're called
19 parietal bones, p-a-r-i-e-t-a-l. There's a left
20 parietal bone and a right pariet -- parietal
21 bone, and when I take this bone, um, and orient
22 it in its, um, correct anatomical position,
23 because of the placement and direction of these
24 vessel markings, I know that this fragment came
25 from the left side of the skull from the left

1 parietal.

2 I -- I also --

3 Q I was going to say, uh, parietal is p-a-r-i-e --

4 A E-t-a-l.

5 Q Okay. And, uh, just so that we're oriented in
6 common everyday parlance, uh, where -- where on
7 the skull is the parietal bone found?

8 A The -- We -- As I mentioned, we have two parietal
9 bones. One, it's a -- it's a matched set. We have
10 one on the left side of our skull and one on the
11 right side.

12 Q All right. Um, in relation to an area that, um,
13 people are familiar with, sometimes called the
14 temporal area, where in relation to the temporal
15 area would this parietal bone, uh, which, uh,
16 appears to be depicted in Exhibit 390, where
17 would that be on the left side?

18 A The temporal -- Uh, the temple area, um, would be,
19 uh, to the front portion of that bone.

20 Q Okay. Um, before I go further into, uh, having
21 you describe the findings regarding these, um,
22 unnatural defects to the skull fragments, were
23 there any other reasons, um, that you believed
24 supported, uh, any other finding that you made
25 that supported your opinion that this was

1 homicidal violence?

2 A Well, I think, um, there was a -- a clear effort to
3 obscure a body, uh, through burning. Um, the -- the
4 extreme heat-related fragmentation, um, the burning
5 of the bone, in some cases the calcine bone, taking
6 the -- the destruction of the bone mineral to -- to
7 its extent, um, there was an obvious attempt, in my
8 professional opinion, to obscure the identity of an
9 individual.

10 Q All right. All right. Returning, then again, to
11 these, um, uh, defects, you've talked a little
12 bit about the parietal defect depicted in Exhibit
13 390, if I could direct your attention to Exhibit
14 391, if you could tell us what that is?

15 THE COURT: Mr. Fallon, before you begin,
16 I -- or continue, I'm going to give people a chance
17 to get up and stretch. It's been about an hour
18 since we've been out here, so... We're not going to
19 take a break, just a chance to get up and stretch.

20 (Short break taken.)

21 All right. You may be seated.

22 Mr. Fallon, you may continue.

23 Q (By Attorney Fallon) Directing your attention --
24 I think we were at Exhibit 391. What is Exhibit
25 391?

1 A Three-ninety-one, um, represents an image of three
2 different bones that were re-approximated or
3 re-fitted from the left parietal.

4 Um, this larger fragment, now in proper
5 anatomical position, um, is the fragment -- the
6 only fragment we saw in the previous image.

7 You are looking, uh, at the fragment as
8 if you were standing inside of the skull looking
9 to the inside of the left side of the skull.

10 And so, again, I would call your
11 attention to these vessel markings that now are
12 in proper anatomical position. Um, the outside
13 of the skull would be behind.

14 Q All right. Now, you mentioned something about
15 these, uh, defects. Is the def -- one of the
16 defects the, uh -- that you found with --
17 associated with the parietal skull bone, is it
18 featured in this exhibit here?

19 A Yes, sir, it is.

20 Q Would you point out to us, um, the, um -- the
21 defect that, uh, caused you some concern and
22 support your opinion with respect to homicidal
23 violence as the manner of death?

24 A Yes, sir. I would, uh, like to call your attention
25 to the top portion of this bone, and in particular to

1 this semi-circular defect here that has another
2 smaller, um, unnatural opening here, and this is
3 actually the border from the outside of the un --
4 unnatural opening, and this area here that all --
5 that looks very much like honeycomb, actually kind of
6 is honeycomb.

7 Um, our skull is -- is made up, um --
8 it's kind of a sandwich between hard, flat bone
9 on the outside, hard, flat bone on the inside,
10 with a honeycomb type of bone in the middle. And
11 it's through this honeycomb type of bone, um,
12 that there's -- there's fat, and there's blood
13 vessels and -- and so on.

14 And, um, what you're looking at here is
15 the in -- internal portion of the skull. We
16 don't see the -- the outside of the skull, but
17 what you're looking at is kind of the inside of a
18 crater where the inside of the skull bone here is
19 gone. It's missing. And you're looking directly
20 into the honeycomb portion of the skull.

21 Q All right. If you would turn to the next
22 exhibit, um, 392, I believe?

23 A Yes, sir.

24 Q And what is depicted in Exhibit 392 then?

25 A What we are looking at here is -- is, essentially,

1 the flip side of -- of what we were just looking at.
2 We are looking at the three bones, but this time from
3 the outside of the skull.

4 And what I will call your attention to
5 is the circular or crescent-shaped opening
6 reflected on the outside of the skull. This is,
7 essentially, just above where that honeycomb bone
8 was on the inside of the skull that we just
9 looked at.

10 Q Now, I also note, in addition to the, uh, couple
11 of different colored, uh, dots on that, there
12 also appears to be an arrow, uh, on Exhibit 392?
13 Do you know what that is?

14 A That's correct. I believe that is a -- a copper
15 marker that was affixed there by a representative of
16 the Wisconsin Crime Laboratory.

17 Q Mr. Olsen?

18 A I believe so.

19 Q All right. If we could direct your attention,
20 then, to, uh, the next exhibit? I believe it
21 would be 393?

22 A May I, uh, just return for one moment?

23 Q Oh, sure. I'm sorry if I'd interrupted you.

24 A No, that's -- Um, we -- we mentioned before the,
25 um -- my attempt at marking, um, some of the bone

1 fragments, and what I would like to call your
2 attention to here, um, are these two different colors
3 of nail polish on this bone. The parietal fragment
4 with the defect --

5 Q Right.

6 A -- or the unnatural opening, and, um, an adjoining
7 parietal fragment showing the same two markings.

8 Q All right. And that's -- As you've said, that's
9 related to your color coding system --

10 A That's correct.

11 Q -- to assist you in, uh, recognizing what the
12 items are, and when you received them, and where
13 they came from?

14 A And -- and, additionally, um, whether there were any,
15 um, specific results, um, that I wanted to show on
16 that particular bone.

17 Q Exhibit 393? What is -- What is it that we are
18 looking at, uh, with respect to Exhibit 393?

19 A This is, uh, another part of the skull. This time
20 not from the left side of the skull, but from the
21 back side of the skull, and you're looking, uh,
22 again, at the internal portion, or the inside of the
23 skull bone, um, two different fragments that
24 re-approximate, that fit, um, together, and, um, an
25 area where you can see clearly a honeycomb appearance

1 to the bone, which means a portion of the inside,
2 between the outside of the skull and the inner skull
3 bone, is exposed.

4 Q And is there a name for this particular bone?

5 A This bone is known as the occipital bone,
6 o-c-c-i-p-i-t-a-l. And it's the bone you feel at the
7 back of your skull.

8 Q And, um, the, uh, area where this defect is, is
9 that the area which seems to be, uh -- our
10 attention seems to be directed to by virtue of
11 the, uh -- the, uh, triangular marker?

12 A That's correct.

13 Q And next exhibit, please? I believe this is
14 Exhibit 394?

15 A Yes, sir.

16 Q Uh, what is it that we're looking at here?

17 A This is, um, uh, a view of the same two bones, uh,
18 although, um, you get a better sense of the totality
19 of those two bones. Um, just by way of reference, I
20 will point your, uh, attention here to the inner
21 table of the skull, the inner margin of the skull,
22 and, again, this honeycomb bone between the inner and
23 outer tables of the skull that's exposed, and, again,
24 another copper-colored pointer pointing to this
25 unnatural opening.

1 Q Now, um, are you familiar with the phrase, uh,
2 "internal beveling"?

3 A Yes, I am, sir.

4 Q And could you tell us what that is?

5 A Internal beveling is kind of cratering. Um, it's,
6 um, where, um, there may be an opening. Um, for
7 example, if you take a -- a piece of drywall or
8 sheetrock and -- and you hammer something into it,
9 you're -- you're liable to have a -- a small hole on
10 the outside, but if you flip that -- that piece of
11 particle board around, you'd see a wider opening, or
12 a cratering on the opposite side. And that's,
13 basically, what we are seeing here on the internal
14 view of the skull bone at the back of the skull.

15 Q And so you were pointing, again, to the area
16 where you've identified it as a defect, and it's
17 indicated in this photo by the Crime Lab marker?

18 A It is. And the honeycomb appearance of the bone.

19 Q All right. Was there anything else about the
20 def -- this internal beveling or -- or this --
21 that you've earlier referred to it as a defect
22 that was unusual?

23 A Um, in the sense that, um, both of these defects, um,
24 the -- the cranial bones that were identified by me
25 were taken for x-ray in November of 2005, and, uh,

1 ten different x-ray films were taken, and the results
2 of those x-rays indicate, um, that there were what
3 are called radiopaque particles, or little areas on
4 x-ray that were much whiter than -- and much denser
5 than surrounding bone.

6 And when you look at these x-rays, those
7 little white flecks, the reason they are so white
8 in comparison with the surrounding bone is that
9 the x-rays, while they pass through bone, do not
10 pass through these other areas, and that's why
11 you have that whiter appearance in relationship
12 to the bone, itself.

13 Q So these -- this, uh, radiopaque or denser
14 material, which of the, uh -- of the, uh, bones
15 had the presence of this material? And the
16 parietal bone, or the occipital bone, or both?

17 A Both, sir.

18 Q All right. Um, next exhibit, please? I'd like
19 to step out a little bit from the, uh, trees and
20 get more of the overview, uh, forest perspective.
21 Um -- Well, before we do that, we have one last
22 internal photo. What is it that we're looking at
23 here with respect to this particular photo?

24 A We are looking at the flip side, or the outside of
25 that occipital bone, the bone at the back of the

1 skull that shows the unnatural opening. And what I
2 will point out here is the outside of that opening,
3 as well as the loss of a little bit of outer bone,
4 which is not unusual when bone is -- is burned as it
5 is in this case. The bone becomes very brittle and
6 fragile and it's not unusual to see some spawling off
7 of bone from the outer surface.

8 Q All right. Next exhibit, please? That would be
9 Exhibit 396?

10 A Yes, sir.

11 Q All right. Exhibit 396, uh, does that, uh,
12 generally depict the location of the parietal
13 defect as you observed it?

14 A Yes, sir, it does.

15 Q Uh, next one, please? What are we looking at
16 here? I take it this is, uh, Exhibit 397?

17 A Yes, it is. What we are looking at are two of three
18 fragments that could be re-approximated or re-fitted
19 from the left parietal bone. What I -- I'll call
20 your attention, again, to these vessel markings
21 telling me that this, in fact, comes from a parietal
22 bone, and, more specifically, call your attention to
23 the internal beveling or internal cratering, um, of
24 the parietal bone.

25 And what I'd like to call your attention

1 to are these four flecks or whiter areas depicted
2 on x-ray. Here's one. Here's another. Here's a
3 third. And here's a fourth.

4 Q Directing your attention to the one, uh, in the,
5 uh, bevel defect?

6 A Yes, sir.

7 Q Are, um, those, uh, dense, white specks or
8 particles, are those naturally occurring?

9 A They are not, sir.

10 Q When we say something is, um, radiopaque, uh, can
11 you give a -- a -- a layman's, um, understanding
12 of that term?

13 A Well, I am certainly not a radiologist, but it means
14 that the, um -- the x-rays, which are -- are not
15 visible to the naked eye, cannot penetrate whatever
16 that substance is. Uh, and in this case, can
17 penetrate the bone, but cannot penetrate these other,
18 uh, more dense substances.

19 Q All right. If you would, uh, take the next
20 exhibit? Exhibit 398?

21 A Yes, sir.

22 Q What are we looking at in Exhibit 398?

23 A We are looking at one of the, um, x-rays, one of the
24 ten x-rays, that was taken in November of 2005 of
25 selected, um, cranial fragments, and, uh, in

1 particular, I'd like to call your attention to some
2 of the sutures that we talked about before. The
3 irregular shape of these bones, um, but, in
4 particular, I'd like to focus on this bone up in the
5 upper left-hand corner.

6 Q All right. Now, what bone is it that we've
7 zoomed in now at the upper left-hand corner of
8 Exhibit 398? There are eight, uh -- eight bones
9 depicted, and we're looking at the one in the
10 upper left-hand corner, and, uh, what is it
11 that -- which bone -- First of all, is that the
12 parietal or occipital?

13 A That is the occipital fragment with the unnatural
14 opening.

15 Q All right. And, um, would you identify clearly,
16 then, the, um, uh, radiopaque dense particles
17 you've been talking about?

18 A Yes. Um, I focus your attention in this area within
19 and adjacent to the unnatural opening or defect. Um,
20 and, uh, in x-ray, when I look at the x-rays, I count
21 at least ten different particles. There may actually
22 be more.

23 Q All right. Thank you. Um, would you turn to the
24 next exhibit, please? This would be Exhibit 399?

25 A Yes, sir.

1 Q All right. Uh, and, uh, 399, uh -- What is
2 depicted on Exhibit 399?

3 A We are looking, uh, at the back, uh, of this graphic
4 skeleton. The back kind of from the left-hand side
5 of the skeleton and the approximate area of, uh,
6 where that occipital defect or opening is on the
7 bone. Uh, it related to the previous slide we just
8 saw of the x-ray.

9 This is the portion of the bone that
10 showed at least ten of those radiopaque or dense
11 particles adjacent to the defect.

12 Q All right. Excuse me. All right. Uh, Doctor,
13 in terms of, um, these defects, were you able at
14 all, based on your findings, to determine a
15 particular order which these defects may have
16 occurred?

17 A No, sir.

18 Q Are these naturally occurring defects in the
19 human condition?

20 A They are most certainly not.

21 Q Why not?

22 A Um, based on the -- It's not what our bone looks
23 like. It's not what our skull bone looks like. We
24 may have tiny openings for the passage of blood
25 vessels, but we do not have openings that, um, are

1 this large or that cause, um, the outer or inner
2 tables of the skull, um, to be fractured away or to
3 expose the honeycomb bone in between the outer and
4 inner layers of the -- of the skull.

5 Q In your opinion, Doctor, did these defects exist
6 before the burning episode or did they occur
7 after?

8 A In my professional opinion these defects occurred
9 prior to or before the bone epi -- the burning
10 episode. Before.

11 Q Tell us why?

12 A Um, as I looked at the bone, uh, it's always
13 important to look at the distribution of burning and
14 the color on the bones, and, um, inside the defects,
15 uh, the cratering and the honeycomb portion of the
16 inside of the skull is of the same color as the
17 outside burned portion and the inside burned portion.
18 And based on that observation, it is my professional
19 opinion that these defects occurred prior to the
20 burning episode.

21 Q What does the presence of the internal beveling,
22 coupled with the localized radiopaque particles
23 on the parietal and occipital bones, signify to
24 you?

25 A To me, the -- those defects, and -- and what those

1 defects look like, signifies, um, what happens to
2 skull bone when it's subjected to a gunshot or
3 gunshots.

4 Q I have a few, uh, questions here of -- to
5 conclude. Uh, before I do, Doctor, you mentioned
6 something about the concept of postcranial
7 remains, uh, and having described them as below
8 the head. What other postcranial remains, uh,
9 were you able to identify as coming from the area
10 behind the, uh, garage that we've been referring
11 to as the burn pit?

12 A I would, um -- I would say that virtually every part
13 of the skeleton -- Um, obviously, there were no
14 entire bones that were found, but at least a fragment
15 or more of almost every bone below the neck was
16 recovered in that burn pit. Um, one bone that's
17 conspicuously absent, uh, are the left and right
18 kneecaps, for example, but that is not surprising to
19 me given that those bones were made up almost
20 exclusively of that honeycomb, very fragile bone,
21 that I would expect not to survive, um, a burning
22 episode. So it's not surprising to me that I've not
23 found evidence of -- of the kneecaps, but virtually
24 every other bone below the neck, um, I found evidence
25 for.

1 Q Uh, next exhibit, please? I'm showing you what
2 has been, uh, marked for identification purposes
3 as Exhibit 3 -- um, 400?

4 A Yes, sir.

5 Q And with respect to Exhibit 400, is this, um,
6 representative of the variety of human bone that
7 you found in this area?

8 A Yes, sir.

9 Q So you have some rib bone, some hand, some legs,
10 clavicle --

11 A There is --

12 Q -- or shoulder bones?

13 A Yes. Um, obviously, no entire bone, but, uh, enough,
14 um, of a bone or bones -- uh, enough of the
15 anatomical landmark that I can say this is part of
16 the spine, or this is part, uh, of a rib, or this is
17 part of a -- a collarbone. Yes, I can.

18 Q Now, there were some other bones that you found
19 that you weren't completely sure were human or
20 not; is that correct?

21 A That is correct.

22 Q Let's talk a little bit about that, if you'd
23 like, all right? Um, and we'll talk about them
24 in -- in this context, other than, uh, damage
25 caused by fire or gunshot, as you've, uh, told us

1 about, what other bones did you find that had
2 other indicators of -- of damage or unnatural
3 occurring injury to them?

4 A There were several other bones whose origin, uh, I
5 could not be sure of. In other words, I was not
6 sure, uh, that the bones were definitely human.

7 Q I'll get to that in a minute.

8 A Okay.

9 Q If you would just describe for us, first of all,
10 what the possibility or probability -- What --
11 Describe the bone that you have, uh, pictured in
12 your mind right now, and then we'll talk about
13 it.

14 A There -- there is one bone fragment in particular.
15 Uh, part of a bone shaft. That kind of tubular,
16 cylindrical portion of a bone is probably not more
17 than about two or two-and-a-half inches, um, that
18 shows evidence of cut marks and, of, uh, a saw cut as
19 well.

20 Q All right.

21 A And that bone is -- is, um, burned to the point of
22 being calcined. In other words, its color has moved
23 beyond black, but to whitish-gray.

24 Q All right. Now, with respect to that particular
25 bone, uh, can you say to a reasonable degree of

1 scientific certainty that that bone shaft
2 fragment is a human bone?

3 A I cannot, sir.

4 Q Um, did you find any evidence of a, uh -- of the
5 superior aspect of an iliac blade?

6 A Uh, yes, I did. And, um, for everyone in the room
7 but me, I'll show you where that is.

8 Q That's my next question.

9 A And, um --

10 Q Thank you. Bail me out.

11 A The, um -- The pelvis is made up of three different
12 bones; the left hip bone, the right hip bone, and the
13 sacrum, which is the bone that sits at the base of
14 the spine and actually is the lowermost portion of
15 the spine. And the iliac crest is this top area
16 here. What you actually feel, if you rub your hand
17 on your hip bone, that's known as the iliac crest.

18 Q All right. Now, the bone that you suspected to
19 be the iliac crest, can you say to a reasonable
20 degree of scientific certainty that that, uh, is
21 human bone?

22 A No, sir, I cannot.

23 Q Did you find evidence, uh -- or -- of a bone
24 that's referred to as the sacral iliac
25 articulation?

1 A Actually, those are two bones. It's where the right
2 half of the sacrum, or the lowermost part of the
3 spine, um, articulates -- it's actually adjoined --
4 with the right side of the hip bone.

5 Q And in terms of that, uh, suspected bone
6 fragment, can you say to a reasonable degree of
7 scientific certainty that that was human bone?

8 A Um, I cannot.

9 Q Doctor, were you able to perform any other tests,
10 uh, on these bones to determine if they were of
11 human origin?

12 A Uh, no, there were no other tests that I performed.

13 Q And why is that?

14 A Um, I did not, uh -- there, um, are -- There is the
15 potential for, um, using, um, microscopes to look,
16 for example, to try and confirm if suspected human
17 bone might actually be human bone or animal bone, but
18 given the condition of the remains, I did not
19 believe, um, that cutting into the bone, uh, that
20 they would survive that -- those kinds of tests, and
21 so I did not perform them.

22 Q Did you make an effort to, have, um, um, several
23 bone fragments, uh, submitted to the FBI
24 Laboratory to attempt further identification?

25 A Yes, sir, I did.

1 Q Based upon your examination of the bones and the
2 material that you had, did you find evidence of
3 any heman (phonetic) human bone that was
4 identified as being collected from a site other
5 than the burn pit behind the defendant's garage?

6 A Yes, sir, I did.

7 Q Tell us about that?

8 A There, uh -- Human bone also was found in and among
9 material that was collected from, uh, what was
10 designated "Burn Barrel No. 2".

11 Q All right. And what type of bone fragment do you
12 recall as having come from that particular burn
13 barrel?

14 A There was a portion of a -- a scapula or a shoulder
15 blade, um, some long bone fragments, um, a possible
16 hand bone, metacarpal, and I believe there was a
17 fourth representation but I don't remember. Um, I
18 certainly can check my notes if you'd like.

19 Q Uh, would it -- Spine bone, perhaps?

20 A Yes. Vertebral spine. Thank you.

21 ATTORNEY BUTING: Sorry. What was that?

22 Q (By Attorney Fallon) Could you -- Counsel didn't
23 hear that.

24 A Part of -- Part of the spine. A vertebral element.

25 ATTORNEY BUTING: Vertebral?

THE WITNESS: Yeah.

ATTORNEY BUTING: Okay.

Q (By Attorney Fallon) All right, Doctor. The opinion that the remains were those of an adult female less than 30 to 35 years of age, do you hold that opinion to a reasonable degree of scientific certainty?

A Yes, I do.

Q The opinion that the internal beveling observed in the left parietal bone is characteristic of a gunshot or bullet entrance wound, do you hold that opinion to a reasonable degree of scientific certainty?

A Yes, sir, I do.

Q The opinion that -- The opinion that the internal beveling observed in the occipital bone left of the midline, is characteristic of gunshot or bullet entrance wound, do you hold that opinion to a reasonable degree of scientific certainty?

A Yes, sir, I do.

Q The opinion that the internal beveling observed in the left parietal bone and in the occipital bone occurred before the burning episode, do you hold that opinion to a reasonable degree of scientific certainty?

1 A Yes, sir, I do.

2 Q Finally, Doctor, the opinion that the manner of
3 death for this person was homicidal violence, do
4 you hold that opinion to a reasonable degree of
5 scientific certainty?

6 A Yes, I do.

7 ATTORNEY FALLON: Um, I would move into
8 evidence the exhibits that I've had this witness
9 identify. Upon their receipt, would pass the
10 witness for cross-examination.

11 THE COURT: Any objection to the exhibits?

12 ATTORNEY STRANG: I have no objection to
13 any of the exhibits.

14 THE COURT: Very well. Court will order,
15 uh, all of the exhibits testified to by this witness
16 admitted, and at this time we're going to take our
17 afternoon break. Uh, members of the jury, I'll
18 remind you not to discuss the case during the break.
19 Uh, and we'll resume cross-examination after the
20 break.

21 (Jurors out at 2:42 p.m.)

22 THE COURT: You may be seated. Counsel,
23 I'll try not to, uh, interrupt you in your
24 examination for a stretch break, but, uh, science
25 class is pretty heavy for the jury, so when I look

1 at them and think they need a break, I'll try to do
2 it at a logical time.

3 ATTORNEY STRANG: You should feel free
4 to do that.

5 THE COURT: All right. We'll see you at
6 3:00.

7 (Recess had at 2:43 p.m.)

8 (Reconvened at 3:00 p.m.; jurors present.)

9 THE COURT: You may be seated. Is
10 someone going to get the witness?

11 ATTORNEY FALLON: I believe so.

12 THE COURT: All right. Mr. Strang, you
13 may begin.

14 ATTORNEY STRANG: Thank you, Your Honor.

15 **CROSS-EXAMINATION**

16 BY ATTORNEY STRANG:

17 Q Dr. Eisenberg, um, let's start by agreeing, if we
18 can, that in all the work you did on this case
19 with human bone, possible human bones, suspected
20 human bone, all of the work which you've
21 testified, you had no evidence that more than one
22 person was involved in terms of a contributor of
23 bones?

24 A Are you asking me whether or not more than one
25 individual was represented by what I examined?

1 Q That's right. That you have no evidence that you
2 saw bone fragments from more than one person? Is
3 that a better way to put it?

4 A I have no evidence for having seen any duplicate
5 bones in what I examined. That's correct.

6 Q No evidence that you saw bones that were
7 characteristically male, for example?

8 A No trace that would suggest to me any of those
9 fragments came from a male skeleton.

10 Q Nothing to suggest female human bones of a
11 detectably different age range than the under 30
12 to 35 years you've testified to here today?

13 A That's correct.

14 Q The evidence that you have is that the bone
15 fragments here were attributable to one person
16 and one person only?

17 A That's correct.

18 Q Did I hear you stop just short, um, of giving us
19 your opinion on the cause of death? Did I hear
20 you stop just short of that?

21 A Um, no, I don't believe so.

22 Q Okay. I heard you say that you had an opinion on
23 manner of death; correct?

24 A I -- I was asked to render an opinion as to manner of
25 death.

1 Q And the manner of death you assigned here in your
2 opinion as homicide, or I think your term was
3 homicidal violence?

4 A Yes, sir.

5 Q All right. And, again, that's -- Manner of death
6 is a, um -- is a term of art, if you will,
7 normally used by medical examiners, or coroners,
8 pathologists?

9 A That's correct.

10 Q All right. Um, and we have accidental, suicidal
11 homicidal, and there's -- there's a -- there's a
12 fourth one?

13 A Natural.

14 Q Natural, which would encompass illness or heart
15 attack, that kind of thing; correct? In natural?

16 A Well, I guess it depends on the situation, and -- and
17 since I am not a forensic pathologist, I'd -- I'd --
18 uh, really don't know how to answer that question.

19 Q Well, I'd understood you to be saying, uh, here
20 to this jury that you are qualified to give an
21 opinion on manner of death?

22 A In the absence, uh, of, um, remains that could be
23 subject to a traditional autopsy, then really the
24 forensic anthropologist is the only one, um, who can
25 offer such, uh -- such information.

1 Q And are you qualified to opine on manner of
2 death, including natural, accidental, homicidal
3 and suicidal?

4 A Uh, I believe, depending on the nature of the case,
5 yes, I am.

6 Q What do you mean by "depending on the nature of
7 the case"?

8 A If the remains are highly fragmented, whether or not
9 they're burned, if the remains are too decomposed or
10 skeletonized for a traditional autopsy, um, then if
11 the forensic anthropologist observes something that
12 is significant and can speak to cause and/or manner
13 of death, I believe it's the duty of the forensic
14 anthropologist to provide that information.

15 Q All right. Now, right now, I'm interested in
16 manner. We'll get to cause. But is there a
17 situation in which you would be qualified to
18 opine, uh, that a cause of death was natural?

19 A I don't believe so.

20 Q Then it's also true that there is not a situation
21 in which you would be qualified to exclude
22 natural cause of death unless you definitely
23 could include or attribute manner of death to
24 homicide, suicide?

25 A There are many cases with which I've been associated

1 or asked to examine where no cause or manner of death
2 can be attribute --

3 Q Let -- let's go back and let's -- let's -- let's
4 work on answering the question I'm asking, all
5 right? Manner of death --

6 A Yes, sir.

7 Q -- I think we've established that you can't think
8 of a case in which you would be qualified to
9 offer an opinion that the manner of death was
10 natural? Did I understand you?

11 A That is correct and that is because, uh, often a
12 forensic anthropologist is not provided with enough
13 remains to be able to do that. In other words, if
14 I'm presented with --

15 Q All right.

16 A -- a skeleton --

17 Q The answer to my question is, yes? You are not
18 qualified to render an opinion in any case you
19 can think of that the cau -- that the manner of
20 death was natural? The --

21 A I -- I don't --

22 Q -- answer to that question's yes?

23 A I -- I -- I am not -- I -- I don't believe I'm not
24 qualified. I simply believe that there is no way for
25 me to observe and interpret what might be considered

1 a natural, uh, death.

2 Q And if there's no way for you to observe and
3 interpret it, then you certainly wouldn't offer
4 an opinion to a reasonable degree of scientific
5 certainty that something was a natural cause of
6 death, would you?

7 A That's correct.

8 Q All right. And then the question when we got a
9 little bogged down was, then, unless you could
10 say to a reasonable degree of scientific
11 certainty that the manner of death was either
12 homicidal or suicidal, you also could not rule
13 out natural death, could you?

14 A By exclusion, no, I could not.

15 Q The same would be true both calling an accidental
16 death as the manner of death or rule out
17 accidental as the manner of death?

18 ATTORNEY FALLON: Objection as to the,
19 uh, relevance of an opinion -- of a relevance of
20 an opinion regarding, uh, accidental or natural
21 death to our circumstances here. Those were not
22 the opinions elicited.

23 ATTORNEY STRANG: No, but I think she
24 was tendered as an expert on giving an opinion on
25 manner of death.

1 ATTORNEY FALLON: In the context in
2 which it was asked?

3 THE COURT: I'm not sure if these are
4 foundational questions leading to something else or
5 where we're going.

6 ATTORNEY STRANG: They are.

7 THE COURT: All right. On a foundational
8 basis, I'll allow it.

9 Q (By Attorney Strang) Again, not qualified to
10 give an opinion within your field that
11 something's an accidental death?

12 A There may be circumstances where, um, I might be able
13 to distinguish an accidental death from a -- a
14 different type of manner.

15 Q Okay. And that -- that -- the situation there
16 might be, just to use an easy example, uh, the
17 crash of a -- of a jetliner? Of an airplane,
18 possibly; correct?

19 A Well, I certainly wouldn't give an opinion as to, um,
20 how people died, because there may have been many
21 factors beyond my expertise.

22 Q Okay. But, again, if we're just talking about
23 manner and not cause, if you had no evidence that
24 the plane fell out of the sky because of a bomb
25 or some deliberate human action, but, rather,

1 that the plane crash was an accident, in that
2 instance you, as a forensic anthropologist, might
3 be able to say the manner of death of a passenger
4 in the plane was accidental?

5 A That's correct.

6 Q But, again, I think what I hear you saying is
7 that you, as a forensic anthropologist, have a
8 fairly limited range in which you're comfortable
9 opining on the manner of death if accident is a
10 possibility?

11 A It -- It depends on, um, my observations and, um,
12 what's presented to me for analysis.

13 Q Now, let's go, then, to cause of death; all
14 right?

15 A Yes, sir.

16 Q Okay. Cause is just -- If -- if it's a homicide,
17 how did the homicide happen; right? I mean, was
18 it a gunshot? Was it something else? That's
19 what we mean by cause of death?

20 A That's correct.

21 Q All right. And, ideally, we would try to assign
22 something more specific than that? If it's a
23 gunshot, we'd like to know a gunshot to where;
24 correct?

25 A Correct.

1 Q All right. Here, you are not able to give an
2 opinion that a gunshot or a gunshots caused the
3 death of the person whose bones you examined, are
4 you?

5 A I am able to note the presence of defects that are
6 consistent in architecture and -- and -- and what's
7 happened to the bone.

8 Q And, again, that -- that wasn't my question, was
9 it?

10 A Would you ask it again, then, please?

11 Q I'd be happy to. You are not able to give us an
12 opinion here that gunshot or gunshots was the
13 cause of death of the person whose bones you
14 examined?

15 A In the absence of any other professional looking at
16 these remains, that that is my testimony.

17 Q Why don't you tell me just exactly what evidence
18 you have on which to conclude that the defects
19 here you've described as gunshot wounds happened
20 before the death of the person whose bones you
21 examined?

22 A I would be happy to, um -- to, uh, repeat, uh, the
23 answer I -- I gave before when that question --

24 Q What --

25 A -- was asked.

1 Q What is the evidence -- Let's assume these are
2 gunshots for purpose of our discussion here, all
3 right? What you -- what we're calling unnatural
4 defects. Let's assume they're gunshots. What
5 evidence did you see that allows you to conclude
6 that those gunshots happened before or at the
7 time of death?

8 A I am not able to -- to tell you whether those
9 gunshots -- I can tell you that the gunshots happened
10 before death. I cannot tell you within a time
11 interval how close to the time of death they
12 occurred.

13 Q I think I heard you testify that you could tell
14 us that the gunshots happened before burning?
15 Did I hear that correctly?

16 A That's correct.

17 Q All right. And you explained why you -- you
18 concluded that the gunshots happened before
19 burning --

20 A Yes.

21 Q -- of the bones? Because the coloration's about
22 the same, including on that beveled surface on
23 the inside of the bone?

24 A Yes, sir.

25 Q The interior side of the bone? So I understand

1 that you -- you believe that the gunshot wounds
2 here happened before the bones were burned?
3 I'm -- I'm clear on that? Tell me what evidence
4 you have that the gunshots to those bones
5 happened before death as opposed to a dead person
6 being shot?

7 A After or before burning?

8 Q I'm talking about before burning. I'm talking
9 about well before burning, okay? What evidence
10 do you have that the person whose bones have the
11 gunshot holes --

12 A Um-hmm.

13 Q -- was alive and breathing as opposed to dead? A
14 corpse, unburned, but dead, at the time the
15 gunshot wounds made the holes you identified in
16 those bones?

17 A So -- so if -- if I may ask the question in a
18 different way to make sure I understand what you're
19 asking, you are asking me how can I be sure that a
20 person who was already dead, then, did not sustain
21 two gunshot wounds to the head?

22 Q Let's -- I'll -- I'll work with that. Can you
23 work with that for me in answering the question
24 about --

25 A Is -- is that a fair assessment --

1 Q Sure.

2 A -- of what you've asked me?

3 Q Sure.

4 A Um, given the fragmentation to the skull and the
5 inability to put the entire skull back together, I
6 cannot say that.

7 Q As you sit here, and on the evidence you have,
8 one or both of those gunshots, as easily, could
9 have been fired into the skull of a dead person
10 as into the skull of a living person; true?

11 A That is possible.

12 Q Which -- Not only possible, it's true, isn't it?

13 A Yes. In the absence of being able to reconstruct the
14 skull, um, I would agree with you.

15 Q And -- and you've completed the work that you've
16 been able to do on reconstruction of this skull?

17 A To the best of my ability, yes.

18 Q All right. And if the gunshot wounds were fired
19 into the skull after the person was dead, then
20 the gunshots did not cause the death of the
21 person, did they?

22 A That would be a correct assessment.

23 Q If the gunshots did not cause the death of the
24 person, then, as we go back to manner of death as
25 homicide, the evidence you have for homicide is

1 the burning or destruction of the bones that you
2 saw?

3 A That is correct.

4 Q The burning or destruction of these bones clearly
5 happened after death or postmortem as you say?

6 A One would hope so.

7 Q You have no evidence that it occurred before
8 death?

9 A I do not.

10 Q So if you're unable to give us an opinion on the
11 cause of death, then you also are unable to give
12 an opinion on the manner of death, unless we take
13 as sufficient support for your opinion on
14 homicidal violence as the manner of death the
15 burning or destruction of the bones that you've
16 described?

17 A That's correct.

18 Q Now, you understand -- I don't mean to have
19 ang -- angels dancing on the head of a pin here,
20 you understand, because you're a forensic
21 anthropologist, you apply anthropology, the
22 science of human behavior, cultural and physical
23 characteristics to law?

24 A That is correct.

25 Q All right. And the law in the state of Wisconsin

1 includes, among other possible crimes, but two
2 relevant here, first degree intentional homicide,
3 that is, intentionally causing the death of a
4 human being, you understand that?

5 A Yes.

6 Q And a crime called mutilation of a corpse, you
7 understand that --

8 A Yes, I do.

9 Q -- as well? And if one is living, then the
10 defendant or the person is incapable of
11 mutilating a corpse, because it -- you know, if
12 you're living, you're not a corpse; correct?

13 A Correct.

14 Q All right. So you understand, here, that these
15 folks to your left will have to make a
16 distinction between homicide on the one hand and
17 mutilating a corpse on the other? You understand
18 that?

19 A Yes, I do.

20 Q All right. And you certainly would view the
21 burning of bones to this state of char and
22 calcination as mutilation of a corpse, and that
23 to the extent these are human bones, that looks
24 like mutilation of a corpse, doesn't it?

25 A That's correct. Although mutilation of a corpse does

1 not -- is not mutually exclusive. In other words --

2 Q Understood.

3 A Okay.

4 Q Un -- understood. Uh, but I'm -- In terms of --
5 You -- you -- you would view what happened here,
6 with the fragmentation and burning of bones, as
7 mutilating a corpse if someone had done that
8 intentionally, wouldn't you?

9 A Correct.

10 Q All right. Now, in your work with these bone
11 fragments, uh, you found evidence of two gunshot
12 wounds I take it?

13 A Yes, sir.

14 Q You did not find evidence of 10 or 11 gunshot
15 wounds in any of your work with these bone
16 fragments?

17 A I did not.

18 Q Let's, uh, spend a little bit of time talking,
19 now, just sort of backing up a bit, uh, to the
20 recovery of -- of bone fragments. The initial
21 process of recovery. Um, I understand you
22 weren't there, okay, but I want to talk to you
23 about the recovery process, all right?

24 Um, you were -- you were out of state at
25 a -- at a conference in Denver or something, and,

1 uh, didn't attend the recovery effort of any --
2 any bone fragments here?

3 A That is correct.

4 Q Indeed, you weren't asked to do that?

5 A That is correct.

6 Q Your initial contact on November 9 was a phone
7 call simply alerting you that someone was
8 bringing a box of material collected to you?

9 A Yes, sir.

10 Q All right. And -- and -- and, indeed, somebody
11 did, so when you came to the office on
12 November 10, uh, there was a box waiting for you
13 on your arrival?

14 A That's correct.

15 Q This was the box you've described as being under,
16 uh, Tag 8318?

17 A That's correct.

18 Q Now, when -- when -- you -- you -- you talk about
19 tags a lot, and I understand that, and you do,
20 um, but, uh, when evidence is collected, the --
21 the person or people collecting that evidence
22 will give it a unique number often on a tag;
23 correct?

24 A That's correct.

25 Q So they can keep straight what it is they found,

1 and what they did with it, and then keep track
2 later of where it goes --

3 A Uh --

4 Q -- whose got their hands on it?

5 A As well as that number is also associated with the
6 location of the find.

7 Q Ab -- absolutely.

8 A Yes.

9 Q Um, in general, and certainly in this case?

10 A Yes, sir.

11 Q And the location will be described with some
12 degree of, I guess, specificity. Here, 8318 was
13 described as being behind Steven Avery's garage,
14 or words to that effect?

15 A Yes, sir.

16 Q All right. And, um, you were -- you -- you know
17 a gentleman named Dr. Ken Bennett, uh, who also,
18 I think, lives in Madison?

19 A Yes, I do.

20 Q Uh, Ken Bennett, uh, also a Ph.D like you?

21 A Yes, that's correct.

22 Q Also a forensic anthropologist?

23 A Yes.

24 Q Uh, a colleague or at least an acquaintance of
25 yours?

1 A Yes.

2 Q And, uh, because you were out of town, uh,
3 Dr. Bennett was the first to take a look at some
4 of the bone fragments that you later examined?

5 A That's correct.

6 Q To your knowledge, he wasn't asked to go to the
7 recovery scene either?

8 ATTORNEY FALLON: Objection. Calls for
9 hearsay.

10 ATTORNEY STRANG: I -- I guess I said,
11 "to your knowledge" and that may or may not call
12 for hearsay. Um --

13 ATTORNEY FALLON: Source of the
14 information would be for Mr. Bennett or another
15 agent. That would --

16 ATTORNEY STRANG: Well, let --

17 ATTORNEY FALLON: -- be hearsay.

18 ATTORNEY STRANG: Let's -- let -- let me
19 withdraw it and we'll go at it this way.

20 THE COURT: All right.

21 Q (By Attorney Strang) Uh, you and Dr. Bennett
22 share a specific field of expertise?

23 A That's correct.

24 Q Forensic anthropology?

25 A Yes.

1 Q There aren't that many of you folks in the world,
2 or at least certainly in the state of Wisconsin?

3 A There aren't that many board certified forensic
4 anthropologists.

5 Q He's also board certified?

6 A He is not.

7 Q Uh, and he's someone with whom you've worked
8 collegially at various times in the past?

9 A Uh, initially, when I moved to Wisconsin, uh, he
10 invited me to work with him on a number of cases.

11 Q In your field of forensic anthropology, is it
12 reasonable to rely on, uh, information provided
13 by another forensic anthropologist whom you know
14 to be honest and qualified?

15 A Um, are you asking do I make an independent
16 assessment or do I rely on information provided by a
17 colleague and peer?

18 Q Oh, I -- I -- I'm quite certain that you always
19 make an independent assessment in the end, don't
20 you?

21 A I do.

22 Q Yes. But --

23 A And --

24 Q And in doing --

25 A -- and in the beginning.

1 Q Okay. And -- And in doing that, uh, because you
2 can't be all places at all times, you have to
3 rely on information provided by others?

4 A Well, I think the -- the investigators had to rely on
5 someone who was knowledgeable at the time.

6 Q No, I'm talking about you, though. I mean,
7 you -- you got to rely -- and you do routinely
8 rely on some information provided by others?

9 A Certainly in terms of, uh, forensic literature, that
10 would be a good example.

11 Q That'd be one good example. Another good example
12 would be when you come in and you say, uh, these
13 are bones that were found behind Steven Avery's
14 garage. You've never seen Steven Avery's garage
15 in person in your life, have you?

16 A That is correct.

17 Q Okay. Um, so you're getting that kind of
18 information from law enforcement; right?

19 A That's correct.

20 Q Perfectly reasonable in your field to rely on law
21 enforcement officers for that sort of
22 information?

23 A Yes. They are trained in investigations.

24 Q Sure. And so when they tell you this is Tag 8318
25 and it was found behind Steven Avery's garage,

1 unless you have some very good reason to doubt
2 that, that's information that you rely on as part
3 of your work in forensic anthropology?

4 A That is correct.

5 Q Likewise, if Dr. Ken Bennett gives you
6 information about what he saw or what he did,
7 unless you've got some very good reason to doubt
8 that, it's reasonable for you to rely on it in
9 doing your own work?

10 A No, I don't agree with you. I --

11 Q You wouldn't rely on Dr. Bennett?

12 A I would listen -- If he gave -- he provided me with
13 information, I would certainly note that, but I would
14 start my investigation from scratch, um, independent
15 of any information he or anybody else gave me.

16 Q So if -- if Dr. Bennett had told you, this is Tag
17 8318, and it's from behind Steven Avery's garage,
18 you would have said, no, I've got to start from
19 scratch. I'm going to drive to Mishicot,
20 Wisconsin and make sure that there's a Steven
21 Avery who's got a garage?

22 A Well, the information provided to Dr. Bennett -- Dr.
23 Bennett ultimately came from law enforcement, and it
24 would be from law enforcement that I would take that
25 information.

1 Q Okay. All right. So what, ultimately, came from
2 law enforcement, you know that Dr. Bennett wasn't
3 asked to come to the scene of Steven Avery's
4 garage either, don't you?

5 A No, I don't know that, sir.

6 Q You don't?

7 A I don't.

8 Q All right. Do you have any information that
9 there was an anthropologist present anywhere at
10 the Avery Salvage Yard during the recovery of the
11 bones you saw?

12 A I do not believe there was.

13 Q That wasn't so hard, was it?

14 A No.

15 Q Okay. Um, and what you do know is that you --
16 regardless of who was at the scene, you did not
17 receive any record of where any particular
18 fragment was found in relation to any other
19 fragment?

20 A That is correct.

21 Q You got -- You got sort of general locations for
22 batches or boxes or bags of fragments?

23 A That's true.

24 Q Area behind the garage, here's a box containing
25 the number of fragments?

1 A Or burn pit, here's a box.

2 Q Right.

3 A Correct.

4 Q Or, for example, beyond the Burn Barrel No. 2?

5 A That's correct.

6 Q Okay. And, uh -- but -- But, as you're going
7 through the, uh -- the fragments that you
8 received, you did not have benefit of knowing
9 where fragment A was found in relation to
10 fragment B or fragment C?

11 A That is correct.

12 Q In -- indeed, we've had testimony here that part
13 of the recovery process, uh, involved first
14 taking a shovel or a -- a small -- smaller hand
15 tool of some kind, both, I guess, the testimony
16 was, scooping up, um, you know, a shovel of
17 something out of, let's say, the burn area or the
18 burn pit, and then putting it on a sifting tray?
19 We've had testimony like that here. Is that
20 consistent with your understanding of the
21 recovery process?

22 A I -- Unfortunately, I know little or nothing about
23 how the recovery was undertaken.

24 Q All right. You say, "unfortunately" you know
25 little or nothing about that. Why -- Why do you

1 say "unfortunately"?

2 A Well, I -- I wasn't here when the majority of the
3 work took place, and, uh, I know only what was
4 associated with the evidence identifier in terms of
5 location.

6 Q Uh, you're familiar with sifting of possible
7 human remains?

8 A I am -- As an archaeologist and forensic
9 anthropologist, I am.

10 Q Right. And that's -- that's, actually -- I was
11 going to get there eventually. But, uh, your --
12 your day job, so to speak, is that you're the
13 coordinator for the State Historical Society's,
14 uh, Burial Sites Preservation Program?

15 A That's correct.

16 Q For the state of Wisconsin?

17 A That's correct.

18 Q And, uh, burial site preservation is something
19 that falls into a subfield of anthropology called
20 archaeology?

21 A That's correct.

22 Q Um, which you could define better than I, but,
23 essentially, it's historical, uh, focus on
24 physical, cultural, behavioral characteristics of
25 human beings?

1 A Actually, my -- the majority of my experience is from
2 prehistoric archaeological sites.

3 Q I should have said that, because it's -- We've
4 got history and then we've got prehistory?

5 A Right.

6 Q All the way back to, conceivably, the earliest,
7 uh, Homo sapiens or earlier, conceivably, would
8 fall into archaeology?

9 A That's correct.

10 Q So, um, you're familiar with this process of
11 sifting at, for example, a burial site?

12 A Yes.

13 Q Now, when you -- when you sift, uh, and you're
14 sort of shaking things through, uh, necessarily
15 what you're doing is you're rearranging the
16 orientation or placement of, let's say, bone
17 fragments, uh, from what they were before being
18 disturbed?

19 A Depending on how they were taken from the ground and
20 placed in the screen, that is a possibility.

21 Q Okay. If they're taken from the ground with a --
22 with a good, old shovel, and the shovel's turned
23 over on the screen, we're likely to be
24 reorienting, if you will, the placement of the
25 bone fragments each to the other?

1 A Well, archaeologists sift and screen all the time,
2 and we know where that shovelful came from, and as
3 long as what's found in the screen is associated with
4 the location of origin, then we are just fine with
5 that.

6 Q Sure. No, I -- I understand that you --

7 A Right.

8 Q -- screen all the time.

9 A Right.

10 Q I'm just saying that part of what we're doing --
11 Um, if this is -- you know, it's three o'clock in
12 the afternoon, it's going to be dark in two
13 hours, so we're going to sort of swoop and scoop,
14 uh, part of what we're doing is we're rearranging
15 the places of the fragments? That's all. I'm
16 not -- I'm not --

17 A Archaeology by its very nature is -- is a destructive
18 endeavor, and so, in a sense, that's -- that's what
19 happens.

20 Q Yeah. And, um, if there -- if there was not a
21 note made of where this shovelful came, or better
22 yet, if there was not photography taken, you
23 know, of -- of each, let's say, a grid section or
24 small areas, we later would not know where
25 fragments from a particular shovelful came in in

1 relation, at least, to any other shovelful?

2 A That is true. I would, uh, offer, in -- in this
3 particular case, given, um, the -- the burn
4 fragments, the dark color, um, while photography is
5 often -- often accompanies this kind of endeavor,
6 photography in this case may not have been all that
7 helpful in terms of discriminating one fragment from
8 another.

9 Q We'll never know, because we don't have the
10 photography?

11 A I don't know that, but if that's what you're telling
12 me --

13 Q You've never seen any photographs of these --

14 A I have not.

15 Q -- of these fragments in place as found?

16 A I have not.

17 Q Okay. Um, now, you know, obviously, archaeology
18 is destructive in the sense that we -- we -- you
19 and I just agreed, if we're sifting and removing
20 things from one place and taking them to another,
21 in a sense we're destroying the site, if you
22 will, or rearranging, changing the placement of
23 the bones; true?

24 A And any other material that might be of --

25 Q And -- and any other --

1 A Right.

2 Q -- material that might be of interest?

3 A Right.

4 Q Um, but, you know, essentially, if we -- if we do
5 this, we scoop it up, we put it on -- on a -- on
6 a sifting screen, this is a little bit like
7 taking the pieces of a jigsaw puzzle and shaking
8 the box up?

9 ATTORNEY FALLON: I'm going to object to
10 that, uh, characterization. Uh, as I recall the
11 testimony of, uh, Mr. Ertl, he testified that
12 this was carefully done, uh, pushed on with a
13 shovel and then put into the sifter. It's not
14 this swoop and scoop and let's shovel it over
15 like we're digging a ditch. So we object to the
16 characterization of the question -- of the
17 question.

18 THE COURT: Okay. I -- Mr. Strang?

19 ATTORNEY STRANG: I -- I can re -- I can
20 reframe it if --

21 THE COURT: My understanding was that this
22 witness indicated she didn't actually know anything
23 about the particular method of collection here. I
24 understood the question to be more of a general
25 nature.

1 ATTORNEY STRANG: Yes.

2 THE COURT: Um --

3 ATTORNEY STRANG: They are. But let --
4 let me -- let me rephrase it.

5 Q (By Attorney Strang) I -- I think the point is
6 fairly clear, when we're -- when we're sifting
7 and shaking to try to get smaller pieces to fall
8 through and larger pieces to stay up in the mesh,
9 and then we do it again with a finer mesh, we're
10 simply -- we're simply reorienting, shaking the
11 bones around. The fragments. True?

12 A With -- with the ultimate goal of identifying and
13 recovering the maximum number of items.

14 Q Well, absolutely.

15 A Right.

16 Q Absolutely. Uh, un -- understood. Um, now, um,
17 it is true, though, that, um, had you been at the
18 scene, uh, you might have done this recovery
19 differently?

20 ATTORNEY FALLON: Objection. Calls for
21 speculation.

22 ATTORNEY STRANG: Well, I -- I -- I
23 think she knows how she would have done a
24 recovery.

25 THE COURT: Well, I'm not sure how she can

1 answer the question if she doesn't know how it was
2 done in the first place. I mean, she said she
3 wasn't there. I -- I think you'll have to rephrase
4 the question.

5 Q (By Attorney Strang) Let's go at it this way.
6 Uh, you have participated in burial site
7 recoveries a number of times yourself?

8 A Of unburn -- unburned skeletons, correct.

9 Q Of unburned skeletons?

10 A And on two occasions, um, clandestine graves.

11 Q Okay. So this -- this is work you've done, is
12 you've been out to a -- a gravesite or we'll call
13 it a burial site, and you've participated in
14 recovery; correct?

15 A That's correct.

16 Q Uh, you've directed recovery?

17 A Yes, I have.

18 Q All right. Uh, one of the things you do, for
19 example, at a burial site would be typically to
20 set up a grid?

21 A Depending on the nature of the site, maybe yes, maybe
22 no. Every site is a little bit different. Many of
23 the discoveries that I get called out to in
24 association with my job for the state of Wisconsin
25 involves an accidental disturbance of a portion of a

1 burial. Uh, under Wisconsin law, um, excavations of
2 burials are now prohibited without a permit. So not
3 even an archaeologist could go out and do that.

4 Q Okay. But a -- but assuming there's no legal
5 prohibition, and the terrain allowed it, one of
6 the things you have done in the past is set up a
7 grid, if you will?

8 A That's correct.

9 Q Tell -- tell the -- the jurors what -- what you
10 mean by a grid?

11 A Well, one of the important things that you do want to
12 do is, um, map or note the location of interest with
13 respect to a known point. So that even once the
14 excavation is completed with reference to that known
15 point, you could go back to that spot if you needed
16 to for some reason.

17 Um, the benefit, where appropriate of
18 setting up a grid of sorts, is to provide, uh,
19 a -- a somewhat more systematic way of recovery,
20 uh, so ultimately you will have an idea of the
21 relationship of different parts of the body to
22 each other.

23 Q And so if -- if we use -- if we're using a grid
24 to do that, we would set up the grid around and
25 probably just beyond the area that we suspect is

1 the burial site to be excavated or recovered?

2 A Correct.

3 Q And then we would -- this grid would consist of
4 some number of, essentially, squares?

5 A Or you may choose to run a string down the middle and
6 excavate the west half and then excavate the east
7 half. So there are varying --

8 Q Sure.

9 A -- degrees of -- of specificity that you --

10 Q Sure. But -- but -- but no matter how many ways
11 we -- we divide up the space --

12 A Um-hmm.

13 Q -- into just two with a string down the middle,
14 or into eight, or four, or sixteen, or whatever
15 it is, what we can do, then, is we can identify a
16 sector of the grid in which we're working at the
17 moment?

18 A That's correct.

19 Q Finish that sector, document what we've taken out
20 of there, and then move to another sector?

21 A That's correct. And sometimes that documentation
22 doesn't occur until you get back to the laboratory.

23 Q Um-hmm. But -- but later we'll have a record of
24 at least what area or sector of our grid
25 particular items have come from?

1 A That's correct.

2 Q Um, you also, in your work, um, recovering or --
3 or excavating a burial site, you'll set up, uh,
4 what you might call a contamination path?

5 A Well, um, not necessarily. Well, with respect to
6 forensic work, I certainly would, but -- but let me
7 preface that by saying that, um, if I am asked to
8 assist at a scene, um, it is not my investigation.
9 That investigation belongs to the local jurisdiction,
10 and if I'm invited in to assist, I may make rec --
11 recommendations, but that doesn't mean that I come in
12 and call the shots. It is always someone else's
13 investigation.

14 Q Yes. Un -- understood. And I think that's --
15 You know, that's consistent with my recollection,
16 at least of the testimony we've heard here from,
17 let's say, Crime Lab people.

18 A Okay.

19 Q And they -- they are asked to assist as you would
20 be on occasion? Uh, you would be brought in for
21 your expertise; correct?

22 A That's correct.

23 Q But you wouldn't be running the show. You'd be
24 offering your advice which, of course, your
25 advice is why you're being asked to attend?

1 A Which may or may not be followed.

2 Q Right. Your advice at least would be -- If this
3 was forensic, if something that might end up in a
4 courtroom, your advice would be to establish
5 something like a contamination path or a
6 contamination corridor so that we know where
7 we're walking in and out of the site?

8 A Well, that would not be my job. That would be the
9 job of -- of whoever's scene it was to maintain chain
10 of custody, to create a contamination path and so on.

11 Q Right. And I -- and I -- I think I said you'd
12 make a recommendation?

13 A I don't think I would need to make that
14 recommendation. That is part of normal police
15 protocol.

16 Q You would expect a -- the police normally to --

17 A Correct.

18 Q -- to do exactly that?

19 A Okay.

20 Q And, uh, where possible, you might try to either
21 photograph or mark, uh, items of interest, let's
22 say? Where they lie before picking them up in
23 any way, or scooping them, or removing them in
24 any way?

25 A I would certainly call the attention of a -- an item

1 of interest to an evidence technician and -- and a
2 scene photographer.

3 Q Sure. Where it's possible?

4 A Correct.

5 Q And I understand here, you know, you were -- you
6 were hypothesizing that, given the dark and
7 charred burn quality of these bones, photography
8 may or may not have worked?

9 A Correct.

10 Q Um, but the nail polish, um, idea that you had,
11 for example, later, was a way for you to later
12 associate one bone fragment at least with a tag
13 number --

14 A That's correct.

15 Q -- that you were given?

16 A That's correct.

17 Q And, conceivably, that sort of nail polish idea,
18 or something -- some similar coding or -- of
19 bones or fragments of bones might be done by
20 sector of a grid?

21 A That is -- That's a -- a possibility, yes.

22 Q Again, if -- if we're worried about where things
23 are in relation to one another?

24 A Correct.

25 Q Now, one of the reasons that trying to identify

1 things when they're still in the original place
2 can be important, uh, arises here in -- in a --
3 in a situation where bones have been burned, and
4 that is that once burn -- bones are burned to a
5 certain level, they become quite fragile?

6 A To a -- to -- for a high temperature for a prolonged
7 period and so on, that's correct.

8 Q Right. In fact, in your experience, very
9 commonly a calcined bone, um, may disintegrate
10 with any handling?

11 A It will certainly be extremely fragile and require
12 very careful handling.

13 Q And you may get spawling or some disintegration
14 no matter how careful you are?

15 A That's correct.

16 Q Uh, so if one wanted, in that situation, to see
17 a -- a very brittle or calcined bone as found,
18 one almost would have to photograph, or in some
19 way record without touching, the appearance of
20 the bone?

21 A Yes.

22 Q Um, calcined, by the way, is -- You described
23 that. But it -- it -- it's a -- it's a chemical
24 change in the minerals of the bone that produces
25 something called calx? Is that -- Is that your

1 best understanding?

2 A Um, I don't know the term "calx". I apologize.

3 Q C-a-l-x?

4 A No, I don't know that term.

5 Q Okay. It's the noun. The calcine is the -- the
6 adjective. Um -- In any event, these things have
7 a white appearance to them?

8 A And calcined bone can be, uh, a range of colors from
9 blue to gray to pinks to whites to yellows, even.

10 Q And -- and it tends to be sort of powdery on the
11 surface?

12 A Uh, if it's taken to the extreme, yes.

13 Q Now, um, the reason you might go to the trouble
14 in a burial recovery, um, of the grid, of a
15 contamination path, and photographing or trying
16 to identify things in place, is that you -- you
17 may want to know later, when you actually do get
18 a chance to examine bones or bone fragments up
19 close, how close they were in distribution and
20 placement to a human skeleton?

21 A That's -- That would be correct.

22 Q That's sort of the point of -- of this exercise;
23 correct?

24 A If -- if there's any way to determine, uh, for
25 example, what the position of the body was.

1 Q Right. So in other words, if -- if by careful
2 recovery process we find that, essentially, uh,
3 charred and badly burned bones without any tissue
4 at all nevertheless are found in the place they
5 would be, for example, if a skeleton was lying
6 prone on its back, we will know something about
7 whether that site was disturbed?

8 A That's correct.

9 Q Disturbed after burning occurred?

10 A Or as part of the burning episode.

11 Q Or as part of the burning process?

12 A Right.

13 Q Exactly. Um, so there's a number of ways that --
14 I call this a cremation site, um, might -- might
15 be disturbed. One is during the burning process?

16 A In order to keep a -- the fire going.

17 Q Absolutely. Poking the fire? Putting fuel on?
18 Whatever it may be?

19 A Correct.

20 Q Okay. Uh, another way it may be disturbed after
21 burning is, uh, animals? You know, just -- just
22 sort of animals in the environment? May -- maybe
23 they're rummaging around, or carrying off bones,
24 or sort of disturbing the scene?

25 A Uh, it's possible. Although, um, what I understand

1 about, uh, animals, um, coming to scenes of burned
2 human rem -- remains, typically they don't. Um, it's
3 not, uh, like a body that may be out in the woods
4 that's subject to coyotes and dogs and racoons, and
5 so on.

6 Q Okay.

7 A Typically, animals do not, um, come near burned human
8 remains.

9 Q They aren't drawn to the burnt remains?

10 A Correct.

11 Q Okay. A decomposing body you've seen --
12 you'll -- you'll see often. There's -- I know
13 there's a better forensic term for this, but, you
14 know, sort of animal damage as things are pulled
15 off or carried away?

16 A That's correct. The body, essentially, is in their
17 territory.

18 Q Exactly.

19 A Right.

20 Q And, um, another thing you may see, specifically,
21 or you'd be looking for in a -- in a cremation
22 site, is, conceivably, whether some effort was
23 made to change the body before it was burned?

24 A Can you be more specific?

25 Q I'm sure I can. Um, dismember a body, for

1 example?

2 A Uh, dismembering marks would be quite obvious even
3 after a burning episode.

4 Q But a starting point might be, uh, you know, if,
5 in recovering the bones, we find limbs, or bones
6 from limbs --

7 A Hum.

8 Q -- in places where they would not anatomically
9 be, we would potentially look further for
10 evidence of dismemberment?

11 A That's correct.

12 Q We also -- In a -- in a less sort of grotesque
13 way we might be interested, or you -- you would
14 be interested, if you could determine the
15 position in which a body fell, or the position in
16 which it was lying, or standing, or whatever it
17 was when burned?

18 A That's correct.

19 Q And so knowing where the bones first were found
20 might provide you some evidence from which you
21 later could draw a conclusion about body
22 position?

23 A That's correct.

24 Q Now, as it happened here, um, what -- what you
25 got was boxes and bags of fragments?

1 A That's correct.

2 Q You, in a -- in a -- I don't know who was here in
3 the initial sort, but sort of early in the
4 process, you, then, tried to separate, uh,
5 fragments, um, by areas of the body to the extent
6 you could identify, visually, what partial bone
7 you were looking at?

8 A That's correct. After sorting human from nonhuman
9 and other nonbiological items, um, the next step in
10 the process would be, uh, identification of fragments
11 and grouping of like fragments from the same bone, if
12 you will.

13 Q Right. So you divided the body up into I think
14 it was eight different categories; face and
15 cranial --

16 A Initially.

17 Q -- and --

18 A Initially.

19 Q Right. And tried to separate things into those
20 eight groups after weeding out the nonhuman and,
21 indeed, the nonbiological --

22 A That's correct.

23 Q -- stuff. And, uh -- and then you've already
24 told us about how you went the next step and
25 tried to color code, uh -- not tried, you did --

1 color code, um, bone fragments by tag number;
2 correct?

3 A Yes.

4 Q Which at least told you the approximate area that
5 the police say they recovered those fragments
6 from?

7 A That's correct.

8 Q None of that, though, um -- In -- in -- in none
9 of that were you able, then, to say, um, whether
10 the body had been disturbed or altered in the
11 places in which it was found?

12 A I cannot.

13 ATTORNEY STRANG: Uh, if I could trouble
14 Counsel, maybe we could go back to Exhibit 392?

15 Q (By Attorney Strang) And I'll give you -- Well,
16 if we can get it up on the screen, you can see it
17 from there?

18 A I can.

19 Q Okay. Exhibit 392, I think. Um, in fact, the --
20 it -- it is 392. It says up in the upper left
21 corner there?

22 A I do see that now. Thank you.

23 Q Now, these are three pieces that you were able to
24 fit back together?

25 A Yes.

1 Q Um, two of them you -- you nestled right up next
2 to each other like puzzle pieces; correct? And
3 the third one, I guess, you left that off a
4 little bit?

5 A Just -- just to show that, um, by separating it, that
6 yet there was a third piece that -- and that piece
7 does, in fact, re-fit.

8 Q Right. It -- it slides up and fits --

9 A It does.

10 Q -- right on there? Okay. Now, the -- the two
11 pieces on the left have double dots of some
12 wonderful nail polish color?

13 A They do.

14 Q All right. And the one on the right I -- I see
15 only one dot?

16 A That's correct.

17 Q Only one color? Does that mean the one on the
18 right was actually found in a different place or
19 under a different tag number than the two on the
20 left?

21 A No. Uh, the two fragments on the left that each
22 retained two different nail polish dots means
23 something different. Um, the more orangey-red of the
24 colors, um, that appears on each of the three
25 fragments means that those three -- three fragments

1 came from the original recovery Tag No. 8318. The
2 additional -- the second dot on each of the two
3 fragments on the left side of the screen indicate
4 that each of those fragments showed signatures in
5 x-ray of a material of par -- particles denser than
6 the bone, itself. So radiopaque particles that we
7 have talked about previously.

8 Q Fair enough. Okay. So that's -- We now
9 understand your code. We've got these little
10 speckles of radiopaque stuff on the two pieces on
11 the left but not on the piece on the right?

12 A Correct. That are not visible to the naked eye.

13 Q Very good.

14 ATTORNEY STRANG: We could probably take
15 that down. Thank you very much, Mr. Kratz.

16 Q (By Attorney Strang) Um, you were involved, I
17 think -- The very first picture, um, you were
18 shown, and you explained for the jury, uh, showed
19 you involved in a sifting or sorting sort of
20 process, yourself, um, at the -- at the Dane
21 County Morgue?

22 A No, that photo was actually taken at the Wisconsin
23 Crime Laboratory in Madison.

24 Q Okay. The -- the Crime Laboratory. And this --
25 this is, again, a process where you -- you spread

1 things out on tarps or plastic sheets and went
2 very carefully through a thinly spread layer of
3 the debris or material that had been recovered?

4 A Of -- of badly burned, uh, debris. Correct.

5 Q All right. One of the things that came out of
6 that was, to your knowledge, the discovery of
7 some, you could call, metal grommets or rivets
8 here? Were you around or were you aware of
9 discovery of some metal --

10 A There were some metal objects that, uh, I had
11 identified as such in my original sort on
12 November 10.

13 Q All right. And there -- those -- those were kept
14 as something possibly of interest?

15 A Those were returned to the Calumet County Sheriff's
16 Office. Correct.

17 Q Um, you also found, uh -- Do you have your
18 reports with you by the way?

19 A I do. And -- and I'm assuming they were also placed
20 into evidence or have they not yet been?

21 Q One of them has.

22 A One. Okay.

23 Q So, yeah. Don't worry about it. I'm -- I was
24 just going to invite you, if you need to, to feel
25 free to look at your reports.

1 A Thank you.

2 Q This -- this isn't a closed book exam here.

3 A Thank you.

4 Q Um, just tell us if you need to look at a report.
5 But, uh, you -- you found, also, some, uh, pieces
6 or remnants of fabric, um, as you sorted through,
7 um, the bone fragments and other material at --
8 at various times?

9 A That's correct.

10 Q That fragments of fabric you also kept?

11 A They were placed, uh, usually in vials or in ziplock
12 bags, um, marked with the evidence tag number, if
13 they were not kept with the bones, themselves.

14 Q You -- you remember any -- any fabric frag --
15 fragments or scraps of fabric that looked to you
16 like blue denim?

17 A With as much time that's passed, I don't remember.

18 Q One way or the other? Now, um, here you may need
19 your report, which is why I sort of warmed you up
20 for that. Uh, if you don't, that's fine. But,
21 uh, your recollection is that, um, the -- the --
22 the largest bulk of human bone fragments that you
23 saw came in under this original tag, 8318?

24 A Uh, I don't know if I can answer your question
25 because I looked at so many different containers,

1 that taken collectively may have been, um, larger in
2 bulk. What I can tell you is that the majority of
3 identifiable fragments probably did come from that
4 initial collection tag 3 -- 8-3-1-8, and also
5 provided me with, um, the initial information that
6 allowed me to determine, uh, sex and age.

7 Q Great. That's a good start. And, uh, you also
8 know that, uh, some of the fragments you examined
9 came from an area east of the burn pit or the
10 burn area?

11 A That's correct.

12 Q You know that's -- uh, because they -- they had a
13 separate tag number?

14 A That's correct.

15 Q And some of the fragments that you had examined
16 came under a tag number saying they were found
17 north of the burn area?

18 A That's correct.

19 Q On yet a third tag, uh, said these fragments came
20 from west of the burn area?

21 A That's correct.

22 Q You were aware of at least one fragment, uh, I
23 think the initial fragment found, that came from
24 about eight feet south of the burn area?

25 A I do not know to which fragment you're referring.

1 Q Okay. May -- maybe that wasn't separately
2 tagged. But we've got 8318 which comes from the
3 burn area, is your understanding?

4 A The burn pit sifted. Correct.

5 Q Right. The burn pit. And then east, north and
6 west of there?

7 A Correct.

8 Q And in -- and in each of those four groupings,
9 under these different tag numbers, you found
10 human bone?

11 A May I refer to my --

12 Q Ab --

13 A -- report?

14 Q Absolutely.

15 A Thank you. And here I'm referring to my second
16 report that includes a, um, basic spreadsheet of tag
17 numbers and, uh, material that was collected under
18 each tag number.

19 Q That's correct.

20 A What I don't have on this list is the, um, reference
21 location for each tag number.

22 Q Why don't you -- Why don't you try page four of
23 your first report?

24 THE COURT: I think while the witness is
25 looking at that, we will take a chance for a stretch

1 break if anybody wants one. Go ahead.

2 A May I ask you to repeat the question or have the
3 question read back, please?

4 Q Sure. I, uh -- What I'm asking is you -- in --
5 in each of those four areas, burn area, east,
6 north and west, you were able to identify some
7 human bone fragment?

8 A Um, actually, um, in the container or the package
9 labeled "bone fragments found north end of burn pile,
10 south end of garage", no bone was found in that,
11 uh -- associated with that evidence tag number.
12 Simply lots and lots of what appeared to be
13 insulation from what may have been wire that was no
14 longer present.

15 Q Some burned metal wire?

16 A Well, the insula -- burned insulation, uh, kind of
17 tubular thin insulation was --

18 Q Okay.

19 A -- in that container.

20 Q Okay. Fair enough. Um, but east and west you
21 did find human bone fragments?

22 A Yes, I did.

23 Q Uh, and the -- the burn area, itself, was
24 described to you as roughly a rectangular area,
25 six-by-six feet, more or less?

1 A Um, what I know of the burn area is from my reading
2 of, uh, Trooper Timothy Austin's, uh, graphic
3 depiction of the scene.

4 Q Which is about six feet by six feet, more or less
5 square or rectangular?

6 A Um, I -- There was no scale in the photo that I
7 remembered, but, uh --

8 Q Fair enough. Okay. Uh, we've heard testimony to
9 that, and you, of course, didn't get to hear
10 that. You -- you have no reason to doubt the DCI
11 agent who described the -- the burn pit?

12 A I do not.

13 Q Okay. As six feet by six feet rectangular? Um,
14 so let -- let me -- let me just see whether we
15 can agree that if -- First of all, you didn't
16 find the whole skeleton, obviously?

17 A That -- that is true. There were -- it was
18 impossible to reconstruct an entire skeleton.

19 Q Right. But you -- you did find at least a piece
20 of most of the bones -- almost all of the bones
21 in the skeleton?

22 A Correct. And for some bones, multiple pieces.

23 Q Right. Um, in all, though, this may be helpful,
24 um, for a -- a -- a woman of Teresa Halbach's
25 reported height and weight, you actually have a,

1 um -- or formula you can use to give a rough idea
2 of what you would expect the -- the total bone
3 weight of that skeleton to be?

4 A Well, there has been some work done in that regard,
5 um, by some anthropologists and -- and by some other
6 people, and, in general, as I read that information
7 and distill it, and, uh, figure out what everyone is
8 saying, um, some people say there's a lot of
9 variability based on geography, other people say it's
10 an unreliable measure, other people give weight
11 numbers in grams for if a -- if a fragmentary bone
12 weighs this much, then it was likely a male, if it
13 weighs under this amount, it was likely female, so I
14 think there's -- there's a lot of information out
15 there.

16 Um, what I've come to think about as --
17 as I worked on this case, is that, um, it may be
18 more important to think in terms of volume rather
19 than weight of fragments.

20 Q Okay.

21 A And, um, for that, I went to some of the literature
22 that funeral homes and crematories, uh, put out. And
23 there's kind of a general rule of thumb, um, that
24 says, for every pound of body weight, um -- If you're
25 buying an urn, for example, um, you should assume one

1 cubic inch per pound of body weight.

2 And, um, as I did my -- my quick
3 calculations, um, if Ms. Halbach's weight was as
4 it was stated on the missing person's poster, as
5 135 pounds, then in terms of volume, um, what
6 would have been expected if we were able to
7 identify every fragment as human and group them
8 all together, um, the volume of -- of her remains
9 after the burning incident -- incident, after
10 cremation of sorts, if you will, would be a
11 little larger than a two-liter bottle of soda.
12 And I say that with all due respect.

13 Q No. I -- I understand. A little bit more than
14 two liters?

15 A Correct. About 2.2 liters.

16 Q Um, for a person of about that weight --

17 A Correct. If -- if --

18 Q -- and stature?

19 A -- um, the crematory, um, estimates for the weight to
20 volume conversion is -- is accurate.

21 Q Right. And what you had here was substantially
22 less than two liters of volume?

23 A I'd say, um, probably, um, I have two- to
24 three-fifths of what might be expected, given those
25 rough calculations.

1 Q Okay. Fair enough. Um, so something, perhaps --
2 and this is all very rough -- uh, but perhaps
3 two- to three-fifths, 40 to 60 percent of what
4 might be a -- a complete skeleton --

5 A Correct.

6 Q -- in total?

7 A Um, no, that's -- I'm sorry. That's -- That's not
8 what I said. In terms of expected volume from, uh,
9 human remains of the stated weight for Ms. Halbach.

10 Q Yes.

11 A I believe if -- if you filled or put those fragments
12 into a two-liter bottle, about 40 to -- 40 percent of
13 that bottle would be filled.

14 Q Okay.

15 A Okay?

16 Q Great. Um, and what -- what we know, then, is
17 that there are -- there are pieces missing?

18 A We know there are pieces that are missing. That's
19 correct.

20 Q Not recovered?

21 A Or not there to recover after the burning episode.

22 Q Exactly. I mean --

23 A Correct.

24 Q -- the reasons for not being recovered may be
25 just complete reduction to ash or something

1 unrecognizable by fire --

2 A Correct.

3 Q -- or missing for some other reason?

4 A Correct.

5 Q Um, and if, um -- if the stated height on the --
6 on the missing poster is about right, of 5'6, we
7 also know that if bone -- if human bones were
8 found east and west, and if you'll take my word
9 that there was testimony about a bone found --
10 being found eight feet south, a bone fragment
11 being found eight feet south, and then some in
12 the middle of the burn pit, we also know that the
13 human skeleton of someone 5'6 would not have
14 spread to that area as it lay in place?

15 A You're saying, for example, from head to toe?

16 Q Head to toe, you know, fingertip to fingertip?

17 A That's correct. I also understand there were some,
18 um, weather-related changes happening to the scene
19 out of everybody's control --

20 Q Sure.

21 A -- so it's possible that the heavy rains that were
22 reported could have transported some fragments from
23 their original location.

24 Q We -- we don't know the -- the cause, but we do
25 know that at -- at least, if the information

1 reported to you is accurate, we do know that
2 we're finding human bone fragments transported
3 away from where they would have been in terms of
4 skeletal, uh, position or human anatomy?

5 A In other words, the distribution of fragments is
6 larger than what you would expect if, um, a body was
7 placed in one location.

8 Q Well said. Exactly. And that's what I mean and
9 that's what you mean?

10 A Yes.

11 Q Okay. All right. So how, or what, or why, we
12 don't know. But fragments have been -- have
13 moved? Have been moved? Or had moved, true?

14 A Uh, I'm relying on what you're telling me.

15 Q Okay. Um, you -- you talked a little bit about
16 animals a while back, and I want to just tie that
17 up quickly. Um, you saw no evidence of the site
18 or any of the bone fragments here being disturbed
19 by a dog, did you?

20 A I did not.

21 ATTORNEY FALLON: Objection. That's two
22 questions in one. There's the bone, themselves,
23 and the site. That's two different --

24 ATTORNEY STRANG: Fair enough. Fair
25 enough.

1 Q (By Attorney Strang) Um, let's just talk about
2 the bone fragments, okay?

3 A Yes.

4 Q You didn't see any evidence, um, that any of the
5 bone fragments, the human bone fragments, that --
6 that you identified had been disturbed in any way
7 by a dog?

8 A I did not.

9 Q Now, up until now we've really been talking about
10 one general area, um, the area behind Steven
11 Avery's garage. Fair enough?

12 A Yes.

13 Q And then -- but we've broken that down by some
14 tag numbers to the burn pit. Specifically, in
15 the east and west. North, we found -- you found
16 noth -- no bone?

17 A Correct.

18 Q No human bone anyway? Uh, but that -- that site,
19 taken as a whole, okay, um, that site was not the
20 only place from which you identified human bone
21 fragments here?

22 A That is correct.

23 Q Another place in which -- or from which you were
24 able to identify human bone fragments, uh, was
25 something called the Janda Burn Barrel No. 2?

1 A That is correct.

2 Q Can you see me and still be heard?

3 A Yes.

4 Q All right. Um, you talked about Trooper Austin
5 before, and then what I'm showing you here is
6 Exhibit 113 which, uh, has been received, and,
7 uh, we all also know to be Trooper Austin's work.
8 Did you come to learn, in the course of your
9 work, the location or approximate location of the
10 Janda Burn Barrel No. 2?

11 A Um, once I received, um -- It was sometime in
12 December of -- of -- it was December 1, two thousand
13 and -- '06 when I met with Trooper Austin, um, that I
14 learned where these barrels were located.

15 Q Why don't -- why don't you point out the, uh,
16 location of the barrels with your laser pointer,
17 if you would. You see four of them represented
18 there in this -- this diagram?

19 A Yes.

20 Q All right. Doesn't -- One of them was No. 2?

21 A That is correct.

22 Q All right. And then if we zoom back out, can you
23 point out the, uh, area you've been describing as
24 behind Steven Avery's garage?

25 A Not in -- in this view, I don't believe I can.

1 Q Okay. Do you know which is Steven Avery's
2 garage, or no?

3 A Um --

4 Q If you don't, that's -- that's fine.

5 A I can't tell from -- from this perspective.

6 Q Fair enough. Okay. Um, in any event, you
7 understood that Burn Barrel No. 2 was a barrel
8 associated with the Janda residence, not the
9 Avery residence?

10 A That's correct.

11 Q Specifically, uh, the items that came to you from
12 the, uh, Janda Burn Barrel No. 2 were tagged No.
13 7964?

14 A Um, may I confirm that?

15 Q Of course. 7964.

16 A That's correct.

17 Q That's the property or the evidence tag number
18 for the Janda Burn --

19 A Yes.

20 Q -- Barrel No. 2? Now, from that Burn Barrel No.
21 2, you were able to identify human bone?

22 A That's correct.

23 Q You made a conclusion to a reasonable degree of
24 scientific certainty that these were human bone
25 and not from some other animal?

1 A There was human bone as well as nonhuman bone in that
2 barrel.

3 Q Fair enough. And I -- I want to be clear, but
4 the things that you identified as human, you did
5 so to a reasonable degree of scientific certainty
6 in your field?

7 A Yes, sir.

8 Q All right. I show you Exhibit 401, which I think
9 is an exhibit from the report that you and
10 Trooper Austin did together, am I right?

11 A That is correct.

12 Q Do you recognize that as a diagram depicting
13 where and -- and what types of bones you found or
14 identified as human in the Janda Burn Barrel No.
15 2?

16 A Yes, sir.

17 Q Let me see if I can make this work. Maybe I
18 shouldn't. Leave it to Mr. Buting. Do we now
19 have Exhibit 401 up in color on the --

20 A Yes. Yes, you do.

21 Q Okay. Um, you identified part of a human
22 scapula --

23 A Yes, sir.

24 Q -- in that burn barrel? Or the shoulder blade,
25 as you said?

1 A A portion of the shoulder blade.

2 Q Okay. You identified one or more portions of,
3 uh, the spinal column or the vertebrae?

4 A Fragments from the spinal column, yes.

5 Q More than one?

6 A I believe there were.

7 Q Okay. Uh, identified one or more bones from the
8 hand? Metacarpals?

9 A At -- at least one.

10 Q And more than one fragment of long bones?

11 A Yes, sir.

12 Q Now, these fragments of long bones were small
13 enough that you weren't able to decide which of
14 the long bones in the human body they came from?

15 A That's correct.

16 Q Or even whether they all came from the same long
17 bone in the human body?

18 A That's correct.

19 Q What you can say, though, is that the human bone
20 fragments that you found in Janda Burn Barrel No.
21 2 are -- were -- were not bones that -- or, you
22 know, pieces of bones that are connected to one
23 another, so to speak? This feels clumsy. Do you
24 know what I'm trying to say?

25 A Are you asking whether any of the fragments of human

1 bone that I found in the burn barrel re-fit with one
2 another?

3 Q Let's start there. I wasn't, but let's start
4 with that.

5 A I was not able to make any re-fits or
6 re-approximations from the few bone fragments that
7 came from the barrel.

8 Q Okay. You tried, but were not able to?

9 A That's correct.

10 Q All right. And then I -- I was at at least
11 one -- one greater area of generality. And,
12 again, I -- I'm sorry, what I -- fumbling around,
13 but the -- the -- the vertebrae that you find --
14 that you found are not, necessarily, in the same
15 part of the body, so to speak, as a scapula?

16 A I didn't find any whole vertebrae, um, but portions,
17 I believe, of facets that allow one spinal element to
18 stack on top of each other. So, um, what we -- what
19 we think of as spine, most of it is that honeycomb
20 bone that --

21 Q Right.

22 A -- doesn't survive well in heat, fire, so, um, there
23 were isolated fragments that could be identifiable as
24 to location, but I could not tell you where along the
25 spine they came from.

1 Q Okay. If -- Let -- Let's go at it this way.
2 Sort of graphic way, and I apologize. But if --
3 if one were going to cut up or dismember a body,
4 you would not expect any one limb or piece to
5 account for all of the differing locations of
6 bone fragment that you found in the Janda's burn
7 barrel?

8 A I am not sure I understand your question.

9 Q If -- If my arm had been removed, okay?

10 A Yes.

11 Q Uh, and then burned in a burn barrel, and in --
12 and no -- no one -- no -- no more disturbing of
13 that burn barrel scene had happened, you might
14 find pieces that you could associate with my arm?

15 A That's correct.

16 Q Maybe pieces of fingers or bones in my hand?
17 Maybe the ulna? I guess, that's the -- the
18 radius on this side and the ulna down here? Uh,
19 and then maybe the long bone up here?

20 A Yes.

21 Q You might find a socket or something, uh,
22 conceivably?

23 A I might find a piece of the shoulder joint. That's
24 correct.

25 Q Okay. But things you might be able to then

1 identify as coming from a distinct limb or
2 portion of my body?

3 A I would certainly try and do that.

4 Q Um, here, the distribution of the fragments you
5 found did not suggest, you know, that they came
6 from one piece of a body that might be easily
7 removed before burning?

8 A That's correct.

9 Q Sort of had a scattering, if you will, of
10 fragments in that Janda burn barrel?

11 A Scattering from throughout the body.

12 Q Yes.

13 A Yes.

14 Q Okay. Now, there was, uh -- You noticed that
15 the, um, human bone fragments in the Janda burn
16 barrel were charred in much the same way as the
17 human bone fragments you found under the other
18 evidence tags?

19 A That's correct, sir.

20 Q Some were calcined?

21 A Uh, I don't recall that. I'm sorry.

22 Q But the general -- the general, physical
23 appearance of the bones in the Janda burn barrel
24 was much like the general, physical appearance of
25 the bones in the Steven Avery burn area or behind

1 the garage?

2 A That's correct.

3 Q Okay. There was a third site, um, that, uh,
4 resulted in, uh, evidence under another tag
5 number being brought to you, was there not?

6 A Yes.

7 Q And this would be Evidence Tag No. 8675. Did you
8 find, uh -- Did you find Evidence Tag No. 8675 in
9 your report?

10 A I -- You hadn't asked me --

11 Q Oh.

12 A -- a question or asked me to do anything --

13 Q I'm sorry.

14 A -- so I -- I didn't look.

15 Q Okay. It -- it may be helpful to go to your
16 discussion of Tag No. 8675?

17 A Yes, sir.

18 Q All right. Now, do you -- do you have the Austin
19 report with you as well?

20 A I do not.

21 Q You do not? Okay.

22 ATTORNEY STRANG: I'll show this to
23 Mr. Fallon. We'll mark this.

24 (Exhibit No. 402 marked for identification.)

25 Q (By Attorney Strang) Exhibit 402. Do you

1 recognize that?

2 A Yes, I do, sir.

3 Q What is it?

4 A It looks like, uh, what I would call a -- a plan view
5 or a birdseye view of a portion, um, of the -- what's
6 indicated here as the Avery Salvage Yard, uh, that
7 depicts, uh, the Steven -- the approximate location
8 of the Steven Avery res -- residence with respect to
9 the entire salvage yard, and then somewhere southwest
10 of there, uh, a point location, uh, from which, uh,
11 Tag No. 8675 was identified.

12 Q Terrific. Let's put up Exhibit 402 on the ELMO.
13 Okay. Um, this is, obviously, just a diagram,
14 but we've got Avery Road coming down from the
15 north, and then a box around the -- what we've
16 heard is about a 40-acre parcel for the Avery
17 Salvage Yard?

18 A Yes, sir.

19 Q You see that? And then a smaller box in there.
20 Again, that's the approximate location of Steven
21 Avery's trailer and his garage?

22 A Yes.

23 Q And then the flag you're talking about is the
24 site from which the materials that you were given
25 under Exhibit -- or under Tag No. 8675 came?

1 A That's correct.

2 Q All right. It appears to be well southwest of
3 the Avery property?

4 A Yes, sir.

5 THE COURT: Mr. Strang, can you, uh, let
6 me know about how long this line of questioning
7 will go?

8 ATTORNEY STRANG: Yes, I was -- I,
9 actually, was going to do that. Um, I could -- I
10 could break here comfortably, or I could do five
11 more minutes and I would still have 30 minutes
12 left, so...

13 THE COURT: All right. Then I think, uh,
14 we'll break for today, uh, and resume tomorrow
15 morning.

16 Uh, members of the jury, I'll remind
17 you, uh, before we leave today, do not discuss
18 the case, uh, with each other. Make sure you
19 don't listen to any news accounts, or read
20 anything, or watch anything on TV about the case.
21 Uh, with that, I will excuse you for today and
22 we'll see you tomorrow morning.

23 (Jurors out at 4:32 p.m.)

24 THE COURT: You may be seated. Uh,
25 counsel, if you could, after you clean up, I'd like

I, Jennifer K. Hau, Official Court Reporter for Circuit Court Branch 3 and the State of Wisconsin, do hereby certify that I reported the foregoing matter and that the foregoing transcript has been carefully prepared by me with my computerized stenographic notes as taken by me in machine shorthand, and by computer-assisted transcription thereafter transcribed, and that it is a true and correct transcript of the proceedings had in said matter to the best of my knowledge and ability.

Dated this ____ day of _____, 2007.

Jennifer K. Hau, RPR
Official Court Reporter

1 STATE OF WISCONSIN : CIRCUIT COURT : MANITOWOC COUNTY
2 BRANCH 1

3 STATE OF WISCONSIN,

4 PLAINTIFF,

JURY TRIAL

TRIAL - DAY 14

5 vs.

Case No. 05 CF 381

6 STEVEN A. AVERY,

7 DEFENDANT.

8 **DATE:** MARCH 1, 2007

9 **BEFORE:** Hon. Patrick L. Willis
10 Circuit Court Judge

11 **APPEARANCES:** KENNETH R. KRATZ
Special Prosecutor
12 On behalf of the State of Wisconsin.

13 THOMAS J. FALLON
Special Prosecutor
14 On behalf of the State of Wisconsin.

15 NORMAN A. GAHN
Special Prosecutor
16 On behalf of the State of Wisconsin.

17 DEAN A. STRANG
Attorney at Law
18 On behalf of the Defendant.

19 JEROME F. BUTING
Attorney at Law
20 On behalf of the Defendant.

21 STEVEN A. AVERY
Defendant
22 Appeared in person.

1 THE COURT: At this time the Court, again,
2 calls State of Wisconsin vs. Steven Avery, Case No.
3 05 CF 381. We're here for a continuation of the
4 trial in this matter this morning. Will the parties
5 state their appearances for the record, please.

6 ATTORNEY KRATZ: Good morning, Judge, the
7 State of Wisconsin appears by Calumet County
8 District Attorney Ken Kratz, Assistant Attorney
9 General Tom Fallon, Assistant District Attorney Norm
10 Gahn, all appearing as special prosecutors.

11 ATTORNEY STRANG: Good morning. Steven
12 Avery is here in person. Jerome Buting represents
13 him, Dean Strang appears on his behalf as well.

14 THE COURT: Is there anything this morning
15 before we resume the defense cross-examination of Ms
16 Eisenberg?

17 ATTORNEY FALLON: I just wanted to alert
18 the Court that Mr. Strang and I are working out the
19 final language of a stipulation that we would like
20 to put on the record after Dr. Eisenberg completes
21 her testimony. We're waiting for the completion of
22 her testimony to finalize the language regarding a
23 stipulation to save us a witness.

24 THE COURT: Very well. The coordinator may
25 bring the witness in and we'll bring the jury in.

(Jury present.)

THE COURT: You may be seated. Good morning, members of the jury. When we left off yesterday afternoon the defense was conducting its cross-examination of Dr. Eisenberg. We'll resume this morning. Mr. Strang, you may continue.

THE CLERK: You want the witness to be sworn?

THE COURT: I think we will, we've been doing that. We'll have the clerk re-swear the witness.

DR. LESLIE EISENBERG, called as a witness herein, having been first duly sworn, was examined and testified as follows:

THE CLERK: Please be seated.

CROSS-EXAMINATION

BY ATTORNEY STRANG:

Q. Welcome back. Good morning.

A. Good morning to you.

Q. Yesterday when we were broke off -- when we broke off, we were talking about a site somewhat southwest of, you know, what we have all here been calling the Avery Salvage Yard property. I want to just go back, though, a little bit to get us up there again. And, now, when I say go back

1 a little bit, I'm going to go back to the Janda
2 burn barrel, number two, just for a little bit.

3 Okay.

4 A. Yes, sir.

5 Q. Which was your tag -- not your tag, but tag
6 number 7964?

7 A. That's correct.

8 Q. Okay. Now, again, nowhere did you find evidence
9 that you were looking at bone fragments from more
10 than one body?

11 A. That is correct.

12 Q. The bone fragments you saw under tag number 7964
13 from the burn barrel were burned, charred, some
14 of them calcined, as they had been in the burn
15 area?

16 A. The human bone.

17 Q. Yes, the human bone, because you did find some
18 nonhuman bone?

19 A. In the location --

20 Q. In the burn area and in the burn barrel?

21 A. That's correct.

22 Q. Some of them were what you called avian bone?

23 A. Avian simply is a Latin term for -- means bird
24 bone.

25 Q. A bird, right. So whether it's a chicken, or a

1 turkey, or a pheasant, some sort of something
2 with wings?

3 A. Yes.

4 Q. All right. So you correct me if I forget to add
5 the human, because it's ordinarily human bone I
6 mean to be talking with you about.

7 A. Understood.

8 Q. Okay. Now, one of the things we didn't cover and
9 I want to cover with respect to the burn barrel,
10 is when you are looking at these human bone
11 fragments you are using not just your eyes, of
12 course, but you are also using your sense of
13 smell; is that fair?

14 A. That's fair.

15 Q. Smelling, do I smell the odor of let's say fuel,
16 some accelerant or something, correct?

17 A. Yes.

18 Q. The only human bone fragments on which you
19 detected an odor of some sort of accelerant or
20 flammable fluid were the bone fragments that came
21 out of the Janda burn barrel; is that accurate?

22 A. No, I would qualify that by saying that the
23 container in which those human -- those fragments
24 from 7964 associated with burn barrel number two
25 behind the Janda residence, upon opening the

1 container, there wasn't an odor of fuel. Whether
2 or not they were specifically human bone, I could
3 not say.

4 Q. Very good. Thank you. Because I was not clear
5 on your report, but that -- that makes sense. So
6 you opened this Tupperware type container, or was
7 this a plastic bag, some container?

8 A. A sealed lidded container.

9 Q. Plastic lidded container.

10 A. Yes.

11 Q. And it's there that you get the waft of some kind
12 of flammable liquid or fluid?

13 A. Yes.

14 Q. But, of course, there is no way to tell which --
15 which of the bone fragments or non-bone material
16 that may be coming from?

17 A. Right, there was no way to tell from the contents
18 of that container where that odor was coming
19 from.

20 Q. All right. Very well. Now, you did not detect
21 the distinctive smell of burnt rubber from any of
22 the containers you examined here that contained
23 human bone fragments?

24 A. I did not.

25 Q. And by that, I mean any of the containers, all of

1 the tag numbers from whatever source?

2 A. I did not.

3 Q. Neither did you -- did you note any residue from,
4 let's say burnt rubber, that was visible to you,
5 in any of the containers you examined?

6 A. No burned rubber, that's correct.

7 Q. Now, if we're warmed up, I think let's go, now,
8 back to tag number 8675 where we left off
9 yesterday afternoon. And this is the -- get
10 ourselves oriented again.

11 ATTORNEY STRANG: I want to go to the ELMO.

12 ATTORNEY BUTING: It may not be turned on.

13 Q. (By Attorney Strang)~ Okay. This is just 402
14 again, which we saw yesterday, tag 8675, are the
15 items that came to you, reportedly, from the GPS
16 coordinates of that red flag.

17 A. That's correct.

18 Q. Somewhere southwest of the Avery property?

19 A. Yes.

20 Q. Have you ever seen a photograph of the Avery
21 property, from the air?

22 A. I believe I have seen one.

23 Q. All right. You may or may not be able to work
24 with Exhibit 91, but I will show it to you. Can
25 you orient yourself from that photograph? This

1 is an exhibit that's been admitted, I'm sorry, I
2 should have shown it to you; it's Exhibit 91?

3 A. Yes, I can.

4 Q. Okay. You can see where the Avery salvage
5 property is?

6 A. Yes, I can.

7 Q. All right. Does it look to you like we're
8 looking east from an airplane?

9 A. It does, because the Avery and Janda properties
10 appear at the lower left hand corner of the
11 salvage yard.

12 Q. Terrific. Thank you. Let me pop this up on the
13 ELMO. Okay. So, obviously, someone taking this
14 photograph is up in an airplane? And what we're
15 doing is we're flying probably about close to due
16 east here.

17 A. I'm sorry, close to?

18 Q. To due east.

19 A. Due east, yes.

20 Q. Toward the lake. And the road coming through at
21 an angle in the upper left corner of the picture
22 is Highway 147.

23 A. I believe it is.

24 Q. And we can see Avery Road coming down to the
25 northeast corner of the salvage yard.

1 A. That's correct.

2 Q. Okay. And what -- We can't place the location
3 from which the material under tag number 8675
4 came, but we can see here that there's
5 essentially quarry area and some wooded areas to
6 the south of the Avery property?

7 A. Yes, that's correct.

8 Q. So I'm going to refer to tag 8675 as the quarry
9 pile; does that work?

10 A. It does, understood.

11 Q. All right. Now, you found, in the material from
12 the quarry pile, two fragments that appeared to
13 you, in your experience, to be pelvic bone; is
14 that right?

15 A. That's correct.

16 Q. There were some cuts, appeared to be some cuts on
17 those pelvic bone fragments?

18 A. Yes.

19 Q. But you weren't able to conclude, 100 percent
20 certain, that these were human pelvic bone
21 fragments; do I understand that correctly?

22 A. That's correct.

23 Q. Okay. Now, you suspected them of being human
24 pelvic bone; am I understanding you correctly?

25 A. Yes.

1 Q. You still suspect them of being human pelvic
2 bone?

3 A. Suspected possible human.

4 Q. Right. And part of the problem you had in
5 identifying those as certainly human is that they
6 were so small.

7 A. It was less their size than what the contours of
8 the bone looked like after they were cut. But it
9 was clearly a joint articulation at the right
10 side of the pelvis where the pelvis meets the
11 lower part of the spine.

12 Q. You say the right side, you actually were able to
13 say which side of the pelvis?

14 A. Yes.

15 Q. Okay. And the overall thickness of those
16 fragments was consistent with a human being?

17 ATTORNEY FALLON: Objection, she indicated
18 suspected and possible and that's as far as she can
19 go. I don't believe there's any testimony regarding
20 consistent or non-consistent. She couldn't
21 identify --

22 THE COURT: I think his question is just
23 asking about one element of the bones, not
24 concluding that it was a human bone. So as I
25 understand the question, I'm going allow it.

1 ATTORNEY STRANG: The thickness. And
2 actually, you know, it's a fair point.

3 Q. (By Attorney Strang)~ Let me just drop back and
4 ask you a foundational question or two before I
5 get to that. One of the things that
6 distinguishes human bones from even larger
7 animal -- large animal bones, is the wall
8 thickness of the bone, is that -- am I correct in
9 that?

10 A. You are partially correct. It's the relationship
11 or the ratio of the thickness of the outside of
12 the bone to the size of what we would call the
13 marrow cavity, the inside of the bone.

14 Q. Okay. So if we have a round bone, there's a wall
15 thickness, so to speak, and then a marrow cavity,
16 you are describing that as, inside?

17 A. A space, like a cylinder.

18 Q. Right. And then the other wall?

19 A. Correct.

20 Q. And if we were looking at something like a deer,
21 a relatively large animal, would we find, in a
22 long bone of a deer, that the wall thickness of
23 the bone was less than the wall thickness of a
24 similarly length -- similarly long human bone?

25 A. No, the thickness -- the diameter, the

1 measurement of the outside of the bone in humans
2 would be less than that in a deer bone, for
3 example.

4 Q. Now, I think I lost you -- I mean -- You are
5 talking about the ratio of the wall thickness to
6 the thickness of the marrow cavity?

7 A. That's correct.

8 Q. And that's -- It's a thicker wall relative to the
9 marrow cavity in the human bone.

10 A. No, it's a thinner wall.

11 Q. I have it the other way around?

12 A. Yes.

13 Q. Okay. All right. So the question, then, is the
14 thickness of the bone wall here that you observed
15 on these two pelvic bone fragments, was that
16 thickness at least consistent with human pelvic
17 bone?

18 A. Let me answer your question in two parts. The
19 first part is that the architecture or the make
20 up of these pelvic bone cut fragments is
21 different in character and shape than the long
22 bones you have been talking about. The internal
23 structure of these bones is made up almost
24 entirely of honeycomb looking bone.

25 Q. All right.

1 A. And so using the long bone as an example may not
2 be an accurate comparison. Secondly, the
3 thinness of the outside bone of these pelvic cut
4 fragments is not inconsistent with the thickness
5 I would expect to see relative to the honeycomb
6 bone in humans.

7 Q. Okay. It is not inconsistent with the human --

8 A. Correct.

9 Q. -- bone. And let me ask you just maybe the
10 simplest, most straight forward question here, is
11 what made you suspect that these pieces of pelvic
12 bone could be human?

13 A. The contours of the bone, and more particularly,
14 the shape of what we call the articular surfaces,
15 where one bone fits with another bone at the hip
16 joint.

17 Q. Those appeared consistent with a human being?

18 A. With the shape and the contours of what would be
19 expected in a human bone.

20 Q. All right.

21 A. Yeah.

22 Q. Now, I would like to show you something that's
23 not been marked as an exhibit. And I don't have
24 a small copy of it, so I'm going to pause and
25 tell Mr. Fallon what it is that I want to put up

1 on the screen, if you would bear with me. I will
2 let you in on the secret now. I'm going to show
3 you what's marked on the CD Rom that I got from
4 the report that you and Trooper Austin did.

5 A. Yes.

6 Q. What's marked as skeleton 1, it's a JPEG file,
7 skeleton one, okay?

8 A. Yes.

9 Q. And I don't -- That's what you are about to see.
10 Now you know. This is, again, one of these
11 computer generated models that Trooper Austin did
12 under your supervision?

13 A. He was not working under my supervision, but we
14 worked cooperatively to depict my findings.

15 Q. He was good with the computers, you were good
16 with human skeletons?

17 A. Hopefully, yes.

18 Q. Yes. And, again, this isn't a photograph, but
19 what you know in looking at this model is that
20 the features you see are consistent with an adult
21 female human skeleton?

22 A. Without seeing this side by side with what might
23 be a male skeleton, I will agree to that
24 characterization.

25 Q. Okay. And, look, I'm not trying to push you

1 somewhere you don't want to go on this; this is
2 from your report?

3 A. Yes.

4 Q. Do you need to look at your report or reorient
5 yourself to what skeleton figure 1 was?

6 A. This is from Trooper Austin's report?

7 Q. Yeah, I mean, the report the two of you put
8 together.

9 A. That's fine, I don't believe that's necessary.

10 Q. Okay. So you are comfortable and I don't know,
11 frankly, that female versus male makes a big
12 difference on this point, but show us the pelvis.

13 A. May I approach.

14 Q. We'll give you a laser point, or you can approach
15 if you like. But ...

16 A. Thank you.

17 Q. Sure.

18 A. As I mentioned yesterday, the pelvic girdle or
19 the pelvis, that we all probably think about as
20 one bone, is actually three different bones.

21 Q. All right. You talked about the fragments you
22 saw under tag 8675 being right pelvic bone, so
23 let's identify that.

24 A. Okay. I should clarify, one of those -- for one
25 of those fragments, it's impossible to side, the

1 iliac crest that we talked about yesterday. But
2 the other two fragments that are still
3 articulated at a joint surface are from the right
4 side.

5 Q. So show me the right pelvic bone here, if you
6 would. And this is obvious it's left as we're
7 all looking to it, but when you say right or left
8 on the human body, you are talking about as if
9 you were in the person's skin?

10 A. When you -- and I'm sorry, I should have
11 clarified that -- when we look at a graphic or
12 photograph like this, computer generated image,
13 we, in the same way we were looking at the face
14 yesterday, we are then looking at someone who
15 would be facing us. So the right hand side would
16 be the person's right hand side.

17 Q. Correct. Yes.

18 A. As we're facing, correct.

19 Q. My right pelvic bone?

20 A. Correct.

21 Q. So right pelvic bone is one of the bones, left
22 pelvic bone is the second of the bones that make
23 up the pelvis?

24 A. Well, they actually have fancy names, but there
25 are a left side called the innominate, a right

1 side called the innominate, and they both are
2 joined, left and right, at the sacrum, which is
3 at the base of the spine.

4 Q. That's the tailbone that hurts when you slip and
5 fall on the ice?

6 A. It's the very bottom of that bone, yes.

7 Q. Okay. All right. Innominate is
8 i-n-n-o-m-i-n-a-t-e?

9 A. That's correct.

10 Q. Okay. Now -- So you actually had three bones
11 that you thought associated with the pelvis under
12 tag 8675 from the quarry file?

13 A. That's correct.

14 Q. Two that look from the right pelvis, one from the
15 sacroiliac -- sacroiliac?

16 A. The iliac crest, so it would be either this
17 topmost area, what you can feel when you palpate
18 or touch your hip, or from the right side, that's
19 correct.

20 Q. Were these fragments too small to suggest to you
21 whether they might be male or female?

22 A. It was not a matter of sides but simply what
23 parts of the bone we had that would not allow
24 that determination.

25 Q. When you say cuts, you saw cuts on these, are you

1 able to be any more specific about the type of
2 cut that you saw?

3 A. It was a long, linear cut, on either side of
4 those two bones that were still in proximity.
5 They were essentially a slicing cut on one side
6 and a sharp slicing cut on the other side.

7 Q. Any way to tell what instrument may have made
8 that cut?

9 A. We --

10 ATTORNEY FALLON: Objection, lack of
11 foundation.

12 ATTORNEY STRANG: I can ask some
13 foundational questions --

14 THE COURT: Go ahead.

15 ATTORNEY STRANG: -- if that would help.

16 Q. (By Attorney Strang)~ One of the things you do in
17 your work is look for human damage to bones or
18 damage caused by human agency, if you will?

19 A. If present, yes.

20 Q. If present. I mean, you look for it, sometimes
21 it's present, sometimes it's not, but you are
22 always looking for it.

23 A. Correct.

24 Q. You looked for that here?

25 A. Yes.

1 Q. Damage to the bones by human agency, correct?

2 A. That's correct.

3 Q. The unnatural defect that you were describing in
4 the parietal and occipital bones yesterday was an
5 example?

6 A. That's correct.

7 Q. Another common example would be to look for
8 evidence of cutting that you might see in bone?

9 A. That's correct.

10 Q. Now, that -- that actually may give you some help
11 on occasion in deciding whether you are looking
12 at a human bone or an animal bone, if the piece
13 is so small that you can't tell the difference,
14 in the sense that animals might often be
15 butchered and you would see signs of cutting near
16 the ends or joints of bones?

17 A. That's correct.

18 Q. Are you able to, not every time now, but on
19 occasion are you able to draw any professional
20 conclusions about what type of instrument may
21 have used to cut, or is that beyond what you can
22 do?

23 A. That is beyond my expertise and certainly would
24 refer that kind of work out to someone who
25 specializes in that kind of analysis.

1 Q. Okay. You may have some suspicions, but wouldn't
2 make -- wouldn't feel competent to make a final
3 conclusion?

4 A. As to what instrument --

5 Q. Right.

6 A. -- may have caused the cut? That's correct.

7 Q. Are you capable of discerning the characteristic
8 differences between a cut made by something
9 that's sawtooth and a cut made by a smooth edge?

10 A. Visually, that is often possible to do.

11 Q. But, again, a final conclusion you would refer
12 out?

13 A. Yes, I would.

14 Q. All right. Did it appear to your eyes that these
15 cuts were -- if you could draw any conclusion at
16 all -- that the cuts on these pelvis bones were
17 from a smooth edged instrument or a toothed
18 instrument?

19 A. I cannot answer your question.

20 Q. Very well. But the cuts were fairly long and
21 straight cuts?

22 ATTORNEY FALLON: Objection, she's
23 indicated this is beyond her ability to answer these
24 types of questions.

25 ATTORNEY STRANG: No, no. I think -- I

1 think that you did testify to, if I heard you just a
2 minute or so ago describing the cut more
3 specifically -- you said -- or maybe I misheard you,
4 they were fairly long cuts?

5 THE COURT: I will overrule the objection
6 because I think the question goes to not what type
7 of instrument it came from, but rather the
8 appearance of what she saw in the bone.

9 ATTORNEY STRANG: And the Court is right.

10 Q. (By Attorney Strang)~ Not interested in the
11 instrument, just what did you see about the cut,
12 again?

13 A. That they were straight and linear. But because
14 of the burning and charring of the bone itself,
15 it was difficult to make any additional
16 observations beyond that.

17 Q. All right. Could you tell, for example, whether
18 the cut went horizontal to the ground or
19 vertical?

20 A. If I could place those two adjoining fragments in
21 anatomical position, which I was able to do, as
22 part of the right pelvic structure, those cuts
23 were made on either side, in what I would call a
24 north/south direction, an up and down direction.

25 Q. Up and down if the skeleton or person was

1 oriented as I am now, standing up?

2 A. Correct.

3 Q. Okay. These -- These three small fragments you

4 described were not the only bone fragments that

5 you found under tag 8675?

6 A. That's correct.

7 Q. There were 10 bone fragments in total, or in

8 addition to the pelvic bone fragments?

9 A. In addition.

10 Q. Okay. So we're talking about a total of 13 bone

11 fragments?

12 A. There were also nonhuman unboned burns --

13 burned --

14 Q. Unburned bones?

15 A. Unburned bones. Thank you.

16 Q. Okay.

17 A. Under that same tag number.

18 Q. Okay. But 13 bone fragments that were burned?

19 A. Correct.

20 Q. The charring and partial calcine -- calcined

21 condition that you saw was essentially consistent

22 with the charring and the calcined condition that

23 you saw in human bone fragments from the Janda

24 burn barrel and behind Steven Avery's garage?

25 A. That is correct, sir.

1 Q. Of the 13 charred bone fragments under tag 8675,
2 only one of those was -- was clearly nonhuman?

3 A. No, certainly more than one was nonhuman.

4 Q. Of the 13?

5 A. Yes.

6 Q. Okay. Let's go to your report. I'm interested
7 here, I think, in the first report at page nine?

8 A. Yes, sir, I am there.

9 Q. I was looking at the second full paragraph down
10 on page nine of your first report.

11 A. Yes, sir.

12 Q. So what you saw is a tag 8675 contained many
13 elements of unburned nonhuman bone, which you
14 just told us, right?

15 A. Yes.

16 Q. And other items, as well as 10 fragments of bone
17 with suspected cut marks?

18 A. Yes, that's what I have written.

19 Q. Okay. Eight of the ten fragments, one definite
20 nonhuman, were burned/calced?

21 A. That's correct.

22 Q. So of the -- of the eight burned bone fragments
23 that showed suspected cut marks, of those eight,
24 one was definitely nonhuman?

25 A. At -- At that point in my analysis, that's as

1 much as I knew.

2 Q. Okay. Were you later able to establish more in
3 terms of separating nonhuman from human among the
4 10 bone fragments we're discussing now?

5 A. I was.

6 Q. And what did you -- what was the separation you
7 eventually made?

8 A. I do not have my working notes here with me in
9 court today and I am, unfortunately, not able to
10 answer that question with any certainty.

11 Q. Just don't remember now?

12 A. I do not.

13 Q. Do you remember the bottom line being that the
14 three pelvic area bones that you have described,
15 you continue to suspect may be human, but can't
16 be certain?

17 A. That is correct.

18 Q. And as to the other 10 charred bones, are there
19 some that you continue to suspect may be human,
20 but can't be certain?

21 A. There is that possibility. I should say that
22 none of those fragments are diagnostic; in other
23 words, I cannot associate them with one
24 particular bone or another.

25 Q. Right. And I know you can't give us a number any

1 more among the 10 charred bone fragments that
2 weren't pelvic, but the bottom line is that you
3 still suspect that some of them may be human, you
4 are not certain of that?

5 A. The three larger fragments that show burn
6 patterns consistent with burn patterns found on
7 human bone elsewhere on the property, yes.

8 Q. Okay. Very well. Of the bone fragments under
9 tag 8675, from the quarry pile, that you suspect
10 may be human, were the two from the right pelvic
11 bone, or the right innominate bone, the only --
12 the only two that you were able to associate with
13 each other?

14 A. Actually, they came to me still articulated.

15 Q. Oh, okay.

16 A. The bones were in anatomical position, when I
17 received them.

18 Q. As they arrived?

19 A. Correct.

20 Q. Others, because they were non-diagnostic, you
21 couldn't associate one with the other?

22 A. That's correct, non-diagnostic and much, much
23 smaller.

24 Q. So, in the same way, then, if we go back to the
25 child's nursery rhythm, you know, the leg bone is

1 connected to the knee bone and the knee bone is
2 connected to the shin bone and the shinbone to
3 the ankle bone, that kind of thing; you can't --
4 you are obviously unable to tell us whether these
5 fragments were from contiguous or, you know,
6 associated bones?

7 A. The non-bone pelvic fragments, I cannot.

8 Q. What we have, then, I guess in the end, first,
9 your conclusion was that the vast majority of
10 human bone fragments, presented to you under all
11 tag numbers, quarry pile, Janda burn barrel,
12 Steven Avery's garage area, or behind Steven
13 Avery's garage, the vast majority of the human
14 bone fragments, from all those sites,
15 collectively, the vast majority was found behind
16 Steven Avery's garage?

17 A. That's correct.

18 Q. All of these exhibited similar charring and
19 calcined appearance?

20 A. That is correct.

21 Q. From all three sites?

22 A. The human bone, yes.

23 Q. All of them were fragmented, similarly, from the
24 three sites, again, human bone?

25 A. That's correct.

1 Q. And while you made mention yesterday, briefly, to
2 not knowing what the weather was, you know, and
3 whether -- whether some weather condition might
4 have caused bone fragments to be found east or
5 west or south of the burn pit at Steven Avery's
6 garage; do you remember that --

7 A. Yes, I do.

8 Q. -- testimony? You certainly would agree that it
9 would be very strange weather conditions, indeed,
10 that would transport human bone fragments from
11 the Avery garage area into burn barrel number two
12 on the Janda property?

13 A. In fact, I would submit there would be no weather
14 conditions that could make that happen.

15 Q. You would rule that out?

16 A. I would.

17 Q. Likewise, the quarry pile?

18 A. Yes, sir.

19 Q. All right. So what -- what you conclude is that
20 by human agency the bone fragments here were
21 moved or located where they were found?

22 A. Some bone fragments identified as human had been
23 moved, that's correct.

24 Q. Including, I think we agreed yesterday, possibly
25 human bone fragments found in the general area

1 behind Steven Avery's garage?

2 A. Based on some of the information you provided me
3 with yesterday, there is some evidence for
4 disbursal --

5 Q. All right.

6 A. -- that's correct.

7 Q. Now, you have no evidence that human bone
8 fragments actually were burned at more than one
9 site, do you?

10 A. I do not know that.

11 Q. You just don't have any evidence that there were
12 multiple burn sites, correct?

13 A. Not based on the material I was given to examine.

14 Q. Right. And in any event, the burning, charring,
15 calcining, all was roughly consistent as between
16 the three sites: Quarry, Janda burn barrel and
17 behind Avery's garage?

18 ATTORNEY FALLON: I'm going to object to
19 that question. This is the third time that question
20 has been asked in this context. The witness
21 indicated that she cannot say that the bones at the
22 quarry site were human, to a reasonable degree of
23 scientific certainty.

24 ATTORNEY STRANG: Okay.

25 ATTORNEY FALLON: So whether they are

1 burned, or calcined, or not charred, or burned, or
2 whatever, is irrelevant.

3 ATTORNEY STRANG: Let's do it this way. I
4 don't agree that it's irrelevant, but let me take
5 the human qualifier out.

6 Q. (By Attorney Strang)~ The bone fragments, here we
7 have to set aside the completely non-burned bone
8 fragments, animal bones that weren't burned.

9 A. Right.

10 Q. But the burnt bone fragments that you saw from
11 the three sites, again, all were roughly similar
12 in their burning, charring, and calcining?

13 A. That is correct.

14 Q. You are aware that the burn pit behind
15 Mr. Avery's garage was one possible burn site, if
16 you will, on the property that the -- the various
17 properties that the police examined?

18 A. Yes, that's true.

19 Q. That burn pit was described to you as, again,
20 this sort of rectangular area that was at grade,
21 but sort of surrounded by a higher mound of dirt?

22 A. I don't -- My understanding was that it was a
23 mound itself and the pit was part of that mound;
24 that may or may not be correct.

25 Q. Right. And have you ever seen a photograph of

1 that burn pit?

2 A. I have not.

3 Q. All right. I won't show you one then. But

4 essentially this was described to you as an open

5 burn area, although possibly with sides to it?

6 A. Correct.

7 Q. You are familiar with a burn barrel, correct?

8 And the general idea of a burn barrel?

9 A. Yes, I am.

10 Q. Seen pictures of burn barrels?

11 A. Yes.

12 Q. A burn barrel here would be a possible burn site

13 for a human cremation?

14 A. I guess anything is possible.

15 Q. Well, burn barrels are used for burning things,

16 right?

17 A. Most often not used for burning human remains --

18 Q. Shouldn't be --

19 A. -- however.

20 Q. Should not be used for burning human remains, but

21 a burn barrel would be large enough to put a

22 human being in if one wanted to.

23 A. Depending on the size of the barrel, it's

24 possible.

25 Q. Okay. And the jury has seen the barrels here,

1 so. Were you aware of an aluminum smelter on the
2 Avery salvage property?

3 A. Only in so far as that item was described in
4 Trooper Austin's report.

5 Q. Aware of the large wood furnace on the Avery
6 salvage property?

7 A. I cannot say for sure.

8 Q. All right. And again, then, you have no way of
9 knowing what other possible burn sites that were
10 in a quarry or anywhere else, in the vicinity of
11 Mishicot, Wisconsin, of course?

12 A. That's correct.

13 Q. Do you have enough experience with burnt human
14 remains to know whether an enclosed burn area
15 will do a faster job of cremating human remains
16 than an unenclosed burn area?

17 A. I would respond to that by saying that's really
18 outside of my range of expertise.

19 Q. Okay. So the answer is you just don't know?

20 A. I do not know.

21 Q. All right. Is it also outside your area of
22 expertise to offer an opinion on whether a burn
23 area that's actually fed with a source of
24 flammable gas or fluid would cremate faster than
25 a burn area that did not have -- was not fed by

1 flammable gas or fluid?

2 A. Again, I would offer the same response, that's
3 beyond my range of expertise.

4 Q. What you can say is that the burnt human bone
5 fragments that you saw from behind Steven Avery's
6 garage, as they came to you, were consistent with
7 human bone fragments that could have been moved
8 to that site after burning?

9 A. I would have to answer no to that question.

10 Q. Why were they inconsistent with human bone
11 fragments that could have been moved to that site
12 after burning?

13 A. My answer would be that, with the hypothetical
14 transport that you are talking about, the moving
15 of bones, I would expect to see some breakage to
16 some fragments, or many fragments, with that
17 transport. And the kinds of signs that I would
18 look for for breakage would be a bone break where
19 on the surface is the break, the break would be
20 lighter in color than the surrounding burned
21 bone, which would indicate to me a more recent
22 break from handling, whatever caused that
23 handling. And I did not see any -- anything like
24 that.

25 Q. Well, we do know that the very recovery of burn

1 bone fragments from behind Mr. Avery's garage
2 involved shoveling, correct?

3 A. That's correct.

4 Q. Transport to a sifting screen?

5 A. Yes, sir.

6 Q. Sifting on the screen, correct?

7 A. Correct.

8 Q. Some of them falling through to a second screen?

9 A. Yes, sir.

10 Q. Some of them falling through altogether to a tarp
11 below?

12 A. If that's how they set it up.

13 Q. All right. Possibly sifting on a second screen?

14 A. Possibly, yes.

15 Q. And from all of that, you saw no breakage or
16 spalling of the human bone fragments you looked
17 at?

18 A. I did not.

19 Q. But I think we have also established that as
20 bones from behind the garage came to you, we have
21 no way of knowing their relationship to one
22 another or to the human skeletal anatomy as they
23 were found?

24 A. We do not know the relationship of one fragment
25 to the next, to the next, that's correct, but we

1 do have general locational information assigned
2 to individual tag numbers.

3 Q. Right. Just behind the garage, for example?

4 A. Yes.

5 Q. All right. So while shoveling and sifting may
6 not have produced this sort of breakage, you
7 think that bones being carried in a barrel or
8 some other container and poured out would have
9 produced breakage; is that your opinion?

10 A. I -- I really can't answer that question.

11 Q. Okay. So you are not able to say that the bone
12 fragments you found are inconsistent with having
13 been transported to the burn area and poured out
14 there?

15 A. Are you referring to the burn fragments from the
16 burn barrel?

17 Q. No, no. I'm talking about the burn fragments of
18 human bone found behind Mr. Avery's garage?

19 A. And you are asking me, were they transported
20 there?

21 Q. No, you obviously don't know whether they were or
22 were not transported, you weren't there.

23 A. I was not there, but based on my archaeological
24 experience and the volume of human -- of burned
25 human bone fragments behind the garage, I find it

1 highly unlikely that that was not the primary
2 burn location.

3 Q. All right. But I guess that rests on an opinion
4 that transport in a barrel or some other
5 container, and being poured out, would have done
6 more damage to those human bone fragments than
7 shoveling, sifting, putting into a box and
8 transporting to Madison would have done?

9 A. I really don't know.

10 Q. You don't know one way or the other?

11 A. That's correct.

12 Q. What you do know is that somehow bones were
13 transported from one place to another place
14 because they wound up in at least two different
15 spots, human bones that is, behind Avery's garage
16 and in the Janda burn barrel?

17 A. There was transport --

18 ATTORNEY FALLON: Objection to the
19 question. She just indicated that there was not a
20 transport, in her opinion, to the burn pit. So
21 there's only one transport of human bone that the
22 testimony has revealed, so I object to the question
23 as mischaracterization.

24 THE COURT: Mr. Strang.

25 ATTORNEY STRANG: I don't think it's a

1 mischaracterization at all and she certainly could
2 answer here. The fact that she said the bones
3 clearly were transported, moved from original
4 location, both behind the garage and by dint of the
5 fact that they are found in the Janda burn barrel.

6 THE COURT: That she -- her previous
7 testimony was that they were moved from behind the
8 garage?

9 ATTORNEY STRANG: No, no, moved somewhere,
10 somehow the bones were moved because they were found
11 in at least these two separate locations.

12 THE COURT: Let's ask her again.

13 Q. (By Attorney Strang)~ Human bone fragments were
14 moved here, that's your professional conclusion,
15 isn't it?

16 A. There is evidence from the Avery property that
17 there was transport of human bone. And I believe
18 that transport occurred from the original burn
19 pit and adjacent areas, to barrel number two.

20 Q. And you base that opinion on what?

21 A. On the overwhelming majority of burned human bone
22 fragments behind the garage, in the area and
23 adjacent areas of the burn pit, the finding of
24 very delicate and fragmentary dental structures
25 within that universe, if you will, of burned

1 human bone fragments behind the garage and
2 absolutely none, for example, in burn barrel
3 number two.

4 And it's my opinion that if transport
5 occurred from the burn barrel to the burn pit,
6 that there would have been a greater
7 representation left over in the burn barrel of
8 more of the skeleton. And I do not see that. I
9 also would expect to see a less -- a lesser
10 volume of material found in burn barrel number
11 two, along with a few human bone fragments that
12 were in there.

13 Q. Well, I guess if someone was taking the burn
14 barrel to the Avery garage area, and was trying
15 very hard, or thought he or she had dumped
16 everything out of the burn barrel, we might see
17 very little in the burn barrel, that's true,
18 isn't it?

19 A. Very little human bone or --

20 Q. Yes, very little human bone in the burn barrel.

21 A. That is true, but that's also assuming that the
22 person who does that can distinguish between
23 human bone and nonhuman bone.

24 Q. Because you saw much more nonhuman bone in the
25 burn barrel?

1 A. Unburned nonhuman bone and larger bones -- larger
2 nonhuman bones as well.

3 Q. And some burned nonhuman bones in the burn
4 barrel?

5 A. Some possible burned nonhuman bones in the burn
6 barrel.

7 Q. And, again, you did not see the burn barrel in
8 place, correct?

9 A. I have never visited the property, so I have not
10 seen the burn barrel in place.

11 Q. The contents of the burn barrel came to you in
12 one of these sealed bins.

13 A. That's correct.

14 Q. So you have no idea and aren't able to tell this
15 jury what the layering was in the burn barrel
16 itself?

17 A. That's correct.

18 Q. You found, in the burn barrel, similarly, no
19 evidence of breakage caused by transport?

20 A. That's correct.

21 Q. The same would be true of the possible human
22 bones in the quarry pile, no breakage associated
23 with transit?

24 A. That's correct.

25 Q. And just so I'm clear, everyone of these human,

1 or suspected human bone fragments, by the time
2 they reached you, had been transported into a
3 plastic bin, or some container, and then
4 transported 90 or 100 or 110 miles, whatever it
5 is, to Madison, Wisconsin?

6 A. That's correct. The quarry area contained those
7 suspected possible human bones, that's right.

8 Q. But I'm also talking about the Janda burn barrel
9 and Steven area -- Steven Avery garage area.

10 A. That's correct. It was collected and transported
11 to me.

12 Q. All transported?

13 A. Yes.

14 Q. Large number of bone fragments in a bin, lying
15 one against the other?

16 A. Correct.

17 Q. And even after all that transport, you didn't
18 see, when you finally had a chance to look at
19 these human bone fragments, you didn't see a sign
20 of breakage?

21 A. I did not and I was very careful in looking for
22 any and all evidence, to look carefully at the
23 ends of every fragment.

24 Q. Including those delicate dental structures you
25 just mentioned a few minutes ago?

1 A. That's correct.

2 Q. If I understand your opinion, Dr. Eisenberg, you
3 think the most probable burn site here, on the
4 evidence you have, is the area behind Steven
5 Avery's garage?

6 A. Yes, sir.

7 Q. All right. As you sit here, though, you cannot
8 rule out another burn site as being a possible
9 site of burning of these human bone fragments,
10 can you?

11 A. I cannot.

12 Q. You are a reasonable person?

13 A. I hope so.

14 Q. I think so. And you cannot reasonably rule out
15 another possible burn site, can you?

16 A. Based on the information I have at hand, I
17 cannot.

18 ATTORNEY STRANG: That's all I have.

19 THE COURT: Mr. Fallon.

20 ATTORNEY FALLON: Thank you.

21 **REDIRECT EXAMINATION**

22 BY ATTORNEY FALLON:

23 Q. Doctor, let's start with the line of questioning
24 regarding your finding a complete absence of
25 breakage, spalling, and damage to these fragments

1 after they were removed from the pit, sifted by
2 law enforcement, and transported to you. What
3 does that tell you about the recovery efforts
4 engaged in by the officers and Crime Lab
5 personnel?

6 A. It indicates to me that whoever had an
7 opportunity to handle those remains, and recover
8 those remains, and package them, and transport
9 them, did not add any additional damage, or did
10 not create any artificial damage that I examined
11 when I looked at the remains.

12 Q. Given the condition of the remains, did that
13 suggest to you that these remains were carefully
14 extracted from their location and presented to
15 you?

16 A. That would be the conclusion I would draw.

17 Q. All right. Now, just so that we're crystal clear
18 on this, the various fragments from the gravel
19 pits southwest of the property, originally you
20 were only able to determine one was clearly
21 nonhuman. In your subsequent review and
22 analysis, you determined several more were
23 clearly not human; is that correct?

24 A. That's correct.

25 Q. And as a matter of fact, there was only three

1 left that you had a reasonable suspicion on that
2 could be human; is that correct?

3 A. That could possibly be human, that is correct.

4 Q. And as a matter of fact, as you sit here today,
5 you cannot tell us that those bones, to a
6 reasonable degree of anthropological or
7 scientific certainty, are human, can you?

8 A. I cannot.

9 Q. All right. Now, you did offer an opinion that
10 you believe the location for the primary burning
11 episode here was the burn pit behind the garage;
12 is that correct?

13 A. That is correct.

14 Q. Would you please elaborate for us your reasoning
15 on that?

16 A. Number one, in the order of priority, would be
17 that the overwhelming majority of fragments,
18 burned fragments that were identified by me as
19 human, were found in that location behind the
20 garage, in and adjacent to the burn pit, that
21 there were, in my opinion, many small, delicate,
22 brittle fragments that would have been left
23 behind some place else had that not been the
24 primary burn location.

25 And if that had been the case, I would

1 have been able to recognize those fragments from
2 another location and did not, except for burn
3 barrel number two. And that all the human bone
4 fragments that were fragmented and badly burned
5 from that location, show the same -- the --
6 approximately the same degree of charring,
7 burning, and calcination variously throughout the
8 material recovered in the burn pit and adjacent
9 areas.

10 Q. Since you have concluded that the burn pit was
11 the location of the primary burning episode, tell
12 us why, in your opinion, burn barrel number two
13 would not have been?

14 A. I believe that burn barrel number two would not
15 have been the primary burn location because I
16 would have expected to find more bone fragments
17 that I would have been able to -- bone fragments,
18 and human bone fragments, and dental structures
19 that I would have been able to identify as human
20 in burn barrel number two than actually I was --
21 than actually were found.

22 Q. Now, this may be a self-evident question, but I
23 want to make sure that we all understand. Given
24 the nature and condition of the fragments you
25 examined, would it have required professional

1 training and experience to be able to identify
2 human from nonhuman bone, if such bones were --
3 for someone to transport those bones? In other
4 words, would someone have to know human from
5 nonhuman?

6 ATTORNEY STRANG: That's wildly
7 speculative, your Honor.

8 ATTORNEY FALLON: Let me see if I can
9 rephrase that or articulate that question; it's
10 poorly worded, I agree with counsel.

11 Q. (By Attorney Fallon)~ Let's keep it simple.
12 Given the nature and condition of the charring,
13 the calcine defect on these bones, does it take a
14 professional such as yourself to be able to
15 clearly identify human from nonhuman burned bone?

16 A. I would say yes, except when nonhuman bone is of
17 a size, and intact, that someone might recognize
18 a deer bone or some other nonhuman bone. But,
19 yes, I would agree with you, given the charring,
20 and burning, and calcination of the fragments, in
21 fact, the majority of the contents of the burn
22 pit and adjacent area, that, yes, it would take
23 someone who has experience looking and
24 identifying human from nonhuman bone fragments.

25 Q. Would you say the same for what was found in burn

1 barrel number two?

2 A. Yes, I would.

3 ATTORNEY FALLON: That's all. Thank you.

4 THE COURT: Any redirect (sic)?

5 **RECROSS-EXAMINATION**

6 BY ATTORNEY STRANG:

7 Q. It would take much less experience with anatomy,
8 or identifying bone, to distinguish burn from
9 non-burn bone, that's true?

10 A. It -- Would you ask that again, I'm sorry.

11 Q. It would take much less experience to distinguish
12 burned bone from non-burned bone, wouldn't it?

13 A. Yes, sir, it would.

14 Q. You also found nonhuman bone under the tag
15 numbers that came from -- reportedly came from
16 behind Mr. Avery's garage?

17 A. Yes.

18 Q. And taking all three sites, the quarry, the Janda
19 burn barrel, and the Avery garage area, as a
20 whole, for the fragments that you found that were
21 burned, the burning charring and calcination was
22 roughly similar from all three places, wasn't it?

23 ATTORNEY FALLON: Asked and answered.

24 THE COURT: I will allow it as a
25 clarification of some of the other questions that

1 have been asked.

2 A. Actually, I would say no to your question. I
3 would indicate that in the quarry location, tag
4 number 8675, there was nonhuman bone intact. In
5 other words, it wasn't fragmentary, most of it,
6 and was clearly unburned. And it was in 8675
7 that there was more unburned nonhuman bone
8 than --

9 Q. We're going past each other, and it's my fault.
10 Of the burned -- I mean, you found some burned
11 bone from all three sites?

12 A. That's correct.

13 Q. And of the burned bone that you found, the
14 condition was roughly similar in all three sites?

15 A. That is correct.

16 ATTORNEY STRANG: That's all. Well --
17 That's all.

18 THE COURT: Mr. Fallon, anything else?

19 ATTORNEY FALLON: No, thank you. The
20 witness may be excused.

21 THE COURT: Right. The witness will be
22 excused at this time. And given the time, I believe
23 we'll take our morning break at this time. Members
24 of the jury remember not to discuss the case among
25 yourselves during the break.

(Jury not present.)

THE COURT: You may be seated. We'll resume in 15 minutes.

(Recess taken.)

THE COURT: Counsel, there was some mention earlier of a stipulation. Is there something the parties wish to present at this time or should we bring the jurors back in?

ATTORNEY STRANG: Mr. Fallon is doing it. We have reached a stipulation and I assume he's sort of retyping it, the language of it, your Honor.

THE COURT: Okay.

ATTORNEY STRANG: But I can't speak for him on that, I'm just assuming that. I know we agreed on the language.

THE COURT: Was it something the parties wanted to present to the jury before we begin the next witness?

ATTORNEY STRANG: I think he does, and it would make sense to do it.

THE COURT: All right. All right. Mr. Fallon, do I understand the parties have a stipulation they wish to read to the jury.

ATTORNEY FALLON: Yes, Judge. The parties -- sorry for the delay, but the parties

1 wanted to make sure that Dr. Eisenberg's testimony
2 was complete before we could finalize the language
3 on a stipulation saving us the production of a
4 witness from Virginia from the FBI Laboratory, one
5 Dr. Les McCurdy. I don't know what the Court's
6 preference is, if you would like one of us to read
7 it, or the Court might want to read, it matters not
8 to me.

9 THE COURT: If the parties wish, I will
10 read it, otherwise one of you can read it.

11 ATTORNEY STRANG: I would think since it's
12 a stipulation between the parties I think it would
13 be better if Mr. Fallon read it.

14 THE COURT: Very well.

15 ATTORNEY FALLON: All right.

16 THE COURT: Anything else before we bring
17 the jurors back in?

18 ATTORNEY FALLON: No.

19 THE COURT: Okay. We can bring the jurors
20 in at this time.

21 ATTORNEY STRANG: Oh, you know, should move
22 in 401 and 402 while we're waiting, your Honor.

23 ATTORNEY FALLON: You can do that in front
24 of the jury and I will go along with that.

25 THE COURT: All right.

(Jury present.)

THE COURT: You may be seated. Mr. Strang, I understand that the defense wishes to move admission of some exhibits.

ATTORNEY STRANG: I do. I move admission of Exhibit 401, which was the skeleton diagram tag 7964, and Exhibit 402, which was a schematic map of the Avery Salvage yard, and then the quarry pile site. I also used, for demonstrative purposes, a third image of a skeleton. And it matters not to me whether that's marked and admitted or not. It was used simply for demonstrative purposes.

THE COURT: Any objection to admission of the marked exhibits?

ATTORNEY FALLON: I have no objection to the admission of 401 and 402 and nor do I think it's necessary for us to produce a photograph of the exhibit counsel used for demonstrative purposes, so.

THE COURT: Very well, 401 and 402 will then be deemed admitted.

Members of the jury at this time I believe the parties have a stipulation to present to the jury. Mr. Fallon.

ATTORNEY FALLON: Yes, thank you, Judge. The parties are agreed that bone fragments

1 identified as human from the burn pit behind Steven
2 Avery's garage, bone fragments identified as human
3 from burn barrel number two behind the residence of
4 Barb Janda, and bone fragments suspected as possible
5 human bones from the quarry pile in the Radandt
6 gravel pit south of the Avery Salvage Yard, were
7 sent to the FBI Laboratory in Quantico, Virginia, on
8 November 2nd, 2006, November 7th, 2006, and
9 December 19th, 2006, to attempt further DNA
10 analysis. If called to testify, Dr. Leslie McCurdy,
11 of the FBI DNA Analysis Unit, would testify that due
12 to the condition of the submitted bone fragments, no
13 DNA examinations could be conducted.

14 THE COURT: And, Mr. Strang, is that an
15 accurate statement of the parties stipulation?

16 ATTORNEY STRANG: It is. That's the
17 stipulation as to Dr. McCurdy's testimony, were he
18 called.

19 THE COURT: Thank you. Members of the
20 jury, you may take those facts as established. And
21 at this time, then, the State may call its next
22 witness.

23 ATTORNEY KRATZ: Thank you, Judge, the
24 State calls Curtis Thomas to the stand.

25 **CURTIS THOMAS**, called as a witness

1 herein, having been first duly sworn, was
2 examined and testified as follows:

3 THE CLERK: Please be seated. Please state
4 your name and spell your last name for the record.

5 THE WITNESS: Curtis Thomas, T-h-o-m-a-s.

6 **DIRECT EXAMINATION**

7 BY ATTORNEY KRATZ:

8 Q. Good morning, Mr. Thomas and thank you for making
9 it here. Could you tell the jury, please, what
10 you do for a living.

11 A. Yes, I'm an electronics engineer with the Federal
12 Bureau of Investigation.

13 Q. And from which FBI office are you stationed?

14 A. I'm stationed currently in Quantico, Virginia.

15 Q. Placed in front of you, Mr. Thomas, is an
16 exhibit, No. 403; do you see that?

17 A. Yes, I do.

18 Q. Tell the jury what that is, please?

19 A. It's my curriculum vitae. It's basically a
20 resume of what I have done and my current
21 position.

22 Q. Working for the FBI, what do you currently do; in
23 other words, what is your day usually made up
24 doing?

25 A. We examine electronic devices such as cellphones,

1 PDA's, other various electronic circuits that may
2 contain electronic data pertaining to a crime.

3 Q. Are you ever asked to make identification of
4 electronic components?

5 A. Yes, we are.

6 Q. Mr. Thomas, let me ask you if you do that in a
7 forensic capacity; in other words, after your
8 examinations in the laboratory, are you sometimes
9 asked to come to court or otherwise apply this to
10 legal principles?

11 A. Yes, I am.

12 Q. The FBI Lab in Quantico, Virginia, does that
13 enjoy any certifications?

14 A. Yes, we are currently ASCLD lab certified.

15 Q. You are going to have to explain what that means?

16 A. It's an Association of Criminal Laboratory
17 Directors Laboratory Accreditation Board is what
18 the full acronym stands for. It's basically an
19 internal validation that we go through to make
20 sure that we're following all the rules and
21 handling the evidence in the proper manner.

22 Q. All right. Exhibit No. 403, your curriculum
23 vitae, does that include your educational
24 background?

25 A. Yes, it does.

1 Q. And can you briefly describe what that is, for
2 the jury.

3 A. I have a bachelor's degree in computer
4 engineering.

5 Q. To entitle you or to allow you to perform
6 examinations and make identifications of
7 electronic equipment, have you had any specific
8 training and do you have experience in that
9 field?

10 A. I have received training as far as electronic
11 forensic examinations and how to handle evidence
12 properly. As far as identification goes, we
13 handle many different kinds of cellphones on a
14 daily basis and, therefore, I'm familiar with
15 many different models and makes of cellphones.

16 Q. All right. Are you familiar with the term
17 exemplar or standard?

18 A. Yes, I am.

19 Q. Does your lab in Quantico, Virginia, have
20 exemplars or standards for -- let's first talk
21 about cellphones?

22 A. Yes, we do.

23 Q. Can you describe that for jury, please.

24 A. We have a cabinet area that contains any sort of
25 cellphone that we have received in for

1 examination. We generally buy a copy of it so
2 that we can test -- perform tests on it before we
3 do examinations on the actual evidence and make
4 sure we don't change anything.

5 Q. All right. These exemplars, these standards or
6 examples, if you will, do you have those for
7 electronic devices other than cellphones?

8 A. Yes, we do, we have PDA's and also GPS devices.

9 Q. We need to slow down just a little bit. For
10 those jurors who don't know what a PDA is; what
11 is that?

12 A. A PDA stands for personal digital assistant such
13 as a palm pilot or pocket PC device.

14 Q. What are those used for generally?

15 A. Generally they are used to house contact
16 information and function as an electronic
17 calendar.

18 Q. All right. Does your unit analyze electronic
19 components on a daily basis? That's a poor
20 question, let me ask it a different way. Are
21 there individuals, other than you, in Quantico,
22 Virginia, at the FBI Lab, that do this kind of
23 work as well?

24 A. Yes, I work in an office of five people.

25 Q. All right. How do you typically receive

1 submissions for analysis, Mr. Thomas?

2 A. We're generally sent a communication requesting
3 our assistance and detailing what we're asked to
4 do.

5 Q. All right. Who is that generally sent by?

6 A. Generally sent from and FBI Field Office, but
7 it's -- we also accept requests from local police
8 officers as well.

9 Q. I guess my question is, you generally get
10 requests from a law enforcement agency?

11 A. That's correct.

12 Q. You don't do this kind of thing for the general
13 public or for some corporation or something, do
14 you?

15 A. No, we do not.

16 Q. Let me ask you, Mr. Thomas, in this case, now,
17 were you asked not only by a local agency, the
18 Wisconsin Division of Criminal Investigation, but
19 the local field office of the FBI here in
20 Wisconsin, to analyze some electronic components
21 that were recovered?

22 A. Yes, I was.

23 Q. Investigator Wiegert from the Calumet Sheriff's
24 Department is going to bring you a exhibit, he's
25 first going to open it. It's been marked as

1 Exhibit No. 415. I'm first going to ask you if
2 you are able to identify that box and then I will
3 have you identify the contents.

4 A. I do recognize the box, the box -- the box the
5 evidence was sent to us in.

6 Q. Okay. If you would be so kind, Mr. Thomas, as to
7 open that box for the jury and tell the jury
8 what's in that box, please.

9 ATTORNEY BUTING: This is 411?

10 ATTORNEY KRATZ: It's 415.

11 ATTORNEY BUTING: 415.

12 A. This box contains burnt electronic components.

13 Q. All right. As we go through that box, I'm going
14 to show you some exhibits as well. I'm first
15 going to show you some photos, but to assist you,
16 I'm going to show you what you are going to see
17 that's marked as Exhibit No. 404. I ask you to
18 refer to the large screen here in the courtroom
19 and tell us what the jurors are looking at,
20 please.

21 A. That is a layout of basically all the components
22 that are inside this box, spread out in a more
23 easy to view fashion.

24 Q. All right. When electronic components are
25 recovered, whether they are burned, or whether

1 they are recovered at some other potential crime
2 scene, do you typically receive them in a
3 packaged form similar to what's in front of you
4 as Exhibit 415?

5 A. We receive them in various different containers,
6 including paint cans that have been sealed up,
7 boxes that have been taped up, just pretty much
8 whatever the evidence is collected in, they send
9 to us.

10 Q. All right. Let's look at Exhibit No. 404,
11 generally. And why don't you give us an
12 overview, why don't you tell the jury -- you have
13 a laser pointer, by the way, in front of you, if
14 you would like to use that, please feel free.
15 Just give us an overview and tell the jury what
16 it is that these components are and what it is
17 that we're looking at here?

18 A. There are components from approximately three
19 devices in here. You can see here, this is the
20 front cover for a Motorola RAZR cellular
21 telephone. This is the back cover for the same
22 phone. This here is some of the front internal
23 pieces.

24 This is the front lens cover for a
25 PowerShot camera from Canon. This right here is

1 the circuit board that's inside a Palm Zire PDA.
2 And these little rectangular devices are pieces
3 of compact flash memory cards that would go
4 inside the camera to hold the pictures.

5 Q. Now, you have talked about three -- at least
6 three distinct electronic components, one of them
7 was a cellphone. Let's start with that first.
8 In the submission from the Division of Criminal
9 Investigation and our local law enforcement
10 agencies, what were you asked to do, if anything,
11 with that particular cellphone?

12 A. When the device was sent to us, they asked us if
13 we could extract any electronic data from the
14 cellphone.

15 Q. In the condition that you received it in, in the
16 burned condition that we now see all of these
17 components, were you able to extract any data
18 from that cellphone?

19 A. No, I was not.

20 Q. Let me ask you, Mr. Thomas, were you asked to
21 extract, if you could, any images from the
22 digital camera that was sent to you as well?

23 A. Yes, I was.

24 Q. Tell the jury, how does a digital camera work,
25 generally, and then explain for the jury what

1 process, or what you did to try to extract data
2 from that?

3 A. A digital camera works by taking in light through
4 the lens. It's then stored in an electronic
5 nature onto a compact flash card which -- of
6 which there are several in this submission. As
7 far as in this case, pretty much no effort was
8 taken to retrieve electronic -- electronic
9 information because, upon looking at it, it was
10 obvious that everything was damaged too far to
11 retrieve any such information.

12 Q. All right. You talked about a flash card or the
13 actual memory card that kind of goes into the
14 camera, are you able to just point out to the
15 jury -- we may see some other pictures of that,
16 but point to the jury where those memory cards or
17 flash cards that go into a camera are?

18 A. There's one here, a couple more here, and a
19 couple more here. Pretty much anything up here,
20 that's around this size, came from it. They kind
21 of split into sometimes multiple pieces, so each
22 one of those little rectangles doesn't represent
23 an individual compact flash card, but perhaps
24 more just a piece of one of the ones that was
25 submitted.

1 Q. And, again, you weren't able to retrieve any data
2 from that; is that correct?

3 A. That's correct.

4 Q. At some point, Mr. Thomas, you told the jury that
5 you found a third component, can you describe
6 that please.

7 A. Yes, as we were examining the evidence that was
8 sent to us, we noted that there was more
9 components than would be just left over from a
10 burned cellphone and a burned camera. And we
11 noticed that it was mainly this circuit board
12 right here. And this is the main board to a Palm
13 Zire PDA.

14 Q. All right. Let's go through the components.
15 Some are probably going to be easier than others.
16 What I'm going to have you look at, in front of
17 you is Exhibit No. 405; tell the jury what that
18 is, please.

19 A. That is the back cover for a Motorola RAZR
20 cellphone.

21 Q. And how do you know that that's for a Motorola
22 RAZR cellphone.

23 A. You can clearly see the M here, which is the
24 Motorola logo. And we also have an exemplar at
25 the FBI Lab to compare it to.

1 Q. All right. Motorola RAZR, is that also known as
2 a different model number or type?

3 A. Yes, it's also known as a V3.

4 Q. All right. Can you describe for the jury, for
5 those jurors who haven't heard of this kind of
6 phone, is this a commonly used or a common type
7 of cellphone?

8 A. Yes. All four of the major cellular carriers
9 offer one.

10 Q. Offer one what?

11 A. A Motorola RAZR cellphone.

12 Q. Do you know anybody that has one?

13 A. Yes, I do, my wife actually has one.

14 Q. Okay. I'm going to show you, Mr. Thomas, what
15 has been marked as Exhibit No. 406; again, these
16 are photographs that are in front of you, so if
17 you need a closer look, you can certainly take
18 them. Tell the jury, what is Exhibit 406?

19 A. Exhibit 406 is the back cover of the burned
20 cellphone; again, being compared with our
21 exemplar that we have at Quantico.

22 Q. What does that mean? Why don't you use the laser
23 pointer and tell us what you are talking about.

24 A. Basically we -- this is the burned evidence that
25 was sent to us here and this is our device that

1 we have at the lab. And basically we just took
2 pictures of them side by side, to show what it
3 would have looked like before it was burned.

4 Q. Next exhibit that might help the jury is
5 Exhibit 407. Tell us what that is, please.

6 A. Yes, that is the front cover for the Motorola
7 RAZR cellphone being compared, once again, with
8 the exemplar device that we have.

9 Q. All right. And why, Mr. Thomas, at least in
10 these images, is the exemplar placed right next
11 to the evidence, the burned evidence that was
12 recovered in this case?

13 A. It's for comparison purposes, so you can clearly
14 see where the burned evidence came from in the
15 original device.

16 Q. So in 407, if you could show us the burned
17 evidence that was recovered and what part of the
18 phone that is.

19 A. All right. This burned -- This is the burned
20 evidence piece right here and you can clearly see
21 here is the Motorola logo, which also appears
22 over here and you can also clearly see this
23 little speaker port, which is cut into the front
24 cover of the phone as well, as well as this
25 rectangular space for the camera being cut out.

1 Q. Finally, or at least finally regarding the phone,
2 I'm going to have you look at Exhibit No. 408 and
3 tell us what the jurors are looking at here,
4 please.

5 A. This is the internal key pad, which is present on
6 -- this here is the burned evidence, again, and
7 this here is our exemplar.

8 Q. And that's the internal key pad for a Motorola V3
9 RAZR phone?

10 A. That's correct.

11 Q. After your visual examination and after examining
12 the exemplar, were you able, then, to identify
13 those components, at least the components that
14 you have shown the jury here today, as coming
15 from a particular cellphone?

16 A. Yes, I was.

17 Q. And what was that conclusion that you were able
18 to draw?

19 A. We were able to conclude that these pieces came
20 from a Motorola RAZR V3 cellphone.

21 Q. Next item that you had talked about was a digital
22 camera. Just very quickly, however, I'm going to
23 just show you the rest of the photos that were
24 provided. What's Exhibit No. 409? What is
25 Exhibit 409? The picture?

1 A. Oh, Exhibit 409 is, once again, just pieces of
2 the burned cellphone placed together.

3 Q. All right. And Exhibit 410?

4 A. Exhibit 410 is simply a photo of some of the
5 burned evidence placed together.

6 Q. Okay. And from Exhibit 410, do you see any items
7 that are associated with a digital camera?

8 A. Yes, this piece right here is a lens cover for a
9 Canon PowerShot camera.

10 Q. As we zoom in on Exhibit 410, this might be kind
11 of obvious to everybody, but do you see any
12 markings on that digital camera cover that helped
13 you in identifying what kind of a camera this
14 came from?

15 A. Yes, there's the words PowerShot A310 appear.

16 Q. All right. And I understand that you do this for
17 a living and are probably an expert in this, but
18 you don't need to be an expert to see what camera
19 this is from, do you?

20 A. No, you do not.

21 Q. That notwithstanding, Mr. Thomas, there were
22 other electronic components to the camera that
23 were recovered; is that right?

24 A. That's correct.

25 Q. And, again, could you describe those for the

1 jury, are those shown in this exhibit, or do you
2 need to go to a different exhibit?

3 A. It's in a different photo.

4 Q. All right. Let me go to those, please. I'm
5 first going to show you, again, another exhibit,
6 that is, Exhibit 411, a little clearer picture of
7 the name; do you see that?

8 A. Yes.

9 Q. Again, what does that say?

10 A. It says PowerShot A310.

11 Q. What's Exhibit No. 412? What are we looking at?

12 A. Burned pieces of the Motorola RAZR V3 cellphone.

13 Q. All right. And Exhibit 413?

14 A. It's another zoom in on the earlier shot that
15 contained all the burned evidence laid out.

16 Q. Now, does any of this evidence associate with the
17 camera itself?

18 A. Yes, it does.

19 Q. Can you show that for the jury, please.

20 A. This circuit board right here is from the digital
21 camera.

22 Q. From the A310?

23 A. Yes.

24 Q. Is there anything else that you see that is
25 obviously associated with the camera?

1 A. Other than the compact flash cards, no.

2 Q. I'm going to leave this exhibit up -- let me ask
3 your opinion. Based upon the exhibits that you
4 have now shown these jurors, are you able and
5 were you in this case able to identify from which
6 digital camera those components came?

7 A. Yes, I was.

8 Q. What was that camera?

9 A. We determined it was a PowerShot A310.

10 Q. From Canon?

11 A. That's correct.

12 Q. All right. Let's talk about PDA's a little bit;
13 you said that stood for what?

14 A. Personal digital assistant.

15 Q. I think you mentioned one of the brands of a PDA
16 was something called a Palm Pilot?

17 A. That's correct.

18 Q. Are you there other brands of PDA's?

19 A. Yes, there are.

20 Q. And what are some of those, if you know.

21 A. Pocket PC and also Blackberry.

22 Q. Now, have you heard of a manufacturer of a
23 personal digital assistant that's called a Palm
24 Zire or Palm Zire?

25 A. Palm is the manufacturer of that device, yes.

1 Q. The Palm Zire 31, that particular model, do you
2 have familiarity with that?

3 A. Yes, I do.

4 Q. And at the time of your examination, at the time
5 that you did what was asked of you by local law
6 enforcement, describe for the jury what, if any,
7 familiarity you had with that particular brand of
8 PDA?

9 A. That particular PDA, we just happened to be
10 working on downloading memory and such from that
11 device, so I was familiar with what it looked
12 like, both inside and out.

13 Q. Mr. Thomas, I'm going to take you back to our
14 original exhibit, that is, Exhibit No. 404. Have
15 you looked at this and, again, if you are able,
16 from Exhibit 404, which is all the components
17 that were recovered in this case, if you can
18 point to the large screen as to which of those
19 components are associated with a Palm Zire?

20 A. This here is the main circuit board of the Palm
21 Zire and these two clear pieces of glass, one of
22 them is the screen, the LCD screen for the glass,
23 or for the PDA. And the other one is what's
24 known as a digitizer for the PDA.

25 Q. You are going to need to tell us what a digitizer

1 is, please.

2 A. PDA's allow you to touch the screen to input
3 information into them and the digitizer is the
4 piece of technology that allows this to take
5 place. It records where you tapped on the screen
6 and sends that information to the PDA.

7 Q. So, as I don't own one of these deals, but when
8 you see say somebody taking out something that
9 looks like a pen and they tap it on the screen,
10 is that the digitizer thing that you are talking
11 about?

12 A. That's correct.

13 Q. Looking at these components and looking and
14 describing for the jury, were you able to
15 identify, then, from what personal digital
16 assistant these components came?

17 A. Yes, I was.

18 Q. Could you describe that for the jury, please.

19 A. We determined that they came from a Palm Zire 31
20 PDA.

21 Q. I will have you look at Exhibit No. 404, which
22 are the -- a photograph of all the components and
23 compare that to the box that's in front of you,
24 Exhibit 415; does it appear that the electronic
25 components photographed in 404 are the very same

1 components that not only are in front of you in
2 415, but were also analyzed by you?

3 A. Yes, they are the same.

4 Q. The identification of electronics and electronic
5 components, does that require specialized
6 training and experience?

7 A. Yes, it does.

8 Q. And, again, you believe that you have that
9 through your work with the FBI?

10 A. That's correct.

11 Q. Your findings, Mr. Thomas, that is, the
12 identification of the Motorola RAZR phone, the
13 Canon PowerShot A310, and the Palm Zire 31, in
14 rendering those opinions, do you hold those
15 opinions to a reasonable degree of professional
16 certainty?

17 A. Yes, I do.

18 Q. After having come to those conclusions, did you
19 have a official report, again, authored by
20 yourself, performed in this case?

21 A. Yes.

22 Q. I'm showing you -- Do you have the exhibit number
23 in front of you?

24 A. 414.

25 Q. I'm showing you Exhibit No. 414, tell the jury

1 what that is, please.

2 A. This is my report that I generated once I was
3 finished examining the evidence.

4 Q. And does that report include your findings, that
5 is, include the identification of the three
6 electronic items that were recovered and which
7 you analyzed and identified?

8 A. Yes, it does.

9 Q. The last two exhibits I want you to take a look
10 at are two boxes that have been handed to you,
11 Exhibit No. 8 and Exhibit No. 9. Could you grab
12 those, please, and tell the jury what those are.

13 A. They appear to be consumer electronic devices
14 which are the same, as you can see, be similar to
15 our exemplars that we have in house.

16 Q. All right. First of all, they are boxes; is that
17 right?

18 A. They are boxes, yes.

19 Q. And which one is Exhibit No. 8; are you holding
20 that?

21 A. Yes.

22 Q. And could you tell the jury what the box on
23 Exhibit No. 8 reflects.

24 A. It says Zire 31.

25 Q. And would that be, at least from a manufacturing

1 standpoint, if you went to buy that in a store,
2 would the components or would the non-damaged
3 Palm Zire 31 that you have identified likely be
4 in that box if you purchased it?

5 A. Yes, it would.

6 Q. And show the jury Exhibit No. 9, please. You can
7 hold it up and show them what that is. What is
8 it?

9 A. It is the box for a Canon PowerShot A310.

10 Q. And, once again, would that likely be the box, if
11 you had purchased a Canon PowerShot A310, the
12 same box that would contain the undamaged
13 components as you have identified in not only the
14 photographs in Exhibit No. 415, but also are
15 included in your official FBI report?

16 A. Yes.

17 ATTORNEY KRATZ: I would at this time,
18 Judge, move the admissions of Exhibits 404 through,
19 I believe it's 415?

20 THE COURT: Any objection?

21 ATTORNEY BUTING: No objection.

22 ATTORNEY KRATZ: And I will pass the
23 witness, Judge.

24 THE COURT: 403 was the witness' CV?

25 ATTORNEY KRATZ: And 403, I'm sorry, Judge.

1 THE COURT: Any objection to that?

2 ATTORNEY BUTING: No objection to that.

3 THE COURT: Very well. Those exhibits are
4 all admitted. Mr. Buting.

5 ATTORNEY STRANG: Thank you, your Honor.

6 **CROSS-EXAMINATION**

7 BY ATTORNEY BUTING:

8 Q. Good morning, sir.

9 A. Good morning.

10 Q. You have been working at the FBI just for about
11 three years now, right?

12 A. That's correct.

13 Q. And there's five of you in your particular
14 division?

15 A. Yes.

16 Q. Are they all about as young as you, or some of
17 them quite a bit older?

18 A. It varies.

19 Q. You are at an age where people use these kinds of
20 devices more than probably us old folks anyway,
21 right?

22 A. I guess.

23 Q. You use digital PDA's yourself, right?

24 A. I personally do not use a PDA, no.

25 Q. Oh, really, okay. But others in your lab do?

1 A. Not on a personal basis, no.

2 Q. Well, as part of their business, do they use them
3 at all?

4 A. We use them as part of our job, just to examine
5 them.

6 Q. Oh, okay. So nobody in your lab actually has
7 these devices?

8 A. Not personally, no.

9 Q. All right. Let me just clear one thing up. The
10 FBI Lab, Mr. Kratz, as you indicate, is the
11 submissions from law enforcement, right?

12 A. That's correct.

13 Q. The FBI Lab does not do any tests for the defense
14 on a case, do they?

15 A. Our lab does not, no.

16 Q. So, even if I wanted to use your lab for
17 anything, it's not available?

18 A. No.

19 Q. Okay. You identified --

20 ATTORNEY BUTING: Could we put up one of
21 those exhibits, the overall shot, 409 and 410,
22 please?

23 ATTORNEY KRATZ: Do you want 404, the one
24 with all of them?

25 ATTORNEY BUTING: That's fine, 404, yeah.

1 Yeah, that's the one.

2 Q. (By Attorney Buting)~ Is -- 404 is an overall
3 layout of all of the items that you received,
4 every single one?

5 A. That's -- That picture was not taken by me, that
6 picture was taken here, as far as I know.

7 Q. Okay. Does that appear to be an accurate
8 representation of everything that you got in that
9 box, though?

10 A. It appears to be all the electronic pieces that
11 were contained in this box.

12 Q. Okay. And did you make an effort to actually
13 sort of fit these pieces back together?

14 A. No, we did not.

15 Q. So, for instance, do you know whether there's any
16 pieces missing from a complete PDA?

17 A. There are pieces missing just -- most likely they
18 have been consumed wholly by the fire.

19 Q. Well, I'm not sure that you can express that
20 opinion, but my point is that not necessarily all
21 of the pieces are there, right?

22 A. No.

23 Q. For instance, there's not -- there's a case, an
24 outer case that that PDA, circuit -- internal
25 circuit board fits into?

1 A. That's correct.

2 Q. Also a keyboard of some sort?

3 A. Yeah, there were four buttons at the bottom.

4 Q. Okay. And I don't know if the same holds true
5 for the cellphone and the camera, but there's
6 buttons and internal components that are missing?

7 A. That's correct.

8 Q. And in some instances even the outer cases that
9 these components are composed -- or contained in
10 are also missing?

11 A. That's correct.

12 Q. Okay. The digital camera, have these -- or uses
13 compact flash, is that what you called it?

14 A. Yes.

15 Q. Those little rectangular cards that we put in our
16 cameras?

17 A. That's correct.

18 Q. You said that no effort was made, though, to try
19 and retrieve any digital files from them?

20 A. That's correct.

21 Q. In the course of your work, how many cases have
22 you done where you're working with burned
23 electronics?

24 A. I have done a few.

25 Q. Less than five?

1 A. Most likely, yes.

2 Q. Okay. So most of your work is not -- is not
3 dealing with burned electronic parts, it's intact
4 parts?

5 A. That's correct.

6 Q. And in those instances, you are able to take, for
7 instance, a compact flash card and retrieve data
8 from it, potentially, right?

9 A. That's correct.

10 Q. But you never actually tested these cards to see
11 whether there might be some photographs or
12 digital files on the cards?

13 A. The condition that these cards were in precludes
14 any sort of testing that we would have done, lest
15 we completely destroyed this evidence. As you
16 touch most of this stuff, it is crumbling apart.

17 Q. Well, for instance, the compact flash cards,
18 could they have been -- did you try to insert
19 them into any kind of a card reader?

20 A. There was no connector left on most of them.

21 Q. Okay. The connector being some sort of metal?

22 A. It's plastic.

23 Q. Okay. And you have no other way, other than
24 being able to insert them into a card reader to
25 analyze what's on them?

1 A. We have the capability to remove the actual flash
2 memory chips from devices to read them, if
3 necessary.

4 Q. But you didn't do that here?

5 A. No.

6 Q. Okay. And as to the Palm Pilot, you are familiar
7 with how they are used, right?

8 A. Yes.

9 Q. And people keep appointments on them, for
10 instance?

11 A. Yes, they do.

12 Q. So the owner of this one, for instance, may have
13 had appointments that she was going to go to on
14 her last day, that we know of?

15 A. It's possible.

16 Q. As well as future dates for that matter, right?

17 A. That's possible.

18 Q. And how is that information stored on a Palm
19 Pilot?

20 A. It's also stored in flash memory.

21 Q. Okay. And do you see -- or did you find that
22 sort of a flash card amongst this?

23 A. The flash -- It doesn't store it in a separate
24 flash card, as the camera does. It instead uses
25 flash memory that would be contained on the main

1 circuit board.

2 Q. Okay. And did you make any effort to try and
3 retrieve any of the data from that flash memory
4 on the PDA?

5 A. No, we did not.

6 Q. Okay. So you weren't able to find, for instance,
7 whether she had appointments scheduled on her PDA
8 or not?

9 A. That's correct.

10 ATTORNEY BUTING: All right. Thank you,
11 sir. That's all I have be.

12 ATTORNEY KRATZ: Just two questions.

13 **REDIRECT EXAMINATION**

14 BY ATTORNEY KRATZ:

15 Q. Mr. Thomas, you mentioned, especially when we're
16 talking about combustible or things that are
17 destroyed in a fire, what kinds of components
18 usually, or as you look at this evidence, what
19 kind of components survived and what kind of
20 components didn't?

21 A. In this case and in --

22 ATTORNEY BUTING: I object. Hold on. I
23 object to the question as to what kind of components
24 didn't. I mean, that's speculative. That calls for
25 speculation. The first part is okay.

1 ATTORNEY KRATZ: I can ask what kind of
2 components aren't here, Judge, and what they are
3 made from.

4 THE COURT: You can phrase it that way.

5 ATTORNEY BUTING: Sure. That's fine.

6 BY ATTORNEY KRATZ:

7 Q. What kind of components survived; what materials
8 or products are these components made from?

9 A. Are primarily metal.

10 Q. And the components that you don't see, the
11 components that are missing, are you able to say
12 what those are primarily made of?

13 A. They are primarily made of plastic.

14 ATTORNEY KRATZ: That's all I have for
15 Mr. Thomas. Thank you.

16 ATTORNEY BUTING: Just one quick follow-up.

17 **RECROSS-EXAMINATION**

18 BY ATTORNEY BUTING:

19 Q. Are you able to state that the only missing
20 pieces here are plastic or are there also
21 potentially some metal pieces that are missing
22 too that aren't here?

23 A. We did not perform that sort of examination so
24 I'm not certain.

25 Q. All right. So you don't really know what --

1 exactly what pieces are missing, you just looked
2 at what pieces you had?

3 A. That's correct.

4 ATTORNEY BUTING: All right. thank you.

5 THE COURT: Very well. You are excused.

6 ATTORNEY KRATZ: I would ask that
7 Mr. Thomas be released from his subpoena and be
8 allowed to go back to Virginia.

9 ATTORNEY BUTING: That's fine.

10 THE COURT: Very well. You may leave the
11 evidence there.

12 THE WITNESS: Okay.

13 ATTORNEY KRATZ: We'll remove those things
14 and we're able to call another witness now --

15 THE COURT: Yes.

16 ATTORNEY KRATZ: -- if you would like us
17 to.

18 ATTORNEY FALLON: State will be calling
19 Bill Newhouse.

20 THE CLERK: You can step over there.
21 Please raise your right hand.

22 **WILLIAM L. NEWHOUSE**, called as a witness
23 herein, having been first duly sworn, was
24 examined and testified as follows:

25 THE CLERK: Please be seated. Please state

1 your name and spell your last name for the record.

2 THE WITNESS: William L. Newhouse,

3 N-e-w-h-o-u-s-e.

4 ATTORNEY FALLON: Thank you. Good morning,

5 sir.

6 **DIRECT EXAMINATION**

7 BY ATTORNEY FALLON:

8 Q. What do you do for a living?

9 A. I'm employed as a firearm and toolmark examiner
10 with the Wisconsin State Crime Laboratory in
11 Madison, Wisconsin.

12 Q. How long have you been so employed?

13 A. I joined the Wisconsin State Crime Laboratory in
14 November -- I'm sorry, September of 2002.

15 Q. Prior to joining the Wisconsin State Crime
16 Laboratory, what other employment have you held?

17 A. Well, I have to back up to 1972. I accepted a
18 position with the California Department of
19 Justice in August of 1972, as a -- out there they
20 call us criminalists -- as a trainee,
21 essentially, at that time. I didn't really
22 encounter firearms and toolmark work, which is
23 the work I do here in Wisconsin, until probably
24 the fall of 1974.

25 I, at that time, went through --

1 initiated the training courses they had in place
2 in the Sacramento Crime Laboratory that dealt
3 with the firearms and toolmark section and dealt
4 with the kinds of examinations that we were
5 expected to perform in the course of case
6 examinations in the firearm section. I completed
7 that training course successfully.

8 And January of 1975, then, still in
9 Sacramento, I was asked to take a week long
10 course, again as part of my training, that dealt
11 with the theory of identification and how is it
12 you can say anything about a bullet or a
13 cartridge casing and answer questions about
14 whether they were fired from a particular gun or
15 not.

16 After I completed that, and I think the
17 next week I was in another course that dealt with
18 ammunition problems. I was then assigned to the
19 firearm section of the Sacramento Laboratory and
20 was responsible, until I left that laboratory,
21 for most of the firearms work that came into that
22 firearms section of the laboratory.

23 Q. And when were you doing your firearms
24 identification work for the State of California,
25 about what time frame are we in?

1 A. We're talking about the spring of 1975 until
2 1981.

3 Q. And after that, where did you next have
4 professional experience?

5 A. I moved to the Montana State Crime Laboratory in
6 January of 1981. Took a position there as that
7 State's Firearm and Toolmark Examiner. While I
8 was there in Montana, I had the opportunity to
9 obtain some additional training.

10 I went to the FBI Academy. It was
11 probably in 1984, approximately. Took a course
12 there. It was a week long course that dealt with
13 specialized techniques in firearms and toolmark
14 identification. We look at special problems that
15 we encounter in the firearms section. And I was
16 there until November of 1988.

17 At that time I then moved to Kansas
18 City, Missouri Police Department Crime laboratory
19 as a Firearms and Toolmark Examiner, one of four
20 in that laboratory, and was responsible primarily
21 for firearms case work in that laboratory.

22 The last two years that I was in the
23 firearms section there, before I came to
24 Wisconsin, I was Chief Criminalist of the
25 Firearms Section in which I had supervisorial

1 (sic) duties in addition to the case work duties.

2 And then in, as I mentioned, in
3 September of 2002, I came from Kansas City up to
4 the Wisconsin State Crime Laboratory.

5 Q. And prior to engaging in this field, did you
6 receive any bachelor's degree from any
7 university?

8 A. I have a bachelor of science degree in physics
9 from Purdue University. I received that in June
10 of 1970.

11 Q. And did you pursue any post-graduate training, at
12 least in some respects?

13 A. I took a number of graduate courses for
14 approximately two years, until I -- until August
15 of 1972, when I went to California. Those
16 were -- most of them were in physics courses.
17 And I was doing that while I was looking for
18 employment after I had gotten my degree.

19 Q. All right. First of all, if you could tell us
20 what is firearms and toolmark identification, if
21 you can just generally tell us about that field.

22 A. In the firearms section of most crime
23 laboratories, we're dealing with evidence that's
24 recovered in the course of criminal
25 investigations that involve shootings. So,

1 obviously, what I'm going to be looking at, in
2 most cases, there's going to be a gun.

3 I'm interested in and have to be able to
4 define how a gun functions, whether it's
5 functioning properly, perhaps whether it's been
6 altered in some cases and, of course, whether or
7 not I can fire the gun safely, or whether or not
8 it was capable of being operated safely in the
9 instant in which -- from which it was recovered.

10 I'm also asked to look at bullets and
11 cartridge casings. We fire these guns, the
12 bullets, of course, are -- leave the gun, the
13 cartridge casings, depending on the design of the
14 gun, can leave the gun and are recovered at the
15 crime scenes, occasionally recovered at
16 autopsies.

17 I'm asked to examine those items of
18 evidence, the cartridge casings and bullets. And
19 most often I'm asked to determine, if a gun has
20 been recovered, whether that gun, or that bullet,
21 or that cartridge casing has been fired in a
22 particular weapon. In those instances where I
23 may not have a gun, then the question may be, was
24 this group of cartridge casings all fired in the
25 same gun or do we have more than one gun

1 involved.

2 The same questions apply to bullets.
3 So, then the next thing I do in that section most
4 frequently is look at bullets and cartridge
5 casings, compare them to test fired bullets and
6 cartridge casings so that I can answer those
7 questions.

8 The other element of firing the gun
9 involves gunpowder and gunpowder residues. And
10 it's also part of, or one of the duties that I
11 have, to examine clothing; to examine patterns on
12 skin of shooting victims; and answer questions
13 about distance, can I determine, if possible,
14 what distance the shooting victim may have been
15 from the gun when the gun was discharged.

16 Q. All right. Have you had any -- Do you currently
17 belong to any professional organizations?

18 A. I do.

19 Q. And what are those?

20 A. I'm a member, and have been for something over 20
21 years, of the Association of Firearms and
22 Toolmark Examiners.

23 Q. All right. And have you testified in courts of
24 law regarding your findings and expressed
25 opinions on those findings?

1 A. Yes, I have.

2 Q. Do you have any estimate for us as to
3 approximately how often you have been called upon
4 to testify in court proceedings regarding
5 firearms identification issues?

6 A. I'm satisfied it's been much in excess of 300
7 times at this point.

8 Q. I believe there's an exhibit placed in front of
9 you, and what is the number on that exhibit, for
10 us?

11 A. Exhibit 416.

12 Q. 416. And what is Exhibit 416?

13 A. 416 is a curriculum vitae, a description of my
14 experience and the training that I have received
15 in the 30 some years of experience I have had in
16 crime laboratories.

17 Q. All right. All right. Mr. Newhouse, in this
18 particular case, were you called upon to examine
19 some weapons, some bullet fragments, and some
20 cartridges?

21 A. Cartridge casings, yes, I was.

22 Q. Did you conduct such an examination?

23 A. I did.

24 Q. And were you able to make any findings or any
25 comparisons, based on your examination?

1 A. Yes, I did.

2 Q. All right. Well, before we get into that, if you
3 could -- I think it would probably be good if you
4 would define some terms for us. Some of us are
5 not so proficient in firearms technology and
6 language. So, first of all, can you tell us what
7 a cartridge is?

8 A. Most of you are probably familiar, if only
9 secondarily through TV, with guns, and know that
10 what you fire in a weapon is a cartridge. You
11 may not be aware of what the different components
12 of a cartridge are, and it's the components, of
13 course, most often, that I'm asked to look at.
14 You are going to hear me talk about some of these
15 parts of a cartridge and how they relate to and
16 connect with different parts of the weapon.

17 A cartridge is a composition of about
18 four different parts. A cartridge consists of a
19 cartridge casing, and we'll see some of these
20 later, I presume, at least pictures of them. We
21 also have a bullet or a projectile. This is part
22 of a cartridge. And, of course, the bullet is
23 what is aimed at a particular target and what
24 will, if the weapon is working properly and the
25 cartridge works properly, what will strike that

1 target.

2 Inside of the cartridge, inside the
3 cartridge casing, is gunpowder. Gunpowder is a
4 propellant. It's a chemical that, under the
5 conditions that we expose it to when we're firing
6 the gun, essentially explodes in the gun. And,
7 of course, when it does that, a couple of things
8 happen. It forces the bullet out of the barrel
9 of the weapon and, again, down range from
10 wherever the weapon is pointed.

11 The last component in a cartridge is
12 what we call a primer. There's a part of the gun
13 that's going to cause the cartridge to fire.
14 That part of the gun actually strikes a different
15 chemical in the gunpowder that's present in the
16 cartridge casing and that is very shock
17 sensitive. It gets struck. It explodes. It
18 ignites the gunpowder and then our cartridge
19 fires and the gun should work as it's intended
20 to.

21 Q. Generally, on a gun, where would the primer be
22 located or found.

23 A. Really only two places on any cartridge, these
24 days at any rate. We may have a rim fire
25 cartridge, and in this case that's the kind of

1 ammunition that was used. And in the case of a
2 rim fire cartridge, the primer is located around
3 the edge of the head of the cartridge.

4 And we may also have, in other weapons,
5 a center fire. In that instance, the primer is
6 located in the center of the head or the end of
7 the cartridge.

8 Q. All right. And you began to explain, I think you
9 did, on how the cartridge is actually fired. So
10 let me ask you, then, what happens to the bullet
11 as it is propelled down the barrel and out toward
12 its intended target?

13 A. Well, we have to know where the bullet starts
14 out. Of course, it's in the cartridge. But in
15 the weapon, the cartridge is going to be
16 chambered or located right at the end of the
17 barrel of the weapon.

18 The muzzle of the weapon is the very
19 front and most portion of that barrel. And at
20 the back of the barrel will be a part of the
21 barrel that's called the chamber. And it's
22 designed to receive a cartridge. When the
23 cartridge is fired, the bullet is projected or is
24 expelled from the cartridge and into the barrel.

25 If the gun is going to work properly

1 that barrel has to be sealed by the bullet. That
2 is, no gases can escape around the sides of the
3 bullet. And so the bullet, as it comes down the
4 barrel of the gun, is in contact with that inner
5 surface of the barrel. We have, then, the lead
6 surface or the copper jacketed surface of the
7 bullet being scraped by the inside of the barrel
8 of the weapon.

9 Q. All right. What happens to the cartridge when
10 the weapon is fired?

11 A. That's going to be determined by the design of
12 the weapon. Some weapons are designed to keep
13 the cartridge, the fired cartridge casing now,
14 inside the weapon, so that it has to be extracted
15 manually.

16 In other designs of weapons, allow you
17 to extract the cartridge casings in certain ways.
18 We may have what's called a bolt on a weapon that
19 if you actually pull up and back and that will
20 cause the cartridge casing that's been fired in
21 the weapon to be extracted and rejected from the
22 weapon.

23 And, finally, there's a design of a
24 weapon that's very common that's called a
25 semi-automatic design. And, in this instance,

1 the cartridge, when it's fired, the weapon is
2 designed to use the gases, the energy that's
3 created by the explosion of that gunpowder in
4 there, to actually drive back a part of the
5 weapon, extract whole that cartridge casing from
6 the chamber and then there will be another part
7 of the weapon that the cartridge casing comes
8 into contact with that causes the cartridge
9 casing to be ejected from the weapon.

10 And, then, the next step in this kind of
11 weapon is that that same part of the gun that's
12 driven backward and extracts the fired cartridge
13 casing, moves forward again, under spring
14 pressure most of the time, and it pushes the next
15 cartridge that's in the weapon up into the
16 chamber, and at the same time cocks the weapon.

17 So on a semi-automatic weapon, if you
18 fire a cartridge in that weapon, it ejects --
19 extracts and ejects the cartridge casing,
20 chambers the next round, cocks the weapon, and
21 now the gun can be fired by a pull of the
22 trigger.

23 Q. All right. And just so that we're clear, we have
24 had some other terminology used by some of the
25 other witnesses, a phrase called a shell casing.

1 What is the relationship, if any, between a
2 cartridge, and a shell casing, and what have you?

3 A. There's a number of different terms that are used
4 commonly in the public that refer to the same
5 thing. I generally, and in my reports, describe
6 a fired cartridge casing as a cartridge casing.
7 But it can also be called a shell casing. Some
8 people call them hulls, that's generally in
9 shotguns, but it is misused also. If you heard
10 the term shell casing, it's the same thing as
11 what I'm referring to as cartridge casing.

12 Q. All right. Given this process that you have
13 described about how -- what happens to the bullet
14 upon its being fired and what happens to the
15 cartridge casing; what makes firearms
16 identification possible?

17 A. You have heard me describe, I think, that when a
18 cartridge casing or cartridge is fired in a gun,
19 that we have contact between different parts of
20 the gun and the cartridge casing. And, then, I
21 know I described, specifically, that when the
22 bullet passes through the barrel of the gun that
23 it's in contact with that inner surface of the
24 barrel.

25 Whenever there is a contact between

1 either the bullet and the cartridge casing with a
2 part of the gun, we have the opportunity for a
3 marking to be transferred to that item. Let's
4 talk, specifically, about the bullet. When that
5 bullet passes through there and is scratched by
6 the inside of the barrel of the weapon, and I
7 look at that surface of the bullet under
8 magnification in the laboratory, what I'm going
9 to see are a series of scratches. We call them
10 stria. They are actually three dimensional
11 engravings, something more than scratches, in
12 most instances, on the surface of the bullet.

13 When I test fire the gun in the
14 laboratory, I fire it into a water tank and I
15 retrieve the bullets that I fired. I can examine
16 those test fired bullets and demonstrate to
17 myself that I have a pattern of these engravings,
18 of this stria, on that surface of the bullet.
19 And I can compare, test to test, two bullets that
20 I test fired in the weapon and establish that, in
21 fact, when I fire a bullet from that particular
22 weapon there is a pattern I can expect to see on
23 that bullet.

24 And so now I know, having done that,
25 that when I look at a bullet that I don't know

1 what gun it has been fired from, that if I find
2 that pattern on there, then I have the
3 opportunity to draw a connection between the
4 bullet that's been recovered and submitted to the
5 laboratory and possibly the gun that's been
6 submitted too. And that connection is going to
7 be based on the presence of these patterns of
8 markings.

9 With the cartridge casing, they have
10 exactly the same thing going on, and of course we
11 have different parts of the gun that are
12 involved. I will talk about two because they
13 were involved in my examination in this case.

14 I told you that a part of the gun
15 strikes the cartridge and causes it to fire.
16 It's that primer causes an explosion and, of
17 course, the cartridge goes off and the bullet
18 goes away. That firing pin, that piece of metal
19 in the gun that actually strikes the cartridge,
20 has markings on it that were created during the
21 manufacture of that firing pin. And some of
22 those markings can be transferred to the
23 cartridge casing.

24 Again, I test fired the cartridge
25 casing. I don't know when I test fire the gun

1 what parts of the weapon may be marking the
2 cartridge casings in a way that will allow me to
3 come to any conclusion about it, or whether there
4 will be any marks there. I examine my test
5 fires. I will examine the firing pin impression.
6 And under magnification, I may see a pattern of
7 markings in the firing pin impression.

8 And, again, if I do, and can demonstrate
9 that that's occurring with that ammunition on
10 every cartridge casing I fire in there, then I
11 know I have something to look for on cartridge
12 casings that have been recovered in the course of
13 an investigation and maybe tie that into that
14 gun. The other part --

15 ATTORNEY BUTING: I'm sorry, could we have
16 a little bit more question and answer to break it up
17 and follow along. The narrative is rather lengthy.

18 THE COURT: That's a good point.

19 ATTORNEY FALLON: Very well.

20 Q. (By Attorney Fallon)~ We'll develop that a little
21 further as we get into some of the opinions you
22 will offer. But I wanted to have you define
23 another term or two for us, if you would.
24 There's a phrase that I'm sure many people have
25 heard on television and elsewhere called lands

1 and grooves; could you tell us what they are?

2 A. These relate to the inner surface or the inside
3 of the barrel of the modern gun. When they
4 manufacture that barrel, they put grooves on the
5 inside surface of the barrel.

6 And, additionally, when they put those
7 grooves into that surface of the barrel, they
8 turn the tool that they are using to put the
9 grooves in there and give it a twist. We call,
10 of course, the grooves of the barrel are the
11 grooves. The term that's applied to the area of
12 the barrel between the grooves, we call lands, or
13 l-a-n-d-s. Don't know where the term came from,
14 but that historically has been the term applied
15 to that area between the grooves in the barrel of
16 the rifle -- or of the weapon.

17 Q. Okay.

18 ATTORNEY FALLON: Your Honor, I think this
19 would be a good place to break for lunch.

20 THE COURT: All right. Members of the jury
21 we'll take our lunch break at this time. We will
22 resume at 1:00. I will remind you not to discuss
23 the case at all during the lunch break. You're
24 excused at this time.

25 (Jury not present.)

1 THE COURT: You may be seated. Counsel,
2 were you going to be prepared to meet in chambers at
3 1, 1:00?

4 ATTORNEY BUTING: Yes, we could do that.

5 THE COURT: The package that you were
6 expecting came in?

7 ATTORNEY BUTING: Yes.

8 THE COURT: Very well. We'll see you at
9 1:00 then in chambers.

10 ATTORNEY FALLON: Judge, would it be
11 beneficial to have a quick five minute chat right
12 now perhaps?

13 THE COURT: Back in chambers?

14 ATTORNEY FALLON: Yeah.

15 THE COURT: Okay.

16 (Noon recess taken.)

17 THE COURT: Members of the jury, I have
18 been informed that some of you have had questions
19 about whether or not the trial is proceeding on
20 schedule. I discussed that matter with counsel
21 during the break and I have been assured that the
22 trial is proceeding on schedule.

23 And I can also tell you that because of
24 the weather situation today and tomorrow, it's
25 likely that we'll leave early today and we may be

1 well adjourning early tomorrow as well. We'll
2 try to make arrangements to get the bus here a
3 little sooner to accommodate that schedule. At
4 this point, Mr. Fallon, you may resume your
5 direct examination.

6 ATTORNEY FALLON: Thank you, Judge. Good
7 afternoon, sir.

8 **DIRECT EXAMINATION CONTD.**

9 BY ATTORNEY FALLON:

10 Q. I believe we left off with your discussion of
11 lands and grooves. And I just wanted to have one
12 more question on that topic before we move on.

13 And that is, why are there lands and grooves, or
14 how does it come to be that there are lands and
15 grooves in the barrel of the rifle that occur
16 during manufacturing?

17 A. The manufacturers put those in the barrel. And
18 you remember, I described how they will turn the
19 tool that creates the grooves in the barrel.
20 Those are there because when the bullet passes
21 through the barrel, it fills the barrel, engages
22 that rifling, and when it leaves the barrel it is
23 now spinning and that makes the bullet more
24 stable and makes the gun much more accurate.

25 Q. Now, I'm going to have Investigator Wiegert show

1 you some exhibits, sir, as we begin the remainder
2 of your testimony. First of all, I would like
3 Exhibit 247, which I believe it is the rifle.
4 The record should reflect that Investigator
5 Wiegert is handing Exhibit 247 to Mr. Newhouse.
6 And I would ask you, sir, do you recognize that
7 item?

8 A. I do.

9 Q. And what is, for the record, item -- Exhibit 247?

10 A. Exhibit 247 is a .22 caliber Marlin manufactured
11 semi-automatic rifle. Actually known as the
12 Glenfield Model 60. And this was a weapon that
13 was submitted to the laboratory in the course of
14 this investigation.

15 Q. And how is it that you are able to recognize that
16 particular weapon as the one that was submitted
17 to you for examination?

18 A. I mark or, in some cases, with guns in
19 particular, place a sticker on the weapon with
20 the information that associates it with --
21 associates it with our case number and the date
22 that I opened the box that it was in and so on.

23 Additionally, I had also, when it was
24 submitted to the laboratory, I had checked it to
25 make sure it wasn't loaded, and safe to handle

1 and store in the laboratory, before I examined it
2 in the firearms section. I also have a tag on
3 there with that same kind of information on it.

4 Q. And I see you are holding the exhibit, you are
5 pointing to what appears to be a green tag on the
6 trigger guard?

7 A. That's correct.

8 Q. And that is a tag that you affixed to the weapon
9 upon your receipt of it?

10 A. Yes.

11 Q. All right. I would like to have Investigator
12 Wiegert also show you one other item -- well, two
13 other items. Exhibit 250, the shell casings; do
14 you have Exhibit 250 in front of you?

15 A. I do.

16 Q. And do you recognize that exhibit?

17 A. Yes, I do.

18 Q. And for the record, what is Exhibit 250?

19 A. Exhibit 250 is a paper bag, a box, and eventually
20 you get to 11 fired cartridge casings, all of
21 them .22 caliber cartridge casings.

22 Q. And are those the casings that were submitted to
23 you for examination and comparison in this case?

24 A. They are.

25 Q. And, finally, if Investigator Wiegert would

1 provide to you Exhibits 276 and 277. Which one
2 are you holding at the moment?

3 A. I have Exhibit 277.

4 Q. All right. And tell us what Exhibit 277 is?

5 A. Exhibit 277 is a bullet, a bullet fragment if you
6 like, that we designated as Item No. FL when it
7 was received in the laboratory.

8 Q. All right. And Exhibit 276?

9 A. Exhibit 276 is a second bullet. And this one we
10 designated as Item FK when it was received in the
11 laboratory.

12 Q. All right. Were all these items submitted at the
13 same time, or did they come in in different -- at
14 different times?

15 A. They came in at different times.

16 Q. All right. And as a result of which, how many
17 reports did you generate regarding your
18 examination of those items?

19 A. I wrote two reports to describe the conclusions I
20 came to.

21 Q. All right. Let's take them one at a time. We'll
22 start with the first report. At approximately
23 when was that first report prepared by you
24 regarding your findings?

25 A. The first report that I wrote was written on

1 February the 21st of 2006.

2 Q. All right. So let's begin, then, with that
3 report and your examination regarding that
4 report. With respect to that first or initial
5 examination what were you asked to do?

6 A. Well, I had -- I knew that we had submitted in
7 the case a rifle and that some cartridge casings
8 had also been recovered and submitted. I was
9 asked to examine and test fire the rifle, and
10 then to answer the question, determine if I
11 could, whether the cartridge casings that had
12 been recovered had actually been fired in this
13 rifle, or whether they had been fired in some
14 other weapon.

15 Q. All right. All right. Let's begin with the
16 rifle. What was the first thing that you had to
17 do in order to attempt any subsequent
18 comparisons?

19 A. The procedure, the approach to a weapon
20 examination is really the same on just about any
21 gun that I look at. Initially, I'm concerned
22 about whether the weapon is safe to fire. I know
23 I'm going to want to do that.

24 I also want to examine the weapon, as I
25 did in this case, and document various features

1 of the weapon that might allow me to identify it
2 later, or that give me some idea of a possible
3 problem with its function if I examine it
4 closely.

5 Additionally, I'm interested in whether
6 or not there might be, in most cases, some other
7 kind of evidence on the weapon. Just depends on
8 whether it's been examined by someone else or not
9 or whether I'm the first to actually handle it.

10 So, in this case, the first thing I did
11 was to go through the weapon. It had already
12 been through the DNA section. I didn't need to
13 be concerned about any materials or substances on
14 the exterior of the weapon. And so I just
15 documented serial number, caliber, make, model,
16 length of the barrel, various physical
17 characteristics of the weapon.

18 One of the other things that I did in my
19 initial examination is to examine the bore of the
20 weapon, to look down the barrel. For two
21 reasons, one, I want to know that it's not
22 obstructed. And the only way to do that is to
23 look down there and make sure there is not a
24 bullet caught up somewhere in the middle of the
25 barrel.

1 And the other was to look at the
2 condition of the barrel. That gives me some idea
3 of what I might expect to see when I fire it, and
4 in particular what condition the bullet that I
5 recover from test firing it might be.

6 Q. All right. And did you subsequently, then, test
7 fire that weapon?

8 A. I did.

9 Q. And what determination did you make regarding the
10 weapon's functioning capability?

11 A. After I worked my way through the gun, I was
12 satisfied it was working and in safe enough
13 condition to fire. So I went ahead and selected
14 some ammunition from the collection there at the
15 laboratory and actually fired the weapon
16 recovering cartridge casings and the bullets and
17 also confirming that the weapon does function as
18 it was designed to function.

19 Q. All right. And what kind of ammunition did you
20 select for your test firing?

21 A. The cartridge casings that had been submitted,
22 the recovered cartridge casings, were
23 manufactured by CCI, one of the companies that
24 makes ammunition. So I fired, from my
25 collection, three CCI cartridge casings. I'm

1 sorry, three CCI cartridges.

2 Q. All right. And those cartridges contained the
3 bullets that you previously described, in terms
4 of how the weapon operates?

5 A. Yes.

6 Q. All right. And, generally, just for our benefit,
7 what is a bullet? What does it consist of? What
8 is in the bullet?

9 A. Virtually all bullets are going to be either lead
10 composition, or they will be a lead core that's
11 contained within some kind of a copper alloy
12 jacketing. In this case, the bullets that I
13 fired initially in this weapon, particularly for
14 the comparison to and the examination of the
15 cartridge casings that were submitted, were lead
16 bullets.

17 Q. All right. All right. Now, after you determined
18 that the .22 caliber rifle was functioning
19 properly, what did you do with respect to
20 determining whether any of the cartridge casings
21 had been fired from that rifle?

22 A. Well, as I said, I recovered the cartridge
23 casings that I had fired in this weapon. The
24 next step was to compare those to the recovered
25 cartridge casings, those ones that were

1 submitted. And at that moment, or at the point
2 that they were recovered, of course, we didn't
3 know what gun they were fired in.

4 The examination is a microscopic
5 examination. I'm looking at very, very, tiny
6 markings that are placed, as I described earlier,
7 on the cartridge casings, by the different parts
8 of the gun.

9 First thing I do is to look at my test
10 fires, to again assess what expectation I can
11 have of finding markings that are placed there by
12 the gun, what they look like, what patterns I
13 will see. Having done that, I would then, using
14 my microscope again, place one of the cartridge
15 casings that we're wondering whether it was fired
16 from the gun, and one of my test fired cartridge
17 casings, on the microscope, and do a direct
18 comparison, under magnification, of those
19 markings that I see on the cartridge casings.

20 Q. And were you able, then, to make a determination
21 as to whether the casings submitted to you had in
22 fact been fired from that gun?

23 A. Yes, I was.

24 Q. And what conclusion did you reach?

25 A. I was able to determine that all 11 of the

1 cartridge casings that had been submitted had, in
2 fact, been fired in this rifle.

3 Q. And the opinion that all of them had been fired
4 in that rifle, do you hold that opinion to a
5 reasonable degree of scientific certainty?

6 A. I do.

7 Q. And your opinion that the weapon, the .22 caliber
8 Marlin Glenfield 60 rifle, was functioning
9 properly upon its submission to you; do you hold
10 that opinion to a reasonable degree of scientific
11 certainty?

12 A. Yes, I do.

13 Q. All right. I would like to direct your attention
14 then to the second examination that you prepared
15 in this particular case. I want to direct your
16 attention to May of 2006; were you once again
17 asked to conduct an analysis involving that very
18 same Marlin Glenfield rifle?

19 A. Yes, I was.

20 Q. All right. This time, what was the requested
21 task or examination that was expected?

22 A. By now, two bullets, two pieces of metal that
23 looked like bullets, at any rate at that point,
24 had been recovered. I was asked, again, to
25 determine, if possible, whether those two bullets

1 had been fired from this same weapon that I had
2 already identified the cartridge casings as
3 having been fired in.

4 Q. All right. And are those the previously
5 identified exhibits, 277 and 276, which are in
6 front of you?

7 A. They are.

8 Q. All right. And they have the Crime Lab
9 designation Item FL and FK; is that correct?

10 A. That's correct.

11 Q. All right. Let's begin with a closer
12 description, if possible, of the bullet
13 fragments, or suspected bullet fragments that you
14 were asked to examine. First of all, let's begin
15 with Exhibit 276 identified as bullet FK. Tell
16 us, if you can, what the condition of that
17 particular fragment was upon its submission to
18 you for examination?

19 A. Well, the bullet in Exhibit 276 which, again, is
20 our Item FK, is probably -- or would not be
21 immediately recognizable to most people as a
22 bullet. It's in very poor condition. It doesn't
23 look like it did when it was still in the
24 cartridge.

25 ATTORNEY BUTING: Your Honor, I object and

1 move to strike that comment as to what other people
2 would think it looked like. He can give an opinion
3 as to its condition, but he can't express an opinion
4 about whether other people would have recognized it.

5 THE COURT: I think he's talking about its
6 apparent condition. I'm going to overrule the
7 objection.

8 ATTORNEY FALLON: Thank you.

9 Q. (By Attorney Fallon)~ All right. Please describe
10 further the condition of the bullet.

11 A. This is -- has been damaged greatly, no longer
12 looks like a bullet. Of course, having looked at
13 these for 35 years, it does look to me like a
14 bullet that has passed through or has struck some
15 harder object than the bullet.

16 When I examine it in the laboratory
17 initially, I do a number of things. I weigh the
18 bullet. I look at it under the microscope to
19 determine what kinds of, or if any, rifling
20 characteristics might be present on what remains
21 of this bullet.

22 I'm also interested in the bullet
23 composition. I want to -- I want to fire a
24 bullet like that from this gun, for comparison,
25 and so I'm interested in whether this is a lead

1 bullet, or whether this is a lead bullet that's
2 coated with copper, and so on. And all of those
3 things were part of what I documented and
4 recorded in the course of my examination of this
5 item, State's Exhibit 276.

6 Q. And what can you tell us about the bullet. You
7 said you wanted to select one that was similar to
8 what had been submitted to you. So I guess my
9 question is, what would you have selected or --
10 not what would you have -- what did you select
11 for purposes of making a comparison?

12 A. When I did the microscopic examination, it was
13 clear it was a coated bullet and not a lead
14 bullet. It was also clear it was a .22 caliber
15 bullet to me. Additionally, under the
16 microscope, I could see markings that were put
17 there by the rifle, in particular the barrel
18 through which it was fired.

19 Those lands and grooves that I described
20 earlier, in the bullet, leave what we refer to as
21 land and groove impressions. And in this
22 particular item, Exhibit 276, I could identify
23 under the microscope, eight remaining land and
24 groove impressions on that bullet.

25 Q. All right. Was that enough to be able to make

1 any comparisons whatsoever as to whether that
2 bullet was fired from that gun, or any other gun
3 for that matter?

4 A. The next step was to look at that under greater
5 magnification on the microscope. And the fact
6 is, on this Exhibit 276, although I had eight of
7 these land and groove impressions remaining on
8 the bullet, under greater magnification I could
9 see that I had none of the very small detail,
10 those things that make up patterns that I was
11 trying to describe earlier. None of that was
12 present, or at least not enough of it for me to
13 use to come to any conclusion about what gun
14 fired this bullet in Exhibit 276.

15 Q. All right. Now, I need you to explain something.
16 You previously described the bullets you
17 selected, the CCI bullets, as being lead bullets.
18 And then you just made some comment about not
19 lead but coated with a different substance. Can
20 you kind of explain --

21 A. Yes.

22 Q. -- so that we're not --

23 A. Yes.

24 Q. -- confused here?

25 A. Yes. Most .22 caliber bullets, with the

1 exception of .22 magnums, are actually lead
2 bullets. But many of them are coated with a very
3 fine powder of copper, or possibly a copper
4 alloy, that they actually impress into the
5 surface of the bullet. And that is the kind of
6 bullet that we have here in Exhibit 276.

7 That's important to me because I know
8 that if I'm going to compare this to the test
9 fired bullets from this gun, I want to shoot the
10 same kind of thing. So I selected, then, for
11 this second set of examinations with the bullets,
12 an ammunition that, in fact, was copper coated.

13 Q. All right. Although it was a lead bullet, but
14 the coating was not lead, the coating was copper?

15 A. Correct.

16 Q. Okay. All right. So, just so we're clear, were
17 you able to make any comparisons then with
18 respect to bullet FK, Exhibit 276?

19 A. I was able -- or it was limited to a class
20 characteristics comparison, a term I haven't used
21 yet. I knew by examining the bullet in Exhibit
22 276, that it had been fired from a gun
23 manufactured with 16 lands and grooves and a
24 right hand twist. That much information is on
25 the bullet. It's also a .22 caliber bullet.

1 This weapon is a .22 caliber bullet.
2 And in the barrel of this gun are 16 lands and
3 grooves and a right hand twist. However, I can
4 say no more than that about this bullet. And the
5 fact of the matter is, I cannot specify exactly
6 what gun this bullet was fired in, again, because
7 I don't have those small stria, those scratches
8 on the bullet surface, that I can use for that
9 kind of conclusion.

10 Q. All right. So in terms of class characteristics
11 is that a general category, or a specific
12 category, or tell us. I'm not a gun person, so
13 what do I -- what should I take from that?

14 A. It means that, based just on the class
15 characteristics on Exhibit 276, I know it was
16 fired in some gun, among a group of guns,
17 thousands of guns, if you like, tens of thousands
18 of guns, that were manufactured with 16 lands and
19 grooves and a right hand twist, and were
20 .22 caliber. And I can be no more specific than
21 that, based on what we have left on this bullet.

22 Q. All right. And do you hold that opinion to a
23 reasonable degree of scientific certainty?

24 A. I do.

25 Q. All right. Let's direct our attention, then, to

1 the remaining bullet, Item FL, Exhibit No. 277;
2 were you able to conduct an analysis of that
3 particular bullet?

4 A. I did.

5 Q. And were you able to make a determination as to
6 whether Exhibit 277, bullet designation FL, was
7 fired from the Marlin Glenfield .22 caliber rifle
8 in front of you?

9 A. Yes, I was.

10 Q. And what conclusion were you able to reach?

11 A. In this case, I was able to be more specific.
12 And, in fact, because of markings on the bullet
13 in State's Exhibit 277, I was able to conclude
14 that this bullet had been fired from this
15 specific gun.

16 Q. All right. So Exhibit 277 had been fired from
17 Exhibit 247?

18 A. Yes, that's correct.

19 Q. All right. Now, how is it that you were able to
20 make that determination?

21 A. Again, we have to refer to, or talk about what's
22 present, at high magnification, on the surface of
23 that bullet. And on this bullet I have, in fact,
24 patterns of scratches, or patterns of stria,
25 present on a number of different areas of the

1 bullet, even in the condition it's in, that I
2 could -- could relate to, that I could identify
3 with the same patterns on the test fired bullets.

4 Furthermore, the patterns that were
5 there, the markings that I see, are patterns that
6 I recognize as being more than could be expected
7 to be seen, more than we would ever see on a
8 bullet that was not fired from the same gun. It
9 has to exceed what I recognize as those -- those
10 set of markings that we expect to see on two
11 bullets not fired from the same gun.

12 So when I looked at State's Exhibit 277,
13 the pattern I saw there, the quality and quantity
14 of the pattern correlations and matchings that I
15 saw there, was enough for me to come to a
16 conclusion that, in fact, the reason they had the
17 same pattern on this bullet and my test fired
18 bullets, is because it had been fired from the
19 same gun.

20 Q. All right. Is there -- Does that mean it could
21 not have been fired from any other gun?

22 A. It does.

23 Q. The opinion that Exhibit 277, item designation
24 FL, was fired from Exhibit 247, the Marlin
25 Glenfield, Model 60, .22 caliber rifle; do you

1 hold that opinion to a reasonable degree of
2 scientific certainty?

3 A. I do.

4 Q. The opinion that it could not have been fired
5 from any other gun; do you hold that opinion to a
6 reasonable degree of scientific certainty?

7 A. I do.

8 Q. Did you prepare two brief reports and a disc
9 summarizing your findings?

10 A. The findings with regard to the bullets was on a
11 report dated May 10th of 2006. I also had taken
12 photographs of some of what I saw under the
13 microscope and had had those transferred to a
14 disc.

15 Q. All right.

16 ATTORNEY FALLON: For the record, your
17 Honor, counsel has seen them, I have had the two
18 reports marked and a disc marked to complete the
19 testimony, would offer them into evidence, and
20 tender the witness for cross-examination.

21 THE COURT: Any objection?

22 ATTORNEY BUTING: No objection.

23 THE COURT: All right. The exhibits are
24 received.

25 ATTORNEY BUTING: Give us the numbers,

1 please.

2 ATTORNEY FALLON: Certainly, 418, 419 and
3 417, the disc.

4 **CROSS-EXAMINATION**

5 BY ATTORNEY BUTING:

6 Q. Good afternoon, sir.

7 A. Good afternoon.

8 Q. Let me go back a little bit and maybe have you
9 explain to the jury in a little bit more detail a
10 few things. Okay.

11 A. Certainly.

12 Q. About your field. Now, one thing, sir, you are a
13 little bit far from the microphone. If you could
14 pull it toward you, or pull your chair up, or
15 lean forward, I think that would probably help.

16 A. Okay.

17 Q. That's much better. Thank you. You say you
18 belonged to this organization for 20 years now,
19 the Association of Firearms And Toolmark
20 Examiners; is that right?

21 A. Probably more than that, but at least 20 years.

22 Q. Okay. And that's a reputable organization, it's
23 been around a long time?

24 A. Yes, it has.

25 Q. And if you have been a member that long, I assume

1 you have kept up with -- do you get sort of a
2 regularly monthly publication?

3 A. Yes, we do.

4 Q. Do you get the AFTE Journal?

5 A. It's a quarterly journal but, yes, I do.

6 Q. Okay. And that's a journal that is -- where
7 articles are published, people in your field
8 share studies and information with other people
9 such as yourself?

10 A. That's correct.

11 Q. And I take it that to belong to that organization
12 you -- there's certain guidelines or
13 qualifications that you have to have?

14 A. Yes, there are.

15 Q. It's not just pay your money and you are in,
16 right?

17 A. No.

18 Q. Okay. And you abide by those guidelines and
19 qualifications, right?

20 A. I had to satisfy them to become a member, yes.

21 Q. Right. And you continue to abide by whatever
22 requirements are recommended, or the
23 recommendations of that organization, right?

24 A. Beyond maintaining the work that I do in the
25 field, and then paying the fee every year, there

1 are no other requirements to receive the journal.

2 Q. Okay. But you do read the literature?

3 A. Yes, I do.

4 Q. All right. And you also said that your lab, the
5 Crime Lab, is a member of ASCLD, that's
6 A-S-C-L-D, often referred to by people like you
7 as ASCLD?

8 A. I don't think I said that, but we are ASCLD lab
9 accredited.

10 Q. I thought you did say that actually, but I may be
11 wrong.

12 A. No.

13 Q. And is that true of the entire Crime Lab, all the
14 different units are A-S-C-L-D qualified?

15 A. No.

16 Q. Your unit, though, is ASCLD accredited, right?

17 A. Yes, it is.

18 Q. And in order to become accredited by that
19 organization which, again, we had some testimony
20 about it, but that's a different witness, that's
21 actually an Association of Crime Lab Directors,
22 right?

23 A. Yes.

24 Q. And they do a number of things in terms of
25 reviewing the procedures and the qualifications

1 of the people in the lab, whatever unit they are
2 accrediting, before they get -- before they give
3 out that accreditation, right?

4 A. That's correct.

5 Q. And that includes they review your protocols for
6 tests and examinations, right?

7 A. Yes, they do.

8 Q. And proficiency tests as well?

9 A. Yes.

10 Q. Do you do proficiency tests?

11 A. Yes, I do.

12 Q. What sort of proficiency tests does a firearm and
13 toolmark person do?

14 A. We do probably two a year. One of them will be a
15 firearms case, may be a set of bullets that we
16 have to determine were fired from the same gun or
17 maybe cartridge casings. We're also asked, once
18 a year, to do a proficiency test that's focused
19 on more specific toolmark kind of comparison.
20 Might be a bow cutter case. Might be a mark made
21 by a screw driver.

22 Q. Okay. So, it's not just bullets, it's also other
23 tool markings?

24 A. Yes.

25 Q. And then you also have a protocol for different

1 types of examinations that you do?

2 A. We have procedures in place that relate to how we
3 perform certain examinations.

4 Q. Okay. And one of the things that ASCLD requires,
5 and I believe the other association, the AFTE, is
6 that you make sure that you have proper
7 documentation of what you examine, right?

8 A. That's correct.

9 Q. That can include notes, right?

10 A. Yes.

11 Q. Photographs?

12 A. Yes.

13 Q. And peer review, right?

14 A. That's correct. That's an element of our
15 examination process, yes.

16 Q. Okay. And, in fact, the guidelines, I believe,
17 require that -- that your documentation be good
18 enough that another person in your absence can
19 look at it and come to the same conclusion,
20 right?

21 A. That's correct.

22 Q. And when you do these examines you actually have
23 -- you are supposed to have two people look at
24 it. You look at it, come to a conclusion, and
25 then you have another person look at it up here,

1 and come to the same conclusion?

2 A. That's correct.

3 Q. And that's part of your protocol?

4 A. Yes, it is.

5 Q. Okay. Now, when we talked about proficiency
6 tests, you are aware, I assume, of a gentleman by
7 the name of Alfred Biasotti?

8 A. Yes, I am.

9 Q. You probably have been questioned about this
10 gentleman before, haven't you?

11 A. Not specifically that I recall, no.

12 Q. Okay. Then I will be the first. He's a very
13 well-known -- he produced a very well-known study
14 in your field, correct?

15 A. Yes, he did.

16 Q. And forgive me for a moment while I get the
17 actual name of it, it's called a Statistical
18 Study of the Individual Characteristics of Fired
19 Bullets; does that sound right?

20 A. Yes, it does.

21 Q. Actually, that was a study done quite some time
22 ago, 1959, but still is relied on in your field?

23 A. Yes.

24 Q. All right. And what he concluded is, that among
25 other things, that in the real world, there's no

1 such thing as a perfect match when it comes to
2 cartridges and bullets, correct?

3 A. That's correct, if by that you mean everything
4 lines up, yes.

5 Q. Right. And in his study -- Actually, his study
6 echoed the findings of another study that found
7 only 21 to 38 percent of the marks will match up
8 on bullets fired from the very same gun; does
9 that sound right?

10 A. That sounds like an appropriate range if we're
11 talking about percent match.

12 Q. Okay. So that when you are looking at these
13 bullets and you are calling something a match,
14 you are doing so with only 21 to 38 percent of
15 those markings matching up?

16 A. If, in fact, on the particular bullets I'm
17 looking at, that may be the case that if we look
18 at percent matching, that may be that only
19 21 percent match.

20 Q. All right. And yet you could still call it a
21 match?

22 A. That's correct.

23 Q. Now, part of that is because, in your field, your
24 opinion is really what we would call subjective,
25 correct?

1 A. There are subjective elements to it. There are
2 objective qualities to the examinations and
3 conclusions as well.

4 Q. Well, let me just give you an example. You
5 mentioned in this case there were bullets with 16
6 lands and grooves, the rifle you believe had 16
7 lands and grooves, right?

8 A. That's correct.

9 Q. There's no magic number when you are looking at a
10 bullet that says you have to have 14 -- you have
11 to see 14 of those match up in order to call it a
12 match, right?

13 A. No, the number of actual groove impressions or
14 land impressions that remain on a bullet that
15 we're examining does not have to be a certain
16 number of the original number that were there.

17 Q. Okay. So you are a little bit -- you're probably
18 a little bit familiar with fingerprints for
19 instance, right?

20 A. Not really too much. In terms of identification,
21 no.

22 Q. Okay. So you are not aware of how many standards
23 they have, about how many points of similarity
24 have to match up before they can make a call?

25 A. I'm aware that they have -- or that some agencies

1 operate under the need or requirement to have a
2 certain number of points.

3 Q. Okay. But in your field there is no quantitative
4 number or guidelines that you have to follow
5 before you call something a match or not a match?

6 A. There is no required guideline. There are
7 guidelines established that have been published
8 in the literature of that same journal we have
9 been talking about.

10 Q. Okay. But it's not something that you follow?

11 A. No, that's not true.

12 Q. Well, it's not something that you -- do you have
13 a specific number that have to be -- you have to
14 get to in terms of number of lands and grooves
15 before you can call something a match?

16 A. I have a certain number of matching stria. We're
17 going to have -- I'm going to have to use
18 terminology I haven't defined yet.

19 Q. We'll define stria a little bit more later. But
20 just tell me what is it, you have a specific
21 number?

22 A. Again, there's nothing regarding how many land
23 and groove impressions must be on a bullet. The
24 only requirement is that we have a pattern of
25 markings on the bullet or the cartridge casing

1 and that they satisfy some kind of minimum
2 requirement.

3 Q. But the minimum requirement is a subjective
4 requirement. It's your opinion that there's
5 enough to call a match, right?

6 A. No, that's not correct.

7 Q. Is there a specific number you must have, you
8 know, 40 particular stria in order to call it, or
9 what?

10 A. There are -- And, in fact, Mr. Biasotti, in that
11 treatise that you named a moment ago, there are a
12 certain number of stria that have been identified
13 and that we recognize as a number, beyond which,
14 we know we will not see that amount of
15 correlation in a non-match type of comparison.

16 That's going to require a little
17 explanation probably, but the point of what I'm
18 trying to say is that Mr. Biasotti, in fact, with
19 that paper, was the one who first defined it,
20 that there are and we can talk about minimum
21 criteria of consecutive matching stria or
22 markings and treat that as a threshold, above
23 which we can be sure, statistically, that this is
24 an identification.

25 Q. Well, tell us, what is the minimum? What's the

1 number? Is there a number associated with the
2 minimum?

3 A. Yes, there is.

4 Q. What is it?

5 A. When we're talking about a three dimensional
6 stria comparison, if you look under the
7 microscope, the markings I'm looking at, as I
8 alluded to earlier, I think are not just
9 scratches, they actually have depth. They have
10 width. They have that three dimensional element
11 to it. So we're not just counting lines.

12 When I'm performing this kind of a
13 comparison, the all important question is, of
14 course, when do I know I have enough for an
15 identification. Mr. Biasotti's research,
16 followed up by any number of other three or four
17 other important papers over the last few years,
18 have defined that minimum criteria. And it's
19 available for examiners to use, if they wish, to
20 rely on it.

21 In response, what the actual number is,
22 when I'm looking at three dimensional patterns of
23 marks on bullets, or any toolmark for that
24 matter, and we're talking about stria, that if I
25 have two consecutive groups of three marks, or a

1 single run of consecutive markings that number
2 six, or more than that, of course, this is a
3 minimum conservative criteria again, then I can
4 be assured, again, based on these studies that
5 have been published in the AFTE Journal and that
6 all of these researchers have completed, I can be
7 assured that, in fact, that is not possible with
8 two bullets fired from different guns.

9 When I see that minimum criteria or one
10 more, I can be assured, based solely on that,
11 that those two bullets had to have been fired
12 from the same gun in order to observe that set of
13 matching stria.

14 Q. All right. Let me -- Jumping around a little bit
15 here, but as long as we're on this topic, tell
16 us, what was the number you found for Item FL in
17 this case?

18 A. If we look at Item FL and we look at the
19 photographs, a little more specifically later if
20 you want to, you will see one run on, I believe
21 it was groove impression number three, of
22 approximately -- not approximately -- of six
23 consecutive stria. What I was trying to remember
24 was whether there were actually seven or not.
25 But at any rate, we have at least six consecutive

1 stria. And, again, that is the minimum criteria
2 that would allow me, based solely on what I'm
3 seeing in that one groove impression, to come to
4 the conclusion that it was fired from this
5 particular gun.

6 Q. And you are stating that from your memory; is
7 that right?

8 A. Well, I have reviewed my case notes and my
9 photographs.

10 Q. Okay. I'm going to show you Exhibit 420, if you
11 could identify that for us, please.

12 A. Exhibit 420 is a worksheet that I used to
13 document the cartridge casings, or my examination
14 of the cartridge casings.

15 Q. And that worksheet has information that you fill
16 out, it's sort of a graph, or actually more like
17 a chart, and it's where you make note of a number
18 of things, right?

19 A. That's correct.

20 Q. And nowhere on this document do you indicate
21 anywhere what you just testified to to the jury,
22 is it?

23 A. That's correct.

24 Q. What it does say, though, is this particular
25 worksheet includes both -- well, let's put it up

1 on the ELMO. You can see it from the screen, I
2 believe, from where you are sitting. Actually, I
3 marked the wrong exhibit. Let me give you
4 another one.

5 (Exhibit No. 425 marked for identification.)

6 Q. Just to clarify for the jury here, look at
7 Exhibit 425 for a minute.

8 A. Okay.

9 Q. You said you did this on two different dates?

10 A. That's correct.

11 Q. One date you did the cartridges. The first one I
12 gave you, actually, was the worksheet for the
13 cartridges.

14 A. Cartridge casings, yes.

15 Q. So, let me direct your attention now to 425
16 instead, which is the worksheet from the bullets,
17 correct?

18 A. That's correct.

19 Q. Okay. Let's put that up. All right. We have
20 got Exhibit 425 up on the screen. Let me zoom
21 out a little bit so we see the whole thing. And
22 at the top there's a chart that you fill out that
23 includes some numerical types of information,
24 right?

25 A. Some of it are measurements of the bullets that I

1 made, yes.

2 Q. Okay. And this includes both Item FL and FK,
3 right?

4 A. Yes, it does.

5 Q. And for both of them you indicate .22 caliber; is
6 that right? Is that what that says?

7 A. Yes.

8 Q. It doesn't say .22 caliber long either does it?

9 A. No.

10 Q. There's a difference, right.

11 A. The dimension that you see there, the 0.22 inch,
12 is approximately the diameter of the bullet.

13 Q. Okay. Doesn't tell you whether it's a
14 .22 caliber long, .22 caliber short, or plain old
15 .22 caliber, does it?

16 A. Just tells me it's a plain old .22 caliber and
17 just that measurement does not allow me to
18 conclude whether it's a .22 long, short, long
19 rifle.

20 Q. Well, in this particular instance, with FL and
21 FK, were you able to conclude, from looking at
22 the bullet alone, whether this was a .22 caliber
23 long, short, or plain old .22 caliber?

24 A. Are we talking about FL or FK, I'm sorry.

25 Q. Let's look at FL.

1 A. Okay. FL, the other characteristic of the bullet
2 that might allow me to determine and distinguish
3 a long from a long rifle and from a short is the
4 weight of the bullet. The weight of the bullet
5 there is 19.7 grains. And the weight of the
6 bullet when --

7 Q. We're talking about this column right here,
8 right?

9 A. That's correct.

10 Q. Okay.

11 A. The weight of a long rifle bullet is generally
12 around -- it's 40 grains. There is a few
13 variations in that out there the manufacturers
14 have produced. A .22 short bullet, I honestly
15 don't recall what the weight of those are, but
16 they are much less than that, than 40 grains.
17 The 19.7 grains is clearly -- because of the
18 condition of the bullet, which I also observed, I
19 recognize I'm missing parts of the bullet. And
20 so I don't see that 40 grain weight that you
21 would expect from a .22 long rifle.

22 Q. Well, but you don't know what you have got,
23 whether it's a .22 long or not, so you don't
24 really know what the weight is supposed to be?

25 A. Based on the weight, no, I don't know.

1 Q. So, there's really nothing you can tell from this
2 bullet whether this is a .22 long or not, right?

3 A. Well, that's not true. I know it's not a .22
4 short, because if I had 20 grains of a .22 short
5 bullet I would have more of the bullet --

6 Q. Okay.

7 A. -- there than I have.

8 Q. Fair enough. Fair enough. But can you tell the
9 difference between a long and a short, just from
10 this bullet?

11 A. The difference between a long rifle and a -- or
12 I'm sorry, a long and a short, or a long rifle
13 and a short?

14 Q. Right.

15 A. There's two different things. I can't tell the
16 difference between a long rifle and a long. I
17 can tell the difference here between a long rifle
18 and a short, and a long and a short.

19 Q. All right. Well, let's not get bogged down on
20 that. As long as you talked about the weight,
21 let's talk about that. If it is a long, .22 long
22 caliber, a full bullet would be about 40 grains,
23 right?

24 A. Again, I don't recall the weight on a .22 long.

25 A .22 long rifle is 40 grains.

1 Q. Okay. And in this instance then, Item FL would
2 be about -- only about half of that, correct?

3 A. That's correct.

4 Q. And Item FK is actually about three-quarters of
5 it, right?

6 A. Yes, it is.

7 Q. So Item FK is actually more -- a larger fragment
8 than FL?

9 A. More of the original bullet is present in FK.

10 Q. Okay. Now, third column over is -- TWT means
11 twist. It's a right hand twist, both of them,
12 right?

13 A. Yes.

14 Q. The next one is lands and grooves. And it says
15 11 of 16 for the first one and 8 of 16 for the
16 second one, right?

17 A. Eleven remaining and sixteen original and eight
18 remaining, yes.

19 Q. Okay. All right. And then over by the grains,
20 it says coated, that explains the -- that
21 particular type, right?

22 A. Yes.

23 Q. And in the base construction, concave coated for
24 both?

25 A. Yes.

1 Q. And I can't read that last column; what is that?

2 A. That's an indication that I marked the container
3 in which the bullet was received, but I did not
4 mark the bullet.

5 Q. Okay. Just the container. And then down below
6 you have some handwritten notes. First part is
7 packaging, fairly routine. And then below that
8 you have got FL. It says no markings in the land
9 impression, correct?

10 A. Correct.

11 Q. That means the land portion of the barrel is
12 making no impressions on this particular bullet
13 that you can tell.

14 A. It means that, on this bullet, I have no markings
15 in the impression made by the land.

16 Q. Fine. So you are left with the grooves. And you
17 do have useful groove -- useful markings in the
18 groove impression, test to test, comparisons
19 typical of coated .22 caliber bullets, right?

20 A. Yes.

21 Q. But, again, nothing in this document records any
22 kind of minimum number that you testified about
23 earlier?

24 A. That's right.

25 Q. And the determination, let's just get back to

1 that for a moment. The whole determination of
2 whether you are seeing these little scratches or
3 stria or you are not, it requires a subjective
4 eyeball opinion, right?

5 A. Certainly requires an evaluation of what's
6 present there and the judgment about what that
7 means, yes.

8 Q. And you are looking at these like two -- is this
9 a comparison microscope with two fields?

10 A. Yes, it is.

11 Q. So you have got a test bullet in one and the
12 evidence bullet in the other?

13 A. That's correct.

14 Q. And then you are looking through this microscope
15 and you are making an eyeball comparison based on
16 your judgment, experience, and what not, right?

17 A. Exactly.

18 Q. Sort of like used to be done with hair
19 comparison, microscopic analysis; are you
20 familiar with that?

21 ATTORNEY FALLON: Objection, no foundation,
22 argumentative, and speculation.

23 Q. (By Attorney Buting)~ Well, are you familiar with
24 that field?

25 ATTORNEY FALLON: Could we have a ruling on

1 the objection before counsel starts asking more
2 questions?

3 THE COURT: Well, I'm going to sustain the
4 objection. I will let him ask the next question, if
5 he is familiar with it.

6 ATTORNEY BUTING: I meant to withdraw and
7 rephrase, is what I was trying to do.

8 Q. (By Attorney Buting)~ Are you familiar with the
9 field of hair comparison, microscopic analysis?

10 A. Familiar is one thing, I have no expertise in
11 hair comparison.

12 Q. I understand, but you are aware -- I mean you
13 have been in Crime Labs for 30 years, right?

14 A. Yes, I have.

15 Q. And you are aware that that was a field, forensic
16 field, that was offered by Crime Labs for many
17 years, right?

18 A. It was a comparison or examination that was
19 performed for a long time, yes.

20 Q. And it is no longer, right?

21 A. I'm satisfied that some laboratories may still be
22 -- are probably still performing hair
23 comparisons.

24 Q. Generally, it's been discredited, however?

25 ATTORNEY FALLON: Objection.

1 Q. (By Attorney Buting)~ If you know. If you know.

2 A. Certain elements, certain conclusions that are
3 based on a hair examination certainly are
4 discredited.

5 Q. All right.

6 A. Hair examination itself, done properly,
7 interpreted correctly, has not been discredited.

8 Q. To your knowledge. But you are not an expert in
9 that field, right?

10 A. I'm not an expert in that field.

11 Q. So, this eyeball comparison that you are making,
12 this judgment, just so we're clear, a difference
13 between objective and subjective, let's use some
14 other types of tests that your Crime Lab does.
15 DNA, for instance, would you agree that DNA is a
16 more objective test than yours?

17 A. No, I would not.

18 Q. All right. You are aware that DNA, though, the
19 test that comes up with specific numbers and
20 genetic markers, and it either matches or it
21 doesn't, right?

22 A. They produce statistics that give them
23 probabilities.

24 Q. But before you even get to that, they have to
25 determine whether something is completely

1 excluded, whether it just can't be, it doesn't
2 match, right?

3 ATTORNEY FALLON: Your Honor, I'm going to
4 interpose an objection again, the witness is not
5 trained in DNA. There is no foundation for these
6 questions.

7 THE COURT: I'm going to sustain the
8 objection.

9 Q. (By Attorney Buting)~ Is it your opinion that
10 your field of forensics is just as objective as
11 DNA; is that your opinion?

12 ATTORNEY FALLON: Objection. Same
13 objection.

14 THE COURT: Without more foundation, I
15 agree. The objection is sustained.

16 Q. (By Attorney Buting)~ Beyond this minimum number
17 that you -- or description that you have given
18 us, there's no particular number at which a
19 perfect match can be declared; is that right?

20 A. I would never declare a perfect match, because I
21 have never seen one and I don't need more than
22 the minimum criteria that have been specified in
23 the research and the literature that's been
24 published.

25 Q. And is that a specific written protocol of your

1 department in the lab?

2 A. Absolutely not.

3 Q. There is no protocol on how to -- or what's
4 required in order to make a match, is there?

5 A. That is not described in our procedures, no.

6 Q. What is described is that you have to document
7 whatever it is you are examining, right?

8 A. We're required to document our comparisons. I do
9 that with photography.

10 Q. Okay. And you also -- And you always make sure
11 there is another person who looks at the same
12 thing, so it's a peer review?

13 A. That's correct.

14 Q. Okay. Going back just a minute to some of the
15 basics of your field. This kind of testimony, or
16 this kind of analysis, has been going on for many
17 years, early in the 19th century, or something
18 like that, right?

19 A. Mid to late 19th century, I believe.

20 Q. And originally, one of the bases (sic) for it
21 was that at that time firearms were hand-forged
22 or handmade, by and large, right?

23 A. Many of them were, certainly. Certainly all of
24 them were at the beginning.

25 Q. Sure. And by doing that handmade process, there

1 were many more unique kind of markings,
2 scratches, features inside of a rifle barrel at
3 that time, right.

4 A. Probably not correct, no.

5 Q. Well, all right. Would you agree with me that
6 modern manufacturing of guns has made guns more
7 uniform from one particular gun off the line than
8 to the next, same manufacturer.

9 A. No, that's not true.

10 Q. Okay.

11 A. In terms of what I'm looking at for
12 identification, no.

13 Q. Well, let's just talk about the lands and the
14 grooves for a minute. All right. The way a
15 barrel is made these days, most often is it's
16 cast.

17 A. No.

18 Q. Is it forged?

19 A. Forging would be part of the process of creating
20 the metal blank that's used to create the barrel.

21 Q. Okay.

22 A. Forging has nothing to do with the inside of the
23 barrel and the process that creates the lands and
24 grooves inside that barrel.

25 Q. But the process that drills the barrel open,

1 hollow, is a mechanical process?

2 A. Yes, it is.

3 Q. And it's done by a machine, that same machine
4 that makes rifle number one that's coming down
5 the line, rifle number two that's coming down the
6 line, and so forth, right?

7 A. You will have the same tool used to make many,
8 many barrels.

9 Q. Okay.

10 A. You will have the same tool used to put the
11 grooves and the lands in many, many barrels.

12 Q. All right. So there are actually two tools, one
13 that bores out the -- hollows out the tube and
14 then it deliberately -- I mean it's put through
15 another machine that deliberately puts this --
16 these grooves with a twist in it?

17 A. That's correct.

18 Q. And the twist is done in order to make --
19 deliberately make the bullet spin as it's fired,
20 right?

21 A. Yes.

22 Q. And sometimes the more it spins the more accurate
23 it can be to its target?

24 A. Yes.

25 Q. Okay. The Marlin 60, would you agree is,

1 probably is, or is close to, the most popular .22
2 made in the world?

3 A. I really -- I don't know any sales figures or
4 anything. I see a lot of them and suggests to me
5 that it's very popular.

6 Q. Well, you keep -- you have data banks and data
7 bases that you rely on, right?

8 A. For some things, yes.

9 Q. Okay. And from that I assume you learn something
10 about the rifle that you are examining and
11 testing, right?

12 A. Yes.

13 Q. You are aware that the Marlin 60 has been made
14 for 40 -- since 1960, right?

15 A. I don't think I knew when they started making it.

16 Q. Okay. But it's been around for decades, would
17 you agree with that?

18 A. It has.

19 Q. And it's mass produced by Marlin and it's
20 considered a very accurate rifle.

21 A. I believe it would be, yes.

22 Q. Partly because it has those 16 lands and grooves
23 with the twist. Some rifles have much less,
24 right?

25 A. Yes.

1 Q. And so, for that reason, plus the fact that it's
2 relatively inexpensive, it's quite common; would
3 you agree with that?

4 A. Yes, I would.

5 Q. Did you examine any other Marlin 60 firearms for
6 this case?

7 A. I did not.

8 Q. I'm going to read for you a statement from the
9 AFTE, A-F-T-E, Journal, the organization that you
10 belong with. And you tell me if you agree or
11 disagree with this particular statement. Quote,
12 "Currently the interpretation of
13 individualization/identification is subjective in
14 nature, founded on scientific principles and
15 based on examiner's training and experience."

16 A. That's correct.

17 Q. Okay. Let me go back for just one minute. When
18 you talked about class, whether something is part
19 of the same class, which is what you concluded
20 the FK was?

21 A. Yes.

22 Q. There's really sort of three different levels
23 that you could come up with a similarity between
24 bullets that would be class, sub-class, or
25 individual characteristics?

1 A. Yes.

2 Q. So that when a rifle comes from the same class,
3 and certainly any Marlin 60 is the same class;
4 would you agree?

5 A. Assuming that Marlin manufactured all Marlin 60's
6 with 16 lands, grooves, and right hand twists,
7 yes.

8 Q. Okay. So that would make this Item FK could have
9 been fired by any Marlin 60?

10 A. Based on what remains on that bullet, yes.

11 Q. And as you candidly admitted, there are least
12 tens of thousands, if not millions, have been
13 made over the years?

14 A. I suspect not millions, but certainly tens of
15 thousands.

16 Q. Okay. And then the next more unique kind of
17 feature that you could find is called sub-class
18 features, right?

19 A. Yes.

20 Q. And then even more unique, or supposedly unique
21 than that, would be these individual
22 characteristics?

23 A. That's correct.

24 Q. By the way, do you know how many other, if any,
25 firearms are manufactured with 16 lands and

1 grooves and a right hand twist?

2 A. I'm familiar with one other, a .22 caliber pistol
3 manufactured by Jennings. They are no longer in
4 business, but they manufactured some .22 caliber
5 pistols with 16 lands and grooves and a right
6 hand twist, and there may be others as well.

7 Q. And Item FK, is that the sort of ammunition that
8 could also have been fired in a Jennings .22
9 caliber, or not?

10 A. Yes, it is.

11 Q. So, when you talk about class of possible
12 firearms for that bullet, you have to include not
13 just Marlin, but this whole, however many number
14 of Jennings there are, right?

15 A. That's correct.

16 Q. Okay. All right. Now, let me just go for a
17 minute to the cartridges. I'm going to show you
18 what's been marked as -- these are Exhibits 424,
19 21, 22, 23 and 24. Can you identify these?

20 ATTORNEY FALLON: Excuse me, counsel, are
21 those the cartridge photos?

22 ATTORNEY BUTING: Yes, those are all the
23 cartridge, I believe.

24 A. These are copies of photographs that I took of
25 the cartridge comparisons.

1 Q. Okay. Some of them are -- I am going to put one
2 or two of these up on the screen. Some of them
3 are just photograph of the cartridge itself,
4 unfired, and others of one of these comparisons
5 having one side one and one side the other,
6 right?

7 A. Three of them are comparisons of the test fire to
8 one of the cartridges submitted. And the fourth
9 picture is a photograph of the head of one of the
10 cartridges submitted.

11 Q. Let's start with that last one first since -- I
12 will go ahead and leave the photocopies up here
13 with you so you can refer to them as numbers.
14 That's 421?

15 A. I'm sorry. Yes, it is.

16 Q. And that's just a close up photograph of the
17 cartridge before it's fired?

18 A. No.

19 Q. After it's fired?

20 A. This is a photograph of, as I indicate there on
21 the bottom, one of the cartridge casings from
22 what we refer to as Item EI and is in State's
23 Exhibit 250. I took a picture of it just to
24 illustrate what we see when a cartridge casing
25 has been fired, that indentation you see, the

1 rectangular one at 3 o'clock, I guess --

2 Q. Sure.

3 A. -- is the firing pin impression that was created
4 by the gun that fired that cartridge casing.

5 Q. Okay. And so that little rectangular thing at 3
6 o'clock is a very distinctive marking that
7 apparently occurred when these shells were fired?

8 A. That's correct.

9 Q. And this is one of the shells, 11 shells, that
10 was given you in that box, right?

11 A. Yes.

12 Q. Okay. I don't want to belabor this too much, but
13 let's look at Exhibit 424. Is that one of these
14 where you made a comparison side by side?

15 A. Yes, it is.

16 Q. So in this one, you can kind of see the line down
17 the middle and you have got numbers or lettering
18 at the bottom that says test fire from Item DD.

19 A. That's correct.

20 Q. And that shows a very close match even to the
21 unaided -- to the layperson. One can see that
22 this marking over on the right side of the
23 picture matches up very nicely with the one on
24 the left, which is the shell that was found in
25 Item EI, right?

1 ATTORNEY FALLON: Counsel, which Exhibit is
2 this now?

3 ATTORNEY BUTING: 424.

4 ATTORNEY FALLON: Thank you.

5 A. I hope it's clear. From here, to me, it's not
6 real clear, but I will use the pointer. The
7 dividing line, that is, what separates the image
8 of my test faired cartridge casing from one of
9 the cartridge casings in Exhibit 250 here is,
10 really, in the photograph, a discontinuity from
11 the distance you are at.

12 If you could see it more closely you
13 would see there's a very fine dark line there.
14 On the right side of that line is the image of
15 the test fire, on the left side the image of one
16 of these cartridge casings. The area of interest
17 runs from approximately where the pointer is now
18 up to here.

19 And, yes, along that line, there is what
20 appears to me, of course, to be a very clear
21 correlation or agreement of detail that was
22 created by the firing pin of the rifle, the
23 Marlin Glenfield 60 rifle.

24 Q. That's fine. And that's fairly easy, I think,
25 even for myself and the jury to be able to see

1 that similarity. I want to show you now -- did I
2 mark the other ones? Do you have any bullet ones
3 up there too?

4 A. Yes, I do.

5 Q. Are they marked?

6 A. No.

7 Q. All right. Thanks.

8 (Exhibit Nos. 426, 427, 428, marked for identification.)

9 Q. I'm showing you Exhibits 426, 7, and 8, can you
10 identify those?

11 A. Exhibits 426, 427 and 428, these are all copies
12 of, again, photographs that I took of markings in
13 this case on -- that I observed during the bullet
14 comparison and, specifically, of the bullet in
15 Item 277, compared to the test fires from the
16 Glenfield Model 60.

17 Q. All right. I'm going to put one of them up on
18 the screen and you are going to have to tell us
19 what number it is on your --

20 A. That's No. 426.

21 Q. All right. Now, again, this is one of those
22 split screen ones. The one on the right is the
23 test fired bullet and the one on the left is Item
24 FL, right?

25 A. Yes.

1 Q. This is only one portion of the cylindrical kind
2 of bullet, at any rate, that you are looking at,
3 right?

4 A. Just a portion of what's remaining on that
5 bullet.

6 Q. Okay. But it's a fragment, right?

7 A. Very small portion of it, yes.

8 ATTORNEY FALLON: Excuse me, counsel, could
9 we have the witness -- now that we have that up on
10 the screen, identify which photograph goes with
11 that?

12 ATTORNEY BUTING: He did, 426. Is that
13 right?

14 THE WITNESS: Yes.

15 ATTORNEY FALLON: Okay. I'm sorry.

16 ATTORNEY BUTING: That's okay.

17 Q. (By Attorney Buting)~ You've got the pointer, I
18 don't, so I'm going to just point. Would it be
19 fair to say that the indentation, linear areas of
20 this, on either side of this, is what you call
21 the groove?

22 A. What you just pointed to -- here let me use the
23 pointer. This area here that you see defined by
24 two parallel lines, and this area here, which is
25 clearly defined by two parallel lines on this

1 side, but less obviously so here, those are the
2 land impressions as they were created by the
3 lands in the barrel.

4 Q. I see, it's the reverse here, because we've got
5 -- these are impressions?

6 A. Right.

7 Q. So on the barrel, these would actually -- the
8 flatter surfaces on the bullet is what actually
9 is the groove in the barrel; is that right?

10 A. Well, they aren't really flat, but on the bullet
11 they are raised. And they are raised because
12 they are impressions of the groove in the barrel
13 of the weapon.

14 Q. And as I recall, your notes said that the grooves
15 don't give us any particular information in this
16 case; is that what you said?

17 A. I said the land impressions don't have any
18 detail.

19 Q. Okay. And the land ones, again, are point -- are
20 which ones?

21 A. You see in the photograph the label GI No. 1, and
22 that refers to Groove Impression No. 1. I
23 labeled this one No. 1. The land impressions are
24 this area and this area, on each side of the
25 groove impressions.

1 Q. In any event, the test fired bullet on the right
2 shows quite a bit of differences in the land area
3 from the one on the left, does it not? It seems
4 to have some extra ridges or bulges sticking out
5 of some sort?

6 A. There are differences on -- between both bullets.
7 I don't know what you're referring to
8 specifically. There's a great deal of
9 differences on the bullet on the left side of the
10 photograph when you compare it to the bullet on
11 the right side of the photograph.

12 Q. A great deal of difference, right?

13 A. Absolutely, yes.

14 Q. And yet you are saying that this bullet on the
15 right, which was fired from the gun that you had
16 in front of you earlier, is a match with the
17 bullet on the left, the fragment, despite the
18 great deal of differences; is that right?

19 A. I'm saying there's enough detail there, and not
20 in this position in that photograph, but in the
21 composite of positions that we -- some of which
22 we see exhibited in other photographs, for me to
23 conclude that, yes, that bullet in my FL, Exhibit
24 277, was fired from that Marlin rifle.

25 Q. And in doing that you have to discount the

1 differences that you find on the bullet from the
2 test fire?

3 A. I have to understand them, yes.

4 Q. All right. Let's go to the next one and can you
5 tell us which exhibit that is?

6 A. Oh, your number is 427.

7 Q. Okay. 427 is on the screen now. Again, we see
8 -- show us the line on this one, from the
9 microscope, from one to the next?

10 A. It runs here. See the discontinuity,
11 particularly in this area right here, you see the
12 different colors?

13 Q. Right.

14 A. That's the dividing line that separates the image
15 of the bullet in 277 from my test fired bullet.

16 Q. And your test fired bullet, also, there's another
17 vertical line running down the line of it, the
18 center of it, right?

19 A. Yes, that's right.

20 Q. And that's not the microscope line, that's on the
21 bullet.

22 A. That's a design feature of the bullet that
23 remained in tact after firing it.

24 Q. That's not a designed feature that's on the Item
25 FL?

1 A. No.

2 Q. And, again, we see these multiple raised bumps, I
3 call them, on the right in the test fire, but we
4 don't see them on FL; is that right?

5 A. Are you talking about these?

6 Q. Yes.

7 A. Okay. Those are called cannelures. And you are
8 right, they are not, in that photograph, present
9 on the bullet in Exhibit 277.

10 Q. All right. And, finally, this is I think the
11 last photograph that you took comparing Item FL
12 with the test fired bullet. And here it looks
13 like the bullet itself is damaged, the Item FL
14 appears to be significantly damaged, in that
15 area?

16 A. We're at the edge of the useful part of Item --
17 or Exhibit 277, our Item FL bullet. And above
18 that area you see that it is impacted and just
19 been completely obliterated by the impact it made
20 with whatever it struck.

21 Q. Maybe for my benefit, again, tell me what those
22 bumps are again, cannelures?

23 A. Over here, again, on the test fire bullet, I have
24 two sets of cannelures.

25 Q. Would you spell those for the court reporter.

1 A. C-a-n-n-e-l-u-r-e-s.

2 Q. Okay. And on this one, the test fire bullet has
3 two sets of those visible?

4 A. This is the same test fire bullet we were looking
5 at before but, yes, in this photograph there are
6 two sets of them visible.

7 Q. And again, they are not at all visible on any of
8 the three photographs that you took of Item FL?

9 A. No, they are not.

10 Q. By the way, while I'm thinking of it, do you have
11 your CV up there, Item -- or Exhibit 416?

12 A. Yes, I do.

13 Q. Is there a typo on here, third from the bottom,
14 1978 to 1989, California Department of Justice?
15 The one right above it says 1981, you weren't
16 working at both the California Department of
17 Justice and -- should that be 1979?

18 A. There's clearly a typographic error there.

19 Q. And what is it supposed to be, 1979?

20 A. Should be, yes, 19 -- that refers to the -- my
21 last two years there, 1978, and it should have
22 been 19 -- should have gone to 1980 actually. I
23 don't know why it says 1989. Because in 1981 is
24 when I joined the Montana State Crime Laboratory.

25 Q. And did you go right from one job to the next or

1 were you off work for a while?

2 A. No, I left the California Laboratory, I think in
3 May of 1980. And I was -- had opened a business
4 with an acquaintance there in Sacramento that
5 eventually didn't work out. And chose then to
6 take the position in Montana in January of 1981.

7 Q. So by the time you left the California Department
8 of Justice, you had risen to the level of section
9 supervisor, right?

10 A. Criminalist 3, yes, I functioned as section
11 supervisor, yes.

12 Q. But then in your next job, you actually went sort
13 of down the ladder, when you started in Montana,
14 as just a plain old examiner, right?

15 A. They simply classified them differently.

16 Q. You weren't a section supervisor at Montana?

17 A. I was the only examiner there.

18 Q. Okay.

19 A. No one to supervise.

20 Q. Okay. And then, from there, you went to Kansas
21 City in 1988, right?

22 A. That's correct.

23 Q. This is now the third different organization you
24 have worked for, right?

25 A. At that time, yes.

1 Q. And when you left there, you were considered
2 Chief Criminalist of the toolmark section, right?

3 A. I had -- The last two years there, I had assumed
4 the supervisorial (sic) position there, which is
5 that of Chief Criminalist, yes.

6 Q. Again, there must be a typo because it says
7 7/2002 and then it says Wisconsin starts 2000,
8 which is it?

9 A. Well, no, when I left the laboratory there, I
10 left myself a month and a half or two months in
11 between before I actually started here.

12 Q. And you didn't start here as a chief head of the
13 firearms toolmark section, did you?

14 A. Again, I'm the only examiner in the firearm
15 section in the Madison laboratory. My title I
16 think is that of unit leader, for what it's
17 worth.

18 Q. You are the only firearm examiner?

19 A. In the Madison laboratory, yes.

20 Q. Well, how do you ever have anybody review your
21 work?

22 A. I do that using the photographs. And one of the
23 examiners in the Milwaukee laboratory, another of
24 the Wisconsin State Laboratories, of course,
25 reviews my photographs. And on occasion, I will

1 take cases over to him where I believe it's
2 warranted, or where he does. And that's how we
3 conduct our peer review of the examinations.

4 Q. That's how you comply with that part of your
5 protocol that says you always have an examiner --
6 two examiners look at the same thing, right?

7 A. Exactly.

8 Q. Okay. I will use the ELMO for just a minute now.
9 And when you do that, when you have that peer
10 review, you actually have -- I will just use this
11 example, 422 -- put down PC2. You have got two
12 signatures. You have got -- is this the person
13 in Milwaukee who signed off on this?

14 A. Yes, it is.

15 Q. And what's his name?

16 A. Reg Templin.

17 Q. So the first initials on 2/21/06 is yourself,
18 right?

19 A. Yes.

20 Q. And the next one below is -- on 4/13/06 is
21 Reginald Templin, T-e-m-p-l-i-n?

22 A. Yes.

23 Q. And this is the -- one of the cartridge fires,
24 test fires?

25 A. Yes, it is.

1 Q. Okay. Again, same thing with -- this is another
2 cartridge fire, this being Exhibit 423, also
3 initialed by yourself and Mr. Templin, right?

4 A. That's correct.

5 Q. And Exhibit 424, which is another cartridge fire,
6 same initials, I can't tell if it's the same date
7 that Mr. Templin signed, looks like that might be
8 a 13, 4/13/06?

9 A. Yes.

10 Q. Okay. Now, one last one from that cartridge
11 casing, again. Peer reviewed, signed by both
12 yourself and Mr. Templin, right?

13 A. Yes.

14 Q. Now, let's go to the photograph for Exhibit 426.
15 Those your initials on it, dated 5/10/06?

16 A. Yes.

17 Q. Do you see Mr. Templin's initials anywhere on
18 there?

19 A. No, they are not there.

20 Q. Is there anybody besides Mr. Templin who ever
21 reviews your work?

22 A. Occasionally, but not in this case, no.

23 Q. Okay. This, by the way, is bullet Item FL,
24 right?

25 A. Yes, it is.

1 Q. Let's look at 427, another photograph, one of the
2 ones we looked at on the screen, again, Item FL;
3 those your initials?
4 A. Yes, they are.
5 Q. Same date, 5/10/06?
6 A. Yes.
7 Q. Do you see Mr. Templin's initials anywhere on
8 here?
9 A. They are not there.
10 Q. Do you see any other firearm tool examiner's
11 initials anywhere on here?
12 A. No. Mr. Templin is the one who reviewed that
13 one, there wouldn't be anyone else.
14 Q. Do you see Item 428?
15 A. Yes.
16 Q. Also another one for Item FL; do you see your
17 initials on there?
18 A. Yes, they are.
19 Q. Do you see Mr. Templin's initials on there?
20 A. No, they are not.
21 Q. So, we have, in your documentation that you must
22 keep in order to maintain your profile --
23 protocol, no record that any other examiner,
24 besides yourself, looked at Item FL to confirm
25 whether your opinion that this bullet was fired

1 from the gun that was before you earlier, were
2 one in the same, came from the same gun, right?

3 A. The error here is that that's not where he makes
4 or records his approval, his acknowledgment that
5 he reviewed the identification via the pictures.

6 Q. Well, sir, we saw how he made very diligent
7 initials when he reviewed your opinions, your
8 subjective opinion, about the cartridges, right?

9 ATTORNEY FALLON: Objection to the
10 characterization, subjective.

11 ATTORNEY BUTING: He's giving us that,
12 certainly subjective. I'll rephrase it.

13 THE COURT: Okay.

14 Q. (By Attorney Buting)~ On each and every one of
15 the photographs that you took of the cartridge --
16 of your opinion about the cartridges, Mr. Templin
17 signed his initials, did he not?

18 A. Not at the time he reviewed the photographs.

19 Q. Well, they are on these documents, right?

20 A. That's correct.

21 Q. Do you have any documents in that file with --
22 that show the very exhibits we just showed, the
23 photographs with Mr. Templin's name -- or
24 initials for Item FL?

25 A. No, because he had not reviewed the printed copy.

1 He reviewed the computer stored copy.

2 Q. Do you have any documentation, anywhere in your
3 file, that establishes anyone else reviewed your
4 opinion, that Item FL was fired from the gun that
5 was before you?

6 A. That documentation is not in the file.

7 Q. Nowhere in your file?

8 A. That's correct.

9 Q. And so that would be a deviation from your
10 protocol, wouldn't it?

11 A. No.

12 Q. The protocol requires documentation, you told us,
13 right?

14 A. Yes.

15 Q. And documentation including peer review, right?

16 A. Correct.

17 Q. And yet on this very same bullet, Item FL, that
18 we have heard a lot of testimony about, once
19 again, we have something that indicates a
20 deviation from your protocol; is that right?

21 ATTORNEY FALLON: Argumentative,
22 mischaracterization.

23 THE COURT: Well, I'm going to allow him to
24 explain his answer. Why do you feel it's not a
25 deviation?

1 A. The protocol and the approved method that we use
2 for peer review involves my taking those pictures
3 that you saw, some of which you saw up there. I
4 copy them to a location on our server, in our
5 computer network, that is secure, of course, that
6 Reg Templin in Milwaukee has access to. He then
7 -- then I email him, I let him know that, in
8 fact, I have a case there that needs to be
9 reviewed before I can then send a report out, or
10 write the report expressing my opinions.

11 He reviews those photographs. If he
12 agrees that -- that those photographs that we
13 have been looking at, to him support my opinion
14 that that bullet was fired from that gun, or that
15 the cartridge casing was fired from that gun, he
16 then records, with the computer, that A, he has
17 reviewed it, and B, he has approved it.

18 And that, then, is the record of the
19 peer review. The initials that you see on the
20 paperwork which are in our file at the laboratory
21 in Madison, of course, reflects the other part of
22 the procedure and it is part of a review process,
23 but different from the peer review of my
24 identifications.

25 Once or twice a year, it's entirely up

1 to what Reg and I work out, he comes over to
2 Madison, he has to review a certain percentage,
3 approximately 20 percent, of all the cases I have
4 done since he was there last. And this case, the
5 cartridge casing examinations, because I did them
6 first, before he came in April, was one of those
7 case files that he reviewed.

8 As part of the procedure to prove that
9 he's reviewed the case file, he initials all the
10 paperwork there, all the supporting documentation
11 that I put in the case file. And that's why we
12 see this April 13 date on some of those
13 documents, and that's because he came over in
14 April, but the bullet examination was actually
15 performed in May.

16 Q. Okay. I think we understand what you are saying.
17 It's now March 1st, 10 months later, from the
18 Item FL opinions that you came to, right? And
19 you said that you see Mr. Templin twice a year,
20 so presumably you have seen him since April of
21 '03, right -- '06, I'm sorry. April of '06,
22 correct?

23 A. That's correct.

24 Q. Despite that, Mr. Templin has never signed off on
25 any of those exhibits we showed of the

1 photographs that comprise your opinion about Item
2 FL; isn't that right?

3 ATTORNEY FALLON: Objection,
4 mischaracterization, that's not what the witness
5 testified to. He explained the process. This is
6 asked and answered --

7 ATTORNEY BUTING: No, it's not.

8 THE COURT: I'm sensing there might be a
9 misunderstanding here between the questioner and the
10 witness. Explain again --

11 ATTORNEY BUTING: I understand what he's
12 saying.

13 Q. (By Attorney Buting)~ Of the 20 percent -- Are
14 you saying he has reviewed you -- reviewed 20
15 percent of your cases since April of '06?

16 A. Yes.

17 Q. Okay. And you are telling us that it just so
18 happens that of the files that he reviewed during
19 that time, Item FL just wasn't one of the ones
20 that he took a look at; is that right?

21 A. I choose -- From all those cases I worked since
22 he was here last, I choose that 20 percent at
23 random.

24 Q. Oh, you do.

25 A. And it is exactly the case, that this case file

1 was not, when he came over in October, of one of
2 those that I chose.

3 Q. Okay. So you choose the 20 percent?

4 A. I do.

5 Q. And so you come here to this jury today, though,
6 with no documentation of any sort that
7 establishes Mr. Templin has ever reviewed your
8 opinion about Item FL?

9 A. I came here today with -- able to tell you that
10 the procedure that we abide by requires, before
11 this report is approved by a supervisor and
12 allowed to leave the laboratory --

13 ATTORNEY BUTING: All right. Your Honor --

14 A. There has to have been --

15 ATTORNEY BUTING: -- he is not responsive.

16 A. -- a review by Reg Templin.

17 THE COURT: No, it is responsive.

18 ATTORNEY BUTING: Okay.

19 THE COURT: I'm going to allow it.

20 Q. (By Attorney Buting)~ Go ahead.

21 A. There has to have been, before this report is
22 allowed out of there, proof to the supervisor
23 that this case has been reviewed, that this
24 report and my conclusions have been reviewed by
25 Reg Templin, or someone else over in the

1 Milwaukee Laboratory, or this report doesn't get
2 out.

3 The fact that they even saw this report,
4 anybody saw this report is, in fact, proof that
5 Reg saw my photographs, agreed with my
6 conclusions, approved with the review process,
7 acknowledged that those conclusions were correct
8 in his mind, and the report then went out.

9 Q. Okay. And that is your assumption because of the
10 usual way in which reports get approved, right?

11 A. Well, it's not an assumption, it's what I know
12 happened.

13 Q. But you don't have any documentation in the file
14 that confirms that, do you?

15 A. I do have documentation on the computer that
16 could only have been created by him.

17 Q. And you don't have it with you?

18 A. I do not, that's correct.

19 Q. All right.

20 ATTORNEY BUTING: Thank you. That's all I
21 have.

22 THE COURT: Members of the jury, let's take
23 a stretch break before we go back for redirect.
24 Since this is going to be the last witness today,
25 I'm not sending you out for an afternoon break.

1 (Brief stretch break taken.)

2 THE COURT: Mr. Fallon, any redirect?

3 ATTORNEY FALLON: Yes, just a couple
4 questions, thank you, Judge.

5 **REDIRECT EXAMINATION**

6 BY ATTORNEY FALLON:

7 Q. I'm going to ask my colleague to see if we can
8 pull up exhibit -- Well, before we do that, you
9 indicated in cross-examination that there are
10 class characteristics, sub-class characteristics,
11 and individual characteristics, as I understand
12 it; is that correct?

13 A. Yes.

14 Q. All right. Now, with respect to Item FK, I
15 believe your testimony was there were general or
16 class characteristics that were still present on
17 Item FK?

18 A. Yes.

19 Q. Were there sufficient sub-class features or
20 sufficient individual characteristics that you
21 might have been able to rely upon to attempt any
22 identification or comparison?

23 A. On that Item FK, your 276, there were simply not
24 enough of the individual characteristics. I'm
25 not concerned with sub-class characteristics,

1 particularly in this examination. There were not
2 enough of the individual characteristics, some of
3 those little markings that we saw on some of the
4 photographs, on that item, to allow me to come to
5 any specific conclusion about the gun that fired
6 that bullet.

7 Q. All right. Now, I had a couple of questions --
8 There we go. You were asked questions about Item
9 426, Groove Impression No. 1. And you used the
10 words that "between the test fired bullet and the
11 sample bullet" there were, I think you said, "a
12 great deal of difference". First of all, tell us
13 what you mean by that.

14 A. Sure. Well, what we have to understand is
15 there's always differences. The test fired
16 bullets, when I compare those, I expect to see
17 differences. You cannot fire two bullets from
18 any gun and expect to see what we have maybe
19 heard referred to as a perfect match. Those
20 simply just don't exist.

21 What's critical is to be able to
22 understand when the difference you see are, in
23 fact, significant. Do I have to worry about this
24 difference, what I think I described as a
25 cannellure, this set of markings, or this set of

1 depressions that you see vertically over here.
2 Clearly that's a difference, a very obvious
3 difference to everyone.

4 Does it mean anything? It means
5 absolutely nothing. That's a manufacturer's
6 marking that's put on there, has nothing to do
7 with the gun it was fired in. It's not
8 obliterated by firing it through the barrel of
9 the gun. I don't even care whether it's there or
10 not. Clearly, it plays no role. That's an
11 example of the difference, it plays no role, has
12 no influence whatsoever in my evaluating those
13 markings on the bullet to determine whether it
14 was fired from a gun.

15 Other differences, differences in the
16 color here, they may have started out the same
17 color. Differences in color don't mean a thing.
18 What I'm interested in, so long as all of the
19 class characteristics are the same, what is
20 absolutely required of me, is that I recognize
21 what markings we do have here that are
22 individual, that have some significance because
23 they relate to the manufacturing process that
24 created the barrel from which this bullet was
25 fired. I have to know that they are individual,

1 individual or unique, to that particular barrel.
2 That's not an issue in this case either.

3 The other element of this is related to
4 markings that, from where you are sitting I
5 suspect you can't see, I know I can't see them
6 clearly from here. They are in this area right
7 here. And this is the only place in this
8 photograph where I have individual detail that
9 I'm trying to take a picture of to show you the
10 kind of thing I'm seeing under the microscope.
11 This isn't everything I saw under the microscope.
12 This is just an example of what I saw.

13 And I will tell you that in Groove
14 Impression No. 1, that we have some correlation.
15 We have some matching of stria in this location.
16 And, in fact, in this location, however, there is
17 not enough stria there for an identification. If
18 this is all I had on this bullet, I would have
19 had the same conclusion I had with the other
20 bullet here, because that wouldn't be enough. Of
21 course, it isn't all I had.

22 With regard to this photograph, though,
23 the usefulness of this area that I have labeled
24 DI No. 1, was that it gave me a reference point.
25 I have got all this stuff you see on these

1 bullets. I need to be comparing different parts
2 of the bullets -- of one bullet to different
3 parts of the other bullet. It's kind of nice to
4 have a place to start.

5 And there are a pair of stria there that
6 I had observed on my test fires, that when I got
7 done looking at my test fires, I knew I was going
8 to look for those on the bullet and, frankly, see
9 if I got lucky. And they were on the bullet that
10 was recovered in Exhibit 277. And the fact of
11 the matter is, they were there. That's what this
12 photograph exhibits.

13 This is part of the process, but it is
14 not the whole process. And this isn't everything
15 that lead me to the conclusion that this bullet
16 here was fired from that Marlin rifle.

17 Q. So that photograph is an example of what part of
18 the overall analysis?

19 A. It's one element of the examination.

20 Q. All right. Now, those markings, those stria that
21 you are talking about, are those the things that
22 occur during the manufacturing process that
23 actually leaves and makes firearms weapons
24 identifications possible?

25 A. These stria are a result of the manufacturing

1 process.

2 Q. All right. One second. Can you elaborate on
3 that manufacturing process, I know you talked a
4 little bit about it. But now that it's come up
5 here on cross-examination and those markings, how
6 are those markings -- how did they assist you, as
7 the examiner, in making that determination?

8 A. When I'm trying to determine whether a bullet was
9 fired from a gun, it all starts with
10 understanding what the manufacturer is doing to
11 produce that barrel. There are, unquestionably,
12 methods of creating barrels, putting grooves in
13 barrels, that will produce markings that
14 reproduce from barrel to barrel. And, clearly,
15 if you can't recognize it, I can't recognize
16 those when I'm looking at bullets, then there's
17 no way I can come to any conclusions about that.

18 Any firearms examiner has to bring to
19 the examination an understanding of how that gun
20 barrel was made and what creates these markings
21 we see on the bullets. With Marlin, I can tell
22 you exactly how they made that barrel. And
23 because I know what they did, what machining
24 processes they did, or applied to that barrel to
25 create the grooves in the barrel, I also know

1 that the defects, those microscopic defects that
2 were left in the barrel, after that process was
3 done, are going to create these markings on the
4 bullet and they are going to be unique to that
5 barrel.

6 So that's the first step in the process.
7 And I say, looking at and having this gun in
8 front of me, that what I'm looking at that's
9 going to be created by the barrel of the gun, is
10 that unique to that gun. In this case I can.

11 The next step, and the other thing that
12 requires experience and training in the knowledge
13 that a firearm examiner brings to an examination,
14 is an awareness that when we have those markings,
15 you know, I may have 150 of these tiny little
16 scratches and stria scattered around the surface
17 of a bullet. And, clearly, some of them are
18 going to line up. We expect that randomly, if I
19 have two bullets that have been fired from
20 separate guns, obviously, some of these are going
21 to line up. So there's got to be more than just
22 finding lines that line up.

23 And there is, of course. I have to be
24 aware of, part of my background has to have
25 looked at hundreds, or probably thousands by now,

1 of non-matched situations where I'm looking at
2 bullets that I know were not fired from the same
3 gun, trying to force a match, but recognizing
4 what's the -- what kind of agreement am I going
5 to see in a non-matched situation. And then
6 demanding that when I look at something like
7 this, that I have more than that, to come to an
8 identification. That is also critical for a
9 firearms and toolmark examiner.

10 And, finally, we talked about
11 consecutive matching stria a little bit. I
12 didn't get into it in a lot of detail. When we
13 look at our matching lines, there's a number of
14 different ways to evaluate them. I think counsel
15 brought up, from I think Mr. Biasotti's paper,
16 that we might find as much as 38 percent lines
17 matching on a comparison and -- on two bullets
18 that we know were fired from the same gun.

19 Is that significant? Can I look at two
20 bullets, count all the lines and see if I've got
21 38 percent, and if I have 40 percent say, oh,
22 those were fired from the same gun. Not at all.
23 The percent matching is not a good criteria for
24 judging whether a bullet was fired from the same
25 gun. We don't use that.

1 What we have found, because -- and
2 Mr. Biasotti's study that counsel quoted over
3 there, started this all up back in 1959. What we
4 have been able to define and quantify -- I can
5 provide some numbers for you if you like -- is
6 what about matching lines is significant to the
7 examiner when he is trying to make that
8 conclusion.

9 Q. If I can stop you there for a second. These
10 matching lines, those are produced in the
11 manufacturing process?

12 A. These are produced -- they are a result of
13 defects in the barrel.

14 Q. All right.

15 A. These defects create these stria, these lines, if
16 you like, on the surface of the bullet, or on the
17 cartridge casings, as the case may be.

18 Q. And that's how -- that is what they use to make
19 the identification?

20 A. Exactly. And if you could look more closely at
21 this --

22 Q. If I could interrupt you --

23 A. I'm sorry.

24 Q. -- and ask you a couple questions to conclude,
25 then. I think it's important that we make one

1 point that may not be as abundantly obvious as it
2 should be. But when you test fire a bullet in
3 the laboratory, what are the conditions under
4 which that bullet is test fired?

5 A. I want a bullet that has not been damaged. I
6 want a bullet on which the only markings I see
7 were created by the barrel of the gun from which
8 I fired it.

9 And to accomplish that in the
10 laboratory, I fire it into water. I have this
11 big old 9 foot X 2 1/2 foot X 4 foot deep water
12 tank and a port on one end of it. And I fire the
13 bullet into the water. If the water is
14 sufficient to slow it down, it drops to the
15 bottom and then I recover it, from the bottom of
16 the tank. And I know, then, that I have a bullet
17 that's only been marked by the barrel of the gun.

18 Q. All right. Now, is that the way you normally
19 receive a sample from the field?

20 A. Of course not, no.

21 Q. And so that the fact that there may appear to be
22 differences, could it simply be the result of the
23 quality of what is submitted from having been
24 shot in less than ideal situations, compared to
25 what you are doing in the laboratory when you

1 test fire a bullet?

2 A. Almost any bullet I have ever seen recovered from
3 a criminal investigation has struck something.
4 It has struck a shooting victim, it's struck a
5 wall, it's passed through a wall, whatever the
6 case may be. And as you can imagine, this is a
7 lead bullet, even a copper jacketed bullet, they
8 get damaged, broken up into pieces.

9 The kind of damage we saw on that bullet
10 is just very, very common. And so, I'm not
11 concerned about those kinds of differences. They
12 don't matter. What I'm concerned about is
13 whether this detail, this individual
14 characteristics, these stria, have they been
15 obliterated or not by its passage through a wall,
16 or by it's having struck a shooting victim. And,
17 of course, I determine that by examination under
18 the microscope.

19 ATTORNEY FALLON: Nothing else.

20 THE COURT: Mr. Buting, anything else?

21 ATTORNEY BUTING: Yes.

22 **RE CROSS-EXAMINATION**

23 BY ATTORNEY BUTING:

24 Q. All right. It's the same exhibit, but what was
25 the number? Do you have it in front of you?

1 A. Oh.

2 Q. This is groove impression?

3 A. I don't have them anymore.

4 ATTORNEY FALLON: It's 426, counsel.

5 Q. (By Attorney Buting)~ 426 is up there. One thing
6 I just want to make clear, because I don't know
7 that it's clear, on the record, to the jury.

8 These -- What appear are lineal indentations or
9 rows on these bullets are the lands, right?

10 A. The two you just pointed at are land impressions.

11 Q. Okay. Land impressions. And the general
12 impressions that you get here, you are going to
13 get on any rifle that has 16 grooves and lands
14 with a right hand twist, right?

15 A. The characteristics of that, the width of those
16 impressions, would be characteristic of what you
17 would get from a 16 land and groove manufactured
18 barrel.

19 Q. Okay. So, the similarities in this exhibit with
20 these -- on these two sides, of having these rows
21 or lands impressions, would be something that
22 would just be considered a class characteristic?

23 A. Exactly.

24 Q. That would be common with any Marlin 60, or even
25 the Jennings pistol manufacturer, right?

1 A. That's correct.

2 Q. What your opinion is based on are these smaller
3 scratches, or stria, in the groove area, right?

4 A. In this particular case, they happen to be in the
5 groove impression, that's correct.

6 Q. Right. And in your redirect testimony, you said
7 that on this photograph, really, the only area
8 that to you demonstrated enough individual
9 characteristics on this whole photograph, is this
10 central area right here, which would be just to
11 the left of where it says GI No. 1; is that
12 right?

13 A. Only in Groove Impression No. 1, in this
14 photograph.

15 Q. In this photograph, correct. So it's your
16 opinion --

17 ATTORNEY BUTING: Zoom in on that once.

18 Q. (By Attorney Buting)~ So, in your opinion, those
19 two halves are so similar, in this instance, that
20 you are able to consider this as one of your
21 features that make this bullet unique to that
22 rifle that was before you earlier?

23 A. No, that's not what I said.

24 Q. Well, okay, let me ask it this way. Your opinion
25 is that those two sides match?

1 A. Again, I would not use that term for this
2 particular groove impression, no.

3 Q. Well, this one you thought was so unique, or so
4 similar that it was a reference point, right?

5 A. It was similar enough to be a reference point,
6 and that's why I took the photograph of it, yes.

7 Q. Okay. And so we rely on your opinion then, that
8 both sides of this photograph, in that area,
9 match?

10 A. Again, I would not say that. That's not my
11 description of this.

12 Q. Similar. What's the word you want to use?

13 A. What I would say is that in this area I have this
14 pair of stria that were easy to see, and that I
15 could look for and use as a reference point. I
16 was also very clear that, in fact, there is not
17 enough other stria -- and two is not enough -- to
18 support the conclusion that we have an
19 identification here. I had to rely on other
20 detail that -- some of which I tried to
21 photograph in the other photographs.

22 Q. None of which can be quantitated. You can't just
23 look at that and say, you know, quantitatively,
24 these match. Instead, it depends on your
25 subjective opinion to this jury that those two

1 sides match -- or I'm sorry, not match -- similar
2 enough to consider individual?

3 A. With regard to this groove impression, there is
4 quantitatively not enough information to conclude
5 an identification. That information, that more
6 complete quantitative information is present in
7 other areas on the bullet.

8 Q. But in each one of those instances, it is an
9 eyeball subjective conclusion on your part, about
10 whether those are similar -- those two strias are
11 similar or not?

12 A. I have no other way of evaluating it other than
13 looking at it through the microscope, that's
14 correct.

15 ATTORNEY BUTING: All right. Thank you.
16 That's all I have.

17 THE COURT: All right. Mr. Fallon?

18 ATTORNEY FALLON: Nothing.

19 THE COURT: Very well. The witness is
20 excused. Members of the jury, that is going to
21 conclude our session today. I did notify the bus
22 line that they should stop early today. Hopefully
23 they are here already. If they aren't, they will be
24 here shortly.

25 I will remind you again not to discuss

1 the case among yourselves or with anyone else,
2 and not be exposed to any news media accounts of
3 this case. We'll see you at the normal time
4 tomorrow morning.

5 (Jury not present.)

6 THE COURT: You may be seated. Counsel,
7 are there any exhibits that either party wishes to
8 address at this time?

9 ATTORNEY BUTING: I would move -- I would
10 move in, I think all of the exhibits that I
11 introduced, which is 420, through 428.

12 ATTORNEY FALLON: I believe 420 was the one
13 that was mismarked and never really discussed. That
14 was the worksheet on the cartridges. So I'm not
15 sure it has any particular relevance. And in terms
16 of the photograph, or the black and white copies --
17 Well, all right, I suppose we might as well move
18 them in. I was going to say the disc is a much more
19 representative. The CD ROM has all seven
20 photographs that were brought for exemplary purposes
21 and identified as Groove Impression 1, 3, and 6, so.

22 ATTORNEY BUTING: Sure. I have no
23 objection to that. The black and white simply give
24 us a frame of reference on the record from which one
25 is which.

1 THE COURT: So, is somebody going to
2 provide for the record a disc that identifies them
3 by the exhibit number they were given?

4 ATTORNEY STRANG: 417.

5 THE COURT: We have that?

6 THE CLERK: Yeah, 417.

7 THE COURT: Very well.

8 ATTORNEY BUTING: It doesn't identify each
9 individual ones inside. When you open it up, it
10 doesn't have exhibit numbers on it, but these black
11 and white ones will correspond, I think, enough that
12 you can figure it out.

13 THE COURT: Fair enough. What about the
14 420, the one that was --

15 ATTORNEY BUTING: I will withdraw 420. We
16 didn't get into. It was mismarked, actually.

17 THE COURT: Withdraw or simply not offer it
18 for admission, two different things. If you
19 withdraw it, I'm going to give it back to you. All
20 right.

21 ATTORNEY BUTING: Yeah, let's take it back.

22 THE COURT: 420 is withdrawn?

23 ATTORNEY FALLON: That's fine.

24 THE COURT: Are there any other exhibits
25 that need action?

1 THE CLERK: Do you want me to keep a copy
2 of it, that it was marked or doesn't it matter?
3 Normally when it's withdrawn, I always keep a copy
4 of it.

5 THE COURT: Keep a copy.

6 ATTORNEY FALLON: I was just wondering if
7 maybe tomorrow we could get together with the Clerk
8 and see if we can have an overall accounting, see
9 where we are on the exhibit score card.

10 THE COURT: At the beginning of the day or
11 the end?

12 ATTORNEY FALLON: Probably at the end.

13 THE COURT: At the end, when the jury is
14 gone. All right. We'll do that. We'll see you
15 tomorrow morning.

16 ATTORNEY FALLON: Thank you.

17 ATTORNEY BUTING: Do you have 425 up there?

18 THE CLERK: Yes. I'm going to make a copy
19 of this one that's withdrawn. And then I will give
20 it back to you.

21 ATTORNEY BUTING: Okay.

22 (Proceedings concluded.)

(Jury not present.)

At this time the Court calls State of Wisconsin vs. Steven Avery, Case No. 05 CF 381. We're here this morning for a continuation of the trial in this matter, outside the presence of the jury at this time. Will the parties state their appearances for the record, please.

ATTORNEY KRATZ: Good morning, Judge. The State appears by Calumet County District Attorney, Ken Kratz, Assistant Attorney General Tom Fallon, Assistant District Attorney Norm Gahn, all appearing as special prosecutors.

ATTORNEY STRANG: And good morning. At this table is Steven Avery and Jerome Buting and Dean Strang.

THE COURT: All right. Is there a matter the parties wish to take up before we bring in the jurors?

ATTORNEY FALLON: I don't think we have anything other than previously.

THE COURT: Very well. At this time, then, we'll bring in the jury.

(Jury present.)

THE COURT: You may be seated. And, Mr. Fallon, you may call the State's first witness

1 today.

2 ATTORNEY FALLON: Thank you. The State
3 would call Mr. Kenneth Olson to the stand.

4 **KENNETH B. OLSON**, called as a witness
5 herein, having been first duly sworn, was
6 examined and testified as follows:

7 THE CLERK: Please be seated. Please state
8 your name and spell your last name for the record.

9 THE WITNESS: Kenneth B. Olson, O-l-s-o-n.

10 **DIRECT EXAMINATION**

11 BY ATTORNEY FALLON:

12 Q. What do you do for a living?

13 A. I'm a forensic scientist at the State Crime
14 Laboratory in Madison. My main duties are as a
15 trace evidence examiner. And trace evidence
16 includes paint, glass, fibers, explosives,
17 metals, anything that needs chemical
18 identification that doesn't fit into either
19 toxicology or drug analysis.

20 I'm also involved in our Field
21 Response Program, going to crime scenes. And I'm
22 also a bloodstain pattern examiner.

23 Q. All right. And how long have you been employed
24 at the Wisconsin State Crime Lab?

25 A. Almost 27 years.

1 Q. And during that particular time, how long have
2 you been doing or involved in the field of trace
3 evidence analysis?

4 A. That's been my main duty since I was hired at the
5 laboratory.

6 Q. And how long have you been involved in field
7 response operations?

8 A. I have been involved in field response since I
9 have been employed at the laboratory, also.

10 Q. All right. Are you currently a member of a Field
11 Response Team?

12 A. I'm no longer actively on call, but I will assist
13 if they need help at crime scenes.

14 Q. All right. How are you involved in this case,
15 Mr. Olson?

16 A. I was asked to examine certain charred items that
17 was recovered from the Avery property; items that
18 were recovered from a burning barrel and then
19 some charred skull fragments.

20 Q. And why are you here today?

21 A. I'm here to explain the results of my
22 examination.

23 Q. All right. First of all, let's find out a little
24 bit about yourself, please. Can you tell us what
25 your educational background is.

1 A. I have a bachelors of science degree, with a
2 major in chemistry from the University of
3 Wisconsin at Superior.

4 Q. When did you receive that degree?

5 A. In June of 1980.

6 Q. And have you pursued any post-graduate studies of
7 any nature?

8 A. I attended a few courses in business management.

9 Q. All right. As a member of the trace evidence
10 unit, how many individuals are there in that
11 particular unit?

12 A. At the Madison laboratory there are two
13 scientists, myself and my colleague.

14 Q. All right. And as a member of that particular
15 unit, have you attended trainings during the past
16 27 years?

17 A. Yes. When I was hired, I went through an
18 extensive on-the-job training in the different
19 areas that -- in the materials that I analyze.
20 And since being employed at the laboratory, I
21 have attended numerous training seminars and
22 courses in the area of trace evidence.

23 Q. And how often do you attend these types of
24 courses?

25 A. It varies. I suppose it averages once a year.

1 Q. All right. And with respect to your training and
2 experience, have you received any specialized
3 training which assisted you in terms of
4 performing any of the examinations in this
5 particular case?

6 A. In the area of elemental analysis, I have had
7 training using the scanning electron microscope
8 with an energy dispersive x-ray analyzer. And
9 that instrument is used for identifying different
10 elements.

11 Q. And when we're saying elements, can you give us
12 an example or an idea of what kind of elements
13 that you are looking at with this particular
14 instrument?

15 A. Well, we can examine approximately 70 different
16 elements. They include carbon, oxygen, nitrogen,
17 iron, lead, titanium, magnesium, just a broad
18 spectrum of elements.

19 Q. And what are some of the objects and items that
20 you are routinely called upon to examine in your
21 trace evidence unit?

22 A. As far as elemental analysis?

23 Q. Sure.

24 A. I routinely analyze paint samples, using a scan
25 electron microscope energy dispersive x-ray,

1 SEMEDX for short. Use it for glass samples,
2 unknown powders, explosives and questioned
3 metals.

4 Q. All right. Have you testified in courts of law
5 during the past 27 years you have been with the
6 Crime Lab?

7 A. Yes, I have.

8 Q. And approximately, do you have an estimate as to
9 how many times you have been called to testify in
10 cases?

11 A. Approximately 165 times.

12 Q. And have you -- During those times, have you been
13 called upon to express or render expert opinions
14 regarding your findings?

15 A. Yes, I have.

16 Q. And of those 165 times, do you have an idea as to
17 approximately how many of them were trace metal
18 or trace evidence related testimony?

19 A. The majority of my testimony has been in the area
20 of trace evidence. And it's well over 100 times
21 I testified in trace evidence.

22 Q. When did you first become involved in this case,
23 Mr. Olson?

24 A. I first became involved in December of 2005. I
25 was given some items from a burning barrel to

1 examine.

2 Q. And did you examine the contents of a barrel?

3 A. Yes, I did.

4 Q. All right. And what did you find in your
5 examination of the barrel?

6 A. The material that was submitted to me were
7 charred items and in there was a charred portion
8 of a Motorola cellphone, a charred Canon
9 PowerShot A310 camera, and assorted other
10 electronic components.

11 Q. Now, is your laboratory capable of extracting
12 data from those types of items, or not?

13 A. No, I was just told to examine them to see if I
14 could give any information as to what those items
15 might be.

16 Q. What other -- Does your particular trace unit
17 have a supply of products on hand to assist you
18 in attempting to identify severely burned items
19 such as this?

20 A. No, we don't.

21 Q. As a result of which, did you make any
22 recommendations with respect to your initial
23 findings?

24 A. I reported what I found in that charred debris to
25 Investigator Tom Fassbender with DCI.

1 Q. All right. In addition to those items, what
2 other charred debris were you asked to examine as
3 part of this case?

4 A. I was asked to examine some charred skull
5 fragments that had a defect in them that was
6 consistent with high energy projectile.

7 Q. All right. And, first of all, I would like to
8 direct your attention to Exhibit -- Exhibit 391.
9 And I'm going to hand you a laser pointer. Do
10 you recognize Exhibit 391, in particular the item
11 on the right?

12 A. Yes, I do.

13 Q. All right. And what is that?

14 A. Exhibit 391 is a photograph of that charred skull
15 fragment that I examined.

16 Q. All right.

17 A. And the defect, or the hole in the skull, is this
18 area right up in here.

19 Q. All right. And as part of your analysis, do you
20 routinely assign an item number or a Crime Lab
21 identification number to assist you in working
22 with these items?

23 A. Yes, we do.

24 Q. And what item designation was Exhibit 391 given?

25 A. Exhibit 391 was item EJ.

1 Q. All right. I'm going to have Exhibit 392
2 displayed. All right. And do you recognize that
3 item?

4 A. Yes, I do.

5 Q. And what is Exhibit 392?

6 A. Exhibit 392 is the other side of that charred
7 skull fragment. This would be the external
8 surface. And the defect or the hole in the skull
9 is up in this area right here.

10 Q. Now, I see that there is an arrow shaped marker
11 depicted on this outer view of Exhibit 392; do
12 you know what that is?

13 A. Yes, I do.

14 Q. And what is that?

15 A. The triangular shaped marker in Exhibit 392 is a
16 little piece of copper tape that I made into a
17 point of an arrow so it will help me locate the
18 area on the bone that I need to examine with the
19 microscope and to do my elemental analysis.

20 Q. When did you receive these items?

21 A. These items were submitted to the laboratory on
22 February 15th, 2006. And I examined them --
23 started examining them on February 16, 2006.

24 Q. Describe for us, if you will, how item EJ
25 appeared when you first accepted and began

1 working on it?

2 A. Item EJ, Exhibit 392, appears very similar when I
3 examined it. It's a charred skull fragment that
4 had been, obviously, in a fire.

5 Q. All right. And how is it packaged, tell us about
6 the appearance of the item in its packaging?

7 A. This item, item EJ, was one of two items that
8 were submitted in the laboratory in sealed
9 plastic bags that were received in a sealed box.

10 Q. All right. And how were they labeled; did that
11 assist you in performing the requested
12 examination?

13 A. This item, which was the one I examined, there
14 were three bags in item EJ. This one was
15 identified as a charred cranial fragment with a
16 entrance defect. And that's what I concentrated
17 my examination on.

18 Q. All right. And what about the other bags that
19 were part of the EJ designation; were they
20 subject to examination?

21 A. No, those were labeled as cranial refits and they
22 didn't have any defects. And I was more
23 interested in looking at the hole in that item.

24 Q. All right. Now, you mentioned there was one
25 other item in addition to EJ; what item was that?

1 A. That was item EK.

2 Q. All right. Did you conduct any examinations of
3 item EK?

4 A. No, I did not.

5 Q. And why did you not conduct any examinations?

6 A. The bag, that item EK, was labeled as cranial
7 bone fragments, dental fragments, nothing that
8 had a defect or hole that I would be interested
9 in.

10 Q. Now, with respect to item EJ, can you tell us,
11 specifically, using the laser pointer, what part
12 of that item did you examine and why did you
13 examine it?

14 A. I examined this area right up in here, is where I
15 concentrated most of my analysis. And through my
16 training and experience, that bullets, when they
17 go through bone or hard objects, if they are a
18 lead bullet, which most bullets are, you can
19 sometimes get a --

20 ATTORNEY BUTING: Objection, your Honor, I
21 don't know that he's -- this is a trace chemist, I
22 don't know that he is qualified to be talking about
23 bullets and what they do and don't do.

24 ATTORNEY FALLON: I will rephrase the
25 question.

1 THE COURT: Very well.

2 Q. (By Attorney Fallon)~ Were there specific -- Was
3 there specific information that you had with
4 respect to the condition of the defect that you
5 have identified, that caused you to examine it
6 more closely?

7 A. Yes, this defect is consistent with a high energy
8 projectile.

9 Q. I understand, but my question is, what,
10 specifically, did you -- were you -- why were you
11 asked to examine -- I realize it has a defect,
12 but what other information did you have to assist
13 you that caused you to examine that specific
14 crescent shape there?

15 ATTORNEY BUTING: Move to strike the last
16 answer as well, your Honor.

17 THE COURT: You mean the answer about
18 the --

19 ATTORNEY BUTING: The answer that was not
20 responsive to Mr. Fallon's question about high
21 energy projectiles.

22 ATTORNEY FALLON: That's not his objection
23 and we're rephrasing the question.

24 ATTORNEY BUTING: I move to strike it.

25 THE COURT: I think he's moving to strike

1 the answer that came after his objection, if I'm not
2 mistaken.

3 ATTORNEY BUTING: Yes.

4 THE COURT: The Court will strike that
5 answer as nonresponsive, which I think Mr. Fallon
6 recognized by rephrasing his question.

7 ATTORNEY BUTING: Yes.

8 THE COURT: Go ahead, Mr. Fallon.

9 Q. (By Attorney Fallon)~ Rephrasing the question,
10 Mr. Olson, what additional information did you --
11 Well, let's strike it this way. Did you have any
12 x-rays that you examined before conducting this
13 examination of item EJ?

14 A. No, I didn't.

15 Q. All right. But at that particular point -- Let's
16 get at it this way. What did you find when you
17 looked at the crescent shape that you have
18 identified there, the defect area?

19 A. When I analyzed that area for elemental analysis,
20 I detected the presence of lead.

21 Q. Okay. We'll come back to that in a moment. In
22 addition to item EJ, were you asked to examine
23 any other cranial fragments?

24 A. Yes, I was.

25 Q. All right. And did you obtain some cranial

1 fragments?

2 A. Yes, I did.

3 Q. And from whom did you obtain those fragments.

4 A. I obtained some more cranial fragments from
5 Dr. Leslie Eisenberg.

6 Q. And approximately when did you obtain additional
7 cranial fragments?

8 A. On November 17th, 2006.

9 Q. And when did you begin your analysis of these
10 additional fragments?

11 A. I started examining those cranial fragments on
12 November 21st of 2006.

13 Q. All right. I'm going to have Special Agent
14 Fassbender hand you some photographs. Beginning
15 with the top exhibit, I believe it is designated
16 Exhibit 429; is that correct?

17 A. That's correct.

18 Q. Do you recognize that exhibit?

19 A. Yes, I do.

20 Q. What is Exhibit 429?

21 A. Exhibit 429 is a photograph of item KQ, the
22 cranial fragment with the entrance defect that I
23 received from Dr. Leslie Eisenberg.

24 Q. All right. And directing your attention, then,
25 to the screen, is that the very same exhibit that

1 you are holding in your hand?

2 A. Yes, it is.

3 Q. All right. And describe, if you will, in more
4 detail, item KQ, upon your receipt of it?

5 A. I'm sorry, could you repeat that?

6 Q. Yes, specifically, I just want to ask you to
7 describe that -- Well, let's do it this way.
8 Describe for us, if you will, the size or
9 contours of the defect.

10 A. The bone fragment itself is an inch and a
11 quarter, approximately, by an inch and three
12 quarters in size.

13 Q. All right. And so that's from top to bottom and
14 across the exhibit there?

15 A. That's correct.

16 Q. All right. And the defect itself was
17 approximately how much?

18 A. It appears to be about -- the diameter of that
19 crater is about a half inch.

20 Q. All right. And I would like to show you, also,
21 Exhibit 398 at this particular time. And do you
22 recognize Exhibit 398?

23 A. Yes, I do.

24 Q. And is item KQ present in Exhibit 398?

25 A. Yes, it is.

1 Q. And if you would use the pointer and describe for
2 us, if you will, where that is.

3 A. Item KQ is this bone fragment right here in the
4 upper left hand corner.

5 Q. All right. And if we could zoom in on that. And
6 what were you examining with respect to item KQ?

7 A. I was particularly interested in these bright
8 spots here, which indicates it could be a dense
9 metal.

10 Q. All right. And with respect to item KQ, did you
11 use the scanning electron microscope to conduct
12 your analysis of those particles?

13 A. Yes, I did.

14 Q. All right. And finally, there should be the next
15 exhibit in front of you?

16 A. Exhibit 429 or 4 --

17 Q. 430.

18 A. 430.

19 Q. Yes. And what is Exhibit 430?

20 A. Exhibit 430 is a photograph of item KQ, but the
21 inner surface. The previous exhibit was the
22 outer surface. And Exhibit 430 is the inner
23 surface.

24 Q. All right.

25 A. That's what's being displayed right now.

1 Q. All right. And did you examine the inner surface
2 of the defect area, as well as the outer surface,
3 on this particular item?

4 A. Yes, I did.

5 Q. All right. And finally, there's one more
6 exhibit. And I believe Exhibit 431.

7 A. Yes.

8 Q. All right. And what is Exhibit 431?

9 A. Exhibit 431 is a photograph of an x-ray of other
10 charred bone fragments.

11 Q. All right. And particularly with respect to
12 Exhibit 431, was there a Crime Lab designation
13 assigned to that item?

14 A. Yes, there was.

15 Q. All right. And what was that?

16 A. That was item KR.

17 Q. All right. All right. Now, with respect to your
18 findings, I would like to redirect your
19 attention, again, to item EJ, Exhibit 392; did
20 you find traces of elemental lead in the area of
21 that defect?

22 A. Yes, I did.

23 Q. And tell us about what you found.

24 A. I was examining the entrance defect approximately
25 in this kind of lower left hand corner.

1 ATTORNEY BUTING: I'm sorry, is this item
2 EJ we're talking about?

3 ATTORNEY FALLON: Yes, this is item EJ,
4 Exhibit 392.

5 A. I examined this area in here and found traces of
6 elemental lead.

7 Q. All right. And with respect to Exhibit 92, what
8 -- were there more than one location or area
9 within that defect that you examined?

10 A. Yes, there was.

11 Q. And what did you find with respect to other
12 possible locations of elemental lead?

13 A. In this area, I examined three different areas
14 and found elemental lead -- traces of elemental
15 lead. In this area, I examined and did not
16 find -- I found what were very low amounts of
17 lead, but it was too low for me to call. So,
18 essentially, I did not find any lead in this area
19 over here.

20 Q. All right. And did you examine other areas of
21 that particular fragment, Exhibit 392?

22 A. Yes, I did.

23 Q. And approximately how many areas did you examine
24 on this one particular exhibit?

25 A. Approximately 12 different areas that I examined.

1 Q. All right. And I know it might be kind of
2 difficult with that photograph, but could you
3 give us a general idea of what other locations
4 that you examined for the possibility of
5 elemental lead?

6 A. I examined approximately seven locations here and
7 approximately five locations down in here, as a
8 control area.

9 Q. All right. Well, let's begin, we talked about
10 areas one, two, and three, and you mentioned
11 something about five, six, and seven. Let's talk
12 a little bit about those areas. What, if
13 anything, did you find with respect to areas
14 five, six, and seven.

15 A. I did not find any elemental lead in five. Area
16 six and seven, which was right next to it, over
17 here, I saw what began to look like the presence
18 of lead, but it was too low of a level for me the
19 call.

20 Q. All right. Now, Mr. Olson, you used the laser
21 pointer to point to a particular area. And would
22 I be accurate in describing that that would --
23 the area you pointed to, five, six and seven, was
24 on the edge or the beginning, as it were, of the
25 defect area?

1 A. Yes, it is.

2 Q. All right. And one, two, and three were actually
3 in the defect area?

4 A. Either on or slightly in, yes.

5 Q. All right. How about the other areas, 8, 9, 10,
6 11 and 12, with respect to the exhibit, where are
7 they located?

8 A. These would be down in this area here.

9 ATTORNEY FALLON: All right. If the record
10 would reflect, the witness is pointing to the bottom
11 edge of Exhibit 392 of the photograph which is
12 depicted.

13 Q. (By Attorney Fallon)~ What did you find at those
14 locations?

15 A. I did not find any traces of elemental lead.

16 Q. All right. Now, you mentioned something -- Well,
17 first of all, let me ask, what was the purpose of
18 testing those locations, 5, 6, 7, and most
19 notably, 8 through 12?

20 A. I was examining those areas, away from the
21 entrance defect, to have a control area where I
22 would not think or suspect to find any lead.

23 Q. And could you explain for the jury the concept of
24 a control?

25 A. The control is just a sample that you expect to

1 have certain results, usually negative results,
2 in this same type of material that you are
3 analyzing.

4 Q. All right. So how does performing these control
5 tests assist you in assessing your findings in
6 the other locations, particularly one, two, and
7 three?

8 A. It adds more weight to my findings, finding
9 elemental lead in those areas around the defect.
10 And then not finding it in the other areas goes
11 more to the point that -- that there is traces of
12 lead in that entrance defect.

13 Q. All right. Now, let's talk a little bit about
14 item EK; did you examine EK?

15 A. No, I did not.

16 Q. And why was EK not examined?

17 A. There was no entrance defect on those charred
18 skull fragments.

19 Q. All right. And do you recall what they were
20 labeled or how they were submitted to you?

21 A. Those would have been labeled cranial, facial,
22 dental, I believe.

23 Q. All right. All right. Again, now, returning to
24 item KQ, which we have depicted in Exhibit 398
25 and I believe in Exhibit 429 and 430. You

1 conducted a similar analysis of this particular
2 item?

3 A. Yes, I did.

4 Q. All right. And you were examining more closely
5 the bright white particles which appear on this
6 particular exhibit?

7 A. Yes, I was particularly interested in those
8 bright spots. That would be indicative of a more
9 dense material, such as lead.

10 ATTORNEY FALLON: And for the record,
11 Exhibit 398 depicts several cranial fragments. The
12 witness is describing the fragment which appears at
13 the upper left hand corner of the exhibit as a
14 whole.

15 Q. (By Attorney Fallon)~ I would like to direct your
16 attention then back to Exhibits 429 and 430. We
17 will start with Exhibit 429. All right. And,
18 again, is this the inner or outer depiction of
19 Exhibit 4 of item KQ?

20 A. This would be the outer surface of that skull
21 fragment.

22 Q. All right. And then we'll start with the outer
23 surface, did you find -- did you examine -- You
24 said you examined the area near the defect?

25 A. Yes, I did.

1 Q. All right. Did you find elemental lead at any of
2 the locations you examined at this -- at this --
3 in this particular defect?

4 A. Yes, I did.

5 Q. And what did you find?

6 A. I found elemental lead corresponding to those
7 bright spots in this entrance defect.

8 Q. Now, in this particular case, was it more than a
9 trace, or less than a trace; reference, you know,
10 item EJ, comparatively speaking, was there more
11 or less lead that you detected here?

12 A. There was considerably more lead in this sample
13 than there was in item EJ.

14 Q. All right. And similarly, did you have a control
15 for your examination on this outer surface of
16 item EJ, Exhibit 429?

17 A. Yes, I did.

18 Q. And if you would be so kind as to point with your
19 laser pointer to the control areas.

20 A. The control area was in this -- approximately
21 this area.

22 ATTORNEY FALLON: The record is reflecting
23 that he's pointing to the right side of his marker
24 arrow, towards the top, almost the same height as
25 the point of the arrow.

1 THE COURT: Record will so reflect.

2 ATTORNEY BUTING: That's fine.

3 ATTORNEY FALLON: Thank you.

4 Q. (By Attorney Fallon)~ And just so that we're
5 clear, the areas where you did find the elemental
6 lead, if you would be so kind, with your pointer,
7 to indicate that area on the exhibit.

8 A. Right in this area, on and in the beveled area.

9 Q. On and in the beveled area. Very well, thank
10 you. Now, did you similarly examine the inside
11 of item KQ.

12 A. Yes, I did.

13 Q. All right. I would like to direct your
14 attention, then, to Exhibit 430. And just so
15 that we're clear, counsel advised me I may have
16 misspoke. KQ item is our Exhibits 429 and 430;
17 is that correct? Just so that -- I may have
18 misspoke.

19 A. Item KQ is -- 429 is the outer surface and 430 is
20 the inner surface of item KQ.

21 Q. All right. And we have Exhibit 430 on the screen
22 now, which is the inner surface?

23 A. That's correct.

24 Q. All right. Now, tell us about your analysis of
25 this particular item, how did you begin?

1 A. I concentrated my examination, elemental
2 examination, around the entrance defect and
3 inside the bevel of this item.

4 Q. All right. And in that particular area, did you
5 find elemental lead?

6 A. Yes, I did.

7 Q. And approximately where on the exhibit, if you
8 are able to tell us, that you found this?

9 A. On the edge of the defect and inside of the
10 bevel.

11 Q. All right. And approximately how many locations
12 did you test in or on the beveled area?

13 A. I believe it was four.

14 Q. All right. And in those four locations, did you
15 find the presence of elemental lead at each of
16 those locations?

17 A. Yes, I did.

18 Q. And with respect to their locations and comparing
19 it to item EJ, was there more or less lead
20 associated with item KQ or EJ?

21 A. There was considerably more lead in this
22 particular item KQ.

23 Q. All right. And in terms of locations three and
24 four, if you are able, can you direct us,
25 roughly, where locations three and four would be?

1 A. Three would be approximately here and four would
2 be approximately here, both of them inside the
3 bevel.

4 Q. All right. And with respect to comparing
5 locations one and two with three and four, what
6 did you find with respect to the amounts of
7 elemental lead that was present?

8 A. In areas three and four, inside the bevel, there
9 was even more lead concentrated in those areas
10 than in areas one and two.

11 Q. All right. Similarly, with respect to your
12 testing of the inside of item KQ, Exhibit 430,
13 were there any control locations that you
14 utilized to assist you in interpreting your
15 results?

16 A. Yes, there were.

17 Q. And if you would be so kind as to take your
18 pointer and indicate generally where the control
19 areas were utilized?

20 A. I believe the control area was in this area.

21 Q. All right. You are talking to the area
22 immediately to the right and at the bottom of the
23 marker that you placed on this exhibit?

24 A. That's correct.

25 Q. All right. In the control area, did you find the

1 presence of any lead?

2 A. No, I did not detect the presence of lead in that
3 area.

4 Q. All right. Now, we would like you to take a look
5 at Exhibit 431, please. Do you recognize
6 Exhibit 431?

7 A. Yes, I do.

8 Q. Were you called upon to examine that particular
9 piece?

10 A. Yes, I was.

11 Q. And similarly --

12 ATTORNEY BUTING: Can you just identify
13 what that is, x-ray or photo.

14 A. It's a photograph of an x-ray.

15 ATTORNEY BUTING: Okay.

16 Q. (By Attorney Fallon)~ And it was your
17 understanding this was, again, another cranial
18 piece that you were given by Dr. Eisenberg?

19 A. Yes, it was another cranial piece and a
20 particular in interest was the lower piece had a
21 bright spot consistent with a higher density type
22 material.

23 Q. All right. And upon examination of KR -- Well,
24 first of all, let me ask, did you examine KR
25 using the same methods you did with KQ and EJ?

1 A. No, because when I examined that item I did not
2 see the material here present on the tiny bone
3 fragment. It wasn't on the bone any longer. It
4 was -- It just wasn't there.

5 Q. All right. So there were no conclusions that
6 could be drawn as to what that artifact was?

7 A. That's correct.

8 Q. All right. Did that particular artifact have any
9 entrance, or suspected entrance defect, like
10 items EJ and KQ?

11 A. No, it did not.

12 Q. All right. Mr. Olson, your opinion that item EJ,
13 Exhibit 392, has traces of elemental lead in the
14 defect area, do you hold that opinion to a
15 reasonable degree of scientific certainty?

16 A. Yes, I do.

17 Q. Your opinion that item KQ, Exhibits 429 and 430,
18 at locations one, two, three, and four contained
19 elemental lead, do you hold that opinion to a
20 reasonable degree of scientific certainty?

21 A. Yes, I do.

22 Q. And your opinion that item KR, which did not have
23 a suspected entrance defect and showed no traces
24 of elemental lead; do you hold that opinion to a
25 reasonable degree of scientific certainty.

1 A. Yes, I do.

2 ATTORNEY FALLON: Subject to cross, we
3 would move into evidence Exhibits 429, 430 and 431.

4 THE COURT: Any objection?

5 ATTORNEY BUTING: No objection.

6 THE COURT: Those exhibits are admitted.
7 Mr. Buting.

8 ATTORNEY BUTING: Thank you, Judge.

9 **CROSS-EXAMINATION**

10 BY ATTORNEY BUTING:

11 Q. Good morning, sir.

12 A. Good morning.

13 ATTORNEY BUTING: If counsel could be so
14 kind as to put up Exhibit 398 for a moment, please.

15 Q. (By Attorney Buting)~ Now, just leaving it at
16 this magnification for a second, this is a
17 photograph of an x-ray of -- which is it?

18 A. That is a projection of a photograph of an x-ray.

19 Q. Okay. Which item is it, KQ, or is it EJ?

20 A. It's neither.

21 Q. Well, this item up here?

22 A. That item is item KQ.

23 Q. Okay. So the one in the upper left is KQ.

24 ATTORNEY BUTING: Okay. Could we just look
25 at 429 for a minute, please.

1 Q. (By Attorney Buting)~ You're quite sure this is
2 the same item as we just saw on the x-ray.

3 A. Yes, it is.

4 Q. Well, on this item, maybe it's just my eyes, but
5 if you look at the far right side, there is a
6 rather prominent projection, almost looks like a
7 large nose sticking out or something, right?

8 A. That's correct.

9 Q. I didn't see that on 398.

10 ATTORNEY BUTING: Could we go back and look
11 at that for a minute?

12 ATTORNEY FALLON: Certainly.

13 ATTORNEY BUTING: Could we maybe zoom in on
14 this upper?

15 Q. (By Attorney Buting)~ Where is that marking?
16 Where is that part -- that little projection that
17 we just saw in the other photograph? Where is it
18 on this x-ray? I don't see it.

19 A. It is not there. This x-ray was taken before
20 Dr. Eisenberg attempted to do her refits. And
21 the piece that I got was after the refit. And
22 when I got it, it was broken --

23 Q. Oh.

24 A. -- and that piece that you are seeing --

25 Q. Okay.

1 A. -- is from another portion of the cranial.

2 Q. Okay. So what you saw -- When you saw it, it had
3 been changed slightly, that piece had been broken
4 off?

5 A. Yes, it did not look like that.

6 Q. Okay. Well, that's good. I'm glad you cleared
7 that up.

8 ATTORNEY BUTING: You can take that down
9 now, counsel, that's fine. Thank you.

10 Q. (By Attorney Buting)~ Do you -- Do you know what
11 item FL is in your lab?

12 A. No, I do not.

13 Q. Well, there's been evidence, the jury has heard
14 that item FL has been identified and talked about
15 quite a bit here as a alleged bullet fragment,
16 right? Okay. You will accept that?

17 A. I will accept that, yes.

18 Q. Okay. You were not given item FL, to do any
19 examination of?

20 A. No, I was not.

21 Q. So you didn't test the chemical composition of
22 item FL?

23 A. No, I did not.

24 Q. So you cannot say that the trace items of lead
25 that you saw in either one of these two cranial

1 fragments came from item FL; isn't that right?

2 A. That's correct.

3 Q. Okay. Now, you were given some other duties
4 besides this trace analysis of cranial fragments
5 in this case, right?

6 A. That's correct.

7 Q. And at one point, I believe in April, you were
8 actually asked to examine a headboard?

9 A. Yes, I was.

10 Q. And that, for the record, is an item that's -- I
11 don't know if you gave the designation or it was
12 already designated, this for you, or by someone
13 else in your lab before you got it, as item GI?

14 A. That's correct.

15 Q. And you were looking -- Among other things, you
16 were looking for the possible presence of rope
17 fibers on that headboard, right?

18 A. That's correct.

19 Q. And was it your understanding that you were
20 looking for the possible presence of rope fibers
21 on the spindles of that headboard to see whether
22 there was any evidence of possible rope being
23 used as a restraint?

24 A. That's correct.

25 Q. Did you find any rope fibers?

1 A. No, I did not.

2 ATTORNEY BUTING: Thank you, no further
3 questions.

4 THE COURT: Any redirect?

5 ATTORNEY FALLON: Sure.

6 **REDIRECT EXAMINATION**

7 BY ATTORNEY FALLON:

8 Q. What is the main elemental composition of a
9 bullet?

10 A. Lead.

11 Q. .22 caliber bullets contain lead?

12 ATTORNEY BUTING: Objection. This has been
13 -- I think this was testified to by the prior
14 witness.

15 ATTORNEY FALLON: Well, he asked, this is
16 appropriate redirect.

17 ATTORNEY BUTING: Okay.

18 THE COURT: I believe it is.

19 ATTORNEY BUTING: That's fine.

20 Q. (By Attorney Fallon)~ The .22 caliber bullets
21 contain lead?

22 A. Almost 99 percent lead.

23 ATTORNEY FALLON: That's all. Thank you.

24 **RECROSS-EXAMINATION**

25 BY ATTORNEY BUTING:

1 Q. Bullets also contain -- or bullets are composed
2 of different elements, right?

3 A. The major component is lead, but depending if
4 they want to harden the lead, they will add
5 antimony or tin to the bullet to make it harder.
6 Some bullets have copper jackets with a lead
7 core. Some bullets have a silver tipped or
8 aluminum coating with a lead core.

9 Q. Right. So some bullets are coated, some bullets
10 are not?

11 A. Correct.

12 Q. You did not test item FL to see whether it was a
13 coated or non-coated, did you?

14 ATTORNEY FALLON: Objection, asked and
15 answered. He asked if he tested FL at all and he
16 said no.

17 THE COURT: It's a fair summary question, I
18 will allow it.

19 Q. (By Attorney Buting)~ Is that right?

20 A. Could you repeat it, please.

21 Q. You did not test item FL to see if it was a
22 coated or non coated bullet?

23 A. I did not examine item FL.

24 ATTORNEY BUTING: That's all. Thank you.

25 THE COURT: All right. The witness is

1 excused.

2 THE WITNESS: Thank you, your Honor.

3 THE COURT: You're welcome.

4 ATTORNEY FALLON: Could we have a quick
5 sidebar?

6 THE COURT: Sure. Is it relating to
7 scheduling, I take it?

8 ATTORNEY FALLON: Yes.

9 THE COURT: All right. Members of the
10 jury, we're going to take a short break. We'll
11 resume in a few minutes. I will remind you not to
12 discuss the case during your break.

13 (Jury not present.)

14 THE COURT: You may be seated.

15 ATTORNEY FALLON: We're going to go check
16 and see on the progress that Dr. Jentzen is making.

17 THE COURT: If he is not here yet, is he
18 reachable by cellphone?

19 ATTORNEY FALLON: He may very well be. I
20 believe Mr. Gahn is checking on that.

21 THE COURT: Let me know in chambers what
22 you find.

23 ATTORNEY FALLON: Sure. Thank you.

24 (Recess taken.)

25 (Jury present.)

1 THE COURT: Mr. Gahn, you may call the
2 State's next witness.

3 ATTORNEY GAHN: Thank you, your Honor. The
4 State would call Dr. Jeffrey Jentzen to the stand.

5 **DR. JEFFREY JENTZEN**, called as a witness
6 herein, having been first duly sworn, was
7 examined and testified as follows:

8 THE CLERK: Please be seated. Please state
9 your name and spell your last name for the record.

10 THE WITNESS: Dr. Jeffrey M. Jentzen, M.D.
11 J-e-f-f-r-e-y J-e-n-t-z-e-n.

12 **DIRECT EXAMINATION**

13 BY ATTORNEY GAHN:

14 Q. Dr. Jentzen, what is your occupation?

15 A. I'm a forensic pathologist employed as a medical
16 examiner for Milwaukee County.

17 Q. And are you a licensed physician in the State of
18 Wisconsin?

19 A. I am.

20 Q. And how long have you been licensed to practice
21 medicine in the State of Wisconsin?

22 A. For 20 years.

23 Q. And did you practice anywhere before coming to
24 Wisconsin?

25 A. I was in Minnesota.

1 Q. Would you please outline, for the jurors, your
2 educational background from residency on?

3 A. I graduated from White State Medical School in
4 Detroit. I, then, did a four year anatomic and
5 clinical pathology residency at Hennepin County
6 Medical Center in Minneapolis.

7 Following that I did a year of special
8 training in field of forensic pathologist at the
9 Medical Examiner's Office in Minneapolis. I was
10 the assistant medical examiner in Minneapolis for
11 approximately six months before coming to
12 Milwaukee in 1987 as the medical examiner.

13 Q. And what are the duties of a medical examiner?

14 A. I typically oversee the administrative functions
15 of the office. I supervise other forensic
16 pathologists and trainees. I direct a forensic
17 drug laboratory, supervise other death
18 investigators who go out to crime scenes in the
19 Milwaukee County area. And I perform autopsies
20 and testify in courts.

21 Q. Are you on the staff or are you affiliated with
22 any universities or academic institutions?

23 A. Yes, I'm a professor of pathology at the Medical
24 College of Wisconsin.

25 Q. And have you had teaching responsibility?

1 A. Yes.

2 Q. Could you explain those to the jury.

3 A. Typically, we have a forensic fellowship program
4 so we teach and train other pathologists to
5 become forensic pathologists. We're one of about
6 35 training programs in the country. We also
7 teach medical students, pathology residents, and
8 other under graduate -- and other under graduate
9 programs.

10 Q. And what professional societies or associations
11 have you been active in?

12 A. I'm a member of the local State Medical Examiner
13 and Coroner's Association. I'm also the -- on
14 the -- member of the National Association of
15 Medical Examiners where I'm currently the vice
16 president of the organization. And I'm a fellow
17 of the American Academy of Forensic Sciences.

18 Q. And do you specialize in any particular branch or
19 field of medicine?

20 A. Yes, forensic pathology.

21 Q. And what exactly is forensic pathology?

22 A. Well, pathology in general is the study of
23 disease and injury. And it's broken down into
24 two rather broad categories.

25 And anatomic pathology has to do with

1 tissues; for example, skin, bone, heart muscle,
2 etcetera. And clinical pathology deals with
3 components of the body's liquids; for example,
4 what's in the blood, the urine, bile, etcetera.
5 And forensic pathology utilizes aspects of both
6 clinical pathology and anatomic pathology as they
7 pertain to general questions of the law.

8 Q. And are you board certified?

9 A. Yes.

10 Q. And would you explain -- excuse me -- explain to
11 the jurors the significance of being board
12 certified?

13 A. Board certification indicates that you have taken
14 a prerequisite course of study, you have
15 completed that course of study and taken a
16 standardized examination. And I have -- I am
17 board certified with the American Board of
18 Pathology and Anatomical, Clinical and Forensic
19 Pathology.

20 Q. And are you the author of any specific papers
21 that deal with the field of pathology?

22 A. Yes, I have written a number of papers on various
23 topics, in the field of forensic pathology,
24 predominantly. I have also co-authored a book on
25 death scene investigation and training

1 individuals to do death scene examinations,
2 etcetera.

3 Q. Have you ever received any honors or special
4 recognition in your field?

5 A. I -- I have been recognized in some areas, yes.

6 Q. Could you explain those to the jurors.

7 A. I have -- I have developed a child death review
8 team in Milwaukee County for the last 15 years
9 and we have been recognized for that.

10 We have also developed other testing
11 methods and genetics to determine drug
12 metabolism.

13 And I have been recognized as in the
14 position of the vice president and president
15 elect as I think an individual who would be a
16 leader in the field.

17 Q. And would you look at, in front of you, I believe
18 there is a document there which has been marked
19 as Exhibit 432?

20 A. Yes.

21 Q. Do you see that?

22 A. Yes, this is a copy of my curriculum vitae. It's
23 roughly around 24 pages and it documents the
24 papers and presentations and other types of
25 academic efforts that I have done over the last

1 20 years.

2 Q. Now, Doctor, approximately how many autopsies
3 have you performed in your career?

4 A. I typically perform, personally, between 250 and
5 300 autopsies a year. And then I supervise other
6 pathologists and trainees and forensic
7 pathologists in their cases. So I see a number
8 of cases. Our office typically would perform
9 around 1,000 or 1100 autopsies per year.

10 Q. And how many times have you testified in court as
11 a forensic pathologist?

12 A. I would estimate that probably -- We get a number
13 of subpoenas, but I would estimate that I
14 probably testified once a week for the past 20
15 years.

16 Q. Could you put a number on this, please?

17 A. Probably -- I would say probably around 500 or
18 1,000 times.

19 Q. Thank you. Have you ever been rejected --

20 A. No.

21 Q. -- as an expert. Now, how did you become
22 involved in this case, Doctor?

23 A. I was contacted by yourself in a telephone
24 conversation and asked if I would assist in the
25 examination of some bone materials.

1 Q. And how would you describe your role in this
2 case?

3 A. I would describe myself as a -- somebody who was
4 brought in as a consultant.

5 Q. And have you been a consultant before.

6 A. Yes.

7 Q. And what type of cases have you been a consultant
8 on?

9 A. For example, I was recently in a child death
10 case; I was a consultant. Other cases related to
11 cause and manner of death; interpretation of
12 gunshot wounds; and frequently asked by district
13 attorneys around the State to inquire and make
14 judgment on that. And I also consult with public
15 defenders and other attorneys who might have
16 questions related to injury and disease.

17 Q. How did this -- a case like this, where you are
18 in the role of a consultant, differ from the
19 typical case that you would receive at the
20 Milwaukee County Medical Examiner's Office?

21 A. Well, in our routine business we would go to the
22 scene of sudden and unexpected deaths that occur
23 in the county. I might personally -- If there
24 were a particular type of case, I might
25 personally examine the scene myself and observe

1 materials at the scene, consult with law
2 enforcement personnel at the scene.

3 And then, basically, process the body
4 myself, examine x-rays and other materials,
5 perform the autopsy, look at the tissues under
6 the microscope with the assistance of a drug
7 analyst. I might interpret drug levels in
8 testing. And then if it were a case in Milwaukee
9 County, I would determine the cause and manner of
10 death and sign the death certificate.

11 In this case, my role was limited, as a
12 consultant, to look at some material and render
13 an opinion.

14 Q. And is that because the traditional autopsy would
15 not be performed in a case such as this?

16 A. And, yes, that's true, plus -- well, an autopsy
17 is basically an examination of a deceased person.
18 In some cases, you have more material than are --
19 and tissue than in other cases.

20 But in this case, it would be that I
21 would not have performed the examinations myself,
22 as far as the autopsy or dissection. And in this
23 case my role is limited to examining small pieces
24 of bone fragments and rendering an opinion.

25 Q. Would you explain to the jury what you did in the

1 course of your investigation in this case?

2 A. I was requested to go to Madison. And at the
3 Dane County Coroner's Office I met with
4 Dr. Leslie Eisenberg, the forensic
5 anthropologist, and some attorneys and other
6 individuals.

7 And we examined -- I was shown the
8 material that Dr. Eisenberg had previously
9 examined. I reviewed her report and I -- and she
10 showed me some bone fragments. I also examined
11 some x-rays of those bone fragments. And on the
12 basis of those materials, I rendered an opinion.

13 Q. Did you also review various Crime Lab reports in
14 this case?

15 A. Yes, I did. As well as the -- although I wasn't
16 at -- I never went to the scene of this case, I
17 was shown photographs and given laboratory
18 information, looked at the x-rays and the
19 reports.

20 Q. As part of your job as medical examiner, did you
21 have experience with examining burned body parts?

22 A. Yes.

23 Q. About how many cases have you been involved in
24 where there were burned body parts?

25 A. I would say on a routine basis we would examine

1 probably around 10 charred bodies per year, in
2 our office.

3 Q. And as part of your job as medical examiner, do
4 you have experience with interpreting x-rays?

5 A. Yes, in a general forensic sense, interpreting
6 trauma and injury, yes.

7 Q. How are they used in your work?

8 A. We typically take x-rays on all pediatric cases,
9 all gunshot wounds, stab wounds, and cases where
10 there's some concern over identification.

11 Q. And as part of your job as medical examiner, do
12 you have experience with bullets and bullet
13 fragments?

14 A. Yes.

15 Q. On an annual basis, approximately how many cases,
16 involving gunshots to the skull, would you see in
17 the Milwaukee County Medical Examiner's Office?

18 A. I would give a rough estimate at probably around
19 100 to 120.

20 Q. Now, I believe you stated that you met with
21 Dr. Eisenberg and you actually examined bone
22 fragments in this case?

23 A. I did.

24 Q. Could you basically describe to the jurors, what
25 was the condition of these bones that you

1 examined?

2 A. I would describe the bones as fragmented and
3 charred. There was no intact skull fragments.
4 And Dr. Eisenberg had separated out bone
5 fragments from the skull and from other areas and
6 so I was able to look at just small fragments of
7 the bone -- bony material, as well as the x-rays
8 of those areas.

9 Q. In particular, did you examine certain skull
10 fragments?

11 A. Yes.

12 Q. And was there anything unusual about some of
13 those skull fragments that you observed?

14 A. Yes, on two of the fragments, one fragment
15 Dr. Eisenberg identified to me as the left
16 parietal skull, or a bone from the left parietal
17 skull. And the parietal bone, and I'm pointing
18 to that area just about above my ear, the
19 parietal bone is the -- a rather large flat bone
20 that -- there's one on the right and the left
21 side.

22 And Dr. Eisenberg identified a fragment
23 of that bone and also there was a fragment that
24 she identified as the left occipital bone. The
25 occipital bone is the bone that's in the back of

1 the skull, in this area. And I'm pointing to
2 that area behind and below my left ear.

3 Q. Was there any particular reason Dr. Eisenberg
4 pointed these two skull fragment pieces out to
5 you?

6 A. Those fragments were noted, by herself and the
7 initial examining pathologist, to have a defect
8 called internal beveling on the fragments and so
9 I paid particular attention to those bones;
10 although, I did make a gross examination of
11 multiple skull bones that she had demonstrated.

12 Q. I'm going to put up on the screen what has
13 previously been marked as Exhibit 390, and has
14 been testified to by Dr. Eisenberg as a left
15 parietal bone area; did you examine this?

16 A. Yes.

17 Q. And there is a laser pointer there on the desk,
18 Doctor.

19 A. Yes.

20 Q. Could you point out to the jurors this beveling
21 area and maybe amplify a bit on that for the
22 jurors.

23 A. In addition to the beveling area, there was a
24 semi-circular defect that has a shape on it that
25 I would interpret as a portion of a whole. And

1 this area, we're talking about the inside portion
2 of the skull, so this area you can see is
3 fragmented.

4 And if you would imagine a stone or
5 something striking glass and the way the glass
6 fragments; it's the same thing for a bullet going
7 through the skull. Typically there's an internal
8 beveling that occurs on an entrance wound. And
9 characteristically there's external beveling
10 noted as the bullet exits the skull.

11 And we use these characteristics to help
12 identify and determine where an entrance or exit
13 wound would be on a skull, if there were two
14 different types of perforation. So it would be
15 my opinion that this is consistent with a
16 perforating entrance gunshot wound -- I'm sorry
17 penetrating entrance gunshot wound.

18 Q. And did you also review an x-ray that would be
19 associated with this particular piece of skull
20 fragment?

21 A. Yes.

22 Q. And I'm going to put up on the large screen what
23 has previously been marked as Exhibit 397. And
24 I'm going to ask you if you could again describe
25 for the jurors what this shows?

1 A. Yes, this is the left parietal bone fragment.
2 Again, you can see the internal beveling and the
3 semi-circular perforation and there's also some
4 small radio dense fragments that I'm pointing to
5 with the pointer. I can see probably about two
6 or three on the picture from here. And those are
7 characteristic of metallic fragments the bullet
8 imparts to the target as the bullet travels
9 through bony material. It's a common finding in
10 certain gunshot wounds to the skull and other
11 bony fragments.

12 Q. And, again, did this support your original
13 conclusion about this being an entrance gunshot
14 wound?

15 A. Yes.

16 Q. I'm going to show you what has been marked as
17 Exhibit 393, and previously testified to by
18 Dr. Eisenberg as a bone fragment from the
19 occipital area, and ask you if you recognize
20 this?

21 A. Yes, that's the bone fragment located, according
22 to Dr. Eisenberg, in the left occipital region.

23 Q. And, again, did you actually see this bone
24 fragment when you were at Dr. Eisenberg's office?

25 A. Yes.

1 Q. And, again, would you take the pointer and just
2 explain to the jurors, again, this beveling
3 process that you have described about -- with the
4 parietal?

5 A. Again, one can see the internal beveling pattern
6 that's prominent here and there is a
7 semi-circular appearance to the edge of the bony
8 fragment.

9 Q. And, again, what did that indicate to you?

10 A. It was my opinion that that was consistent with a
11 gunshot wound, entrance gunshot wound.

12 Q. And did you also review an x-ray that would be
13 associated with this?

14 A. I did.

15 Q. And I'm going to show you what has been marked as
16 Exhibit 398? And, again, would you take the
17 laser point and point to any areas of particular
18 interest for the jurors.

19 A. Yes, I'm pointing to the bony fragment on the
20 photograph and, again, on the semi-circular area
21 with the internal beveling. There is a rather
22 localized area of multiple radio dense fragments.
23 And it would be my opinion that these would be
24 consistent with and suggestive of metallic lead
25 type fragments that the bullet delivers to the

1 bone as it's it passing through the bone. Could
2 I expound on that?

3 Q. Please.

4 A. The bone is actually -- the bone in the skull is
5 actually kind of like a wafered cookie.

6 There's -- there's a bony -- a bony surface on
7 the outer portion, a bony surface on the inner
8 portion and the material in the inside is rather
9 porous. It's actually where there's bone marrow
10 and that's how the bone grows.

11 And so we call the outer table, the
12 outer portion of the skull. And the inner table
13 is the inner table -- is the inner portion of the
14 skull. And the portion between is -- is -- is
15 rather porous. And, then, as you can see in this
16 area, this is predominantly where these small
17 metallic fragments are pushed into or imparted
18 into the bony tissue.

19 Q. Based upon your examination of the skull
20 fragments and the x-rays and all the associated
21 records and reports that you reviewed in this
22 case, do you have an opinion, to a reasonable
23 degree of medical certainty, as to the manner of
24 Teresa Halbach's death?

25 A. Yes, I do.

1 Q. And what is that opinion?

2 A. It would be my opinion that she died as a result
3 of gunshot wounds to the head and that the manner
4 of her death would be homicide.

5 Q. And based upon your examination of the skull
6 fragments and x-rays and all the associated
7 reports in this case, do you have an opinion, to
8 a reasonable degree of medical certainty, as to
9 the cause of Teresa Halbach's death?

10 A. Yeah, I believe that she -- her -- the cause of
11 her death would be the gunshot wound to the head.
12 And the manner would be the homicidal
13 designation.

14 ATTORNEY GAHN: Thank you, Doctor. That's
15 all I have.

16 THE COURT: Mr. Strang.

17 **CROSS-EXAMINATION**

18 BY ATTORNEY STRANG:

19 Q. Dr. Jentzen, about what -- when, I should say,
20 was it that Mr. Gahn first called you to consult
21 on this case?

22 A. I would say it was the early portion of November,
23 or very late portion of October.

24 Q. 2006?

25 A. Yes.

1 Q. Just about a year after you understood that the
2 bones were examined, or the fragments of bones
3 were?

4 A. I would say so, yes.

5 Q. Give or take?

6 A. Yeah.

7 Q. Okay. And it was also well after you knew that
8 Steven Avery had been charged in the homicide of
9 Teresa Halbach?

10 A. I had knowledge of that through the regular
11 media, yes.

12 Q. Sure. Widely reported case?

13 A. Right.

14 Q. You knew of it just from reading the paper, or
15 looking at the internet, or whatever you do?

16 A. Yes.

17 Q. All right. And when you got involved, you come
18 over to Madison, you look at some bone fragments
19 that Dr. Eisenberg has set out for you?

20 A. Yes. Actually we looked at all the bone
21 fragments that she had, yeah.

22 Q. She identified for you the parietal bone
23 fragments?

24 A. Correct.

25 Q. She identified for you the occipital bone

1 fragments?

2 A. Correct.

3 Q. You were not able to identify those bones
4 yourself?

5 A. I could probably identify them as a skull bone
6 fragment, but it would be difficult for me to
7 place them specifically into a left occipital and
8 parietal bone.

9 Q. Okay.

10 A. And that would be in the area of expertise of an
11 anthropologist.

12 Q. Reasonable in your view to rely on
13 Dr. Eisenberg's expertise in telling you where in
14 the skull she thought these bones came from?

15 A. Correct.

16 Q. The meeting that you described with
17 Dr. Eisenberg, you said that there were others
18 there, including some attorneys?

19 A. Correct.

20 Q. Just to be clear, there were not defense
21 attorneys there?

22 A. Correct.

23 Q. The attorneys were both from the State or
24 prosecution?

25 A. The three attorneys at the table, yes.

1 Q. Fair enough. Okay. Now, you, I gather although
2 you were only -- well, you didn't do an autopsy
3 here, as you said?

4 A. Correct.

5 Q. Although you were in a consultant role, you asked
6 for the information you thought might be helpful
7 to forming an opinion?

8 A. Yes. I examined what I would typically examine
9 in a case where I was asked to consult, autopsy
10 protocol laboratory tests, if they were
11 available; scene investigation materials on a --
12 police reports. It would be consistent with the
13 same type of examination I would do if it was any
14 other kind of forensic examination.

15 Q. You asked for all of the information available
16 that you thought might help you in forming your
17 opinions?

18 A. Specifically, within my area of expertise, yes.

19 Q. I mean, you know, your opinions are within your
20 area of expertise?

21 A. Correct.

22 Q. So you were interested in information that might
23 bear on the opinion you hoped to form?

24 A. Correct.

25 Q. None of the information you requested was

1 withheld from you, was it?

2 A. Not to my recollection, no.

3 Q. You got what you thought you needed?

4 A. Yes.

5 Q. Here, as in any other case involving a charge of
6 a homicide, you understand that the personal
7 stakes are high for the family of the victim?

8 A. Yes.

9 Q. The family of the defendant?

10 A. Yes.

11 Q. The defendant himself?

12 A. Yes.

13 Q. It's a serious case when the allegation is
14 homicide, obviously?

15 A. Yes, as I mentioned, I probably testify on
16 probably 50 to 100 homicide type cases a year.

17 Q. Right. And you're -- because you're a forensic
18 pathologist, every time you testify, to some
19 extent your own reputation is -- is at stake?

20 A. I make opinions based on the evidence that I'm
21 given and use my background experience in
22 training and education to make opinion
23 statements, correct.

24 Q. Sure. And you want those opinions to be
25 expressions that you can stand behind

1 confidently?

2 A. To the best of my ability, yes.

3 Q. Stake your reputation to?

4 A. Yes.

5 Q. And, of course, any time you testify, just as
6 today, you are testifying under oath?

7 A. Yes.

8 Q. You came here, as I understand it, offering two
9 specific opinions: One, the more general, would
10 be manner of death; am I correct?

11 A. Correct.

12 Q. And then, the second, and more specific in a
13 sense, would be cause of death?

14 A. Correct.

15 Q. All right. Let's start with the more general,
16 manner of death. We have heard a little bit
17 about this, but not from a pathologist or medical
18 examiner. In your work, we could say that there
19 are four determined manners of death; is that
20 right?

21 A. Typically five.

22 Q. All right. One would be accidental?

23 A. Correct.

24 Q. No special order here, but one of these is
25 accidental, another is natural?

1 A. Yes.

2 Q. A third would be suicide?

3 A. Yes.

4 Q. And fourth, homicide?

5 A. Yes. Fifth is undetermined.

6 Q. Very good. That's the one we didn't hear about

7 yesterday. Unexplained or undetermined is your

8 term of choice?

9 A. Undetermined, yes.

10 Q. All right. We'll use undetermined. So that

11 would be the fifth manner of death, which is

12 different than the other four in the sense that

13 it's -- it's what you say when you don't know?

14 A. It's what we say when we can't definitively

15 determine between, or distinguish between, for

16 example, an accident and a suicide, or a homicide

17 and an accident, yes.

18 Q. Sure. Okay. And then, if we descend to the

19 specific cause of death, there is as many as

20 there are the ways that people die in some sense.

21 I mean, this would be a gunshot in one case, it

22 would be a drug overdose in another, you would

23 try to identify the drug, if you could --

24 A. Correct.

25 Q. -- in that instance?

1 A. Correct.

2 Q. It may be just any -- any of a number of ways
3 that can cause people to die?

4 A. Yes.

5 Q. All right. And what you do in establishing cause
6 of death, if you can, is be as specific as
7 possible?

8 A. Yes. And I would say, based on the materials and
9 evidence that's present, we make an opinion on
10 that, yes.

11 Q. All right. And by specific as possible, let's,
12 since you are talking today about gunshots, let's
13 use a gunshot case. When you get a full course
14 or, you know, most of the course, you may find
15 multiple gunshot wounds in evidence at autopsy?

16 A. Yes.

17 Q. When that happens, you make an effort, to the
18 extent medically possible, to determine which of
19 the gunshot wounds would have led to death?

20 A. Yes. And in some cases there are multiple wounds
21 and others I would describe as non-lethal and
22 others are potentially lethal.

23 Q. Sure.

24 A. Others are definitely lethal.

25 Q. Sure. So -- And, again, just by way of example,

1 if someone has five gunshot wounds, you may be
2 able to say, for example, that two of these
3 definitely would have been lethal; two definitely
4 would not have been lethal in the ordinary course
5 of medical care; and maybe the fifth, possibly
6 lethal?

7 A. Correct.

8 Q. Something like that. And just as an example.

9 A. Yes.

10 Q. All right. Now, here you saw evidence of two
11 gunshot entrance wounds?

12 A. Yes.

13 Q. To bones that you could identify, personally, as
14 probably being from a human skull?

15 A. Correct.

16 Q. And as to which you had more specific locations
17 from Dr. Eisenberg?

18 A. Yes.

19 Q. You saw no bones displaying anything you viewed
20 as an exit wound?

21 A. Correct.

22 Q. A bullet leaving the body.

23 A. Correct.

24 Q. You, therefore, were not able to draw any
25 conclusions about what we might call wound track?

1 A. Correct.

2 Q. The direction or angle at which a bullet
3 penetrates the body?

4 A. I would say, based on the material that I had, I
5 wasn't able to do that, correct. In some cases,
6 when you have more intact specimens, you can
7 certainly render more definitive --

8 Q. Sure?

9 A. -- opinions as to wound track, direction of fire,
10 that type thing.

11 Q. But those were not opinions you were able to form
12 or render here?

13 A. Correct.

14 Q. Now, tell the -- I mean, in your opinion, the
15 cause of death here was one or two gunshot
16 wounds?

17 A. Yes.

18 Q. To the head?

19 A. Correct.

20 Q. All right. Tell, the ladies and the gentlemen of
21 the jury all of the information you have in this
22 case that allows you to conclude that either of
23 the two bullets here first struck skull bone
24 while the victim was alive?

25 A. Okay. Could you repeat that question.

1 Q. Sure. I would like you to simply tell the ladies
2 and gentlemen of the jury what information you
3 have here that allows you to conclude that either
4 of these gunshot wounds occurred while the victim
5 was alive, that is, bullet struck bone, while
6 that person was alive?

7 A. I don't specifically think that there's any one
8 piece of information that would say that the
9 person was alive, with a beating heart, or an
10 intact brain. There's material and I was given
11 information that there was a spent bullet
12 recovered at the scene that contained the blood
13 specimens of the decedent.

14 And that would be indicative to me that
15 the bullet had passed through the brain at a
16 time, whether it was liquified blood, or that it
17 wasn't going through specifically bone fragments.
18 And I would think that that would be the
19 predominant -- that would be information that I
20 think would be helpful in making that type of
21 opinion.

22 Q. All right. We have certainly had testimony that
23 Teresa Halbach's DNA was found on a bullet
24 fragment?

25 A. Right.

1 Q. I, at least, recall no testimony that Teresa
2 Halbach's blood was found on a bullet fragment,
3 but the jury will decide in the end, that. And
4 in a sense it doesn't matter.

5 Is there any way to distinguish the
6 bullet you -- hole you saw, either one, from a
7 gunshot that was fired into the head of an intact
8 corpse, from a gunshot that was fired into the
9 head of a living person?

10 A. I don't think I could make a definitive
11 determination based on whether the individual was
12 in a peri-mortem time frame or whether the
13 individual was skeletonized. It would be my
14 opinion that the wounds showed an intact, robust
15 bone that is consistent with what I would say
16 non-skeletonized material, meaning that these
17 look like -- typically like an entrance wound
18 through a bone of a person who is not a skeleton.

19 And the way -- the reason I described
20 that and I would make that -- that clarity is
21 that in a skeletonized bone, where you have got
22 dried bone material, as the bullet passes through
23 it, I would suspect that there would be a
24 different kind of fracturing and that it wouldn't
25 get the same type of gunshot wound, particularly

1 in the parietal bone fragment that I can see.

2 That would just be my opinion on that.

3 Q. Okay. So, you know, I'm trying to track you
4 here, but as I understand, you think these bullet
5 holes were made before the body was in a purely
6 skeletal condition?

7 A. Yes.

8 Q. All right. Let's go back to the question I
9 asked. The gunshot wounds to the bones you
10 observed, would be indistinguishable if the
11 bullet had hit the bone 30 minutes after the
12 person had expired or 3 seconds before the person
13 expired?

14 A. I would agree with that, yes.

15 Q. You would. And if the person was 30 minutes
16 expired when the bullet hits bone for the first
17 time, then the gunshot did not cause the death,
18 true?

19 A. If the individual was dead before the gunshot --
20 sustained the gunshot wound to the head, then the
21 bullet would not have caused the death.

22 Q. The bullet wounds you saw are as consistent with
23 a bullet striking a non-skeletal body after
24 death, as they are with a bullet striking the
25 skull before death?

1 A. I would say so, yes.

2 Q. If death occurred before the first bullet struck
3 bone here, then there was another cause of death
4 entirely, as a matter of logic, wasn't there?

5 A. I would agree with that, yes.

6 Q. And as to -- In that situation, as to cause of
7 death, you cannot give an opinion?

8 A. Are you talking about specifically in this case
9 or are you talking about if I have got a skull
10 with two bullet holes in it without any other
11 information?

12 Q. Well, let's start without any other information.

13 A. I would say that the two gunshot wounds to the
14 head are highly suspicious for a non-intentional,
15 or the individual would not have done it
16 themselves, because of the multiple nature of the
17 injury.

18 Q. Sure.

19 A. And with the caveat that, you know, whether it
20 was done before or after the person died.

21 Q. Okay. So, let's -- let's unpack that. If we
22 have two gunshots to the head, we're highly
23 doubtful that this is suicide?

24 A. I would say so, yes.

25 Q. Right. Most suicides --

1 A. Assuming that these were the ones that caused her
2 death --

3 Q. Sure.

4 A. -- yes.

5 Q. Most suicides don't get off a second shot?

6 A. Correct.

7 Q. All right. You would suspect homicide?

8 A. Correct.

9 Q. But you also would have to suspect accidental
10 death if you had gunshot holes in a skull, absent
11 other information.

12 A. I wouldn't suspect that there would be two
13 perforations with a accidental type -- or two
14 entrance wounds with an accidental type death,
15 unless it was a multiple missiles; for example,
16 like a buck shot injury, or something along those
17 lines.

18 Q. Sure. And in that instance it would be relevant
19 information if the deceased was found dressed in
20 blaze orange in shrubbery, in the middle of the
21 woods in the third week of November. That's
22 information that might be relevant to determining
23 whether two gunshot wounds to the head were
24 accidental or homicidal?

25 A. I would say that would be helpful information

1 yes.

2 Q. Sure. You would need more information, in any
3 event?

4 A. Yes.

5 Q. By homicide, if we back up on manner of death, we
6 didn't explain that here, but this, in your
7 argot, homicide would mean the intentional
8 causation of another persons death?

9 A. That a homicide in my, would be that the death
10 was caused by another person, correct.

11 Q. Correct. And it does not necessarily connote
12 legal liability, homicide in that sense?

13 A. I don't make those determinations.

14 Q. Right. So if something later proves to be, let's
15 say a justified shooting in self defense, it's
16 still a homicide in your world because it's one
17 person causing the death of another?

18 A. Correct.

19 Q. All right. Now, back closer, I guess to this
20 case, you can't tell whether these bullet holes
21 in the skull were made before death or after
22 death. You can -- You can tell only that they
23 are made before the remains are skeletal?

24 A. Correct.

25 Q. All right. And if the bullet wounds were made

1 after death, then necessarily something else is
2 the cause of death?

3 A. I would agree with that.

4 Q. And as to what that might be, there's almost
5 nothing you could rule out, based on the
6 information you had?

7 A. Based on the evidence that I have, yes.

8 Q. So --

9 A. There could be other -- There could be other, for
10 example, drugs or something along those lines --

11 Q. Sure.

12 A. -- that I don't have access to.

13 Q. And we could sit here all a day on that, but
14 someone could have been strangled and then shot
15 after -- after they --

16 A. Certainly is possible.

17 Q. -- expired.

18 A. Yes.

19 Q. Beaten, shot after they expired.

20 A. Correct.

21 Q. Drugs, as you say, a drug overdose, shot after
22 they had died of the drug overdose?

23 A. Correct.

24 Q. And I won't go on but, in other words, there's
25 nothing that you can say about opining on cause

1 of death, if the gunshot wounds occurred after
2 death?

3 A. On the cause of death, yeah, I would say so.

4 Q. And then, likewise, once -- once we don't have a
5 cause of death, it's similarly difficult to
6 assign a manner of death?

7 A. Well, medical examiners and forensic pathologists
8 don't make determinations on manner of death in a
9 vacuum. We utilize, as I mentioned, evidence
10 from the scene. And if we can go to the scene,
11 personally, we use that information. Or if we
12 can't, then we use photographs and other people's
13 reports to use that information.

14 We use laboratory data. We use evidence
15 that's recovered. And we -- we put that together
16 and we render our opinion as to what the manner
17 of death is. We don't do it in a vacuum with a
18 single piece of information, in isolation from
19 all others.

20 Q. Of course not. Of course not. And in a cause of
21 death, for example, you cited to these jurors,
22 your understanding that a bullet or bullet
23 fragment was found with what you thought was
24 blood of the victim on it. And that, initially,
25 factored into your opinion on cause of death?

1 A. That was one of the things, yes.

2 Q. Sure. You now acknowledge, that as long as the
3 remains weren't skeletal, blood or DNA could have
4 been left on that bullet, passing through the
5 skull of a dead person?

6 A. Correct.

7 Q. Likewise, with manner of death you, of course,
8 consider all the information you have, that's
9 almost obvious, isn't it?

10 A. Correct.

11 Q. And some of the information you have here is that
12 the bone fragments you saw were burned?

13 A. Correct.

14 Q. Badly burned?

15 A. Correct.

16 Q. Burned to the point that they had fragmented and
17 fallen apart?

18 A. Yes.

19 Q. That suggested to you, in your line of work, some
20 effort to conceal the body or disguise the body?

21 A. Exactly.

22 Q. And you said to yourself, now, with that
23 information, why would someone want to conceal
24 the fact of death. Well, one obvious reason
25 would be that the death itself, you know, the

1 fact that the person died, might be incriminating
2 or awkward in some way.

3 A. That would be information that would be valuable,
4 yes.

5 Q. Sure. And an effort to conceal death is
6 something you see frequently, or at least not
7 infrequently, in homicide cases?

8 A. Correct.

9 Q. It's also something you will see less frequently,
10 but it's happened in your experience, you will
11 see this in accidental deaths, on occasion?

12 A. I would say it would be pretty rare, yes.

13 Q. Well, let's -- let's offer some paradigms and see
14 if you have had these kinds of cases in your
15 experience. None of them -- And I'm not
16 suggesting any of these paradigms bear any
17 similarity to this case, but I want to explore
18 the relation between an unknown cause of death
19 and the manner of death.

20 A. Sure.

21 Q. Okay? A young teenager who's become pregnant out
22 of wedlock, feels a great deal of shame about
23 that, conceals the pregnancy, ultimately gives
24 birth by herself, the baby dies for want of
25 medical care and an effort is made to conceal the

1 newborn.

2 A. And you are giving that as an example of what --

3 Q. Concealment.

4 A. -- manner of death?

5 Q. Concealment in connection with an accidental
6 manner of death.

7 A. I don't know if I would attribute that to an
8 accidental manner of death; it would depend upon
9 the totality of the information that's available.

10 Q. Sure.

11 A. Resuscitation efforts, evidence of trauma and
12 injury on the child, age, etcetera. So, again,
13 you can't take a specific issue and look at it in
14 isolation. You need all the information.

15 Q. Understood. And sometimes in the sort of
16 paradigm that I have explained, sometimes,
17 unfortunately, the young mother will smother the
18 infant or do something active to cause the
19 infant's death, other times it simply the lack of
20 medical care, the infant can't thrive or survive?

21 A. Correct.

22 Q. Dies of, in a sense, a natural cause or an
23 accidental cause, for want of medical care at the
24 time of birth?

25 A. Again, I don't know if we're talking about an

1 accident or ...

2 Q. Right.

3 A. -- or another type of injury, that you are
4 talking about.

5 Q. Yes.

6 A. But I think it would be very rare to call a death
7 like that an accident.

8 Q. All right.

9 A. There -- I mean, there might be other examples.

10 Q. Another example would be, something you may have
11 run across, two people involved in an adulterous
12 affair or liaison and one drops dead of a heart
13 attack. Some effort may be made under those
14 circumstances to conceal the fact, or at least
15 the timing or place of death.

16 ATTORNEY GAHN: Objection, your Honor, as
17 to relevancy of this.

18 THE COURT: Mr. Strang.

19 ATTORNEY STRANG: I'm simply trying to
20 establish that there are instances in which
21 accidental death, as a manner, will be matched with
22 concealment.

23 THE COURT: Is that in dispute?

24 ATTORNEY STRANG: Is that in dispute?

25 THE COURT: Do you acknowledge that such

1 circumstances can exist?

2 THE WITNESS: I would acknowledge that
3 there's concealment in some cases, your Honor, but
4 examples that are given here, I don't think I would
5 agree with. Could I expound on that?

6 THE COURT: Go ahead.

7 ATTORNEY STRANG: Sure.

8 A. I have never seen a individual burned in an
9 attempt to conceal an adulterous affair and
10 somebody who dies suddenly during an act of
11 intercourse. On occasion, we will see
12 individuals who die from drug overdoses that
13 would be dumped at a different location, but it
14 would be very uncommon or rare to see any
15 mutilation or other types of bodily disruption to
16 hide that kind of death.

17 Q. Okay. Fair enough.

18 A. And so the type of burning and charring that I
19 would see in this case would be, in my opinion
20 and my experience, most consistent with homicidal
21 type of manners of death and extremely rare in
22 others.

23 Q. Fair enough. Okay. You simply, you think this
24 is most consistent, you can't rule out other
25 possibilities?

1 A. I can't rule out other possibilities beyond --
2 beyond the impossible, correct.

3 Q. Well, and one of the problems we have here is
4 that we're dealing -- we're in a forensic
5 setting, the intersection of the pathology with
6 law, correct?

7 A. Yes.

8 Q. And you know that there is both a first degree
9 intentional homicide charge that these folks will
10 have to decide and a mutilating a corpse charge
11 they will have to decide, correct?

12 A. I'm not aware of what the -- of what the legal
13 standards are being used here as far as --

14 Q. Or what the charges are?

15 A. And what the charges are.

16 Q. You are familiar with the fact that Wisconsin has
17 a crime for mutilating or concealing a corpse?

18 A. I am, yes.

19 Q. All right. And you are familiar that Wisconsin
20 has a crime of first degree intentional homicide?

21 A. I am aware of that, yes.

22 Q. All right. And you are not -- Your field of
23 expertise does not allow you to render an opinion
24 on who fired a shot, or shots, into this skull?

25 A. No. I don't have that information, no.

1 Q. Your area of expertise does not allow you to
2 render an opinion on who caused the burning or
3 charring of the bone fragments you saw?

4 A. That's correct.

5 Q. And whether one or more, two, three, four,
6 however many people are involved, in one or the
7 other of those alleged crimes, you are not able
8 to say?

9 A. In this case I can't, no.

10 Q. Right. And whether one person is involved in one
11 offense, but not in the other, you are not able
12 to say?

13 A. Correct.

14 Q. All right. So these are the reasons for my
15 questions and I guess in the end, what you are
16 telling us is that your opinion on manner of
17 death rests in part on the fact that you see
18 gunshot entrance wounds?

19 A. Correct.

20 Q. And then rests on the burning or charring that
21 you saw here, of the skeleton?

22 A. Correct. Could I expound on that?

23 Q. Well, I don't want to -- if you have useful
24 information --

25 A. There may be other issues.

1 Q. -- you can answer that question.

2 A. There may be other issues related to the
3 determination of manner of death, in addition to
4 simply the evidence of gunshot wounds and the
5 evidence of concealment.

6 Q. And are there other specific issues here that you
7 rely upon in offering the opinion that homicide
8 is the manner of death here?

9 A. I would have other information, yes.

10 Q. Do you have other information in this case?

11 A. Yes.

12 Q. That came from the police?

13 A. It came from the investigators, yes.

14 Q. All right. Your opinion, in any event, is that
15 homicide was the manner of death?

16 A. Correct.

17 Q. You did not view this as unexplained?

18 A. Correct.

19 Q. Notwithstanding the fact that you cannot here,
20 as I understand you, assign a cause of death
21 other than by assuming that the bullet holes were
22 made, at least one of them was made, while the
23 person was alive?

24 A. Correct.

25 Q. Just to be perfectly clear here, in the end, as

1 you sit here today, you can't tell this jury
2 whether one or both of these gunshots were made
3 while the person was alive?

4 A. That would be correct, yes.

5 Q. If they were made after death, they did not cause
6 the death?

7 A. That would be true, also.

8 Q. But your opinion remains that gunshot is the
9 cause of death?

10 A. Correct.

11 ATTORNEY STRANG: That's all I have.

12 THE COURT: Mr. Gahn.

13 ATTORNEY GAHN: Thank you, your Honor.

14 REDIRECT EXAMINATION

15 BY ATTORNEY GAHN:

16 Q. Dr. Jentzen, you talked about, as a medical
17 examiner, not viewing one particular piece of
18 information in a vacuum and you talked about
19 having helpful information and looking at the
20 totality of the circumstances; would you explain
21 what all of that means, to the jurors, in the
22 context of this case.

23 A. Well, on a daily basis, the medical examiner, I
24 mean, for example, I would investigate hundreds
25 of deaths a year. And that investigation entails

1 seeing information: History, medical history of
2 the individual, habits and social habits of the
3 individual, past medical history, and then,
4 finally, the appearance of the body. Possibly
5 the position of the body in some cases, at the
6 scene, may determine whether the death is an
7 accident or a natural death, based simply on the
8 position and other artifacts that we would see on
9 the body.

10 Medical examiners and coroners do this
11 on a routine basis and looking at individual
12 cases. And to take one specific area or one
13 single piece of information and to say that this
14 is an accident, or a homicide, or a undetermined
15 case, I think is not real consistent with how
16 medical examiners and coroners function in
17 evaluating and investigating deaths.

18 On a daily basis, we make determinations
19 as to cause and manner of death, based on
20 evidence, information, scene investigation,
21 medical history.

22 Q. And how many years have you been in the
23 profession as a medical examiner?

24 A. This is my 21st year as a medical examiner for
25 Milwaukee.

1 Q. And did you state that annually you will look at
2 maybe 100 cases involving gunshot wounds to the
3 skull?

4 A. Typically our office would investigate between, I
5 would say, roughly 100 to 120 or 30 homicides and
6 probably 100 to 130 or 40 suicides. And 60 to 70
7 percent of those are gunshot wounds. And the
8 vast majority of those are to the head and upper
9 torso areas. Many times there's multiple wounds,
10 there's different types of ammunition.

11 And in addition, that we attend lectures
12 and other educational programs to expand our
13 understanding of both the -- the bodies, and the
14 projectiles and weapons, and the circumstances,
15 and we render opinions, legally bound -- binding
16 that determine cause and manner of death where
17 there is a lot at stake.

18 ATTORNEY STRANG: Your Honor, I object to
19 the reference to a legally binding determination of
20 this witness, that's entirely out of place and the
21 jury should be told that there is no legally binding
22 determination by this witness.

23 ATTORNEY GAHN: I don't believe that's what
24 the doctor was saying.

25 THE COURT: Well, I agree, I guess it

1 depends on your definition of legally binding, but
2 to the extent, certainly, it invades the province of
3 the jury, the Court agrees very strongly, that's the
4 jury's determination in this case. And I will
5 instruct the jury to that affect. I'm not sure of
6 the context in which it was used.

7 ATTORNEY GAHN: I took it to mean that he
8 just gives opinions in cases that other people make
9 decisions on. That's what I took the context in.

10 THE COURT: Anything else?

11 ATTORNEY GAHN: Yes.

12 Q. (By Attorney Gahn)~ Doctor, do you believe that
13 you had sufficient information in this case to
14 render an opinion as to manner of death and cause
15 of death?

16 A. Yes.

17 Q. And today you are in Calumet County testifying,
18 right?

19 A. Correct.

20 Q. If this case had happened in Milwaukee County and
21 with all the information that you know in this
22 case, would you have rendered an opinion as to
23 manner and cause of death, if this were your case
24 in the Milwaukee County Medical Examiner's
25 Office?

1 A. I would have rendered the same opinion.

2 Q. And is that opinion -- And, again, what is your
3 opinion as to the manner of death of Teresa
4 Halbach?

5 A. It would be my opinion that she died as a result
6 of gunshot wounds to the head and the manner of
7 her death is homicide.

8 ATTORNEY GAHN: Thank you. That's all I
9 have.

10 THE COURT: Anything else, Mr. Strang?

11 ATTORNEY STRANG: No, thank you.

12 THE COURT: All right. The witness is
13 excused. Members of the jury, that is all the
14 evidence that we're going to hear today. At this
15 time I'm going to excuse you for the rest of the
16 day. I will let you know in a minute, because of
17 the order of things, why. Before I do that, since
18 we are adjourning for the weekend, at this point I
19 want to read to you the warning that you have heard
20 before, but it's still very important.

21 The Court's decision not to sequester
22 the jury during the trial in this case is
23 dependent on the jurors not listening to,
24 watching, or reading any news accounts of the
25 case, nor discussing it with anyone, including

1 members of your family or other jurors.

2 For these reasons it is vital that you
3 do not listen to any conversation about this
4 case. Do not read any newspaper or internet
5 reports or listen to any news reports on radio or
6 television about this case.

7 To assure that you are not exposed to
8 any improper media coverage, the Court has
9 ordered that, for the duration of the trial, you
10 do not watch the local news on television, do not
11 listen to the local news on radio, and do not
12 read the newspaper unless you first have someone
13 remove any articles about the case. In addition,
14 you are not to visit any internet websites or web
15 logs which may include any information about the
16 case.

17 Since we are breaking for the weekend, I
18 understand that some of you may be working at
19 places of employment. Do not discuss the case
20 with any employers, employees, or patrons, do not
21 volunteer your status as a juror to anyone.

22 If anyone attempts to discuss the case
23 with you, politely but firmly notify them that
24 you are prohibited from discussing the case. If
25 you're involuntarily exposed to any information

1 about the case from any source, take steps to
2 immediately avoid any further exposure.

3 Should you be exposed to any reports or
4 communications from any source concerning the
5 case during the trial, or should you become aware
6 of anything you believe may affect your ability
7 to serve as a juror, you should not discuss your
8 concerns with any other jurors but should report
9 any concerns to the jury bailiff.

10 Now, I have also told you, previously,
11 that occasionally during the trial there will be
12 times when the Court has to take up matters with
13 the attorneys, outside the presence of the jury.
14 There is going to be one such occasion on Monday.
15 And because it is a matter which may take the
16 greater part of the day, rather than have you
17 sitting around and waiting until we're finished,
18 I'm not going to have the jury report for duty on
19 Monday. I'm going to have you report for duty on
20 Tuesday at the normal time.

21 Because of the fact that you are not
22 going to be here on Monday and it's a weekday, I
23 want to make especially sure that you pay
24 attention to the warning I just read, that is,
25 make sure you don't discuss it with anyone, avoid

1 any exposure to the case.

2 But it is necessary for the Court to
3 hear information outside your presence on Monday
4 and for that reason you will not be reporting on
5 Monday but reporting on Tuesday morning, at the
6 normal time. With that, I will excuse you for
7 the weekend at this time.

8 ATTORNEY GAHN: Your Honor, may I move in
9 Exhibit 432, the CV of Dr. Jentzen?

10 ATTORNEY STRANG: No objection.

11 THE COURT: All right. That exhibit is
12 admitted.

13 (Jury not present.)

14 THE COURT: You may be seated. Appears the
15 jury is not disappointed that we'll be going home
16 early. All right. Then, on Monday, we'll report
17 back to this courtroom at the normal time. Correct,
18 counsel?

19 ATTORNEY STRANG: Yes, sir.

20 THE COURT: All right. I will see you
21 then.

22 ATTORNEY FALLON: Your Honor, could we have
23 an accounting on the exhibits; there's a number of
24 exhibits that may not have been moved in that we
25 would like to move into evidence at this time. And

then if the Clerk would check her score cards.

THE CLERK: Sure.

THE COURT: I have to address another matter at this time. Let me suggest this, why don't the attorneys meet with the clerk first thing Monday morning. If you discover there is action that needs to be taken with respect to any of the exhibits, we'll do it at that time.

ATTORNEY FALLON: All right. Thank you.

(Proceedings concluded.)

1 STATE OF WISCONSIN : CIRCUIT COURT : MANITOWOC COUNTY
2 BRANCH 1

3 STATE OF WISCONSIN,

4 PLAINTIFF,

JURY TRIAL

TRIAL - DAY 16

5 vs.

Case No. 05 CF 381

6 STEVEN A. AVERY,

7 DEFENDANT.

8 **DATE:** MARCH 5, 2007

9 **BEFORE:** Hon. Patrick L. Willis
10 Circuit Court Judge

11 **APPEARANCES:** KENNETH R. KRATZ
Special Prosecutor
12 On behalf of the State of Wisconsin.

13 THOMAS J. FALLON
Special Prosecutor
14 On behalf of the State of Wisconsin.

15 NORMAN A. GAHN
Special Prosecutor
16 On behalf of the State of Wisconsin.

17 DEAN A. STRANG
Attorney at Law
18 On behalf of the Defendant.

19 JEROME F. BUTING
Attorney at Law
20 On behalf of the Defendant.

21 STEVEN A. AVERY
Defendant
22 Appeared in person.

23 **TRANSCRIPT OF PROCEEDINGS**

1 THE COURT: At this time the Court calls
2 State of Wisconsin vs. Steven Avery Case No. 05 CF
3 381. We're here this morning on a motion hearing as
4 part of the continuation of the trial in this
5 matter. Will the parties state their appearances
6 for the record, please.

7 ATTORNEY FALLON: Good morning, your Honor.
8 May it please the Court, the State appears by
9 Assistant Attorney General Tom Fallon, Assistant
10 District Attorney Norm Gahn, and District Attorney
11 Ken Kratz as Special Prosecutors for the State of
12 Wisconsin.

13 ATTORNEY STRANG: Good morning, Steven
14 Avery is in person, Jerome Buting and Dean Strang on
15 his behalf.

16 THE COURT: In terms of the agenda today,
17 it's the Court's understanding we're going to begin
18 by hearing the State's motion to admit EDTA test
19 results. Both parties agree that the State will
20 make its offer of proof on the record today. The
21 Court will then hear oral argument and make a
22 determination as to whether or not the State's
23 proffered evidence is admissible.

24 Should the Court determine that the
25 evidence is admissible, the Court will then hear

1 the defendant's motion for sequential independent
2 testing and funding. And there's also a motion
3 that was filed, or made orally by the defense
4 during trial, in which the defense renewed its
5 fair testing motion. And the Court will hear
6 oral argument on that at the end of the day
7 today, time permitting. Counsel, is that your
8 understanding of our agenda?

9 ATTORNEY GAHN: Yes, your Honor.

10 THE COURT: All right. The State may call
11 its witness.

12 ATTORNEY GAHN: State would call Dr. Marc
13 LeBeau.

14 THE CLERK: Please raise your right hand.

15 **DR. MARC LEBEAU**, called as a witness
16 herein, having been first duly sworn, was
17 examined and testified as follows:

18 THE CLERK: Please be seated. Please state
19 your name and spell your last name for the record.

20 THE WITNESS: My name is Marc, M-a-r-c,
21 LeBeau, L-e-B-e-a-u.

22 **DIRECT EXAMINATION**

23 BY ATTORNEY GAHN:

24 Q. What is your occupation?

25 A. I'm the unit chief of the Chemistry Unit at the

1 FBI Laboratory.

2 Q. And where is your laboratory located?

3 A. It's located in Quantico, Virginia.

4 Q. And how long have you been employed at that
5 laboratory?

6 A. Since 1994.

7 Q. And how long have you been the unit chief of the
8 Chemistry Unit?

9 A. Since September of 2000.

10 Q. And what are your duties within the FBI
11 Laboratory?

12 A. I manage the day-to-day operation of the unit
13 overseeing not only the cases that come into our
14 unit for analysis, but also review the results of
15 the scientists that work under me to ensure that
16 all of the requirements are in place before the
17 reports are released to our contributors.

18 Q. And what is your educational background, please.

19 A. I have a bachelor's degree in chemistry and
20 criminal justice from Central Missouri State
21 University in Warrensburg, Missouri. I have a
22 master's degree in forensic science from the
23 University of New Haven, in West Haven
24 Connecticut. And I have a doctorate in
25 toxicology from the University of Maryland in

1 Baltimore.

2 Q. And, Doctor, would you please describe any
3 experience and special training that you have in
4 your field?

5 A. Well, when I started with the FBI Laboratory, I
6 was thoroughly trained in the relevant areas of
7 forensic chemistry and forensic toxicology, as it
8 pertains to the types of examinations that we are
9 typically asked to perform in our laboratory.

10 I worked for four years before I started
11 with the FBI Laboratory. I worked as a
12 laboratory supervisor at a medical examiner's
13 office in St. Louis, Missouri. Before that I was
14 a chemistry instructor for the University of New
15 Haven. I worked as a laboratory intern for a
16 private toxicology laboratory and I have also
17 worked as a laboratory technician for Monsanto
18 Chemical Company in St. Louis, Missouri.

19 Q. Do you belong to any professional or scientific
20 organizations in your field?

21 A. Yes, I do.

22 Q. And what are they, please?

23 A. I'm an active member of the Society of Forensic
24 Toxicologists in which I serve on the Board of
25 Directors in that organization and also chair one

1 of their professional committees. Likewise, I'm
2 a member of the International Association of
3 Forensic Toxicologists and, again, I'm on two
4 committees in that organization. I'm also an
5 active member of the American Academy of Forensic
6 Scientists.

7 Q. Do you attend conferences within your field?

8 A. Yes, I do.

9 Q. And are you ever asked to present or speak at the
10 conferences in your field?

11 A. Yes, I am, quite frequently.

12 Q. Could you describe some of those for his Honor?

13 A. I'm asked quite often to be a speaker in a number
14 of workshops for these different organizations
15 and I'm also often invited to lecture in areas of
16 forensic toxicology, specifically with drug
17 facilitated crimes. I often get invitations for
18 that.

19 Q. Would you explain a little bit of what you mean
20 by drug facilitated crime.

21 A. Yes, these are crimes in which, as the name
22 implies, the crime itself is helped out by the
23 fact that an individual has slipped a drug and
24 that drug usually incapacitates an individual so
25 that the crime can occur.

1 Q. Is the FBI Laboratory accredited?

2 A. Yes, it is.

3 Q. What does that mean to be accredited?

4 A. It's that an outside expert body will come into
5 your laboratory and inspect its practices to
6 ensure that it's following the standards that
7 have been set up by that outside body.

8 Q. And do you undergo proficiency testing at the
9 FBI?

10 A. Yes, we do.

11 Q. And do you yourself undergo proficiency testing?

12 A. Yes, I do.

13 Q. And have you passed all your proficiency tests?

14 A. Yes, I have.

15 Q. Have you ever testified as an expert before?

16 A. Yes, I have.

17 Q. And how many times?

18 A. I don't keep track of the numbers, but it's
19 roughly 40 or 50 times I have testified.

20 Q. Have you ever been rejected as an expert in your
21 field?

22 A. No, I have not.

23 Q. Have you authored or coauthored any peer review
24 journals or articles?

25 A. Yes, I have.

1 Q. And could you explain some of those to the Court?

2 A. I have authored or coauthored approximately 20
3 scientific articles for chapters in books. These
4 have ranged in various areas of forensic
5 chemistry and forensic toxicology.

6 Q. Have any of these articles dealt with the use of
7 a technique called LC/MS/MS?

8 A. Yes, they have.

9 Q. And could you describe for the Court some of the
10 articles that you have coauthored or perhaps if
11 there are any textbooks that you have been
12 involved in?

13 A. Yes, I have authored an article that analyzes for
14 a drug called Rohypnol using LC/MS/MS techniques.
15 I have coauthored an article that talks about a
16 drug called Mivacurium, also using LC/MS/MS
17 techniques.

18 ATTORNEY BUTING: Could you -- Could you
19 just spell, when you get to names of drugs like
20 that, could you spell them, please.

21 A. Yes, Rohypnol is R-o-h-y-p-n-o-l. Mivacurium,
22 M-i-v-a-c-u-r-i-u-m. And then, additionally, I
23 coauthored an article on another drug that's
24 called Doxacurium, D-o-x-a-c-u-r-i-u-m. And,
25 again, that's using LC/MS/MS techniques.

1 I recently was an invited guest reviewer
2 for a textbook on the topic of LC/MS and LC/MS/MS
3 techniques. And then I have also coedited a book
4 on drug facilitated sexual assault that involved,
5 within the chapters, the topic of LC/MS and
6 LC/MS/MS techniques.

7 Q. And when you talk about the LC/MS/MS techniques,
8 is that the technique that you used in the
9 analysis in this case?

10 A. Yes, it is.

11 Q. Would you describe how your lab became involved
12 in this case?

13 A. Well, I received a phone call from the District
14 Attorney's Office asking if we had a method that
15 would allow us to determine if EDTA was present
16 in a bloodstain or not. Through the course of
17 the conversation, we were asked if we would be
18 willing to work this case for the State. And we
19 agreed to do the work on this case.

20 Q. And were you informed of the nature of this case,
21 basically that there were accusations of
22 planting, by law enforcement officers, of
23 evidence?

24 A. Yes, I was.

25 Q. And why would the FBI be concerned about a case

1 that involves allegations of planting evidence by
2 law enforcement officials?

3 A. Well, one of the many type of cases that the FBI
4 investigates are corruption by public officials.
5 So it's one of the areas we consider to be a very
6 serious accusation for two reasons.

7 If there's a crooked public official out
8 there, we want to make sure they get off the
9 streets. And, likewise, if an innocent public
10 official is being wrongly accused of something,
11 we want to at least try to set the record
12 straight to ensure the public's trust in that
13 organization or that individual.

14 Q. Before we go any further, Doctor, I have marked
15 that Exhibit as 433; is that correct?

16 A. Yes.

17 Q. Could you please describe what that exhibit is.

18 A. This is a copy of my curriculum vitae describing
19 my experiences, my education, etcetera.

20 Q. And does that basically summarize what you
21 testified today about your qualifications?

22 A. Yes, it does.

23 Q. Now, you were sent samples to test in this case;
24 is that correct?

25 A. Yes, I was.

1 Q. And could you tell the Court what it was that was
2 sent to you?

3 A. We received a number of different items. They
4 were swabs, collected from a vehicle, a RAV --
5 Toyota RAV4, as well as control swabs, and a tube
6 of blood from Steven Avery.

7 Q. And what type of instrument did you use in
8 testing these items?

9 A. We used the LC/MS/MS instrument.

10 Q. And could you describe for the jury just exactly
11 what this instrument is and what it tests for?

12 A. Well, the LC/MS/MS instrument is actually three
13 different instruments that are linked together.
14 The LC stands for liquid chromatograph. And what
15 this does is it allows us to take a mixture of
16 chemicals and separate them into individual
17 components so that they are presented to the mass
18 spec portion, the MS portion, individually.

19 So a good example of this would be if
20 you had a sack full of marbles, if you will, and
21 you had small marbles, medium size marbles and
22 large marbles. And if you even complicate it
23 more and suggest that the large marbles were both
24 red -- some were red and some were blue.

25 If you would pass the marbles,

1 simplifying it, through this instrument, it would
2 separate them out so that initially the small
3 marbles would come out, and then maybe a minute
4 later the medium size marbles, and then a minute
5 later maybe the large blue marbles, and then 30
6 seconds after that, the red large marbles. So it
7 allows those to be separated and then introduced
8 to the next instrument, which is your mass
9 spectrometer.

10 The mass spectrometer is an instrument
11 that gives you detailed information about the
12 weight of the chemical that it's analyzing, as
13 well as it applies energy to fragment that
14 chemical into many pieces that presents a very
15 consistent fragmentation pattern, that forms what
16 we call a chemical fingerprint, if you will.

17 It allows us to, then, search against
18 data bases for what chemicals give you that
19 particular fingerprint, and make the unequivocal
20 identification of the actual chemical. By
21 linking two mass spectrometers together, you are
22 able to do very complex and sophisticated
23 experiments that improves the specificity and
24 selectivity of the analytical procedure.

25 Q. And is this instrument something that is used in

1 the field of analytical chemistry?

2 A. Yes, it is.

3 Q. Would you explain to his Honor exactly what the
4 field of analytical chemistry is.

5 A. Analytical chemistry is simply a subset of the
6 overall field of chemistry. And it involves
7 analyzing matter for specific chemical
8 characteristics.

9 The most simple form of analytical
10 chemistry that we consider is, you are doing one
11 of two things, you are either given a material
12 and asked to figure out what that material is,
13 try to identify it, or at least characterize it
14 chemically; or you might be given a second -- a
15 separate material and asked to identify the
16 presence of a specific chemical in that material.
17 Both of those are different forms of analytical
18 chemistry.

19 Q. This LC/MS/MS instrument, basically, is this
20 designed to identify chemicals?

21 A. That's exactly right. It's an instrument that is
22 designed to identify the presence of chemicals.

23 Q. And does it make any difference what the chemical
24 is that you test for in this machine?

25 A. Generally, no, as long as the instrument is able

1 to detect that chemical, it can do the
2 identification.

3 Q. How long has this LC/MS/MS technology been
4 around?

5 A. It's been around for decades.

6 Q. And who would use this type of technology?

7 A. Well, mainly chemists; although, it's starting to
8 get more and more into the biology area, but
9 primarily chemists are the ones employing it.
10 These could be chemists in not just forensic
11 applications, but also in food science; in
12 agriculture and the petroleum industry; in
13 athletic steroid testing; in medicine, when they
14 are looking at proteins and things like that,
15 trying to map out proteins. Those are just some
16 of the examples of where it is used.

17 Q. Are there publications available within the
18 scientific community about the LC/MS/MS
19 technique?

20 A. Yes, there are.

21 Q. Could you describe for his Honor some of those --
22 or how many publications there are.

23 A. There are quite a few. I did a search of what's
24 called the National Library of Medicines Data
25 Base. And in the last 20 years there were over a

1 thousand specific articles in just their data
2 base. These are published journal articles that
3 dealt with the topic of LC/MS/MS and then there
4 are many, many more that deal just with the
5 simpler LC/MS technique.

6 Q. Are there any text books on this technology?

7 A. Yes, there are.

8 Q. Do any particular ones come to mind for you?

9 A. Well, as I indicated earlier, I was asked to
10 review one of those textbooks. It's called
11 applications of LC/MS in toxicology. It's a
12 textbook that was published by a scientist from
13 Italy; his name is Aldo Polettini.

14 Q. And do you take advantage by reading publications
15 and textbooks just to keep up to date in your
16 field?

17 A. Yes, I do.

18 Q. And, again, I would like you to explain to the --
19 and I think you touched on this for the Judge
20 but, again, any articles that you have coauthored
21 or peer reviewed, publications or textbooks in
22 this area.

23 A. Yes, there are many that I have coauthored or
24 primary authored.

25 Q. Could you give the Judge an idea of how many and

1 what it means to peer review, and some of your
2 coauthor experience?

3 A. As far as numbers that I have authored or
4 coauthored, I believe there's about four or five
5 different articles. As far as peer review, which
6 peer review is simply where a scientist sends a
7 manuscript of their research into a professional
8 journal and the editor of that journal then
9 reviews what -- what they are writing about and
10 then goes out to the field to find experts in
11 that particular area, and asks those experts to
12 critique the work that was done by that scientist
13 that submitted the manuscript.

14 They usually have a number of
15 suggestions that they send back to the editor who
16 passes them on to the original author. And then
17 they respond to those critiques and ultimately a
18 decision is made whether or not it's worthy of
19 being published in that particular scientific
20 publication.

21 I'm often asked to be a peer reviewer
22 for a number of the professional journals in my
23 field of study. Usually I have one on my desk at
24 every moment, essentially, to peer review.

25 Q. Have any of these dealt with the LC/MS/MS

1 technology?

2 A. Yes, quite a few have.

3 Q. And I think you spoke about the availability of
4 publications and the use of this technology, but
5 is it widely used throughout the scientific
6 community, this technology?

7 A. It is very widely used throughout the analytical
8 chemistry community.

9 Q. And what other fields -- and I know you touched
10 on this, but I would ask you to amplify a bit on
11 what other fields, besides analytical chemistry,
12 would find use for this LC/MS/MS technology?

13 A. Well, as I indicated, in environmental chemistry,
14 an area where they have used this technique to
15 test water, soil, or perhaps agriculture
16 products.

17 It's also used in food chemistry to
18 analyze different foods for contaminants, for
19 example, or to verify that certain things that
20 are supposed to be in that are there at a
21 particular level.

22 It is used in the pharmaceutical
23 industry when they are looking for new drugs;
24 drug discovery trials, when they are trying to
25 identify new metabolites from drugs.

1 Again, with proteomics, which is
2 studying proteins, it is probably the most widely
3 used instrument for that.

4 And it's used to test athletes for the
5 use of steroids.

6 It is used to look for residues of
7 explosives after a suspected bomb has gone off.

8 Pretty much any organic chemical can be
9 analyzed using this technique.

10 Q. And has the LC/MS/MS technology been subject to
11 any validation studies by the FBI?

12 A. Yes, it is has.

13 Q. Could you describe those for his Honor.

14 A. Well, whenever we have a new technique that's
15 introduced into the laboratory, a new instrument
16 into the laboratory, we basically verify that it
17 performs at the same level that the manufacturer
18 claims it performs at. And then we do a number
19 of studies in which we shoot standards that we're
20 used to seeing, chemicals we're used to seeing on
21 other instruments, to ensure that it gives the
22 appropriate response.

23 Then we employ, when it's time to
24 actually use that particular instrument for a
25 procedure that we're going to apply to

1 evidentiary material for a case, we go through a
2 validation study that verifies things such as
3 detection limit. It may verify interferences to
4 that instrument, any matrix affects from the
5 material that we're going to analyze, and a
6 number of other parameters, depending on what
7 type of method we're developing.

8 Q. Basically, what did the validation studies
9 demonstrate?

10 A. The validation study simply demonstrates the
11 method's fitness, or the instrument's fitness to
12 be used in the laboratory. It identifies the
13 limitations, if you will, to that particular
14 procedure, so, you, as a scientist can understand
15 where it may not perform at the level that you
16 had hoped it to, or in contrast, it kind of
17 supports that it works in the way that you
18 expected it to work, so.

19 Q. And has this LC/MS/MS technique been subject to
20 validation studies by other colleagues in your
21 field?

22 ATTORNEY BUTING: Objection, clarify as to
23 what technique he's referring to, LC/MS --

24 ATTORNEY GAHN: MS. The LC/MS/MS.

25 ATTORNEY BUTING: -- generally, you're

1 talking about, as an instrument?

2 ATTORNEY GAHN: Yes.

3 ATTORNEY BUTING: Okay.

4 Q. (By Attorney Gahn)~ Has the LC/MS/MS technique
5 been subject to validation studies by other
6 colleagues, within the scientific community?

7 A. Absolutely. Part of validation, in a way, is the
8 fact that it's published. And as I indicated, in
9 the last 20 years there are well over a thousand
10 different articles published by scientists
11 throughout the world, that have used the LC/MS/MS
12 technique.

13 Q. And do you believe that this technique is a
14 reliable and accurate technique and accepted
15 within the scientific community?

16 A. Absolutely, it is, yes.

17 Q. And does the FBI maintain quality assurance
18 measures and procedures to ensure that the
19 testing results are reliable?

20 A. Yes, we do.

21 Q. Could you describe some of those for his Honor.

22 A. We use a number of controls to verify that the
23 instrument is working properly, as well as that
24 any procedures that we use on that particular
25 instrument are performing as they are expected to

1 perform. For example, before we use the
2 instrument each day, we inject into it a -- what
3 we call a test mix, which is simply a standard of
4 either a group of analytes that we're used to
5 looking at, or in cases in which we're looking
6 for a targeted analyte, looking for a specific
7 chemical, we will shoot just a standard of that
8 chemical daily, to ensure that we're getting a
9 consistent response, day after day on that
10 instrument.

11 When we're actually running evidentiary
12 material, we introduce negative controls which
13 are simply closely matched to the evidence, the
14 same type of material that we put through the
15 procedure. We know those are supposed to be
16 negative before we start and we make sure they
17 are negative when we finish, in order to accept
18 those results.

19 Likewise, we run positive controls.
20 These are samples that we know are to be
21 positive, before we start the examination, and we
22 ensure that they are positive when they are
23 finished in order to accept the data that came
24 out of that run.

25 Q. And you have used the term analyte a few times,

1 could you please describe for the Court, what you
2 mean by analyte?

3 A. The analyte is simply the chemical that we're
4 looking for.

5 Q. And did you use the LC/MS/MS technique to test
6 for the presence of EDTA in the samples that were
7 sent to you in this case?

8 A. Yes, I did.

9 Q. What is EDTA?

10 A. EDTA stands for ethylenediaminetetraacetic acid.
11 And what it is, is it's a chemical. It's a
12 chemical that is known as a chelating agent,
13 which simply means it takes metals out of the
14 environment that it's in and, basically, attaches
15 to those metals so they can't be used as they
16 normally would in their free form.

17 Q. Could you give an example for his honor about
18 this chelating of this chemical?

19 A. Well, one place that we see EDTA used is in
20 poisoning cases where, for example, if someone is
21 suspected of having lead poisoning, they will
22 give EDTA into the body to bind up the lead so it
23 can't be absorbed into the body to minimize the
24 toxic effects of that poison.

25 Q. Where is EDTA found?

1 A. Well, it's -- it's pretty much found everywhere
2 these days. And I say that because it's the most
3 abundant manmade chemical that's present in the
4 environment. We have a really big problem with
5 it in -- particularly in soil, and in waste water
6 and streams and such, because it's been used so
7 much in so many projects over the past few
8 decades that it's become a real environmental
9 concern.

10 Q. Why does it pose a problem?

11 A. Because of the stability, it doesn't go away very
12 easily once it's, you know, as itself. But,
13 then, in particular, when you bind it with a
14 metal, it becomes very persistent.

15 Q. What is EDTA used for?

16 A. It's used in a number of products, commercial
17 products such as shampoos, detergents, where it's
18 trying to take the metals out of the water that
19 make your water hard. It will help remove those
20 metals so you get a better cleaning action with
21 those detergent or shampoos.

22 It is found in the paper industry, to
23 help in the bleaching process, to make the paper
24 whiter. It's found in agriculture products such
25 as some fertilizers. You see it in foods as

1 preservatives. And, then, of course, we use it
2 in laboratory settings.

3 Q. Is its chemical composition known?

4 A. It is, yes.

5 Q. And have there been scientific techniques or
6 methods available within the scientific community
7 to analyze or test for the presence of EDTA in
8 substances?

9 A. Yes, there have been.

10 Q. Could you describe some of those for his Honor.

11 A. Again, they are in all those different areas, so
12 there are methods that are related to food
13 chemistry that talk about EDTA and the analysis
14 of it in foods, same with water and in soil, in
15 commercial products such as shampoos and
16 detergents; so there are quite a few.

17 Again, if you do a search on -- in data
18 bases of published articles for methods for EDTA,
19 there are -- I'm trying to -- I believe there are
20 over 20 that deal with just LC/MS techniques.
21 There are over a hundred that have been used that
22 are published methods that are out there in the
23 literature for a variety of techniques.

24 Q. Now you used the LC/MS/MS technique to test for
25 the presence of EDTA, correct?

1 A. That's correct.

2 Q. Are there other techniques available which could
3 also test for the presence of EDTA?

4 A. Yes, there are.

5 Q. And would you please describe some of them.

6 A. Well, the LC/MS/MS is a very advanced instrument.
7 There are simpler forms of the same technique
8 that could be used. For example, the LC is what
9 is known as an HPLC, a high pressure liquid
10 chromatograph. That instrument, attached to a
11 simpler detector than a mass spectrometer, which
12 is called a diode, d-i-o-d-e, array detector,
13 could be used.

14 Then, you could also use a technique
15 that's called capillary electrophoresis. There
16 are techniques for using gas chromatography.
17 There are techniques for doing what is called
18 nuclear magnetic resonance spectroscopy and --

19 COURT REPORTER: Excuse me, could you
20 repeat that one more time?

21 THE WITNESS: Nuclear resonance,
22 r-e-s-o-n-a-n-c-e -- I'm sorry, I misspoke. Nuclear
23 magnetic resonance spectroscopy.

24 COURT REPORTER: Thank you.

25 A. And, then, you can take any of those -- nearly

1 any of those instruments and link them to a mass
2 spectrometer to get the information about the
3 identity of that chemical. It doesn't require,
4 essentially, the LC/MS/MS to do this particular
5 analysis. But, I mean, we did employ it because
6 I think it provides specificity and selectivity
7 that is important in a legal proceeding like
8 this.

9 Q. Who would have these types of instruments that
10 you described?

11 A. Any -- Any chemistry laboratory, analytical
12 chemistry laboratory, is going to have at least
13 one of those instruments I talked about.

14 Q. Have other scientists tested substances for the
15 presence of EDTA?

16 A. Yes, they have.

17 Q. And have they published their techniques and
18 findings in peer review articles?

19 A. Yes, they have.

20 Q. Could you describe a few of those for his honor.

21 A. Well, again, we get into the different areas.
22 There are publications in the environment.
23 Environmental studies that have been done looking
24 at the analysis of water, soil. There's
25 agriculture products that have been analyzed by

1 EDTA.

2 The commercial products that have been
3 analyzed for EDTA using a variety of different
4 instrumental techniques, the whole gamut: HPLC,
5 GC, capillary electrophoresis and, then, any of
6 those techniques linked with a mass spectrometer.

7 Q. And did you say that these findings and
8 techniques have been published in peer review
9 articles?

10 A. That's exactly right.

11 Q. And, again, please describe for his Honor, what
12 is a peer reviewed article?

13 A. A peer reviewed article is one --

14 ATTORNEY BUTING: Asked and answered.

15 THE COURT: Sustained, I have got that.

16 Q. (By Attorney Gahn)~ Could someone replicate those
17 testing processes?

18 A. Yes, they can.

19 Q. And can the instruments that test for EDTA, shall
20 we say in agriculture or soil, also be used to
21 test for EDTA in biological substances like
22 blood?

23 A. Yes, absolutely.

24 Q. What is a blood collection tube?

25 A. Well, a blood collection tube is the actual

1 vessel, that when you get blood drawn from you,
2 that's what usually a nurse or a medical
3 professional will put the blood into. It's a
4 small, usually glass tube that is under vacuum.
5 And that vacuum helps draw the blood out of your
6 vein into the tube.

7 Q. Are there different kinds of blood collection
8 tubes?

9 A. Yes, there are.

10 Q. Now, Dr. LeBeau, you prepared a short PowerPoint
11 demonstration; do you believe that would be
12 helpful for the Judge?

13 A. Yes, it would be.

14 Q. And would you please describe the different kinds
15 of blood collection tubes available?

16 A. Well, there are a number of different tubes that
17 are available. And they may or may not have
18 preservatives and anticoagulants in them. We can
19 tell what's in a tube simply by looking at the
20 color of the cap on top of that tube.

21 The red-stoppered tube, for example, has
22 nothing in it. So when blood goes into it, it's
23 simply blood with nothing added to it. A
24 yellow-stoppered tube has citric acid or citrate
25 in it. Gray-stoppered tubes have potassium

1 fluoride as well as usually potassium oxalate.
2 And, then, we also have the lavender or
3 purple-topped tube that has EDTA in it.

4 Blood is put into those tubes. They are
5 mixed up so that any preservative in them is
6 equally distributed throughout the blood. And
7 the reason that we have these preservatives and
8 anticoagulants present in the tubes is that,
9 because of this, this is what's called the
10 clotting pathway.

11 We know that when we cut our hands or
12 something that the blood will clot to stop the
13 bleeding, most of the time. And that's, in part,
14 largely due to the presence of calcium throughout
15 this cascade that leads to the actual clotting.
16 What the anticoagulants tend to do in the tube of
17 blood is tie up that calcium to prevent it from
18 participating in this clotting pathway.

19 So, again, if we go back to the
20 red-stoppered tube that does not have any
21 anticoagulant or preservative in it, what happens
22 after some time of that blood sitting around in
23 the tube, with calcium that's present from our
24 natural diet and just normal metabolic pathways
25 in our body, is the calcium helps make those red

1 blood cells clump together, or clot. And that,
2 of course, makes it very difficult to use that
3 blood sample in a laboratory setting for doing
4 laboratory testing.

5 So that's why we have tubes like the
6 lavender-top or purple-topped tube containing
7 EDTA. The EDTA structure is listed down on the
8 bottom portion of the screen and simply what EDTA
9 does, as I mentioned earlier, is it binds metals.
10 Takes metals that are present in that blood
11 sample, such as calcium, to stop the clotting,
12 and iron, which is normally present in our diet,
13 and, again, through metabolic processes binds
14 them up so that those metals are no longer
15 available to work as they normally would. And by
16 binding it up, it -- it stops the blood from
17 clotting.

18 Here we have the EDTA in the red blood
19 cells. Again, the iron is floating freely
20 throughout the blood, initially, as is the
21 calcium. And once those are mixed up, the EDTA
22 grabs on to those metals, calcium and iron, and
23 binds them and forms a metal complex or a
24 chelate, as I mentioned earlier.

25 But you will notice that there is -- in

1 that tube, there is still EDTA present, what we
2 call the free acid form of EDTA. That's because
3 they put much, much more EDTA in those tubes than
4 what's actually needed for a standard specimen,
5 for it to work as an anticoagulant and
6 preservative. So you will have excess EDTA
7 present.

8 Q. And I believe you testified that you received
9 bloodstains from Teresa Halbach's RAV4 to test?

10 A. That's correct.

11 Q. And you also received a tube of blood from Steven
12 Avery?

13 A. Yes.

14 Q. And was that a purple-topped tube?

15 A. It was a purple-topped tube, yes.

16 Q. And that's the type of tube that you just
17 described?

18 A. That's right.

19 Q. And did you subject those samples to your
20 LC/MS/MS technology?

21 A. Yes, we did.

22 Q. And did you test those samples for the presence
23 of EDTA?

24 A. Yes, we did.

25 Q. Would you describe the steps that you took to

1 validate the method that you used in this testing
2 process.

3 A. Well, initially, we -- we had to develop the
4 method or we had to ensure that the method would
5 work on the instruments that we were employing
6 for this particular technique. Once that was
7 done, we performed four different validation
8 experiments.

9 One is what we call our detection limit
10 study. It's simply to determine how low of a
11 concentration, of EDTA, we can detect using our
12 method. We did this two ways. The first way was
13 by taking a solution of EDTA in water and making
14 dilutions of it until we reached a point that we
15 could no longer detect EDTA in that aqueous
16 solution.

17 Then we took a sample of blood not
18 related to this case, but this blood sample had
19 EDTA in it. It was a standard purple-topped tube
20 that had been filled to the standard level,
21 shaken up. And then we took drops, measured
22 amounts of blood, out of that tube. And, again,
23 we measured to the point that we could no longer
24 detect EDTA.

25 And as it turns out, with this

1 particular technique, the smallest volume of
2 blood that we can measure out is one microliter,
3 one microliter is one 1 millionth of a litre. At
4 that one microliter drop, we were still able to
5 find presence of EDTA, using this technique.

6 Q. And that would be EDTA in a purple-topped tube?

7 A. That's exactly right. So that was the one step
8 of the validation we performed, which is our
9 detection limit study. We also looked for
10 interferences in normal blood samples that would
11 interfere with this particular analysis, to cause
12 confusion when it came time to interpreting the
13 results. And we did this by analyzing 10
14 different blood samples, that were collected in
15 tubes that contained other preservatives than
16 EDTA; for example a yellow-stoppered tube, or a
17 gray-stoppered tube, or perhaps a red-stoppered
18 tube.

19 These are blood samples that were just
20 ran -- from random individuals. And, again, we
21 analyzed that, following this procedure and
22 determined that none of those samples, those
23 other blood samples, had interferences in them
24 that would confuse the results.

25 Another part of that study was to ensure

1 that our internal standard, which is simply a
2 control that we put into every sample that we're
3 going to analyze, to ensure that that didn't
4 cause any interferences with our ability to
5 detect EDTA in the samples.

6 The third step was what we called a
7 matrix suppression study. And this is something
8 that is very well known with the use of the LC/MS
9 technique, especially when you use what's called
10 electrospray ionization mode, which we did in
11 this case. And simply what that means is that
12 there are -- it's a well-known phenomenon that
13 there are other analytes present in a sample,
14 that can suppress the signal of the analyte that
15 you are interested in.

16 So what could potentially happen is, it
17 makes it look like there's less there than what
18 is actually there. We evaluated that to ensure
19 that we weren't getting any significant matrix --
20 matrix affect. And at the very worse we got was
21 a 33 percent suppression in matrix -- caused by
22 the matrix, which is fairly insignificant.

23 And then the final study that we did
24 was -- I can't think what the final study was,
25 I'm drawing a blank. Can I refer to my notes?

1 Q. Sure, please.

2 A. Oh, yes, also a very important study is the
3 carryover study, which was essentially to
4 determine whether or not, if you analyze a sample
5 of EDTA, does it show up in the next sample
6 that's analyzed. So we evaluated that as well.
7 We did not see any significant carryover effect
8 using this particular technique. And those are
9 the steps that we used in the method validation.

10 Q. And these steps that you used in the method
11 validation, are these the steps that you normally
12 use in the FBI Laboratory to perform method
13 validation?

14 A. Yes, exactly, they are.

15 Q. Would you describe for his Honor, the analysis
16 that you and others under your supervision
17 performed on the specimens, actually in this
18 case.

19 A. Well, the analysis, your Honor, is simply that we
20 focused our instrument to look for two of the --
21 two of the products that are on the screen. We
22 looked specifically for the presence of EDTA that
23 was bound to the iron in the blood. And we chose
24 iron over calcium because it is naturally present
25 at about a 10 to 30 times higher amount than is

1 calcium.

2 And, then, we also looked for the
3 presence of the free acid form of the actual
4 EDTA. Again, that is because there's so much
5 there in an EDTA tube, that's what you should
6 expect to see the most of, unless it's a case of
7 like a poisoning or something, a metal poisoning.

8 Q. Did you develop a protocol or standing operating
9 procedure for the analysis you performed in this
10 case?

11 A. Yes, we did.

12 Q. And what is a protocol or a standing operating
13 procedure -- standard operating procedure?

14 A. A standard operating procedure is simply the
15 steps that you take in order to complete the
16 analysis. And it's done to ensure that you --
17 that it's done consistently time after time. It
18 includes the information, the background
19 information, and all the materials that you need
20 to perform the analysis, much like a recipe in a
21 cookbook. It tells you what you need and, then,
22 the stepwise procedure to actually carry it out.

23 But it also includes important things
24 like references you relied upon in developing the
25 procedure and includes the limitations of the

1 method or the results of the validation study.

2 Q. I'm going to ask if Officer Fassbender would,
3 please, bring you an exhibit, which has been
4 marked Exhibit 434, and ask you to identify it.
5 Thank you.

6 A. All right. Exhibit 434 is the standard operating
7 procedure that we developed for the analysis of
8 EDTA in dried bloodstains, specifically for this
9 case.

10 Q. And, again, during this analysis, what were you
11 looking for?

12 A. Looking for the presence of EDTA in both the free
13 acid form and in the form that's complexed to the
14 iron in the bloodstain.

15 Q. And did you follow this protocol or standard
16 operating procedure that you developed?

17 A. Yes. Yes, we did.

18 Q. Is it unusual for the FBI Chemistry Unit Lab to
19 receive requests to analyze some substance for a
20 chemical and that you have to develop a protocol
21 for?

22 A. Not at all. Many of the cases that we receive in
23 our unit, in particular, would normally be worked
24 by a state laboratory. But, for a number of
25 reasons, they are sent to our laboratory;

1 primarily because, either it would be very taxing
2 on that state laboratory to take people off of
3 their normal casework in order to develop a
4 method, validate the method, and then put it into
5 use; or they may -- in other cases, they may not
6 have the expertise or the personnel in order to
7 do that.

8 So many of our requests that come in are
9 to analyze for unique or new drugs, or to apply a
10 new technique to a particular analyte. And so
11 we're very, very familiar and it's a normal
12 course of business for us to have to develop a
13 method, validate it, and then apply it to a case.

14 Q. Was there anything in the literature that helped
15 you develop this standard operating procedure
16 that you used in this case?

17 A. Yes, there certainly was.

18 Q. I'm going to have handed to you two exhibits
19 which have been marked Exhibits 436 and 437. I
20 ask you to look at those and I ask you, do you
21 recognize those?

22 A. Yes, Exhibit 436 is a manuscript out of the
23 *Journal of Analytical Toxicology* published in
24 November/December of 1997, that's entitled *The*
25 *Analysis of EDTA and Dried Bloodstains by*

1 *Electrospray LC/MS/MS and Ion Chromatography.*

2 And this is one of the -- this is the primary
3 article that we relied upon in order to develop
4 the method in our particular -- in this
5 particular case.

6 The second article, Exhibit 437, is from
7 a journal that's entitled *Analytical Chemistry.*

8 And the title of the article is *Determining EDTA*
9 *in Blood.* And, again, we relied upon this
10 article to help us along the way as we were
11 developing and analyzing specimens in this case.

12 Q. Do you consider those articles or publications to
13 be peer reviewed articles?

14 A. Absolutely.

15 Q. And could someone take those articles and develop
16 a testing procedure for EDTA in blood?

17 A. Yes, they could.

18 Q. And if someone wanted to, could they make
19 improvements to the methods addressed in those
20 two articles?

21 A. Yes, they can.

22 Q. Could you again just state, what was the date of
23 the second article, Exhibit 437?

24 A. Yes, that is August of 1997.

25 THE COURT: For my benefit, these are the

1 first two listed items under Item 16, references on
2 the -- looks like page eight of the attachment to
3 your submission?

4 ATTORNEY GAHN: That is correct, your
5 Honor.

6 Q. (By Attorney Gahn)~ And were the instruments used
7 in those articles similar to the instruments that
8 you used in your testing in this case?

9 A. Yes, they are similar, but not exactly the same.

10 Q. Could independent researchers, university
11 research facilities, or other forensic labs,
12 adopt those procedures and develop a protocol for
13 testing of EDTA in blood?

14 A. Yes, they could.

15 Q. Did you make any improvements to those articles?

16 A. We did.

17 Q. Please describe for his Honor the improvements
18 that you made to the existing protocols.

19 A. All right. Probably the most significant
20 improvement I think we undertook when we
21 developed our method is, we introduced what's
22 called an internal standard as I alluded to
23 earlier. This is simply, for each sample we're
24 adding a positive control to that actual sample.

25 It's a chemically modified version of

1 the same analyte that we're looking for. It's
2 simply made a little bit heavier than the normal
3 analyte. And it allows us to get a very accurate
4 assessment as to if the actual sample itself
5 worked, not just the batch run of samples, but it
6 allows you to assess each individual sample as to
7 whether or not it should pass or fail your
8 quality assurance protocols and quality control
9 protocols you have set up.

10 We introduced that, which neither of
11 these papers did. We also -- We looked for the
12 presence of the free acid form of EDTA in one of
13 the techniques that -- that the first reference,
14 Exhibit 436, did not look for. So we added an
15 additional test, if you will, to our protocol,
16 that allowed us to kind of take a three prong
17 approach to looking for EDTA in these samples.

18 And we used -- Furthermore, we used a
19 different LC/MS/MS instrument than what was used
20 in this -- the 1997 article in the *Journal of*
21 *Analytical Toxicology*. The instrument we used is
22 newer than the one they used in this particular
23 procedure. And improvements have been made that
24 I believe helped us eliminate one of the concerns
25 that they reported in this particular paper, and

1 that is of carryover of the samples from one
2 sampling to the next.

3 Q. What is a scientific hypothesis?

4 A. Well, it's -- it's -- it's an idea that a
5 scientist has that, then, they are going to apply
6 research, if you will, to either show that their
7 idea is accurate or if it's inaccurate.

8 Q. Did you develop a scientific hypothesis for this
9 case before you did your testing?

10 A. Well, we did, yes.

11 Q. And what was that?

12 A. Again, if I can go to this presentation, the idea
13 was, what we were asked to do is determine if
14 someone took a purple-stoppered tube of blood
15 that has EDTA in it, takes the cap off that tube,
16 and then pours a drop, or many drops out, onto
17 the surface, if someone comes along at a later
18 date, swabs up that dried bloodstain, are we able
19 to, then, find, on that swab, from that stain,
20 the presence of EDTA and EDTA linked with iron.

21 That's the scientific hypothesis, is
22 that we should be able the find the presence of
23 free acid EDTA, as well as the EDTA that's bound
24 to iron, off of that stain that's on the swab,
25 that's collected from a bloodstain.

1 Q. And were you able to do that in this case?

2 A. We were able to perform that analysis, yes.

3 Q. And what was your conclusion?

4 A. Well, we -- we did not find any EDTA, or EDTA
5 bound to iron, on the swabs that we received in
6 this case.

7 Q. Were controls run with each analysis that you ran
8 with the bloodstains submitted to you?

9 A. Yes, they were.

10 Q. Explain what controls are.

11 A. Again, we ran negative controls, these were blood
12 samples that were not put into an EDTA tube and
13 then they were -- samples of the blood were
14 applied to swabs. Those swabs were carried
15 through the whole extraction procedure. They
16 were to be negative from the start and at the end
17 of the analysis they were indeed negative.

18 We ran positive control samples. We did
19 this two ways. We ran a positive control sample
20 of blood from a lab volunteer who, again, their
21 blood sample was put into a purple-stoppered tube
22 that contains EDTA. That blood sample we
23 expected to be positive at the end of the run and
24 it was indeed positive.

25 But, additionally, we took the blood

1 sample that was provided to us from Steven Avery.
2 We put that on a swab and ran that through as a
3 positive control. It should have had EDTA in it
4 because it was in a purple-topped tube, and it
5 did, indeed, have EDTA in it, served as a
6 positive control.

7 And, then, as I alluded to, the internal
8 standard that we introduce into every sample,
9 that is another control that allows us to assess
10 that that actual sample worked as expected. So
11 that was a third type of control we used.

12 THE COURT: I would like to stop because
13 I'm not following something. I thought in the
14 exhibit up on the PowerPoint, you said that you took
15 some blood out of a purple-topped tube, spilled some
16 of it out, tested it with the swab, and did not find
17 EDTA or EDTA --

18 THE WITNESS: I'm sorry, your Honor, if I
19 could just go back. I was asked about the
20 scientific hypothesis that we had for this
21 particular case. And the hypothesis being that, if
22 someone, anyone, were to take a tube of blood that
23 contains EDTA and put it somewhere, put some of that
24 blood somewhere, and then someone else comes along
25 and samples that blood, that EDTA blood should

1 transfer onto that swab.

2 THE COURT: It should.

3 THE WITNESS: Should, yes.

4 THE COURT: Okay.

5 THE WITNESS: And the idea is, the whole
6 premise behind our protocol that we developed was
7 that we should be able to find EDTA and EDTA bound
8 to iron on that swab. And our validation showed
9 that we can do that. We absolutely can do that.

10 Then I was asked about the results in
11 this particular case. And the results in this
12 particular case, with the swabs we received, we
13 did not detect EDTA and EDTA with iron linked to
14 it. So this is specifically for the results on
15 our -- on the case at hand today.

16 THE COURT: When you say the swabs you
17 received, what swabs are we talking about?

18 ATTORNEY GAHN: He was sent three swabs,
19 the three that Sherry -- three of the ones that
20 Sherry Culhane testified to, A-8, the swabbing from
21 the ignition, by the dashboard by the ignition.

22 (Court reporter asked him to repeat.)

23 ATTORNEY GAHN: A-8.

24 ATTORNEY BUTING: You want to let him
25 testify as to what he tested?

1 Q. (By Attorney Gahn)~ Would you tell him?

2 THE COURT: I think if this line of
3 questioning was designed to elicit that, I didn't
4 get it, so I think you better go back and do it
5 again.

6 ATTORNEY GAHN: All right.

7 Q. (By Attorney Gahn)~ What did you receive to test
8 in this case?

9 A. Okay. We received three swabs, ones that were
10 collect from the RAV4: One swab was reported to
11 have been collected from near the ignition switch
12 in the car, another swab was off of a door pan --
13 door panel area, and the third was off of a CD
14 case.

15 Q. And those were sent to you and you subjected
16 those to the LC/MS testing; is that correct?

17 A. That's correct.

18 Q. And what were you looking for in those swabs?

19 A. We were looking for the presence of EDTA in the
20 free -- the free acid form of EDTA, as well as
21 EDTA that's bound or complexed with iron.

22 Q. And were you also sent a tube of blood from
23 Steven Avery that came from the Manitowoc County
24 Clerk of Court's Office?

25 A. Yes, I was.

1 Q. And what -- Did you test that tube of blood?
2 A. Yes, we did.
3 Q. And what did you test it for.
4 A. Presence of EDTA and EDTA bound to iron.
5 Q. Did you find EDTA in the tube of blood of Steven
6 Avery?
7 A. Yes, we did.
8 Q. Did you find EDTA in any of the three
9 bloodstained swabs from Teresa Halbach's RAV4?
10 A. No, we did not.
11 Q. Now, would you just relate to his Honor, how that
12 testing process fit in with your original
13 hypothesis in this case that you developed.
14 A. Well, the idea was, as part of the validation of
15 the method, is that you can actually still find
16 the presence of EDTA, even if it's collected onto
17 a swab and then sent into the laboratory,
18 essentially.
19 Q. So you were either going to find EDTA, or not
20 EDTA, in the swabs from Teresa Halbach's car?
21 A. Exactly.
22 Q. And you did not find?
23 A. We did not.
24 Q. Would you tell his Honor about your experience --
25 No, I take that -- Strike that. Are their

1 articles about the degradation of EDTA?

2 A. Yes, there are. There are numerous articles.

3 There's even chapters in books talking about the
4 degradation, or conversely, the stability of
5 EDTA.

6 Q. And tell the Judge about your experience with the
7 stability of EDTA and any tests you may have run
8 in conjunction with this case?

9 A. Well, specifically, in this article that we
10 relied upon, *The Journal of Analytical*
11 *Toxicology*, they talk about it in relation to old
12 bloodstains. They -- They looked at bloodstains
13 that were two years old and were still able to
14 identify EDTA after two years of storage at room
15 temperature.

16 Likewise, we performed a similar
17 analysis in our lab in which we looked at
18 bloodstains that had been put onto cards, spot
19 cards, EDTA blood that had been placed on the
20 spot cards in May of 2004 and stored at room
21 temperature up until they were analyzed, just
22 last week. And we were able to identify the
23 presence of EDTA in every single one of those.

24 Q. I'm going to have handed to you an exhibit which
25 has been marked as Exhibit, I believe, 435. And

1 could you explain to the Court what that exhibit
2 is.

3 A. This is a copy of the laboratory I -- laboratory
4 report that I issued for this case.

5 Q. And I would like you to explain to the Court a
6 little bit about the detection level, how low
7 could you go in detecting EDTA in this case?

8 A. Well, I can explain it two ways. One way is
9 talking about concentration of EDTA. And as I
10 explained earlier, we were able to do
11 decreasingly lower and lower concentrations of
12 EDTA in a water solution.

13 At that -- Using that technique, we
14 could identify 13 micrograms per milliliter of
15 EDTA. And that's -- it's a number. It doesn't
16 necessarily mean a whole lot unless you are a
17 scientist. But likewise, what we did is we took
18 a tube of EDTA blood and we did spots of that
19 blood, to the lowest volume that we can
20 accurately measure out which is one microliter.
21 And even that one microliter drop of EDTA blood,
22 which is the equivalent of about 1/20 of a drop
23 of blood, even that little amount, we were able
24 to find the presence of EDTA in.

25 Q. Based upon your training and experience, and

1 based upon your test results using the LC/MS/MS
2 technique, and based upon all of the data and
3 compilations that you reviewed, and basically the
4 entire case file that you have; do you have an
5 opinion, to a reasonable degree of scientific
6 certainty, whether the bloodstains from Teresa
7 Halbach's RAV4, that you tested, came from the
8 vial of blood from Steven Avery, which was in the
9 Manitowoc County Clerk of Court's Office?

10 A. I do have an opinion on it.

11 Q. What is that opinion?

12 A. My opinion is that the bloodstains did not come
13 from that tube of blood.

14 Q. Thank you.

15 ATTORNEY GAHN: That's all I have.

16 ATTORNEY BUTING: Do you want to take a
17 break now or do you want to start.

18 THE COURT: Let's take a 10 minute break
19 and then we'll come back to your cross.

20 ATTORNEY BUTING: Okay.

21 (Recess taken.)

22 THE COURT: And, Mr. Buting, at this time
23 you may begin your cross-examination.

24 ATTORNEY BUTING: Thank you, your Honor.

25 **CROSS-EXAMINATION**

1 BY ATTORNEY BUTING:

2 Q. Good morning, Mr. LeBeau.

3 A. Good morning.

4 Q. Let's talk a little bit about your background.

5 Do you have the CV in front of you?

6 A. Yes, I do.

7 Q. As I look at it, it -- if you turn to page -- Do
8 you have anything in here that shows research
9 interest? Do you have a heading that says that,
10 or am I wrong? Do you have a heading like that,
11 a sub-heading that says research interests?

12 A. I don't notice one.

13 Q. Well, let's go ahead and mark this.

14 (Exhibit 438 marked for identification.)

15 Q. I'm going to show you Exhibit 438, can you look
16 through that and identify it for us.

17 A. Yes, this is a declaration that I made in another
18 case involving EDTA.

19 Q. Okay. And that's a case called ***State of***
20 ***California vs. Cooper?***

21 A. That's correct.

22 Q. We'll talk about that in more detail later, but
23 attached to this declaration, you had also a CV I
24 believe. And this was filed in -- declaration is
25 dated April 28th of 2004?

1 A. 2004, that's correct.

2 Q. Okay. And I recognize that CVs can change from
3 time to time, right?

4 A. That's right.

5 Q. And the one that you filed here today, it being
6 2007, is going to be somewhat different than the
7 one you filed in 2004, right?

8 A. That's correct, yes.

9 Q. But in this particular one, you did have a
10 section called research, areas of research,
11 right? Highlight it for you there.

12 A. Yes, I did.

13 Q. Okay. And at least as of 2004, you described
14 your -- you listed six areas of research
15 interest, okay? Would you agree with me?

16 A. Yes, I do.

17 Q. The first one, which you dated as 1987 and '88
18 only, was Trace Elemental Analysis of Hair,
19 right?

20 A. That's correct.

21 Q. 1989, Statistical Analysis of Suicide Deaths,
22 right?

23 A. Yes.

24 Q. 1991, Nebulizer Administration of Cef -- can you
25 pronounce that for me?

1 A. Ceftriaxone.

2 Q. That's C-e-f-t-r-i-a-x-o-n-e to follow, right?

3 A. That's correct.

4 Q. Some antibiotics for chickens or something?

5 A. Yes.

6 Q. Okay. And then, 1991 to 1994, you put Postmortem
7 Redistribution of Drugs?

8 A. Yes.

9 Q. And then, at least as of 2004, the only one --
10 research interest that you put as still present
11 was 1998 to the present, Detection of Drug
12 Facilitated Rape, right?

13 A. That's correct.

14 Q. And 1999 to present, GHB and Drug Facilitated
15 Sexual Assault?

16 A. That's correct.

17 Q. More or less the same.

18 A. One's a broader topic than the other, but, yes.

19 Q. Okay. And would it be true to say that if you
20 were to add this section to your CV right now,
21 updating it to 2007, these would probably say
22 1998 to present, still?

23 A. No. No, the research section of that old CV from
24 three years ago, were different topics of
25 research that I had engaged during my course of

1 study at different universities. So, for
2 example, the last two items, Detection of Drug
3 Facilitated Sexual Assault and GHB in Drug
4 Facilitated Sexual Assault, those were my
5 dissertation topic for my doctorate.

6 The topic about Trace Elements and Hair,
7 that was an undergraduate research project I did
8 at the Central Missouri State University in
9 Warrensburg, Missouri, was part of a senior level
10 project. The Ceftriaxone in Foul was a graduate
11 research project I was employed upon at my job
12 when I was working at the St. Louis County
13 Medical Examiner's Office. It was a side project
14 that my supervisor asked me to work on with him.
15 And --

16 Q. So let me just stop you for a second, then. So
17 what you are saying is those research areas we
18 just described are only research that you did
19 while you were engaged in some educational
20 pursuit?

21 A. In an academic -- towards an academic degree,
22 that's what those specific research projects
23 listed in that old CV.

24 Q. So in 2004, when you list the Detection of GHB
25 Drug Facilitated Rape as a research area, you

1 said, 1988 to present, you were still working on
2 your Ph.D at that time?

3 A. Yes, I was.

4 Q. Okay. And you have since completed it?

5 A. Yes, I have.

6 Q. So, you no longer are involved in any research at
7 all?

8 A. I'm not involved in any research in an academia
9 type setting. Certainly, we do research to a
10 small scale with cases as we're asked to be
11 involved with them.

12 Q. Sure. But --

13 A. Not long term research like you would expect
14 towards a degree.

15 Q. And when we're talking about academic research,
16 we're talking about publications, peer review,
17 things of that sort, right?

18 A. Well, that's one part of doing research in
19 academia, that's correct.

20 Q. Doesn't help much if you are in a laboratory
21 doing some experiment on your own and devising
22 something, if you don't publish it and tell other
23 people what it is, right?

24 A. Well, I mean, you can't publish everything you
25 do, that's certainly true. But we do publish

1 methods, for example, that we developed that are
2 unique and not already out in the scientific
3 literature. We will publish --

4 Q. Okay.

5 A. -- and put it through the peer review process.

6 Q. Okay. We'll get into that in a minute. But, as
7 I look at your presentations, the talks that you
8 give, from 1998 to now, looking at the new CV,
9 the huge, huge majority of those presentations
10 are on this topic of GHB and drug induced rape
11 things, situations, right?

12 A. That's correct.

13 Q. In fact, you are speaking in just a couple of
14 weeks at a Women's Sexual Violence Seminar,
15 aren't you?

16 A. I may be, I don't know my schedule that far out,
17 actually.

18 Q. You don't know that you are speaking on
19 March 23rd?

20 A. I could very well be.

21 Q. You haven't written a paper on it yet?

22 A. I may have. I do quite a bit of training on that
23 particular topic.

24 Q. So, do I understand, though, that you don't even
25 know that you are giving a talk in -- March 23rd

1 now?

2 A. No. What you understand is, I don't know my
3 calendar three weeks out.

4 Q. Okay. And when I say the great majority of your
5 talks are on that one topic, would you agree
6 probably over 90 percent of the talks that you
7 have given since 1998 are focused on that one
8 issue?

9 A. It's a topic that I am well recognized in this
10 country for being an expert and so I am invited
11 to do a --

12 Q. Sure.

13 A. -- whole lot of training on that particular
14 topic.

15 Q. And that has been -- As far as peer review of any
16 of your research, that's been it; that's where
17 you have gotten the recognition and the most peer
18 review is on your work on the detection of GHB in
19 sexual assault cases?

20 A. No, I would disagree with that. It's certainly
21 an area that I have done a considerable amount of
22 publication on and personal research towards my
23 doctorate, but there are numerous other
24 publications that I have been involved with that
25 fall outside the area of GHB in drug facilitated

1 crimes.

2 Q. Okay. Let's talk about your -- your experience
3 with EDTA. You have never tested for EDTA before
4 this case, have you?

5 A. Yes, I have.

6 Q. When?

7 A. Approximately 1998.

8 Q. And was that the O.J. Simpson case?

9 A. No, it wasn't.

10 Q. Were you working for the FBI?

11 A. Yes, I was.

12 Q. And were you using a protocol?

13 A. Yes, I was.

14 Q. And Mr. Gahn forwarded you a letter that I sent,
15 requesting copies of information?

16 A. Yes.

17 Q. One of those was a request for any and all
18 protocols that you have ever used testing EDTA?

19 A. Yes.

20 Q. You didn't provide that, did you?

21 A. No, we did not.

22 Q. All you provided was your current protocol,
23 right?

24 A. That's correct. Because this is the protocol we
25 used for this case.

1 Q. Well, how many times have you tested for EDTA
2 before this case?

3 A. One other time.

4 Q. One other time. And it was a protocol that you
5 no longer use; is that right?

6 A. I believe we still use a revised version of the
7 protocol I used in the previous testing for EDTA,
8 but it was not the same type of scenario. We
9 weren't --

10 Q. No.

11 A. -- looking for EDTA in a bloodstain, which would,
12 in my opinion, require a little bit different
13 approach --

14 Q. It sure does.

15 A. -- to analysis.

16 Q. What were you testing for in that case?

17 A. EDTA.

18 Q. In what?

19 A. I'm sorry?

20 Q. In what?

21 A. In a buffer solution.

22 Q. In a buffer solution?

23 A. Yes.

24 Q. Why would you find EDTA in a buffer solution?

25 A. Well, as I indicated, it's used in laboratory

1 settings and it was a case involving allegations
2 of a wrongdoing by a forensic lab employee
3 purposely mixing up a buffer, contaminating it
4 with EDTA, switching buffers. So, we were asked
5 to investigate the buffers to see if they had
6 indeed been switched --

7 Q. Okay.

8 A. -- and that's what it involved.

9 Q. And were they? Did you find evidence of it?

10 A. I don't recall, actually.

11 Q. Really. What lab was that?

12 A. I don't recall.

13 Q. Wasn't that right around the time when the FBI
14 Lab itself was being challenged and audited for
15 the very same sorts of concerns?

16 A. No, not at all. We were not audited for
17 purposely mixing up buffers and to -- as a
18 disgruntled employee trying to get back at the
19 organization.

20 Q. I see.

21 A. Not at all.

22 Q. Well, you were audited by the Inspector General
23 of the United States?

24 A. Yes, we were.

25 Q. And that was in 1999?

1 A. I don't recall the date, but it was in the late
2 90s, you're right.

3 Q. And it was part of an evaluation of the whole FBI
4 Lab, not just your unit?

5 A. It was -- It was overall, the practices within
6 our organization and in our laboratory.

7 Q. And how many different units do you have in the
8 FBI Laboratory?

9 A. Today?

10 Q. Or back then.

11 A. It's going to be a different answer, so.

12 Q. Well, give me back then.

13 A. Approximately 25 units.

14 Q. Okay. How about today?

15 A. Probably around 30 units today.

16 Q. Okay. And of those 25 units, the Chemical Unit
17 was one of the units that was audited by the
18 Inspector General, isn't it?

19 A. Well, all the units were looked at and the
20 practices of the FBI Laboratory were looked at.
21 Our unit was one that the Inspector General came
22 in and specifically was looking at allegations
23 made by the individual that initiated the
24 complaint. His allegations against one employee
25 within our unit.

1 Q. And --

2 A. That's how we were looked at.

3 Q. And the allegation involving that employee
4 concerned a test very similar to what you are
5 doing today, or what you did in this case, that
6 is, a test for EDTA in bloodstains, right?

7 A. Could you repeat that.

8 Q. The individual and the reason that your unit was
9 audited by the Inspector General concerned an
10 EDTA test and a bloodstain that was done by your
11 lab, right?

12 A. That's not my understanding of why our unit was
13 one that was looked at by the Inspector General.
14 You would have to actually ask the Inspector
15 General why they looked at our unit.

16 Q. Well, you are the unit chief?

17 A. I am now, yes.

18 Q. And you are responsible for quality control?

19 A. I am, yes.

20 Q. And if the Inspector General audits your lab and
21 comes up with some recommendations or
22 suggestions, you are going to know that, aren't
23 you?

24 A. Well, when the Inspector General was looking at
25 our unit, I was still an examiner, I was a

1 bench --

2 Q. Okay.

3 A. -- scientist. Since that, there was another unit
4 chief and then I became unit chief. So there
5 were -- there was a number of other managers
6 prior to me.

7 Q. So you have never read the Inspector General's
8 report auditing your unit?

9 A. I read the Inspector General's report in -- you
10 know, it was a very large report. I read the
11 executive summary of that report. And I read
12 specific allegations against the individual in
13 the Chemistry Unit --

14 Q. Right.

15 A. -- to see what their criticisms were towards him,
16 as a educational lesson.

17 Q. And that individual -- Which exhibit is this,
18 437?

19 A. That is Exhibit 436.

20 Q. Exhibit 436, that individual is one of the
21 authors of this exhibit, 436, correct?

22 A. That's correct.

23 Q. That is Mr. Roger Martz, right?

24 A. That's correct.

25 Q. And the audit and the allegations that were

1 investigated concern Mr. Martz's involvement in
2 an EDTA test on a bloodstain, in a case; isn't
3 that right?

4 A. One of the areas that the Inspector General did
5 look at was how Mr. Martz testified in the O.J.
6 Simpson case in regards to EDTA --

7 Q. Fine. Thank you.

8 A. -- the presence of blood, amongst a number of
9 other things that were allegations made by
10 Mr. Whitehurst (phonetic) against numerous
11 employees in the FBI Laboratory.

12 Q. All right. The FBI Lab -- Exhibit 436, by the
13 way, this article, that is supposedly a published
14 peer review article?

15 A. It is not supposedly, it absolutely is a
16 published and --

17 Q. Sure.

18 A. -- peer reviewed article.

19 Q. It is. Let's just get clear who wrote it. Okay.
20 All of the authors are FBI Lab members, right?

21 A. They were at the time of this --

22 Q. Sure.

23 A. -- publication, yes.

24 Q. Okay. So this article was written by FBI people,
25 correct?

1 A. Yes.

2 Q. And it was written after the O.J. Simpson case,
3 right?

4 A. That's correct, it was.

5 Q. And in that case, the issue of a possible stain
6 having EDTA in it came up in sort of the middle
7 of the case, right?

8 A. It did, yes.

9 Q. And your lab developed a protocol kind of in the
10 middle of that case, right?

11 A. Yes.

12 Q. And that was the first time your lab had ever
13 tested for EDTA on a bloodstain, right?

14 A. I believe that's true, yes.

15 Q. And how many times after that did your lab ever
16 test for EDTA in bloodstains?

17 A. Never.

18 Q. So until this case, the FBI has not tested for
19 blood -- EDTA in bloodstains, again, since 1996,
20 I think this was, right?

21 A. Yeah, I believe it was 1996 when the O.J. case
22 was going on.

23 Q. So in -- So 10 years go by, even after the EDA --
24 FBI publishes this peer review article, 10 years
25 go by before E -- the FBI, again, tests for EDTA,

1 which is this case, right?

2 A. That's correct.

3 Q. And you, in fact, have -- As we indicated in that
4 declaration, Exhibit 438, you have come out on
5 the side of the government against defendants who
6 seek EDTA testing of bloodstains in their cases;
7 isn't that right?

8 A. No, that's not right.

9 Q. Didn't -- In the Kevin Cooper case, didn't you
10 object to the testing of the EDTA stain in that
11 case?

12 A. No, I objected to the technique that was used in
13 order to do the actual testing in regards to how
14 an estimation of the size of the sample --

15 Q. Okay.

16 A. -- blood sample was obtained, as well as what
17 appeared to me to be the lack of appropriate
18 controls used by the scientist in this case.

19 Q. All right. Well, we'll talk about that a little
20 bit more in a minute. Let me -- So, let's get it
21 clear then, ever since the O.J. case, O.J.

22 Simpson case, until this case, of Mr. Steven
23 Avery, the FBI has never tested for EDTA in a
24 bloodstain on any other case in this country?

25 A. The FBI Laboratory has not received a request to

1 test for EDTA in a bloodstain from O.J. -- the
2 O.J. case until this case and it's been
3 approximately 10 years; that's a correct
4 statement.

5 Q. And Exhibit 437, maybe explains why. Do you have
6 Exhibit 437 in there?

7 A. Yes, I do.

8 Q. Exhibit 437 points out that there was -- there
9 was some problems in the EDTA test protocol that
10 was used in the O.J. Simpson case, correct?

11 A. On what page are you referring to?

12 Q. Well, the bottom of the first page and top of the
13 second, that paragraph, that says, What was wrong
14 with the laboratory testing? Do you see that?

15 A. I do.

16 Q. What it says is, "What was wrong with the
17 laboratory testing? First, it was not clear
18 whether the method had ever been used before",
19 right?

20 A. That's right.

21 Q. In fact, the method had never been used before
22 that case, right?

23 A. That's correct. Not the method that we used in
24 the O.J. case, it had never been used in that
25 manner before.

1 Q. In that manner, correct, for EDTA stains, right,
2 in blood?

3 A. That's correct.

4 Q. "Most likely", continuing the quote, "the method
5 was developed quickly under a great deal of time
6 pressure", okay?

7 A. Yes.

8 Q. And is that true?

9 A. Yes, that's true.

10 Q. And in retrospect, FBI chemists now believe that
11 the EDTA detected may have been injection
12 carryover in the LC/MS/MS instrumentation, right?

13 A. That's correct.

14 Q. And so that particular protocol that was
15 developed and published and peer reviewed in --
16 that you have in front of you as 436, the peer
17 reviews found flaws in this protocol, didn't
18 they?

19 A. No. Absolutely not. That is, this journal -- this
20 analytical chemistry paper, published in August
21 of 1997, was not -- cannot be considered a peer
22 review of the article that was published in
23 November of 1997.

24 Q. Well are you --

25 A. This one is published prior to this one and the

1 author of this would never have seen this until
2 it was published.

3 Q. Have you seen any article, any peer review
4 response, anywhere, to Exhibit 436, this FBI
5 published protocol in the testing?

6 A. Yes, I have.

7 Q. Where, can you cite to it?

8 A. Yes, I peer reviewed that article --

9 Q. Oh, you --

10 A. -- internally --

11 Q. Internally.

12 A. -- because part of the FBI Laboratory's
13 requirements, is before we publish any article --

14 Q. I see.

15 A. Excuse me, I'm not finished.

16 Q. Yes, you are, this is cross; you can explain
17 yourself later, sir. Thank you.

18 THE COURT: Wait a minute, that's -- that's
19 part of his answer to the question you asked; I'm
20 going to let him complete it.

21 A. So, your Honor, as part of any publication that
22 employees at the FBI Laboratory put out, we're
23 required to have an additional peer review step
24 conducted by employees, within our organization,
25 to ensure that the science is valid, so we don't

1 embarrass ourselves before it goes out to a peer
2 reviewer. I was an internal peer reviewer on the
3 article that is in the *Journal of Analytical*
4 *Toxicology* and I made comments on that article
5 and sent it back to the researchers that were
6 involved in it.

7 After my comments were addressed, it
8 then went out to the actual journal and that
9 editor of the journal employed some reviewers to
10 look at it. Now, I don't know who those
11 reviewers were and I never saw that review.

12 Q. As a matter of fact, you mentioned, so the FBI is
13 not embarrassed, the FBI was embarrassed by the
14 EDTA stain test in the O.J. Simpson case, weren't
15 they?

16 A. I would disagree.

17 Q. Well, they never did it again, did you?

18 A. We were never asked to do it again. We don't
19 control the cases that come into our laboratory.

20 A -- Law enforcement agencies ask us for their
21 assistance and if we were able to provide that
22 assistance, we will --

23 Q. Do you know --

24 A. -- but if we were not asked to do a test, we
25 don't have control over that.

1 Q. And, of course, defendants can't ask you to do
2 tests, can they?

3 A. That's -- That's correct. We are a law
4 enforcement agency. And the funding that we get
5 from the U.S. congress is to support law
6 enforcement investigations --

7 Q. Okay.

8 A. -- with the results --

9 Q. You are aware, though, that, over the course of
10 the year, the last decade, there have been some
11 cases where defendants have sought to do some
12 sort of EDTA test on bloodstains, right?

13 A. Yes, I am.

14 Q. Most often post-conviction cases, right?

15 A. Yes.

16 Q. Like the Kevin Cooper case?

17 A. Yes.

18 Q. And would you agree with me that in every one of
19 those cases that you have heard of, the
20 government has been opposing the use, or the
21 protocols, or the methods that a defendant has
22 used to try and get EDTA stain evidence in,
23 bloodstain evidence in?

24 A. I don't -- I don't believe they were opposing the
25 idea of testing a bloodstain for EDTA. My

1 understanding -- and I'm only aware of two
2 cases -- my understanding is they were opposing
3 the approach that was taken by the scientist,
4 that he didn't use good science. The techniques
5 that he employed, the instrumental techniques, as
6 we talked about in direct, these are techniques
7 to identify chemicals. So a chemical is a
8 chemical.

9 Q. Sure.

10 A. But if you don't apply good science to getting to
11 that answer, that's what becomes in question.
12 They weren't his -- My understanding is, his
13 approach was not a well validated approach.

14 Q. And his approach, when you say his, we're talking
15 about Dr. Kevin Ballard, right?

16 A. That's correct.

17 Q. At the National -- NMS, what's it called,
18 National Medical Services Lab?

19 A. That's correct.

20 Q. And his -- You disagreed with his protocol?

21 A. I didn't see his protocol; I disagreed with the
22 approach --

23 Q. Okay.

24 A. -- that he testified to in the *Cooper* case, I
25 believe it was.

1 Q. Okay. Can you tell us of any lab anywhere in the
2 world that has ever used the protocol that your
3 colleagues published in Exhibit 436?

4 A. There would be no way to know that. We don't --
5 There's not a data base that people have to
6 report to us if they are choosing to take a
7 journal in a public -- an article out of a public
8 journal and use it in their own laboratory.

9 Q. Well --

10 A. We would never know if they used it or not.

11 Q. Well, let me just give you an example. Often
12 times, people publish, in fact, there are some
13 articles you cited, on the use of LS/MS/MS for a
14 particular technique, right?

15 A. LC/MS/MS.

16 Q. I'm sorry, LC/MS/MS, right?

17 A. Yes.

18 Q. And the -- by the way there's a slash between
19 LC/MS/, that's the way it's written?

20 A. That's correct.

21 Q. And often times, in academia, what researches
22 will do is, they will take one test that's
23 published and they will test it, report back
24 whether they get the same results, right?

25 A. That's common when you are dealing with, like, a

1 breakthrough in a new area of science.

2 Q. Sure.

3 A. You might have multiple researchers from
4 different research teams working independently,
5 yet together, to prove that a new scientific
6 hypothesis is actually working as they expect.

7 Q. Sure. That's what science is, right, the whole
8 idea that you can replicate someone else's study?

9 A. That is part of it, yes.

10 Q. And can you tell me of any article anywhere, of
11 anybody who ever studied and replicated, or tried
12 to replicate, the test that's -- or the study
13 that's reported in Exhibit 436?

14 A. Yes.

15 Q. Who?

16 A. Me.

17 Q. Oh, okay. Anybody besides you?

18 A. Not that I know of.

19 Q. Okay. And Exhibit 437, analytical chemistry
20 article entitled, *Determining EDTA in Blood*, they
21 used an entirely different method, didn't they?

22 A. No, absolutely not. They used a very similar
23 method. The only difference is the -- instead of
24 using a liquid chromatograph on the front end, to
25 do the separation of the components into their

1 individual components, if you will --

2 Q. They used a capillary --

3 A. They used capillary electrophoresis, which does
4 the exact same thing and it's based in a very
5 similar principle, just uses electrical currents
6 and charges to cause the separation.

7 Q. But the protocol -- the test they did, is not the
8 same as reported in the FBI Lab article, is it?

9 A. Well, they are doing mass spec, mass spec to
10 actually do the identification of EDTA. And it
11 is very similar to what is published in the
12 independently done publication in the *Journal of*
13 *Analytical Toxicology*.

14 Q. And we're talking about this article by Robin
15 Sheppard and Jack Henion, who at that time were
16 associated in some way with Cornell?

17 A. That's correct.

18 Q. Do you know them personally?

19 A. I do not know either of them personally.

20 Q. Do you know that neither one of them is with
21 Cornell any more?

22 A. I don't know that.

23 Q. Okay. But their study was trying to do something
24 more; their study was actually trying to
25 quantitate, see if they could quantitate the

1 amount of EDTA, right?

2 A. They were, yes.

3 Q. And your protocol that you used in this case,
4 which is Exhibit, what, 434? It's up there.

5 A. The protocol was -- I don't believe I have the
6 protocol.

7 Q. Well, you're familiar with it. Oh, I have got it
8 with me, I'm sorry. I thought it was just a
9 copy. This protocol, 434, does not attempt to
10 quantitate the EDTA if it's found, does it?

11 A. No, it does not.

12 Q. It's simply trying to see if there's any way you
13 can detect the presence of EDTA.

14 A. That's exactly right.

15 Q. Okay. This protocol, which is Exhibit 434, has a
16 date of February 15th, 2007, right?

17 A. That's correct.

18 Q. And until that time, until this protocol was
19 developed for this specific case, the FBI had no
20 existing protocol to test for EDTA in a
21 bloodstain, correct?

22 A. I don't believe that to be correct, no.

23 Q. Well, let me go back for just a minute, because
24 perhaps we have been misinformed. Maybe I have
25 been misinformed. When were you first contacted

1 by any prosecutor, law enforcement agent, or
2 whatever, involved with Mr. Avery's case?

3 A. In December of 2006.

4 Q. So between February of 2006 and December of 2006,
5 nobody from the State contacted you, right?

6 A. Between February of 2006 and December 2006, not
7 that I recall, no.

8 Q. Nobody called you to say, hey, we have got
9 some -- a case where somebody is claiming that
10 evidence was planted and we have some bloodstains
11 in this vehicle we would like you to test for
12 EDTA; is that right?

13 A. That's correct.

14 Q. It wasn't until December that somebody first
15 contacted you from the prosecution team, right?

16 A. To my recollection, yes.

17 Q. That would be Mr. Gahn?

18 A. That's correct.

19 Q. Okay. Is there any reason why you would have
20 been unable to develop a protocol like this any
21 time between February of '06 and February 15th of
22 '07 when you actually did develop it.

23 A. No.

24 Q. So if the State had contacted you a year ago and
25 said, hey, we would like to test for these

1 stains, we know this guy is claiming that it was
2 planted, we want to rule out this ridiculous
3 defense; you could have developed a protocol any
4 time within that year, right?

5 A. Yes, we could.

6 Q. Okay. Now, when you spoke with Mr. Gahn in
7 December, what did you tell him about whether you
8 could do this protocol?

9 A. I said we could.

10 Q. Did you tell him how long it would take?

11 A. I probably gave him a estimate about how long it
12 would take us to get to it.

13 Q. And what was that estimate?

14 A. I generally say about four to six months.

15 Q. All right. And did he explain to you that, hey,
16 we have got a trial date coming up on February
17 5th, that's not going to work?

18 A. He did.

19 Q. And did the he ask you for your fastest -- we're
20 talking December now -- did he ask you what's the
21 fastest turn around you could possibly give us to
22 get this test done?

23 A. I believe he did.

24 Q. And you told him three to four months at that
25 time?

1 A. I don't know what my response is, but it was
2 probably in that range, three to four months.

3 Q. And one of the reasons you told him that was that
4 you had no working protocol that would be allowed
5 to be used in your accredited lab?

6 A. I think that's the message getting a little mixed
7 with an in between messenger. What I told him
8 was, that since we had moved our laboratory in
9 2003 from Washington D.C. to Quantico, Virginia,
10 we had acquired a number of new instruments and a
11 number of the instruments that we had at the old
12 laboratory did not come with us.

13 So what that involved is, if we had not
14 used any protocol that moved with us to the new
15 laboratory, we had to essentially revalidate, to
16 some extent, if we were putting it onto a new
17 instrument that it, you know -- the instrument
18 had never been used before, for this particular
19 analysis.

20 So my message to Mr. Gahn was that we
21 had not used the protocol since the O.J. case and
22 that we would need to bring it up to standard
23 with today's accreditation standards for our
24 accrediting value; we would have to make sure
25 that it met all of our internal quality assurance

1 requirements, because since the O.J. case we have
2 gone through four different quality assurance
3 systems in our laboratory, each one is another
4 step up --

5 Q. Sure.

6 A. -- as far as requirements. So we had to insure
7 that this protocol that was used in the
8 mid-nineties met the standards of 2007. That's
9 essentially what it was.

10 Q. Okay. And you told them, because of all of that,
11 calibrating the instrument and validating a new
12 protocol, it would take a matter of months,
13 right?

14 A. Yeah, that's my general response to any time
15 we're asked to develop a new method and validate
16 it. I generally say four to six months because
17 we never know what major cases are going to
18 happen in this country that can, you know, divert
19 our resources to other investigations.

20 Q. Okay. But then in January somebody else
21 contacted you; is that right?

22 A. You will have to refresh my memory.

23 Q. Did anybody else, in January, contact you, again,
24 to see if that whole time frame could be changed?

25 A. I really -- I don't know when it was, but I did

1 get a call from one of our special agents in the
2 local field office asking me if we could help out
3 on this case. But as I explained to him at the
4 time is we had already agreed to help out on the
5 case and that we were going to start doing
6 something that's rather unprecedented for us. We
7 were actually going to start working on the case
8 before the evidence actually got to us, meaning,
9 we were going to start doing the method
10 validation work, anticipating that this evidence
11 was actually going to show up.

12 Q. So that -- unprecedented is the word you used,
13 right?

14 A. Unprecedented in that we actually start to do
15 work on a case before it shows up into our
16 laboratory.

17 Q. And tell the Court what changed, how it is that
18 in December it was going to take three to four
19 months to develop a protocol, validate it,
20 calibrate the instruments and suddenly, now, the
21 time frame was shortened to a matter of three or
22 four weeks?

23 A. The time frame wasn't shortened, there were no
24 guarantees that we would get it done, never made
25 a guarantee that we would. But what changed was,

1 simply, we applied ourselves to that and no other
2 case. Myself and some of my staff, this is what
3 we worked on. And we worked long hours, there
4 were weekends involved. There were, you know,
5 more than the standard normal hours of operation.

6 That's what happened, you know, we
7 decided that we would help out. We committed
8 that we would work out on the case and we would
9 try our best to complete all of the work that was
10 required in order for it to be here during this
11 court proceeding. But, again --

12 Q. Okay.

13 A. -- we could have failed, quite honestly.

14 Q. And, by the way, you mentioned long hours, does
15 the FBI Lab run 24 hours a day?

16 A. No, it doesn't.

17 Q. What are your normal hours?

18 A. 7:30 to 5:00.

19 Q. In the month of February, did you ever arrive at
20 the office or the lab before 7:30 in the morning?

21 A. Yes, I did.

22 Q. What time?

23 A. Probably 7:15, 7:00.

24 Q. So the earliest you ever arrived was 7:00 a.m.?

25 A. The laboratory opens at 7:00 a.m.

1 Q. Okay. But in this case, there were actual
2 analysts working even earlier than that, right?

3 A. No.

4 Q. Like 5:00 in the morning?

5 A. No.

6 Q. All right. We'll look at some of these sheets
7 later, perhaps I'm just misinterpreting them.
8 So, at any rate, when did you tell Mr. Gahn that
9 you thought, hey, I can get this done quicker if
10 we work weekends and apply ourselves?

11 A. I never told him that.

12 Q. You never told Mr. Gahn that you could get this
13 test done before -- or in time for rebuttal of
14 the State's case?

15 A. No, like I explained, I said we would try our
16 best to get it done, but I never guaranteed we
17 would.

18 Q. But while you were doing it, you knew that you
19 had the time pressure of the trial already
20 beginning, right?

21 A. Yes.

22 Q. In fact, the protocol wasn't validated until
23 February 15th, right?

24 A. No, that's not -- that's not correct.

25 Q. Well, what's the date of February 15th on there

1 mean?

2 A. That's the date the protocol was issued.

3 Q. Okay.

4 A. If I can, I can explain the process we go through
5 to bring our --

6 Q. Go ahead.

7 A. -- protocol on line. The first thing we have to
8 do is we have to develop the method. And in this
9 case we had the luxury of having a published
10 reference to go to. So we didn't have to start
11 from scratch. We simply went to that method, we
12 used the same parameters that are published in
13 this paper from the *Journal of Analytical*
14 *Toxicology*, the same parameters.

15 Q. You're talking about -- So we're clear, you are
16 talking about the form of protocol that the FBI
17 used in the O.J. case, right?

18 A. Well, this isn't exactly the protocol that was
19 used in the O.J. case. This is not exactly,
20 there are things done in this paper that were not
21 done in the O.J. case.

22 THE COURT: Exhibit number what?

23 ATTORNEY BUTING: 436.

24 THE WITNESS: 436, yes.

25 Q. (By Attorney Buting)~ Okay. So you looked at

1 that and then you worked off of that to develop
2 this new protocol?

3 A. Well, we essentially set up our instrument so
4 that it was giving results comparable to what
5 they were talking about in this paper, meaning,
6 just injecting standards of EDTA into the
7 instrument, not with blood or anything.

8 Q. You can tell us when those first -- those first
9 steps began?

10 A. That was very late January into early February.

11 Q. Okay.

12 A. And then we -- after we have the instrument
13 working the way it's supposed to work, set up, we
14 start our actual validation steps. And this is,
15 as I described earlier, these are the steps to
16 ensure that the method is fit for it's intended
17 purpose. For us to identify any limitations in
18 that particular procedure that we can then use if
19 we're trying to interpret data --

20 Q. And on -- And on what date was that protocol
21 validated, in your opinion.

22 A. All of the validation work was done before the
23 middle of the month, before the 14th of February.

24 Q. Okay.

25 A. And then it has to go through a review process --

1 Q. All right. So --

2 A. -- by scientists that are not involved in the
3 actual validation study. So an independent group
4 of scientists looks through all the validation
5 data and to sign their name that they agree with
6 the work that was done and the findings of the
7 validation study.

8 Q. Let me stop you there for one second. A group of
9 independent scientists, you are talking about FBI
10 people?

11 A. That's right.

12 Q. Not outside independent labs, right?

13 A. That's correct.

14 Q. Not other academic researchers, right?

15 A. Yes, that's right.

16 Q. And this protocol, for instance, has not been
17 peer reviewed like it would be if it's published
18 like -- like our Exhibit 436, right?

19 A. Well, the changes were very minor from off the
20 published --

21 Q. Sir.

22 A. -- protocol.

23 Q. This protocol, Exhibit 434, was -- has not been
24 peer reviewed by anybody outside of the FBI Lab;
25 is that right?

1 A. Sir, very few of our protocols are reviewed by
2 anybody --

3 ATTORNEY BUTING: Judge --

4 A. -- outside the FBI Laboratory.

5 THE COURT: He's entitled to an answer to
6 his question.

7 A. No, this was not peer reviewed by anyone outside
8 of the FBI --

9 Q. Thank you.

10 A. -- as it's written here.

11 Q. That's right. And that protocol did not arise
12 out of any kind of ongoing research, independent
13 of this litigation, right?

14 A. I'm not sure I understand your question.

15 Q. The development of this protocol was not
16 something that just came out of independent
17 research your lab was doing on determining
18 whether or not you could find EDTA in
19 bloodstains.

20 A. That is correct. This was generated specifically
21 by the request to do the analysis of evidence in
22 this case. That's why we developed this --

23 Q. Sure.

24 A. -- protocol.

25 Q. So it's specific to this litigation, right?

1 A. And then future cases, if we get the request.

2 Q. And there were no industry standards that bound
3 you to this particular protocol, right?

4 A. No, I disagree. There are certainly standards
5 that we have to employ that are based on the FBI
6 Laboratory's quality assurance program.

7 And those are very stringent protocols
8 and requirements that are, in essence, based upon
9 our accrediting body's requirements. And that,
10 we have actually stepped up to a more stringent
11 accreditation program where we're following
12 what's called the International Standards of
13 Operation or ISO protocols. And --

14 Q. Let me stop you there for a second, because
15 most -- a lot of your testimony on direct was
16 about this LS/MS/MS technique -- I'm sorry --
17 LC/MS/MS technique, right?

18 A. That's correct.

19 Q. Just so we're not confused, I'm not attacking
20 that particular instrument, okay?

21 A. Okay.

22 Q. I'm not challenging the ability of that
23 instrument to find, in some circumstances,
24 certain chemicals, okay.

25 A. Okay.

1 Q. Are you with me?

2 A. Yes.

3 Q. So, what I'm trying to focus on here is the use
4 of that instrument to attempt to find EDTA in a
5 bloodstain, all right?

6 A. Yes.

7 Q. And that's what your protocol, 434, was developed
8 to do, right?

9 A. Yes, it was.

10 Q. And you were not bound by any kind of industry
11 standards in the development of that protocol's
12 hypothesis that you were trying to find EDTA in a
13 bloodstain?

14 A. I'm sorry, but I'm not sure I follow you.

15 Q. It's probably a bad question, I apologize. It's
16 my fault. Let me go at it this way. As far as
17 you know, is there anybody else in the country
18 who is doing testing for EDTA stains -- I'm
19 sorry -- EDTA in bloodstains.

20 A. Yeah, I believe that the lab you referred to
21 earlier, National Medical Services, is offering
22 that.

23 Q. And that's Mr. Ballard, right?

24 A. He's at least one of the scientists that perform
25 that analysis. I'm not aware if any others do or

1 not.

2 Q. Okay. And you are not aware of any other lab
3 that does?

4 A. I'm not aware of any that do, and the only reason
5 I'm aware that National Medical Services offers
6 it is because of the **Cooper** case, as we talked
7 about earlier.

8 Q. Would you agree there is a rather conspicuous
9 void of research in the last 10 years, since
10 Exhibits 436 and 437 were published?

11 A. A void in the research, there certainly have not
12 been any articles that I'm aware of, published in
13 the last 10 years --

14 Q. Okay.

15 A. -- specifically looking at EDTA in bloodstains.

16 Q. We talked earlier about how I asked, did you
17 produce any other protocols that you used for
18 testing EDTA; why did you refuse to do that?

19 A. We have an attorney that's employed in our
20 laboratory and I was instructed to not turn over
21 any other protocols, other than the one that was
22 used in this particular case, because according
23 to the attorney, that's the only one that's
24 relevant to this case.

25 Q. Okay. So you had some internal attorney make the

1 decision for you?

2 A. That's correct.

3 Q. All right. We talked about, I think you agreed
4 that the protocol that was used in the O.J. case
5 was developed rather hurriedly, mid-trial, right?

6 A. It was -- Again, it was taking a procedure that
7 we had in place, which is simply looking for
8 chemicals, specific chemicals in a material, and
9 we do this all the time at the FBI Laboratory.
10 We -- Many, many cases, we are asked to look at a
11 stain -- I'll keep it very simple -- a stain, and
12 determine if a specific chemical is in that
13 stain. So, in that general line of thought, we
14 took our general procedure that we would use to
15 identify an unknown chemical in a stain, and
16 apply that in the O.J. case.

17 Q. And --

18 A. Now --

19 Q. Would you agree --

20 A. I'm sorry, what had to be done quickly, to finish
21 the answer is, we had to look specifically for
22 EDTA, so we had to set the instrument up so that
23 it was targeting EDTA.

24 Q. And in doing that, quickly, in order to be used
25 in the O.J. Simpson case, you didn't employ all

1 of the four -- I forget what you called it --
2 factors in validation?

3 A. Well --

4 Q. Have I confused you or --

5 (Court reporter couldn't hear.)

6 Q. (By Attorney Buting)~ Have I confused you? Do
7 you know what I'm talking about?

8 A. I do.

9 Q. Okay. You went through four, what do you call
10 those, factors?

11 A. Well, they are different variables in the
12 validation protocol.

13 Q. And one of them you forgot today until you looked
14 it up, right? Do you know what I'm talking about
15 now?

16 A. Yes I drew a blank, that was carryover. But --

17 Q. Those are four experiments, I think, is what you
18 called them, right?

19 A. Yes, four different areas that we're evaluating
20 on the procedure.

21 Q. Detection limit, right?

22 A. Yes.

23 Q. Interferences from normal blood?

24 A. That's correct.

25 Q. Matrix suppression?

1 A. Correct.

2 Q. And carryover?

3 A. Yes.

4 Q. And, in fact, in the O.J. Simpson protocol that
5 was used, as you went back and looked at it, you
6 discovered, oops, there might have been some
7 carryover that was affecting the results in that
8 case?

9 A. That's not entirely accurate.

10 Q. Well, didn't -- Well, okay. Let me ask -- Why
11 don't you explain; didn't you, in fact, conclude
12 that there -- that carryover was a factor in some
13 of the results that you were getting?

14 A. For this case, or for --

15 Q. For the O.J. Simpson protocol.

16 A. No, I didn't work on the O.J. Simpson case, so I
17 didn't --

18 Q. Well, you just studied it in order to develop
19 this protocol, right?

20 A. No, I did not look at the O.J. Simpson case and I
21 did not look for EDTA in the bloodstain from that
22 case.

23 Q. But you looked at Exhibit 436?

24 A. Yes, I did.

25 Q. And 436 expresses concerns about possible

1 carryover affect in the protocol, right?

2 A. That's correct, it does.

3 Q. And it's your testimony that you don't know that
4 that was, alternately, the FBI's explanation for
5 the results that they got showing EDTA in the
6 O.J. case?

7 A. No, that's not my testimony. My testimony was
8 that I didn't -- you said, when I looked at the
9 O.J. Simpson case; I didn't work on the O.J.
10 Simpson case.

11 Q. Right. What I'm saying is, your testimony today
12 is that you don't know that scientists went back
13 and looked, after the O.J. case, try and explain,
14 hey, why are we getting these EDTA results and
15 concluded it was probably carryover?

16 A. Well, you know, to be accurate about it, it was
17 discovered in the middle of the trial, when the
18 evidence was being presented in the case. There
19 was a break over the weekend and the scientist
20 that was doing the work, came back to Washington,
21 and did some additional tests and realized that
22 what he was seeing as a very small blip of EDTA
23 in the bloodstain, was actually instrument
24 carryover --

25 Q. Okay.

1 A. -- from a previous sample, showing up in the next
2 sample. And he did experiments and he proved
3 that to be the case, that was in the middle of
4 the trial --

5 Q. Okay.

6 A. -- not for this paper.

7 Q. Okay. But --

8 A. This paper supported those findings that he had
9 during that case.

10 Q. And in that trial, your laboratory offered
11 evidence, based on a protocol, that in the middle
12 of the trial, your own scientist determined was
13 flawed, right?

14 A. Could you repeat that?

15 Q. In that trial, your laboratory, the FBI, offered
16 a brand new protocol, never used before, and in
17 the middle of the trial, your own scientist
18 discovered that it was flawed.

19 A. No, absolutely not. In the O.J. trial, I don't
20 know that we offered a protocol. I have no
21 reck -- I have no knowledge of that, whatsoever.
22 I don't believe that he said it was flawed; he
23 was explaining the result. That doesn't mean he
24 did not identify EDTA, or the lack of EDTA, but
25 he did some additional validation studies in the

1 middle of the trial.

2 Q. Correct.

3 A. That's correct. And he reported that back to the
4 Court.

5 Q. And so he -- So, your laboratory offered evidence
6 and opinions, on a test, that later validation
7 studies, in the middle of the trial, proved to be
8 not completely accurate, because there was
9 carryover; isn't that right?

10 A. Again, I -- I -- I disagree.

11 THE COURT: Hold on a minute. This isn't
12 the jury, this is me.

13 ATTORNEY BUTING: Okay.

14 THE COURT: And I think I have got the
15 drift here.

16 ATTORNEY BUTING: All right.

17 THE COURT: So we can move on.

18 Q. (By Attorney Buting)~ Well, there's another case
19 that you were involved in in which a protocol was
20 developed rather hurriedly; do you know which one
21 I'm talking about already?

22 A. I -- There are many cases we --

23 Q. Okay.

24 A. -- we work on that the protocols develop quickly.

25 Q. Let's talk about the William Sybers case. Are

1 you familiar with that one?

2 A. Yes, I am.

3 Q. **Sybers** is S-y-b-e-r-s **vs. State**, the citation is
4 841 Southern 2d, 532, 535 to 40, Florida App.
5 2003, just giving the cite for the Judge and the
6 record, okay.

7 A. Yes.

8 Q. And this was a case in which a medical examiner
9 was accused of having poisoned his wife with a
10 certain chemical. And the accusation was that
11 the charge arose about nine years after she had
12 died, right?

13 A. That's correct.

14 Q. And her body was exhumed and tested for this
15 particular chemical, right?

16 A. Yes, it was.

17 Q. And, I'm sorry, but maybe you can pronounce it
18 for me?

19 A. It's called succinylmonocholine,
20 s-u-c-c-i-n-y-l-m-o-n-o-c-h-o-l-i-n-e.

21 Q. So this succinyl drug was tested by you -- I'm
22 sorry, some embalmed tissues and organs were
23 tested by you?

24 A. Ultimately, they were tested my me, yes.

25 Q. Based on a protocol -- You had never tested for

1 that particular drug before, had you?

2 A. No, I had not.

3 Q. So, you developed a protocol to test for that
4 particular drug and that particular case -- for
5 that case?

6 A. At the request of a court, yes, we did.

7 Q. Much like today, where you developed a test for a
8 particular case?

9 A. Well, it was a little different; in that
10 particular case another laboratory had initially
11 found this chemical in the remains of the alleged
12 victim in that case. And --

13 Q. And just tell the Judge which laboratory that
14 was?

15 A. That was National Medical Services.

16 Q. And let's tell the Judge which doctor or
17 scientist.

18 A. It was Dr. Kevin Ballard was the scientist on
19 that particular case.

20 Q. And what he did, and you then, also, tried to
21 replicate, with a slightly different test, right?

22 A. Well, it was -- it was significantly different.

23 Q. But in both instances, Doc -- you basically came
24 to the same conclusion as Dr. Ballard, which was,
25 there was evidence that this woman had been

1 poisoned with this drug; isn't that right?

2 A. Not exactly what -- the conclusion I came to was,
3 we were asked to verify if this chemical, which I
4 will just call SMC, was present in her specimens.
5 And National Medical Services had found this
6 chemical in every specimen they collected from
7 her, from the heart, to the kidney, the liver,
8 the brain, and fat tissue.

9 We were not able to confirm it in any of
10 them, except for one or two specimens. So we did
11 confirm that this chemical was present in those
12 specimens that were collected from an exhumed
13 body.

14 Q. Let me stop you there for a second. Because you
15 weren't able to find everything -- you weren't
16 able to find this chemical in as many tissues and
17 fluids as Dr. Ballard had found, right?

18 A. That's correct.

19 Q. And when you were challenged about that, in
20 court, you said, well, it's probably because
21 there -- he had different detection limits than I
22 did.

23 A. Exactly. Exactly.

24 Q. Which means that you can set up these tests in
25 machines in a way that -- that you set the

1 threshold as to when something is considered
2 detected and when it's not?

3 A. No. No. I mean, you could, theoretically, but
4 what that means is, in analytical chemistry, our
5 instrumentation that we use, we have a pretty
6 significant break through about every three years
7 in the quality of instrumentation. And what that
8 equates to is, how low we can go.

9 So, his instrument that he used in that
10 particular test was very state-of-the-art
11 instrumentation. In fact, we didn't even have
12 one at the time and got one at a later date. But
13 his instrument was much more sensitive to these
14 things. It had nothing to do with any settings
15 that we do in the laboratory. It's just the
16 technology --

17 Q. Technology --

18 A. -- you are using at the time. And what he used,
19 it was a much more sensitive technique than what
20 we had.

21 Q. And when you developed whatever protocol you did
22 use in that case, you did so knowing that there
23 had never been a study of how this particular
24 chemical works, reacts, breaks down in a body
25 that's nine years old, right?

1 A. No, no. I disagree again. There were studies
2 and, I mean, you are calling up on memory from a
3 number of years ago here, but there were studies
4 that were published that dated back decades
5 before that case, in which they did demonstrate
6 the breakdown of the parent drug, which is called
7 succinylcholine.

8 Q. Right. But none of them involved a test of what
9 it would look like nine years later when you
10 exhume the body, did it?

11 A. There would never be a study like that, so.

12 Q. Right.

13 A. Yes.

14 Q. And just like there is no study on what and how
15 any EDTA would react or degrade or not degrade in
16 a 9 or 11 year old blood tube, or blood vial, is
17 there?

18 A. Well, again --

19 Q. Simple question.

20 A. I'm sorry, but I disagree about that. There
21 are --

22 Q. Oh, there's a study that describes the
23 degradation of EDTA in a blood vial that is 9 --
24 or in your case -- 11 years old?

25 A. I'm not aware of any studies, no.

1 Q. Okay. That's fine. That was my question.

2 A. Okay.

3 Q. Now, in that **Sybers** case, there was a conviction,

4 right?

5 A. There was, yes.

6 Q. A man was convicted of poisoning his wife, right?

7 A. That's correct.

8 Q. After the conviction, it was reversed on appeal,

9 right?

10 A. I believe it was, yes.

11 Q. And after that, additional scientific tests were

12 done that proved, although you thought the

13 science was good at the time, subsequent tests

14 proved them no longer to be accurate and correct;

15 isn't that right?

16 A. Not exactly, no.

17 Q. I'm showing you Exhibit 439, take a moment and

18 look at them.

19 A. Okay.

20 Q. This is a filing notice; it is entitled notice to

21 the Court?

22 A. That's correct.

23 Q. **State vs. William** Syber -- **Sybers**, right?

24 A. Yes.

25 Q. And the -- You agree with me that this notice

1 states, and it has the case number, the notice
2 states, the purpose of this filing is to notify
3 the Court and the defendant that recent
4 scientific testing conducted by National Medical
5 Services and the Federal Bureau of Investigation
6 Laboratories has discovered that the findings
7 specifically related to this defendant and the
8 testimony of the experts from each of these
9 laboratories, though believed to be correct at
10 the time of the testimony, can no longer be
11 relied upon.

12 The findings of the presence of
13 succinylmonocholine in the specimens tested are
14 believed to be accurate and correct; however, the
15 opinions that the succinylmonocholine proves to a
16 scientific certainty the prior presence of or
17 injection of succinylcholine are not correct,
18 right?

19 A. That's what it says, yes.

20 Q. And that's what, ultimately, your own lab
21 determined, after you convicted -- helped convict
22 a man, right?

23 A. No.

24 Q. Okay. Let me ask, do you disagree with that
25 finding?

1 A. I absolutely do.

2 Q. Okay.

3 A. Again, we were asked to confirm the findings of
4 the first lab, and we did, in some of the
5 specimens. And during that trial, one of the
6 specimens that we did not find
7 succinylmonocholine in was actually the only
8 specimen that the first lab never touched. Are
9 you following me?

10 Q. Yeah.

11 A. So, at that trial, I said, of any specimens that
12 are of relevance here, because the allegation was
13 that the first lab had contaminated everything
14 with this drug, I said the one that is of most
15 relevance is the one that was never in their lab
16 and that's negative.

17 Now, we were able to find
18 succinylmonocholine in the tissues from the
19 victim in the case, the **Sybers** case. And as this
20 -- As you clearly said, the finding of the
21 presence of succinylmonocholine, in the specimens
22 tested, are believed to be accurate and correct,
23 and I stand by that.

24 What we did, years later, again, we had
25 new technology come into our laboratory and in

1 applying that new technology to the same method,
2 we were going through another validation study to
3 ensure that with this new instrument we were
4 still able to use this method, and in doing so,
5 this more sensitive instrument was now picking up
6 traces of this same chemical in specimens that
7 were collected from people that had never been
8 exposed to that drug. So this was a --

9 Q. So you dug up bodies?

10 A. No, I did not dig up bodies.

11 Q. Well, you looked at other dead bodies, tissues
12 from other dead bodies, and you found the very
13 same chemical, right?

14 A. We were provided specimens from Washington D.C.
15 medical examiner cases. And all of those cases
16 we had a very good history on what medications
17 they may or may not have been given. And we used
18 that information to come up with the end result
19 that our laboratory was able to find traces of
20 this particular chemical in non-embalmed --

21 Q. Okay.

22 A. -- non-embalmed specimens that were collected
23 from people that had never been given the parent
24 drug, succinylcholine.

25 Q. People that had never been poisoned.

1 A. Well, it's not a poison, it's a drug that you
2 use, clinically, to paralyze the muscles in the
3 body so that you can intubate them.

4 Q. I understand that, sir.

5 A. People have to be on a respirator, normally, in
6 order to live through that because the diaphragm
7 gets paralyzed.

8 Q. I understand that there's a legitimate reason for
9 the drug, but what Mr. Sybers was charged with
10 and what you testified on behalf of the State
11 about was that the presence of that drug, a
12 metabolite of that drug, actually, proved that
13 the drug itself had been given by Mr. Sybers?

14 A. That's right. And that was based on the science,
15 the knowledge of the science at the time --

16 Q. Fine.

17 A. -- of the testimony.

18 Q. And the science changed a few years later. And
19 you had to withdraw your findings in that case,
20 your opinion in that case.

21 A. Yes, science always changes; that's part of it.

22 Q. All right. Let's go to the **Cooper** case for a
23 moment. You filed the affidavit that we saw
24 earlier, right? In that case, right?

25 A. I'm sorry, I don't --

1 Q. I may have taken --

2 A. -- have a copy?

3 Q. I'll bring that back to you in a minute. I'm not

4 actually going to refer much to it, but my point

5 is, in that case, you didn't actually do any

6 testing?

7 A. Oh, that's correct, yes.

8 Q. You were just brought in at the beginning to give

9 an opinion about whether or not Mr. Ballard's

10 tests were valid -- testing procedure was valid?

11 A. Yeah. And, again, I didn't even look at data

12 that he generated on that case. I was asked to

13 review his testimony and what he testified to as

14 his approach and then make a declaration as to

15 whether or not that I felt that that was an

16 appropriate approach that he took.

17 Q. Okay. So you disagreed with Dr. Ballard in that

18 case?

19 A. With the approach that he took, yes.

20 Q. Okay. But you agreed with Dr. Ballard in the

21 **Sybers** case?

22 A. Well, I guess I agreed and disagreed.

23 Q. Well, you confirmed some of his findings, didn't

24 you?

25 A. Yeah.

1 Q. And you rendered an opinion like he did, that
2 that poor man, Mr. Sybers, had poisoned his wife
3 nine years earlier?

4 A. I agreed that we were able to find
5 succinylmonocholine in the specimens that we
6 collected from the alleged victim in that case.

7 Q. And didn't you render an opinion that that
8 finding, to a reasonable degree of scientific
9 certainty, allowed you to conclude that
10 Mr. Sybers had injected the parent drug in his
11 wife?

12 A. I never said, in testimony, under oath, that
13 Dr. Sybers injected his wife with
14 succinylcholine.

15 Q. But you did say that the presence of the drug
16 you -- the chemical you found, was consistent
17 with someone having administered the parent drug
18 to Mr. Sybers' wife before she died?

19 A. Yes, I believe that to be true.

20 Q. Okay. And, by the way, you interned with
21 National Medical Services, S.C., right?

22 A. Yes, I did, for about three months in the summer
23 of 1998 -- or I'm sorry, 1988.

24 Q. So you have worked quite a bit with Mr. Ballard?

25 A. I'm sorry, 1987.

1 Q. Okay. So have you worked quite a bit with
2 Mr. Ballard?

3 A. I don't believe he was employed with National
4 Medical Services when I did my internship there.

5 Q. All right. The Kevin Cooper case was a case
6 similar to this in the sense that an allegation
7 was made that a bloodstain of his, the
8 defendant's, was placed on some kind of crime
9 scene evidence, right?

10 A. Yes, that's correct.

11 Q. I'm showing you Exhibit 440, this is the EDTA
12 testing order ultimately approved by the Court in
13 that case, right? Take a minute and look at it.

14 A. Okay.

15 Q. Okay. And the test protocol developed there was
16 sort of a compilation of testimony by a number of
17 experts in front of this Judge Marilyn Huff,
18 United States District Court, Southern District
19 of California, right?

20 A. I haven't read this in detail, so I'm not sure.

21 Q. Well, are you telling me, then, that when you
22 looked for resources in February of 2007, to rely
23 on, or references to look at when you developed
24 your own protocol from this case, that you did
25 not review the protocol that was used in the

1 Kevin Cooper case?

2 A. That's correct, I did not.

3 Q. Instead, you relied just on the FBI's own
4 protocol from 10 years earlier.

5 A. No, I relied upon my education and training, my
6 experiences, to make a decision as to what was
7 the most appropriate approach to take in the
8 request that we had in front of us for this
9 particular case.

10 Q. But in terms of protocols to detect EDTA in a
11 bloodstain, you looked only at the FBI's own
12 protocol from 1997?

13 A. No, I did a literature search as -- for published
14 methods on EDTA, in particular for bloodstains,
15 and the only two references I was able to find
16 that were significant in my opinion were the two
17 that we talked about earlier that are exhibits --

18 Q. 436 and 437?

19 A. Yes.

20 Q. Both written -- or published in 1997?

21 A. That's correct.

22 Q. And so this order, exhibit -- what are we up to
23 -- Exhibit 440, is dated August of 2004, right?

24 A. Yes.

25 Q. And you were aware of the *Cooper* case because you

1 had provided an affidavit for it --

2 A. Yes.

3 Q. -- right?

4 A. Yes.

5 Q. But you are saying that when you developed the
6 protocol for Mr. Avery, you did not consider the
7 protocol as been developed, ultimately, with the
8 Court's approval in the **Cooper** case?

9 A. As far as I know, it was never a peer reviewed,
10 published protocol. And, as I stated earlier, my
11 affidavit in this case said I disagreed with his
12 approach, so that would imply I disagreed with
13 the protocol he used. So I'm not sure why I
14 would --

15 Q. Well --

16 A. -- consult that as a reference to use in
17 developing a protocol for ourselves.

18 Q. Well, because, did it ever occur to you that the
19 Court had taken your testimony or your affidavit
20 or declaration, as well as the defense
21 declaration, and then taken all this testimony
22 and had gone through all this work for about a
23 year to develop this testing protocol, and you
24 never looked at it?

25 A. No.

1 Q. All right.

2 A. I wasn't aware of that.

3 Q. Okay. And when you developed this protocol, you
4 never came to this Court and suggested, hey, this
5 is how we think we're going to do it, do you
6 think this is going to be a valid approach in
7 order to allow the evidence or the opinions to be
8 admissible?

9 A. No, we never do that, sir.

10 Q. You are the FBI, you do things your own way.

11 A. No, it's our job to independently develop a
12 procedure and put it through the required steps
13 of validation --

14 Q. Let's talk a little --

15 A. -- as -- I'm sorry -- as defined by our
16 accrediting body.

17 Q. Okay.

18 A. And, then, to present that in front of the Court,
19 who is the gatekeeper, as you know, as to whether
20 or not it should be allowed in.

21 Q. Okay. The exhibit in front of you describes a
22 protocol that's done under what's called double
23 blind procedure; are you familiar with double
24 blind?

25 A. I am, yes.

1 ATTORNEY GAHN: Your Honor, I would just
2 like to make a clarification here. I understand
3 this to be an EDTA testing order. Could counsel lay
4 a foundation that this is a protocol. Seems to me
5 this talks about the order of testing, who gets it
6 first, what do they get, but to refer to this as a
7 protocol, I would like a bit more foundation.

8 Q. (By Attorney Buting)~ All right. Well, I will
9 accept the amendment of this, not as a protocol,
10 but as a testing order prepared by a court in the
11 **Cooper** case. All right.

12 A. All right. But, again, I have never read this,
13 so --

14 Q. Okay.

15 A. -- I feel like I should take time to read it if
16 you are going to question me about any of the
17 science and the specific steps in it.

18 Q. Okay. Well, let's -- Rather than do that, let's
19 just move on to this issue of double blind
20 testing; what is double blind testing?

21 A. Double blind testing is essentially a proficiency
22 test or competency test that's done so that the
23 person taking the test doesn't know the results
24 while they are taking it, doesn't know the right
25 answer, and also the person administering the

1 test doesn't know the right answer. It's an
2 independent system.

3 Q. And what that's, in part, designed to do is to
4 get rid of any kind of potential bias that the
5 tester may have, right?

6 A. That's true.

7 Q. That if the tester thinks that he's being asked
8 to find a particular chemical in a particular
9 sample, there may be some examiner bias
10 potential?

11 A. Yeah, that's true.

12 Q. And so, double blind means that they are given
13 these examples, samples, they don't know whether
14 it's a control, they don't know whether it's a
15 swab from the RAV4; they don't know what it is,
16 right?

17 A. That's true.

18 Q. They just test it for the presence of EDTA?

19 A. That's right.

20 Q. You didn't do that in this case, did you?

21 A. Yes, we did.

22 Q. You did double blind testing?

23 A. We did blind testing, not double.

24 Q. And blind being what --

25 A. Did blind testing. I'm sorry.

1 Q. Blind being in what manner?

2 A. Well, it was before we analyzed the evidence in
3 this case, I had one of my employees prepare 10
4 swabs. And some of those swabs had EDTA blood on
5 them and some did not. And then myself and one
6 other scientist were randomly assigned those five
7 swabs.

8 Q. Are you talking about the validation test?

9 A. No, sir. I'm talking about a competency test,
10 which was in that binder that we sent to you.

11 Q. Well, let me -- I'm directing you to the test in
12 this case, on the evidence.

13 A. Well, you asked me if we did any blind testing on
14 this case. And my answer is, yes, we did, and I
15 was explaining that.

16 Q. Go ahead then.

17 A. So we did not know the answers upfront. We just
18 knew that the swabs had blood on them and that
19 they either had EDTA on them or they did not.
20 Some did, some didn't. Two different scientists
21 were assigned, five and five.

22 And we ran the tests, we reported those
23 results back to an independent person, that
24 wasn't even involved in giving the test in the
25 first place. The independent person was handed a

1 sealed envelope that had the results in it, the
2 right answers.

3 After we gave our answers to her, she
4 then graded our results and prepared a memo back
5 to our training files to show that we
6 successfully identified correctly 10 out of 10 of
7 those swabs.

8 Q. Let's clarify for the Court, those swabs and
9 samples you are talking about were not the RAV4
10 swabs, or the blood vial in Mr. Avery's case?

11 A. No, there was -- No.

12 Q. Okay. So, when you tested the evidence in this
13 case, the blood swabs, the swabs from the
14 vehicle, the control swabs from the vehicle and
15 the blood vial that was sent to you, they were
16 not -- those tests were not done in any blind
17 fashion?

18 A. Well, no, I mean we knew what we received. We
19 had to check it in. We had to follow our
20 standard forensic practices of looking through
21 the evidence, documenting things --

22 Q. Sure.

23 A. -- and then we had to apply it to the protocol.

24 Q. Right.

25 A. So, I don't believe you can do it blindly.

1 Q. Well, how many chemists do you have, working for
2 you?

3 A. I have a number of chemists, but they are not all
4 qualified to do this type of examination.

5 Q. How many qualified chemists do you have to do
6 this exam?

7 A. Three, counting myself.

8 Q. Okay. You could have had yourself, or one of
9 them, go through, log in the evidence, identify
10 it, give it a cue number, or whatever, right?

11 A. Yes.

12 Q. And, then, you could have had another chemist
13 test it, who didn't know what those numbers and
14 designations meant, apply to.

15 A. Yes. That could have happened, yes.

16 Q. But you didn't?

17 A. No, that was -- we don't normally do that.

18 Q. You had the same chemist who -- who tagged and
19 booked -- or -- the items, also do the test?

20 A. That's correct.

21 Q. And just so we're clear, you didn't do the tests
22 in this case?

23 A. No, I did not.

24 Q. A Mr. Brewer, what's his name?

25 A. Jason Brewer.

1 Q. Jason Brewer, B-r-e-w-e-r.

2 A. Dr. Jason Brewer.

3 Q. Dr. Brewer. Why isn't Dr. Brewer here?

4 A. Because he is a -- in this case, he served the

5 role as a laboratory technician.

6 Q. So when Mr. Brewer was doing the tests, when he

7 was putting, you know, running a test to see if

8 there was EDTA in item Q-46, he knew that item

9 Q-46 was a swab from the vehicle?

10 A. Yes, he did.

11 Q. Okay. Now, the question of whether or not you

12 are seeing a particular chemical in one of these

13 LC/MSS (sic) tests, requires some subjective

14 interpretation by the examiner?

15 A. Well, as the protocol indicates, there are a

16 number of criteria that must be met in order

17 to -- to make the call that it is a positive

18 finding, that it's truly identified, so if all

19 those criteria are met, then it's clearly there.

20 And if they are not met, then we determine that

21 it's negative.

22 Q. Well, talking about these mass spectrum

23 instruments, there are limitations on what they

24 can tell you, right?

25 A. Can you be more clear on that?

1 Q. Well, you can't just run a sample, then open up
2 the door, put the sample in, close the door,
3 thing beeps a bunch of times and out spits a
4 result.

5 A. Only on CSI.

6 Q. All right. Not, certainly, in real life?

7 A. Not in real life, but it is -- the mass
8 spectrometer is considered to be the gold
9 standard of instrumentation that's used in
10 analytical chemistry, so.

11 Q. Sure, but even it has limitations?

12 A. Well, yes, everything has a limitation, that's
13 right.

14 Q. Okay.

15 A. And that's why we put into our protocol, this
16 SOP, we write what those limitations are.

17 Q. All right. But you also have what's called
18 guidelines for comparison of mass spectra?

19 A. That's correct.

20 Q. And that was issued June 21st of 2006.

21 A. That's correct.

22 Q. You are familiar with that?

23 A. Oh, yes, I am.

24 Q. And it talks about, basically, what kind of
25 guidelines you are supposed to follow before you

1 make a call that something is or isn't present,
2 right?

3 A. That's exactly right.

4 Q. Okay. And do you agree with this statement, that
5 the definition of what makes any given ion
6 characteristic, quote unquote, of a particular
7 chemical structure, is somewhat nebulous?

8 A. Can I see where you are referring to.

9 Q. Sure. Sure. This would be on guideline 9.3?

10 A. Okay. But -- It does say that, but you have to
11 put it in context --

12 Q. I understand that.

13 A. -- with what's around it.

14 Q. Sure. But what it's telling you is that
15 something called diagnostic ions, right?

16 A. Yes.

17 Q. And that's something that, you know, you put
18 these things in and it spits out -- the computer
19 spits out these graphs and spikes and whatnot, I
20 can show you that later, but, right? I'm
21 simplifying, but?

22 A. Very much so, but, yes.

23 Q. Okay. And what this is telling you is, that
24 there does not appear to be any universally
25 accepted standard in the field. This means that

1 good and consistent judgment by the examiner is
2 essential.

3 A. That's true.

4 Q. Okay. And it's also telling you, though, that
5 you have to be careful about the interpretation
6 of the results, even with this wonderful
7 instrument, LC/MC/MS/MS, or just the MS part?

8 A. That's exactly right, you have to have experience
9 and training in order to interpret the data.

10 Q. Did you, by the way, approve this guidelines? I
11 believe you did.

12 A. Yes, I did.

13 Q. Would you take a minute and look at limitations,
14 item 14, in that list of guidelines. Okay?

15 A. Yeah, absolutely.

16 Q. Did you write this?

17 A. No, I did not.

18 Q. You just signed off on it?

19 A. I reviewed it and signed off on it.

20 Q. Maybe we'll mark this -- Well, I will mark it and
21 then I will get a copy that's not highlighted,
22 over lunch. Just identify for the record, now,
23 this Exhibit 441?

24 A. All right.

25 Q. That's entitled what?

1 A. It's entitled, Guidelines For Comparison of Mass
2 Spectra.

3 Q. Okay. And this is a document that is -- that the
4 FBI Laboratory Chemistry Unit follows.

5 A. For the -- Specifically for the toxicology,
6 sub-unit of the Chemistry Unit.

7 Q. Okay. And so would you agree or disagree with
8 this statement? The mere fact that an unknown
9 mass spectrum matches well to the spectrum of a
10 known standard will rarely, by itself, be
11 sufficient grounds to claim the presence of that
12 compound in the question sample.

13 A. Absolutely, that's a correct statement.

14 Q. And quote, similarly, the fact that an unknown
15 mass spectrum fails to match that of a known
16 standard, will generally, not by itself,
17 constitute grounds for concluding that the
18 compound is not present in the questioned
19 specimen?

20 A. That's right. In simple English, what that is
21 saying, is you have to consider all the data that
22 you have generated in order to make a call that
23 something is there or not there. You can't just
24 pick the data that matches your hypothesis; you
25 have to take the totality of the information --

1 Q. Sure.

2 A. -- and apply it in your interpretation.

3 Q. So it's not just what comes out on these graphs,
4 you have to interpret them?

5 A. Exactly.

6 THE COURT: I think, Mr. Buting, if you are
7 moving on to another line of questioning, it might
8 be a good time to take our lunch break.

9 ATTORNEY BUTING: Sure.

10 THE COURT: Are you done with the
11 Exhibit 441?

12 ATTORNEY BUTING: Actually, I am. This
13 would be a good time to break.

14 THE COURT: All right. Let's report back
15 at 1:00, then.

16 (Noon recess taken.)

17 ATTORNEY GAHN: Before Mr. Buting
18 continues, could I just make one observation for the
19 Court, about the admissibility hearing?

20 THE COURT: Sure.

21 ATTORNEY GAHN: At one point, I believe Mr.
22 Buting stated that he is not challenging or
23 questioning whether the LC/MS/MS test can test for
24 EDTA in blood with this instrument.

25 ATTORNEY BUTING: No, that's not what I

1 said.

2 ATTORNEY GAHN: Even if not challenging
3 that, I would think that the admissibility --
4 everything so far he's been questioning on really
5 goes to weight of evidence as opposed to
6 admissibility. And if he is not going to challenge
7 the underlying scientific principles of LC/MS/MS,
8 aren't we over with this hearing?

9 ATTORNEY BUTING: We most certainly are
10 not, because it's the application of this to this
11 particular instrument, which may be perfectly
12 acceptable and reliable in the field, but it's the
13 application of this instrument to this test, to its
14 ability to determine EDTA in a bloodstain that's
15 being challenged here.

16 THE COURT: One of the elements that the
17 Court has to address in determining whether expert
18 testimony is admissible is whether the evidence will
19 assist the trier of fact in determining an issue of
20 fact; I'm assuming that that's what --

21 ATTORNEY BUTING: Yes.

22 THE COURT: -- Mr. Buting's line of
23 questioning is directed at, so, I'm going to allow
24 it.

25 ATTORNEY STRANG: The Court's microphone is

1 a little -- sometimes we aren't getting it at all
2 and sometimes it seems soft.

3 THE COURT: All right. Unfortunately, it's
4 glued to the desk, so, I do my best. Thank you.
5 Mr. Buting, you may proceed.

6 ATTORNEY BUTING: Thank you, very much.

7 CROSS-EXAMINATION CONTD

8 BY ATTORNEY BUTING:

9 Q. All right. Mr. LeBeau, let me just go back to
10 one thing for a moment, the FBI's attorney, his
11 refusal to produce the prior protocols that your
12 lab has used for EDTA tests? Okay?

13 A. That's correct. I was instructed that the only
14 protocol to turn over, for this case, based on
15 the letter that was sent to our laboratory, was
16 the protocol that we applied for this particular
17 case.

18 Q. Well, would you agree that if we looked at the
19 old protocols that you used and we saw any
20 differences between those protocols and the one
21 that you devised, we could ask you about those
22 differences, right, if we had those old
23 protocols?

24 A. Potentially, if there were significant
25 differences, you could ask.

1 Q. Okay. And we could ask about what the reasons
2 were for you to make any changes between what you
3 have got now and what you had previously, right?

4 A. Yes.

5 Q. And we could ask about what studies you have done
6 or relied on in order to make those changes in
7 protocol -- this protocol from any prior ones?

8 A. Yes.

9 Q. And if we saw that there were any internal
10 critiques of those prior protocols, we could
11 learn even more about possible weaknesses with
12 this protocol?

13 A. Well, there are no records of internal critiques
14 about the former protocol.

15 Q. And why are there not any internal critiques
16 about that?

17 A. There was no reason to critique it.

18 Q. Then why didn't you use it in this case?

19 A. Well, as I indicated earlier today, we moved our
20 laboratory from Washington D.C. to Quantico,
21 Virginia. And in doing so, we acquired a number
22 of new instrumentation that we did not have when
23 we were in Washington D.C.

24 Q. Well --

25 A. And as part of that move, we had to, in essence,

1 revalidate, or at least reconfirm, that every
2 protocol that we moved with us was actually
3 working the same way in the new facility. Now,
4 as I had --

5 Q. But --

6 A. -- also indicated earlier, we had not had any
7 request to do this particular analysis since we
8 worked in the O.J. Simpson case. Our laboratory
9 moved in 2003, so over that course of period in
10 2003, we essentially did not take with us that
11 old protocol. I mean, it's an electronic
12 document, so it's not that we didn't have it
13 available, but it's something that we chose not
14 to bring online in the new laboratory, because we
15 weren't getting requests to perform this
16 analysis.

17 Q. But my point is, you do have it, you are just not
18 turning it over because your attorney won't --
19 doesn't want you to?

20 A. I honestly do not know that we have a protocol in
21 this format, as I turned over for this case, for
22 what was done in the O.J. Simpson case. That was
23 under a completely different quality assurance
24 program and, at the time, we weren't even
25 required to have written protocols like this.

1 There was a protocol in existence, as I said
2 earlier, that would allow you to identify
3 chemical in a stain, not specifically EDTA in a
4 bloodstain.

5 Q. Well, are you saying that you think scientists
6 from your lab came into the O.J. Simpson case
7 with all the publicity and national television
8 and presented results of testing for EDTA in a
9 bloodstain and didn't have a written protocol?

10 A. I have no idea if they did or did not. I'm sure
11 there was a written protocol, but at the time of
12 the O.J. case, this is the mid-nineties,
13 completely different set of rules for
14 laboratories in the mid-nineties.

15 Q. Sure.

16 A. And at that time, it was acceptable -- by the
17 standards at the time, it was acceptable to write
18 your protocol, just in your notes for that
19 particular case. As long as you wrote what you
20 did, that was fine. So that wouldn't be a
21 document that's generated like this today.

22 Q. All right.

23 A. So it could simply be the notes from the O.J.
24 Simpson case that would have the protocol.

25 Q. But, if we had those notes, we would be able to

1 look at the differences between that protocol and
2 yours, today?

3 A. Yes, if you had a protocol from the O.J.
4 Simpson --

5 Q. Just so we're clear, that machine, their
6 instrument, even though you may have new
7 versions, the very same test that you used in the
8 O.J. case, that also involved LC/MS/MS, did it
9 not? Tandem mass?

10 A. I don't know. I didn't -- I didn't review the
11 O.J. Simpson case. I didn't do the original work
12 in the O.J. Simpson case.

13 Q. Okay. But you have read the proto -- the
14 published Exhibit 436, right?

15 A. Yes, I have.

16 Q. And that was done very shortly after the O.J.
17 case, right?

18 A. Yes, it was.

19 Q. And the method that's used in that report
20 involves LC/MS/MS, does it not?

21 A. Yes, it does.

22 Q. Okay. So, maybe a different instrument, but the
23 whole idea of being able to do these with one of
24 those combination liquid chromatography and
25 tandem mass spectrometry -- metry, that part is

1 the same; you are using -- the idea of using that
2 instrumentation is the same?

3 A. That's correct.

4 Q. It's other things that we can't tell that have
5 changed because we don't have that protocol,
6 right?

7 A. Yes, you can't distinguish if there's any
8 differences unless you had, probably, the case
9 file, the actual case notes from the O.J. Simpson
10 case. That's where you would be able to
11 differentiate between what was done in that case
12 and what I did in this case.

13 Q. All right. Now, going to this February 15th,
14 2001, protocol, for a moment, that's 434?

15 A. Yes.

16 Q. Are there any internal critiques or comments
17 about that protocol or the -- you know, from the
18 approval process?

19 A. If there are, they are in the packet that I
20 provided you.

21 Q. Who approved that protocol?

22 A. Approved it in what manner? We have three levels
23 of approval --

24 Q. Right.

25 A. -- on issuance.

1 Q. And the ultimate approval for a new protocol is
2 the unit chief, right?

3 A. Well, it's a combination of myself, as the unit
4 chief, and the quality assurance unit chief who
5 oversees quality for the whole laboratory.

6 Q. Sure. But were you involved in the actual
7 development of this protocol?

8 A. As a supervisor I was, yes.

9 Q. And, then, you were also there in the position
10 where you also had to sign off on it?

11 A. Yes. And it's for every protocol in our unit, as
12 the supervisor, I oversee the development of the
13 protocol and then assure that all the steps have
14 been met for a quality program. And then a
15 second check to that is our quality assurance
16 unit chief that does the same thing.

17 Q. So -- But in other cases, let's say if someone is
18 developing a protocol of a test, some other
19 chemical, you know, in a routine, not a hurried
20 manner, not a specific trial date and all that,
21 he may not be involved in the development of that
22 protocol at all, right?

23 A. Well, it depends on who the case is assigned to.
24 If it's assigned to another examiner in our unit,
25 then I wouldn't be as heavily involved with it.

1 But in this case, it was assigned to myself and I
2 had more incite into the development of the
3 method and the validation.

4 Q. But in those cases where you are not involved,
5 where it's not assigned to you, someone else
6 develops the protocol first, right?

7 A. Yes.

8 Q. Without your involvement?

9 A. They may come to me for guidance.

10 Q. Okay.

11 A. I am their supervisor, so.

12 Q. But, then, it comes to you after someone else,
13 another examiner completes it, then it goes to
14 you for approval at the unit level, the unit
15 chief level?

16 A. Well, I wish it was quite that simple. Actually,
17 there's a -- when a method is developed, we have
18 the validation steps that have to be drawn to, be
19 adhered to. As part of that validation, there is
20 a check list that is completed. That check list
21 helps the scientist doing the validation assure
22 that they are completing each of the required
23 steps of that validation. That validation study
24 is reviewed by an independent scientist that had
25 nothing to do with the validation and then I do a

1 review of that on top of it. That's for every
2 protocol that's issued into our -- in our unit.

3 Q. Right.

4 A. In this particular case, because I was involved
5 in the validation, I didn't do the validation
6 review. I assigned that to another employee to
7 do the validation review and she reviewed all of
8 the validation data and signed that she agreed
9 with the work that was done there.

10 Q. Right. But then it gets to the next level of
11 unit chief approval and you are basically
12 approving yourself. You are approving your own
13 protocol at that level, in this case?

14 A. Well, I suppose, technically, yes.

15 Q. I'm just trying to distinguish how, in some
16 cases, when it gets to the unit level, the unit
17 chief approval level, it really is another
18 independent review by you, who wasn't involved in
19 the development?

20 A. Yes.

21 Q. But this case worked differently because it was
22 assigned to you, to begin with?

23 A. Slightly different.

24 Q. Okay. All right. Let me talk about some of the
25 assumptions that I think you are making as you do

1 this test, okay. I call them assumptions, you
2 may disagree. But, for instance, in doing this
3 test where you are trying to see if there is EDTA
4 in bloodstains that may have come from a blood
5 vial that is now 11 years old, you make an
6 assumption that the EDTA that was originally in
7 that blood tube has not degraded in the 11 years
8 to the point where it's not detectable, right?

9 A. I did not make that assumption, no.

10 Q. Okay. Well, if in fact the EDTA had degraded in
11 11 years, then it wouldn't be detected, would it?
12 Simple question.

13 A. If -- If the EDTA -- EDTA had degraded, then it
14 would not. Completely degraded, I should add, to
15 zero, then it would not be detectable.

16 Q. Not really completely to zero, just to the point
17 where it's below your limit of detection, right?

18 A. That would be a very significant reduction in
19 EDTA, because a standard tube has --

20 Q. But, sir --

21 A. -- approximately a thousand to 2,000 parts --

22 Q. Sir --

23 A. -- per million of EDTA --

24 Q. -- please.

25 COURT REPORTER: I'm sorry --

1 ATTORNEY BUTING: Judge, I would direct the
2 witness --

3 COURT REPORTER: I'm sorry, I didn't get
4 his answer.

5 A. I said that standard tube has approximately 1,000
6 to 2,000 parts per million of EDTA in it.

7 COURT REPORTER: Thank you.

8 Q. (By Attorney Buting)~ All right, sir, just follow
9 with me, we'll get to that, all right. But the
10 first step is this. If -- Would you agree with
11 me, if the EDTA has degraded, not to zero, but to
12 a point where it's below your limit of detection,
13 then your tests would not show it, right?

14 A. Well, it would have to degrade to a level below
15 13 parts per million from that --

16 Q. Whatever --

17 A. -- original --

18 Q. Whatever it is. Whatever it is. Whatever your
19 limit is it, it could still be there, but not be
20 detectable?

21 A. To below 13 parts per million.

22 Q. Right. And, so, when you say that -- when you
23 express an opinion that there is no EDTA in those
24 stains -- I'm sorry, let me rephrase that. When
25 you express an opinion that the blood in those

1 stains in the Toyota could not have come from the
2 blood vial, you are making the assumption that
3 the EDTA that was originally in that tube 11
4 years ago, has not degraded to the point where
5 it's not being detected on those stains any more,
6 right?

7 A. No, we tested the tube of blood and determined
8 that it did have EDTA in it at high amounts.

9 Q. You quantitated it?

10 A. Did not quantitate it, but I compared it directly
11 to a fresh tube of EDTA blood and the results for
12 the same amount of blood analyzed gave very
13 similar results.

14 Q. Wait a minute, are you telling us now that you
15 quantitated the level of EDTA in that blood vial,
16 yes or no?

17 A. No, I said we took the same amount of blood from
18 a fresh tube of EDTA blood, compared to the blood
19 sample from Mr. Avery, same amount of blood on
20 the instrument gave the same comparable
21 response --

22 Q. Okay. Let's talk about that.

23 A. That would indicate --

24 Q. Let's talk about that.

25 A. I'm sorry, I didn't finish. That would indicate

1 to me that there was no significant degradation
2 of EDTA in that tube.

3 Q. Are you testifying then that your mass spec test
4 quantitates the level of EDTA?

5 A. It's certainly capable of doing that, yes.

6 Q. Did you do that here?

7 A. No.

8 Q. All right. Now, if what you found when you do
9 this test is that -- we'll get to that in a
10 minute -- but whatever your mass spec printout
11 graphs show, were some peaks that would be
12 consistent with EDTA, right? In the blood vial?

13 A. Which blood vial?

14 Q. The blood vial.

15 A. The blood vial from Mr. Avery?

16 Q. Yes.

17 A. It had peaks in it that were identified,
18 unequivocally, as being EDTA.

19 Q. And -- But those peaks don't tell you whether
20 there is 1500 milligrams per liter or
21 13 million grams per liter, do they?

22 A. Oh, they do. They give you an idea of how much
23 is there. And we do that.

24 Q. So what's the idea, sir, where is it in your
25 reports that you have any conclusion drawn about

1 what the quantity of EDTA is in that 11 year old
2 blood vial, show me, you have got it right in
3 front of you?

4 A. In my report?

5 Q. Show me where, anywhere in your reports, your
6 stack of 6 inch lab sheets; show me where you
7 express an opinion that there is a particular
8 quantity of EDTA in the blood vial?

9 A. No, I did not do a quantitative analysis, but the
10 response on the instrument does allow an
11 experienced chemist to assess if there is a --
12 you know, you can tell, from the response, if you
13 have 50 percent of what you are comparing to and
14 you can tell if you have 10 percent.

15 Q. Oh, yes.

16 A. Because the instrument gives a certain peak size.

17 Q. Show me.

18 A. That -- it's not --

19 Q. Show the Judge.

20 A. -- in the report, it's in the data.

21 Q. Show the Judge in the data.

22 A. Okay. It will take me one minute.

23 Q. And while you are doing that, show the Judge in
24 your report where you say anything about the
25 quantity of the EDTA that you found in that 11

1 year old blood vial.

2 THE WITNESS: Can I approach?

3 ATTORNEY BUTING: Can I see them, please?

4 Q. Okay. What you are pulling out are all positive
5 -- are all controls, positive controls that you
6 did, right?

7 A. That's correct.

8 Q. Show me a test that you ran, not on a control
9 extract, but on the Q-49, whether it's a spot,
10 two microliters, one microliter, whatever?

11 A. You are holding it in your hand. The Q-49 is
12 positive control B, was the actual tube of blood,
13 from Mr. Avery, that we prepared a second control
14 to, for this very reason, to assess that the EDTA
15 in that tube had not significantly degraded.

16 Q. Well, where is the sample of Q-49, not the
17 positive control that you ran through, where's
18 the actual evidence sample?

19 A. This is it.

20 Q. That's it?

21 A. Yes.

22 Q. You ran no separate Q-49?

23 A. Well, we also did a -- to another detection limit
24 study with specimen Q-49 where we took a one
25 microliter drop and a two microliter drop of that

1 same blood, from the tube from Mr. Avery, and we
2 analyzed that with this protocol as well.

3 Q. Okay.

4 A. But that was a detection limit study --

5 Q. Right.

6 A. -- to verify that our instrument was capable,
7 again, to see that level of EDTA.

8 Q. And that's important, because if your detection
9 level isn't right, it may be there and you are
10 just not seeing it.

11 ATTORNEY GAHN: Your Honor, at this point,
12 could we back up and could you mark the exhibits
13 that Dr. LeBeau pointed out to you and showed you
14 where the EDTA testing was done? And why don't we
15 show those on the ELMO?

16 ATTORNEY BUTING: All right.

17 ATTORNEY GAHN: And just, basically, go
18 through what you just went through before with
19 Dr. LeBeau.

20 THE COURT: Just to clarify a couple of
21 things for the Court, I have, which was attached to
22 the State's motion, a copy of the report of
23 examination. I don't believe I have got the
24 document that's being referred to here. Do I take
25 it, was a copy of the document that's being referred

1 to, previously provided to the defense?

2 ATTORNEY GAHN: Yes.

3 ATTORNEY BUTING: On Friday, to me, without
4 a chemist.

5 THE COURT: Okay. And can a copy of the
6 entire document be marked as an exhibit? Is there a
7 copy of the document available, or is that entire
8 thing the document?

9 ATTORNEY BUTING: That's it.

10 ATTORNEY GAHN: Yes. This is the discovery
11 which was provided by the FBI. And what Mr. Buting
12 is talking to Dr. LeBeau about are a couple of pages
13 from this discovery package.

14 THE COURT: All right. And so you are
15 asking the pages be identified as an exhibit?

16 ATTORNEY GAHN: The ones that he just
17 talked to Mr. -- Dr. LeBeau about on the stand,
18 where Dr. LeBeau was pointing out the levels of
19 EDTA. I think those should be marked and actually
20 shown on the ELMO, so that everyone knows exactly
21 what we're talking about here.

22 THE COURT: I think Mr. Buting, actually,
23 was about to show them on the ELMO.

24 ATTORNEY BUTING: Yeah, I will. I'm going
25 to show -- Maybe we should mark the whole thing.

1 The State can get us another copy, and at the end of
2 this hearing, for any possible appeal record, we
3 will have a whole copy.

4 THE COURT: Any objection from the State?

5 ATTORNEY GAHN: No, your Honor, we can have
6 another copy made.

7 THE COURT: All right. If that's going to
8 occur, then I think as long as we identify what you
9 are looking at by page number or some other fashion,
10 when the entire exhibit is received, we should be
11 able to identify the pages that are being
12 referenced.

13 Q. (By Attorney Buting)~ All right. I'm going to
14 show you this first page which, at the top, I'm
15 going to show this overall page first so you can
16 see. This graph on the right side that you are
17 referring to, where this is a peak, that you are
18 saying is a -- well, actually, this is -- can you
19 see the top?

20 A. No, I can't.

21 Q. All right. The date is February 16 of '07?

22 A. That's correct.

23 Q. The time is 4:00 a.m.?

24 A. That's correct.

25 Q. Somebody is doing this test at 4:00 in the

1 morning?

2 A. No, an instrument, a robot, in the lab, is doing
3 it.

4 Q. Oh, really, so there is nobody there to monitor
5 it at all?

6 A. No, it is set up as an auto sampler. It runs
7 itself once you put together a sequence list, it
8 shoots one sample. When that sample is finished,
9 the next sample is injected and so on and so.

10 Q. And it does that all night long?

11 A. It did in this case, yes.

12 Q. Okay. On a bunch of different -- whatever --
13 whatever samples are being tested, could be more
14 than one case?

15 A. No, just this case. It was the only one tested
16 on this instrument at that time.

17 Q. Okay. It says positive control A, MAL, EDTA
18 extract?

19 A. Yes.

20 Q. Is that you?

21 A. Yes, it is.

22 Q. Your own blood?

23 A. Yes, it is.

24 Q. So you are the lab volunteer who gave his blood?

25 A. Yes, I was.

1 Q. Okay. And then that was put into a tube with
2 EDTA?

3 A. It was, yes, in a purple topped tube.

4 Q. Mixed up?

5 A. Yes.

6 Q. Then extracted and --

7 A. For clarification, five microliters of that blood
8 were put onto a cotton tip applicator. And then
9 it was carried through the procedure that's
10 already in --

11 Q. Okay.

12 A. It's a court exhibit.

13 Q. And when you get these, goes through the --
14 believe me, I'm not an expert, but as I
15 understand it, it goes through this machine and
16 it's bombarded with some kind of electrical
17 charge so that ions are knocked free from the
18 molecule?

19 A. Well, first, it separates the mixture of all the
20 chemicals that are in the blood, into their
21 individual chemicals. And they come out at
22 different times. So it's probably easier if you
23 look at the other side of the graph first. And
24 if there's -- is there a laser pointer I could
25 use, please. Is it possible to put that whole

1 side of that page up at one time?

2 Q. Sure.

3 A. Okay.

4 Q. Is that good enough?

5 A. Yes. Thank you. So, what we're looking at then
6 is this is one peak, two peaks. These are
7 different mass spec experiments that are going
8 on, that are monitoring the time that it takes
9 for that -- from that injection till that EDTA
10 peak comes out and this is the EDTA peak right
11 here. So, again, now, if you don't mind, just
12 zooming in a little bit.

13 Q. That's your blood in that graph, the top one?

14 A. Yes, it is.

15 Q. All right.

16 A. Okay. So it took .89 minutes, roughly, .9
17 minutes, for the EDTA to be injected and then
18 come out of the LC to the mass spectrometer.
19 That's what that's indicating. So that is an
20 EDTA peak there and on the right side of the
21 graph is the chemical fingerprint I told you
22 about earlier, that the mass spec gives us.

23 Q. That's this one, 160 is at the top?

24 A. Yes.

25 Q. These are the ions you are looking for, three

1 ions, right?

2 A. That's right. Plus the -- the parent ion, 243,
3 that's -- 293, I'm sorry, that's the weight of
4 EDTA. And then these, 247, the 163, and the 132,
5 those are -- I'm sorry the 160 and the 132 are
6 the fragments of EDTA. And a real simple way to
7 think of this is if you took a sheet of glass and
8 we could hit it with a hammer and every time hit
9 it exactly in the same place, at the same amount
10 of energy, that sheet of glass is going to
11 fracture the same way.

12 And if we could catalog those fragments
13 into a data base, and catalog it based on a
14 different type of glass, we could say, okay, this
15 is that type of glass, based on that
16 fragmentation pattern. That's what a mass
17 spec -- a mass spec does with a chemical. It
18 fragments into a consistent fragmentation pattern
19 that serves as a fingerprint. This is the
20 fingerprint for EDTA that you see up there.

21 If you zoom out a little bit, you can
22 get the whole picture. And what's important is
23 that not just that you have those four fragments
24 there, but look at the relative ratio of those
25 fragments. The most abundant is the 160 at the

1 very top, that's what's called the base peak.

2 Q. Right.

3 A. And then we have, in the ballpark of around 15 to
4 20 percent, the 132 and the 247. And below
5 10 percent, we have the 293, which is the --
6 that's what it originated as, the full EDTA,
7 without being fragmented. Okay. So that is for
8 my blood that was put into an EDTA tube, mixed
9 up, five microliters of my blood were put onto a
10 cotton tipped swab and run through the
11 application.

12 Now, if you go back to the top of that
13 particular graph, on the right side here, this is
14 via signal. This is how much of a signal it
15 gave, that's 1.3 times 10 to the 5th. That's the
16 amount, in essence, that the instrument is
17 reading. It's not -- I'm not telling you a
18 quantity; I'm not putting a number on it.

19 But it's giving -- The more that's
20 there, the higher that peak is going to go, the
21 higher that number will go. So, if I had, in
22 essence, twice as much EDTA in that sample, I
23 would have 2.6 times 10 to the 5th, in that
24 category. If I had a 10th of the amount of EDTA
25 in that sample, I would have 1.3 times 10 to the

1 4th.

2 Q. Okay.

3 A. That's how I'm able to give you an approximate

4 amount.

5 Q. Okay.

6 A. Without doing a quantitative analysis.

7 Q. Well, first of all, let me just make clear, you

8 don't express any opinion in your report about

9 the quantity of EDTA in that tube, do you?

10 A. No, I don't.

11 Q. Okay. Now, you say this is -- this is the

12 signature for EDTA, that 160 is way up in the

13 hundred and the 132 and 247 are about sort of

14 even amounts down here at 1500 or something,

15 right?

16 A. That is the mass spectrum that we obtain on our

17 instrument in doing this experiment, which is

18 called positive mode electrospray ionization,

19 LC/MS/MS.

20 Q. I'm going to show you one that is exactly the

21 same time, 2/16/07, 4:02:32?

22 A. Mm-hmm.

23 Q. Positive control, MAL; that's your initials?

24 A. Yes, it is.

25 Q. EDTA extract?

1 A. Yes.

2 Q. Got strong 160?

3 A. Yes.

4 Q. And down here, the 247 is only about half as
5 intense as the 132, right?

6 A. Could you go back to the top, I'm just -- I want
7 to make sure I'm looking at the same one.

8 Q. And, by the way, there's quite a few other little
9 small peaks on the bottom of this one, right?

10 A. Yes.

11 Q. 175, 195; what do those mean?

12 A. Well, those are background ions, I mean, it's not
13 always real clean.

14 Q. Contamination.

15 A. No. No, not contamination at all. The
16 instrument has noise to it and what that means,
17 essentially, is there's always going to be some
18 signal in that instrument that's going to be
19 recorded. So that's -- that's all we're seeing
20 there. And we can -- we can display that by
21 subtracting out the noise. We can display it
22 including the noise. And what you are looking at
23 is the same -- again, I didn't see what the top
24 number was.

25 Q. I will get to that. I will go back. Don't worry

1 I will go back. But I want to go back to this --

2 A. Well, I'm sorry, you asked me about that and I
3 wanted to verify if --

4 Q. I will get to it, sir.

5 A. -- it was the same sample.

6 Q. I'm just asking you now, do you see any noise in
7 this first one we looked at? Do you see any
8 other ions at the bottom of this -- you said the
9 machine always has background noise?

10 A. It does, yes. And as I said, there are different
11 ways to display it, so that you can display it
12 without the noise.

13 Q. Okay.

14 A. And I can tell you that by looking at the top of
15 the sheet, that you don't want to show me, I
16 guess.

17 Q. The top, is that what you want?

18 A. Yes. Okay. You switched to the other one now.

19 Q. This is the one you wanted to see.

20 A. Yes. This is the -- for the -- this is the mass
21 spectrum across that whole peak, from .81 to .95
22 minutes. So that would include --

23 COURT REPORTER: I'm sorry, could you
24 repeat that and slow down just a little. Thank
25 you.

1 THE WITNESS: I'm sorry.

2 A. This is the mass spectrum in this column here, of
3 this whole peak, essentially from this part of
4 the peak where it is just starting, over to that
5 side. So it's taking the average of the signal
6 across that entire peak, which is taking, you
7 know, roughly a 10th of a minute or so to
8 completely come out.

9 Q. And so it gives a slightly different spectrum
10 where -- where the 247 ion is only half as
11 intense as the 132 ion?

12 A. That's exactly right.

13 Q. And that's actually more what it should be, isn't
14 it?

15 A. Well, this is -- Yes, that's more what it should
16 be, you're right. And that's why I used that
17 particular display, that you just had up, to
18 create this chart here. Which is, as I indicated
19 earlier, your Honor, we have, in our protocol, a
20 section entitled decision criteria. And this is
21 a section that is to ensure that we have a
22 consistent interpretation of the data, so that
23 scientist A and scientist B are going to look at
24 this same data and come to the same conclusion.
25 And with that in mind, we have employed criteria

1 that must be met in order to call something
2 positive, based on mass spectral data. And
3 that's what you see here. This is --

4 Q. Well, before we --

5 A. -- applying that.

6 Q. Before we turn to this --

7 A. Yes.

8 Q. So what you are saying is, when you get these --
9 these two different looking spectrums of your own
10 blood, one that has the 132 ion, the same signal
11 response as the 247, you make some objective or
12 -- I'm sorry -- subjective conclusion that the
13 instrument is not completely right, that it's
14 really supposed to be more like the second one I
15 showed you, where there's actually a difference,
16 a ratio between the 132 and the 247?

17 A. Again, you failed to go back and show me the
18 header on that one, which was what I was looking
19 to do.

20 Q. I did show you that.

21 A. No, I'm sorry --

22 Q. Do you want to see it again?

23 A. -- you did not. It's the one that you are saying
24 is clean, you failed to show me the header on
25 that. But --

1 Q. Well, I can take a look at it. I believe we
2 looked at it in the beginning, same date, same
3 time.

4 A. As you will notice, it says right there,
5 retention time is .91, so that's -- instead of it
6 being an average, your Honor, across the whole
7 peak, it is simply looking at what is the mass
8 spectrum right at .91. This is the initial
9 assessment of the data, right here, what you are
10 looking at, the initial assessment where we're
11 going through and we're trying to make an initial
12 assessment as to whether or not there is
13 something potentially there to go back and take a
14 closer look at.

15 And in this case, it's a positive
16 control. It seems obvious that there are ions on
17 there that are characteristic of EDTA. So then
18 we went back and looked at the data and displayed
19 it under the proper conditions that allowed us,
20 then, to assess it for the ion ratios, the
21 requirement that's in our actual SOP.

22 Q. But in this --

23 A. And that's why there's a separate printout.

24 Q. All right. But wait a second, so the other one
25 is an average, that's fine. But in this one, you

1 will agree with me that the signature, the
2 spectrum signature is not exactly like the other
3 one because you are getting an equal strength
4 response from the 132 ion and the 247 ion?

5 A. And that's why we average across the whole peak,
6 because the instrument is in each millisecond,
7 it's do -- it's hitting this chemical and
8 breaking it up. So you are going to get some
9 fluctuation in the signal and we average across
10 the whole peak, because that's -- that's a more
11 characteristic of the signal. It really wouldn't
12 be fair to anyone to base it on just looking at
13 one point in time when the peak is composed of
14 signals across about 15.15 seconds.

15 Q. Sure. So, a few minutes ago when we looked at
16 this and you told the Judge this was the
17 spectrum, this was the signature for EDTA; you
18 want to correct that now?

19 A. No, I don't. I mean, that is the typical mass
20 spectrum that you should expect to find, mainly
21 looking at the fact that the base peak, which is
22 the largest peak, is 160. And you have fragments
23 of 132 and 247, with a small amount of 293
24 present.

25 That's -- That's what we're looking for

1 with that initial assessment, as to make a
2 determination whether or not we should look at it
3 closer for the presence of EDTA.

4 Q. All right. Well, let's look at this other
5 exhibit which is -- says at the top, tandem mass
6 spectrum, positive ESI mode.

7 Okay. This is -- This is a chart now.
8 And on the left it has got positive control A,
9 positive control B at the top. Then it has
10 numbers that show the response.

11 A. That's right.

12 Q. And 160, in this column right here, is about
13 91,000, right?

14 A. Yes.

15 Q. 132 is like much, much less, 13,000. 247 is
16 about half of that?

17 A. Mm-hmm, yes.

18 Q. And that's what it's supposed to be, isn't it?
19 They're not supposed to be even or --

20 A. Well, there -- Again, if you look at the protocol
21 I provided, it does talk about this. There's an
22 acceptance range on those fragments and generally
23 it's within -- it depends on the type of mass
24 spectrometry we're doing. It depends if we are
25 doing this type of mass spec, mass spec. But

1 there are pre-defined acceptance criteria for the
2 mass spectral data, in order to get that
3 consistent interpretation.

4 What you are looking at here is the
5 actual abundance of each of those ions plugged
6 into a spread sheet that we generated in our
7 laboratory to automatically apply the rules that
8 we have in our protocol to the data.

9 Q. All right.

10 A. So that, you know, you don't have to sit there
11 and manually do the calculations every time. You
12 plug it into the thing and it will tell you if
13 the criteria is met in order to call it a pass or
14 a fail. So what you have for --

15 Q. You review that too, right? It's not just --

16 A. Oh, of course.

17 Q. -- pass fail by the computer?

18 A. Of course. Yeah, absolutely. It's reviewed
19 manually as well. But I'm just saying, so that
20 somebody doesn't have to sit down with a
21 calculator and apply the calculations each time.

22 But you can also tell, I mean,
23 15 percent and 14 percent are very close to one
24 another; 8 percent and 10 percent are very close
25 to one another.

1 Q. Sure.

2 A. Where we have one that fails, though, is the next
3 one down, if you would.

4 Q. Yeah, now, let's --

5 A. 41 percent is no where --

6 Q. Wait, wait, wait. Just -- Let's just --

7 THE COURT: Hold it. I want both of you to
8 stop for a second.

9 ATTORNEY BUTING: Okay.

10 THE COURT: This is cross-examination, so
11 don't go into explanations that he doesn't ask for.

12 THE WITNESS: Okay. Yes, your Honor.

13 THE COURT: Your attorneys will have a
14 chance on redirect to follow up, if they wish. And
15 let's each of you try not to talk over the other
16 one.

17 ATTORNEY BUTING: All right.

18 THE COURT: Mr. Buting, if you think he is
19 not being responsive, then let me know and I will
20 rule on it, okay?

21 ATTORNEY BUTING: All right. Thank you,
22 your Honor. I'm sorry.

23 THE COURT: Go ahead.

24 ATTORNEY GAHN: Could we mark this as an
25 exhibit, if possible.

1 ATTORNEY BUTING: Sure. Do you want to
2 mark the whole book as like 442 and then have 442A,
3 B, C, something like that?

4 ATTORNEY GAHN: Well, I'm really interested
5 in --

6 THE COURT: Let's give -- Let's give this
7 exhibit the next sequential number. And when the
8 book comes in, we'll give the book a number.

9 ATTORNEY BUTING: Okay.

10 Q. (By Attorney Buting)~ This is 442, right? This
11 is a sort of chart that summarizes what the
12 results on this particular test were, right? Is
13 that fair?

14 A. Could you say that again.

15 Q. This is a chart that summarizes or prints out
16 what the -- what the results were on this one
17 particular test, or series of tests, whatever it
18 is?

19 A. Yeah, that's a series of tests.

20 Q. Okay. All right. Now, Q-49 is the blood vial of
21 Mr. Avery's blood, right?

22 A. Yes, it is.

23 Q. And, you know, your analyst knew that when he was
24 doing the test, too, right?

25 A. Yes, he did.

1 Q. Okay. This particular one is Q-49, limit of
2 detection one microliter?

3 A. That's correct.

4 Q. And then down below is Q-49, limit of detection
5 two microliters, right?

6 A. That's correct.

7 Q. And what you are doing here when you test down to
8 only one microliter, you find that this is the
9 control and if we notice, these are the same, all
10 the way down. Three times the positive control A
11 is the same, right?

12 A. That's correct.

13 Q. Same number, same strength, same ratio,
14 everything to the decimal point, right?

15 A. Yes.

16 Q. But one microliter, this one is showing no 132
17 and a 247 shows up at like 1800?

18 A. That's correct.

19 Q. So that's considered a fail?

20 A. By that criteria I was describing, yes, that was
21 ruled as a fail. It does not meet the criteria
22 to call it positive.

23 Q. Okay.

24 A. For that one microliter drop, using that
25 particular technique.

1 Q. So in that particular technique, that was what,
2 too small of a sample then?

3 A. Yeah, it's right -- As I explained earlier,
4 that's right at our detection limit, as we found
5 in our validation study.

6 Q. So when you said it was valid to that one
7 microliter, it's not exactly to that one
8 microliter, because here it failed at one
9 microliter, right?

10 A. Well, in this particular sample, yes. And in
11 this particular analysis, yes, that failed.

12 Q. Okay. But, then, when you increased it a little
13 bit to two microliters, we did get a pass because
14 the ratios between the 160, the 132, and 247 are
15 about within tolerance, right?

16 A. That's right.

17 Q. But we know --

18 A. I'm sorry. I'm sorry, to be clear, but I
19 ultimately ruled that negative as well.

20 Q. That's right. That's what I want to show right
21 now, because is that your handwriting and your
22 signature on those?

23 A. Yes, it is. Well, I'm sorry the top two are not
24 my handwriting, that's the reviewer, that
25 reviewed the data before the report went out.

1 Q. Okay. Looks the same to me, but anyway. The
2 handwriting that says, extra fragment ruled ND
3 with a circle on it, that's yours?

4 A. Yes, it is.

5 Q. And despite what this chart says and despite what
6 the machine says, when you looked at the actual
7 graphs, there are too many extra peaks to make a
8 call on that one?

9 A. Yeah, it was -- it wasn't as clean as I would
10 like it to be to feel comfortable making that
11 call.

12 Q. Okay. And this is at two microliters, right?

13 A. That's correct.

14 Q. You want to go back a few pages deeper into your
15 book. There's a sequence that's run at -- run at
16 different times, actually. Here's one that is
17 run at 4:35 in the morning on the 16th of
18 February, right? Would you agree with me? I
19 will move it over so you can see what we're
20 looking at. We're looking at a positive control
21 B which you say is an extract from the tube of
22 blood?

23 A. Could you -- Would you mind zooming out so I can
24 see the whole picture a minute?

25 Q. Sure.

1 A. All right. I'm sorry, but I believe you took
2 that from me, earlier, my copy of that.

3 Q. You're right, I did. We'll use yours and we'll
4 mark this.

5 (Exhibit 433 marked for identification.)

6 Q. (By Attorney Buting)~ Now, we just saw your -- In
7 that early example, we saw the signature for EDTA
8 and the ratios. And this one is, again, it's
9 very close in time, it's 4:35 in the morning on
10 February 16th?

11 A. That's correct.

12 Q. It has the 160 peak there, which is always set up
13 -- you set that up at a hundred, right?

14 A. The instrument normalizes itself, so the most
15 abundant peak is set to a hundred and everything
16 has been put relative to that.

17 Q. Okay. Sure. So this -- If it detects 160, it's
18 always going to be up there at a hundred because
19 it's adjusting it accordingly.

20 A. Not exactly, it has -- 160 has to -- has to be
21 the most abundant --

22 Q. Oh, okay.

23 A. -- for it to be set at 100.

24 Q. Okay. Now, as we look down at this, bottom of
25 this graph, this is Mr. Avery's blood, you can

1 see that the 132 ion is coming in at about half
2 of what the 247 ion is?

3 A. That's correct.

4 Q. This is a retention time of .92 minutes; is that
5 what that means RT 0.92?

6 A. Yes.

7 Q. So, similar to what it was with yours when it was
8 .91?

9 A. Yes, it's just one single look at that peak
10 instead of the whole --

11 Q. Right.

12 A. -- peak.

13 Q. And yet in this one you have the exact opposite
14 of what you would -- should get for a signature
15 ratio -- for a ratio of 132 to 247, you have the
16 exact opposite of what you would expect to get in
17 your signature for EDT?

18 A. Well, I wouldn't assess this for the ratios and I
19 did not assess this for the ratios. I would
20 average across that whole peak, as I did with the
21 positive control A, average across the whole peak
22 in order to make that determination.

23 Q. Okay. Tell me what the difference is between the
24 positive DSI mode and the negative DSI mode?

25 A. Well, it's simply flipping the electronics

1 around. In one mode you are looking at fragments
2 that have a positive charge and in the other mode
3 you are looking at fragments that have a negative
4 charge to them.

5 Q. All right. So, not that we have had enough of a
6 lesson to understand how these machines work, but
7 certainly they do require some interpretation in
8 order to make a call or not make a call, right?

9 A. Yes, it does.

10 Q. EDTA is biodegradable?

11 A. Not readily, no.

12 Q. But it is eventually, right; it is broken down?

13 A. Not significantly, no.

14 Q. Well, you said you apparently are aware of
15 studies about how it is the most ubiquitous
16 chemical in the environment now, right? Manmade
17 chemical?

18 A. That's right.

19 Q. And there are many studies about how to deal with
20 it in waste water treatment, for instance, right?
21 In the environment?

22 A. That's correct.

23 Q. And they come up with methods to try and break it
24 down to biodegrade it, right?

25 A. Harsh methods, yes.

1 Q. Okay. Well, it, for instance, has been found to
2 breakdown more quickly if the PH is raised?

3 A. Yes, that is correct.

4 Q. So a more base or more al -- I always says
5 alkaline PH level will make the EDTA degrade
6 faster than a neutral?

7 A. That's correct.

8 Q. Okay. Now, you talked briefly about some kind of
9 study that you did on the stability of EDTA,
10 based upon pulling out some random blood card
11 that you still had from 33 months ago; is that
12 it?

13 A. Well, I didn't have them personally, our DNA Unit
14 had a number of spot cards where they had put
15 EDTA blood onto these cards and they were stored
16 at room temperature from May of 2004.

17 Q. Okay. So you do recognize, then, that the whole
18 question of whether ED -- just how stable EDTA is
19 and whether it breaks down over time could affect
20 your ultimate opinion in this case?

21 A. If EDTA was known to break down, or if our
22 studies found EDTA to break down, then that would
23 absolutely have an affect on my opinion.

24 Q. Okay. What study have you seen that's ever
25 tested an 11 year old vial of blood to see how

1 EDTA breaks down or doesn't break down?

2 A. I think the only study is the study that -- that
3 we did for this case with --

4 Q. Oh, really?

5 A. -- the actual blood itself.

6 Q. Okay. And your report, by the way, is in front
7 of you -- what is that, 435 -- Exhibit 435, is
8 that still in front of you?

9 A. Yes, it is, 435.

10 Q. What is the date of that report?

11 A. February 26th.

12 (Exhibit No. 444 marked for identification.)

13 Q. I'm showing you Exhibit 444, which is two pages
14 of a section of discovery that you gave me.

15 A. Yes.

16 Q. Can you identify that?

17 A. Yes, this is an EDTA stability study that we
18 conducted very late last week.

19 Q. And it's -- put it up on the ELMO, so the Court
20 can see it. This consists of two pages, one of
21 which is one type written paragraph, right?

22 A. Yeah, that's my brief summary --

23 Q. Okay.

24 A. -- of the results.

25 Q. And the second page is a few handwritten notes

1 from whoever did that study. Who did that?

2 A. Dr. Jason Brewer.

3 Q. Same guy?

4 A. Yes.

5 Q. The date of that study?

6 A. 2/28/07.

7 Q. So you did these so-called stability study two
8 days after you actually filed your report?

9 A. Yes.

10 Q. So, if you had done this study and found out,
11 oops, this EDTA isn't as stable as we thought it
12 was, you may have to retract your report, or
13 amend it, right?

14 A. Well, again -- Well, yes.

15 Q. And this is the sum -- This first page of this
16 Exhibit 444, this one paragraph, is basically
17 your study. That's all that's written that
18 explains what your study is, right? Your EDTA
19 stability study, is this one paragraph?

20 A. No, it's that page and the other page you showed
21 with Dr. Brewer's notes.

22 Q. Handwritten notes?

23 A. Yes.

24 Q. You are not going to publish this study, I
25 assume, are you?

1 A. I -- I never even considered it. I don't know.

2 Q. Well, let's talk about it for a minute. What you
3 did is you pulled out 10 spot cards that were 33
4 months old, stored in room temperature, right?

5 A. Yes.

6 Q. And 4 of those 10 did not show the EDTA free acid
7 form at all, right?

8 A. No, that's not correct.

9 Q. Do I have it backwards? I'm sorry. Four of the
10 spot cards did not show the EDTA iron complex,
11 right?

12 A. That's correct, 4 of the 10 showed an indication
13 of it, but it didn't meet our criteria for
14 calling it.

15 Q. So you couldn't call it?

16 A. That's correct.

17 Q. So, in just 33 months, at room temperature, some
18 controlled environment you have, we see some
19 degradation going on with the EDTA, because four
20 of them you are not able to see the iron at all,
21 are you?

22 A. Well, I disagree with your statement there, that
23 you see --

24 Q. You don't know what --

25 A. -- degraded --

1 Q. You disagree with the degradation part.

2 A. I disagree with the degradation of EDTA. What
3 you can see here is either the EDTA iron is
4 becoming unbound, potentially.

5 Q. That's called --

6 A. -- the EDTA --

7 Q. -- degrading, right?

8 A. Well, it's dissociating is what it's called, not
9 degrading. It's called dissociation, back to the
10 free acid form. So that's one potential
11 explanation, because you can clearly see the EDTA
12 in every one of those spot cards, the free acid
13 form. So either that is taking place and that
14 could be environmentally occurring, or it has
15 decreased to a level that we're not able to
16 detect.

17 Q. Okay.

18 A. We can't tell, though, looking at that result,
19 which of those two scenarios are the actual
20 answer.

21 Q. All right. So one scenario is that it has
22 decreased to the level you can't detect, right?

23 A. That's true, yeah.

24 Q. And your study, if you want to call it that,
25 doesn't discriminate for one or the other, right?

1 A. For the EDTA iron complex, yes.

2 Q. And so, all you know is, that when you tested
3 these 33 month old spot cards that -- that 4 of
4 these 10 that you tested you were not able to
5 read or get a reaction, detectable level of the
6 iron, EDTA iron?

7 A. The iron complex, yes.

8 Q. Okay. Did you test for a calcium complex in any
9 of these?

10 A. No, as I indicated earlier, the amount of calcium
11 typically in blood is 10 to 30 times lower than
12 the amount of iron. So it made more sense to
13 focus on the iron complex.

14 Q. Okay. Now, your study is of 33 month old blood
15 on spot cards, right?

16 A. That's right.

17 Q. And the spot cards are paper?

18 A. Yes, they are.

19 Q. And they are -- they are supposed to be a stable
20 substrate so to speak?

21 A. They are exposed to the environment, to air, so.

22 Q. But there's not supposed to be anything on the
23 paper that would cause degradation, for instance,
24 or anything like that?

25 A. That's exactly right. They are sterile matrix

1 that the blood is placed onto.

2 Q. And presumably some sort of stable PH.

3 A. Yeah, the PH would really come from the
4 environment --

5 Q. Okay.

6 A. -- that it's exposed to.

7 Q. Okay. But you don't know how the blood vial, in
8 Mr. Avery's case, was stored, right? For 11
9 years?

10 A. No, I don't. I don't know if it was stored --
11 I'm going to make an assumption it was stored
12 with the cap on, otherwise it would have leaked
13 out. But other than that, I don't know if it was
14 stored refrigerated or at room temperature.

15 Q. By the way when you -- you can tell that the cap
16 had been removed at some point, right?

17 A. Yes.

18 Q. That was obvious, from your examination you could
19 tell someone took that cap off?

20 A. That's exactly right, yes.

21 Q. And if there was less than what you would expect,
22 amount of blood in the vial, 10 milliliter vial
23 and it had only five and a half?

24 A. I wouldn't -- Well, that's a two part question.
25 Yes, I did, certainly recognize that the cap had

1 been taken off. You can tell that it had been
2 taken off. Was it less than I thought should be
3 there; is that your question?

4 Q. Well, I guess you wouldn't necessarily -- or
5 would you know, I mean, is it normally filled
6 when you see a ...

7 A. No.

8 Q. Okay.

9 A. Typically --

10 Q. Normally more than half filled?

11 A. Typically, when they fill a blood tube, it is
12 filled about two-thirds of the way to
13 three-fourths of the way up.

14 Q. So you don't know whether there was blood taken
15 out because you don't know what the original
16 volume was?

17 A. Exactly, I don't.

18 Q. But you do know the cap was removed?

19 A. Yes, I could tell.

20 Q. So it was no longer in a vacuum state inside the
21 tube?

22 A. That's correct.

23 Q. And some sort of air and bacteria had been
24 exposed to it by taking the top off and bringing
25 it back on?

1 A. Sure, some limited air that would just basically
2 replace --

3 Q. Right.

4 A. -- the area that was left in that tube.

5 Q. But you don't know anything about what conditions
6 of heat it was stored in for 11 years, do you?

7 A. No, I don't.

8 Q. Or cold?

9 A. No, I don't.

10 Q. Or PH in the environment that it was stored,
11 right? You would be guessing, but you don't
12 know?

13 A. Well, the PH is going to be of the blood itself,
14 so. It's not stored in an environment of PH.
15 That was implied that it's being put into
16 something else that has a PH.

17 Q. And the same thing as far as the storage of the
18 swabs -- Let me make one thing clear here, the
19 swabs that you tested were the swabs, as far as
20 you know, that were taken on November -- in
21 November of 2005, from the vehicle, right?

22 A. Those were some of the swabs we tested, yes.

23 Q. Three?

24 A. There were three swabs, yes.

25 Q. We'll get to controls later. If someone had used

1 that blood vial to plant blood in the RAV4, then
2 those swabs, as of November of 2005, were about
3 nine years old?

4 A. I'm sorry, I was confused on what you just asked.

5 Q. I'm sorry. If the -- If someone used that blood
6 vial, which was drawn in January of 1996, to
7 plant blood in the RAV4, okay, then the swabs
8 that were made from that blood would contain
9 blood that was about nine years old?

10 A. Yes, that's correct.

11 Q. Okay. That had been stored under conditions that
12 you don't know, for that nine years, right?

13 A. That's correct.

14 Q. And then those swabs were taken and sent to
15 various places. And, again, you don't know how
16 they were stored from November of 2005 until you
17 received them in February of this year?

18 A. That's correct.

19 Q. Before you tested the vial Q-49, did you shake it
20 up, mix it up?

21 A. Yes, I did.

22 Q. You don't know, whether or not, for nine years,
23 that blood sitting the way it was, you don't know
24 how that EDTA was reacting within the liquid, do
25 you? Bad question, let me phrase it this way.

1 You don't know whether, over a nine year period,
2 the EDTA would remain homogenous, homogeneously
3 distributed within that vial of blood, do you?

4 A. Well, yes, I -- within a reasonable degree of
5 scientific certainty I would expect that it would
6 be equally homogenous throughout, because it --

7 Q. Then why did you shake it up, sir?

8 A. Just standard practice, I always do. Always
9 shake a tube of blood when I get it.

10 Q. And that way you know it's going to be mixed
11 evenly, right?

12 A. Correct.

13 Q. You don't know whether that blood vial that sat
14 for nine years, up until November 5th, you don't
15 know whether the EDTA was homogeneously mixed in
16 that liquid, at that time, do you?

17 A. If I could clarify my answer. I think I do. And
18 the reason I say that is, because any time
19 something goes into solution, which blood is
20 essentially water, and these are things that are
21 dissolving into the blood, just like if you put
22 instant coffee into hot water, you're going to
23 stir it up, it's going to dissolve into the hot
24 water. If you let it sit, the coffee doesn't
25 start to recrystallize and sink to the bottom and

1 you have clear water and coffee. It's going to
2 stay in solution and be distributed throughout
3 that tube of blood.

4 Q. But, sir, have you done -- this is your
5 assumption, right?

6 A. Well, it's -- it's based on my education.

7 Q. Have you done any tests or are you aware of any
8 studies that would describe how EDTA would act
9 after nine years of just sitting in a tube?

10 A. No, I have not personally done anything like
11 that.

12 Q. And have you noticed that when blood sits for a
13 long while, there's some sediment, it sort of
14 will separate, slightly, into the plasma, or
15 the -- the red blood cells are heavier and tend
16 to fall to the bottom?

17 A. Especially in a tube that doesn't have a
18 preservative in it, that's true.

19 Q. Okay. Would the EDTA iron chelates, I think you
20 called them, right?

21 A. Yes.

22 Q. Would they have a higher or greater specific
23 gravity, such that they may -- than the rest of
24 the blood, such that they may sink to the bottom?

25 A. No, because, again, these are still water soluble

1 entities.

2 Q. Sure. But they have --

3 A. So --

4 Q. -- they have bound, the iron ones have combined
5 with the iron molecule, right?

6 A. It has bound to the iron molecule, yes.

7 Q. And so wouldn't you agree with me that specific
8 gravity of that isotope or chelate would be
9 different than let's say the free EDTA that's not
10 bound with anything.

11 A. No.

12 Q. Okay. In any event, you don't know, if some
13 police officer was intending to use that nine
14 year old vial to plant blood, you don't know
15 whether that officer would have shaken it up or
16 not, before doing that?

17 A. No, I don't.

18 Q. And you don't know whether the portion that's
19 poured out might have a lower concentration of
20 EDTA than it would if it had been all mixed up,
21 do you?

22 A. I don't believe that that's a realistic scenario.

23 Q. But you haven't tested it?

24 A. No, I have not.

25 Q. And when this blood vial came in, you didn't do

1 that kind of a test before mixing it up?

2 A. Well, it would have been mixed just getting to
3 our laboratory. Any time its shipped or moved
4 from location --

5 Q. Sure.

6 A. -- A to B, it's mixing. So that would be
7 irrelevant, if I tested it in my laboratory,
8 wouldn't answer your question.

9 Q. Okay. You do know, from the **Cooper** case, I
10 believe, at least, that EDTA on fabrics may
11 migrate and distribute in a different
12 non-homogenous manner, right?

13 A. I read that was the opinion of one of the experts
14 in the **Cooper** case. I don't know that I share
15 that opinion.

16 Q. Well, didn't you say that that was, in fact, one
17 of your concerns was that a drop of blood on
18 fabric might expand and migrate in ways such that
19 the EDTA levels might be different?

20 A. No, that wasn't what I testified to.

21 Q. And you tested on the -- from the swabs that were
22 taken from the RAV4, they were not spot cards,
23 right?

24 A. No, they weren't.

25 Q. They were cotton, absorptive cotton, right?

1 A. They were cotton applicators, like Q-tip type?

2 Q. Okay. And a portion of it was cut off?

3 A. Yes.

4 Q. You don't know whether or not the EDTA that might
5 have been in that bloodstain, once absorbed by
6 the cotton, might have migrated in different
7 concentration levels, do you?

8 A. Sorry, I need you to repeat that.

9 Q. You don't know whether once that stain was
10 swabbed with cotton and gets absorbed into the
11 cotton, you don't know whether the EDTA, if there
12 was any in the blood, might have migrated
13 differently as it's absorbed into the cotton,
14 stronger in one place, weaker in another?

15 A. That would go against most principles in
16 chemistry, for that to happen.

17 Q. Let me go back to the peaks for just a moment.
18 You mentioned this -- one of the spikes was a 293
19 ion; do you recall that? I think you called it a
20 parent, the parent?

21 A. It's the parent ion in mass spectrometry, when
22 you are running it in positive electrospray
23 ionization mode.

24 Q. And how many other organic chemicals in the world
25 also share that parentage?

1 A. Have a molecular weight of 292?

2 Q. I think it was 293.

3 A. Well, the molecular weight is 292. It adds a --

4 (Court reporter couldn't hear.)

5 A. It adds a proton, p-r-o-t-o-n, onto it, to

6 increase the weight by one. I don't know how

7 many other chemicals in the world have a

8 molecular weight of 292.

9 Q. Do you know how many other organic chemicals in

10 the world have a parent peak of 293, a base peak

11 of 160, and also peaks of 132 and 247?

12 A. Just looking at the mass spectrum, I would think

13 that there is probably no other peak -- no other

14 compound in the world that gives that same mass

15 spectro profile.

16 Q. And have you compared it to any library of other

17 organic compound spectrum that you have in your

18 lab?

19 A. Yes, that spectrum is very characteristic of what

20 you would find in a library for EDTA. It's very

21 characteristic for what you find in publication,

22 your Honor, that's previously presented for EDTA.

23 Q. How many other organic chemical compounds would

24 have spectrums that would be close to that?

25 A. I don't know, there's over 12 million chemicals.

1 And there's no way that we can evaluate every
2 single one.

3 Q. Well, what is the machine's or instrument's
4 tolerance for being able to detect, let's say, a
5 292 from a 293?

6 A. It's set up so that it can -- it's within one
7 mass unit. Essentially it can differentiate 293
8 from 292. It can differentiate 293.5 from 293.4.

9 Q. Okay. By the way, did you ever do any, or did
10 Mr. Brewer ever do any presumptive test on these
11 swabs, to be sure what he was testing was the
12 swabs from the RAV4? Did he ever do any
13 presumptive test to be sure he's testing blood?

14 A. No, we're not qualified to test for blood, for
15 the presence of blood in the Chemistry Unit,
16 that's done in our DNA Serology Unit.

17 Q. Okay. You know what I mean when I say substrate?

18 A. Yes.

19 Q. That's sort of like a surface, that a swab, in
20 this instance, would be taken from.

21 A. Yes.

22 Q. And you don't know how the EDTA might be reacting
23 to different substrates within that vehicle, do
24 you?

25 A. Not really, no.

1 Q. And there are different ones, one is a dashboard,
2 around the ignition, right?

3 A. Yes.

4 Q. That's what you have been told?

5 A. Yeah.

6 Q. You haven't actually seen the vehicle?

7 A. I have not seen the vehicle, I have seen
8 pictures.

9 Q. Okay. Another is like a -- some sort of a vinyl
10 CD wallet, case?

11 A. Yes.

12 Q. And another is a metal surface?

13 A. Yes.

14 Q. And you don't know how the EDTA may bind with any
15 of those chemicals that are on those various
16 surfaces?

17 A. Well, the metal surface wasn't bare metal, it was
18 painted metal, so it's not metal like what we
19 have been talking about. Other than that, I
20 wouldn't expect there to be a significant amount
21 of binding.

22 Q. But you don't know, for instance, even though
23 it's paint, there may also be some sort of wax on
24 top of it?

25 A. That's right.

1 Q. Or other, you know, chemical cleaners that maybe
2 leave a residue?

3 A. That's right.

4 Q. Such as Armor All, for instance?

5 A. Perhaps.

6 Q. Okay. Some of those substances like, for
7 instance, Armor All has EDTA, right?

8 A. I don't know that to be true.

9 Q. Does paint?

10 A. No, it doesn't.

11 Q. So you did not, for instance -- Let me go back
12 for a second. You weren't present when the
13 November 2005 swabs were obtained, right?

14 A. No, I wasn't.

15 Q. So you don't know how the lab technician swabbed
16 those particular stains?

17 A. No, I wasn't present.

18 Q. Neither were you present when the controls were
19 taken in February of 2007?

20 A. No, I wasn't.

21 Q. And you don't know, for instance, how close to
22 the stain itself the controls were taken, whether
23 they were half inch, 4 inches, what, you don't
24 know?

25 A. No, I don't.

1 Q. And by the way, each of those three stains had
2 two controlled swabs sent to you, right?

3 A. Yes, they did.

4 Q. But you only tested one?

5 A. That's right.

6 Q. And you didn't ask the person who was going to
7 send you the swabs to do an experiment where they
8 actually poured some of the blood vial onto those
9 same types of surfaces, that is, on the metal, on
10 the CD case, and on the dashboard, and then
11 swabbed those stains for testing, did you?

12 A. No, I would never recommend anything like that.

13 Q. So, if you had done that, for instance, then you
14 would be able to say, hey, here's what this stain
15 should look like, if it had come from the blood
16 vial, right?

17 A. I don't know if you can jump to that conclusion,
18 quite honestly. Pouring it on and then saying,
19 well, this is what it should look like if it came
20 from that blood vial. It's making a lot of
21 additional assumptions here, I don't think --

22 Q. Such as what?

23 A. -- that I would jump to the conclusion.

24 Q. Such as time delay?

25 A. That it was poured on as opposed to droppers

1 being used to deliver it versus splattering it.
2 That's probably the primary thing.

3 Q. Why would that make a difference, if it's blood
4 and it's supposedly got EDTA in it, why would it
5 matter how it was put on the surface?

6 A. It was simply your question you asked. I didn't
7 agree with the final conclusion, based on the
8 question you asked.

9 Q. Well, let me try rephrasing it, probably wasn't
10 that clear. If you wanted to be able to say that
11 there's no way that those stains in the RAV4
12 could have come from the 11 year old blood vial,
13 you could have had someone create, with a
14 dropper, or whatever, pipette, you could have had
15 someone create stains deliberately with the blood
16 vial, swabbed those and tested them and then
17 compared them to the swabs that were taken in
18 November of 2005, right?

19 ATTORNEY GAHN: Objection, your Honor. I
20 believe we're really beyond the scope of an
21 admissibility hearing now.

22 THE COURT: I'm going to sustain the
23 objection.

24 Q. (By Attorney Buting)~ You mentioned the auto
25 sampler running in the middle of the night, it

1 actually takes, if I understand your protocol,
2 what the -- what the person does is take these
3 samples, cotton swabs or whatever, put them in
4 some sort of little test tube and then add 200
5 microliters of a solution; is that right?

6 A. Yes, it is.

7 Q. And then that 200 microliters is allowed to sit
8 and react for a period of time, right?

9 A. Yes.

10 Q. And then the whole tubes are centrifuged and the
11 liquid is separated?

12 A. It's filtered, essentially.

13 Q. Okay. And the idea being, it's the liquid that
14 you want because at that point you hope that it
15 would have dissolved any EDTA that might be in
16 solids.

17 A. But not just hope, our validation demonstrated
18 that it does --

19 (Court reporter asked him to repeat.)

20 A. Our validation study demonstrated that it does
21 dissolve any EDTA in the solid material.

22 Q. Okay. And then, so there's approximately 200
23 microliters of liquid in these vials?

24 A. That's correct.

25 Q. And the instrument only uses five microliters?

1 A. That's right.

2 Q. So there's another 195 microliters of liquid
3 there that presumably would have the same result
4 as the five that were taken out, right?

5 A. Approximately.

6 Q. Do you save that liquid to be retested?

7 A. No, we don't.

8 Q. You destroy it?

9 A. Yes, we do.

10 Q. So the defense has no opportunity to retest that
11 solution that you have created, to determine if
12 we would get the same results as you do, right?

13 A. No, instead we left half of the sample that we
14 were provided with. We used half for our
15 analysis and left half for defense retesting
16 using your own protocol, not ours.

17 Q. Sure.

18 A. And your own controls, etcetera, to do their
19 test.

20 Q. But if we wanted to test your protocol and your
21 method, and not just the protocol, but the
22 accuracy of the technician, Mr. Brewer, who is
23 doing this test, that liquid would tell us
24 exactly what it should. If we tested it, it
25 should match what you did, if it was available,

1 right?

2 A. Again, it's -- to me it's a complex question.
3 There's not a yes or no answer. If you wanted to
4 test the work that was done by Dr. Brewer, you
5 can look at the data that's in the packet and the
6 controls. The controls let us evaluate whether
7 or not the batch run operated as it was supposed
8 to. It let's us assess whether or not the
9 individual sample operated as it was supposed to.

10 Now, if you want to test our method,
11 then it's a far superior idea to take the method
12 and put it into the hands of another scientist
13 and let them run the samples, following the whole
14 protocol, as opposed to them taking our final
15 extract and putting it on their instruments.

16 Q. But you don't keep the final extract?

17 A. No, we don't. We never do in chemistry.

18 Q. So -- All right. What is your error rate in this
19 protocol?

20 A. The error rate, I would say, is zero.

21 Q. Have you done a study?

22 A. Well, yes.

23 Q. Do you know what I mean by error rates?

24 A. I absolutely do.

25 Q. Okay.

1 A. I teach on this topic. The error rate is
2 something that you generally talk about when
3 you're talking about your ability to distinguish
4 a false positive from a false negative. And
5 that's usually talking about a single analytical
6 technique. So if you were going to just look at
7 the HPLC method, you might be able to assess an
8 error rate, if you're just looking at the time it
9 takes for the compound to come out of the end of
10 that column.

11 Now, when you are running multiple
12 techniques, it's what we call self-correcting.
13 Self-correcting because, as I indicated earlier,
14 you do not rely on a single analysis to make the
15 call. You have to take all the pieces of the
16 data that you have and make sure that it all
17 supports the final answer. And if it doesn't,
18 then, you know, you really shouldn't make that
19 call.

20 Q. Well, then are you saying that this kind of test
21 you can never attribute an error rate?

22 A. There's no numerical error rate that you can
23 apply to something like that, when it's this
24 complex of multiple experiments being done and
25 you are taking all of that data and applying it

1 to a final answer.

2 Q. So there may be some error rate, but we just
3 don't know what it is, can't be quantitated, is
4 that what you are saying?

5 A. No. Maybe you could -- One way that people
6 assess error rates are looking at the results of
7 proficiency tests. And as I indicated earlier,
8 we did give ourselves a test, a blind test. And
9 we had 10 samples.

10 Q. Ten samples.

11 A. Ten samples, that had either EDTA blood on them
12 or did not, and we correctly identified them
13 100 percent of the time. So I -- I would --
14 that's -- if you want to put a number on it, I
15 would say we have zero percent error.

16 Q. All right. And you teach on this, so tell me,
17 when you -- when you devise a method of trying to
18 validate a test and trying to figure out what the
19 false positive or false negative rate is; is 10
20 samples considered sufficient?

21 A. For that technique of determining the error rate,
22 yes, it is.

23 Q. When you are validating tests that can give you a
24 known error rate, is 10 samples enough?

25 A. Generally, when we're talking about error rates,

1 we're talking about, again, techniques that are
2 not as specific as mass spectrometry. We're
3 talking about non-specific techniques that just
4 give you a simple positive negative result,
5 without a lot of data for the analyst to look at.

6 So that is a technique -- that is a
7 value, a numerical value that let's another
8 scientist know, how good is that particular
9 method, if I stand on those results alone, and it
10 doesn't have some expert looking over those
11 data -- data points in order to make that call.

12 Now, you are taking that and putting it
13 into a completely different realm with LC/MS/MS
14 techniques, and especially when you are talking
15 about multiple techniques being used to get that
16 final answer.

17 Q. So if I understand your answer, then, is that
18 this LC/MS/MS technique just -- you can't
19 attribute an error rate to it?

20 A. I think you can by applying proficiency samples.
21 That's probably the best way to --

22 Q. All right.

23 A. -- assess an error rate and that's what we have
24 done in the past when we're asked to determine an
25 error rate on a complex method.

1 Q. Okay. You said that EDTA --

2 THE COURT: Mr. Buting, can I ask about how
3 much longer you think you have?

4 ATTORNEY BUTING: It's a while, half hour
5 at least.

6 THE COURT: We'll take a break at this
7 time, then, and resume at quarter to three.

8 ATTORNEY BUTING: Okay.

9 (Recess taken.)

10 THE COURT: Mr. Buting, you may resume.

11 ATTORNEY BUTING: Thank you, Judge.

12 **CROSS-EXAMINATION CONTD.**

13 BY ATTORNEY BUTING:

14 Q. All right. You told us that EDTA is very
15 commonly found, right, in the environment?

16 A. Yes, it is.

17 Q. It's used in a lot of different, like household
18 products, for instance?

19 A. Yes, it is.

20 Q. Detergents?

21 A. Yes.

22 Q. Some things like make-up, shampoo?

23 A. Yes.

24 Q. Some auto care products?

25 A. Yes, I'm sure there are some.

1 Q. I'm going to show you Exhibit -- First of all,
2 are you familiar with the National Institute of
3 Health?

4 A. Yes, I am.

5 Q. National Library of Medicine?

6 A. Yes, I am.

7 Q. Okay. I'm going to show you Exhibit 445, which
8 is something just in the public domain as sort of
9 a list of products that contain EDTA; would you
10 just take a look at it for a moment.

11 A. Yes.

12 Q. I mean, you don't need to memorize it or
13 anything, but would that be considered a
14 reliable -- reasonably reliable data base of
15 products, general everyday care products that
16 have EDTA as part of it's composition?

17 A. Yes, it would be.

18 Q. And so, just so it's clear for the record, that's
19 like a seven page document with a single page
20 list of products, even by brand name, like Zest,
21 and Suave and those sorts of things, right?

22 A. That's correct.

23 Q. Now, do I understand that the FBI has not
24 actually tested any of these products themselves
25 to see whether they have EDTA or what levels they

1 may be?

2 A. That's correct, we have not.

3 Q. Okay. Yet, when you tested the controls, which
4 in your report are identified as K -- what are
5 they, K-3, 4 -- 2, 3, 4 or something?

6 A. Yes, K-2 through 4.

7 Q. Okay. You found no EDTA in those controls,
8 right?

9 A. That's correct.

10 Q. Now, given the ubiquitous nature of EDTA in the
11 environment, was that sort of an unexpected
12 result?

13 A. No.

14 Q. I'm going to go back to, just a minute, to this
15 process where you -- you cut off a piece of the
16 swab, Q-tip, and put it into this little vial,
17 okay?

18 A. Yes.

19 Q. You do that with all of the control swabs too,
20 right?

21 A. That's correct.

22 Q. And then you put this 200 microliter solution in
23 it?

24 A. That's correct.

25 Q. If you had done that and then evaporated that

1 solution down from 200 microliters to say 20
2 microliters, would the concentration of EDTA be
3 greater --

4 A. The relative --

5 Q. -- if there was any in it?

6 A. The relative concentration would have been
7 greater, yes.

8 Q. Okay. And so if you wanted to test these
9 controls, let's just talk about the controls for
10 a minute, and evaporated that down from
11 200 milliliters to 20 and then sent it through
12 the auto sampler that takes five microliters of
13 that, if there were EDTA in that background swab,
14 you would be more likely to actually detect it
15 with these tests, right?

16 A. Not necessarily. If I can explain.

17 Q. Okay.

18 A. This particular instrument has been demonstrated
19 to actually do the opposite of what you would
20 expect. Generally, if we were talking about an
21 instrument, if you concentrate the sample and
22 shoot that sample into the instrument, you are
23 going to get a better response.

24 This particular instrument, our
25 experience, and others that use it, have found

1 that, actually, if you concentrate it, you have a
2 detrimental effect on the signal because of that
3 matrix suppression that I talked about earlier,
4 that we evaluated as part of our validation
5 study. So, by actually diluting it, you dilute
6 the matrix interference compounds, or the things
7 that might suppress the signal and, therefore,
8 you actually have a better signal --

9 (Court reporter couldn't hear.)

10 A. For the analyte of interest.

11 Q. So, you might get -- you might get a signal
12 showing EDTA, but you might also get interference
13 from other ions as well?

14 A. Not so much an interference as it is the signal
15 is lower than what you expect it to be.

16 Q. Okay. If you increase the solution from 200
17 microliters to 2,000 microliters, you are
18 diluting it to the point where it may not show up
19 at all, right?

20 A. Yeah, that's true.

21 Q. So this level of 200 microliters, if you adjust
22 it a little bit up or a little bit down, you can
23 actually make it so that your test will not see
24 EDTA, even if it's there?

25 A. Well, if you take it to an extreme, yes.

1 Q. Okay. Now, at the dilution level you chose, it
2 may be that EDTA is in those controls, but it's
3 just too small or too low for your test to pick
4 up?

5 A. That's true.

6 Q. And the same would be true for the bloodstains
7 next to the controls in the RAV4, there may be
8 EDTA in it -- in them, it's just too low for your
9 -- you to detect with your dilution level?

10 A. And that's why we determine that detection limit,
11 so we know what value that corresponds to what
12 we're no longer able to actually differentiate
13 the presence or absence of EDTA.

14 Q. But my point is you cannot -- you cannot
15 absolutely say that there is no EDTA in those
16 bloodstains in the RAV4, right?

17 A. Wrong.

18 Q. You can only say that you can't detect it at your
19 level of detection, LOD, you are unable to detect
20 it, right?

21 A. I am -- I am able to say that the bloodstains
22 that were collected from the RAV4 do not contain
23 the amount of EDTA that would be expected if that
24 source of EDTA came from that tube of blood
25 collected from that --

1 Q. Sir, that's not my question. Listen to my
2 question.

3 A. I'm sorry.

4 Q. My question is, you cannot tell us, absolutely,
5 that there is no EDTA in those bloodstains, you
6 can only tell us that there is no EDTA at a level
7 that you can detect from your instrument?

8 A. That's a fair statement, yes.

9 Q. Okay. Now, since you didn't provide an opinion
10 about the level of -- or the quantity of EDTA in
11 the test tube -- not the test tube. Let me
12 rephrase that. As I read your report, what you
13 are saying is your test detected some amount of
14 EDTA in the blood vial, right?

15 A. Yes, it did.

16 Q. But not an amount that you were able to
17 quantitate and express an opinion on?

18 A. It's an amount that I did not quantitate.

19 Q. Okay. And so you get a blood vial and it says
20 EDTA right on it; it does right?

21 A. Yes, it does.

22 Q. So one would expect, if you test it, there will
23 be some detectable amount of EDTA, right?

24 A. That's right, yes.

25 Q. Although, with 11 years having gone by, we don't

1 know whether it's the same level it started with,
2 or something that's less, right?

3 A. I think that I testified earlier, I think that
4 you can get an estimate, based on the analysis,
5 as to whether or not there was significant
6 degradation.

7 Q. But you don't know what you start off with, you
8 don't know how much EDTA was in that tube to
9 begin with, right?

10 A. Well, yeah, I do.

11 Q. You know a range?

12 A. I'm sorry. I know, based on what the
13 manufacturers put into these EDTA tubes in order
14 for the EDTA to function as they intend it to
15 function, that the concentration, when that tube
16 is filled to the standard volumes that they put
17 blood into these tubes, it ranges between 1,000
18 and 2,000 parts per million.

19 Q. Okay. But now, what you don't know, first of
20 all, is what the original volume of blood,
21 whether it filled that tube or not, right?

22 A. No, I don't know how much was originally in that
23 tube --

24 Q. Okay.

25 A. -- that's correct.

1 Q. And you don't know, other than this range, you
2 don't know the actual amount of EDTA that started
3 off in that tube 11 years ago?

4 A. Well, it would be, in my opinion, that it would
5 be between 1,000 and 2,000 parts per million.

6 Q. Well, that's a pretty big range. My point is,
7 you don't know the numbers, right? It's not like
8 you just get --

9 A. Yeah, I did measure a number.

10 Q. You don't know what you started with in 1996.
11 You don't know what the number of EDTA was in
12 that vial in 1996?

13 A. Not exactly, no.

14 Q. Okay. Thank you. And you mentioned that there's
15 more EDTA in one of these blood vials than is
16 needed to chelate or bind with the metals, like
17 calcium and iron, right?

18 A. That's correct, yes.

19 Q. But I assume that varies sometimes depending upon
20 the person?

21 A. Depending on their diet, generally.

22 Q. Okay.

23 A. We intake calcium, intake iron, in our diet. And
24 then through metabolic processes, we actually
25 generate waste that are those ions --

1 Q. Okay.

2 A. -- those metals, if I can clarify.

3 Q. So, what your opinion, today, basically is, there
4 is EDTA at some detectable level in the blood
5 vial, first, right?

6 A. Yes.

7 Q. And your opinion is that there is no detectable
8 EDTA in the three stains from the RAV4 that you
9 tested, right?

10 A. That's correct.

11 Q. Let's take that last opinion, that there's no
12 detectable level of EDTA in the RAV4 stains,
13 okay?

14 A. Okay.

15 Q. That's something that you could have done, if you
16 had been asked, back in November or December of
17 2004, right? I'm sorry, 2005, right?

18 ATTORNEY GAHN: Your Honor, I'm going to,
19 again, interpose the objection. I think we're going
20 way beyond an admissibility hearing?

21 ATTORNEY BUTING: No, it's we're going
22 directly to the whole question of the next motion,
23 sequential testing or not.

24 THE COURT: Well, it does go to the next
25 motion, but that's not the motion we're hearing at

1 this time. So I'm going to sustain the objection.
2 At this time we're taking evidence on the State's
3 request to have this witness testify as an expert.
4 I'm going to sustain the objection.

5 Q. (By Attorney Buting)~ Okay. Your opinion that
6 you prepared in the report, does not in any way
7 make a comparison to a quantitated level of EDTA
8 from the blood vial to the bloodstains, does it?

9 A. We did not perform a quantitative analysis on
10 this case.

11 Q. Or comparative analysis of the blood vial to the
12 stains?

13 A. I'm not sure I understand your question.

14 Q. To get the results that you got on the
15 bloodstains, you would not have needed the blood
16 vial in your test, would you?

17 A. I think to interpret the data fully, we needed
18 the blood vial. But to get the results, you are
19 right, we didn't need the blood vial.

20 Q. Okay. And, in fact, one of the requests that you
21 got from the Milwaukee office, when it described
22 what was necessary and what kind of test it was,
23 they asked you to conduct relative comparisons to
24 swabs from the crime scene?

25 ATTORNEY GAHN: Objection, your Honor,

1 relevancy, for the purposes of this hearing.

2 THE COURT: Sustained.

3 Q. (By Attorney Buting)~ All right. Is this a fair
4 statement that, at best, your tests tell us
5 whether or not there is any detectable EDTA in
6 the bloodstains now, 16 months after they were
7 found?

8 A. Yes. That's a fair statement, yes.

9 Q. Your test does not tell us whether there was any
10 detectable EDTA in the bloodstains when they
11 were -- first came to be in the Toyota RAV4, 16
12 months earlier?

13 A. I'm sorry, but I disagree.

14 Q. Well, would you agree that if there was EDTA in
15 those bloodstains, in November of 2005, then it
16 matters not whether your tests now, 16 months
17 later, shows no EDTA?

18 A. Well, I disagree with that statement too.

19 Q. And why is that?

20 A. If there was EDTA in the bloodstain when it was
21 originally collected and it didn't show up today,
22 to me that would suggest that there was some
23 evidence switching, that it wasn't the same stain
24 that we analyzed.

25 Q. Okay. And that's based on your assumption of how

1 fast or slow EDTA might change or degrade in the
2 environment?

3 A. It's based on what's published and my own
4 experiments that show that EDTA is quite stable
5 in a bloodstain. And in a tube of blood, I would
6 add.

7 Q. Well, I'm talking about the bloodstains, for now,
8 okay?

9 A. Yes.

10 Q. In the little study that you made up of those 10
11 spot cards that were 33 months old?

12 A. Yes.

13 Q. Did you quantitate the amount of EDTA that were
14 in those bloodstains?

15 A. No, sir, this was not validated as a quantitative
16 procedure. So it was simply qualitative, was it
17 there or was it not there.

18 Q. And you know of no study that has quantitated the
19 bloodstain that is 11 years old versus one that's
20 33 months old?

21 A. A bloodstain that's 11 years old?

22 Q. Or a blood sample?

23 A. No, I don't.

24 Q. Just one more question, I think. The matrix, you
25 mentioned four experiments, something called

1 matrix suppression?

2 A. Yes.

3 Q. And what that does is it tends to actually
4 suppress an ion that is there, but you don't see
5 it?

6 A. That's exactly what matrix suppression is. It
7 suppresses the signal on the instrument, so you
8 may miss something that's there. And we would --
9 like I said, we did validate that.

10 Q. And your validation there was that there could be
11 as much as 33 percent suppression of what the
12 actual amount should be?

13 A. That's correct. If the range of suppression was
14 between 3 percent and 33 percent or 34 percent.

15 Q. And that's not considered significant to you?

16 A. No. No.

17 ATTORNEY BUTING: All right. I have no
18 further questions.

19 THE COURT: Mr. Gahn, any redirect?

20 ATTORNEY GAHN: Just one moment, your
21 Honor, please. No questions, your Honor.

22 THE COURT: Very well, the witness is
23 excused.

24 THE WITNESS: Thank you, your Honor.

25 ATTORNEY BUTING: What do we want to do

1 with that exhibit he has, can we make a copy and
2 file it later as --

3 ATTORNEY GAHN: What I have here, your
4 Honor, is the exact same copy. I will have this
5 copied and then we can mark it as an exhibit.

6 THE COURT: Very well.

7 ATTORNEY GAHN: Do you want to give it a
8 number now or save one for it? But I will have it
9 reproduced.

10 THE COURT: What's the next number?

11 THE CLERK: 446.

12 THE COURT: 446. All right. The full
13 report will be 446.

14 ATTORNEY BUTING: And just so the record is
15 clear, it's not a report, it's the lab sheets, data,
16 those sorts of things.

17 THE COURT: I apologize. That's a good
18 correction, because I think the shorter document
19 here is actually entitled a report.

20 All right. Counsel, at this time the
21 Court will hear argument on the State's motion to
22 admit the EDTA test results. Mr. Gahn, are you
23 going to be arguing that for the State?

24 ATTORNEY GAHN: Yes, your Honor, and I'm
25 going to rely upon the -- that portion in the brief

1 that we filed, our motion to admit EDTA test results
2 and then permit expert testimony on -- in the
3 State's case-in-chief. And I will just refer the
4 Court to pages 10 through 13, which I think
5 certainly talks about the law and the status in
6 Wisconsin.

7 Basically, I think this Court has to
8 look at the analysis of the EDTA derived from the
9 LC/MS/MS testing procedure and determine if that
10 is admissible. And the Court has to look at
11 three factors under our case law in Wisconsin.
12 Is it relevant? I think clearly it's relevant to
13 the facts in this case.

14 Number two, is the witness presenting
15 the evidence? Is that person qualified as an
16 expert to do so? I think, clearly, Dr. LeBeau,
17 through his testimony and through his CV, show
18 that that would be the case.

19 And, three, is the evidence, would it
20 assist the trier of fact in determining an issue
21 of fact. And I think that -- I don't think that
22 the normal or the typical citizen of the
23 community understands LC/MS/MS technology and how
24 it works and what EDTA is and its function and
25 the analysis of that. And I think this certainly

1 would clearly assist the jury in arriving at a
2 decision in this case. And that's all I have.

3 THE COURT: Mr. Buting?

4 ATTORNEY BUTING: Actually, Mr. Strang is
5 going to take this.

6 THE COURT: Sorry, Mr. Strang.

7 (Previous Avery transcripts, Wolstad should be Walstad.)

8 ATTORNEY STRANG: The way we divide things
9 up, your Honor, is that Mr. Buting does the hard
10 work and I come in later. **Walstad** is the starting
11 point, whether it ought to be or not. Much could be
12 added to the discussion, but I won't. Wisconsin has
13 not adopted the United States Supreme Courts'
14 approach to tender scientific or other expert
15 evidence set out originally in **Daubert vs. Merrell**
16 **Dow Pharmaceuticals** in 1993 and elaborated in cases
17 after that.

18 Wisconsin persists in the **Walstad**
19 approach and I agree in a general way with
20 counsel that there are three factors the Court
21 need consider, under **Walstad**, in deciding
22 admissibility initially here. One, is relevance.
23 Two, is whether the tendered witness is an
24 expert. And, three, is whether the evidence or
25 the opinion would be helpful to the jury. Would

1 the Court prefer that I wear the --

2 THE COURT: Sure.

3 ATTORNEY STRANG: -- mike? How is that?

4 Does that work any better?

5 THE COURT: Yeah.

6 ATTORNEY STRANG: All right. The third
7 criterion is, would the evidence or the opinion be
8 helpful to a jury? And that really is where we
9 founder here, the question of whether there was EDTA
10 in the blood found in the Toyota. And the critical
11 caveat here, whether there was EDTA in the blood in
12 the Toyota in November of 2005 is relevant. That
13 is, there is a material issue of fact here to be
14 decided by the jury, which is, did the blood come
15 freshly from Steven Avery's finger or some other
16 source on his body, on or about October 31, 2005, or
17 did the blood get in the Toyota because, put there
18 by someone else, presumably from a vial that itself
19 dated back to 1996.

20 And we can, you know -- The vial
21 contained EDTA, let's assume, for the purposes of
22 argument, even setting aside the expert's opinion
23 confirming that --

24 (Court reporter couldn't hear.)

25 ATTORNEY STRANG: Even setting aside the

1 expert's opinion confirming that the vial contained
2 EDTA.

3 So, that's a material question in this
4 case. And evidence that made it more or less
5 likely that the material proposition was true
6 would be relevant here. So, if this is evidence
7 that there was no EDTA in that blood in late
8 October or early November, 2005, then it's
9 relevant.

10 Mr. LeBeau's qualifications,
11 particularly as an analytic chemist who can use a
12 liquid chromatograph, matched with a tandem mass
13 spectrometer, is beyond serious dispute. We
14 don't dispute that here for purposes of the
15 admissibility determination. He's a good deal
16 more qualified than the holders of bachelor's
17 degrees from our State Crime Laboratory in
18 Madison who have made their appearance in this
19 trial.

20 But the problem is whether this is
21 helpful to a jury. And what this Court is being
22 asked to do, just so that no one makes any
23 mistake about it, your Honor is being asked to
24 join a select club. In fact, there's only one
25 other member of the club, so far as anyone knows.

1 And the founding member of the club is Judge
2 Lance Ito from the Superior Court of Los Angeles
3 County, in the O.J. Simpson trial.

4 And, your Honor, the State nominates to
5 be the second member of this club, and that is,
6 of judges or courts who have admitted evidence
7 concerning EDTA analysis, in dried bloodstains,
8 in a criminal trial. And the similarities
9 between which Judge -- that which Judge Ito did
10 and that which your Honor is being asked to do,
11 actually continue.

12 We now know, after testimony today, that
13 the protocol for testing was prepared hurriedly,
14 that it was prepared during the O.J. Simpson
15 trial which, of course, went a good deal longer
16 even than this trial. I think the preliminary
17 hearing in that case went a good deal longer than
18 this trial. But it was a mid-trial creation of a
19 protocol, mid-trial testing. And, then,
20 evidently, further mid-trial retesting and
21 reconsideration of some of the earlier results.

22 That, of course, is what we have here.
23 As Mr. Buting has discussed before and I think
24 even offered the Court, or at least read from an
25 email between Mr. Kratz and the Crime Laboratory,

1 non-quantitative EDTA testing of the bloodstains
2 from the Toyota was under active consideration by
3 the State in February of 2006. For strategic
4 reasons, evidently, the State chose not to pursue
5 that testing then.

6 Now, beginning about the end of January,
7 2007, the State decided to pursue such testing
8 and inveigled the FBI into doing it -- or
9 prevailed upon the FBI Chemical Unit at the
10 laboratory to assist the State in that manner.
11 Those tests occurred sometime between February 1,
12 when I believe the actual swabs and control
13 samples were received at the FBI Laboratory. I
14 may be off a day or so, but I'm very close there.
15 And what is it, February 26th that our report is
16 dated, or Mr. LeBeau's report is dated.

17 And if I recall his testimony, the work
18 on a protocol for conducting those tests began in
19 January, 2007. The protocol evidently was,
20 according to his testimony, ready for an approval
21 process by February 14, 2007. We were at that
22 point, nine days into trial.

23 And that approval process evidently went
24 very smoothly for Mr. LeBeau because the protocol
25 itself was issued and dated February 15, 2007.

1 So within one day, I gather, from his testimony
2 and the date on Exhibit 434, approval was
3 accomplished within the FBI bureaucracy for this
4 protocol.

5 The protocol was developed for no case
6 but this. The protocol has been used in no case
7 but this. The protocol is unrevised. The
8 protocol has been validated, if at all, only
9 internally, in the FBI, and, again, approved
10 apparently in the course of 24 hours, after
11 submitted for approval. All of these things are
12 similar to the evidence that -- that Judge Ito
13 admitted in the Simpson prosecution, out in Los
14 Angeles County.

15 We now have results that are
16 non-quantitative and that express, necessarily,
17 an opinion that no EDTA is detected in the swabs,
18 the three swabs from the bloodstains, or in the
19 control samples that were also submitted at the
20 same time. Although, Mr. LeBeau ventures an
21 opinion that he, therefore, can opine that no
22 detectable EDTA was present back at the relevant
23 time, October, early November, 2005. He has to
24 support that opinion, one degradation study and
25 apparently one degradation study only.

1 Your Honor has seen the entirety of it,
2 two pages, one of handwritten notes and one that
3 consists of a short paragraph. And as I
4 understand it, what Mr. LeBeau did was went over
5 to the DNA Unit across the hall, or wherever it
6 is, figuratively, in Quantico, said, let me have
7 some old spot cards, which would be blood on a
8 different medium than submitted here, on a PH
9 neutral stable matrix of a spot card.

10 And evidently someone told him that the
11 blood on these spot cards came from something
12 from the EDTA purple-topped tube. We don't have
13 much detail on how he satisfied himself of the
14 EDTA origins or content of the spot cards.

15 These things are about 33 months old.
16 He tests the 10 of them. And he finds EDTA in
17 the free acid form in all 10 spot cards. Finds
18 the iron chelate of EDTA in hardly more than half
19 of them, in 6 out of 10. And sort of dismisses
20 that as insignificant to his conclusion that,
21 boy, EDTA sure must be stable and must not
22 degrade quickly in bloodstains.

23 We don't know why he dismissed that so
24 freely, other than that he seemed to take
25 reassurance from the fact that he found the free

1 acid form of EDTA in all 10 of these. And that's
2 it. That hasn't been peer reviewed by anybody,
3 evidently not even within the FBI, so far as the
4 record shows. Certainly hasn't been published.

5 Certainly doesn't explain what
6 differences in degradation there might be, were a
7 different matrix or medium to be used. For
8 example, the cotton swab that was submitted here,
9 as opposed to the blotter paper spot card there,
10 which of course is specifically designed for
11 stabilizing and holding blood.

12 Doesn't have any way to explain, or
13 hasn't, so far as we can see, considered what
14 environmental differences there may be that would
15 have produced different degradation or could
16 have. And has no way at all to extrapolate to
17 the degradation he would expect in a 9 or 11 year
18 old sample of blood in any medium, whether in the
19 vial, whether on the swab, whether on the
20 substrates found in the Toyota.

21 So he is not able, here, to give us any
22 curve at all, because he's only got one point to
23 plot on the graph, which is 33 month old spot
24 cards. We don't have anything that's less old.
25 We don't have anything that's more old. We have

1 nothing that would establish a rate of
2 degradation in any environment, let alone in the
3 relevant environment.

4 So to suggest on that dataset, and with
5 that level of scrutiny, that this is helpful,
6 that an opinion that the EDTA was not detectable
7 or present back in November of 2005, based on a
8 failure to detect EDTA in the blood swabs in
9 February, 2007, really is rank speculation, or so
10 close to rank speculation that it's simply not
11 helpful to a jury. The opinion just isn't
12 helpful.

13 Now, you know, an analogy, if your Honor
14 were trying a slip and fall case in a commercial
15 establishment and the question, the material
16 issue was what comparative negligence ought we
17 assign to the plaintiff, and the defendant store
18 owner wanted to call a palm reader and an
19 astrologer. The palm reader would say, I have
20 examined the plaintiff's hand and he's the kind
21 of person who is prone to accidents and he must
22 have known that. The astrologer to say, the
23 plaintiff's zodiac for that month, his horoscope
24 for that month, says that he ought to be careful
25 because unexpected things could happen.

1 This would be relevant under the **Walstad**
2 standard. And a properly qualified horologist or
3 astrologer, a properly qualified palm reader, one
4 of many years experience, certainly could be
5 qualified as having specialized knowledge. But
6 their opinions, I submit, would not be helpful to
7 a jury. And even under **Walstad**, wouldn't be
8 admitted because unhelpful, even though the issue
9 of comparative negligence and whether the
10 plaintiff took adequate precautions is relevant
11 and the witnesses are qualified.

12 The examples are a reduction to the
13 absurd. And I don't, here, stand before the
14 Court and suggest that Mr. LeBeau is the moral
15 equivalent of a palm reader or an astrologer. I
16 don't suggest it. But the example also is
17 illustrative, I think, of how his opinion here,
18 based on the hurried assembly of a protocol, the
19 mockery of a degradation or stability study, the
20 lack of outside validation in any of the work,
21 and the effort to extrapolate without degradation
22 data, back from February of 2007, to November 5,
23 or days before that, 2005, is simply not helpful
24 to a jury.

25 It would be possible here for the Court

1 to admit the opinion that in mid February, 2007,
2 within the detection limits of the FBI Lab, there
3 was no detectable EDTA in the blood swabs. On
4 that opinion alone, the State is on much more
5 solid ground.

6 But the opinion that, therefore, the
7 blood in the Toyota did not come from the blood
8 of Steven Avery's vial, which necessarily carries
9 an opinion about what the EDTA level would have
10 been, in the swabs of the dried bloodstains at
11 the relevant time, again, autumn 2005, that's not
12 helpful to a jury, because it's wholly
13 unreliable, unsubstantiated, other than by the
14 man who wrote the protocol was one of the people
15 who approved his own protocol, donated his blood
16 for the test, supervised the testing, and
17 assigned himself to the case.

18 Now, let's not forget, in weighing all
19 of this, that although good, Mr. LeBeau clearly
20 is not perfect. He didn't claim that he is and
21 if it were possible to bring Dr. William Sybers
22 here from Florida, I would have a pretty good
23 witness to tell the Court that Mr. LeBeau and his
24 work is not perfect, neither are perfect.

25 He was proven wrong there on an effort

1 to extrapolate back, nine years in embalmed
2 tissues, the presence of a metabolite, a muscle
3 paralytic drug, succinylcholine. As we showed,
4 the Assistant Attorney General, Special Assistant
5 Attorney General for the State of Florida, who
6 prosecuted that case, later filed with the court
7 a document warning that Mr. LeBeau's results, and
8 for that matter, National Medical Services
9 results, Dr. Ballard's results, ought not be
10 relied upon.

11 So it is a select club that your Honor
12 is being asked to join. What's different and, I
13 mean, I'm foreshadowing the next argument, but
14 this has a bearing now on this question. What is
15 different and worse about this case and Simpson
16 is that your Honor is being asked to admit these
17 mid-trial results, and opinions extrapolated
18 backward from the results, without benefit of
19 degradation data, when one side and one side
20 only, as a practical matter, will have the
21 ability to do any testing at all.

22 And that's where this case really is
23 different from Simpson. There is no reason to
24 believe and, indeed, if my memory serves, both
25 sides in Simpson participated in EDTA testing and

1 had the opportunity to do that, during the course
2 of that trial.

3 Not so in this. And there is no
4 14 million dollar defense fund here that there
5 was because O.J. Simpson was the one in a million
6 criminal defendants who had that kind of money to
7 put into his defense for experts, for lawyers,
8 for Barry Scheck and Peter Neufeld, people from
9 the original innocence project at Benjamin
10 Cardoza Law School, people who are well versed in
11 chemistry and in forensic science.

12 So acknowledging that it would be
13 possible here to allow part of Dr. LeBeau's
14 opinion, that is, the opinion that no EDTA was
15 detectable by the method they used in February,
16 2007, I think the Court would err and would allow
17 evidence that is not helpful to the jury, were it
18 to allow Dr. LeBeau to go further than that.

19 And the fact that there will be no
20 independent testing has a bearing on this **Walstad**
21 analysis because, if for no other reason than
22 because of this, the failure to detect EDTA in
23 control samples here is highly, highly suspicious
24 given the ubiquitous presence of EDTA in the
25 whole gamut of consumer products, from the soft

1 drinks we drink, where EDTA is used to prevent a
2 carcinogen from forming, benzine; to Armor All,
3 used to clean cars and their interiors; to all
4 sorts of personal care products, detergents,
5 cleaning products; the failure to detect any EDTA
6 in any of the controlled swabs is a bright red
7 flag here. And we would start immediately with
8 that, if we had an opportunity to do independent
9 testing. Because it's just flat out counter
10 intuitive.

11 It just does not comport with common
12 sense. I will venture a guess that the belief
13 that the State would find EDTA in the dried
14 bloodstains and in controlled areas is what led
15 the State, tactically, in February, 2006, not to
16 undertake this very testing, on which they have
17 taken a chance now, once it turns out there is a
18 blood vial, that there was a source of whole
19 blood that could have been planted here,
20 conceivably.

21 And I don't know whether the answer for
22 those control swabs would lie in just because
23 there really was no EDTA detectable, or whether
24 it would lie in the dilution that the FBI used,
25 200 microliters of inner reagent or fluid added

1 to five microliters of the sample. I don't know.
2 I'm not a chemist. We'll never know before this
3 jury comes back with a verdict, if the Court
4 admits Dr. LeBeau's testimony.

5 I ask the Court not to go down that
6 path, not to join Judge Ito's club and not to
7 admit opinions from Dr. LeBeau that, although
8 they sound impressive, coming from an FBI expert,
9 in fact, offer no honest help to this jury.

10 THE COURT: Mr. Gahn.

11 ATTORNEY GAHN: Your Honor, the State is
12 simply asking this Court to apply the law in
13 Wisconsin to the admissibility of expert testimony
14 and scientific evidence in Wisconsin. We have given
15 you a statement of the law, I'm sure the Court is
16 aware itself of the standard in Wisconsin for the
17 admissibility of this type of evidence. I think
18 Dr. LeBeau clearly established to this Court the
19 wide use of the LC/MS/MS technology and that it is a
20 technology that can test for chemicals, it doesn't
21 make any difference what that chemical may be.

22 He's testified how samples will come
23 into the FBI and say, would you test this to see
24 if there are any chemicals in it. And perhaps
25 there will be a panel that they will find. Or

1 some item will come in and say, will you test
2 this for a specific chemical, such as cyanide, or
3 something, or EDTA.

4 All of that is possible to be done.
5 It's done with very standard well recognized
6 instruments in the scientific community and
7 that's exactly what he did. Samples were
8 submitted to him to test for the presence of
9 EDTA. He has the technology that is world wide
10 recognized, capable of doing that. And that's
11 what he did.

12 I think he explained well that this was
13 a qualitative test, not a quantitative test. I
14 note that the defense has talked a lot during
15 cross-examination about quantitating this. But
16 how do you quantitate something that's not there.

17 His test results on the bloodstains from
18 the RAV4 and on the controls from the RAV4, there
19 was nothing there. So this was a qualitative
20 test under the umbrella of analytical chemistry
21 and very valid in the scientific community.

22 I think he established his background
23 and experience in the area of degradation. They
24 did their own degradation studies. He talks
25 about so many other fields that are testing for

1 EDTA. EDTA can be somewhat of a problem because
2 it does stay around, binds to metals. And
3 there's problems in the agricultural world,
4 wildlife, fish, and game.

5 I think he was clear, this isn't
6 something that's not tested for, it is tested for
7 and it can be tested for. Everything that the
8 defense has brought up, whether it be about the
9 controls, the commercial products, suspiciousness
10 about the testing results, datasets produced,
11 degradation rates, all of that clearly goes, your
12 Honor, to weight of evidence and has nothing to
13 do with the admissibility of evidence.

14 And I think a reading of the **Peters**
15 case, where they did an analysis under the DNA
16 testing, clearly shows the difference between
17 admissibility and issues that are for the weight
18 of evidence. So I would ask the Court simply
19 to -- we're not inviting you to join any clubs,
20 your Honor, we're just asking you to look at the
21 law in Wisconsin and apply it to the testimony
22 that you heard from Dr. LeBeau. Thank you, sir.

23 THE COURT: All right. Well, the reference
24 to Judge Ito's club is interesting. Actually, from
25 my recollection of that case, I believe that the

1 evidence came in without objection, because both
2 parties must have felt they had something to gain by
3 it. So to the extent there is a club, one way or
4 another, I think I'm probably the only member.

5 The historical reference to the O.J.
6 Simpson case is interesting, but my obligation in
7 this case is to apply the law as it is in
8 Wisconsin and determine whether or not the
9 offered evidence is admissible in this case. And
10 I think it's helpful to briefly review the
11 standards that have historically applied in this
12 jurisdiction and others, governing the admission
13 of evidence.

14 At one time, the prevailing standard in
15 many parts of the country was what is known as
16 the **Frye** test, which held that the trial court is
17 to determine whether the expert evidence had
18 gained general acceptance in the particular field
19 to which it belongs. In this case, I think
20 there's a serious question about that, because of
21 the lack of a significant history of EDTA
22 testing.

23 The United States Supreme Court
24 subsequently replaced the **Frye** test with the
25 **Daubert** test, which relaxed the federal standards

1 somewhat, but still required a trial court to
2 assure that expert testimony is reliable. In
3 Wisconsin, it's pretty well established that we
4 have a standard that is more lenient than even
5 the *Daubert* test, that is the standard that's set
6 forth in Section 907.02 of the statutes.

7 That statute provides that, as a
8 condition to the admissibility of expert
9 testimony, the evidence is admissible if it is
10 relevant, if the witness is qualified as an
11 expert, and if the evidence will assist the trier
12 of fact in determining an issue of fact.

13 In this case, I don't believe there is a
14 dispute between the parties on the first two
15 issues. Unquestionably, the evidence relating to
16 the question of whether or not the blood in the
17 RAV4 was planted is relevant, certainly it was
18 the -- a large part of the defense's opening
19 statement and cross-examination of some of the
20 witnesses. And, likewise, the State is equally
21 concerned to show the jury that the blood was not
22 planted, but came directly from the defendant.
23 So I think it's definitely relevant.

24 Likewise, there's not a serious dispute
25 that the witness in this case, Dr. LeBeau, is

1 qualified as an expert. He testified as to his
2 qualifications. He's got a master's degree, a
3 doctorate degree. He's worked at the FBI Lab for
4 a number of years. In fact, he's the head of his
5 section. There's no question that he is
6 qualified as an expert.

7 The issue boils down to whether the
8 evidence will assist the trier of fact in
9 determining an issue of fact. And I think some
10 of the comments that have been included in
11 Wisconsin Court of Appeals decisions and the
12 Supreme Court are worthwhile repeating here as a
13 backdrop, if you will, to the standard the Court
14 is to apply.

15 The Court of Appeals in the *Riva* case,
16 reported at 266 Wis. 2d, 696, noted as follows:
17 The approach, that is, the Wisconsin approach to
18 allowing expert testimony, has served to reduce
19 the gatekeeper role of the Wisconsin trial court
20 when it comes to expert testimony. Reliability
21 is not part of the trial court's function.
22 Rather, reliability is an issue for the trier of
23 fact, not the trial judge as a predicate for
24 admissibility. The reliability of expert
25 testimony is an issue for the trier of fact, not

1 the circuit court as a predicate for
2 admissibility. Instead, Wisconsin relies on the
3 vehicle of cross-examination to test the
4 reliability of an expert witness.

5 So in looking at some of the items of
6 dispute, as Mr. Strang pointed out, and which I'm
7 certain will be a part of the cross-examination
8 of the witness in this case, there are points to
9 be made with respect to the reliability of the
10 testing method that was used in this case.

11 However, the Court cannot say that the
12 evidence would not assist the trier of fact in
13 determining an important issue. The witness'
14 testimony was, to a reasonable degree of
15 scientific certainty, that the blood that was
16 found if the RAV4 did not come from the blood
17 vial in this case. The results are not
18 quantitative. To be certain, the question of
19 degradation is an issue which will no doubt be
20 explored by the defense in its case.

21 But for the Court, on its own at this
22 point in the proceedings, to make a determination
23 that degradation has been demonstrated to the
24 point that the evidence will not assist the trier
25 of fact, is simply further than the evidence

1 presented today authorizes the Court to go.

2 The witness testified he didn't believe
3 that the difference in the results here could be
4 explained in terms of degradation. And while the
5 evidence may not be conclusive one way or
6 another, the Court is not in a position, under
7 the law which the Court is expected to apply, to
8 make that determination today.

9 So, in conclusion, I believe that the
10 State has met its burden here to show that the
11 evidence of this expert is admissible under the
12 standards of Section 907.02 and the Court will
13 grant the State's motion to allow Dr. LeBeau to
14 testify in this case.

15 Based on the Court's decision on the
16 State's motion, it is necessary to rule on the
17 defense motion for sequential and independent
18 testing. I am going to take a few minutes to
19 retire to chambers and review my notes about this
20 and then I will come back and issue an oral
21 decision on that motion as well.

22 ATTORNEY BUTING: Judge?

23 THE COURT: Yes.

24 ATTORNEY BUTING: Just a point of
25 clarification, so the record is clear, the Court is

1 allowing Mr. LeBeau, then, to give an opinion -- two
2 opinions, the two opinions sought by the State, that
3 no EDTA was in the swabs when he tested and that his
4 opinion is, therefore, the blood on the swabs could
5 not have come from the tube of blood. Is that
6 right?

7 THE COURT: I believe he's got opinions
8 about the blood in the tube as well as the blood in
9 the vehicle. And I'm allowing him to testify about
10 both those items.

11 ATTORNEY BUTING: But the ultimate opinion,
12 though, of saying that the blood on the swabs could
13 not have come from the blood in the tube; is that
14 being allowed?

15 THE COURT: Yes.

16 ATTORNEY BUTING: All right.

17 THE COURT: We'll resume in 15 minutes.

18 (Recess taken.)

19 THE COURT: All right. Mr. Strang.

20 ATTORNEY STRANG: I'm sorry, your Honor,
21 just two follow-ups. One, we neglected to move the
22 -- I think Exhibits 438 through 446, which were the
23 items the defense marked on Dr. LeBeau's
24 cross-examination.

25 THE COURT: Any objection?

1 ATTORNEY GAHN: No, your Honor. And I
2 believe that I failed to move in Exhibits 433 to
3 437.

4 ATTORNEY STRANG: No objection there.

5 THE COURT: Very well, all the exhibits
6 marked today, then, are admitted into evidence.

7 ATTORNEY STRANG: Second, your Honor, I
8 would be remiss if I did not pose directly to your
9 Honor an argument that **Walstad** ought to be overruled
10 and that, in the end, Wisconsin courts ought to come
11 in line with **Daubert** and adopt a similar test of
12 admissibility of scientific or expert testimony.

13 I make that argument now and suggest
14 that, particularly on something this complex,
15 with as little of the underlying criteria of
16 reliability as there are present, a court acting
17 as gatekeeper with, in many ways, superior
18 resources and perhaps background knowledge of
19 scientific endeavors, could not make a finding of
20 reliability as a threshold matter to
21 admissibility on the opinions that Dr. LeBeau
22 proposes to offer.

23 To the extent that Wisconsin leaves that
24 reliability determination to a jury of
25 laypersons, I think that this rises to a due

1 process denial. A criminal defendant has a right
2 both to be tried and sentenced on reliable
3 information. The due process roots of that go at
4 least back to the United States Supreme Court in
5 **Williams vs. New York**, which I think is 1948.
6 And I'm sorry, I don't have a citation because
7 I'm relying on my memory of the case here.

8 But to the -- If the Court correctly
9 applied **Walstad**, a point on which I respectfully
10 disagree with the Court, nonetheless, leaving the
11 reliability here to a jury for this unreliable
12 evidence that the State proposes to offer, I
13 think results in trying Mr. Avery on unreliable
14 information and rises to the level of the due
15 process violation.

16 So I ask the Court, on those brief
17 remarks, to reconsider its decision on the
18 assumption that **Walstad**.

19 would be overruled, that its time has
20 passed, and that Wisconsin will come into line
21 with the federal courts and the growing majority
22 of state courts that rely, either on **Daubert** or
23 even still on the more restrictive **Frye** test.

24 THE COURT: All right. The Court will note
25 your objection for the record. Given the fact that

1 **Walstad**, I believe, has been reaffirmed a number of
2 times in reported court decisions, I'm not going
3 to -- Well, I'm going to deny the request to
4 reconsider the Court's decision and -- but I will
5 note your objection for the record.

6 At this time, then, since the Court has
7 ruled that the EDTA expert evidence offered by
8 the State is admissible, the Court is required to
9 rule on the defendant's motion for sequential
10 independent testing and funding. The defendant
11 filed that motion on February 25th in order to
12 permit the defendant to conduct independent
13 testing for the presence of EDTA in what has been
14 referred to as the vial of blood from the
15 Manitowoc County Clerk's Office from the
16 defendant's 1985 case, as well as the bloodstains
17 allegedly belonging to the defendant which were
18 found in the victim's RAV4 vehicle.

19 The motion requests that the Court grant
20 the defendant permission to conduct testing
21 sequential to the FBI testing. That would
22 involve either declaring a mistrial in this case
23 or continuing it for a period of several months.
24 In addition, the defendant requests that this
25 testing be conducted at public expense because

1 the defendant is indigent.

2 There certainly is provision in the
3 statutes for expert testing to be conducted by
4 both parties, including the defendant. The
5 relevant statute is Section 971.23 (5). The
6 question in this case is really not so much the
7 right of the defendant to conduct testing, but
8 rather the timing of the request to perform such
9 testing, coming as it does in the middle of the
10 trial.

11 The parties do not cite the Court to any
12 directly relevant case law on this subject and I
13 don't believe there is any. I attempted to find
14 relevant case law myself. I think the Court's
15 decision has to boil down, as it often does in
16 these cases, as one of fundamental fairness; that
17 is, under the circumstances as they have
18 developed to this point, does fairness and a
19 meaningful opportunity on the part of the
20 defendant to present a defense require that the
21 relief being requested by the defendant be
22 granted.

23 In order to evaluate all of the
24 circumstances in this case, under that standard,
25 the Court believes it is necessary to first

1 review the relevant procedural history of this
2 case. The Court has to consider not just the
3 inability of the defense to conduct sequential
4 testing at this point in the trial, which I doubt
5 that even the State would contest is a given, I
6 think it would be difficult for the defendant at
7 this point to conduct that testing. But the
8 Court also has to consider the opportunities that
9 the defendant had in the course of these
10 proceedings to conduct such testing, had the
11 defense desired to do so.

12 In that regard, I would go back, first,
13 to July 10 of last year, which was the date the
14 Court issued an order requiring notification of
15 any extrinsic planting evidence to be provided,
16 by the defendant, at least 30 days prior to the
17 start of the trial.

18 Approximately 10 days after that, on
19 July 20 of 2006, that represents the date which
20 the State asserted and has on a number of
21 occasions, was the latest date by which the
22 defense knew of the existence of the container in
23 the Clerk of Court's Office, which represented
24 that it contained Steven Avery's whole blood
25 sample according to the defendant's original

1 motion for access.

2 As the defense noted in it's argument,
3 that's not the equivalent of knowing necessarily
4 that the blood vial was there, because the blood
5 vial hadn't been examined at that point, but the
6 defendant has not disputed the State's assertion
7 that the knowledge of at least the existence of
8 the box representing that it contained the
9 defendant's sample would have been made known to
10 the defendant by July 20th of last year.

11 On October 27th of last year the Court
12 issued a scheduling order setting both a
13 discovery deadline and the deadline for the State
14 to name expert witnesses to December 15th of
15 2006.

16 On December 6 of 2006, which was 9 days
17 before the discovery deadline, the defendant
18 filed a motion for order allowing access to prior
19 court file, which sought the opening of the
20 container purporting to contain the defendant's
21 blood, in the Manitowoc County Clerk of Court's
22 Office.

23 On December 14, the attorneys for both
24 sides met jointly to examine the vial and found
25 that it appeared to contain whole blood and

1 represented on its label that it was the blood of
2 the defendant.

3 On January 4th, the State filed a motion
4 to exclude the blood vial evidence, or in the
5 alternative adjourn the trial in order to permit
6 the State to analyze the blood sample. A hearing
7 was held on that date.

8 Five days later, on January 9th, the
9 Court denied the State's motion for a continuance
10 in order to analyze the vial of blood.

11 On January 12 of 2007, which was not
12 quite, but close to, 30 days before the scheduled
13 start of the trial, the defendant did file a
14 statement on planted blood describing the basis
15 for seeking introduction of the blood vial
16 evidence in this case.

17 On January 16th, the State filed a reply
18 opposing admission of the blood vial evidence.

19 On January 19th, the State asked to be
20 relieved of its obligation to disclose expert
21 witnesses with regard to the blood vial evidence.
22 The State did not oppose that request and the
23 Court granted it on the record.

24 On January 30th, the Court granted the
25 defense request to allow the blood vial evidence

1 in, subject to limitations.

2 Taking into consideration that part of
3 the procedural history in this case, the Court
4 comes to a few conclusions. First of all, the
5 Court finds that the defendant in this case did
6 timely comply with notice requirements that were
7 set by the Court.

8 The statement on planted blood that was
9 filed on January 12 was slightly less than 30
10 days before the start of trial required by the
11 Court's order, but I believe that at some point
12 after December the Court allowed that filing by
13 that date.

14 The history also shows that the
15 defendant had knowledge of at least the suspected
16 existence of the blood vial long before the State
17 did, that is, sometime on or before July 20 of
18 2006. The defendant indicates, at page 17 of his
19 brief, that counsel for both sides did not know
20 of the contents of the box until they opened it
21 together on December 14th. And while that
22 technically may be true, given the label on the
23 box which was attached as an exhibit to the
24 defendant's motion and the extensive information
25 about the box in the defendant's December 6th

1 motion, the Court concludes certainly that the
2 defense had much greater reason to suspect the
3 existence of the blood vial well before
4 December 14th; and, in fact, virtually
5 immediately made it in public statements, an
6 important part of the defense case.

7 The Court also concludes that if the
8 defendant had felt the testing of the blood was
9 important, the defendant had adequate opportunity
10 in which to arrange for such testing. The
11 defendant could have sought release of the blood
12 vial much earlier and requested permission to
13 test it himself under Section 971.23 (5).

14 In the alternative, if the defendant did
15 not want to risk spending resources on a test
16 which could possibly produce inconclusive or
17 unfavorable results, the defendant could have
18 disclosed the existence of the blood evidence
19 earlier, asked the Court to set a deadline for
20 the State to conduct any testing that it wished
21 to conduct and still allow the defense adequate
22 time to make its own decision as to whether or
23 not it wanted to independently test the blood
24 vial, all of which could accomplish -- been
25 accomplished well before the start of trial in

1 this case.

2 The Court believes the defense decision
3 not to pursue identification of the blood vial
4 until very close to the discovery deadline was a
5 decision that the defense was entitled to make.
6 That is, I find that it was a reasonable decision
7 on the part of defense counsel. There certainly
8 could have been a number of reasons for making
9 that decision.

10 While there are procedures for testing
11 EDTA, as Mr. Buting informed the Court on the
12 January 4 motion hearing, there are no
13 standardized -- universal standardized protocols
14 or universally accepted quantitative standards
15 and it would have been entirely possible that the
16 result of any testing conducted by the defense
17 could have been inconclusive. In addition, the
18 testing results could have been inculpatory
19 rather than exculpatory.

20 Finally, by waiting until shortly before
21 the time it was permitted to do so, the defense
22 may have left the State with less time to prepare
23 to meet the evidence and, specifically, with not
24 enough time in which to conduct the State's own
25 tests. It certainly appeared, based on the

1 original State request to adjourn the trial, that
2 that may well have been the case here.

3 However, the fact that the decision as
4 to the timing of the motion seeking access to the
5 blood vial was within the deadlines set by the
6 Court and was reasonable, that does not mean that
7 the defendant is allowed to second guess the
8 strategy at this point and be entitled to a
9 mistrial or lengthy continuation of the trial in
10 this case.

11 The Court believes that it would have
12 been highly foreseeable that, once made aware of
13 the blood vial evidence, the State would want to
14 test the blood in order to refute any planting
15 defense and would likely make every effort to do
16 so.

17 On that point, I think it's worthwhile
18 to go back to the transcript of the hearing on
19 January 4, that is, the hearing on the State's
20 request to adjourn the trial in this case and
21 repeat some of statements that were made at that
22 time.

23 Defense counsel informed the Court at
24 that time that it only would -- that it would
25 oppose a continuance of the trial date unless the

1 defendant was released on bail. Included among
2 the statements from the record of that hearing
3 are the following from defense counsel: And if,
4 that is, Mr. Avery, is to remain in custody, we
5 will and do oppose adjournment of this trial. We
6 want it to go forward on February 5 if he is to
7 remain in custody. That was from page 18 of the
8 transcript.

9 On page 19, defense counsel argued, But
10 if the State wants to test and if Mr. Avery is to
11 remain in custody, the trial ought to go forward
12 while the testing process is going forward.

13 At page 20, defense counsel argued, we
14 don't pursue testing ourselves. We don't know
15 that we will. We aren't asking to, but we
16 understand why the State wants to pursue that
17 testing.

18 Going on to page 20, we may well oppose,
19 in the end, the admissibility, the relevance of
20 those test results, but that, again, is something
21 the Court could address with the benefit of
22 knowledge of the test results, presumably, and a
23 chance to look at the type of testing that was
24 done, the protocols, and what the case law may
25 have to say about the admissibility of similar

1 tests.

2 Of course, that all came to pass, but
3 the point is that the defense was aware at that
4 time that the State was going to pursue testing.
5 The defense didn't oppose testing from the State,
6 as long as an adjournment was not granted. And
7 even at that point in the proceedings the
8 defendant was not interested in pursuing
9 independent testing.

10 Based on that history, the Court
11 concludes in this case that the defense motion
12 for sequential independent testing and funding
13 must be denied. The reasons are as follows:

14 First of all, the Court concludes that
15 the defendant had adequate time in this case to
16 pursue testing if he wished to do so.

17 The defense was aware of the likely
18 existence of the blood vial many months ago.

19 The defendant had an adequate
20 opportunity, after the discovery of the suspected
21 existence of the blood vial, to pursue testing.

22 As pointed out by the defendant, the
23 State could have pursued testing of at least the
24 blood evidence in the vehicle earlier as well.

25 But the importance of such testing did

1 not become evident until the defendant disclosed
2 that it was preserved blood in the Manitowoc
3 County Clerk of Court's Office that was
4 specifically the alleged origin of the planting
5 evidence.

6 There could have been other arguments
7 available to the defendant, for example, we have
8 heard testimony there were traces of the
9 defendant's blood found in his trailer, could
10 have been argued that somehow the State got a
11 hold of that blood or blood from somewhere else
12 that may not have been preserved, that was
13 planted in the RAV4 vehicle.

14 If the blood that was alleged to have
15 been planted was not preserved blood, the
16 significance of the lack of EDTA would not
17 necessarily have been terribly probative.

18 Both parties acknowledge that at this
19 stage in the development of EDTA testing, there
20 are not any generally accepted scientific methods
21 for either testing EDTA or interpreting the
22 results. From all the Court has been able to
23 learn at this point, that appears to be due more
24 to the fact that there's not much demand for it
25 than anything else. The Court has not heard any

1 evidence to suggest that it's more difficult to
2 test for EDTA than a variety of other chemical
3 substances.

4 Especially under the standards for
5 admission of expert evidence in the State of
6 Wisconsin, had either party decided they wanted
7 to pursue testing earlier, they could have done
8 so with the knowledge that the test results, as
9 long as conducted by a competent lab, probably
10 would have been admissible.

11 The Court does not find, in this case,
12 that the FBI is the only lab in the country or is
13 somehow uniquely qualified to perform this type
14 of testing. As we heard earlier today, I think
15 the last time it was conducted by the FBI was at
16 the time of the O.J. Simpson trial.

17 And referring, again, to the January 4
18 transcript, Mr. Buting pointed out to the Court
19 at that time that their, meaning the FBI's,
20 expert was called at the O.J. trial, actually
21 used by the defense in the O.J. case, and was
22 very helpful to the defense and ultimately very
23 embarrassing to the FBI who was part of whistle
24 blower allegations in the very lengthy
25 investigation that the FBI Lab did of misconduct,

1 or negligence, or sloppy practices in their lab.

2 So that's -- The role of the FBI in the
3 O.J. Simpson case didn't exactly establish the
4 FBI as the sole lab in the country that could
5 responsibly test for the presence of EDTA.

6 Now, there is a case that was cited by
7 the defendant in the brief that the Court does
8 agree is worth examining here. It may be the
9 closest case at least that somehow resembles the
10 facts in this case. That was the case of the
11 ***United States vs. Kelly***, where an appeals court
12 reversed a conviction because the trial court did
13 not allow for a one month continuance of the
14 trial in order to allow for a sequential testing
15 as requested by the defendant.

16 I'm going to quote from that case
17 briefly setting forth the facts and the ruling of
18 the Court: In June, 1968, the seized drugs --
19 and it was a drug case -- were sent to Washington
20 for tests, including neutron activation tests
21 which tended to show that the drugs all came from
22 the same original batch.

23 The government did not inform the
24 defendants of this test. They, the defendants,
25 only became a care of it at the trial, after the

1 testimony of the prosecutions first witness when
2 the government produced its exhibits. The
3 appellants also contend that the government had a
4 positive duty to disclose the results, or at
5 least the fact that they had taken them. This is
6 especially -- This is so, especially in light of
7 the fact the government had opposed discovery on
8 the grounds that the request was not particular
9 enough and now the government alone had knowledge
10 of the particular tests it had taken.

11 The course of the government smacks too
12 much of a trial by ambush in violation of the
13 spirit of the rules; a new trial is required with
14 a fair opportunity for the defense to run its own
15 neutron activation tests of the material to
16 determine the atomic similarity or dissimilarity
17 of the trace elements in the samples.

18 The Court believes there are at least a
19 couple of significant differences between the
20 facts in *Kelly* and the facts here. First of all,
21 the State has disclosed its test results
22 immediately upon receipt, to the defense, the
23 State did not have those test results available
24 until after the trial in this case started.

25 There is no element of trial by ambush

1 in this case. The Court concludes that the State
2 acted promptly after learning of the existence of
3 the blood vial to seek to have the tests of the
4 blood conducted.

5 The primary reason for the receipt of
6 the results during the trial as opposed to
7 earlier is because the State did not learn of the
8 existence of the blood vial until months after it
9 was believed to exist by the defense.

10 The Court also notes that the defense,
11 as I said earlier, could have conducted testing
12 of its own, but did not do so. And as of January
13 4 of this year, still informed the Court, on the
14 record, it had no plans to do so.

15 The Court, finally, concludes that the
16 remedies suggested by the defense in this case to
17 allow sequential testing are inadequate. As I
18 suggested earlier, had -- had this matter come up
19 well ahead of the trial, so that the results
20 would have been in before the trial, I may well
21 have ruled differently. I mostly likely would
22 have allowed the defense to pursue sequential
23 testing.

24 But at this date, the remedies suggested
25 are, first, a continuation of the trial, for an

1 unspecified period of months. And that simply is
2 not practical. I think, actually, both parties,
3 in their briefs, probably recognize that. First
4 of all, it would be very difficult to prevent the
5 jurors from being exposed to publicity about the
6 case in the meantime.

7 And even more significant than that, we
8 have heard a great deal of testimony. We're
9 beginning week four of the trial, I'm not sure
10 how the jurors could be expected to have -- could
11 be expected to have a meaningful recollection of
12 the testimony that's been introduced, the
13 evidence that's been received, and use that
14 information to come to a verdict some unspecified
15 period of months from now.

16 Likewise, the Court believes that there
17 are simply no grounds in this case to declare a
18 mistrial. The primary reason that the defense
19 has not conducted EDTA testing earlier is because
20 the defense chose not to pursue it when there
21 would have been time to do so.

22 The defense has made the alleged
23 planting of blood a vital part of this case. As
24 defense counsel pointed out at the January 4
25 hearing, he, meaning Mr. Avery, has been saying

1 from the beginning, to anybody with a microphone
2 and TV camera, initially as early as November,
3 2005, that if his blood was in the Toyota,
4 somebody planted it. So there hasn't been any
5 secret about his defense and his view of the
6 facts.

7 If testing of the blood was determined
8 by the defense to be vitally necessary to that
9 planting defense, which was known from the very
10 beginning, it should have been pursued far
11 earlier than it has been.

12 The bottom line in this case is that
13 both parties had an opportunity in this case to
14 pursue testing. The Court believes that because
15 of its earlier knowledge of the existence of the
16 blood vial, the State had a slight -- or the
17 defense had a slightly earlier opportunity, at
18 least than the State, but did not pursue the
19 testing. And for that reason a continuation of
20 the trial at this point is not warranted.

21 Because of the Court's decision denying
22 the motion, it's not necessary for the Court to
23 act on the public funding request from the
24 defense in this case. However, I feel compelled
25 to make a few comments about that request, should

1 it become relevant at some point.

2 First of all, if a defendant finds
3 himself in the position of Mr. Avery, that is,
4 let's say the defendant was determined to be
5 indigent, I believe the proper course to follow
6 was set forth by the Court of Appeals in the case
7 of ***Dressler vs. Racine County Circuit Court***, a
8 1991 Court of Appeals case. And the Court,
9 there, essentially, when a private counsel
10 requested funding for testing on the basis that
11 the defendant was unable to comply with the terms
12 of the retainer agreement and financially unable
13 to either continue to pay the attorney or pay for
14 testing, ruled that the defendant should contact
15 the Public Defender's Office, there's a provision
16 in the Public Defender rules to allow, not only
17 for testing, but also to appoint acting counsel,
18 even in the middle of a case, and be paid by the
19 Public Defender, if the defendant is unable to
20 continue to comply with the terms of any retainer
21 agreement.

22 The other point I will note relates to
23 the affidavit which was filed with the motion in
24 this case. I did take some time to read that and
25 while I don't have the entire retainer agreement

1 in front of me, the affidavit notes that the lump
2 some payment that was paid by the defendant, to
3 defense counsel, was accepted as a minimum earned
4 and maximum fee; that is, the fee was going to be
5 the amount for representation in the trial,
6 regardless of the amount of hours earned.

7 Also significant in the Court's mind is
8 paragraph 7 in which defense counsel indicates,
9 my firm's retainer agreement with Mr. Avery
10 requires the firm to pay expenses including
11 expert witnesses and any other necessary
12 litigation expenses after the amount in our trust
13 account is exhausted.

14 Now, as I read that, the logical reading
15 to me would be that the retainer agreement may
16 well obligate defense counsel to pay for testing
17 expenses and that the defendant's status at this
18 time as being indigent or not is not terribly
19 relevant because there is a contractual agreement
20 which has already been fulfilled by the defendant
21 which requires defense counsel to pay for testing
22 or expert witnesses. As I say, my ruling doesn't
23 require me to rule on that, so I'm not going to.
24 I only offer that as my observations.

25 In any event, the Court is going to deny

1 the defendant's motion for sequential independent
2 testing and funding. I will direct the State to
3 prepare the order, both on that motion and the
4 Court's earlier ruling today.

5 And I will see the parties tomorrow and
6 the jury will be back here to begin testimony.
7 Anything else before we adjourn today?

8 ATTORNEY BUTING: Do you want to meet
9 briefly in chambers?

10 THE COURT: That sounds fine, I will see
11 everybody in chambers in a few minutes.

12 (Proceedings concluded.)

I, Diane Tesheneck, Official Court Reporter for Circuit Court Branch 1 and the State of Wisconsin, do hereby certify that I reported the foregoing matter and that the foregoing transcript has been carefully prepared by me with my computerized stenographic notes as taken by me in machine shorthand, and by computer-assisted transcription thereafter transcribed, and that it is a true and correct transcript of the proceedings had in said matter to the best of my knowledge and ability.

Dated this 2nd day of January, 2008.

Diane Tesheneck, RPR
Official Court Reporter

1 STATE OF WISCONSIN : CIRCUIT COURT : MANITOWOC COUNTY
2 BRANCH 1

3 STATE OF WISCONSIN,

4 PLAINTIFF, JURY TRIAL
5 vs. TRIAL DAY - 17
Case No. 05 CF 381

6 STEVEN A. AVERY,

7 DEFENDANT.

8 **DATE:** MARCH 6, 2007

9 **BEFORE:** Hon. Patrick L. Willis
10 Circuit Court Judge

11 **APPEARANCES:** KENNETH R. KRATZ
Special Prosecutor
12 On behalf of the State of Wisconsin.

13 THOMAS J. FALLON
Special Prosecutor
14 On behalf of the State of Wisconsin.

15 NORMAN A. GAHN
Special Prosecutor
16 On behalf of the State of Wisconsin.

17 DEAN A. STRANG
Attorney at Law
18 On behalf of the Defendant.

19 JEROME F. BUTING
Attorney at Law
20 On behalf of the Defendant.

21 STEVEN A. AVERY
Defendant
22 Appeared in person.

1 THE COURT: At this time the Court calls
2 the State of Wisconsin vs. Steven Avery, Case No. 05
3 CF 381. We're here this morning for a continuation
4 of the trial in this matter. We are outside of the
5 presence of the jury at this time. Will the parties
6 state their appearances for the record.

7 ATTORNEY KRATZ: Good morning, Judge, the
8 State appears by Special Prosecutors Ken Kratz, Tom
9 Fallon, and Norm Gahn.

10 ATTORNEY STRANG: And good morning, Steven
11 Avery in person; Jerome Buting and Dean Strang on
12 his behalf.

13 THE COURT: All right. Counsel, I
14 understand that the parties have something to take
15 up outside the presence of the jury.

16 ATTORNEY STRANG: The defense has a brief
17 motion, your Honor, in light of the Court's rulings
18 at the end of the day yesterday. The defense all
19 along has been consistent in contending that there
20 were no reliable tests that can be done that would
21 be useful to the jury on the dried bloodstains in
22 the Toyota, or the blood vial in the Clerk's Office.
23 The Court ruled as it did, yesterday, leaving
24 reliability to the jury and ruling the State's tests
25 performed during this trial otherwise admissible

1 under **Walstad**.

2 That will not allow -- It's no surprise,
3 as we said all along, that will not allow any
4 rebuttal testing or independent testing that
5 might be offered to rebut the State's testing now
6 that the State has chosen to pursue that and the
7 Court has allowed that testing, regardless of
8 it's reliability. So I have a two prong motion
9 to preserve Mr. Avery's rights and options.

10 First, I would like the Court to order
11 that all samples remaining of swabs, or the dried
12 bloodstains themselves in the Toyota RAV4, be
13 preserved indefinitely and not destroyed or
14 damaged, absent further Court order on
15 application by the State with notice to Mr. Avery
16 and whoever his counsel may be.

17 And, as well, that the blood vial from
18 the Clerk's Office be preserved, not damaged or
19 destroyed in any way, absent express further
20 Court order on application by the State with
21 notice to Mr. Avery and counsel, so that we
22 preserve the ability to test, if and when science
23 advances to the point of allowing some reliable
24 testing or just rebuttal testing by the defense.

25 Second, I would like the Court to enter

1 an order now that the defense will have access to
2 the swabs from the Toyota. And when I say swabs
3 from the Toyota, I'm referring both to swabs of
4 the dried bloodstains and the control swabs that
5 were taken for purposes of the FBI testing to
6 which Dr. LeBeau has testified, as well as the
7 dried bloodstains themselves, all the dried
8 bloodstains in the Toyota attributed to
9 Mr. Avery, and the blood vial from the Clerk's
10 Office.

11 I would like the Court to order now
12 that, without further application, the defense
13 may conduct independent testing of any or all of
14 those materials at any time, from today through
15 trial. If there's a conviction, post-conviction,
16 in the appellate process or after the appellate
17 process, I would like the ability to do that
18 testing when it reasonably becomes available to
19 Mr. Avery to do it, as a matter of science and
20 finances, regardless of when that may happen; it
21 won't happen during the trial, so I'm just
22 looking ahead.

23 Of course, if he's acquitted, everyone
24 will lose interest in testing. But if he's
25 convicted of any of the charges, this evidence

1 that the State contends is so material to guilt
2 or innocence, will retain its materiality to
3 guilt or innocence. And I would like the Court
4 to order that Mr. Avery, or his counsel, have
5 access to that, without further order of the
6 Court, for testing, at any time.

7 THE COURT: Who will be speaking for the
8 State?

9 ATTORNEY GAHN: I will, your Honor.

10 THE COURT: Mr. Gahn.

11 ATTORNEY GAHN: I have no objection to
12 anything that Mr. Strang has stated.

13 THE COURT: All right. Just as a practical
14 matter, and I'm testing my memory here a bit, I
15 thought that the samples from the RAV4 were already
16 split, such that in order to enable both parties to
17 conduct testing if they wished.

18 I'm wondering, if the Court is going to
19 issue an order that samples be preserved, I guess
20 rather than leave it that broad, I would like to
21 know where they are now, and perhaps the order
22 should reflect how they should be preserved or
23 where they should be preserved.

24 ATTORNEY GAHN: My understanding is that
25 the samples from the RAV4 that were submitted to

1 EDTA testing, which would have been, A-8, the swab
2 from the dashboard; A-10, the swab from the CD case
3 in Teresa Halbach's car; and, A-12, which was the
4 bloodstain swab from the metal on the rear passenger
5 door entry, that Mr. Buting requested that the FBI
6 preserve one half of each of those samples for
7 independent testing.

8 That has been done. One half of those
9 swabs are preserved. Also, Mr. Buting requested
10 that the controls that were taken also be -- that
11 the FBI only consume one half of those, and that
12 is the case. So one half of the controls are
13 available.

14 As far as the other swabs which were
15 taken by Sherry Culhane, those are in the control
16 now of the Calumet County Sheriff's Department.
17 And those also are available to the defense. And
18 one half of the A-10, A-12, and A-8 have been
19 returned by the FBI and they are in the control
20 of the Calumet County Sheriff's Department.

21 THE COURT: All right. So the
22 understanding is that these items are going to be
23 retained at the Calumet County Sheriff's Department,
24 that's where they are going to be if they are
25 needed?

1 ATTORNEY GAHN: Yes.

2 ATTORNEY STRANG: That's very helpful.
3 What it leaves uncovered, or that we haven't covered
4 here, are the dried bloodstains themselves, as there
5 were stain areas for which swabs were not sent to
6 the FBI, if I understood Mr. LeBeau's testimony
7 correctly, and then the blood vial. And so we just
8 need to know what arm of the State, what agency of
9 the State is preserving all of those.

10 THE COURT: All right. So, Mr. Gahn, when
11 you say swabs, you mean samples taken from these
12 areas.

13 ATTORNEY GAHN: Correct.

14 THE COURT: Was the part of the vehicle
15 with the stain on the dash removed from the vehicle,
16 or is the dash still intact with the vehicle,
17 wherever it is?

18 ATTORNEY GAHN: The dash is still intact
19 with the vehicle, and the vehicle is here on the
20 Calumet County grounds.

21 THE COURT: Is that going to be saved or?

22 ATTORNEY GAHN: Under --

23 THE COURT: Let me ask first, what has the
24 defense requested; are the swabs enough?

25 ATTORNEY STRANG: No, I think the stains

1 have to be preserved. And I suppose the issue,
2 then, is other -- other control areas for testing.
3 So it would be, I guess, useful to know what the
4 plans are with the Toyota.

5 THE COURT: Well, let's do this, there's no
6 dispute between the parties that the swabs should be
7 saved. As far as the details of the Court's order,
8 that could be addressed, if there is a conviction in
9 this case. And perhaps between this time and that
10 time, should the need arise, the parties could
11 discuss whether or not they might come to a joint
12 agreement on how to preserve samples.

13 I mean, the CD case is small enough,
14 that can be preserved. The dash and the door
15 frame, I don't know if the vehicle will be
16 preserved forever, but perhaps the parts could be
17 removed if it would be determined to be
18 necessary. I'm not sure.

19 ATTORNEY GAHN: I think what the Court is
20 suggesting is a prudent course. Let's wait until
21 these proceedings are over, because Wisconsin does
22 have a mandatory preservation statute that would be
23 applicable in this case. And it would make more
24 sense to address this under that statute, after the
25 proceedings are completed.

1 THE COURT: I think any order should
2 probably include, not only the fact that the samples
3 would be preserved, but a bit more specificity as to
4 how they would be preserved. And both parties may
5 want to be heard on that or you may come to an
6 agreement with a joint recommendation to the Court.

7 ATTORNEY STRANG: I'm only in partial
8 agreement with Mr. Gahn. I do want an order now, at
9 least all the control swabs and the swabs of
10 bloodstains be preserved, and the blood vial. And I
11 have not heard yet where the blood vial is, or the
12 remaining part of the blood vial is.

13 ATTORNEY GAHN: The blood vial will be in
14 the control of the Calumet County Sheriff's
15 Department.

16 THE COURT: Is that where it is now?

17 ATTORNEY GAHN: Well, that will also become
18 an exhibit very shortly.

19 THE COURT: Oh.

20 ATTORNEY GAHN: And let me also say that
21 some of the stains that Ms Culhane, from the Crime
22 Lab, tested, those stains and swabs are in the court
23 record here as exhibits.

24 THE COURT: What if we handle it this way,
25 the defense can prepare an order to order that all

1 these items be preserved now. I understand that to
2 be not in dispute with the State. And the order can
3 provide that the manner of preservation will be
4 determined following the conclusion of the trial.
5 Does that work for both parties?

6 ATTORNEY STRANG: Sure, I think so. And
7 we'll have no objection to things like the blood
8 vial and the swabs being withdrawn from evidence for
9 purposes of preservation by the State.

10 THE COURT: All right. Is that sufficient
11 detail for you to prepare a proposed order,
12 Mr. Strang?

13 ATTORNEY STRANG: Yes.

14 THE COURT: Okay. In terms of -- I try to
15 keep an inventory of matters that arise during the
16 trial that have not been resolved. One of those
17 items is the fair testing motion which the defense
18 renewed back on February 27th. If there's time,
19 after the last witness today, I would suggest that
20 the Court hear argument on that today.

21 Mr. Buting gave some argument at the
22 time of the motion. Mr. Gahn requested time to
23 respond. I could hear argument from the State,
24 any rebuttal from Mr. Buting, and, hopefully,
25 resolve that matter today.

1 I also took under advisement, also
2 Mr. Buting's request, to introduce evidence
3 concerning the voice mails and whether or not
4 they were accessed on November 2nd, or that the
5 details of them being accessed. I believe at the
6 time I reserved ruling. The parties were going
7 to conduct some discussions with each other to
8 see if the matter could be resolved or if
9 additional evidence was necessary. What is the
10 status of that motion at this time?

11 ATTORNEY KRATZ: Additional evidence, your
12 Honor, is going to be necessary. Mr. Strang and
13 Mr. Buting have agreed to telephone testimony from a
14 Cingular technician. We anticipate that to be
15 sometime tomorrow, probably tomorrow morning. That
16 will be supplemented with the State recalling Mike
17 Halbach. But that combination of witnesses should
18 resolve that matter. And, again, the defense has
19 been kind enough to allow telephone rather than live
20 testimony in that matter.

21 ATTORNEY STRANG: That's right. And I have
22 also, at least suggested in an email last night to
23 Mr. Fallon -- and I can't remember if I copied
24 Mr. Kratz and Mr. Gahn or not -- but suggested that
25 a stipulation as to one or both of the Cingular

1 witness and Mike Halbach, stipulation as to one or
2 both of those witnesses is conceivable. And at
3 least we could try, at least take a stab at that. I
4 don't know whether either side in the end would
5 stipulate, but it's worth a discussion.

6 If we go forward with testimony and not
7 a stipulation from the Cingular person, we're, of
8 course, working on the assumption that the
9 Cingular person at the other end of the telephone
10 would have the same documents in front of him or
11 her that we have here, so that the person can be
12 questioned about the documents and I'm quite
13 certain that the State shares that.

14 ATTORNEY KRATZ: We actually copied three
15 Court exhibits this morning and faxed them to that
16 person as well.

17 ATTORNEY STRANG: Great.

18 ATTORNEY KRATZ: So we're working all from
19 the same pages, Judge.

20 THE COURT: Very well.

21 ATTORNEY STRANG: And the remaining --
22 While the Court is taking inventory, the remaining
23 issue of which I'm aware was my renewed motion to
24 suppress the results of searches of the Avery
25 trailer and the garage and the area behind the

1 garage. I think we settled on after the November 5
2 search that began at about 7:30 p.m. and ended about
3 10:05 p.m.

4 I had renewed that, oh, several days
5 ago. I think the State, again, reserved response
6 for wanting to be heard on that. And that's my
7 recollection of the issue that remains ripe for
8 decision, or at least further argument and
9 decision.

10 ATTORNEY FALLON: I was under the
11 impression that we did argue it and the Court
12 decided you would rule later, after hearing the
13 argument that Mr. Strang and I made last week.

14 ATTORNEY STRANG: Well, actually, that's --
15 that is right, because now that I hear Mr. Fallon, I
16 recall his eloquence in responding. And the Court
17 at the time I think, if memory serves, said it would
18 not hear reply from me now or at that point, but we
19 would address the issue in some fashion later.

20 THE COURT: All right. I will -- do the
21 parties remember what day that was? I would like --
22 I'm going to review the transcript.

23 ATTORNEY STRANG: It may have been
24 February 22, but I can't promise.

25 ATTORNEY FALLON: I would have to look at a

1 calendar.

2 THE COURT: I do recall that as well.

3 ATTORNEY FALLON: I'm trying to remember
4 who the witness was, right before a particular
5 witness. Right now, for the life of me, I can't
6 think of that.

7 THE COURT: All right. Well, we'll attempt
8 to recreate that a bit later. Are the parties ready
9 for the jury to come in?

10 ATTORNEY STRANG: Yes.

11 ATTORNEY KRATZ: Yes.

12 THE COURT: All right. We'll bring in the
13 jurors at this time.

14 (Jury present.)

15 THE COURT: You may be seated. Welcome
16 back members of the jury. At this time we are ready
17 to proceed with the testimony. Who will be
18 questioning? Mr. Fallon, you may call your first
19 witness.

20 ATTORNEY FALLON: Thank you. The State
21 would call Lynn Zigmunt to the stand.

22 THE CLERK: Please raise your right hand.

23 **LYNN ZIGMUNT**, called as a witness
24 herein, having been first duly sworn, was
25 examined and testified as follows:

1 THE CLERK: Please be seated. Please state
2 your name and spell your last name for the record.

3 THE WITNESS: Lynn Zigmunt, Z-i-g-m-u-n-t.

4 **DIRECT EXAMINATION**

5 BY ATTORNEY FALLON:

6 Q. How are you employed?

7 A. I'm the Clerk of Court for Manitowoc County.

8 Q. And how long have you been the Clerk of Court for
9 Manitowoc County?

10 A. Since January of 2005.

11 Q. Tell us, if you would, what are the duties of the
12 Clerk of the Circuit Court for Manitowoc County?

13 A. I administer the Clerk of Court Office, oversee
14 the staff to ensure that there is appropriate
15 coverage for all court proceedings, record
16 keeping, oversee all the record keeping in the
17 office. Create policies for the record keeping
18 and oversee the budget for our office.

19 Q. What kinds of records does the Clerk of Court's
20 maintain?

21 A. All the records for the three circuit courts. So
22 any of the case files that are started, any of
23 the filings that are made within the files,
24 correspondence, pleadings, and exhibits that
25 would be filed with the court as a result of a

1 trial or hearing.

2 Q. And does that include maintaining files and
3 exhibits from files from cases in the past?

4 A. Yes.

5 Q. In your capacity as Clerk of the Circuit Court
6 for Manitowoc County, are you familiar with a
7 case entitled State of Wisconsin vs. Steven A.
8 Avery, Case No. 85 FE 118?

9 A. Yes.

10 Q. And how are you familiar with that particular
11 case file?

12 A. I guess from the large interest of the media in
13 that case after Mr. Avery was exonerated in 2003.
14 We maintain the file in our office so, when there
15 are public requests to view the file, we provide
16 it for inspection. And that file was in our
17 office for said purposes.

18 Q. All right. Now, in your capacity as the Clerk of
19 Circuit Court, do you supervise the other clerks
20 which are employed in that office?

21 A. Yes.

22 Q. And as the Clerk of the Circuit Court are you
23 generally familiar with their duties and
24 responsibilities?

25 A. Yes.

1 Q. And in terms of your familiarity with the 1985
2 case, can you tell us, based upon your
3 understanding, of where that file had been kept
4 while in the custody of the Clerk of the Circuit
5 Court?

6 A. From the time I took office, the file was
7 maintained in a large like rectangular shaped
8 cardboard box. And it was in our inner office,
9 in a central location, meaning on top of a filing
10 cabinet. And the reason that it was there, I
11 think it was brought up after Mr. Avery was
12 exonerated in 2003, after there was a high
13 interest by the media to look through the file.
14 It was a very big and cumbersome box to have to
15 bring up from the basement where it was normally
16 stored before, in a lower level filing area.

17 Q. I'm going to have some exhibits shown to you, if
18 I may, beginning with a series of exhibits marked
19 452. Let opposing counsel examine them for a
20 moment or two. While counsel is examining the
21 exhibits, were you asked to bring certified
22 copies of certain documents from case file 85 FE
23 118?

24 A. Yes, I was.

25 Q. And were you able to obtain copies of the

1 requested documents?

2 A. Yes.

3 Q. And you have received the documents?

4 A. I have received them? Oh, right now.

5 Q. The exhibits.

6 A. Yes.

7 Q. Okay. If you would, directing your attention to
8 Exhibit 452, I believe it is, can you tell us
9 what that is.

10 A. It's a stipulation filed in the case of State vs.
11 Steven Avery, Case No. 85 FE 118. I think -- I
12 believe it was a stipulation signed by District
13 Attorney E. James FitzGerald and Mr. Avery's then
14 attorney, Robert Henak. I believe they entered
15 into a stipulation regarding providing a DNA
16 sample.

17 Q. All right. And with respect to the last page of
18 that document, is there any marking or seal from
19 the Clerk of the Circuit Court which is affixed
20 thereto?

21 A. Yes.

22 Q. Tell us what that is.

23 A. It's a seal stating that this is a full certified
24 copy of the original, which is on file in the
25 Office of Clerk of Circuit Court in Manitowoc

1 County, and signed by me and dated 3/5/07.

2 Q. All right. And what is Exhibit 453?

3 A. An order in the case State vs. Steven A. Avery 85
4 FE 118. And it's in conjunction with the
5 stipulation wherein the Court ordered that
6 Mr. Avery submit to a DNA sample. It's dated
7 November 29th, 1995.

8 Q. Similarly, is there a certification affixed to
9 that document?

10 A. Yes, there is.

11 Q. And whose certification is it?

12 A. My certification dated 3/5/07.

13 Q. All right. And what is Exhibit 454?

14 A. A letter dated December 6, 1995, from Attorney
15 Robert R. Henak addressed to the Clerk of Circuit
16 Court for Manitowoc County, addressed to Ms
17 Wilda, our criminal clerk, just confirming a
18 telephone conversation where a request was made
19 for a conformed copy of Judge Hazlewood's order
20 to be sent to Elaine Wheeler, Health Service Unit
21 Manager with Fox Lake Correctional Facility.

22 Q. All right. And Exhibit 455?

23 A. A letter dated December 12th, 1995, from Shirley
24 Wilda, Deputy Clerk with the Clerk of Court
25 Office for Manitowoc County addressed to Elaine

1 Wheeler, Health Service Unit Manager with Fox
2 Lake Correctional Facility, enclosing a certified
3 copy of the stipulation and order regarding the
4 DNA sample ordered by Judge Hazlewood.

5 Q. Do the documents to this point indicate the
6 nature of the sample to be submitted for DNA
7 analysis?

8 A. What do you mean by the nature of the sample?

9 Q. Does it say -- specify the form of which the DNA
10 sample would be obtained?

11 A. Enclosed please find a certified copy of the
12 stipulation and order in the above referenced
13 referred to case, which orders that a Health
14 Services Unit at Fox Lake Correctional
15 Institution obtain a DNA sample from the
16 defendant as requested by a Laboratory
17 Corporation of America and forward that sample,
18 as directed, to Laboratory Corporation of
19 America.

20 Q. All right. What is Exhibit 456?

21 A. A letter dated December 12th, 1995, from Shirley
22 Wilda of the Manitowoc County Clerk of Court
23 Office to Attorney Robert R. Henak, enclosing a
24 copy of the stipulation and order which was filed
25 in the above matter. And just confirming that on

1 this date a certified copy of the stipulation and
2 order was mailed to Elaine Wheeler, Health
3 Service Unit Manager at Fox Lake Correctional
4 Facility, per his request.

5 Q. And what's the next -- is there one more or two?

6 A. One more.

7 Q. The last one?

8 A. Exhibit 457, it is -- it's not dated, it's got a
9 file date where it was received in our office,
10 filed June 6, 1996. It is from Lab Corp
11 Molecular Biology and Pathology, addressed to
12 whom it may concern: Enclosing -- Enclosed you
13 will find evidence that your agency submitted to
14 the Forensic Identity Unit at Roche Biomedical
15 Laboratories for analysis. And then in
16 parenthesis, RBL Case No. F95-624. Please
17 reference your agency file, Wisconsin vs. Avery.
18 So it must be -- looks like it's a return of the
19 evidence which was submitted through a DNA
20 sample. I would think returning it to our
21 office.

22 Q. All right. Now, the 454, 455, 456, and 457,
23 those exhibits, do they all have certifications
24 affixed to them?

25 A. Yes, they do.

1 Q. All right. And you are the one who certified --

2 A. I certified --

3 Q. -- those documents?

4 A. -- them and they are all dated 3/5/07.

5 Q. Okay. And so that they are official copies of
6 the records which are maintained in Manitowoc
7 County Circuit Court file 85 FE 118?

8 A. Yes, they are.

9 Q. All right. I would like to show you -- I would
10 like to show you some photographs now, if we may.
11 If you would examine, your attention is directed
12 to Exhibit 464?

13 A. Okay.

14 Q. All right. And do you recognize that?

15 A. Yes.

16 Q. And what is Exhibit 464, please?

17 A. It's a photograph of the two plastic tote storage
18 cases where the case of State vs. Steven Avery,
19 Case No. 85 FE 118 was stored in my office.

20 Q. All right. If I may publish that now. Thank
21 you. Is this a copy of Exhibit 464?

22 A. Yes.

23 Q. It's being displayed on the screen?

24 A. Yes.

25 Q. All right. Tell us, specifically, what is

1 Exhibit 464, what are we looking at here?

2 A. That is the entire case file of the 85 FE 118
3 case for Steven Avery. The case contains the
4 case file, the paper part of the case file, as
5 well as all the exhibits that were presented in
6 that file.

7 Q. What is the location of that particular exhibit?
8 In other words --

9 A. Of the storage cases?

10 Q. Yes, where are those -- Where was that picture
11 taken?

12 A. In my office.

13 Q. All right. And I believe earlier you talked
14 about the file originally having been contained
15 in some cardboard boxes?

16 A. Right, it was in one large rectangular shaped
17 cardboard box, which was very cumbersome to move
18 and carry. It was quite heavy with all the
19 exhibits in one box.

20 Q. When did the file find it's way into the plastic
21 containers which are depicted in Exhibit 464?

22 A. I had originally thought, like the end of 2005,
23 possibly the beginning of 2006. And I had made a
24 call to my assistant to confirm the exact --
25 because I bought those storage totes out of -- I

1 was reimbursed out of our petty cash, so she
2 could track down the exact date. And she did
3 call and confirm that it was July of '06 when the
4 purchase was made.

5 Q. Okay.

6 A. So that's when it actually got transferred from
7 that box to these storage totes.

8 Q. And where was the cardboard box before that?

9 A. When it was in our office?

10 Q. Yes.

11 A. It was -- when you walk into the secured area,
12 like, the secured door to our office, it would
13 be, like, straight ahead against the west wall of
14 our office, in kind of like a general walkway.
15 It was -- Our office is kind of partitioned off
16 into sections and that's kind of like a -- just
17 an open like walkway.

18 There's a desk on one side where
19 sometimes when people, like attorneys, want to
20 come in and review a file or something, we would
21 let them do it on the desk that's in that area.
22 And where this file was was just a little further
23 past that desk, right in front of like the
24 windows on the side of the building there.

25 Q. All right. What is the next exhibit you have in

1 front of you?

2 A. 447.

3 Q. 447?

4 A. And that is a picture of the entrance door to our
5 inner office.

6 Q. All right. 447 is now displayed on the screen.
7 Could you describe for us what we are looking at
8 here with respect to that?

9 A. Well, there's a key code pad that's above the
10 latch and that's -- there's an access code that
11 our staff and -- I think it's just court
12 personnel pretty much that has that access code
13 and you need that code to gain entrance into the
14 inside of our office.

15 Q. So if -- there's a counter I see to the immediate
16 right of the door, under what appears to be a
17 doorbell, what is that counter for?

18 A. The counter is -- that's part of -- like in our
19 lobby area, there's a counter that surrounds our
20 -- the area where we wait on people over the
21 counter. It's kind of an L-shaped area, that's
22 the short part of the L-shape.

23 Q. Would it be fair to say that's where the general
24 public comes to do business in the Clerk of
25 Court's Office?

1 A. Yes.

2 Q. What are the hours of the Clerk of Court's office
3 in Manitowoc County?

4 A. On Mondays, 8:30 to 5 and Tuesday through Friday,
5 8:30 to 4:30.

6 Q. What is the next exhibit that you are holding,
7 please?

8 A. Exhibit 448.

9 Q. And tell us what is Exhibit 448?

10 A. It is a package, Airborne Express Package. And
11 it was an exhibit and I believe it's the exhibit
12 that contained the box, the blood vial container.

13 Q. All right. If we could pull this up. Exhibit
14 448 is now being displayed on the screen. Is
15 that the package that the Clerk's Office received
16 from the testing entity, Lab Corp of America?

17 A. Yes, that's what it appears to be.

18 Q. All right. And what is the next exhibit?

19 A. Exhibit 449. It looks like it's the label that
20 is on that shipping package, telling what is
21 enclosed as the exhibit. It says enclosed
22 evidence return from Forensic Identity Unit at
23 Roche Biomedical Laboratory that has been
24 submitted for analysis. Do you want me to read
25 the whole thing?

1 Q. No, I think we have it here. What is being
2 depicted on the screen here as exhibit -- is that
3 449 that you are holding in your hand?

4 A. Yes.

5 Q. That is the labeling of the package in 448?

6 A. Right.

7 Q. All right. And next exhibit, please.

8 A. Exhibit 450. And this appears to be probably the
9 backside of the square container that held the
10 blood vial.

11 Q. All right.

12 A. The styrofoam container. It has markings on,
13 looks like the date it was opened and it was
14 initialed by the people that were present and
15 witnessed the opening.

16 Q. Very well. And this box was contained within
17 Exhibit 448?

18 A. Correct.

19 Q. Exhibit 451?

20 A. 451 is just the other side of the styrofoam
21 container that held the blood vial. It shows the
22 taped end, where the evidence tape had been and
23 where it was opened.

24 Q. All right. So Exhibits, I think we began with
25 464, and then we went 447 through 451. Are those

1 exhibits, based upon your knowledge and your
2 responsibilities as a Clerk of the Circuit Court,
3 officially part of the record in the case of
4 State of Wisconsin vs. Steven Avery, 85 FE 118?

5 A. Yes.

6 Q. Your best recollection, Ms Zigmunt, when did the
7 file take up residence, as it were, in your
8 private office?

9 A. Probably my best guess would be this July of '06
10 when the storage -- those plastic storage tote
11 containers were purchased.

12 Q. All right. And what was the general procedure
13 for allowing access to this particular file by
14 members of the general public?

15 A. We have a sign in logbook that anybody who wants
16 to view a public and open record, they sign in
17 it, that would include the date, the case number,
18 their signature. And if their signature would be
19 illegible, we have them print their signature,
20 print their name.

21 Q. And when did that logbook get created?

22 A. I started that in April of 2005. Before that
23 there was nothing in effect at all to document
24 when files were being reviewed.

25 Q. And who would -- First of all, before we get to

1 that point, let me ask, why did you decide to
2 create such a log?

3 A. I just thought it was important. And going to
4 the Clerk's meetings, being a new Clerk of Court,
5 I gained a lot of information at all the
6 different conferences that we have -- that I have
7 gone to. And that was one of the things that we
8 had discussed.

9 And, well, and one of the other reasons
10 I thought would be a good idea to have a record
11 like this was because with identity theft being
12 such a big issue, I thought if we had some kind
13 of tracking device, if there was ever a case of
14 identity theft, we would have something to kind
15 of go back and at least see who was accessing
16 certain files.

17 Q. All right. And who would be required to sign
18 such a log?

19 A. In the beginning, I think I had originally wanted
20 the policy to include everyone; the public, and
21 attorneys, and anybody who accessed any file.
22 But some of the staff thought, you know, maybe
23 some of the attorneys that come, if they knew who
24 they are, they thought maybe we didn't have to
25 get their signature.

1 Or like for title insurance companies
2 too, because when they came in to look at files
3 too, there would be such a long list. We let it
4 kind of go a little lax on it in the beginning.
5 But I'm not sure exactly what the trigger date
6 was, but probably a few months into it, maybe by
7 October of that year for sure, that we got more
8 strict and wanted it to be inclusive of
9 everybody, every single person who viewed any
10 file.

11 Because I just thought we need a
12 consistent practice. I don't think we can
13 require one person and not another. You know, if
14 we're doing it for a purpose, it's got to be
15 straight forward or it's not serving the purpose.

16 Q. So your best recollection is is that by October
17 of 2005 anyone who was looking at a particular
18 file would be required to sign in?

19 A. Right.

20 Q. All right. And that include -- attorneys and
21 everyone, I take it?

22 A. Right. It was supposed to include everyone.

23 Q. Okay. I believe you have now been presented
24 Exhibit 45 -- or 467, is it?

25 A. Yes.

1 Q. All right. And can you tell us what Exhibit 467
2 is?

3 A. It looks like it's a book called -- entitled
4 Evidence Room Case Entry Log.

5 Q. All right.

6 A. And it says evidence room and then at the top it
7 says journal so must be some...

8 Q. And is that the case entry log that people would
9 be required to sign into?

10 A. No.

11 Q. What is that?

12 A. I have never --

13 Q. What is that particular?

14 A. I have never seen this before, this must be...

15 Q. All right. Do we have a picture of -- is there a
16 picture of your particular log?

17 A. Here, no.

18 Q. Okay. All right. I just wanted to make sure
19 that we're clear on what that is. Thank you.
20 All right. I would like to direct your attention
21 to the time frame 2005, particularly that year,
22 and begin with this question. Do you know an
23 individual by the name of Andrew Colborn?

24 A. Yes, I do.

25 Q. And who is he?

1 A. He's, I believe, a sergeant with the Manitowoc
2 County Sheriff's Department.

3 Q. And did you recall, or do you recall, ever seeing
4 Sergeant Colborn in the Clerk of Court's Office
5 during the year 2005, your first year in office?

6 A. No, I don't think I have ever really seen him
7 ever in -- especially in the inner part of our
8 office, ever.

9 Q. All right. Are you familiar with an individual
10 by the name of James Lenk?

11 A. Yes, I am.

12 Q. And who is James Lenk, that you know?

13 A. I believe he's a lieutenant with the Manitowoc
14 County Sheriff's Department.

15 Q. And, again, with respect to the year 2005, your
16 first year in office, do you recall ever seeing
17 Lieutenant Lenk in your office that year?

18 A. There was one occasion, in the very beginning of
19 my term, I had contacted the Sheriff's Department
20 regarding questions I had on evidence storage.
21 Because we have a safe that's in my office, where
22 we do maintain various kinds of evidence.
23 There's some drugs and I'm not sure, I think
24 there might be a weapon in there.

25 And going -- after one of the

1 conferences that I had attended, this was an item
2 of discussion regarding maintaining custody of
3 those types of evidence in our possession. And
4 it was suggested that any time those types of
5 evidence came into play that they should be
6 stored at, like a Sheriff's Department or other
7 issuing agency where there's more -- a more
8 secure facility.

9 And I had called Mr. Lenk, or he was the
10 person I was put in touch with because he must
11 take care of evidence and things over at the
12 Sheriff's Department. And he had come over to
13 see what was at issue. We discussed it and we
14 discussed a procedure. And I'm working -- I
15 mean, I have been working on a policy and
16 procedure for our evidence retention and we
17 discussed how we were going to handle
18 transferring that to the Manitowoc County
19 Sheriff's Department.

20 Q. And approximately when did that discussion occur?

21 A. I would say it was early spring. It was
22 probably, you know, very early into that year.
23 So for sure, maybe March or April. I don't think
24 I have anything that really actually documents
25 exactly the date, but it was pretty early in the

1 year.

2 Q. Other than that one occasion where you had some
3 discussions about the evidence storage policies,
4 other than that, had you ever seen him in the
5 inner office area of the Clerk of Courts?

6 A. Never. I don't think -- Besides that one
7 incident, I don't think he's ever been inside of
8 our office.

9 ATTORNEY BUTING: Objection to that form of
10 that answer, if she's never seen him inside the
11 office, she can't say he's never been in the office.

12 ATTORNEY FALLON: That's for
13 cross-examination. She answered the question as
14 best she could.

15 THE COURT: Well, I'm going to sustain the
16 objection, because of lack of foundation, for the
17 opinion about when she was not in the office.

18 ATTORNEY FALLON: That's fine. One minute.
19 Your Honor, we will pass the witness for
20 cross-examination; however, we would move into
21 evidence Exhibits 452 through 457, as well as
22 Exhibit 464 and 447 through 451.

23 THE COURT: All right. I take it that
24 excludes the item that the witness could not
25 identify that was on the screen.

1 ATTORNEY FALLON: That's right.

2 THE COURT: But all other exhibits that she
3 testified to, you are asking to be admitted?

4 ATTORNEY FALLON: Yes.

5 THE COURT: Mr. Buting.

6 ATTORNEY BUTING: No objection to those,
7 452 is the only one that's not --

8 ATTORNEY FALLON: 467 is not offered.

9 ATTORNEY BUTING: 467, I'm sorry.

10 THE COURT: All right. Then all the items
11 this witness testified to, other than 467, I
12 understand to be offered and if no objection, they
13 are admitted. Mr. Buting, will you be doing the
14 cross?

15 ATTORNEY BUTING: Yes, I will, Judge.
16 Thank you.

17 **CROSS-EXAMINATION**

18 BY ATTORNEY BUTING:

19 Q. Good morning, Ms Zigmunt.

20 A. Good morning.

21 Q. The -- You became the clerk, elected clerk, in
22 January of '05, is when you took office?

23 A. Yes.

24 Q. So about 10, 11 months before the Teresa Halbach
25 disappearance?

1 A. Correct.

2 Q. Correct. Okay. And would it be fair to state
3 that when you first took office, part of your
4 time was getting used to what the security
5 procedures were and were not --

6 A. That's correct.

7 Q. -- in existence. And you had some concerns that
8 maybe some of the security and some of the
9 procedures were a little bit -- I don't know if
10 lax is the right word -- but not as secure as you
11 would ultimately wish they would be -- them to
12 be, right?

13 A. I think that's a pretty good assumption.

14 Q. Okay. Did you bring the log, evidence log, with
15 you, or the case review log with you?

16 A. No, I didn't.

17 Q. Have you reviewed it before today?

18 A. In detail you mean, or I mean, I guess I haven't
19 paged through and looked, for any reason.

20 Q. Okay. Well, for instance, do you know that every
21 person who has come to that office since October
22 of 2005 and asked to look at any file, has
23 absolutely, positively, been required to sign in
24 on a log?

25 A. Since October of 2005, you are saying?

1 Q. Yes.

2 A. That was the directive I had given and I don't
3 know that it was completely being followed. I
4 think --

5 Q. Okay.

6 A. -- you know, there were people that were making
7 exceptions for people, but we have tightened up
8 on that --

9 Q. Sure.

10 A. -- to make it ...

11 Q. And as of -- Really, you tightened up as of
12 August of '06 is when you really made sure that
13 everybody, all the staff required that people
14 sign in?

15 A. I don't have an exact date, I didn't document it
16 for any reason, so I guess I can't say with
17 certainty.

18 Q. But would it be fair to say that until -- or
19 around that time July or August of '06, until
20 that time you would -- or I should say at that
21 time, you became concerned after talking to some
22 of the staff, that maybe some people weren't
23 requiring everybody to sign in and that this was
24 mandatory at this point forward?

25 A. Yes, I think my concern was, too, that they were

1 allowing like attorneys who -- if they knew them
2 personally, or like I said, the title insurance
3 companies, things like that, those are pretty --
4 the ones that were allowed not to sign, but I
5 wanted to make it consistent for everyone to have
6 to sign.

7 Q. Okay. Now, you were first interviewed by law
8 enforcement officers in this case at the end of
9 December or early January of this -- just a
10 couple months ago, right?

11 A. I don't know exactly the dates.

12 Q. Well, were you -- did you ever speak to Agent
13 Fassbender or Mr. Wiegert?

14 A. Right, they were in on several occasions.

15 Q. And that was all in the last couple of months or
16 so?

17 A. Yeah, pretty much.

18 Q. So no law enforcement officer came to you in
19 November of 2005 and said, you know, Mr. Avery
20 has been telling everybody that if that blood --
21 if his blood is found inside Teresa Halbach's
22 vehicle, it must have been planted. Nobody came
23 to you and talked to you about that particular
24 statement, did they?

25 A. No.

1 Q. And between November of 2005 and this past summer
2 of 2006, none of the law enforcement officers
3 came to look at Mr. Avery's 1985 file, none of
4 the investigating law enforcement officers in
5 this case, right?

6 A. I can't say that for certainty. I mean, other
7 people wait on people when they are looking --

8 Q. Okay.

9 A. -- at the file, so.

10 Q. So it's possible that somebody from Manitowoc
11 Sheriff's Department even, may have, after
12 Mr. Avery made the public statements that
13 somebody is framing me, somebody has planted my
14 blood, it's possible that somebody from Manitowoc
15 may have come and looked at his file, to see if
16 there was any blood in it?

17 ATTORNEY FALLON: Objection, two grounds,
18 speculation, and more importantly, it seems to me we
19 have a limited focus of who may have come and looked
20 from Manitowoc County?

21 ATTORNEY BUTING: I'm talking about the
22 investigation, after the disappearance.

23 ATTORNEY FALLON: Then I say relevance.

24 THE COURT: What is the relevance
25 Mr. Buting?

1 ATTORNEY BUTING: Let me lay some more
2 foundation questions.

3 THE COURT: Go ahead.

4 ATTORNEY BUTING: Let's do it that way.

5 Q. (By Attorney Buting)~ Let me go back a little bit
6 first. As of October of 2005, the 1985 case
7 against Mr. Avery that was in your office was a
8 closed file, right?

9 A. Yes.

10 Q. In fact, it had been not only a closed file, but
11 it was a dismissed closed file, right?

12 A. Yes.

13 Q. So there were no ongoing post-conviction
14 proceedings, right?

15 A. Not that I'm aware of.

16 Q. Or appellate proceedings, right?

17 A. I mean, I guess I can't really testify to that.
18 I wasn't really that familiar with the file at
19 that time, so I guess...

20 Q. Okay. You weren't that familiar with the file.
21 But you do know that the media was asking and
22 other, you know, freelance writers, or general
23 public was asking about this file quite a bit?

24 A. Yes.

25 Q. And --

1 ATTORNEY BUTING: Let me mark a couple of
2 exhibits here.

3 (Exhibit No. 468 & 469 marked for identification.)

4 Q. (By Attorney Buting)~ Would it be fair to say
5 that until it was discovered publicly that there
6 was a vial of Mr. Avery's blood in that case
7 file, you weren't aware of it?

8 A. That's correct.

9 Q. And you didn't have any particular concern about
10 the security of that file because you didn't know
11 there was a blood vial in it, for instance,
12 right?

13 A. You mean to take any extra security on it?

14 Q. Right.

15 A. Correct.

16 Q. Okay. And if anything, because there were so
17 many requests to see this file, this file was
18 really kept in a less secure spot within the
19 Clerk's Office than other old case files would
20 be?

21 A. In my office, less secure?

22 Q. No, the Clerk's Office, not your office.

23 A. Not real -- I don't know. I mean, I don't know
24 that it's any less secure; it's a pretty secure
25 -- it's not just open to the general public.

1 Q. Sure.

2 A. There are very few people who have access.

3 Q. But you mentioned how it was cumbersome to have
4 to move this big box up and down the stairs,
5 right?

6 A. Correct.

7 Q. Normally you have -- is there a vault downstairs
8 or just a room?

9 A. Just a room. It's in the basement.

10 Q. Okay. You have a storage room in the basement
11 where your old files are kept?

12 A. Correct.

13 Q. And Mr. Avery's file, being a 1985 file, would be
14 normally down there in that sort of archive area?

15 A. Correct.

16 Q. But for the fact that once he was exonerated,
17 there were so many demands for it, that you left
18 it upstairs in the main area, right?

19 A. Correct. And, actually, I'm not the one that
20 brought it up originally, because I wasn't in
21 office at that time.

22 Q. Okay. So it was actually upstairs before you
23 even came into office?

24 A. Correct, for probably two years.

25 ATTORNEY FALLON: Counsel, can we see those

1 exhibits?

2 ATTORNEY BUTING: Okay. I'm sorry.

3 Q. (By Attorney Buting)~ I'm showing you Exhibit 468
4 and 469. See if you can identify, first, 468?

5 A. Yes, this was the original cardboard box that the
6 file was maintained in.

7 Q. The file being the Steven Avery file?

8 A. Correct.

9 Q. 1985 file?

10 A. Right.

11 Q. And the one next to it is?

12 A. The same file.

13 Q. Same file from a little bit farther back, right?

14 A. Right.

15 Q. So, it was one of your deputy clerks -- I'm
16 sorry. One of these -- Well, let's publish this
17 so we can talk about it for a minute. This is a
18 picture that shows the file in the Clerk's
19 Office, this is No. 469?

20 A. Correct. It was put on the desk that was used
21 for the viewing area, like when attorneys would
22 come in and view files.

23 Q. Okay. And you mentioned that it was stored kind
24 of on a filing cabinet next to a window?

25 A. Right. Which is kind of behind where that

1 divider is.

2 Q. Let me point to it. Right here, it's right back
3 there, right?

4 A. Yeah.

5 Q. Just over the shoulder of one of your deputies
6 right?

7 A. Correct.

8 Q. And over here is an old vault, like an actual
9 safe with a whole door?

10 A. Right.

11 THE COURT: We're going to take a break at
12 this time. Let's -- We'll resume at 10:15.

13 (Juror needs a break.)

14 (Jury not present.)

15 THE COURT: You may be seated. And we'll
16 resume at 10:15.

17 (Recess taken.)

18 (Jury present.)

19 THE COURT: And, Mr. Buting, you may resume
20 your cross-examination.

21 ATTORNEY BUTING: Thank you, Judge.

22 **CROSS-EXAMINATION, CONTD.**

23 Q. (By Attorney Buting)~ Ms Zigmunt, I found a
24 digital version of what we were looking at
25 before. I'm going to use that so it will be

1 easier to see, okay?

2 A. Okay.

3 Q. Now, I put up Exhibit 469. And the vault that we
4 were talking about, that's the vault door right
5 there, isn't it?

6 A. Yes.

7 Q. I can't read that, it says something safe
8 company. It's very old, hundred years old
9 probably, put in when the building was first
10 built, right?

11 A. I would believe so.

12 Q. But it's not something that you use as a locked
13 location any more?

14 A. No.

15 Q. Wasn't used that way long before you came here,
16 right?

17 A. Correct.

18 Q. Okay. And then over on the other side of Janet's
19 left shoulder is the window that you were
20 referring to where that box was normally kept,
21 until somebody would ask to look at it, right?

22 A. Right.

23 Q. There's a filing cabinet right there, heater,
24 things of that nature?

25 A. Right.

1 Q. Now, the box is -- That is the cardboard box the
2 way it looked until you had it put into plastic
3 tubs sometime in, you think, July, right?

4 A. July of 2006, right.

5 Q. Okay. Well, after this photograph was taken any
6 way, right?

7 A. Right.

8 Q. Okay. Is that the table that you are referring
9 to, there's like a desk or a table that it can be
10 put on when someone asks to see it, if they can
11 go through?

12 A. Correct. That is where they originally used to
13 look at files. I mean, and that one, too, but
14 just with that file being so cumbersome and so
15 many exhibits involved, there's really not a
16 place to spread it out. And it just wasn't a
17 real good location. There's a lot of traffic
18 through that area, from the back room, off into
19 the section where you see the other clerk sitting
20 there. People traveling back and forth all the
21 time, it just didn't seem a real secure place
22 for -- with all the exhibits and all that paper
23 out.

24 Q. Sure. And the file actually has the exhibits in
25 it as well as the paper documents, right?

1 A. Correct. All the exhibits are underneath all of
2 it. I think all the paper was pretty much at the
3 top.

4 Q. Right. And this one has -- this particular file
5 has things like clothing, and whatever was
6 introduced as exhibits just kind of like what we
7 have in this case today?

8 A. Correct.

9 Q. But I want to draw your attention to -- there's a
10 partition right here on the far right side of the
11 picture, right? Some, like, notices posted?

12 A. Right behind the box.

13 Q. Right behind the box, yeah. And so the way it's
14 set -- it's not a partition that goes all the way
15 to the ceiling, but it's not the same height as
16 that -- the partition in the background there?

17 A. Correct.

18 Q. They're all -- There's a number of partitions
19 like that in the Clerk's Office, within the
20 interior part of the Clerk's Office?

21 A. Yes.

22 Q. And so when one is standing there like Janet is,
23 by this box, the people on the other side of the
24 partition don't see the box?

25 A. Correct.

1 Q. And other than this one woman in the background
2 here with the long blond hair, there is no other
3 clerk desk in that back area.

4 A. Correct.

5 Q. So I don't have a schematic of the layout, but
6 the way this works is, this is sort of a narrow
7 hallway that leads to this area right from one of
8 doors that goes to the public area, right?

9 A. Right.

10 Q. And, then, behind the partition, over here is
11 where the main area where all the clerks work?

12 A. Right. There's like a separate area over there.
13 There's I think five including the one with the
14 blonde hair, you know, different work stations
15 that are set up.

16 Q. Okay. So if the clerk who works in that
17 particular workstation is not sitting there right
18 then, when someone is going through this file,
19 you could go through this file without the rest
20 of the clerks directly seeing you moving around
21 things in the box, right?

22 A. Correct.

23 Q. And your deputy clerks, like both of the
24 individuals in this picture, have a lot of
25 duties, they move to and fro during the day,

1 right?

2 A. Correct.

3 Q. So the woman in the back, I suppose we could give
4 her a name, but the woman in the background of
5 this photo is not sitting in that chair all day
6 long while she works?

7 A. Correct.

8 Q. Okay. Now, the cardboard box that we were
9 looking at, Exhibit 468, has the pleadings and
10 the docket minutes, at least in this instance
11 they are sitting right on top, right?

12 A. Right.

13 Q. So it wouldn't be very difficult for someone to
14 know that this particular file or box is the
15 Steven Avery case, would it?

16 A. I guess if you looked at it, I mean, you would
17 have to -- in that condition of the box that one
18 day, I mean, and when people go through it, it
19 doesn't necessarily end up back in that same
20 condition. And I think when it was kept over on
21 the side filing cabinet, I tried to level things
22 out to, so the cover -- the flaps could come
23 over, because I didn't think that was a very
24 secure ...

25 Q. Sure. But there is that -- see that foam board

1 exhibit in the background?

2 A. Right. And that would probably stick out no
3 matter where --

4 Q. Yes.

5 A. -- because it was too big for the box.

6 Q. So the box wouldn't close?

7 A. Right.

8 Q. Okay. No matter what you did. All right. Now,
9 would it be fair to say that the presence of
10 sheriffs deputies inside the interior part of
11 that Clerk's Office, it's not that unusual an
12 event, right? In the normal course of your
13 business?

14 A. To have sheriffs deputies in our office?

15 ATTORNEY FALLON: Objection, relevance as
16 asked.

17 ATTORNEY BUTING: Well, it's entirely
18 relevant.

19 THE COURT: What is the objection?

20 ATTORNEY FALLON: Relevance as to the
21 phrasing of that particular question, vis-a-vis the
22 pre-trial court rules.

23 THE COURT: Well, it could be laid as a
24 foundational question, so I will allow it for that
25 purpose.

1 ATTORNEY BUTING: Thank you.

2 Q. (By Attorney Buting)~ Do you understand my
3 question?

4 A. If you would like to just repeat it.

5 Q. Sure. Okay. You know that door that you showed
6 us, the photograph that has the little, you know,
7 lock combination?

8 A. Yes.

9 Q. When you go through that door, you go into the
10 inner office of the Clerk's Office, right?

11 A. Yes.

12 Q. And in that area, it's not unusual to see
13 sheriffs deputies during the normal course of
14 business, is it?

15 A. The only sheriffs deputies that would be normally
16 in our office would be probably the sheriffs
17 bailiffs that are posted in the courthouse for
18 security reasons. And they --

19 Q. Right.

20 A. -- go occasionally.

21 Q. In fact, they are in there every day picking up
22 files or returning files from court, right?

23 A. Yeah, they are in there frequently.

24 Q. Okay. And, similarly, drug unit -- officers who
25 are assigned to drug units, at various times, are

1 back in that area because they are dealing with
2 search warrants and filing and returns and all
3 that as well, right?

4 A. They could have access -- I mean, they don't have
5 access -- they don't have the code to get in.
6 They would have to be buzzed in.

7 Q. I'm sorry. My question is, whether it's unusual
8 to see them in that area. Wouldn't be an unusual
9 event to take note of --

10 A. Correct.

11 Q. -- in your mind, right?

12 A. Correct.

13 Q. And that would be true of your deputy clerks as
14 well, right? Maybe more so than you, even?

15 A. True of the deputy clerks, what do you mean --

16 Q. Seeing a --

17 A. -- that they would see them?

18 Q. Seeing a sheriffs department employee in that
19 area was not such an unusual event that it would
20 make someone take note in their mind, hey, what's
21 going on here, would it?

22 A. Correct.

23 ATTORNEY FALLON: Speculation, foundation
24 for this witness, ask the answer be stricken.

25 THE COURT: No, I will allow it.

1 Q. (By Attorney Buting)~ And on occasion even,
2 sheriff's employees may be coming into the
3 interior of the office, like attorneys, going
4 through files, while they are investigating an
5 old file. I'm sorry, looking at an old file in
6 the course of their investigation in a new case,
7 right?

8 A. So your question is, an attorney?

9 Q. No. Badly phrased. Let me retry it. Sheriff's
10 employees, sheriff's deputies, also on occasion
11 are in that back area, the inner area of your
12 Clerk's Office, looking at one case file perhaps
13 as part of their investigation on somebody in
14 another case, right?

15 A. I guess I can't really say. I don't know that
16 they would be looking at a file there. I mean,
17 if anybody requests to look at a file, it's
18 usually done over the counter. I don't know that
19 it's ...

20 Q. All right. But you don't --

21 A. I mean, right, I can't say with 100 percent
22 certainty, what they are doing, because you're
23 usually dealing with the deputy clerks like of a
24 specific unit.

25 Q. That's right. And you are usually back in your

1 office and they are dealing with a number of
2 different clerks, deputy clerks?

3 A. Correct.

4 Q. Now, in addition, the Sheriff's Department has
5 access to the Clerk's Office with master keys;
6 isn't that right?

7 A. The security bailiffs would.

8 Q. Okay. Do you know a list, do you know every --
9 Well, let me go back for a second. Do you know
10 that the Sheriff's Department is responsible for
11 the security of the whole courthouse facility?

12 A. Yes.

13 Q. And that if there's a fire or something, after
14 hours, they have to have access, right?

15 A. Yes.

16 Q. Both to the courthouse and to all of the rooms
17 within the courthouse, right?

18 A. Yes.

19 Q. And there are a number of master keys that are
20 issued by somebody from Manitowoc County to give
21 to people who are allowed to have this kind of
22 access right?

23 A. I would imagine, I don't know specifically.

24 Q. Sure. You don't know who, but you know generally
25 that's the case, right?

1 A. Yes.

2 Q. If you have a master key to get through that
3 doorway, you don't need the separate combination
4 lock, right?

5 A. I wasn't aware of that before, but during the
6 investigation when the keys were, you know, when
7 it was being questioned, it did come to my
8 knowledge that the key could be used to gain
9 access to that door.

10 Q. Sure. The whole idea of a master key, it
11 wouldn't do much good if they turned the lock,
12 but then you couldn't get past because you have
13 got to have the combination, right?

14 A. Correct.

15 Q. So, the way it is set up -- at least the way it
16 was set up in the fall of 2005 was, a master key
17 would allow entry to the inner part of the
18 Clerk's Office.

19 A. I guess so.

20 Q. Okay. And that would include after hours, on
21 weekends, or in the evenings, right?

22 A. Correct.

23 Q. Okay. Now, Mr. -- Mr. Fallon asked you on direct
24 if you recalled seeing Sergeant Colborn or
25 Lieutenant Lenk in that inner area of the Clerk's

1 Office; do you recall that question?

2 A. Yes.

3 Q. That question was never put to you until some
4 time in late December or early January, 2006 and
5 2007, correct?

6 A. I believe that's probably correct.

7 Q. Okay. So nobody asked you about whether you
8 could recall seeing Lieutenant Lenk or Sergeant
9 Colborn until about 14 or 15 months after the
10 Teresa Halbach disappearance, right?

11 A. I guess. Yes.

12 Q. Okay. So between November of 2005 and December
13 of 2006, no investigating officers in this case
14 came to you and said, hey, has anybody come to
15 look at the 1985 court file, right?

16 A. I don't think so, I think it was pretty much just
17 when all the investigation was going on, like you
18 said, late November, December.

19 Q. Well, let's get clear here, because your answer
20 isn't, I'm sorry. All the investigation going on
21 you are talking about, is all the investigation
22 that started once the blood vial was discovered
23 there, right?

24 A. Right, I believe when the special investigator
25 that was assigned.

1 Q. Mr. Fassbender?

2 A. Right.

3 Q. Okay.

4 A. I guess I don't have a specific date, though. I
5 mean, I didn't mark it down for any reason, so.

6 Q. We're talking generally here, okay. I'm going to
7 get to some pictures with you in just a minute.
8 But after we, the defense, filed a motion in
9 December, someone in your office took that white
10 box that we looked at, from the exhibit, out of
11 the court file and locked it in the safe for
12 security, right?

13 A. I believe it was done pursuant to an order of the
14 Court.

15 Q. And that was in December of 2006, right?

16 A. Okay.

17 Q. Okay. Do you agree?

18 A. I agree. I don't have certainty. I mean, I
19 don't -- I mean, to the time frame, it would be
20 the approximate time.

21 Q. Okay.

22 A. But I don't have anything to verify that.

23 Q. Sure. And shortly thereafter, a week or so
24 later, the attorneys all came to your office and
25 we, with the Court's permission, opened that safe

1 and opened the box; do you recall that?

2 A. Correct.

3 Q. And we -- Do you recall we videotaped it and took
4 photographs?

5 A. Yes.

6 Q. Sort of at various stages, right?

7 A. Yes.

8 Q. Okay. Bear with me just one second, I'm going to
9 play an excerpt of that videotape. I think
10 counsel has no objection?

11 ATTORNEY FALLON: Not as long as it's
12 played as represented --

13 ATTORNEY BUTING: Sure, no audio.

14 (Court reporter couldn't hear.)

15 ATTORNEY FALLON: As represented, no audio.
16 We'll stipulate to the fact that counsel indicated
17 that it's a 10 minute version of a 33 minute event.
18 Is it marked as an exhibit?

19 ATTORNEY BUTING: We'll mark it right after
20 this. I'm going to have it marked as an exhibit.

21 ATTORNEY FALLON: Very well.

22 ATTORNEY BUTING: If you want to reserve
23 the next number, this will be a DVD of excerpts of.

24 Q. Just so we're clear, you recall the date was
25 December 14 of 2006?

1 A. Yes.

2 Q. Okay. And what I would like you to do is to
3 watch this and then just tell us afterwards if
4 this, in fact, comports with your recollection of
5 what this box and it's contents looked like at
6 various stages as it's opened. Okay.

7 (DVD playing.)

8 Q. Now, stop for one second. At this point this is
9 a closer up version of one of the exhibits that
10 you have in front of you, Exhibit 451. This
11 shows the end of the box secured as it was when
12 we looked at it on December 14th, right?

13 A. Correct.

14 Q. And from this you can tell -- I mean you are
15 familiar with the way the exhibits are typically
16 sealed with red evidence tape, or white evidence
17 tape or whatever, right?

18 A. Correct.

19 Q. And it's pretty clear to you even at this stage
20 that that evidence tape seal had been opened and
21 the box reclosed just with that little piece of
22 scotch tape, correct?

23 A. Correct.

24 (DVD playing.)

25 Q. All right. Let's go on. We're looking at the

1 handwriting that was on the outside of the box
2 that you referred to earlier?

3 A. Correct.

4 Q. And this is actually taking place in your
5 personal office, right?

6 A. Right.

7 Q. There's a label with a date of January 4, 1996?

8 A. Yes.

9 Q. Is that Mr. Wiegert there, putting on some
10 gloves?

11 A. Yes.

12 Q. And just so the jury is clear, you earlier
13 referred to this whole container as a styrofoam
14 box, but there's actually -- it's a cardboard box
15 that contains a styrofoam box within it, correct?

16 A. That's correct.

17 Q. And as we see it right now, that evidence seal on
18 the card -- on the inner styrofoam box appears to
19 be secure from this angle, right?

20 A. Yes.

21 Q. Now, Mr. Wiegert is removing the styrofoam box
22 and we're getting a closeup view of the other
23 side of the styrofoam box and that seal appears
24 to be open, does it not?

25 A. I believe so.

1 ATTORNEY FALLON: Could I make an
2 observation, it might be best to let the exhibit
3 speak for itself. I think further viewing will
4 establish several points.

5 THE COURT: The Court agrees, I don't
6 believe the witness has any specialized knowledge in
7 this regard.

8 (DVD playing.)

9 THE COURT: Mr. Buting, if at any point you
10 want to stop the tape and point out something to the
11 jury that's on there, you may.

12 ATTORNEY BUTING: Okay. Thank you, Judge.

13 Q. (By Attorney Buting)~ Now, just so we're clear,
14 you were actually in your office as we were doing
15 this as well, right?

16 A. Yes.

17 Q. So you saw us videotaping this?

18 A. Yes.

19 Q. Okay. Keep going.

20 (DVD playing.)

21 Q. The parties are sort of rocking this gently, this
22 tube of blood back and forth, gently; were you
23 able to determine if it looked liquid inside
24 there, from where you were at.

25 A. I couldn't see it from where I was.

(DVD playing).

Q. (By Attorney Buting)~ Just so the record is clear, there is no kind of evidence seal or tape around the top, the lavender top to that tube, is there?

A. It didn't look like there was.

Q. Okay. All right. So does that video excerpt of the events on December 14, 2006, purport with your recollection of what happened when we opened that box?

A. Yes.

ATTORNEY BUTING: Thank you. I have no further questions. We'll mark this as an exhibit now.

THE COURT: And the number of that exhibit is?

(Exhibit 470 marked for identification.)

THE CLERK: 470.

THE COURT: 470.

ATTORNEY BUTING: And that's a DVD of what we just viewed in court.

THE COURT: Correct. Mr. Fallon, any redirect?

ATTORNEY FALLON: Just one moment, I might have a question or two.

1 REDIRECT EXAMINATION

2 BY ATTORNEY FALLON:

3 Q. To your knowledge, Ms Zigmunt, the only sheriff's
4 deputies that have a key that permits access to
5 the inner office of the Clerk of Courts are the
6 two bailiffs?

7 ATTORNEY BUTING: Objection, calls for
8 speculation, unless she knows.

9 THE COURT: The question should be preceded
10 with a foundational question to determine if she
11 knows.

12 Q. (By Attorney Fallon)~ Let's go about it this way.
13 You -- In your cross-examination, you were asked,
14 it was not usual to have the sheriff deputies in
15 the inner office area and you responded, yes,
16 just the bailiffs, explain why you answered it in
17 that regard.

18 A. Because the bailiffs are pretty commonly seen in
19 the office. They come and go with different
20 reports or different things during the day.
21 Sometimes they are in the office before I get
22 there in the morning. I'm usually one of the
23 first people in the office and one of them might
24 be in the office delivering or picking up. They
25 have a pickup place for papers everyday. So it's

1 not uncommon to see them at any time, really.

2 Q. All right. And do they have a key that permits
3 access to the inner office?

4 A. They must have a key. I mean, I guess I really
5 never looked to see if they were using the code.
6 And they would have to have a key, because if
7 they get there before I do, you would need a key
8 to get in the outside door of the office.

9 Q. Are they permitted the cipher lock code as well?

10 A. I know when we changed the codes, because I
11 changed it like January of '06. We changed to a
12 new code from the previous Clerk of Court, just
13 for some security measures. And I did provide
14 them with that access code at that time.

15 Q. Now, to your knowledge, did you provide that
16 access code to any other member of the sheriff's
17 department, other than the bailiffs?

18 A. No.

19 Q. And I believe you also answered a question on
20 cross-examination, that perhaps on occasion other
21 deputies are in the inner office area, from time
22 to time; did I understand that correctly?

23 A. There could be someone that had business with one
24 of the clerks. They would have to be buzzed in.
25 They wouldn't have automatic access, someone

1 would have to allow them. Like that doorbell
2 little device thing, we have some of those under
3 the desks at the -- the counter clerks have those
4 and they press that to open the door for ...

5 Q. So do I understand it correctly, then, that they
6 would be buzzed in and they would be attended to
7 by one of your clerks?

8 A. Right. If they had -- I mean, a lot of times,
9 too, if they come in, I mean, we take care of
10 them over the counter. I mean, I don't really
11 know what the different business is that they
12 would have to come in for, but occasionally they
13 would ask -- like if they asked to see Janet or
14 something and then if someone determined that she
15 is there, they would buzz her -- buzz them in and
16 they could just go to her desk.

17 ATTORNEY FALLON: That's all we have.
18 Thank you.

19 THE COURT: Anything else Mr. Buting?

20 ATTORNEY BUTING: Just very quick.

21 **REXCROSS-EXAMINATION**

22 BY ATTORNEY BUTING:

23 Q. You mentioned how if they would ask to see Janet
24 or some other deputy, they would be buzzed in and
25 then the sheriff's department employee would then

1 be in the inner area, right?

2 A. Right. I mean, I don't know specifically that
3 any sheriff's department...

4 Q. I understand that. I'm just saying, just general
5 common practice, would be if one of the sheriff's
6 officers, employees, lieutenants, whoever, asked
7 to see somebody, they would be buzzed in and they
8 could go in back and talk to the clerk or deputy
9 clerk, or whomever, correct?

10 A. Correct.

11 Q. And, then, once back in that area, they would
12 have -- would have had in, let's say October,
13 November, 2005, they would have been in the area
14 where Mr. Avery's file could be accessed, right?

15 A. Well, going to Janet's area would not. I mean,
16 they would be turning the corner right away,
17 where his file was kept was straight ahead and a
18 little out of the way. So I don't think that
19 they would have --

20 Q. Well, there's no --

21 A. -- come in contact with that file at all.

22 Q. There was no other door in between where they
23 would be and where Mr. Avery's file was kept,
24 right?

25 A. There was quite a distance from it. I don't ...

1 Q. Well, we saw on the photograph, approximately?

2 A. Well, that was when it was on the desk, though,
3 in the desk for the viewing area. That isn't
4 where it was normally kept. It was kept on a
5 filing cabinet, although, further away yet. So
6 it was really --

7 Q. 10 feet from the door maybe, 15 feet?

8 A. Maybe 20 feet from the door.

9 Q. Okay. All right.

10 A. 25, I don't know.

11 Q. Sure. The point being, though, once you get past
12 that door, where you are buzzed in, it's all open
13 with partitions in the inner area of the Clerk's
14 Office?

15 A. Right.

16 Q. And I'm not trying to put blame on you, ma'am.
17 But I understand that in November of 2005, it was
18 not on your radar, you were not worried about an
19 officer from the sheriff's department coming in
20 and removing a court exhibit to plant evidence
21 and frame somebody, was it?

22 ATTORNEY FALLON: Objection, beyond the
23 scope.

24 THE COURT: Sustained.

25 ATTORNEY BUTING: That's all.

1 THE COURT: All right. The witness is
2 excused. And, members of the jury, we'll take a
3 stretch break before the State calls its next
4 witness. All right. We'll take a short break, five
5 minutes, and then come back.

6 (Jury not present.)

7 THE COURT: You may be seated.

8 ATTORNEY KRATZ: Thank you, Judge. As we
9 alerted the Court before the start of today's
10 proceeding, the State does anticipate calling
11 Dr. Marc LeBeau to testify. Mr. Buting was kind
12 enough on cross-examination to have showed the jury
13 the blood vial, purple-topped blood vial tube, which
14 the State believes entitles us to call Dr. LeBeau at
15 this time.

16 We had assured the defense that
17 Investigator Wiegert was going to testify, and he
18 is, but that's just as to the packaging of the
19 purple-topped blood vial and sending it to
20 Dr. LeBeau. We would prefer to call Dr. LeBeau
21 so that his direct examination and his cross
22 examination can be completed before he goes back
23 to Virginia today.

24 If the defense still wishes us to call
25 Investigator Wiegert at this time, we had also

1 assured the defense and the Court that we would
2 recall him neither for cross-examination or
3 continued cross on matters outside of the limited
4 purpose of packaging the blood.

5 So we're just looking for direction from
6 the Court. We would prefer, since the vial has
7 already been showed to the jury, to start with
8 the Dr. LeBeau and complete his testimony and
9 then call Investigator Wiegert. And if there's
10 other foundational witnesses, that may be
11 necessary. If there's an issue, or if the Court
12 believes that somehow to be an inappropriate use
13 of resources, or the presentation of evidence,
14 then we can certainly do it the other way as
15 well.

16 THE COURT: Mr. Buting.

17 ATTORNEY BUTING: Could I have just one
18 moment with counsel, please.

19 THE COURT: Go ahead.

20 ATTORNEY BUTING: Judge, I'm going to -- We
21 can defer Investigator Wiegert's testimony until
22 after Mr. LeBeau, but I am marking four other
23 exhibits which are essentially hard copies of what
24 we just saw. And by stipulation -- I was going to
25 use Investigator Wiegert to introduce those, but we

1 can just, by stipulation, introduce them and proceed
2 with Mr. LeBeau, if that's what counsel prefers.

3 ATTORNEY KRATZ: That's fine. 471, start
4 with, Janet?

5 THE CLERK: Yes.

6 ATTORNEY BUTING: And then I will be moving
7 all the exhibits that I introduced which is 466 --
8 468. Well, let's let her mark them first.

9 (Exhibit Nos. 471-474 marked for identification.)

10 ATTORNEY BUTING: Okay. So it will be 468
11 through 474. Is that all right, counsel?

12 ATTORNEY KRATZ: Just so I can see them.

13 ATTORNEY BUTING: Okay. So then I would
14 move 468 through 474.

15 ATTORNEY KRATZ: Is that a different photo
16 than 451? Janet, can you look at 451 and see if 474
17 is different.

18 THE COURT: Let's go off the record for a
19 couple minutes here. Counsel, are you ready to go
20 back?

21 ATTORNEY BUTING: I am, Mr. Gahn is still
22 checking for something.

23 THE COURT: All right. I believe that --
24 We'll go back on the record at this time.
25 Additional exhibits have been marked, those are

1 numbers what?

2 THE CLERK: 471 through 474.

3 THE COURT: 471 through 474. Are the
4 parties asking that they be admitted at this time?

5 ATTORNEY BUTING: 468 through 471,
6 actually, is what I'm asking to be moved.

7 THE COURT: 468 through 471.

8 ATTORNEY BUTING: Yes.

9 THE COURT: Any objection from State?

10 ATTORNEY KRATZ: They are eventually going
11 to get in, Judge, we have no objection at this time.

12 THE COURT: All right. Those are admitted.
13 Anything else before we bring the jurors back in?

14 ATTORNEY BUTING: No.

15 THE COURT: If not, we'll bring the jury in
16 at this time.

17 (Jury present.)

18 THE COURT: You may be seated. At this
19 time the State may call it's next witness.

20 ATTORNEY GAHN: Yes, your Honor, the State
21 would call Dr. Marc LeBeau to the stand.

22 THE COURT: Very well.

23 **DR. MARC LEBEAU**, called as a witness
24 herein, having been first duly sworn, was
25 examined and testified as follows:

1 THE CLERK: Please be seated. Please state
2 your name and spell your last name for the record.

3 THE WITNESS: My name is Marc, M-a-r-c
4 LeBeau, L-e-B-e-a-u.

5 **DIRECT EXAMINATION**

6 BY ATTORNEY GAHN:

7 Q. And what is your occupation?

8 A. I'm the unit chief of the Chemistry Unit at the
9 FBI Laboratory.

10 Q. And where is the FBI Laboratory located?

11 A. In Quantico, Virginia.

12 Q. And how long have you been so employed?

13 A. I have worked as the unit chief since September
14 of 2000. And prior to that I was within the same
15 unit at the FBI Laboratory, the Chemistry Unit,
16 since 1994.

17 Q. And what are your duties at the FBI Laboratory in
18 the Chemistry Division?

19 A. Well, as the unit chief, I oversee the day-to-day
20 operation of that unit. That entails making
21 decisions about the types of cases that we accept
22 into our unit for analysis. And then assign
23 those cases to the most experienced or the
24 appropriate personnel that work under me.

25 When we receive evidence into our unit,

1 we're typically asked to analyze for the presence
2 of a chemical, whether or not it is in or on a
3 piece of evidence. Then we compile our results
4 and prepare a report. And before that report is
5 released to the contributing agency, another duty
6 of mine is to review the result and the report to
7 make sure that it meets all of the quality
8 requirements that are set forth by our Quality
9 Assurance Department in our laboratory.

10 Q. And what is your educational background, Doctor?

11 A. Well, I have a bachelor's degree in chemistry, as
12 well as criminal justice from Central Missouri
13 State University in Warrensburg, Missouri. I
14 also have a master's degree in forensic science
15 from the University of New Haven and that's in
16 West Haven, Connecticut. And a doctorate in
17 toxicology from St. Louis University, in St. --
18 I'm sorry, from the University of Maryland in
19 Baltimore. I took an additional four years of
20 graduate level course work at St. Louis
21 University in the early '90s.

22 Q. Now, when you say you have a doctorate, is that
23 what is commonly referred to as having a Ph.D.?

24 A. Yes, it is.

25 Q. And thus the title, Dr. Marc LeBeau.

1 A. That's correct.

2 Q. Would you describe any experience or any special
3 training you had in your field?

4 A. Yes, well, when I started with the FBI
5 Laboratory, I was thoroughly trained in the types
6 of examinations that we typically do in our
7 laboratory. These are examinations specifically
8 in the area of forensic chemistry as well as
9 forensic toxicology.

10 Before I started with the FBI, I worked
11 as the laboratory manager of the St. Louis County
12 Medical Examiner's Office in St. Louis. And I
13 did that for about four years. I have also
14 worked as a chemistry instructor at the
15 University of New Haven, as well as a laboratory
16 intern at a private toxicology laboratory in
17 Willow Grove, Pennsylvania, called National
18 Medical Services. And I have also worked as a
19 laboratory technician for Monsanto Chemical
20 Company.

21 Q. Do you belong to any professional or scientific
22 organizations pertaining to your field?

23 A. Yes, I do.

24 Q. And would you describe for the jurors what those
25 are?

1 A. Yes, I'm an active member of the Society of
2 Forensic Toxicologists and I serve on their Board
3 of Directors, as well as I chair one of their
4 committees. I'm also involved with and a member
5 of the International Association of Forensic
6 Toxicologists. And, again, I serve on two
7 committees within that organization. And I'm an
8 active member of the American Academy of Forensic
9 Sciences. And I hold a membership level of
10 fellow within that organization, which is one of
11 highest membership levels you can have.

12 Q. And do you attend conferences within your field
13 for forensic purposes?

14 A. Yes, I do.

15 Q. And how often and why?

16 A. Well, I attend the conferences of those three
17 organizations pretty much annually, specifically
18 to stay on top of current trends within our field
19 of forensic chemistry and forensic toxicology.
20 But also I'm often invited to put on workshops
21 and be a guest speaker at a number of
22 conferences.

23 Q. Is your lab at the FBI an accredited lab?

24 A. Yes, it is.

25 Q. And what does that mean to be accredited?

1 A. An accredited laboratory simply means that a body
2 of experts that will, from time to time, come
3 into the laboratory and check your practices to
4 ensure that you are following a set of standards
5 that this body has set down to those that they
6 accredit. So it's simply a quality measure so
7 that we have consistency from one laboratory to
8 the next.

9 When you are dealing with an accredited
10 laboratory under the body that accredits the FBI
11 Laboratory, which is known as the American
12 Society of Crime Laboratory Directors, Laboratory
13 Accreditation Board, or ASCLD lab, all
14 laboratories that are accredited by that agency,
15 we follow their same standards.

16 Q. Do you undergo proficiency testing?

17 A. Yes, we're required to as part of our
18 accreditation.

19 Q. And what is that proficiency testing?

20 A. Proficiency testing is simply, we're provided
21 test cases, from time to time, where we're
22 asked -- where we don't know the results, some
23 outside entity knows the results, and we analyze
24 these test cases as if they were real cases and
25 then provide those results to the referee, if you

1 will, of those results. And they grade our
2 results and then report back, not to just to us,
3 but they report our result back to our
4 accrediting body as well.

5 Q. And how have you done on your proficiency tests?

6 A. I have passed all of the proficiencies I have
7 taken in the 16 years I've been employed in this
8 business.

9 Q. Have you ever testified as an expert before in
10 court?

11 A. Yes, I have.

12 Q. How many times?

13 A. Well, approximately 40 to 50 times.

14 Q. Have you ever been rejected as an expert in your
15 field?

16 A. No. No, I have not.

17 Q. Have you authored or co-authored any peer
18 reviewed journal articles?

19 A. Yes, I have.

20 Q. And could you describe some of those to the
21 jurors?

22 A. Well, I have authored or co-authored about 15 to
23 20 peer reviewed journal articles, professional
24 articles, scientific articles, that are published
25 in professional publications.

1 Q. And I have had placed in front of you an exhibit
2 that was marked as Exhibit 433; could you tell
3 the jurors what that is.

4 A. Yes, this is a copy of my curriculum vitae,
5 essentially my resume that describes my
6 experience.

7 Q. Now, did you analyze samples that were sent to
8 you in this case?

9 A. Yes, I did.

10 Q. Describe how you, in your lab, became involved in
11 this case?

12 A. Well, following the normal course of business at
13 our laboratory, as the unit chief, as I
14 indicated, I am the gatekeeper, if you will, of
15 cases that we accept to work. And I was
16 contacted by the local District Attorney's Office
17 to make a determination whether or not we could
18 provide assistance in analysis of specific
19 evidence in this particular case.

20 Q. And did you know that this was a case that
21 involved an allegation of police planting
22 evidence?

23 A. Yes, I did.

24 Q. Why would a case such as that, an allegation of
25 law enforcement officers planting evidence, be of

1 a concern to the FBI?

2 A. Well, one of the areas that the FBI is
3 responsible for investigating in this country is
4 crimes of public corruption. This is where a
5 politician or another public official, such as a
6 police officer, is accused or believed to be
7 involved in doing something illegal.

8 So that is an area that we are strongly
9 involved in in our investigations at our agency.
10 And, of course, that's a very serious allegation.
11 If an individual is truly in that political
12 position or in a law enforcement position and
13 they are doing something illegal that erodes the
14 public's trust in that agency or that individual,
15 and we would want that, certainly, that
16 individual, out of that office or off the street.

17 But, additionally, if they are being
18 wrongly accused, we want to be involved in that
19 investigation to help set the record straight and
20 hopefully clear their name, if they are wrongly
21 accused so, again, the trust can be restored.

22 Q. And did the testing that you performed in this
23 case determine that issue?

24 A. I believe it did, yes.

25 Q. Before we get to your conclusions, I would ask

1 you to describe for the jurors basically what
2 type of instrumentation did you use to perform
3 the testing in this case?

4 A. Well, we used an instrument that's called a
5 liquid chromatograph mass spectrometer. And we
6 abbreviate that LC/MS. And then we also took
7 that one step farther and did additional
8 experiments with the mass spectrometer that the
9 entire technique is what is known as LC/MS/MS.
10 It's essentially three different instruments, if
11 you will, that are all linked together and hand
12 shaking with each other so that they work in
13 tandem.

14 Q. Would you describe for the jurors exactly what
15 analytical chemistry is?

16 A. Well, analytical chemistry is a subset of the
17 whole field of chemistry that, in a nutshell,
18 just is trying to determine the chemical
19 properties or identity of matter. Little simpler
20 put, analytical chemistry involves trying to
21 either identify the present -- or the chemical
22 characteristics or the identity of an unknown
23 substance, trying to figure out what it is. Or
24 if there's an idea that there's a specific
25 chemical in some material, then we will target

1 that analysis in trying to figure out if a
2 specific chemical is present in that substance.

3 Q. And this instrumentation that you just referred
4 to, the LC/MS/MS, is that what is used in
5 analytical chemistry to determine these chemical
6 compounds?

7 A. Yeah, it's one of the tools that we use in order
8 to do just that, identify what a substance is, or
9 to target a particular analysis to see if
10 specific chemicals are in a material.

11 Q. Could you very briefly, and as simply as
12 possible, tell the jurors how this instrument
13 works?

14 A. I will try. It's -- Again, it's three
15 instruments that we're really talking about. The
16 most simple form is to talk about it as two, the
17 LC portion and the mass spec portion. The liquid
18 chromatograph, or LC, it's job is simply to take
19 a mixture of chemicals and separate them so that
20 they are delivered to the next instrument, the
21 mass spectrometer, one at a time.

22 And a good analogy to think of is, if we
23 had a bag full of marbles and we knew that some
24 marbles were real small, other marbles were of a
25 medium size, and the remaining marbles were very

1 large. And we can even complicate it a little
2 more by saying that the large marbles are of two
3 colors, some are blue and some are green.

4 If we were to put these marbles,
5 thinking that they are chemicals, into our liquid
6 chromatograph, the LC portion, it would take that
7 mixture and separate them so that when they came
8 out of the instrument, the small marbles would
9 come out first, say one minute after they were
10 introduced; the medium marbles would come out
11 maybe at two minutes after they were introduced;
12 the large marbles would come out -- or I should
13 say the large blue marbles, perhaps, would come
14 out at three minutes; and the green marbles would
15 come out perhaps 15 seconds later.

16 So it allows that mixture to be
17 separated into the individual components so that
18 the next instrument only sees essentially one
19 chemical at a time. And that's important because
20 the next instrument is that mass spectrometer.
21 And what that does is, it gives us the
22 fingerprint of that chemical, breaks it apart
23 into small pieces using a very large amount of
24 energy, breaks it apart, and presents us a
25 fingerprint that we can then compare.

1 And, essentially, all chemicals give you
2 a different fingerprint. That's the value of a
3 mass spectrometer, is it gives us information
4 about the weight of the chemical as well as its
5 fragmentation pattern that, then, we will
6 interpret using a set of guidelines in order to
7 determine if it matches the specific chemical
8 we're looking for, or if we're trying to figure
9 out what unknown chemical it is, we can match it
10 against the data base to see what it matches.

11 Q. And how long has this technology been around?

12 A. Well, LC/MS has been around for decades in
13 analytical chemistry laboratories.

14 Q. So is this a standard instrument used in
15 analytical chemistry?

16 A. It is. We used it in our laboratory since the
17 early 90s.

18 Q. Is this technology used in other fields besides
19 analytical chemistry?

20 A. Yes, it is.

21 Q. Could you describe a few of those for the jurors.

22 A. Well, LC/MS is very widely used in the
23 pharmaceutical industry where they are developing
24 new drugs, they are looking for new metabolites
25 of drugs and trying to identify what those are.

1 It's also used in looking at explosives,
2 explosive residues. If a bomb is discharged, it
3 can look for the residues of the explosive
4 portion that caused that.

5 It's used to test athletes for steroids.
6 It's used to test workers for whether or not they
7 are smoking marijuana on the weekends.

8 It's also used in the food industry to
9 look at various components in foods. It is used
10 in agricultural chemistry as well.

11 Q. I would like to switch topics a little bit now
12 and ask you, would you explain to the jurors what
13 EDTA is?

14 A. Yes, EDTA stands for ethylenediaminetetraacetic
15 acid, and EDTA is a chemical, simply a chemical
16 that is known as a chelating agent. And what
17 that means is, it simply will take metals that
18 are in the environment of this chemical and latch
19 on to them, bind to it, and remove them from that
20 environment that it's in.

21 Q. Where is EDTA found?

22 A. EDTA is found in a lot of commercial products
23 that we all use. It's found in your shampoo.
24 It's found in your laundry detergent. It's found
25 in a number of foods such as sodas. And it's

1 found in fertilizers, just to name some.

2 And the reason that they are in things
3 like detergents and shampoos is that it, again,
4 it attaches to the metals. And I don't know if
5 you have hard water here in this part of
6 Wisconsin but, you know, generally hard water has
7 a whole lot of metal in it, that's what makes it
8 hard.

9 So what that shampoo will do with the
10 EDTA in it is latch on to those metals so that it
11 actually does a better job of cleaning, same with
12 your detergent. So that's what EDTA is found in,
13 a whole lot of different commercial products.

14 Q. And what's its purpose, again, what is it used
15 for?

16 A. To bind metals, specifically, what it is used for
17 is a chelating agent. And, then, as I indicated
18 it, because of that binding of metals and
19 different uses, it helps stabilize certain food
20 products, for example. So that's why it's used.
21 In that instance, it might be used in a
22 laboratory setting to serve as a buffer in a
23 reagent.

24 Q. You use the word it's used to stabilize
25 something, could you explain a little more to the

1 jurors what you mean by a stable chemical.

2 A. Well, a stable chemical is one that doesn't
3 easily break apart. That's a very simple way of
4 explaining it. It's very rugged. It's not
5 fragile.

6 Q. Are there studies in the scientific literature,
7 or articles about the stability of EDTA?

8 A. Yes, there are, there are numerous studies in the
9 scientific literature that talk about the
10 stability of EDTA.

11 Q. And why would these studies be made?

12 A. Well, most of the studies that have been done in
13 the past few decades are studies that are
14 concerned with the prevalence of EDTA in the
15 environment. As I mentioned, it's stable and it
16 attaches to metals. And over the years, as the
17 use of EDTA continues to be used in more and more
18 products, what we're seeing in the environment is
19 that it continues to build up because EDTA is so
20 stable.

21 So we're finding it in wastewater and
22 river water, find it in your soil. And what the
23 concern is, of course, is it's taking metals out
24 of your water, taking metals out of the soil,
25 that are normally supposed to be there for the

1 normal process of biology, and latching on to
2 them, making them unusable in their normal form.

3 So that's what most of the studies are
4 talking about, the stability of EDTA in the
5 environment and the concern of it building up
6 over time. And the difficulties of actually
7 removing it from the environment, out of your
8 water before you drink it, and out of soil,
9 etcetera.

10 Q. These articles or other studies, these were
11 studies that were developed by other scientists;
12 is that correct?

13 A. Yes, scientists from all over the world. These
14 publications are from the Netherlands, from South
15 America, from the United States, all over Europe,
16 yeah, essentially all over the world.

17 Q. Would you tell the jury a little bit about your
18 experience with the stability of EDTA?

19 A. Well, as part of work that we did around this
20 case is we were interested to see whether or not
21 blood that was in an EDTA tube and put onto a
22 spot card, which is simply a card that you put a
23 spot of blood on, if that were stored at normal
24 room temperature environment for a number of
25 years, would that EDTA remain in that bloodstain.

1 And we did find that a stain that was made in May
2 of 2004, today still were able to detect the
3 presence of EDTA in.

4 Q. So this chemical is not easily broken apart under
5 normal environmental conditions; is that fair to
6 say?

7 A. That is absolutely a correct statement.

8 Q. And why not?

9 A. Well, again, it is not a fragile chemical. It is
10 not fragile at all. It takes very severe
11 conditions to break it down. For example it can
12 withstand temperatures up to 300 degrees
13 Fahrenheit before it will break apart.

14 Q. And this chemical, EDTA, is this a chemical that
15 you could test for its presence in substances in
16 this instrument that you talked about at the FBI?

17 A. Yes, absolutely.

18 Q. Now, I would like to ask you, Doctor, what is a
19 blood collection tube?

20 A. Well, a blood collection tube is simply the glass
21 test tube, if you will, that when you have blood
22 drawn at a doctor's office it is the tube that
23 they put your blood in.

24 Q. And are there different kinds of blood collection
25 tubes?

1 A. Yes, there are.

2 Q. And would you be able to describe those for the
3 jurors?

4 A. Yes, I could.

5 Q. We have prepared a -- you have prepared a
6 PowerPoint presentation to give this description;
7 would that be helpful to the jurors while
8 testifying?

9 A. Yes, it would.

10 Q. Can you -- Do you have a mechanism to back this
11 up, I think we want a different slide initially
12 to start with the collection tubes. And, again,
13 I'm going to ask you to -- could you describe a
14 little more about these different types before we
15 get the slide set up, these different types of
16 collection tubes and why they have different
17 types.

18 A. Well, there are a number of different types of
19 tubes. One type of tube has nothing in it; it's
20 simply your blood goes into the tube and it's
21 there with nothing added to it. But the majority
22 of collection tubes that we deal with, the
23 majority of collection tubes that we deal with
24 have some form of a preservative or an
25 anticoagulant in that tube. And the reason being

1 is you want to allow this blood to be stored for
2 some time, so it's still usable to the
3 laboratory.

4 As I indicated, there are multiple types
5 of tubes. And the way we can tell what is in the
6 tube is simply by the color of the stopper on
7 that tube. The color indicates what's inside the
8 tube when it's empty -- when it's-- before it's
9 filled with blood.

10 So the red-stoppered tube, as you can
11 see on the screen, has nothing in it, where as
12 the yellow-stoppered tube has citric acid or
13 citrate in it. The gray-stoppered tube has
14 potassium fluoride -- I'm sorry -- sodium
15 fluoride and potassium oxalate in that one. And
16 then the lavender or purple-stoppered tube has
17 this chemical EDTA.

18 Now, when the blood is put into these
19 tubes, you shake them up so that the chemical
20 additive is well mixed within the tube. And then
21 it does its thing.

22 Now, if we start by looking simply at
23 the red-stoppered tube with nothing in it, what
24 happens is, within our blood we have blood cells,
25 red blood cells, which you I'm sure heard of, but

1 we also have calcium in our blood. And that's
2 important because the calcium plays a very key
3 role in those red blood cells staying apart from
4 one another.

5 After awhile, if we don't have a
6 preservative or an anticoagulant in that tube,
7 what happens is those red blood cells clot. They
8 come together and form clots within that tube,
9 which of course makes it very difficult for
10 laboratories to do testing on the blood.

11 So that's why we use these
12 anticoagulants and preservatives in these tubes.
13 If we look at the purple-stoppered tube, which is
14 your EDTA tube, the EDTA is in with the blood,
15 mixed in, with the calcium and the red blood
16 cells. And as I said earlier, the role that EDTA
17 plays is to bind metals, such as calcium. But it
18 binds any metals that are present in our blood.
19 And a lot of those metals come from our diet,
20 from our normal metabolic processes that occur in
21 our body.

22 So the EDTA is going to bind with those
23 calcium -- the calcium, the iron, and other
24 metals and, again, latch onto it and make it
25 unavailable for its normal use. So that's going

1 to prevent your blood from clotting. And that's
2 why EDTA is in the purple-stoppered tube. What
3 this does, as I said, we have iron floating
4 around in our blood and we have calcium, which is
5 the CA, iron is FE. The EDTA comes along and it
6 complexes with those metals, complexes with the
7 calcium and it complexes with the iron. And
8 that's simply what the different blood collection
9 tubes are and why EDTA, in particular, is present
10 in these purple-stoppered tubes.

11 Q. And when you did your personal stability test for
12 EDTA, was it bloodstains from purple-topped
13 tubes?

14 A. That's what was reported to us. I'm sorry, what
15 was your question?

16 Q. When you did your stability study and degradation
17 study, was it bloodstains from purple-topped
18 tubes?

19 A. Yes. Yes, they were. They were all stains that
20 were generated from purple-stoppered tubes.
21 Those were generated, again, in May of 2004, and
22 we analyzed them just last week.

23 Q. And the chemical that you would be looking for,
24 just so it's clear for the jurors, in the
25 instrumentation that you have described, again,

1 according to this slide, what can you identify
2 with your instrumentation?

3 A. Well, we specifically focused on EDTA bound to
4 iron, as well as free EDTA. There's so much EDTA
5 in that tube, that not all of it is used. In
6 fact, the majority of it is not used, so there's
7 a lot of the original EDTA still floating around,
8 unbound to anything.

9 So we focused on both the unbound EDTA,
10 the original form, as well as the EDTA that was
11 bound to iron. And we chose the iron over
12 calcium, simply because iron is about 10 to 30
13 times more abundant in our blood than is calcium,
14 so it would make it easier to answer the question
15 that was put before us.

16 Q. And did you receive samples to test in this case?

17 A. Yes, we did.

18 Q. And do you recall, what did you receive?

19 A. We received a number of swabs that were reported
20 to us as having been taken from bloodstains out
21 of a Toyota RAV4, as well as control swabs that
22 were collected in the areas near where those
23 bloodstains were. And we also received a tube of
24 blood in a purple-stop -- stoppered tube, a EDTA
25 tube, that was collected from Mr. Steven Avery.

1 Q. I'm going to ask Agent Fassbender to bring you
2 what have previously been marked as Exhibits 332,
3 334, and 336. Dr. LeBeau, would you look at
4 Exhibit 332, which has been already entered into
5 evidence and testified to by Sherry Culhane as
6 being a blood swab that she took from the
7 dashboard of Teresa Halbach's RAV4 and she
8 identified that as her laboratory number A-8; did
9 you receive that?

10 A. I'm sorry, could you repeat the exhibit number?

11 Q. Exhibit No. 332?

12 A. And A?

13 Q. It was previously identified by Sherry Culhane
14 from the State Crime Lab.

15 ATTORNEY BUTING: Why don't we just read
16 what's on the exhibit?

17 A. This says A-10.

18 Q. I'm sorry. Then, I'm asking you to look at --
19 look for the one that is for A-8?

20 A. A-8 has exhibit 336 on it.

21 Q. And that was previously identified by Sherry
22 Culhane as a bloodstain taken from the dashboard
23 of Teresa Halbach's RAV4; did you receive that?

24 A. Yes, I did.

25 Q. And how can you tell?

1 A. I can recognize our laboratory number that we
2 placed on this packaging, as well as the initials
3 of the technician that did perform the analysis,
4 and my own initials.

5 Q. Okay. And did you test the swabs from that
6 bloodstain using the technology you have
7 described to the jurors?

8 A. Yes, we did.

9 Q. Now, I would ask you to identify for us, if you
10 can, what would have been marked as A-12, a
11 bloodstain from the rear passenger door of Teresa
12 Halbach's car?

13 A. That's correct.

14 Q. What exhibit number is that, please?

15 A. Exhibit 334, yes.

16 Q. And, again, that has been already entered into
17 evidence and identified by Sherry Culhane as a
18 bloodstain--

19 ATTORNEY BUTING: Your Honor, I would
20 object to counsel telling this witness what has --
21 describing these exhibits as something other than
22 what this witness knows. This witness should
23 testify to what he saw, what he was advised. But
24 what was testified to, he has no knowledge of.

25 THE COURT: I agree that I don't know that

1 this witness was in a position to say what a
2 previous witness said, but if these exhibits have
3 been admitted on that basis previously, I think it
4 is help for the identification. If there's a
5 dispute about that, then I think we should be heard.
6 Is there a question?

7 ATTORNEY BUTING: Not at this time, you can
8 proceed.

9 THE COURT: All right.

10 Q. (By Attorney Gahn)~ And, again, Exhibit 334, did
11 you receive that for testing in your lab?

12 A. Yes, we did.

13 Q. And how can you tell, Doctor?

14 A. Again, our laboratory number and the initials of
15 both the technician that did the work, as well as
16 myself.

17 Q. And would you -- would you have Exhibit 336
18 there?

19 A. Yes, I do.

20 Q. And that is an exhibit that has been previously
21 identified by Sherry Culhane from the State Crime
22 Lab as a bloodstain that she took from a CD case
23 from Teresa Halbach's RAV4; is that correct?

24 A. No, sir.

25 Q. I'm sorry? I'm sorry, 332; is that correct?

1 A. Exhibit 332 is identified by the label on the
2 packaging as being collected from the CD case on
3 the front passenger seat.

4 Q. And -- And did you receive that for testing?

5 A. Yes, we did.

6 Q. And how can you the tell?

7 A. Again, our laboratory number written on the
8 packaging, as well as the initials of the
9 technician that did the work, and myself.

10 Q. I'm going to ask Agent Fassbender to bring you
11 three additional envelopes which were control
12 swabs taken in this case. And, again,
13 Dr. LeBeau, just the last exhibit, 332; is that
14 marked as exhibit -- have the identifying Crime
15 Lab No. A-10?

16 A. That's correct.

17 Q. Dr. LeBeau, would you look at Exhibit 476?

18 A. Yes.

19 Q. And can you identify that exhibit?

20 A. This is a -- reported to be a control swab, or
21 two control swabs that were collected from the
22 rear passenger door area in the RAV4.

23 Q. And how can you -- Did you examine those?

24 A. Yes, we did.

25 Q. And how can you tell?

1 A. Again, our laboratory number is placed on there
2 as well as our initials.

3 Q. And would you look at Exhibit 475; can you
4 identify that exhibit?

5 A. Yes, I can.

6 Q. Will you tell the jurors what that is?

7 A. This is reported to be control swabs that were
8 collected from the RAV4, off of a CD case.

9 Q. And did you receive that for testing?

10 A. Yes, we did.

11 Q. And how can you tell?

12 A. Again, the laboratory number that we assigned to
13 this case as well as our initials are on it.

14 Q. And do you have Exhibit 477 in front of you, sir?

15 A. Yes, I do.

16 Q. And can you tell the jurors what that is?

17 A. Again, this is reported to be control swabs that
18 were collected from the RAV4, in the ignition
19 switch area of the vehicle.

20 Q. And did you test that with the technology you
21 have described?

22 A. Yes, I did.

23 ATTORNEY BUTING: Objection, your Honor, I
24 think we need, for foundation purposes, when he says
25 did you test, counsel is asking did you test this,

1 did you test that, and he is repeatedly answering we
2 tested, yes, we did. So I think there needs to be
3 some clarification as to what this witness did.

4 THE COURT: The Court agrees, that should
5 be clarified.

6 Q. (By Attorney Gahn)~ Would you explain to the --
7 when I say, did you test this, I'm talking about
8 the FBI. Would you explain to the jurors when
9 you receive evidence, how the testing process
10 proceeds?

11 A. Typically, the way we're set up is, certainly the
12 manager of the unit isn't -- doesn't have a lot
13 of time to spend performing the actual analyses.
14 So, we have two levels of scientists within our
15 unit.

16 We have what are called chemists, which
17 are essentially technicians, but they are well
18 educated technicians, many with Ph.D.s. And,
19 then, we have examiners. And I'm -- In this role
20 I serve as an examiner. The examiner is assigned
21 the case and oversees the analytical work that's
22 done on the case.

23 So they're the supervisor. They are in
24 close contact with the technician that worked on
25 the case, often times in the lab with him,

1 helping out. But most of the analytical work is
2 actually done by a qualified chemist.

3 When the work is finished, the
4 analytical product, the results, are handed off
5 to the examiner, who compiles the results, forms
6 the opinion that is then put into the report, as
7 I indicated earlier, and is sent out to the
8 contributing agency. So it's simply an
9 efficiency thing so that work can always be done
10 while the examiners are out testifying on their
11 cases.

12 Q. Would you also describe to the jurors the roles
13 that you have played yourself in the processing
14 of this case and the analysis that was done.

15 A. Well, again, I supervised the entire process of
16 this case as far as the method development, the
17 receipt of the evidence, the decisions that were
18 made on what was analyzed, when it was analyzed,
19 how it was analyzed. And then took the results
20 and compiled them, formed an opinion, my opinion,
21 as to what they meant, wrote the report myself,
22 issued the report after it had been reviewed by
23 an independent scientist that works within my
24 unit and, of course, here today to testify.

25 Q. And these items of evidence that you testified to

1 just now in front of the jury, did you personally
2 examine these items?

3 A. Yes, I did.

4 Q. And, thus, that's why your initials are on each
5 of the bags?

6 A. Yes.

7 ATTORNEY GAHN: May I proceed?

8 THE COURT: Actually, I think you are not
9 going to finish before lunch, so I think I'm going
10 to take a break at this time.

11 Members of the jury, we'll take our
12 lunch break at this time, I will remind you not
13 to discuss the case among yourselves until we
14 resume. And we'll see you after lunch.

15 (Jury not present.)

16 THE COURT: You may be seated. Counsel, I
17 would like to see you briefly in chambers before we
18 break for lunch.

19 (Recess taken.)

20 (Jury present.)

21 THE COURT: At this time we're back on the
22 record and Mr. Gahn you may resume.

23 ATTORNEY GAHN: Thank you, your Honor.
24 Before resuming the testimony I would like to inform
25 the Court that we have marked as exhibits,

1 Exhibit 465, and Exhibit 466; 466 is the PowerPoint
2 demonstration that Dr. LeBeau was using to explain
3 his testimony for the jurors. We have probably gone
4 through about half of it. There will be some more
5 coming. And Exhibit 465 is a CD Rom of that
6 PowerPoint demonstration. I would move those into
7 evidence at this time.

8 ATTORNEY BUTING: No objection.

9 THE COURT: Very well, they are admitted.

10 **DIRECT EXAMINATION CONTD.**

11 BY ATTORNEY GAHN:

12 Q. Now, Dr. LeBeau, you just finished testifying
13 about some of the samples that you received for
14 testing at your laboratory, namely the three
15 blood swabs that came are from the RAV4 and three
16 controlled swabs, correct, that came from the
17 RAV4?

18 A. Actually six control swabs, there were two of
19 each.

20 Q. Two of each. Thank you, Doctor. And did you
21 also receive a blood sample from Steven Avery in
22 this case?

23 A. I did receive a blood sample that was reported to
24 have been taken from Steven Avery, yes.

25 Q. And I'm going to ask that that be marked as an

1 exhibit at this time and I'm going to have that
2 brought to you for your examination.

3 (Exhibit No. 478 marked for identification.)

4 Q. (By Attorney Gahn)~ First, could you state what
5 exhibit number is that?

6 A. This is Exhibit 478.

7 Q. And do you recognize that?

8 A. Yes, I do.

9 Q. And how do you recognize that, sir?

10 A. Again, I recognize it by the initials of the
11 technician who opened this. Some of the markings
12 that we did place on it, unfortunately our lab
13 number has been covered up by crime scene tape,
14 or evidence tampering tape, rather, from the
15 Wisconsin State Crime Lab in Madison apparently.

16 Q. And if you were to open that container, would you
17 be able to make further identifications of the
18 blood vial that you tested in this case?

19 A. Yes, I would be.

20 Q. Would you do so at this time, sir.

21 A. Yes.

22 THE COURT: Before that happens, I recall
23 there was some discussion about fingerprint evidence
24 on the vial, is that -- has that matter been
25 resolved?

1 ATTORNEY GAHN: It's been completed.

2 THE COURT: Defense is satisfied?

3 ATTORNEY BUTING: Let's go to side bar for
4 just a minute.

5 THE COURT: All right. Don't open it any
6 further, please.

7 (Side bar taken.)

8 THE COURT: I should indicate for the
9 record that during the side bar a question was
10 raised about the evidence tape on the vial, which
11 the parties are free to go in their examination.

12 It was also pointed out to the Court,
13 that witness, in fact, does have latex gloves on,
14 something, unfortunately, in this courtroom, I
15 can't really see from the bench, so. But go
16 ahead, you may proceed.

17 ATTORNEY GAHN: All right. Thank you, your
18 Honor.

19 (Witness opens exhibit.)

20 A. I'm going to try to open it. Oh, okay, it's
21 reversed. I'm a little concerned that I'm going
22 to throw a vial of blood when I open this. There
23 we go.

24 Q. And would you explain to the jurors why a vial of
25 blood is packaged as it is?

1 A. Well, this container is a shipping container to
2 ensure that the tube inside doesn't break. It's
3 very high density plastic material and packed on
4 the inside with cotton and then further packaged
5 on the inside with yet another tube that is heavy
6 duty, like a plastic material so that the tube,
7 if it were to break on the inside, the blood
8 would remain, actually, in this secondary
9 container here. It's just a safety precaution.

10 Opening and being able now to see the
11 tube, I can recognize our laboratory number, as
12 well as the initials of myself and the technician
13 that performed the actual analyses on this blood.

14 ATTORNEY BUTING: May I see the tube,
15 counsel?

16 ATTORNEY GAHN: Certainly.

17 ATTORNEY BUTING: I will let you hold it.

18 THE WITNESS: Okay.

19 Q. (By Attorney Gahn)~ And does that blood tube
20 that's contained in that container have the name
21 Steven Avery written on it?

22 A. Yes, it does.

23 Q. Now, you may put that aside for the moment. And
24 I would like you to explain to the jurors what
25 you mean by, what are control samples as it

1 pertains to the control samples that were taken
2 in this case and sent to you?

3 A. Well, a control sample is simply a replicate swab
4 of the area near the stain that was collected to
5 look for any contamination that would count for
6 positive findings you actually find in the item
7 that you are analyzing. So in this case, the
8 bloodstain itself, it was a swabbing of the area
9 around it to ensure that there wasn't any
10 contaminants that would interfere with our
11 particular analysis.

12 Q. And why would they be particularly helpful in
13 this case for your analysis?

14 A. Well, for this particular case because, in part,
15 as I indicated, EDTA is widely used in a number
16 of commercial products. So, you would be
17 concerned that the inside of the car, for
18 example, may be processed with a cleaning agent
19 that may leave a residual amount of EDTA behind.
20 So you want to make sure that that isn't there in
21 case you have a positive finding in the
22 bloodstain because that could confuse the
23 interpretation of the results.

24 Q. When you receive a case submitted to you for an
25 analysis, do you routinely take photographs of

1 the items that are sent to you?

2 A. Yes, I do, as well as my staff routinely does
3 that.

4 Q. And that is something that is in the protocol of
5 the FBI in your Chemistry Unit?

6 A. It is within the protocol of the whole FBI
7 Laboratory to document -- to every extent that we
8 can, document the evidence as it is received into
9 the laboratory and into the unit.

10 Q. And was that done in this case?

11 A. Yes, it was.

12 Q. I'm going to ask Mr. Fallon to bring you six
13 photographs. I would like you to look at those.
14 And if you were to take the top photograph, turn
15 it over and identify the exhibit number, please.

16 A. This is Exhibit 458.

17 Q. And how -- Do you recognize that photograph?

18 A. Yes, I do.

19 Q. How do you do that, sir?

20 A. I recognize our laboratory number and the item
21 designation we gave to this particular item of
22 evidence.

23 Q. And how does that photograph -- would you explain
24 to the jurors how that corresponds to the
25 evidentiary items that you have in front of you?

1 A. Yes, this is a photograph of the blood swab that
2 was reported to have been taken from the ignition
3 area in the RAV4.

4 Q. And is that photograph now being displayed on the
5 large screen?

6 A. Yes, it is.

7 Q. And could you just explain to the jurors the
8 condition of this swab when you first saw it?

9 A. When -- It looks exactly like you can see in the
10 photograph, that's how we received it.

11 ATTORNEY BUTING: Objection, again, he's
12 got to testify, it's not clear whether he saw it, or
13 whether he reviewed it, or whether he is talking
14 about his lab staff.

15 THE COURT: The objection is sustained.

16 Q. (By Attorney Gahn)~ Did you review this
17 photograph? I mean, have you seen this
18 photograph before?

19 A. Yes.

20 Q. And did you yourself look at the swabs that were
21 submitted to you for analysis?

22 A. Yes, I did.

23 Q. And could you describe for the jurors the
24 condition of this swab that you actually saw?

25 A. Again, exactly as you see on the screen, this is

1 the condition of the swab when it was received in
2 our laboratory and when we opened it for the
3 first time, this is a photograph of it.

4 It was obvious to us that this swab had
5 been analyzed, or at least cut at one point,
6 previously, because it wasn't the typical rounded
7 shape you would expect on a cotton tipped
8 applicator. It appeared as if a portion of it
9 had been removed and that was consistent with
10 what we had been told had occurred with this
11 particular swab, prior to our analysis with it.

12 Q. Would a laser pointer be helpful to you --

13 A. Yes, it would.

14 Q. -- in pointing this out to the jurors?

15 A. So specifically this area here, the top portion
16 appeared to have -- that the top had been cut
17 off.

18 Q. And does this photograph in Exhibit 458
19 accurately depict this swab, from the dashboard
20 of Teresa Halbach's car, as you observed it?

21 A. Yes, it does.

22 Q. Would you go to the next photograph and identify
23 which exhibit that is?

24 A. This is Exhibit 459.

25 Q. And how does that correspond to the evidentiary

1 items in front of you that you have already
2 testified about?

3 A. This is a photograph of a swab that was reported
4 to have been collected from the rear passenger
5 door area from the RAV4.

6 Q. And did you personally look at the swabs that
7 were submitted in this case from the rear
8 passenger door area of the RAV4?

9 A. I did, yes.

10 Q. And does the photograph, the photograph that you
11 have, is that being displayed now on the large
12 screen?

13 A. Yes, it is.

14 Q. And, again, could you point out to the jurors
15 what you observed about this swab?

16 A. Again, this swab had what appeared to be blood on
17 it. And, again, it was obvious that a portion of
18 it had been cut or removed, prior to it arriving
19 to our laboratory.

20 Q. And does the photograph that you have in
21 Exhibit 459 accurately depict the condition of
22 this swab from the rear passenger door area as
23 you observed it?

24 A. Yes.

25 Q. And would you go to the next exhibit, please, and

1 identify it.

2 A. This is Exhibit 460.

3 Q. And how does that correspond to the evidence
4 samples that you examined in this case?

5 A. This is a swab that was reported to us as having
6 been collected from the CD case that was found in
7 the RAV4.

8 Q. And does that photograph -- is that being
9 depicted now on the large screen?

10 A. Yes, it is.

11 Q. And did you personally examine this swab?

12 A. Yes, I did.

13 Q. And please describe for the jurors the conditions
14 that you observed?

15 A. Again, this swab appeared to have been sampled
16 previously. There did not appear to be a great
17 deal of blood on this particular swab suggesting
18 that there was little to begin with in the
19 previous analysis, perhaps took the portion that
20 would have been useful for our particular
21 examination.

22 Q. I would ask you to take the next exhibit, which
23 would be Exhibit 461, I believe, next photograph,
24 please, and identify that exhibit number.

25 A. Exhibit 461.

1 Q. Yes.

2 A. This is -- These are two control swabs, reported
3 to us as control swabs.

4 Q. And can you correspond those swabs with the
5 evidence samples that you received for analysis?

6 A. Yes, these were control swabs that were collected
7 from the area near the ignition switch.

8 Q. And are those swabs that are in that photograph
9 now being shown on the large screen?

10 A. Yes, they are.

11 Q. Could you take the next exhibit, please, and
12 identify it.

13 A. Exhibit 462.

14 Q. And what is that a photograph of?

15 A. These are control swabs that were reported to us
16 as having been collected from the area near the
17 staining on the rear passenger door of the RAV4.

18 Q. And the next exhibit, next photograph, please.

19 A. Exhibit 463.

20 Q. Yes. Would you identify that and tell us what
21 that -- which evidentiary item that photograph
22 corresponds to?

23 A. These are control swabs that were reported to us
24 as having been collected off the CD case that was
25 found in the RAV4 pickup.

1 Q. And all of these swabs, the controls as well as
2 the bloodstains, did you test these samples for
3 the presence of what you described to the jurors
4 as EDTA?

5 A. Yes, I did, or we did.

6 ATTORNEY BUTING: I'm sorry, which is it,
7 you said I did, we did?

8 A. Collectively we did it within my unit, my staff
9 and I did, yes.

10 Q. Would you explain, again, to the jurors, just how
11 the process works at the FBI Laboratory, what
12 your role is and the role of your technicians and
13 what is the typical way that a case is processed?

14 A. Throughout the FBI laboratory we have, again,
15 technicians that do a vast majority of the actual
16 hands on analytical work, saving the staff that
17 is responsible for compiling the result,
18 reviewing the results, ensuring that all the
19 quality standards are correctly documented in the
20 results, preparing the report, testifying,
21 etcetera; assuring that they are available to do
22 their job, we have technicians that do the vast
23 majority of the analytical work.

24 Q. And, again, what were you looking for when you
25 tested these swabs?

1 A. We were looking for the presence of EDTA,
2 specifically, as well as the iron complex of
3 EDTA. And if I could go back to the presentation
4 I had used earlier?

5 Q. Would this be helpful to the jurors?

6 A. I believe it would be.

7 Q. Please, do.

8 A. So, specifically, we were looking for the free
9 form of EDTA, this was the EDTA that was in
10 excess and never bound to any metals in the blood
11 sample, as well as the presence of the EDTA that
12 actually bound to iron. And, again, we chose
13 iron over calcium because iron tends to be
14 present at about a 10 to 30 times higher amount
15 in a blood sample than you would expect calcium
16 to be there.

17 Q. When was the last time your laboratory at the FBI
18 tested for the presence of EDTA in a bloodstain?

19 A. The last time we, within the FBI Laboratory,
20 analyzed a bloodstain for EDTA was in the O.J.
21 Simpson trial in the mid 1990's.

22 Q. Why is that so long ago, why is that the case,
23 that it's been such a long time?

24 A. Well, simply, because we haven't had any request
25 to do the analysis since then. We -- As I

1 indicated earlier, we don't go in search of work
2 to do. The investigators call us and ask us if
3 we can provide analytical assistance. We have
4 never had a request, that I can recall, since the
5 O.J. Simpson trial, in which prosecution was
6 interested, or an investigation was interested in
7 determining whether or not EDTA was in a
8 bloodstain.

9 Q. Are there routine cases and non-routine cases
10 that are submitted to the FBI Laboratory?

11 A. Yes, there are routine and non-routine cases.

12 Q. Could you explain the difference to the jurors,
13 please.

14 A. Well, we -- we do many examinations that we
15 consider routine. And by that I mean, these
16 we're doing, maybe not weekly, but at least
17 monthly. Examples of this might be something
18 like, in a bank robbery, where a individual
19 robbing a bank is given a die pack. And that die
20 pack goes off and leaves a stain on the clothing
21 or on the money of that individual.

22 We'll analyze that stain to determine
23 whether or not a very unique die is present
24 that's associated with die packs. That's a very
25 routine examination for us. We're one of the few

1 labs in this country that do that analysis and
2 those types of cases tend to be federal cases.

3 Another routine examination we do is
4 looking at unknown powders that are mailed in
5 threat letters. We have a whole lot of these
6 happening throughout the country. Our laboratory
7 tends to get these unknown powders and tries to
8 identify what those powders actually are and
9 assess whether or not they are a true threat.
10 Again, that's a very routine thing.

11 DNA in our laboratory is as routine,
12 essentially, as you can get it, as well as latent
13 fingerprints. You can't get much more routine.

14 On the other hand, we do a whole lot of
15 non-routine examinations. These are examinations
16 that the state labs would not typically put
17 together a procedure to do, because they may get
18 this request once in their lifetime.

19 So we're often called upon, especially
20 in my unit we're called upon, to develop a
21 technique to analyze for a specific chemical, a
22 unique chemical. And we may not do that again
23 for a decade. It is not uncommon at all. So
24 that would be an example of a non-routine
25 examination.

1 An example of some ones that come to
2 mind recently is looking for insulin in a
3 syringe. Most state labs wouldn't do that. We
4 get that request maybe every three years to do
5 something like that.

6 Looking for a new drug that just
7 recently came on the market, that cannot be a
8 routine examination, so we would develop that as
9 a non-routine procedure and then perform analysis
10 on the evidence. So it's very common in our unit
11 and it does take up a considerable amount of our
12 time to do.

13 Q. Are you familiar with the crime that has been
14 referred to as a drug facilitated sexual assault?

15 A. Yes, I am.

16 Q. Do you have any expertise in this area?

17 A. Yes, I do.

18 Q. Please describe for the jurors your expertise in
19 this area?

20 A. Well, I'm considered one of the country's experts
21 on this particular topic. I do a considerable
22 amount of training, not just in the United States
23 but throughout the world, on drug facilitated
24 sexual assault and drug facilitated crimes.

25 I have written a number of scientific

1 articles that have been published in peer review
2 journals. I have also co-authored a book on drug
3 facilitated sexual assault.

4 Q. And what is a drug facilitated sexual assault?

5 A. These are crimes that people typically think of
6 as when someone is slipped a drug secretly and
7 that drug knocks them out, incapacitates them so
8 that a perpetrator can potentially assault them,
9 sexually assault them without them resisting the
10 attack.

11 Q. And what are these drugs that are used to
12 accomplish that?

13 ATTORNEY BUTING: Objection, to relevance
14 at this point.

15 ATTORNEY GAHN: Well --

16 THE COURT: Mr. Gahn.

17 ATTORNEY GAHN: I have a few more questions
18 and then I will wrap this up, I just wanted to show
19 the chemical testing that was done on this drug.

20 ATTORNEY BUTING: And why, we test
21 chemicals every day, what's the relevance here?

22 ATTORNEY GAHN: Well, that's the point of
23 this, to show how the procedures were developed for
24 a non-routine case. It's just a few more questions.

25 THE COURT: This is a foundational question

1 for something else?

2 ATTORNEY GAHN: Yes. Yes.

3 THE COURT: All right. If you can relate
4 it, I will allow you to continue.

5 Q. (By Attorney Gahn)~ Did a time come -- These
6 drugs that are used for the drug facilitated
7 sexual assaults, did a time come when your lab
8 was requested to test for these for the first
9 time?

10 A. Yes, of course.

11 Q. And what did you do? Did you develop a procedure
12 to test for these drugs that are used in drug
13 facilitated sexual assaults?

14 A. Yes, we did.

15 Q. And why was it important to do that?

16 A. Because we didn't have a procedure that had been
17 validated and put on line, as we would call it,
18 to do the analysis for these drugs. So there's
19 always a first time for everything, of course,
20 and we had to develop a method and validate it
21 and then use it in cases. And it eventually
22 became a very routine examination that we now
23 conduct, but initially it was a first case where
24 we were asked to do this analysis.

25 Q. And how often do you get requests to test for

1 chemicals that you have never tested for before?

2 A. I would say approximately 20 percent of our case
3 load are requests to do unique non-routine types
4 of examinations.

5 Q. And in this case here, did you develop a
6 procedure or a protocol to test for the presence
7 of EDTA in bloodstains?

8 A. Yes, we did.

9 Q. And did you specifically develop those procedures
10 for this case?

11 A. Yes, we did.

12 Q. I'm going to ask Mr. Fallon to bring you what has
13 been marked as Exhibit 434 and ask you to
14 identify the document.

15 A. This is a copy of the procedure that we developed
16 and used in the evidence for this case.

17 Q. And was there anything in the scientific
18 literature that helped you develop the procedures
19 that you used in this case?

20 A. Yes, there was.

21 Q. I'm going to ask Mr. Fallon to bring you what
22 have been marked as Exhibits 436 and Exhibits 437
23 and I ask that you examine them, please. And
24 what is Exhibit 436?

25 A. 436 is a article entitled *The Analysis of EDTA in*

1 *Dried Bloodstains by Electrospray LC/MS/MS and*
2 *Ion Chromatography*, published in the *Journal of*
3 *Analytical Toxicology*, in November/December,
4 1997.

5 Q. And what is Exhibit 437?

6 A. Exhibit 437 is an article entitled *Determining*
7 *EDTA in Blood*, published in a journal entitled
8 *Analytical Chemistry*, in August, 1997.

9 Q. And what is the *Journal of Analytical Toxicology*?

10 A. This is one -- The *Journal of Analytical*
11 *Toxicology* is one of the most relied upon
12 professional journals for individuals in the
13 field of toxicology, but more specifically
14 forensic toxicology.

15 Q. And what is the *Journal of Analytical Chemistry*?

16 A. Analytical Chemistry is one of the most relied
17 upon professional journals for those that
18 practice analytical chemistry.

19 Q. And are those considered to be scholarly
20 authoritative publications in the scientific
21 community?

22 A. Absolutely.

23 Q. And do you consider those articles to be peer
24 reviewed?

25 A. Yes, they both are.

1 Q. And what do you mean by an article or publication
2 being peer reviewed?

3 A. Peer review, what that simply means is a
4 scientist that does research and then wants to
5 publish that research. What they will do is
6 write up a manuscript and submit it to the editor
7 of that particular journal.

8 Now in science, what we do, we don't
9 just publish because somebody sends us an
10 article, but the editor has the responsibility of
11 reviewing that article and finding experts in
12 that area of study to review the work that was
13 done in that particular manuscript.

14 So the editor sends that to reviewers,
15 it's done blindly so no one knows who the
16 reviewers are, except the editor. And the
17 reviewers then make comments. They critique the
18 manuscript, make suggestions for improvements in
19 the science and then send those comments back to
20 the editor who then passes those comments on to
21 the original author of the manuscript.

22 Then the author of that manuscript must
23 meet the recommendations and the suggestions of
24 the peer reviewers and send that back to the
25 editor who then makes a decision as to whether or

1 not it is suitable to be published. So it's a
2 check and balance to ensure that what is
3 published is actually scientifically valid
4 information.

5 Q. And did you develop your protocol, which you have
6 identified as Exhibit 434, that you developed for
7 this case, to test for EDTA in bloodstains, based
8 upon procedures in those two exhibits?

9 A. Yes, one of the things that we do, when we're
10 looking for a method to develop, when we're
11 deciding we need to develop a method that we
12 don't currently have a written standard operating
13 procedure for, we go to the literature, published
14 literature, and we try to find a method that's
15 been used and published by another group of
16 scientists.

17 And we basically find one that meets our
18 needs that we can apply with the instrumentation
19 that we have in our laboratory and that will meet
20 the needs for the particular analysis that we're
21 being asked to perform. And the first article I
22 referred to, Exhibit 436, from the *Journal of*
23 *Analytical Toxicology*, this article met those
24 needs.

25 We essentially based our entire method

1 on what was published in this article, with the
2 article, Exhibit 437, from Analytical Chemistry,
3 supporting the ideas that were presented in the
4 article from the *Journal of Analytical*
5 *Toxicology*.

6 Q. And did you make they improvements to the
7 procedures that you observed in the publication
8 from Analytical Chemistry and Analytical
9 Toxicology?

10 A. I believe we did make some improvements when we
11 put the method together and actually validated
12 it.

13 Q. And what were those improvements?

14 A. Well, one thing we did, we used a different type
15 of LC/MS for analysis. It was a newer technology
16 than what was used in the 1997 publication.

17 Additionally, we introduced what's
18 called an internal standard into our method. And
19 simply what this is is a -- it's a control that
20 we introduce into every sample as we're doing the
21 analysis. It's a control that tells us whether
22 or not the analysis, not for the whole batch of
23 samples that we're running at one time, but for
24 each individual sample, to show us that it
25 actually worked as it was supposed to work.

1 Additionally, we added one more
2 experiment than what they were suggesting to do
3 in this paper, that looked for the free form of
4 EDTA in not just one technique, but two
5 techniques.

6 Q. What was your thought process in approaching this
7 case that was sent to you?

8 A. If I can go to the presentation.

9 Q. Will this be helpful to the jurors?

10 A. It certainly will be.

11 Q. Then, please, do.

12 A. The thought process is simply there's going to be
13 one or two scenarios when you are dealing with
14 the notion that blood was planted from an EDTA
15 tube. First scenario is that bloodstain that is
16 found at a crime scene is either there from
17 someone bleeding, actively bleeding, such as
18 indicated here.

19 If that blood then dries and a crime
20 scene technician comes along and swabs that
21 particular bloodstain, they are going to put some
22 of the blood onto that swab. And then if that
23 swab is sent into the laboratory for doing an
24 analysis, the laboratory will look at that swab
25 and analyze it. That's scenario one.

1 Second scenario is if the blood is
2 actually planted from an EDTA tube, again, a swab
3 from a crime scene technician, that comes along
4 and samples that stain, again, that swab being
5 sent to the Crime Lab to analyze the stain. So,
6 essentially, if you look at that swab that's sent
7 to the laboratory, you have one of two potential
8 options here.

9 The first option is if you find the
10 presence of EDTA and the iron complex of EDTA on
11 that bloodstain, on the swab, and you don't find
12 any significant EDTA on your controlled swab, in
13 that area, remember I said you need to make sure
14 that a cleaning product wasn't used that would
15 confuse the interpretation of the results. If
16 that's the case, you find EDTA present on that
17 swab, then that's an indication that that blood
18 was indeed planted or came from a tube such as a
19 purple-topped tube.

20 The other scenario is that you do not
21 find EDTA, or that metal complex of EDTA, and
22 that would, then, suggest that the blood came
23 from active bleeding and not from an EDTA
24 preserved tube.

25 Q. And the blood tube that you have identified as

1 being the blood tube with the name Steven Avery,
2 is that a purple-topped tube blood?

3 A. Yes, it is.

4 Q. And in this case, did you follow the protocol
5 that you developed to test for these two
6 scenarios?

7 A. Yes, we did.

8 Q. First, would you, please, describe to the jury
9 the steps that you took to validate the
10 procedures that you used in this case.

11 A. Well, once we had ensured that all of our
12 instrument settings were correct, based, again,
13 on the paper from the *Journal of Analytical*
14 *Toxicology*, we performed the required validation
15 steps that are a requirement of our unit, based
16 upon the requirements of our laboratory, which,
17 again, are based on the requirements of our
18 accrediting body. And we performed an analysis
19 initially to determine what our detection limit
20 was for this particular analysis, basically, how
21 low could we go to find EDTA.

22 And we did that one of two ways. We did
23 it, first, by taking solutions of known
24 concentration of EDTA and continuously diluting
25 them, analyzing it, diluting it, analyzing,

1 diluting, until we got to the point that we could
2 no longer meet the requirements that we had
3 written into the protocol, as far as something
4 being a positive or a negative. When we reached
5 that lowest concentration, that's what's called
6 our detection limit.

7 Another test we did, though, is we took
8 a tube of blood that had been preserved with EDTA
9 and we put different size drops of blood on a
10 microscope glass slide and we let that dry and
11 then came along with a swab, swabbed it off, and
12 did, again, the analysis like we wrote in this
13 procedure, on those swabs, until the point that
14 we could no longer detect the presence of EDTA.

15 And as it turned out, with that
16 particular analysis, with the spot, the lowest
17 volume we can accurately measure is one
18 microliter of blood. And one microliter of blood
19 is the equivalent of about 1/50th of a drop. So
20 that's as low as we could accurately measure a
21 volume out onto the microscope slide. And we
22 were still able to find the presence of EDTA and
23 EDTA with the iron complex on that one microliter
24 drop.

25 So that, combined with the fact that our

1 decreasing concentration suggested that we could
2 go as low as 13 parts per million, with the
3 analysis, 13 parts per million, we knew where we
4 were as far as sensitivity with this particular
5 method.

6 The second thing that we did was to look
7 for the presence of interferences that would
8 cause us some confusion when we did the analysis.
9 Since we were dealing with blood, we looked at a
10 number of blood specimens that were not preserved
11 with EDTA. They had other preservatives in them
12 and blood that had no preservatives. And we ran
13 this through the same test. We put some of that
14 blood onto swabs, let it dry, and then ran
15 through the procedure.

16 That, again, was to demonstrate that
17 blood doesn't interfere with the test. None of
18 the components that are normally found in blood
19 interferes with the test.

20 The third thing we did was something
21 that's called matrix suppression, an evaluation
22 of matrix suppression. You are putting proteins
23 and all these other things into the instrument
24 when you are dealing with blood. So what we
25 wanted to also verify is that these other things,

1 not just that they didn't interfere and cause
2 signals that we shouldn't -- that would interfere
3 with our ability to detect or identify EDTA, but
4 also that the signal itself didn't drop because
5 we were dealing with blood.

6 Now, this is very important when you are
7 doing a method with LC/MS, particularly with the
8 technique, as this paper describes, electrospray
9 LC/MS. Because it's very well known that
10 electrospray LC/MS, this is one of the criticisms
11 of that particular analysis is that with some
12 analytes other things that are in the sample can
13 cause your signal in -- if it were this high, for
14 example, in water, when you run it in a
15 particular matrix, say like blood, or if you were
16 doing food, that those things, other chemicals
17 could cause that signal to drop.

18 So we had to evaluate that so we knew if
19 this was a significant drop in the signal. And
20 what we found is that at the very low
21 concentration, we had an average drop in signal
22 of about three percent. And at the very high
23 concentration, we had a drop in signal of about a
24 third. And, again, that's not very significant.

25 The next thing we did was to analyze for

1 carryover. And this is an important concept any
2 time we're doing chemistry, analytical chemistry,
3 is that when you shoot a sample that has a
4 chemical in it, you want to make sure that that
5 sample doesn't stick around, residual amounts of
6 that sample don't stick around and show up in the
7 next sample that's injected.

8 And this is a particular concern because
9 this paper, again, from the *Journal of Analytical*
10 *Toxicology*, talked about this being a problem
11 with EDTA. And their recommendation in this
12 paper, to avoid carryover to the next sample or
13 the sample that follows, was to extract blank
14 blood, unpreserved blood, and shoot that as a
15 negative in between samples that were associated
16 with the case.

17 So we evaluated carryover as part of our
18 validation. And we actually found, with the
19 system we were using today, that we had
20 essentially no carryover. We did not find any.
21 So I attribute that in part because technology
22 has changed and the tubing, etcetera, within the
23 instrument, is no longer made of metal, like it
24 was in 1997. We're using a high density plastic
25 material and that's probably why that occurred.

1 But those are the steps of the validation that we
2 undertook for this particular analysis.

3 Q. And after completing this validation, did you use
4 the LC/MS/MS technology, with the procedures that
5 you developed, to test for the presence of EDTA
6 in the samples that were sent to you in this
7 case?

8 A. Yes, we did.

9 Q. And after all these different types of analyses
10 that you performed, were you able to reach a
11 conclusion concerning the presence of EDTA in the
12 control swabs from Teresa Halbach's RAV4?

13 A. I was.

14 Q. And what was that conclusion?

15 A. We were not able to identify any presence,
16 whatsoever, of EDTA or the EDTA iron complex on
17 the controlled swabs, any of the controlled swabs
18 from the RAV4.

19 Q. After all these different types of analyses that
20 were performed, were you able to reach a
21 conclusion concerning the presence of EDTA on the
22 blood swabs that you tested from Teresa Halbach's
23 RAV4 that were sent to you in this case?

24 A. Yes, sir. Yes, I was.

25 Q. And what was that conclusion?

1 A. Again, we were not able to identify any
2 indication of the presence of EDTA or EDTA bound
3 to iron in any of the swabs that were submitted
4 to our laboratory that contained blood and were
5 reported to us as being collected from the RAV4.

6 Q. And after all these different types of analysis
7 that you performed, were you able to reach a
8 conclusion concerning the presence of EDTA in the
9 purple-topped tube that came from Steven Avery?

10 A. Yes, I was.

11 Q. And what is that conclusion?

12 A. That the tube of blood, the purple-stoppered tube
13 of blood that was reported to have come from
14 Steven Avery, did indeed contain significant
15 amounts of EDTA in it.

16 Q. Dr. LeBeau, based upon your training and
17 experience, and based upon your test results
18 using the LC/MS/MS technique, and based upon all
19 the data that you reviewed and all the
20 compilations that were done in this case, do you
21 have an opinion, to a reasonable degree of
22 scientific certainty, whether the bloodstains
23 from Teresa Halbach's RAV4, that you tested, came
24 from the vial of blood of Steven Avery that was
25 in the Manitowoc County Clerk of Court's Office?

1 A. Yes, I do.

2 Q. And what is that opinion?

3 A. It's my opinion that the bloodstains that were
4 collected from the RAV4 could not have come from
5 the EDTA tube that was provided to us in this
6 case.

7 Q. And, therefore, which scenario did your testing
8 answer in this case?

9 A. Of the scenarios on the board, I think our
10 results rule out one of those two possibilities.
11 It would be my opinion that it could not have
12 been from an EDTA tube.

13 Q. And, therefore, there was no planting of
14 evidence?

15 ATTORNEY BUTING: Objection, way over
16 broad.

17 THE COURT: Without any limitation, yes,
18 sustained. I will sustain the objection. I
19 think -- I'm sustaining the objection.

20 Q. (By Attorney Gahn)~ In accordance with the two
21 scenarios that you set out in your thought
22 process in analyzing this case, did the planting
23 scenario prove true?

24 A. No, it did not.

25 ATTORNEY GAHN: Thank you. That's all I

1 have.

2 ATTORNEY BUTING: A break?

3 THE COURT: Yeah. Members of the jury,
4 would you like a full break or a stretch break at
5 this time. Stretch, is that enough? Okay. We'll
6 take a stretch break at this time. You may be
7 seated.

8 ATTORNEY GAHN: Before I officially pass
9 the witness, I guess I would like to just introduce
10 the exhibit of the report of Dr. LeBeau from the
11 Crime lab, which has been marked as Exhibit 435.

12 Q. If you would just identify that.

13 A. Yes, Exhibit 435 is the laboratory report I
14 prepared for this case.

15 Q. And does that contain your findings and
16 conclusions in this case?

17 A. It does, yes.

18 ATTORNEY GAHN: Thank you.

19 THE COURT: Is the State moving for
20 admission of any exhibits at this time?

21 ATTORNEY GAHN: Yes, I would move for
22 admission of Exhibit 475 to 478, 434 through 437,
23 and 433.

24 ATTORNEY BUTING: No objection.

25 THE COURT: Very well, those exhibits are

1 admitted. And, Mr. Buting, you may begin.

2 ATTORNEY BUTING: This PowerPoint isn't an
3 exhibit, is it?

4 ATTORNEY KRATZ: It is.

5 THE COURT: Which number?

6 ATTORNEY BUTING: I will object to that,
7 but the others I won't.

8 THE COURT: What number is that?

9 THE CLERK: 466.

10 ATTORNEY FALLON: 465.

11 THE CLERK: 465 is the CD Rom.

12 THE COURT: All right. Do you wish to be
13 heard, later, outside the presence of the jury?

14 ATTORNEY BUTING: Later.

15 THE COURT: The other uncontested exhibits
16 are admitted at this time.

17 **CROSS-EXAMINATION**

18 BY ATTORNEY BUTING:

19 Q. Good afternoon, Doctor.

20 A. Good afternoon.

21 Q. I'm sure you're anxious to get back to Virginia
22 where it's not quite so cold.

23 A. It would be nice, yes.

24 Q. You have your curriculum vitae up there with you?

25 A. Yes, I do.

1 Q. And we had a little bit of talk about your
2 expertise in drug facilitated rape cases, right?

3 A. That's correct.

4 Q. Also sometimes called GHB drugs, one of those
5 types of drugs?

6 A. One of the 60 different drugs used, yes.

7 Q. Okay. That's the one that maybe most people have
8 heard of; it's the one I have heard of, okay.

9 A. Okay.

10 Q. When you are going through your CV you talked
11 about how you authored or coauthored 15 to 20
12 articles?

13 A. That's correct.

14 Q. How many of those articles did not involve drug
15 facilitated rape?

16 A. Seventeen.

17 Q. Okay. And how many of those involved postmortem
18 fluids, analysis of postmortem fluids; do you
19 know what I'm talking about, from deceased
20 bodies?

21 A. Yes, I know what you are talking about. I'm
22 sorry, did refer to postmortem or did not?

23 Q. Did.

24 A. Okay. I don't know that I can answer that
25 because -- If I can elaborate?

1 Q. Well, go ahead.

2 A. Well, urine can be a fluid from an autopsy, a
3 postmortem fluid, or urine can be from a living
4 person. So an article I published about urine,
5 it would be hard to say if that's meant to be for
6 postmortem or living people. The same with
7 blood. Now, obviously a liver sample or a brain
8 sample, must be from a deceased individual.

9 Q. Okay. Would you agree or disagree that the
10 majority of your presentations and the majority
11 of your publications involve either drug
12 facilitated sexual assaults or the analysis of
13 postmortem fluids?

14 A. I would disagree.

15 Q. Okay. You do have some experience in analysis of
16 postmortem fluids, right?

17 A. I certainly do.

18 Q. You certainly do, yes. And, in fact, one of your
19 more recent articles you published, holds
20 yourself out as an expert in the area of
21 postmortem fluid analysis, does it not?

22 A. I'm now sure I know --

23 Q. Are you --

24 A. -- what article you are referring to.

25 Q. Okay. Are you an expert, do you consider

1 yourself an expert in the analysis of postmortem
2 fluids?

3 A. I do, yes.

4 Q. Okay. We'll return to that in a moment. You
5 also give quite a few presentations. Just this
6 year alone, out of -- looks like out of nine --
7 just one moment, please. Out of nine times that
8 you have gone around presenting talks this year,
9 six of those involve drug facilitated sexual
10 assaults, right? In 2006, I'm sorry.

11 A. Yes, six of the presentations that I gave in 2006
12 were on the topic of drug facilitated crimes and
13 drug facilitated sexual assaults.

14 Q. Okay. So would you agree with me that that's one
15 of your real specialties?

16 A. Yes.

17 Q. And that's what you are often sought after for,
18 by conferences?

19 A. It's an area that I am asked to speak on quite
20 frequently, yes.

21 Q. Have you ever, in your life, been asked to give a
22 presentation on EDTA interpretation in
23 bloodstains?

24 A. No, I have not.

25 Q. You are not sought off -- you are not a sought

1 after presenter on that particular topic, are
2 you?

3 A. No, sir, I'm not.

4 Q. Have you ever before testified, in a court of
5 law, as an expert who is giving opinions about
6 the interpretation of EDTA and bloodstains?

7 A. No.

8 Q. This jury is privileged to be the first to hear
9 your wisdom on this topic; isn't that right?

10 ATTORNEY GAHN: Objection, your Honor, to
11 the form of the question.

12 THE COURT: I will sustain the objection.

13 Q. (By Attorney Buting)~ This jury is privileged to
14 be the first to hear any opinions you have ever
15 expressed in court on the analysis of EDTA in
16 bloodstains, correct?

17 A. I wouldn't say they are privileged, but I would
18 say that this is certainly the first time I'm
19 testifying about EDTA in a bloodstain, that's
20 correct.

21 Q. And one reason is, this is the first case you
22 have ever been asked to test -- to test for EDTA
23 in bloodstains, isn't it?

24 A. That is correct.

25 Q. But some of your colleagues at the FBI Laboratory

1 did have the pleasure of testifying on that topic
2 once before, didn't they?

3 A. Yes, they did.

4 Q. In the O.J. Simpson case you mentioned, correct?

5 A. Yes.

6 Q. And I believe you said that that, in fact, in 19
7 -- that's 10 years now, 10 years ago, right?

8 A. At least 10 years ago, yes.

9 Q. At least 10 years ago. Okay. So in the last 10
10 years, nobody has come to your lab and asked for
11 your lab to give us the benefit of your knowledge
12 and your ability to test for EDTA in bloodstains;
13 isn't that right?

14 A. It hasn't happened to me personally, not to my
15 knowledge.

16 Q. Okay. And might that be because your lab screwed
17 up in the O.J. Simpson case?

18 A. No, we did not screw up, as you say, in the O.J.
19 Simpson case.

20 Q. Well, in the O.J Simpson case, correct me if I'm
21 wrong, tests that your lab did, found EDTA in a
22 sock, right?

23 A. That is correct, yes.

24 Q. And the defense used your test to help acquit
25 Mr. Simpson, didn't they?

1 A. Could you repeat that.

2 Q. The defense used your test results in the O.J.
3 Simpson case, your lab test results, to help
4 acquit Mr. O.J. Simpson of that crime, didn't
5 they?

6 A. That I don't know. I have no idea. I wasn't the
7 one that performed any of the analysis of EDTA,
8 as I testified to --

9 Q. Sir --

10 A. -- in the O.J. Simpson case. I don't know how --
11 I don't know that the defense used the results or
12 the prosecution. I don't recall that.

13 Q. Were you working the FBI Lab during the O.J.
14 Simpson case?

15 A. Yes, I was. I had been there approximately a
16 year.

17 Q. And you would have us believe that you weren't
18 following what was going on with your lab's
19 testimony in the O.J. Simpson case?

20 A. Actually, while that examiner was testifying, I
21 was out on my own testimony at a bank robbery
22 trial in Los Angeles, myself.

23 Q. Ah, so you --

24 A. I couldn't --

25 Q. So --

1 A. I'm sorry, so I couldn't really monitor the
2 actual testimony in that case.

3 Q. Sure, you couldn't watch it while it was going
4 on, is what you are saying, right?

5 A. That's correct.

6 Q. And are you telling us that you didn't follow up
7 afterward, you didn't hear all of the discussion
8 in the news about your lab's involvement in that
9 case?

10 A. I heard what the media reported, yes. And I
11 heard what our own chemist reported.

12 Q. Sure, you talked about it in the lab, didn't you?

13 A. Yes.

14 Q. You sat around the water cooler or the lunch
15 table and you talked about it, right?

16 A. Yes, we did.

17 Q. And, more than that, shortly after the O.J.
18 Simpson case, your unit, the chemistry unit of
19 the FBI was accused of misconduct or malfeasance
20 of some sort that resulted in an audit by the
21 Inspector General of the United States of
22 America; isn't that right?

23 A. No, that's not correct.

24 ATTORNEY GAHN: Objection, your Honor, as
25 to relevancy.

1 THE COURT: Over --

2 ATTORNEY BUTING: It's foundation.

3 THE COURT: Overruled.

4 Q. (By Attorney Buting)~ Your answer was no?

5 A. No, that's incorrect.

6 Q. Okay. Have you read an inspector general's
7 report from 1999 that involved an audit of your
8 unit?

9 A. I have read a portion of the inspector general's
10 report, that was a report on their audit of the
11 FBI Laboratory.

12 Q. Okay. And part of that review involved your
13 unit, the chemistry unit, did it not?

14 A. Not to my recollection. It involved
15 investigation of one chemist within the unit,
16 same individual who worked on the FBI -- sorry --
17 on the O.J. Simpson case. He was specifically
18 targeted within that investigation; it wasn't our
19 entire unit.

20 Q. Okay.

21 A. There were units within the FBI --

22 Q. Sure.

23 A. -- laboratory, though, that do chemical analysis
24 that were looked at as a whole unit, but it was
25 not the Chemistry Unit to my recollection.

1 Q. Do you know Roger Martz?

2 A. I do, yes.

3 Q. Was he one of your colleagues at the FBI Lab in
4 1997?

5 A. Yes, he was.

6 Q. Did he testify in the O.J. Simpson case?

7 A. Yes, he did.

8 Q. Is he working in your unit any more?

9 A. No, he's retired from the FBI.

10 Q. Took early retirement, huh?

11 A. That would be personnel information that I
12 wouldn't be privy to.

13 Q. Oh, of course. Well, Mr. Martz, if you read that
14 portion of this inspector general's report, was
15 the target of complaints about the performance
16 of -- or about his performance on EDTA testing in
17 the O.J. Simpson case, was he not?

18 A. I believe that Mr. Martz was -- there were a
19 number of allegations made by the individual who
20 made allegations against Mr. Martz. And there
21 were approximately 10 individuals within the
22 whole FBI Laboratory that this Dr. Fred
23 Whitehurst made allegations against. Those
24 individuals were looked at because of these
25 allegations, the inspector general came in and

1 looked into every allegation that was made by Mr.
2 -- or Dr. Whitehurst.

3 Q. Sir, I'm going to stop you here for a second.

4 A. Yes, sir.

5 Q. Are you telling us now that you read the entire
6 report?

7 A. No, as I -- No, sir.

8 Q. Okay.

9 A. But I do know the history.

10 Q. All right. Well, we'll get into it, question by
11 answer -- question and answer, okay.

12 A. Yes.

13 Q. All right. Mr. Martz is one of the esteemed
14 authors of this Exhibit 436, isn't he?

15 A. Yes, he is.

16 Q. In this esteemed publication of the *Journal of*
17 *Analytic Toxicology*, right?

18 A. It's the *Journal of Analytical Toxicology* and he
19 is one of the authors.

20 Q. Forgive me. He is one of the authors, one of the
21 four authors of this article upon which you
22 primarily based your protocol for EDTA testing in
23 this case, right?

24 A. That's exactly right, yes, sir.

25 Q. The other three authors are all FBI employees,

1 aren't they?

2 A. Yes, they are.

3 Q. And this -- In fact, this entire article is based
4 on the protocol that was developed for the O.J.
5 Simpson case, by the FBI Lab, right?

6 A. I believe part of it is, but I don't know that
7 the entire article is based on what was done in
8 the O.J. Simpson --

9 Q. Okay.

10 A. -- case.

11 Q. Well, the article was written after the O.J. case
12 was done, right?

13 A. Approximately two years afterwards.

14 Q. And the article, in fact, is an effort to explain
15 to the rest of the scientific world how you guys
16 screwed up when you tested O.J. Simpson's --

17 ATTORNEY GAHN: Objection, your Honor, to
18 the form of the question and the relevancy of this.

19 THE COURT: It's cross-examination, I will
20 allow the question and I will allow the witness to
21 explain and answer.

22 A. Could I get the question again, please?

23 Q. This article was written by these four agents
24 from the FBI to explain to the rest of the
25 scientific world how you guys, your lab, I should

1 say, managed to screw up in the O.J. Simpson
2 case?

3 A. Well, that's incorrect, on a number of levels,
4 sir. First of all, those are not agents at the
5 FBI Laboratory. The only one that was was Roger
6 Martz. The others are Ph.D. scientists,
7 chemists, or Ph.D biologist. That article was
8 not written as any form of excuse, or
9 explanation, for what our laboratory for -- in
10 the O.J. Simpson case.

11 That was simply a group of researchers
12 who had the lead, published group lead authors.
13 Dr. Mark Miller, as well as Dr. Bruce Mccord.
14 They are not in our case working area at the
15 laboratory. They never work on cases. They are
16 in our research unit. They are the lead authors.
17 They are the ones that did the research. They
18 are the ones that published it.

19 It is quite common for those researchers
20 to give credit to individuals in the case working
21 units who had the original idea.

22 Q. Okay. So --

23 A. So that is why, I'm sure, Mr. Martz's name is on
24 that article. He had nothing to do with the
25 actual work done.

1 Q. Oh, really?

2 A. Publication.

3 Q. So these authors, you are telling us that they
4 put Mr. Martz's name on here when he didn't do
5 anything at all to do with this study or this
6 article?

7 A. I believe that to be true.

8 Q. How about Mr. Bruce Bedowle.

9 A. Dr. Bruce Bedowle, he is an expert statistician
10 and at the time was, as I recall, the ranking
11 manager within the research unit. Again, it's a
12 respect thing where you include your supervisor
13 in the list of authors.

14 Q. Okay. Let's talk for a minute about how the
15 protocol was developed for the O.J. Simpson case.
16 All right?

17 A. Yes.

18 Q. Just as in this case, a request was made or
19 efforts were started to create a new type of
20 test, mid-trial, right?

21 A. Well, again, sir, I didn't do the testing in the
22 O.J. Simpson trial. I don't have all the
23 intimate details as to what conversations
24 occurred, when the request came in. I was a
25 newly qualified examiner in the FBI Laboratory.

1 I had been there approximately a year. So I
2 don't have knowledge about the intimate details
3 that you are asking there.

4 Q. Well, I didn't realize I was asking intimate
5 details, but let's rephrase it so I'm not,
6 clearly. Was the protocol used in the O.J.
7 Simpson case in existence in the FBI Lab before
8 that trial began?

9 A. Not to my knowledge, it was not.

10 Q. It was developed in a hurry while the trial was
11 going -- ongoing, right?

12 A. I don't know when they started to develop the
13 pro --

14 Q. How long did it take to develop the --

15 A. -- protocol.

16 Q. How long did it take to develop the protocol in
17 the O.J. Simpson case?

18 A. I don't know.

19 Q. Okay. Well, Exhibit 437, *Determining EDTA in*
20 *Blood*, another scholarly article you refer to,
21 right?

22 A. Yes, it is.

23 Q. Respected in the field?

24 A. Yes, it is.

25 Q. By two authors, at that time associated with

1 Cornell University, right?

2 A. That's correct.

3 Q. And they talked about, and part of this article
4 talks about, the FBI Lab experience in developing
5 the protocol for testing EDTA in bloodstains,
6 that was used in the O.J. Simpson case, right?

7 A. I would have to review the article again to
8 answer that question.

9 Q. Are you serious, you don't know what this says?
10 You don't know if this refers to the O.J. Simpson
11 case?

12 A. Yes, I am serious. And I asked to review the
13 portion that you are referring to.

14 Q. Go right ahead. It's on the first page, Doctor.

15 A. What was your question, again?

16 Q. Does that refresh your recollection?

17 A. Yes.

18 Q. And do these authors say, quote, What was wrong
19 with the laboratory testing? First, it was not
20 clear whether the method had ever been used
21 before. Most likely the method was developed
22 quickly, under a great deal of time pressure. In
23 retrospect, FBI chemists now believe that the
24 EDTA detected may have been injection carryover
25 in the LC/MS/MS instrumentation; do you recall

1 reading that?

2 A. I do. I can't verify that that's it. You said
3 quote, I can't verify that, but it sounds like
4 the context is very much what I recall reading in
5 that --

6 Q. Okay.

7 A. -- paragraph.

8 Q. Okay. So these authors pointed out that the FBI
9 effort to develop a protocol for testing EDTA in
10 bloodstains for the O.J. Simpson case was
11 hurried?

12 A. No, sir, they said it appeared to have been
13 hurried. Those authors were not present in our
14 laboratory when that method was developed. I
15 know that to be a fact.

16 Q. Okay. So you would like to criticize these
17 authors --

18 A. No.

19 Q. -- this publication, now?

20 A. No, sir. The portion of that article that we
21 relied upon was the scientific portion, not the
22 narrative.

23 Q. Well --

24 A. It's the science within the latter portion of the
25 article refers to the use of an instrumental

1 technique called capillary electrophoresis, mass
2 spectrometry, mass spectrometry. Again it's a
3 technique --

4 Q. Sir --

5 A. -- that analyzed for EDTA.

6 ATTORNEY BUTING: May I ask a question?
7 This is cross-examination, Judge.

8 THE WITNESS: I thought I was responding.

9 ATTORNEY BUTING: No, you're not.

10 THE COURT: Well, the answer goes a little
11 bit beyond what the question was, so.

12 Q. (By Attorney Buting)~ So --

13 THE COURT: Mr. Buting.

14 Q. (By Attorney Buting)~ Okay. So, Exhibit 437 that
15 you considered, that you offered here on direct
16 as one of only two publications that you
17 considered while developing this protocol, you
18 say that you considered the portion of science in
19 the latter part of it, but you ignored the
20 portion in the narrative at the beginning that
21 criticized the hurried nature of the development
22 of a protocol; is that right?

23 A. Yes, that's correct. It was irrelevant in my
24 opinion.

25 Q. And you know why -- Well, let me ask it this way.

1 It was irrelevant to you because, in this case,
2 you were under a time crunch, weren't you?

3 A. Yes, I was.

4 Q. Let's talk about that. Oh, and by the way, just
5 to make it absolutely clear, these two
6 publications that you referred to, Exhibit 436
7 and 437, were both published in 1997, right?

8 A. Yes, they were.

9 Q. And both of them discuss the use of an EDTA test
10 in the O.J. Simpson case, right?

11 A. Yes, they do.

12 Q. And they don't discuss the use of an EDTA test in
13 any other case, right?

14 A. No, they don't.

15 Q. Because, as a matter of fact, no one has ever
16 presented to any jury, anywhere, not just you, no
17 one has ever presented a test for EDTA in
18 bloodstains in a criminal trial before, other
19 than the O.J. Simpson case?

20 A. I don't know that that's true.

21 Q. Can you tell me another case in this country
22 where an expert has gotten up in court and
23 expressed an opinion that they are able to
24 determine the presence or lack of EDTA, in a
25 bloodstain, in a criminal jury trial?

1 A. No, I can't, but I don't know that it's true that
2 it hasn't happened. I haven't done a search of
3 the legal system to make that determination.

4 Q. Oh, really?

5 A. Really.

6 Q. So when you were asked to develop a protocol in
7 this case, are you telling us, then, that you
8 didn't search the public domain to see if maybe
9 someone else had already invented the wheel?

10 A. I searched the scientific literature, as I
11 indicated earlier, to see if there were published
12 methods in peer review journals that are
13 scientifically sound, in order to base my method
14 upon. I didn't search the so-called public
15 domain for such a method.

16 Q. Okay. But in any event, you found no other
17 reference in any other scientific journal across
18 whatever disciplines there may be, you found no
19 other reference to any other case or instance
20 where a jury had been presented an expert opinion
21 by somebody who says that they can determine
22 whether or not EDTA exists in a bloodstain,
23 correct?

24 A. Again, I did not search, like, legal proceedings.

25 Q. Perhaps my question was too long. Let's break it

1 down. You searched the entire scientific domain
2 of research articles, right?

3 A. Yes, I did.

4 Q. And in that entire search, I'm talking not just
5 chemistry, but any kind of forensic science
6 journals, right? You looked at those?

7 A. Yes, I did.

8 Q. Okay. Any kind of physics journals, or whatever?

9 A. I didn't look at physics journals.

10 Q. Whatever scientific domain you looked at, you
11 found no other case where anyone had done what
12 you are doing here today and come into court and
13 presented an opinion about whether you can
14 determine EDTA in a bloodstain other than the O.
15 J. Simpson case; correct?

16 A. That's correct.

17 Q. All right. Now, you were first contacted by
18 someone on the prosecution team in this case in
19 December, late December, of 2006, correct?

20 A. That's correct.

21 Q. Let me go back. I'm sorry, I need to clear up
22 one thing in this Exhibit 437 to 436, the FBI --
23 I will bring it back to you. Because we talked
24 about carryover, right?

25 A. Yes, we did.

1 Q. And the authors of that particular study
2 apparently believe that carryover explained why
3 they were -- why they found any kind of EDTA in
4 Mr. O.J. Simpson's sock, right?

5 A. Again, I don't recall that specific detail being
6 in this paper. I think, yes, they talked about
7 carryover as being a problem in the O.J. Simpson
8 case. I don't know if that was with a sock, or
9 if it was the bloodstain itself, or a swab, or --

10 Q. All right.

11 A. -- or what the evidentiary --

12 Q. That's fair.

13 A. -- material was.

14 Q. That's fair. I don't expect you to remember the
15 particular evidentiary item. But you understand,
16 though, that the conclusion was that carryover
17 was the result of the EDTA reading. EDTA
18 positive came from carryover, right?

19 A. There was a small signal for EDTA, as I recall,
20 that was attributed to a previous injection of
21 EDTA; again, carrying over into a future
22 injection.

23 Q. All right. So, then, if carryover explained that
24 small signal of EDTA in whatever piece of
25 evidence that was in Mr. Simpson's case, then, in

1 fact, there may not have been any EDTA in that
2 piece of evidence, right?

3 A. That's correct, yes.

4 Q. And, then, if there was not EDTA in that piece of
5 evidence, when the FBI concluded that there was,
6 then the FBI lab was wrong in that case, right?

7 A. I don't know that the FBI Laboratory concluded
8 that there was EDTA in that case. Again, I never
9 read the report that was issued in the O.J.
10 Simpson case. I didn't do the work myself. I
11 don't know what the actual report was. And I
12 don't know that they claimed there was a
13 significant amount of EDTA.

14 Q. All right. Well, let me ask it this way. Either
15 the protocol that was used in that case was
16 faulty, or the work performed was faulty, in
17 order for there to be this report of a finding of
18 EDTA on the evidence sample, right?

19 A. No, I disagree.

20 Q. Well, which is it?

21 A. Well, if I can elaborate?

22 Q. If you would like to, go right ahead.

23 A. Okay. What I believe is that the method was not
24 well validated, quite frankly.

25 Q. All right.

1 A. That's my understanding.

2 Q. Okay. I will accept that.

3 THE COURT: Mr. Buting, I think I'm going
4 to stop you there.

5 ATTORNEY BUTING: Okay. I see it's 2:30.

6 THE COURT: It is 2:30. So members of the
7 jury we'll take our break at this time. I will
8 remind you again, as usual, not to discuss the case
9 during the break.

10 (Jury not present.)

11 THE COURT: You may be seated. Counsel, I
12 will ask you to report back at quarter to three.

13 ATTORNEY BUTING: Okay.

14 (Recess taken.)

15 THE COURT: Mr. Buting, you may resume.

16 ATTORNEY BUTING: Thank you, your Honor.

17 **CROSS-EXAMINATION, CONTD.**

18 BY ATTORNEY BUTING:

19 Q. Okay. Now, sir you were first contacted by
20 somebody from the prosecution team in late
21 December of 2006, right?

22 A. If I could correct some testimony I made earlier;
23 I realized I made an error. And then I can
24 answer your question; is that all right?

25 Q. Well, we can wait for redirect, but -- what -- Is

1 it on one of the articles that you were referring
2 to?

3 A. It was in response to one of your questions.

4 Q. And what was it?

5 A. You asked me earlier, as I recall, if both these
6 articles referred to the testing in the O.J.
7 Simpson case. And during the break I reviewed
8 the article from the Journal of Analytical
9 Chem -- Toxicology and realized that I had
10 mistakenly agreed with your statement. This
11 article does not refer to the O.J. Simpson case.
12 So I wanted to set that -- the record straight.

13 Q. Oh. Okay. Well, let's -- let's just, for a
14 couple minutes, follow up on that. This article
15 is written, though, by four FBI employees, right?

16 A. Yes, it is.

17 Q. Including Mr. Martz, right?

18 A. Yes. I'm not changing my testimony on that, sir.

19 Q. Okay. Who testified in the O.J. Simpson case,
20 right?

21 A. Mr. Martz.

22 Q. And the article discusses the test on a sock; is
23 that right?

24 A. You will have to show me that, sir, I couldn't
25 find it in that article.

1 Q. Let me see if I can find it in mine. I'm going
2 to have Mr. Strang take a moment and look at it
3 and then we can move on and not bore the jury,
4 okay?

5 A. Yes, sir.

6 Q. All right. He's quicker than I am. If you would
7 take a minute and look at page 526, begin with
8 the circling of the word, but that will help
9 refresh your recollection.

10 A. Okay. The word "a sock" is circled, but there is
11 no reference to the O.J. Simpson case. And as I
12 -- I said, I agreed with your statement that it
13 referred to evidence in the O.J. Simpson case and
14 I need to withdraw that agreement because it --
15 to set the record straight.

16 Q. Well, do you know of any other case in the
17 mid-nineties when the FBI testified about EDTA on
18 some sock? Yes or no? Do you know of any other?

19 A. No.

20 Q. No, right?

21 A. No.

22 Q. Okay. And maybe just so the jury is a little bit
23 -- can understand your concerns about your
24 testimony being accurate, there's something
25 called a court testimony monitoring practice that

1 the FBI is engaged in, right?

2 A. That's correct.

3 Q. And the FBI, at least for the last number of
4 years, has a practice of following up what their
5 agents or lab people testify when they come to
6 court, right?

7 A. That's correct.

8 Q. And what you say here today, to this jury, could
9 be followed up and reviewed by your supervisor?

10 A. That's right. Our testimonies are reviewed as
11 part of our accrediting body's requirement.

12 Q. And so you want to be absolutely sure that you
13 don't say something that may be construed
14 negative about the bureau, by your supervisors,
15 unless it's true, right?

16 A. Sir, I just want to make sure I'm telling the
17 truth if I'm under oath.

18 Q. All right. If I can return, my question was,
19 that you were first contacted by somebody in the
20 prosecution team in late, very late December of
21 2006, right?

22 A. Yes, sir.

23 Q. Approximately two months ago, correct?

24 A. Approximately two and a half months ago.

25 Q. All right. And that was the first you had ever

1 heard about this case, or was it?

2 A. Yes, it was the first I had heard of this case.

3 Q. And as you thought about, well, geez, what can I
4 do here, to do this test, you thought maybe an
5 LC/MS/MS instrument might be an appropriate
6 instrument to try and run a test for this
7 particular chemical; is that fair?

8 A. Not in December of 2006.

9 Q. All right. Let me move forward, just make it a
10 little broader, then. As you later committed to
11 do a protocol or test in this case, you thought
12 about that particular instrument, right?

13 A. Yes.

14 Q. And that instrument, as you said, has been used
15 for decades, right?

16 A. Yes.

17 Q. It has commercial applications?

18 A. Yes, it does.

19 Q. So, for instance, the petroleum industry may use
20 it to determine the, you know, chemical
21 compositions of products that they are putting
22 out?

23 A. Perhaps.

24 Q. Pharmaceuticals I think you mentioned. One of
25 the things that they have to do is make sure

1 that, according to FDA regulations, that the
2 drugs that they are marketing contain the
3 chemical makeup that they represent, right?

4 A. The pharmaceutical industry does use LC/MS and
5 LC/MS/MS techniques.

6 Q. Sure. And they use it for all kinds of reasons
7 including testing how long their drugs may last,
8 right?

9 A. Generally, no, they tend to use the LC/MS and
10 LC/MS/MS for metabolite studies and looking for
11 what the body converts these drugs into to
12 monitor.

13 Q. I see. Okay.

14 A. Studies that are done.

15 Q. So they are looking -- They use the instrument to
16 see if -- how the drug breaks down into some
17 other metabolite, you say, right?

18 A. That's exactly right.

19 Q. And they want to be sure that there's not side
20 affects, that this drug breaks down into
21 something that might be toxic, for instance,
22 right?

23 A. That be might one -- one thing that they are
24 looking for, yes.

25 Q. And they are looking to see that the drugs don't

1 break down too quickly, or they are just trying
2 to find out how quickly the drug will break down,
3 for one thing, right?

4 A. That's part of it, yes.

5 Q. Expiration dates, that's what the whole point of
6 having those kinds of things on drug labels and
7 what not, right?

8 A. Well, I don't know that they are studying it for
9 expiration dates. Again, they are studying it
10 for metabolites, what the body is converting it
11 into. Shelf life, which I believe you were
12 referring to there, is a completely separate
13 issue.

14 Q. Okay. But that's an issue as well, that they
15 want to make sure that their drugs are, you know,
16 working long enough to be effective; in other
17 words, someone doesn't take a drug out of their
18 medicine cabinet five years later and it's no
19 longer -- it's way past the expiration date or
20 something?

21 A. And for some drugs they may need to do that, to
22 verify that it's -- it's stable.

23 Q. Okay. So you settled on this particular
24 instrument but, before you got there, the person
25 you spoke to was Mr. Gahn, correct?

1 A. That is correct, yes.

2 Q. And what you told him in December, when he asked
3 if you could run a test to see if there was EDTA
4 in a bloodstain, was that it would take you three
5 to four months before you would be able to get
6 him any results, right?

7 A. Yes, that's what I told him.

8 Q. Okay. And that that was, in part, because you
9 knew that you would -- it had been so long since
10 the O.J. case, the last time your lab had done
11 this kind of a test, that you would need to
12 develop or retest some protocol, right?

13 A. That we would need to validate the protocol in
14 order to use it.

15 Q. Sure. And that you would have to, in order to do
16 that, go through a number of tests and what not
17 in order to satisfy the validation process that
18 you thought was necessary, right?

19 A. That's exactly right, yes.

20 Q. And so you told them about three to four months?

21 A. That's the standard estimate I give. When we --
22 we're asked if we can develop a new method, my
23 standard response is three to four months and
24 that's what I recall responding to Mr. Gahn's
25 request.

1 Q. Okay. So when you say you get these non-routine
2 cases and you are asked to develop these
3 protocols, typically it takes three to four
4 months?

5 A. It depends, quite honestly.

6 Q. But that's the standard answer you give?

7 A. It's the standard answer.

8 Q. Okay. And he asked you -- he told you, well,
9 that was not going to work with the trial date
10 that was set in this case, right?

11 A. He relayed to me that there was an upcoming trial
12 date and indicated that they may need the results
13 faster in order for it to be used in this case.

14 Q. Okay. And yet, in that discussion with Mr. Gahn,
15 you still could not promise to do anything
16 quicker than three to four months, right?

17 A. In my recollection, at the time was, I actually
18 suggested that they try to find another
19 laboratory to do the analysis. That was my
20 initial response because we had the holidays
21 coming up, this was right before Christmas. And
22 most of my staff is gone for -- at the end of the
23 year, we lose our leave if we don't take off and
24 use it.

25 So, you know, realistically, looking at

1 the scenario we were represented with, I thought
2 three to four months was probably a fair
3 estimate. And the other thing we always have to
4 keep in mind, that we're the primary federal law
5 enforcement investigative body. So if a bomb
6 goes off, if there's a terrorist attack --

7 Q. Sir --

8 A. There's --

9 Q. Excuse me. We would like to get you back to
10 Virginia some time soon so. The question didn't
11 require that long an answer. If you would just
12 try and focus on the questions and give us some
13 answers.

14 A. I was trying to, sir, I'm sorry.

15 Q. Okay. And if you need to you, I mean, you will
16 have an opportunity with Mr. Gahn, you can
17 elaborate your answers and explain them further.
18 And if I cut you off and it's unfair, just tell
19 me, okay.

20 A. Yes, sir, I will.

21 Q. All right. Thank you. So, you gave Mr. Gahn the
22 standard response. Then, in January, you were
23 contacted again by someone else, about this case,
24 to see if you could do something a little
25 quicker, right?

1 A. I was, yes.

2 Q. And that was the FBI office or -- Who was that,
3 U.S. Attorney's Office, or what?

4 A. It was our local FBI Office.

5 Q. In Milwaukee?

6 A. Green Bay.

7 Q. Green Bay, okay. And after speaking with them
8 and learning something about the case and the
9 trial date that was starting February 5th, you
10 said, oh, well, I think we can do it faster than
11 that, right?

12 A. No, sir.

13 Q. You didn't?

14 A. No.

15 Q. Did you say you would try to do it faster; is
16 that the difference?

17 A. I told the agent that called me from our field
18 office in Green Bay, I explained to him that I
19 had had numerous conversations with Mr. Gahn and
20 I had agreed that we would accept the evidence
21 and analyze it for this case, after we had
22 developed a method and validated that method.

23 Q. Okay. But you told Mr. Gahn, or you told this
24 FBI agent in Green Bay, that you thought you
25 would be able to do all of that while the trial

1 was going on and you would be able to get results
2 by the end of the trial, right?

3 A. No, sir. I told him that we would do our best to
4 get the work completed in the time requirements
5 that were needed.

6 Q. Okay. And you knew that those time requirements
7 were that it's, what, early March now, you knew
8 that you were going to have to get something in
9 probably by around the end of February, right?

10 A. I believe the deadline we were given was,
11 essentially this week, to have the actual results
12 in.

13 Q. Okay. Actually, March 9th, I think, right?

14 A. That sounds familiar, yes.

15 Q. Okay. So you beat the deadline, right?

16 A. We did, yes.

17 Q. Because your actual report is dated
18 February 26th?

19 A. That's correct.

20 Q. Now, you testified about why the FBI would have
21 any interest in this case in the first place, do
22 you recall that, with Mr. Gahn?

23 A. Yes, I do.

24 Q. You said that, oh, the FBI has this -- has a
25 concern about public corruption, correct?

1 A. It's one of the types of investigations that we
2 have a classification for within the FBI, yes.

3 Q. Sure, you have agents that go around and do
4 investigations when there is allegations of
5 public corruption, right?

6 A. That's correct, yes.

7 Q. It's not just your chemistry unit that gets
8 involved, right?

9 A. Of course not. Of course not.

10 Q. You tell me, now you knew this case, by the way,
11 was charged against Mr. Avery in November of
12 2005, 16 months ago, approximately, okay. Are
13 you aware of that?

14 A. That the charges were made then?

15 Q. Yes.

16 A. I don't know when the charges were made, sir.

17 Q. Well, you looked at these swabs that you were
18 testing, right, and they had some dates on them?

19 A. Yes.

20 Q. Some of those dates were November of 2005, right?

21 A. That's correct.

22 Q. So you knew that Mr. Avery must have been charged
23 by that time.

24 A. No, sir, I just knew that's when the date that
25 indicated the specimens were collected. I don't

1 have any knowledge of when charges were made.

2 Q. Okay. In any event, can you tell me what
3 investigation was started by the FBI to
4 investigate allegations that Mr. Avery made, upon
5 his arrest, publicly, that the police had planted
6 his blood in Teresa Halbach's car?

7 A. I have no knowledge of an investigation.

8 Q. In fact there was none, was there?

9 A. I have no knowledge of it --

10 Q. Okay.

11 A. -- whether there was or was not.

12 Q. Can you tell me when the U.S. attorney convened a
13 grand jury investigation to investigate
14 allegations of public corruption made by
15 Mr. Avery, against police officers, in this case?

16 A. I have no knowledge of whether or not they did
17 it.

18 Q. Okay. And can you tell me when any members, any
19 agents from the FBI spoke to Lieutenant Lenk,
20 Lieutenant Colborn, or any other person involved
21 in the investigation of this case?

22 A. Sir, I'm a scientist; I'm not a law enforcement
23 officer, I have no knowledge of anything of that
24 nature.

25 Q. Now, you were trying to find out in your test

1 simply whether or not there was a corrupt,
2 dishonest, criminal cop who planted evidence to
3 frame Mr. Avery is one scenario, right?

4 ATTORNEY GAHN: I'm going to object, your
5 Honor. I don't believe that was his testimony.

6 ATTORNEY BUTING: I can rephrase it, it's a
7 little cumbersome.

8 THE COURT: Go ahead.

9 Q. (By Attorney Buting)~ You testified, one of the
10 FBI's concerns was, that if there was a corrupt
11 cop on the street and doing something illegal,
12 and certainly planting evidence to frame somebody
13 would be illegal, right? Would you agree with
14 me?

15 A. Yes, I would.

16 Q. Okay. And that one of the functions of the FBI
17 was to ferret out bad cops like that, right?

18 A. Generally, that's what I -- Yes --

19 Q. Okay.

20 A. Generally --

21 Q. Okay.

22 A. -- that's what I said, yes.

23 Q. And so what the FBI was asked to do in this case,
24 then, was to find out if there was evidence that
25 would point towards someone planting the

1 evidence, against Mr. Avery, as he has said,
2 police officers, right; that was one scenario
3 that you were looking into?

4 A. That's correct.

5 Q. Or whether or not perhaps Mr. Avery was just full
6 of hot hair and making this up, right?

7 A. No, sir, I wouldn't say that that was the other
8 scenario. The other scenario was whether that
9 blood came from active bleeding --

10 Q. All right.

11 A. -- as opposed to from that tube of EDTA preserved
12 blood.

13 Q. All right. I didn't -- Don't let me put words in
14 your mouth then, but those were the two
15 scenarios. And as far as you were concerned,
16 you're an objective chemist, you didn't care
17 which way it came down; is that your testimony?

18 A. That's absolutely my testimony.

19 Q. And that's the position of the FBI, your boss, I
20 mean, your organization that you work for, they
21 were taking an objective and independent view, in
22 this case, and didn't care which way it came
23 down, in that analysis; is that right?

24 A. Well, I can't speak for any of my bosses. I'm
25 here testifying for myself. And that is my view

1 of it, yes, I could care less as to what the
2 results are, quite frankly.

3 Q. I'm going to show you what's been marked as
4 Exhibit 479 and see if you can identify that for
5 us, please. I'm going to substitute a copy
6 later, so it's really just the first few pages
7 we're concerned about. The chain of custody
8 isn't at issue here.

9 A. Okay. The first few pages are a copy of the
10 internal communication that the FBI uses to
11 essentially write memos between field offices and
12 divisions within the FBI. And this is the
13 specific request that was sent in to me for
14 analysis in this particular case.

15 Q. Okay. And did you read the sentence on top of
16 page two that discusses the purpose of this
17 request for your services?

18 A. The purpose of this request is to establish the
19 presence of EDTA in the vial of blood, thereby
20 eliminating the allegation that this vial was
21 used to plant evidence.

22 Q. Okay. Can you show me anywhere in there where
23 that request says our purpose is also to find out
24 if there might be any evidence that there's a
25 corrupt cop in Manitowoc County.

1 A. No, I don't see anything of that nature.

2 Q. Okay.

3 A. But I can elaborate if you like.

4 Q. So, the purpose of your -- of the FBI's request
5 of your laboratory, to get involved in this case,
6 the state crime -- Let me step back for a second.
7 The FBI generally is a law enforcement branch for
8 federal crimes, correct?

9 A. That's correct.

10 Q. You don't typically get involved in run of the
11 mill state crimes, do you?

12 A. That's incorrect.

13 Q. Well, unless someone brings you in from the state
14 level, for some particular reason, it's not
15 normally the kind of a case where you take
16 jurisdiction, is it?

17 A. Forty percent of the cases that we work in my
18 unit come from state and local investigations.
19 So I would say it's a significant number.

20 Q. Is homicide of a citizen in the State of
21 Wisconsin a federal crime?

22 A. No, sir, it's not.

23 Q. Okay. Is mutilation of a corpse in the State of
24 Wisconsin a federal crime?

25 A. No.

1 Q. Okay. So, the purpose of you getting your
2 federal agency involved in this state crime was
3 to eliminate the allegation that this vial was
4 used to plant evidence; isn't that true?

5 A. No, sir. If I can elaborate, I will be happy to
6 explain.

7 Q. You can elaborate later, sir. Now, the protocol
8 that you developed for this case, this test, all
9 right, you began to develop around the beginning
10 of February, February 1st, something like that?

11 A. I believe we began the actual method validation
12 on -- at the very end of January, perhaps the
13 very last day of January.

14 Q. All right. So January 31st, let's say, okay.
15 The protocol was completed on February 14th?

16 A. That's correct.

17 Q. About two weeks, right?

18 A. Let me correct that, the protocol was issued --

19 Q. I said completed. I will get to the differences
20 in a second.

21 A. The protocol was completed and issued on
22 February 15th.

23 Q. Okay. Was issued on the 15th, but it was
24 actually completed on the 14th, other than a
25 review process still, right?

1 A. Well, it's not technically complete until it
2 passes the review process.

3 Q. Okay. And this so-called validation studies, or
4 whatever you told us was ongoing, that was done
5 by February 14, right?

6 A. Can I refer to my notes?

7 Q. Sure.

8 A. I believe the last validation test was performed
9 on February 13th.

10 Q. Okay. Thank you. So February 13th. So, really,
11 14 days, then, if you started on the 31st of
12 January, right.

13 A. Yes, 14 days.

14 Q. Okay. But as you said, it's not complete unless
15 it goes through an approval process, right?

16 A. That's correct.

17 Q. And the approval process, in your instance, I
18 think you said -- I'm not sure if you did say,
19 actually. But I think you did, yes, you said you
20 had another scientist look at it?

21 A. Which part are you referring to, sir?

22 Q. Well, between February 13th and February 15th,
23 did you have somebody else look at this protocol
24 before it was issued?

25 A. Yes, I did.

1 Q. A who was that?

2 A. I had -- Well, if I can clarify things, I had
3 another scientist review all of the validation
4 data --

5 Q. Okay.

6 A. -- before the protocol was issued.

7 Q. Who was that?

8 A. Madeline Montgomery.

9 Q. And is Madeline Montgomery in some independent
10 lab?

11 A. No, she's within the FBI Laboratory, Chemistry
12 Unit.

13 Q. And she's in the very same Chemistry Unit as
14 yourself?

15 A. Yes, she is.

16 Q. Okay. Anybody else?

17 A. Reviewing the validation data, only the chemist
18 that did the actual work.

19 Q. And that wouldn't count for your approval
20 purposes, you have to have somebody else take a
21 look at this, right?

22 A. No, sir, I mean, the first person that does the
23 work has to, of course, review it and verify all
24 of the data is correct. So that's your first
25 level review. Then you follow that up with a

1 second level review by an independent person and
2 who wasn't involved in the study at all. And I
3 always assign that to a supervisory chemist
4 within the unit, someone with more experience,
5 etcetera.

6 Q. Okay. Someone in your unit, though, right?

7 A. It has to be done in the same unit in which they
8 are qualified to do the work. We couldn't get it
9 to a DNA examiner --

10 Q. Sure.

11 A. -- they are not a chemist.

12 Q. Of course. Anybody else look at this validation
13 data, besides yourself and Ms Montgomery and the
14 technician who ran it?

15 A. I don't believe so.

16 Q. Okay. Well, I believe we learned a little bit
17 earlier, before the break, that the FBI has
18 something called a forensics science research
19 division, don't they?

20 A. Yes, they do, they have a research unit.

21 Q. And, in fact, that's where you said Mr. Miller
22 and Mr. McCord were working. It's called the
23 Forensic Science Research and Training Center,
24 right?

25 A. That's correct.

1 Q. And these people don't work on cases?

2 A. No, they do not.

3 Q. They just do research, right?

4 A. They do long term research, primarily.

5 Q. And that includes developing protocols for new

6 types of tests, right.

7 A. Not in recent years, no. Most of those duties

8 fall back to the case working units. As I

9 indicated --

10 Q. Oh, really? You don't -- These are scientists

11 who are doing research, but you don't have them

12 ever look at your new protocols; you let the

13 caseworkers do that?

14 A. Yes, I mean, I think in this instance, the people

15 that work under me are more qualified to look at

16 this particular type of an analysis. The

17 research unit these days are heavily focused in

18 dealing with homeland security issues. They

19 would not have the time to review this type of

20 material.

21 Q. Well, you didn't think you had the time either,

22 initially, right?

23 A. That's correct. But I can make myself make the

24 time; I can't make them make the time.

25 Q. Just so we're clear, then, you did not have any

1 scientist researcher from the FBI Forensic
2 Science Research and Training Center review your
3 validation data or the protocol that you used in
4 this case, before using it in Mr. Avery's case,
5 right?

6 A. That's correct.

7 Q. Okay. This Madeline Montgomery, that's in your
8 unit?

9 A. Yes, she is.

10 Q. She's the one you said you had independently
11 review the validation data?

12 A. Yes.

13 Q. Does she report to you?

14 A. Yes, she does.

15 Q. Do you review her work?

16 A. Yes, I do.

17 Q. Do you decide her raises and promotions?

18 A. I do, yes.

19 Q. Okay. And that's your idea of an independent
20 scientist?

21 A. Absolutely. We train our scientists to be
22 unbiased.

23 Q. Actually, while I'm on that, you talked about how
24 peer review is done for articles that get
25 published in scientific journals, right?

1 A. Yes, that's correct.

2 Q. And that before anything gets put into some sort
3 of publication that has any reputation
4 worthwhile, the editor takes it from the author,
5 the manuscript from the author, and finds some
6 other scientist to review it?

7 A. Yes, that's correct. Qualified scientist, based
8 on the editor's opinion.

9 Q. Right. And you say that that's done blindly, so
10 that, you know, there is no bias involved by the
11 reviewers, right?

12 A. That's exactly right.

13 Q. And that's important in order to be fair and make
14 sure that you can weed out any kind of bias that
15 one individual may have, either for or against
16 another.

17 A. Yes, I believe that's true.

18 Q. But you didn't have Ms Montgomery or Mr. -- or
19 the technician who did this case, run through
20 these tests in a blind fashion, did you?

21 A. Not blind specifically for the evidence in the
22 case, but we did do some blind testing before we
23 issued the protocol.

24 Q. And the protocol, just so we're clear, it
25 wasn't -- didn't grow out of any kind of ongoing

1 research project that you were doing in your lab,
2 right?

3 A. That's correct, it was based on the publication,
4 as I indicated earlier.

5 Q. No, no, no. What I'm saying is, it didn't grow
6 out of, it didn't develop because of some ongoing
7 project separate from Mr. Avery's case?

8 A. No, no, no. It was -- The protocol was validated
9 and reviewed and put into use specifically for
10 this case.

11 Q. And only this case, so far, right?

12 A. So far, yes.

13 Q. Okay. And as you say, the data stuff was done on
14 the 13th of February and it was issued on the
15 15th, right?

16 A. Which --

17 Q. The protocol.

18 A. -- data stuff? I'm sorry?

19 Q. You said that all of the data acquisition,
20 however that was being done by these
21 validation -- what you call validation tests, was
22 completed on the 13th, right?

23 A. The validation work was completed -- the last day
24 of the validation was the 13th of February.

25 Q. And it was formally issued and adopted by your

1 laboratory on the 15th of February, right?

2 A. Yes, it was.

3 Q. Of this year, 2007?

4 A. Yes, that's correct.

5 Q. Okay. And in order to get to that point where
6 it's actually issued, that -- that constitutes an
7 approval process, right?

8 A. Absolutely, it does.

9 Q. And that approval process, by your own protocols
10 with the FBI, requires approval by the unit
11 chief, right?

12 A. That's correct.

13 Q. As well as someone else, right?

14 A. As well as the unit chief over our Quality
15 Assurance Unit, which is an independent unit that
16 oversees all quality within the laboratory.

17 Q. Now, in this case, you are the unit chief?

18 A. I'm the unit chief of the Chemistry Unit, but --

19 Q. Right.

20 A. -- not the Quality Assurance Unit.

21 Q. So in the protocol, the chain of how these things
22 are supposed to be approved -- By the way, this
23 whole approval process, is part of quality
24 assurance, right?

25 A. That's exactly right.

1 Q. And the idea is, we want to get some other eyes
2 looking at this to make sure that it's -- that
3 it's, you know, the protocols have been followed
4 and that this is valid science, right?

5 A. That's right.

6 Q. Okay.

7 A. And other scientists review the procedure before
8 it's issued.

9 Q. Right. Now, in your case, though, one of those
10 steps was really sort of skipped because you were
11 involved doing the development of the protocol,
12 right?

13 A. No, sir, not at all.

14 Q. Oh, so you just reviewed yourself?

15 A. No.

16 Q. You graded yourself?

17 A. No.

18 Q. Did you find another unit chief besides the
19 quality assurance person?

20 A. No, as I indicated, the review is done by another
21 scientist. And the scientist that did the review
22 for the protocol, that went through the stepwise
23 procedure, to verify, again, that everything was
24 written as was required by our quality assurance
25 program, that the validation study had been

1 completed, was Madeline Montgomery.

2 She did an independent review of this
3 procedure and then -- I'm not approving it in the
4 sense of I'm saying it's okay to be used, my
5 approval is simply that all the steps for the
6 quality assurance program, within my unit, have
7 been met.

8 Q. So --

9 A. That's why --

10 Q. Sir.

11 A. -- my signature is on the approval line.

12 Q. The answer to my question then is, yes, you
13 skipped a step in the usual approval process
14 because you were the unit chief who would
15 otherwise have to independently approve a new
16 protocol?

17 A. No, you're incorrect. No steps were skipped,
18 this is the same approach we take to every
19 protocol that's issued within the FBI Laboratory.
20 I have to be the final signature for approval of
21 any protocol that's issued out of my unit.

22 Q. All right. And so you graded yourself and gave
23 yourself and A+?

24 A. I did not --

25 ATTORNEY GAHN: Objection, your Honor, as

1 to the form of the question.

2 THE COURT: Sustained.

3 Q. (By Attorney Buting)~ As part of the discovery
4 request, you know, attorneys file requests and
5 ask your -- people such as yourself to produce
6 documents, right?

7 A. Yes.

8 Q. You are familiar with that process?

9 A. I am, yes.

10 Q. You are aware that I asked you, through Mr. Gahn,
11 to disclose the FBI protocol that was used in
12 1997 in the O.J. Simpson case, right?

13 A. I am aware that you asked for that, yes.

14 Q. Okay. And yet your lab refused to give that to
15 me; isn't that right?

16 A. The attorney that represents our laboratory did
17 indicate that we were not to turn over any other
18 protocol except the one that was used in this
19 particular case, as her opinion was, it was the
20 only one relevant --

21 Q. In her opinion?

22 A. -- for this report.

23 Q. So in her opinion, your lab didn't want this jury
24 to see the only other protocol, the only other
25 time you have ever tested for EDTA in a

1 bloodstain in any case in this country?

2 ATTORNEY GAHN: Objection, your Honor, that
3 was not his testimony.

4 THE COURT: Sustained.

5 Q. (By Attorney Buting)~ Well, you knew that if you
6 turned over that protocol to the defense, I would
7 use it to cross-examine you, right?

8 A. I don't know that.

9 Q. Well, wouldn't take much of a guess to figure it
10 out, that if I had your prior protocol, I could
11 point out to this jury the differences that you
12 made, or lack of differences, between that
13 protocol and this one, right?

14 ATTORNEY GAHN: Objection, your Honor, as
15 to the relevancy of the O.J. Simpson protocol.

16 ATTORNEY BUTING: Couldn't be more
17 relevant.

18 THE COURT: Well, I'm going to sustain the
19 objection, though, on that basis, if there was --
20 the witness testified it wasn't his decision, but
21 the attorney's decision, not to turn it over. If
22 there's a request for an order to turn it over, that
23 should be directed to the Court, so I don't think
24 this witness is in a position to answer. That's why
25 I'm sustaining the objection.

1 Q. (By Attorney Buting)~ All right. At any rate,
2 because we don't have, in front of us today -- I
3 assume you didn't bring it, right, or did you?

4 A. No, I did not.

5 Q. So you didn't bring it, if the Court was -- if I
6 asked the Court to order you to turn it over
7 today, you don't have it to do that, do you?

8 A. No, I do not.

9 Q. Okay. So, because you don't have it, we don't
10 have anything to compare this protocol to the one
11 you used in the OJ case?

12 A. No, you don't.

13 Q. We talked briefly about blind tests, let's
14 explain a little bit to the jury. There is --
15 There is a concept or a technique that's used in
16 science to -- it's called blind testing; are you
17 familiar with that?

18 A. Yes, I am.

19 Q. And the idea behind blind testing is that you --
20 the examiner, or the person who is testing the
21 results or the samples doesn't know what they are
22 or where they came from, right?

23 A. Sometimes that's considered blind testing, yes.
24 There are other forms of blind testing.

25 Q. Okay. And one of the reasons that you do -- or

1 that the scientists do blind testing is to remove
2 the possibility of some sort of bias in the
3 examiner's testing process, right?

4 A. Yes, that's exactly right.

5 Q. And so, for instance, when they are testing -- or
6 when you are testing drugs, they will sometimes
7 have a placebo with one person and the effective
8 drug with another. And the person who is testing
9 it doesn't know one way or the other?

10 A. That's right.

11 Q. Okay. In this case, maybe in all FBI cases, I
12 don't know, but in this case, the person who did
13 the tests didn't do a blind test, did he? Let me
14 be more specific, because I see you are already
15 trying to pick that question apart. In this
16 case, the person who tested the swabs and the
17 blood that was submitted to you, from the Avery
18 case, did not do a blind test, did he?

19 A. No, he knew that this was evidence related to a
20 case that we were working.

21 Q. And he knew more than just that it was evidence,
22 he knew exactly what evidence was which, correct?

23 A. Yes, I -- Yes, he did. I knew which specimen
24 came from which area.

25 Q. Okay. And the designations that we saw some of

1 them up there Q-46, Q-48, K-3, those
2 designations, wasn't some blind code that he
3 didn't know what they meant, right?

4 A. No, those were the designations that we gave to
5 those individual items that we would refer to
6 within our report.

7 Q. And when you say we, let's be very clear to the
8 jury you are talking about yourself and the
9 technician who did the tests?

10 A. Well, no, I'm sorry, in that instance, when I say
11 we, I mean the entire FBI laboratory, that's the
12 system that we use. Those numbers, letter number
13 designation Q-43, for example, it's actually
14 assigned by our evidence control unit. They are
15 the very first ones that receive the evidence and
16 do that initial assignment of specimen
17 designations to -- to evidence.

18 Q. Okay. But -- Well, let's name this mystery
19 person who was doing the testing in your case;
20 it's a guy named Jason Brewer, right?

21 A. That's correct.

22 Q. B-r-e-w-e-r.

23 A. That's correct.

24 Q. And he is more than just a technician, would you
25 agree?

1 A. Well, I would -- He's a Ph.D. He is recently
2 promoted to be an examiner --

3 Q. Okay.

4 A. -- in this area.

5 Q. And he's the one who actually did all the tests
6 that you then later reviewed, right?

7 A. Well, not exactly. He performed most of the
8 analyses, that part is true. But I was reviewing
9 the data all along. And I was with him a great
10 majority of the time that decisions were being
11 made about the order of things and the amount of
12 sample to use, etcetera.

13 Q. But you are a busy man, you are a manager, right?

14 A. I'm a manager, yes.

15 Q. You don't have time to sit around in the lab
16 while these machines are clicking and whirring,
17 right?

18 A. Well, I did make time for this case, I was in the
19 lab a substantial amount of time, actually.

20 Q. Okay. But is it fair to say that Mr. Brewer is
21 the guy who really, from one test to the other,
22 did all of the LS/MS/MS (sic), and the
23 extractions, and the whole protocol; he was
24 involved in every step of your protocol?

25 A. There's multiple answers to your question; could

1 you break it out?

2 Q. Yeah, that was a bad question. Is it fair to say
3 that Mr. Brewer is the one who did the actual
4 instrument analyses in this case?

5 A. Yes, that is fair to say.

6 Q. Okay. And Mr. Brewer, you have designations of
7 chemist at sort of the lower level?

8 A. That's the equivalent of a technician,
9 essentially.

10 Q. Okay. And then you get promoted to forensic
11 chemist examiner, right?

12 A. That's exactly right.

13 Q. And that allows you to do other things, including
14 expert witness testimony regarding the results of
15 chemical analysis, right?

16 A. That is true, yes.

17 Q. And you have seen Mr. Brewer's resumé, have you
18 not?

19 A. Yes, I did. I turned it over to you.

20 Q. Okay.

21 (Exhibit 480 marked for identification.)

22 Q. (By Attorney Buting)~ I'm showing you what's
23 marked now as Exhibit 480; this is Jason Brewer's
24 curriculum vitae, right?

25 A. Yes, it is.

1 Q. And would you agree with me that it says in his
2 curriculum vitae that he is qualified, by your
3 laboratory, to come to court and to explain to
4 juries what it is he does in cases?

5 A. No, sir, it does not say that on his curriculum
6 vitae that he is qualified to do so --

7 Q. Oh.

8 A. -- and he is not qualified to do so.

9 Q. Doesn't this say, under his job description here,
10 interpret data, prepare written reports and
11 provide expert witness testimony regarding the
12 results of chemical analysis?

13 A. That's correct, that's what it says. But he
14 is -- he was a chemist and qualified as a
15 chemist, as a technician. And, then, just last
16 September, he was promoted to the level of an
17 examiner, but he is still in a training mode as
18 an examiner. He still works cases as a chemist.
19 Until he is qualified, completes his training,
20 passes all the tests, he is not allowed to
21 testify until that is completed and he is
22 certified. He is not a certified examiner at
23 this time, sir.

24 Q. Well, he is a forensic chemist examiner?

25 A. That's his position, his official position title

1 within the U.S. government.

2 Q. And so, despite the fact that the curriculum
3 vitae that he has, that you turned over to us,
4 that says that he can do that, it's your
5 testimony today that he is not qualified to come
6 here like you are?

7 A. That's correct.

8 Q. Okay. So that's why we're not hearing from him?

9 A. That's correct. I supervised his work and I'm
10 the one that compiled the results and formed the
11 opinion and issued the report; that's why I'm
12 here today.

13 Q. All right. You say that Mr. Brewer is still in
14 training for courtroom testimony, right?

15 A. No, sir, I didn't say that.

16 Q. Well, you said he is not qualified to come here
17 and testify to this jury about what he did?

18 A. That's what I said, yes.

19 Q. Okay. What sort of courses or training does he
20 need to do to learn how to tell the truth to a
21 jury.

22 ATTORNEY GAHN: Objection, your Honor, as
23 to the form of the question.

24 THE COURT: Sustained.

25 Q. (By Attorney Buting)~ Let me just turn for a

1 moment to this particular instrument that you
2 use, GS -- or I'm sorry -- LC/MS/MS. All right.

3 THE COURT: Mr. Buting, just before you get
4 into that new --

5 ATTORNEY BUTING: You want to stretch?

6 THE COURT: -- topic, lets stand up and
7 stretch.

8 ATTORNEY BUTING: Okay.

9 THE COURT: All right. Mr. Buting, you may
10 resume.

11 ATTORNEY BUTING: Thank you.

12 Q. (By Attorney Buting)~ Let's talk about this --
13 this instrument, this LS/MS/MS (sic) instrument.
14 It's three instruments, you said, together,
15 right?

16 A. Yes, sir, it's the LC/MS/MS.

17 Q. I'm sorry, I'm not a chemist. I keep botching
18 that designation, I'm sorry. I want to explain,
19 make sure the jury understands, because sometimes
20 lay people, like myself, are in awe of science
21 and machines and we sometimes think that they do
22 more than they can, okay?

23 A. Yes.

24 Q. So this isn't something that you just push a few
25 buttons, run a sample through, some lights flash

1 and buzzers go off, and then spits out a result
2 at the end, paper result says this is EDTA, or
3 this is not EDTA, right?

4 A. That's correct.

5 Q. It's nowhere near that simple, right?

6 A. No, it's not that simple.

7 Q. And in fact, what the whole premise of the
8 machine is is that it's supposed to somehow
9 determine the characteristic of an ion and
10 whether or not it's consistent with one chemical
11 or another?

12 A. That's not technically correct, no.

13 Q. All right. A series of ions, is that the
14 correction you wanted?

15 A. It's fragments that are ions --

16 Q. Okay.

17 A. -- that originate from the chemical itself.

18 Q. Okay. If you turn to -- I have handed you what's
19 been marked as exhibit -- I'm sorry, what is the
20 exhibit number?

21 A. 441.

22 Q. 441, and it's entitled guidelines for comparison
23 of mass spectra, right?

24 A. That's correct.

25 Q. And this is a document that's issued by your

1 unit, the FBI Laboratory, Chemistry Unit, right?

2 A. That is correct.

3 Q. June 21st of '06 is this one, right?

4 A. Yes, it is.

5 Q. And it's signed by yourself at the end, as well
6 as the quality assurance people?

7 A. Yes, it's signed by myself and two other
8 individuals.

9 Q. Okay. And if you would turn to page three,
10 there's a section that has a heading that says
11 determination of diagnostic ions in a mass
12 spectrum, okay?

13 A. Yes, sir.

14 Q. Your guidelines state, quote, the definition of
15 what makes any given ion "characteristic" of a
16 particular chemical structure is somewhat
17 nebulous and there does not appear to be any
18 universally accepted standard in the field,
19 correct?

20 A. Yes, that's what it says.

21 Q. Okay. And it says that's why you have got to
22 have good and consistent judgment and you have to
23 employ judgment -- subjective judgment as an
24 examiner, when you look at the results of these
25 tests, right?

1 A. It does say you should apply good and consistent
2 judgment, it doesn't say subjective, as you
3 indicated there.

4 Q. Is there any such thing as objective judgment?

5 A. I don't know.

6 Q. I will take that as a no.

7 A. I don't know.

8 Q. You are going to fight me on that one too?

9 A. No.

10 Q. Okay. And, then, on the last page, page 10 of 15
11 actually, limitation section?

12 A. I'm sorry, I do want to -- I want to rethink that
13 answer. I do believe there is such a thing as
14 objective judgment.

15 Q. All right. Go ahead turn to page 10 of 15. You
16 got it?

17 A. Yes, sir.

18 Q. Okay. And this is a heading that's called
19 limitation and, again, these are the guidelines
20 on how to interpret the results of these tests,
21 right? That's what this document is?

22 A. Of the mass spec --

23 Q. Mass spectra.

24 A. -- type test?

25 Q. Yes.

1 A. Yes, this -- this is a narrative talking about
2 the general limitations in evaluating mass
3 spectral data.

4 Q. And this particular section is headed
5 limitations. It's telling you, you know, hold
6 on, there are some limits to this we have got to
7 consider, right?

8 A. That is exactly right.

9 Q. Okay. And doesn't it say, quote, the mere fact
10 that an unknown mass spectrum matches well to the
11 spectrum of a known standard will rarely, by
12 itself, be sufficient grounds to claim the
13 presence of that compound in the question sample,
14 correct?

15 A. That's correct.

16 Q. Doesn't it also say that, quote, similarly, the
17 fact that an unknown mass spectrum fails to match
18 that of a known standard generally will not, by
19 itself, constitute grounds for concluding that
20 the compound is not present in the questioned
21 spectrum, correct?

22 A. That's correct, too.

23 Q. All right. And so what you have to do with these
24 mass spectrum tests is look at a big picture,
25 consider all the data, as well as what comes out

1 of this machine or instrument, correct?

2 A. Yes, you have to look at all the data that's
3 generated and put all the pieces of the puzzle
4 together to reach your conclusion.

5 Q. All right. Your protocol, then, that was
6 developed on February -- or issued on
7 February 15th of 2007, for this case only, it's
8 important that whoever do the test, follow the
9 protocol as written, correct?

10 A. Yes.

11 Q. And that you are not supposed to just adjust one
12 procedure differently than what's in the
13 protocol?

14 A. You are allowed to do that as long as you
15 document the fact that you did make a deviation
16 to the procedure.

17 Q. Okay. And when you do that, you are actually, by
18 your lab's protocol, you are supposed to fill out
19 some kind of a form saying I want to deviate from
20 the protocol?

21 A. Well, it depends, there's two types of
22 deviations. We have what are called major
23 deviations, which are quality affecting, meaning
24 by doing this deviation you potentially are going
25 to affect the results of the test and you have to

1 get a higher level of approval. It has to go up
2 to the quality assurance unit, if you are going
3 to do a major deviation. If you're going to do a
4 minor deviation, on the other hand, it simply
5 just requires a notation in the notes with
6 approval by the examiner and myself, and in this
7 case, approval by me.

8 Q. All right. Turn to 434 exhibit, please, page 3
9 of 9, No. 9 procedure, got that?

10 A. Yes, sir.

11 Q. Sets forth five steps to follow, right?

12 A. Yes, sir.

13 Q. And the last step after you do this filtrate
14 and -- I'm not going to bore everybody with the
15 scientific jargon -- but is that you are supposed
16 to transfer this -- this solution that you come
17 up with, first, and inject it into a system
18 that's a negative ion mode, correct?

19 A. That's what the procedure says, yes.

20 Q. And then you follow that up and inject some of
21 the other samples, if they are positive, into the
22 positive ion mode, correct?

23 A. That's correct.

24 Q. And in this case, Mr. Brewer did the reverse,
25 didn't he?

1 A. Yes, he did.

2 Q. He injected it, first, into the positive ion
3 mode, right?

4 A. Yes, he did.

5 Q. And then into the negative ion?

6 A. Yes, he did, per my instructions.

7 Q. Okay. Your instructions?

8 A. Yes.

9 Q. Okay. So on the very first time you used this
10 protocol, you started changing the procedures
11 around?

12 A. No, sir. Consider that a minor deviation,
13 simply, it's like you put your right shoe on
14 first or your left shoe--

15 Q. Okay.

16 A. It's that simple.

17 Q. The exhibit in front of you, also, in
18 paragraph two -- number two, I should say, not
19 paragraph two, first page?

20 A. Paragraph two, first page.

21 Q. Not paragraph two, item number two, where it says
22 scope?

23 A. Yes, sir.

24 Q. It says that this procedure allows for the
25 screening and confirmation of EDTA in suspected

1 bloodstains, right?

2 A. That's correct.

3 Q. The protocol isn't actually validated to do -- to
4 quantitate a particular specific level of EDTA,
5 correct?

6 A. That's exactly right.

7 Q. And the difference, just so we're clear, is that
8 protocol is designed to see if there's any level
9 of EDTA that can be detected under your -- above
10 your bar, your limit, right?

11 A. Yes, that's part of it, yes.

12 Q. But the protocol is not designed to allow you to
13 actually fix a number and say this is 500
14 micrograms or whatever, right?

15 A. It's not validated to provide an accurate number
16 on any measurement we make where we put a number
17 on it.

18 Q. Okay. Mass spec instruments, though, you can set
19 up a protocol and they are sometimes used to
20 actually quantitate, right?

21 A. Yes, they are.

22 Q. But you didn't use it -- you didn't use the
23 instrument in this type of protocol to do that,
24 right?

25 A. That's correct, we did not.

1 Q. And you did not, for instance, when you tested in
2 the blood vial that had Mr. Avery's name on it,
3 you didn't quantitate what level of EDTA was in
4 the tube, right?

5 A. It wasn't validated to do quantitative analysis,
6 so we did not --

7 Q. All right.

8 A. -- put a specific value on the amount of EDTA
9 that was present in the tube.

10 Q. That's fine. That's all I'm asking. You didn't
11 do it, right?

12 A. That's right.

13 Q. And you issued your report, Exhibit -- what is
14 it, 326? No. Do you have the report up there
15 with you?

16 A. Yes, I do.

17 Q. What is the number?

18 A. Exhibit 435.

19 Q. 435. You didn't -- As per the protocol, you
20 didn't express any kind of opinion in the report
21 about how much, if any, EDTA was detected in the
22 vial from -- of Mr. Avery's blood, right?

23 A. No, I did not.

24 Q. Okay. And one of the things that was kind of
25 really unique about it, or is unique about this

1 case, is that when you are testing that purple
2 vial, it's 11 years old, right?

3 A. Yes, I believe it was.

4 Q. It was drawn from Mr. Avery's arm in January of
5 1996 and tested in your lab in February of 2007,
6 correct?

7 A. I would have to refer to my notes.

8 Q. Go ahead.

9 A. Yes, that's a correct statement.

10 Q. Okay. And we talked a little bit -- or you
11 talked a little bit about this, I think, with
12 Mr. Gahn, but the whole question of the stability
13 or lack of stability of this chemical, EDTA, is
14 an issue of research, correct? In the scientific
15 community?

16 A. I don't know how much it's researched these days.
17 It's -- I think it's very well documented. I
18 don't know how much ongoing research there is on
19 it.

20 Q. Well, you mentioned that it's a concern that some
21 environmentalists have that this chemical could
22 be building up in our water and our soil, right?

23 A. That's correct, yes.

24 Q. On the other hand, manufacturers who include this
25 chemical in their products are countering that by

1 saying that this a biodegradable product and will
2 ultimately be dissolved and not be a problem?

3 A. No, sir, I don't believe that's true.

4 Q. Are the manufacturers telling the
5 environmentalists that you are right, this drug
6 is just going to build up in our soil and water
7 forever?

8 A. I don't know that the manufacturers are saying
9 anything to the environmentalists.

10 Q. You are not aware of any debate, ongoing research
11 in that field?

12 A. No, sir, I'm not.

13 Q. But you did mention that you were aware of some
14 degree of studies about the stability of EDTA,
15 right? I believe you testified to that.

16 A. Yes, I'm aware of a number of studies that
17 discuss the stability of EDTA as well as
18 chemistry reference books that talk about the
19 stability of EDTA.

20 Q. Okay. Can you cite me to any study, published
21 study, that's ever studied the -- or evaluated
22 the degradation rate of EDTA in an 11 year old
23 vial of blood?

24 A. No, sir.

25 Q. Can you cite me to any published study that has

1 ever tried to characterize the degradation rate
2 of EDTA in any blood substance, stains or liquid?

3 A. Yes, sir, I can.

4 Q. What's that?

5 A. The *Journal of Analytical Toxicology* article that
6 I believe you have. I'm sorry. For
7 clarification, did you say an 11 year old
8 bloodstain?

9 Q. Well, at first I said 11 year old and you are
10 aware there is no study of blood that old, right?

11 A. Yes, sir, I'm aware of that.

12 Q. You do know, though -- Let me just step back for
13 a second, you do know that EDTA is biodegradable
14 eventually, correct, or is that the wrong term?

15 A. That's the correct term, the research suggests
16 that it is not very biodegradable.

17 Q. But the research also suggests that it can be
18 broken down, correct?

19 A. Extremely harsh conditions, yes.

20 Q. Well, waste water treatment plants have been
21 doing studies where they determined that if you
22 increase the PH in the treatment plant, you can
23 break down EDTA quite readily, right?

24 A. Well, the published references say that if you
25 boil EDTA in a highly alkaline solution, which

1 would be high PH, it doesn't breakdown.

2 Q. You are not aware of studies that talk about
3 using lime in waste water treatment to increase
4 the PH so that it breaks down?

5 A. Well, the lime may be doing other things, other
6 than just dealing with PH. And there are
7 numerous steps that they take to breakdown the
8 EDTA in water, so it's not just lime.

9 Q. Okay. But it is -- there are steps they take to
10 break it down.

11 A. Again, very harsh steps.

12 Q. In your opinion, you have never done any
13 yourself --

14 (Court reporter asked to have the last answer repeated.)

15 A. Harsh. Harsh steps.

16 Q. Harsh in your opinion because you have never
17 actually done of any of those studies, right?

18 A. Harsh in my review of the literature, as they
19 call them. I'm quoting some of those references.
20 They are referring to things that, as a chemist,
21 I consider to be quite harsh.

22 Q. Have you ever done any kind of experiment
23 yourself to see if you can actually make EDTA
24 break down into its components?

25 A. No, I haven't done any studies.

1 Q. Okay.

2 A. But your question is twofold there. And you said
3 into its components, I'm not aware of the
4 components that EDTA breaks into.

5 Q. Well, at some point, it can be degraded, whether
6 it's harsh or whatever, that's what I'm talking
7 about.

8 A. And then it would just fall apart as a molecule.

9 Q. Okay. I apologize, I don't know all the
10 terminology, but you get my drift, right? You
11 understand the question?

12 A. I do understand the question.

13 Q. And you haven't performed any experiments to
14 break it down, break the molecules apart?

15 A. I have not performed any such experiments.

16 Q. Okay. You did, however, testify about performing
17 a little study just last week, right?

18 A. Correct.

19 Q. And that study was designed to see whether or not
20 you would still be able to detect EDTA in some
21 blood spot cards that you had had on -- or that
22 your lab, one of your units had, right, from a
23 number of years ago or, actually, 33 months?

24 A. I need you to --

25 Q. All right.

1 A. -- repeat that question, please.

2 Q. It's a little study that you are talking about in
3 which you tried to see if -- if you could still
4 detect EDTA in some spot cards, that were 33
5 months old, is something you did last week,
6 right?

7 A. That's correct, yes, last week.

8 Q. And you actually did it on February 28th?

9 A. If I can refer to my notes.

10 Q. Go ahead.

11 A. Yes, sir, that's correct, February 28th.

12 Q. Now, on February 26th, you issued the report in
13 this case, right?

14 A. That is correct.

15 Q. With your opinions, right?

16 A. That's correct.

17 Q. The opinions that you knew you'd have to express
18 in court, under oath, in front of a jury, right?

19 A. Correct, yes.

20 Q. And so when you issued that report, you had done
21 no study whatsoever of whether or not EDTA would
22 be stable enough to be found in some old
23 bloodstains or blood vial, correct?

24 A. Yeah, I had not personally done it, but it was in
25 the literature.

1 Q. And the literature you are referring to is this
2 analytical chemistry thing, right?

3 A. No, sir. The Journal of Analytical Toxicology
4 did a stability study of EDTA in old blood stains
5 as well.

6 Q. Two years old, right?

7 A. I believe it was 24 months, yes.

8 Q. Okay. And you knew in this case you were talking
9 about a blood vial that's 11 years old, five
10 times longer, right?

11 A. Well, my understanding there, the bloodstains
12 were just about two years old themselves.

13 Q. Well, if the vial of blood that came out of
14 Mr. Avery's arm on January of 1996 was used to
15 plant the stains in the RAV4 in 2005, then that
16 blood at that time was already almost nine years
17 old, correct?

18 A. That's correct.

19 Q. And, then, since that date, another 16 months or
20 so had elapsed?

21 A. Yes, that's correct.

22 Q. Okay. So you issue your report, without doing
23 any study of your own on what the stability might
24 be of EDTA in a bloodstain, correct?

25 A. That is correct.

1 Q. And so, then, two days later -- Was that after
2 Mr. Gahn called you and asked you a question that
3 I had raised, that you decided to do this study?

4 A. No, I decided to do the study based on the letter
5 you sent requesting materials, discovery
6 materials, and one of the items you requested
7 were any studies that the FBI had done on the
8 stability of old bloodstains.

9 Q. Okay.

10 A. It prompted me to start thinking, is there a way
11 that we could do it.

12 Q. Okay.

13 A. And I went to our DNA Unit and asked them if they
14 had any old blood cards with EDTA on it, and they
15 did. So we decided to go ahead and run them to
16 see if it would help, for this particular case.

17 Q. Okay. So -- I'm glad you cleared that up. So,
18 then, this -- this study that you did on
19 stability was because the defense attorney in the
20 case had pointed out to you that something might
21 be lacking in your ability to express an opinion
22 to the jury about how stable EDTA was or was not;
23 would that be fair?

24 A. No, that wouldn't be fair at all, sir.

25 Q. Okay. Well, we'll let the jury draw whatever

1 inference they want from that. But I'm showing
2 you now what exhibit -- what's exhibit -- I'm
3 sorry -- 444, this is your EDTA stability study,
4 right? It's up on the screen?

5 A. Oh, that is the summary of the EDTA stability
6 study. Those are my notes doing a quick review
7 of what we found.

8 Q. Okay. And these are the other notes attached to
9 this study dated February 28 of '07, correct?

10 A. That's correct.

11 Q. And those are Mr. Brewer's initials, again?

12 A. Yes, that's Dr. Brewer's initials.

13 Q. Dr. Brewer, I'm sorry.

14 A. Yes.

15 Q. And other than these handwritten notes and this
16 one paragraph, there's nothing else that tells us
17 about this study that you did, right?

18 A. No, that's false.

19 Q. Did you write up some report?

20 A. No, there are pages of data that are related to
21 that study.

22 Q. Okay. Just graphs and charts and things of that
23 nature, right?

24 A. That's correct. That's the actual study. This
25 is the interpretation of the study and the notes

1 as to how the study was put together and how it
2 was actually run.

3 Q. Okay. So would you submit this to some journal
4 to be published, in its form?

5 A. That one paragraph, I don't believe would be
6 accepted for publication, sir.

7 Q. I thought not. Let me just talk about the timing
8 of this for a second. If you had done this test,
9 two days after you issued your report, because
10 you are worried about my cross-examination of
11 you, and if you had found that these --

12 ATTORNEY GAHN: Objection, your Honor, to
13 the form of that question and that's not what his
14 testimony was.

15 Q. I haven't finished it, but I will start
16 rephrasing it. If you had done this study, two
17 days after issuing your report and you knew you
18 were going to come into court and testify under
19 oath about and if you had gotten results that
20 would show this EDTA really wasn't as stable as
21 you thought it was, you would be -- you would
22 have a bit of a problem there, wouldn't you?

23 A. Well, we would be refuting all the published
24 scientific data out there that suggests that EDTA
25 is an incredibly stable complex, so it would be

1 rather a eureka moment, quite frankly.

2 Q. And so, then, there would have been no reason for
3 you to do this study at all, right? If it's --
4 If it's that clear in the published literature,
5 there would have been no reason for you to do
6 this study two days after you issued your report,
7 would there?

8 A. Obviously, we didn't do it as part of the method
9 development, so I do not consider it to be a
10 relevant aspect of putting the method together,
11 doing the analysis in this case, and providing
12 that report to the agency that requested the
13 examinations.

14 But I do believe that it assists in the
15 final interpretation. It does assist in
16 answering your question, your specific question
17 that we had not addressed in my unit. It had
18 been addressed in the publication, as I alluded
19 to earlier. I did think it was a good idea to do
20 since we did have available to us bloodstains
21 that were 33 months old. I didn't think, as a
22 scientist, that I could just pass that by and not
23 test them.

24 Q. Well, I'm very glad to hear that, sir.

25 A. I'm sorry?

1 Q. I'm very glad to hear that, as a scientist, you
2 didn't just pass that by. But, tell me, page
3 two, which is the only place that describes the
4 actual method that was used; is this a protocol?

5 A. I'm sorry?

6 Q. Is this a protocol for testing the stability of
7 EDTA in 33 month old bloodstains?

8 A. These are the notes describing the steps that
9 were taken in order to conduct the study. But
10 the protocol that we used is the published
11 protocol, the issued standard operating procedure
12 for the analysis of EDTA in dried bloodstains.

13 Q. So, did you submit a protocol to determine the
14 stability of EDTA, long term, over many, many
15 months?

16 A. I don't think I understand that question.

17 Q. You just used the protocol you developed to see
18 if there is EDTA in a particular stain at a given
19 time, right? Correct?

20 A. Yes.

21 Q. Which isn't designed to quantitate how much EDTA,
22 if any, is there?

23 A. That's right.

24 Q. My question is, did you develop a protocol, as a
25 scientist, that would be accepted for peer

1 review, that would determine -- be designed to
2 determine the stability of EDTA, as the term you
3 actually used here, to determine EDTA stability?

4 A. Yes, I believe that the work that was done here
5 is worthy of -- total worthy of publication if we
6 decide to write it up and submit it to a journal.

7 Q. Okay. But you just used the other protocol that
8 you already developed, you didn't develop a new
9 protocol to study how stable EDTA was; am I
10 right?

11 A. I'm sorry. I'm not completely understanding your
12 question. We used this stepwise procedure, page
13 two.

14 Q. Let me just ask, very simple: Did you develop a
15 new protocol -- the question probably begs the
16 answer -- but you did not develop a new protocol
17 and go through your rigorous review and approval
18 and validation and studies, and all of that, for
19 the specific question of determining the
20 stability of EDTA, correct?

21 A. We did not develop a new protocol to address
22 the -- any potential breakdown of EDTA, but we
23 did determine that we could still --

24 Q. Okay.

25 A. -- find EDTA in a 33 year old -- not -- 33 month

1 old bloodstain.

2 Q. And looking at this result, you tested a total of
3 10 spot cards, right?

4 A. That's correct.

5 Q. That you got from the DNA Unit?

6 A. Yes.

7 Q. You didn't know where they came from, right?

8 A. I didn't, no.

9 Q. Didn't know whether they came out of a
10 purple-topped tube, a yellow-topped tube, a
11 red-topped tube, or a gray-topped tube, right?

12 A. Wrong.

13 Q. Wrong?

14 A. That's an incorrect statement you just made.

15 Q. Okay. How did you know what kind of tube a
16 little spot on a piece of paper came from?

17 A. Because I was informed by the analyst in DNA that
18 these were all EDTA bloodstains.

19 Q. Okay. So you relied on that, whatever
20 information that was?

21 A. Yes.

22 Q. Okay. And when you tested them, you found that 4
23 of the 10 spot cards you could not determine --
24 you could not detect the iron complex EDTA,
25 correct?

1 A. That's correct, 4 out of the 10 it failed --

2 Q. Okay.

3 A. -- the requirements failed to actually make the
4 call. There was an indication of it's presence,
5 though.

6 Q. But something that's an indication, that doesn't
7 reach your threshold, you don't make a call?

8 A. That's exactly right because we err -- we work
9 conservatively.

10 Q. Right. Because something that's just an
11 indication could be an indication of other
12 things, right? That's why you have threshold
13 limits, correct?

14 A. Well, as we discussed earlier, we have the
15 guideline for mass spectral comparison, which was
16 Exhibit 441. That defines how we interpret the
17 mass spectral data. And those four samples
18 failed the requirements in here to actually make
19 the call.

20 Q. All right. So, 40 percent of the samples that
21 were only 33 year -- 33 months old, were
22 already -- had already degraded in the EDTA iron
23 complex?

24 A. No, sir. I wouldn't say that at all. We don't
25 know what the original concentration of EDTA was,

1 of the iron complex, in that spot. Additionally,
2 this was done on spot cards and we validated our
3 method to be done on cotton tipped swabs.

4 We did not, in this study, go to see,
5 you know, all the steps we talked about earlier
6 about detection limit. We didn't look at
7 interferences. We didn't look at matrix
8 suppression. We did not do the -- Well, the
9 carryover would probably be irrelevant here. But
10 we didn't do all of those steps for extracting it
11 from a filter paper, a DNA filter paper, which is
12 probably insignificant, but scientifically I
13 can't say that with absolute certainty, that that
14 couldn't have some affects because --

15 Q. Okay.

16 A. -- this -- this material may --

17 Q. Sir.

18 A. -- bind more tightly to that filter paper, the
19 bloodstain may. Because that's actually what
20 these are designed for, these are spot cards for
21 blood.

22 Q. Those steps you just mentioned: Carryover,
23 matrix suppression, limited detections, that's
24 called validation, right?

25 A. That's exactly right.

1 Q. And what you just told us is that you didn't
2 validate this study to detect EDTA in spot cards,
3 right?

4 A. That's exactly right.

5 Q. Thank you. So this study, then, wouldn't really
6 tell you how stable or not EDTA might be in a
7 liquid form that's 11 years old, right?

8 A. That's correct, yes.

9 Q. You mentioned -- You mentioned that you were
10 testing swabs, or your tests were designed for
11 swabs of cotton, right?

12 A. Yes, we did all of our validation on cotton
13 tipped swabs --

14 Q. Okay.

15 A. -- because that's what we were told the
16 evidentiary material was going to be in this
17 case.

18 Q. Okay. And cotton swabs are also absorbent, more
19 absorbent than paper, would you agree, or
20 disagree?

21 A. I don't know.

22 Q. You don't know. You haven't tested it, so you
23 don't have an opinion one way or the other?

24 A. I don't have an opinion.

25 Q. Okay. You do have an opinion, though, that EDTA

1 on -- in a bloodstain that is on fabric might be
2 absorbed in different ways so that throughout the
3 stain the level of EDTA is not homogenous,
4 correct?

5 A. Incorrect.

6 Q. You disagree with that?

7 A. Yes.

8 Q. Okay. Did you shake up the tube when you got it?

9 A. Yes, we did.

10 Q. Mix it up real well?

11 A. Yes.

12 Q. Have no way of knowing if somebody used that vial
13 to plant, as your little PowerPoint showed, drip,
14 drip, drip, drip, whether or not that
15 person would have shaken up the vial, 11 year
16 old -- or nine year old vial, before doing that,
17 do you?

18 A. Could you repeat that question?

19 Q. You have no way of knowing that if somebody used
20 that vial to plant blood in the Halbach vehicle,
21 whether that person shook that vial up like a
22 scientist would before doing so, do you?

23 A. If that was the scenario, then, I wouldn't know
24 if they shook that vial first.

25 Q. Okay. By the way you never did any -- I think

1 you testified about the swabs when you had the
2 photos up there, you kept referring to them as
3 bloodstains here and there, right? Do you recall
4 that?

5 A. Yes, that's what they were reported to us as
6 being.

7 Q. Okay. Reported to you, but you didn't do any
8 kind of presumptive tests on them?

9 A. No, sir, I'm not a qualified serologist.

10 Q. So the portion when you -- well, not you, but
11 when Mr. Brewer cut the swabs -- By the way, were
12 you present when he cut the swabs?

13 A. Yes, I was.

14 Q. Okay. You didn't test to be sure that the
15 section that he was cutting did or did not prove
16 presumptively positive for the presence of human
17 blood, right?

18 A. Again, I'm not qualified to do that. It was
19 reported to us that this was blood and that had
20 been confirmed by testing at another laboratory.

21 Q. Well, it had been confirmed to you that somewhere
22 on this swab, the portion of the swab that was
23 cut off by the prior lab had tested, that had
24 blood, right? As far as you know?

25 A. Yes, that's -- I believe that's what I said.

1 Q. Okay. But the portion that was left on those
2 swabs, you don't know that anybody ever tested to
3 see if there was blood, and if so, how much of
4 the swab that was being cut off contained the
5 blood, right?

6 A. That's correct.

7 Q. Okay. You know that blood and EDTA -- that EDTA
8 is a binding; you call it chelating, but the same
9 way -- another way of saying binding, right,
10 molecules?

11 A. Yeah, it binds -- it binds metals, that's
12 correct.

13 Q. Particularly metals, right?

14 A. Yes.

15 Q. And so it may bind with one substrate that a
16 stain is sitting on differently than another
17 substrate that a stain is sitting on, right?

18 A. If it's not already bound to another metal, yes.

19 Q. Okay. And by substrate, I'm talking -- it's
20 another way of saying a surface, particular
21 surface, right?

22 A. That's correct.

23 Q. You only tested three swabs that were reported to
24 have been taken, or found, in the Teresa Halbach
25 vehicle, right?

1 A. That's correct.

2 Q. Do you know how many other swabs or how many
3 other stains were also found in that vehicle?

4 A. No, I don't.

5 Q. Your opinion that there's no EDTA in the swabs
6 from the Halbach vehicle, then, is limited to the
7 three swabs that were presented to you; isn't
8 that right?

9 A. Could you repeat that?

10 Q. You expressed an opinion a little more broadly
11 than perhaps you intended to, I believe, which
12 was that your opinion was -- let me look for my
13 notes -- that the stains in the Halbach --
14 bloodstains in the Halbach vehicle could not have
15 come from the purple vial that you tested, right?

16 A. That's correct.

17 Q. But you're actually referring only to the three
18 stain swabs that you tested, correct?

19 A. No, I believe my original testimony is what I
20 meant.

21 Q. Well, are you telling me right now, that even
22 though you never tested three other swabs of
23 separate bloodstains found elsewhere in the RAV4
24 vehicle, that you're willing to express an
25 opinion that none of those three swabs have EDTA

1 either?

2 A. I am willing to -- to conclude that.

3 Q. Oh, you are?

4 A. Yes, sir. If I can elaborate.

5 Q. Well, no, let me finish my -- my question. So
6 even though you didn't test those other three
7 swabs, you are prepared to state that they could
8 not have come from the blue -- the purple-topped
9 vial that you tested of Mr. Avery's blood?

10 A. I believe that to be true within a reasonable
11 degree of scientific certainty, yes.

12 Q. Okay. I just wanted to know how far you were
13 willing to go. And the -- You also give another
14 interesting opinion where you -- I'm not sure
15 exactly how it came out after I objected and it
16 was rephrased, but that you believe the planting
17 scenario, one of those two -- you only gave two
18 scenarios there, one which is that the blood came
19 from a dripping finger that you so helpfully gave
20 us on the screen, right, that was one scenario?

21 A. To represent active bleeding. I wouldn't know if
22 it came from a finger or a toe or an arm.

23 Q. Oh, really, you just picked a dripping finger out
24 of just thin air, right?

25 A. That's what happened to be at Microsoft's web

1 site --

2 Q. Oh.

3 A. -- a finger, right.

4 Q. And that was one scenario. The other scenario
5 was that someone was pouring out these little
6 drops from the purple-topped tube, right?

7 A. Sure, yes.

8 Q. And I think if I understood you, you maybe went
9 even farther and said that because of your test
10 on those three stains, there was no way that --
11 that the blood in the RAV4 could have been
12 planted by anybody; isn't that what you said?

13 A. Yes, that was my opinion. That's correct.

14 Q. Or did you mean that they couldn't have been
15 planted from that purple-topped tube only?

16 A. Well, if you look at all of the information I was
17 given on this case, my opinion would be that it
18 couldn't have come from the EDTA tube that we
19 tested or any other EDTA tube.

20 Q. Okay. But you are not expressing the opinion
21 that it couldn't have been planted from some
22 other blood source, that didn't have EDTA
23 already, are you?

24 A. No, sir.

25 Q. Okay.

1 A. I'm not saying that.

2 Q. Okay. And you never tested any swabs that were
3 reported to you to have been recovered from the
4 garage floor or inside Mr. Avery's trailer --
5 trailer, were you?

6 A. Could you repeat that?

7 Q. You never tested any swabs that were given to you
8 that were reportedly recovered from the garage
9 floor or trailer of Mr. Avery, did you?

10 A. No, I wasn't.

11 ATTORNEY BUTING: Should we approach the
12 bench for a minute, your Honor?

13 THE COURT: Sure.

14 (Side bar taken.)

15 THE COURT: Members of the jury, we're
16 going to go a little longer than normal to get the
17 witness back to Virginia. I'm told we don't have
18 too much to go. But let's take a quick stretch
19 break and then allow the attorneys to finish. You
20 may continue.

21 ATTORNEY BUTING: Thank you, Judge.

22 Q. (By Attorney Buting)~ The -- Without getting too
23 bogged down in the procedure that's followed and
24 the protocol and all that, if you allow me to
25 oversimplify it, as I understand it, you take

1 these swabs -- And, by the way, let's just clear
2 one thing up, the photograph showed two control
3 swabs for each of these three stains, right?

4 A. Yes, that's correct.

5 Q. You didn't test both control swabs, though, did
6 you?

7 A. No, standard practice, we leave half for
8 retesting, so we tested one and left the other
9 for future testing if that was deemed necessary.

10 Q. Well, aren't these swabs supposed to have been
11 taken from different areas of, like, one side or
12 the other of a particular stain.

13 A. It's from the general area, that's correct.

14 Q. But the theory being that you don't swab the
15 exact same area twice, you swab -- you use the
16 second swab to swab a different control area
17 somewhere around the stain, right?

18 A. That's one way to do it, yes.

19 Q. All right. You don't know how it was done in
20 this case, because you weren't there?

21 A. That's correct, I was not there.

22 Q. Okay. But my point is, you didn't test -- you
23 didn't take half of each -- clip off half of each
24 swab and do it that way, right?

25 A. That's correct, we did not.

1 Q. You just tested one?

2 A. Yes.

3 Q. Okay. The -- As I understand it, what you do is

4 you clip off the swab. You put it in a little --

5 some sort of a little vial or something. You put

6 a solution in there. And it's actually 200

7 microliters of something, something of that

8 nature; does that sound right?

9 A. Well, perhaps you are oversimplifying it.

10 Q. Well, you put a solution -- you put a solution

11 into the dry swab sample, right?

12 A. You do, yes.

13 Q. And you allow it to react for a certain period of

14 time, right?

15 A. Forty-five minutes.

16 Q. And your protocol for this particular test, 45

17 minutes, correct?

18 A. Yes. Yes.

19 Q. And then you -- you centrifuge it?

20 A. Yes, we do.

21 Q. And then, what that does, is it separates the

22 liquid from the solids that drop to the bottom,

23 right?

24 A. The liquid portion goes through the filter and it

25 carries with it the EDTA and EDTA iron complex

1 that was dissolved into the solution.

2 Q. And the solids drop to the bottom?

3 A. No, sir.

4 Q. Well, okay, the liquid is at the top?

5 A. No, sir. If you would like, I can simplify this.

6 Q. Please.

7 A. Okay.

8 Q. Simply.

9 A. The swabs are cut and put into what's called a
10 molecular weight cut off filter, it's a filtering
11 device, sitting in this filter device. And then
12 we add a solution of the internal standard, which
13 I described earlier as the positive control, into
14 each sample. That's 200 microliters, which is --
15 again, that is approximately a 10th -- I'm
16 sorry -- a 20th of a drop, and that is placed
17 into the --

18 Q. Two hundred microliters?

19 A. I'm sorry, I misspoke. It's not --

20 Q. Yeah, I thought so.

21 A. It's approximately two drops. Thank you. It's
22 approximately two drops of liquid that are placed
23 into that -- onto that swab. And it's left to
24 sit for 45 minutes to allow for -- time for all
25 of the EDTA, or a portion of the EDTA and the

1 iron complex, to actually go into the water that
2 was added to it.

3 And then we centrifuge it at high speed
4 to drive the liquid through the filter device and
5 the liquid goes to the bottom of the tube and the
6 swab and all the solids remain at the top in the
7 filter itself. And then we analyze the liquid
8 portion.

9 Q. Okay. So I misspoke, it's the other way around,
10 the liquid is at the bottom, right?

11 A. Yes, sir.

12 Q. All right. And then goes into -- there's --
13 there's approximately 200 microliters of liquid,
14 a little less probably by then, right?

15 A. A little less, yes.

16 Q. Okay. Then it goes into a machine called auto
17 sampler, right?

18 A. No, not exactly.

19 Q. Well --

20 A. It's transferred into a small sampling container,
21 a vial, which is a sealed glass vial. And then
22 we manually place it onto an auto sampler.

23 Q. Okay. And then the auto sampler basically sucks
24 out just five microliters for the test, right?

25 A. For each of the individual tests that we ran on

1 this, yes.

2 Q. Correct. So out of each, Q-49, Q-48, Q-47, the
3 micro sampler takes five micro -- auto sampler
4 takes about five microliters, leaving 190 or so
5 left, correct?

6 A. Well, probably considerably less than 190, but it
7 leaves some residual liquid behind, yes.

8 Q. Okay. And then it's that five microliters that
9 gets tested in the instrument, correct?

10 A. That's right.

11 Q. But you don't save the remaining liquid to be
12 retested by the defense, or another lab, or
13 anything of that nature, do you?

14 A. No, we don't.

15 Q. And presumably, if you did, that would be one way
16 of verifying the results that came from the five
17 microliters that was tested, correct?

18 A. That would be one of many ways it could be --

19 Q. Okay.

20 A. -- reevaluated.

21 Q. Now, EDTA is found, you mentioned, in many, many
22 products, common household products, right?

23 A. Yes.

24 Q. You mentioned shampoos, detergents, and some
25 automotive cleaning products as well, right?

1 A. Yes.

2 Q. Including Armor All?

3 A. No.

4 Q. Make up?

5 A. Some cosmetics.

6 Q. Okay. Also used in photography?

7 A. In some applications of photography, yes.

8 Q. Okay. And, yet, when you tested the controls in

9 this case, you found no EDTA detectable, correct?

10 A. That's exactly right.

11 Q. And that was in the process whereby you have

12 diluted the -- or allowed the solid to react with

13 200 microliters of liquid, correct?

14 A. That's correct, yes.

15 Q. If you had allowed that to evaporate down to a

16 smaller amount, if there was any EDTA in the

17 liquid, it would be more concentrated, correct?

18 A. Yes, it would be.

19 Q. You did not do that in this case, on the

20 controls, for instance, to rerun them and see if

21 you would detect EDTA at a lower dilution?

22 A. No, I don't believe it was necessary to do.

23 Q. Okay. And, by the way, the -- even with this

24 brand new test you devised, you can't tell the

25 jury, to a absolute scientific certainty, if

1 there is such a thing, that there's no EDTA in
2 any of those blood stains. All you can say is
3 that there is none detectable given your limits
4 of detection, correct?

5 A. Yes, they are negative at our limit of detection,
6 which I feel --

7 Q. Okay.

8 A. -- is more than adequate.

9 Q. I understand that's your opinion, but the point
10 of it is, there might be a lower level of
11 detection which might reveal EDTA; isn't that
12 right?

13 A. Well, you could go lower and start detecting
14 environmental contamination from soil and water,
15 but that, I believe, would just confuse the
16 interpretation on this case.

17 Q. What that might do is just what happened in the
18 O.J. case, which is, show the jury that there is
19 EDTA in the bloodstain rather than that there is
20 not, correct?

21 A. Again, I didn't do the testing in the O.J. case
22 and I'm not fully aware of all the final findings
23 in that particular case. It's been, I believe,
24 12 years, actually.

25 Q. All right.

1 A. And -- But it's my recollection, to answer your
2 question, that we did not report that there was a
3 significant amount of EDTA in that bloodstain in
4 that case.

5 Q. I want to show you a photograph that we have
6 looked at earlier. Probably this -- one of these
7 two. But I will show you Exhibit 473, first.
8 Take a look at these two. Okay. Have you had a
9 chance to look at that?

10 A. Yes, I have.

11 Q. And is that the blood vial that looked the way it
12 looked when you got it?

13 A. No, sir.

14 Q. It's changed? The one you got was changed? How?

15 A. Well, I can't even verify that this is the same
16 vial, based on this photograph, either of these
17 photographs.

18 Q. Well, I think counsel -- we have had testimony
19 earlier, we can -- for your purposes, you can
20 assume that that is the same vial that ultimately
21 made it to the FBI Lab, at least we hope, okay.

22 ATTORNEY GAHN: I will agree that the
23 witness can assume that that's the vial that came
24 from the Manitowoc County Clerk of Court's Office
25 and was sent to the FBI for your analysis, Doctor.

1 Q. (By Attorney Buting)~ Okay.

2 A. Yes.

3 Q. So, then, my question is, the condition, the way
4 that vial looks to you right now in that picture,
5 is that consistent with the -- is that consistent
6 with the way the vial looked on that day that you
7 saw it?

8 A. If I can refer to my notes.

9 Q. Sure.

10 A. Again, I really can't tell fully because I can't
11 see all the markings on the vial to verify that
12 it's marked exactly the same as when we received
13 it. But when we -- when we received the vial of
14 blood, it came in a different container, as was
15 indicated earlier. It was sealed into a shipping
16 container like this and it has a label on the
17 side that I don't see in either of these
18 photographs. Additionally, the top was sealed
19 with evidence tape on here. Let me correct that
20 last statement, the vial itself was not sealed
21 with evidence tape, it's this outside container
22 that was.

23 Q. Okay. Let me put this up on the screen for you,
24 for the jury. Is this the same exhibit you are
25 looking at right now.

1 THE COURT: I'm not sure your microphone is
2 on, Mr. Buting.

3 ATTORNEY BUTING: Sorry.

4 Q. (By Attorney Buting)~ Is this the same exhibit
5 that you are looking at right now? Does it look
6 the same?

7 A. No, sir, I believe that's a different photograph.

8 Q. Let me see the photograph, please.

9 A. Yes.

10 Q. All right. Let's try this one. Okay. I think
11 counsel have agreed we have got Exhibit 473 up on
12 the screen now. Let me ask you, when you did
13 open up the vial, or the packaging, and found the
14 purple vial of blood that said -- or that was
15 reported to you to be Steven Avery's, did it
16 appear to you that the vial had been clearly
17 opened at some time?

18 A. Yes, it did.

19 Q. Okay. And is that, in part, because around the
20 edge, as I have zoomed in on this exhibit of the
21 stopper, there appears to be some red blood that
22 has actually seeped in onto the stopper itself?

23 A. That's exactly right, yes.

24 Q. Okay. And that's a clear sign that at some point
25 the top had been opened, right?

1 A. Yes, it is.

2 Q. All right. Your opinions that you expressed
3 today are to a reasonable degree of scientific
4 certainty, right?

5 A. Yes.

6 Q. And just as you would do in any other case where
7 you are expressing an opinion to a jury, correct,
8 as an expert?

9 A. Yes, based on the science, yes.

10 Q. All right. Well, let's talk about another case
11 that you were involved in in which a protocol was
12 developed rather hurriedly, not the O.J. one that
13 you were not involved in, but a fellow by the
14 name of Dr. William Sybers, does that ring a
15 bell?

16 A. Yes, it does.

17 Q. Correct me if I'm wrong, but Dr. Sybers was a
18 medical examiner in the State of Florida, whose
19 wife passed away and nine years later was charged
20 with her murder for poisoning -- allegedly
21 poisoning her with a particular sort of muscle
22 paralyzing drug, correct? Is that a fair
23 summary?

24 A. Yes.

25 Q. Okay. And so what they did was, they dug up poor

1 Mrs. Sybers' body and took samples from the
2 tissue of -- the embalmed tissue of her remains,
3 correct?

4 A. Yes, they did.

5 Q. And then, they went to you, to develop a protocol
6 to test for a particular drug called
7 succinylcholine, that's s-u-c-c -- maybe you can
8 spell it. S-u-c-c-i-n-y-l-c-h-o-l-i-n-e, is that
9 right?

10 A. No, that's wrong.

11 Q. Okay. Tell us, how do you spell it?

12 A. No, that's the correct spelling, your statement
13 was wrong.

14 Q. Okay. You developed a protocol to develop -- in
15 an effort to determine whether, from a metabolite
16 that could be found in someone's postmortem
17 fluids, one could determine if the parent drug
18 had been administered at some earlier time?

19 A. I need you to repeat that before I can respond.

20 Q. You developed a protocol, in that case -- First,
21 let me step back. What you were trying to do,
22 what you were asked to do, was to test these
23 postmortem fluids, a subject which, by the way,
24 you continue to testify on now, in 2007, right,
25 or six?

1 A. Again, that's a multi-question question, I can't
2 respond to it.

3 Q. They train you well on courtroom testimony, don't
4 they?

5 A. I'm just answering your questions --

6 Q. Okay.

7 A. -- truthfully, sir.

8 Q. You were correct that was a multi -- that was a
9 bad question, it's getting late. You still teach
10 at conferences about postmortem fluids, right?
11 The testing of postmortem bodily fluids?

12 A. I do, that's part of my job.

13 Q. Right. And it was back in 1999, I think, right?

14 A. Yes, it was.

15 Q. And you were asked in that case to try and see if
16 you could come up with a test protocol that could
17 determine whether or not Dr. Sybers had poisoned
18 his wife with a particular drug; is that right?

19 A. Not entirely correct, no.

20 Q. Well, you're going to fight me all the way on
21 this I can see. You developed a protocol to try
22 and find out whether the prosecution's theory
23 that Dr. Sybers had poisoned his wife was correct
24 or not, correct?

25 A. No, sir. That's never the intent of developing a

1 procedure is to determine someone's guilt or
2 innocence. It's to simply analyze for the
3 presence of a chemical in evidentiary material.
4 We don't decide the guilt or the innocence.

5 Q. Well, thank God for that.

6 ATTORNEY GAHN: Objection, your Honor.

7 THE COURT: Sustained.

8 Q. (By Attorney Buting)~ What you were trying to do
9 was to test bodily fluid that had been embalmed
10 nine years earlier and draw some conclusions
11 about whether or not one could make an assessment
12 of whether this parent drug had been administered
13 to the person before they died, correct?

14 A. If I can correct your question a little bit, move
15 things along. We tested, not postmortem fluids,
16 but we tested postmortem tissues, heart, kidney,
17 lung, fat, muscle, as I recall. We were asked to
18 develop the protocol to determine whether or not
19 a chemical called succinylmonocholine,
20 s-u-c-c-i-n-y-l-m-o-n-o-c-h-o-l-i-n-e, was
21 present in these tissues, because another
22 laboratory had found them and we were asked to
23 verify whether or not that laboratory had indeed
24 identified this particular chemical.

25 Q. Okay. And your testing indicated a positive

1 finding for succinylmonocholine in the victim's
2 kidney, correct?

3 A. That is correct.

4 Q. And that particular molecule is a metabolite of
5 the drug succinylcholine, correct?

6 A. Yes, it is.

7 Q. And your testimony was employed, by the
8 prosecution, to obtain a conviction of Dr. Sybers
9 for the murder of his wife by means of the
10 injection of this succinylcholine, correct?

11 A. I did pros -- I did testify for the prosecution
12 in that case, that's correct.

13 Q. And you rendered opinions to a reasonable degree
14 of scientific certainty, didn't you?

15 A. I believe I did. If I rendered an opinion, I
16 would make sure it was within a reasonable degree
17 of scientific certainty.

18 Q. Just as you are today?

19 A. Yes, sir.

20 Q. To a jury just as we have here today, correct?

21 A. To a jury, yes.

22 Q. And that jury convicted Mr. Sybers, correct?

23 A. Yes, they did.

24 Q. The conviction, however, was reversed by the
25 Court of Appeals in Florida four years later,

1 right?

2 A. I don't know when, but I do know that they
3 reversed the decision on appeal.

4 Q. And only after that, when additional tests were
5 done on other tissues or fluids from other
6 deceased persons, was it determined that that
7 very same metabolite you found in Mrs. Sybers'
8 body was also in theirs; isn't that right?

9 A. That's correct. I would like to elaborate on it.

10 Q. You can elaborate in a moment and I'm sure you
11 will take any opportunity you can. But the point
12 being, your protocol was hurriedly developed for
13 the trial of Mr. Sybers' case, right? Mid-trial,
14 while the trial was going on, yes or no?

15 A. I'm trying to answer, but you are not giving me a
16 chance, sir. Yes, it was developed for the
17 Sybers' case.

18 Q. Okay.

19 A. It was a court ordered test that we were --

20 Q. Okay.

21 A. -- told to do.

22 Q. And you didn't decline, right? You could have
23 said, no, we don't have enough time to do this?

24 A. I couldn't decline in that instance, no.

25 Q. Well, did you tell the Court, hey, I just don't

1 have time to do this properly and scientifically?

2 A. No, sir, I was told that the Attorney General of
3 the United States was going to call me and
4 request that we do this exam, so I decided that I
5 would do it.

6 Q. Did you tell the jury that you were under
7 pressure to do -- to develop a test protocol that
8 you didn't feel comfortable doing?

9 A. No, I never -- never told the jury I was
10 uncomfortable developing the test protocol.

11 Q. Okay.

12 A. But I do believe I informed them it was done
13 under rather rushed circumstances.

14 Q. Okay. And you never told them that there was any
15 concerns about the scientific validity of the
16 opinions you were expressing either, were you,
17 correct?

18 A. There were no concerns, in my opinion, about the
19 scientific certainty of what we did in
20 that particular case.

21 Q. Okay.

22 A. And I stand by it today.

23 Q. Okay. Except that years later, when you tested,
24 as you should have all along, other tissues from
25 other bodies, you found the same metabolite?

1 A. Well, it's a complex question; I can't just
2 answer yes or no. We did test tissues from other
3 bodies when we worked to develop the method and
4 validate the method before it was used on
5 specimens in the Sybers case, we did do that.

6 But what happened was years later we got
7 a new instrument into our laboratory and we had
8 additional cases where we were requested to
9 analyze for the same analyte. And when we
10 started to move the method over to the new
11 instrument, which was more sensitive than the old
12 method, we started to find this chemical there at
13 very low levels in bodies that we knew had never
14 been exposed to that particular drug.

15 So that was then reported immediately to
16 the investigators in Florida. We did all of that
17 work ourself. We reported it to the
18 investigators and informed the Court of our
19 findings.

20 Q. Now, just out of the goodness of your heart, you
21 kept testing these samples, is that what you are
22 saying? There was no ongoing post-conviction
23 litigation that was involved in this case?

24 A. No, sir, not at all. As I testified, we
25 continued to test specimens because we were

1 requested to do this examination on other cases
2 in the future.

3 Q. Okay. And what happened was this, you expressed
4 an opinion, in court, to the jury, that the
5 presence of the metabolite, succinylmonocholine,
6 proved to a scientific certainty, the prior
7 presence of or injection of succinylcholine,
8 correct?

9 A. Can I see what you are reading from, please.

10 Q. I just asked you the question?

11 A. I don't recall. I would have to see what you are
12 reading from.

13 Q. Okay. Well, I will show you this in just a
14 moment. In any event, several years later, the
15 attorney general, or the prosecutor in Florida,
16 submitted what's called a notice to the court,
17 that is marked as the Exhibit 439, correct?

18 A. I don't know what that form is called, I'm sorry.

19 Q. Well, have you seen this exhibit before?

20 A. First time I saw it was yesterday.

21 Q. Okay. But you saw it yesterday?

22 A. Yes.

23 Q. Okay. I'm going to read you a sentence and you
24 tell me in you agree or disagree with it. The
25 purpose of this filing is to notify the Court and

1 the defendant that recent scientific testing,
2 conducted by National Medical Services and the
3 Federal Bureau of Investigation Laboratories, has
4 discovered that the findings specifically related
5 to this defendant and the testimony of the
6 experts from each of these laboratories, though
7 believed to be correct at the time of the
8 testimony, can no longer be relied upon.

9 The findings of the presence of
10 succinylmonocholine in the specimens tested are
11 believed to be accurate and correct; however, the
12 opinions that the succinylmonocholine proves, to
13 a scientific certainty, the prior presence of, or
14 ingestion of, succinylcholine are not correct,
15 end quote.

16 A. I disagree with that statement.

17 Q. You do? Oh, this is the ***State of Florida vs.***
18 ***William Sybers***, correct?

19 A. Yes, it is.

20 Q. Okay. Prosecutor apparently agreed with it,
21 correct?

22 A. I think you would have to ask the prosecutor; I
23 don't know.

24 Q. Okay. Well, would you like to see the signature
25 of the State's attorney on this document?

1 A. Yes.

2 Q. Do you see that?

3 A. Yes.

4 Q. Okay. By the way, National Medical Services is
5 the lab that you interned at, correct?

6 A. I did a three month intern there while I was
7 working on my master's in 1987.

8 Q. And in the trial of that case, you and Dr. Kevin
9 Ballard, from that lab, were both testifying for
10 the prosecution, correct?

11 A. Yes, we were both called by the prosecution to
12 testify in that case, that's correct.

13 Q. Do you know how many years Mr. -- or Dr. Sybers
14 spent in prison before the -- before these tests
15 proved to disprove that original thesis?

16 A. I believe he's still in prison, sir.

17 Q. Well, did you ever go apologize to Dr. Sybers?

18 A. No, sir, I did not.

19 Q. Did you ever send a letter or apology to the
20 jurors who convicted him, for giving them an
21 opinion that was later retracted by the
22 prosecutor himself?

23 A. No, because I believed my original testing was
24 accurate, that the specimens did contain what I
25 said were in those specimens, which was

1 succinylmonocholine.

2 Q. And that your opinion was that the presence of
3 that proved poor Mrs. Sybers had been injected by
4 the parent drug?

5 A. And that opinion, of course, was based on the
6 research that was available at the time.

7 Q. And later research proved your opinion to be
8 wrong; isn't that right, sir?

9 A. Not exactly. Later research, with more sensitive
10 instrumentation that was not used in the Sybers
11 case, proved that we were able to find traces of
12 this chemical, now, when we used a more sensitive
13 approach than we actually used in this case.

14 Q. So, later science and instrumentation proved your
15 opinion, offered to the jury to a reasonable
16 degree of scientific certainty in that case, was
17 wrong, correct?

18 A. No, sir. I believe all it did is actually
19 confuse the issue.

20 Q. Just like you are doing here today in Mr. Avery's
21 case, correct?

22 A. I hope I'm not confusing the issue, sir.

23 Q. Well, I hope so too.

24 ATTORNEY BUTING: Thank you, sir that's all
25 I have.

1 THE COURT: Mr. Gahn, any redirect?

2 ATTORNEY GAHN: Yes, your Honor, just a
3 little bit.

4 **REDIRECT EXAMINATION**

5 BY ATTORNEY GAHN:

6 Q. Dr. LeBeau, will you, please, explain to the
7 jurors how you became involved in the Sybers
8 case, what transpired, and how it was finally
9 resolved?

10 A. Yes, I will. There was an investigation of a
11 medical examiner named William Sybers, in the
12 State of Florida. It was a very long ongoing
13 investigation where there was a great deal of
14 evidence -- the investigators felt there was a
15 great deal of evidence against this forensic
16 pathologist in the death of his wife. And the
17 investigation lasted approximately 10 years.
18 Because he was a medical doctor --

19 ATTORNEY BUTING: Judge, I'm going to
20 object, unless this is knowledge that he's acquired
21 on his own, from his involvement in the case, it's
22 hearsay and it's irrelevant. It's at least hearsay.

23 THE COURT: I think the background of the
24 case is already established and the witness should
25 move onto his role in it and what he knows happened

1 afterward, if we haven't heard it already.

2 A. The laboratory in Pennsylvania was involved in
3 this case and they analyzed those specimens from
4 her exhumed body for the presence of every single
5 chemical known to man. And they found the
6 presence of this chemical called
7 succinylmonochole. And in that, they concluded
8 that that would -- that chemical was a metabolite
9 that comes from succinylcholine. And that was
10 very well established in the research that dated
11 back into the '50s.

12 But because they were the only
13 laboratory that did this analysis and because
14 they had some prior evidence rejected by the
15 Court on that particular case, the Court ordered
16 the prosecution to find another laboratory to
17 verify the findings of the laboratory out of
18 Pennsylvania and they called upon us to do so.

19 So we developed a method -- quickly
20 developed a method to try to identify the
21 presence of this chemical, succinylmonochole,
22 in tissues, which is actually one of the most
23 difficult types of analyses to do. And we did
24 identify the presence of this chemical in some of
25 the same tissues that the laboratory in

1 Pennsylvania found it in, but not all of them.
2 And I testified to that in the trial, that we
3 were not able to find it in all those tissues and
4 that our method was not as sensitive as the
5 method that was used by the laboratory in
6 Pennsylvania.

7 I did conclude, at that trial, that the
8 only known source of succinylmonocholine, at the
9 time, came from injections of the parent drug,
10 succinylcholine. And I testified to that. We
11 did validate the method before it was put into
12 use. We ran negative tissues from other bodies
13 that we knew had never been exposed to
14 succinylcholine or succinylmonocholine.

15 Then, in the years after the trial and
16 the conviction, we were continuing to get
17 requests from other agencies that were claiming
18 that that same laboratory in Pennsylvania had
19 found the presence of this same chemical in old
20 cases, unclosed cases. And after awhile I
21 started to get concerned, because it didn't make
22 sense to me that this very unique drug would be
23 used in so many homicide cases.

24 So we started testing, using a new
25 instrument. And we transferred the method over

1 to this new instrument that was much more
2 sensitive than what we had used in the past. And
3 in the validation steps for the transfer, we ran
4 some blank tissues again, as we did before we
5 used it in the Sybers case. But this time we
6 started to find small, small amounts of the
7 chemical, succinylmonocholine.

8 And we -- as soon as we finished that
9 and we verified the findings, we consulted
10 heavily with the laboratory in Pennsylvania and
11 we concluded that this was present in very trace
12 amounts, naturally, in our bodies, at least in
13 postmortem specimens. So we were the very first
14 ones to identify this.

15 And we reported it immediately, not only
16 to the prosecutor in that case, but prosecutors
17 in other cases. And we also immediately put a
18 letter into the *Journal of Analytical Toxicology*
19 so that that information would be immediately
20 available to anyone else that may be doing this
21 testing. So my opinion at the time, I feel, was
22 correct. At the time, the only known source for
23 succinylmonocholine came from the parent drug
24 succinylcholine.

25 Q. And it was your testing for this chemical later

1 on that you notified the Court that the
2 technology that you had in place now was finding
3 it?

4 A. That's exactly right.

5 Q. And can you tell this jury how was the Sybers
6 case resolved.

7 A. My understanding is --

8 ATTORNEY BUTING: Objection, the -- we
9 can -- the Court can take judicial notice of how the
10 matter was ultimately resolved. And unless this
11 witness was involved in the resolution, I don't know
12 how that is relevant.

13 ATTORNEY GAHN: Well, your Honor, I will
14 take the exhibit that defense attorney has been
15 reading from and I would like to get a complete
16 reading of the exhibit.

17 THE COURT: Is the exhibit available?

18 ATTORNEY BUTING: Yes, it is.

19 Q. (By Attorney Gahn)~ This is Exhibit 439 that you
20 have seen before?

21 A. Yes, it is.

22 Q. And do you know, how was this case resolved
23 against Mr. Sybers?

24 A. Dr. Sybers pled guilty.

25 Q. Thank you.

ATTORNEY GAHN: That's all I have.

RECROSS-EXAMINATION

BY ATTORNEY BUTING:

Q. Dr. Sybers pled guilty to time served and was released immediately, wasn't he?

A. That I don't know, sir.

Q. You haven't researched it? You didn't look that up; is that what you are saying? Do you know that Dr. Sybers was released from prison, in 2003, as a result of entering a plea that was time served, after this notice was filed with the Court?

THE COURT: I'm going to intercept here and stop with your comment. I think the relevance of whatever happened to him later is borderline. I believe the testimony that's relevant to this case is already in the record.

ATTORNEY BUTING: All right.

THE COURT: Members of the jury, we're going to excuse you for today. I apologize for running late. Again, I will remind you not to discuss the case with each other or with anyone else and we'll see you tomorrow morning.

(Jury not present.)

THE COURT: You may be seated. Counsel,

1 I'm not going to take up any of the outstanding
2 motions at this time, but we probably should deal
3 with Exhibit 466, the PowerPoint presentation of
4 this witness that the defense objected to -- defense
5 objected to the admission.

6 ATTORNEY BUTING: I object to it because it
7 really draws a conclusion that -- of a dripping -- a
8 finger dripping blood, when the State is trying to
9 argue that that may have been the source of the
10 blood is highly prejudicial and apparently without
11 any foundation from this witness, according to his
12 own testimony.

13 THE COURT: Mr. Gahn.

14 ATTORNEY GAHN: I think that the witness --
15 that the doctor testified that his PowerPoint
16 demonstration would be helpful to the jury. And I
17 think he explained that on cross-examination that
18 the only reason he used that was because it was in
19 the Microsoft. I really don't think it has any
20 impact.

21 THE COURT: In the Court's mind, the jury
22 has already seen it. He's given a satisfactory
23 explanation. I believe the jury understands it was
24 used for illustrative purposes only and it is
25 consistent with the opinion that he gave, so I'm

1 going to admit Exhibit 466.

2 ATTORNEY BUTING: I would also move to
3 admit whatever -- what are those two, the curriculum
4 vitae, No. 480, of Mr. Brewer -- Dr. Brewer, oh,
5 and No. 479, which is the original intake internal
6 communication document.

7 THE COURT: Are there any exhibits that you
8 marked that you are not requesting be admitted?

9 ATTORNEY BUTING: I don't believe so. I
10 think we have introduced everything else.

11 THE COURT: Any objection from the State to
12 any of the marked exhibits being admitted?

13 ATTORNEY GAHN: Only to the CV of
14 Dr. Brewer, I don't what the purpose of that is.
15 Dr. Brewer did not testify.

16 THE COURT: He did not testify, but there
17 was testimony he played a role in the testing of the
18 blood, so I'm going to allow that exhibit as well.
19 Anything else today?

20 ATTORNEY STRANG: Are 475 through 478 in?

21 ATTORNEY GAHN: Yes.

22 ATTORNEY STRANG: They are, okay.

23 THE COURT: All right. We'll see you
24 tomorrow morning.

25 ATTORNEY GAHN: Your Honor, may Dr. LeBeau

(Jury present.)

THE COURT: At this time the Court calls State of Wisconsin vs. Steven Avery, Case No. 05 CF 381. We're here this morning for a continuation of the trial in this matter. Will the parties state their appearances for the record, please.

ATTORNEY FALLON: Good morning, your Honor, may it please the Court, the State appears by Assistant Attorney General Tom Fallon, District Attorney Ken Kratz, and Assistant District Attorney Norm Gahn as special prosecutors for Manitowoc County.

ATTORNEY BUTING: Good morning, your Honor. Attorneys Jerome Buting and Dean Strang appear with Mr. Avery, the defendant.

THE COURT: All right. I will indicate for the record, this morning, as usual, I met with counsel in chambers, before we began, to discuss the agenda for today. Is there anything either party wishes to address on the record, outside of the presence of the jury before we bring the jurors in?

ATTORNEY FALLON: Nothing, at this time, from the State.

ATTORNEY BUTING: No, your Honor.

THE COURT: Very well, we'll bring the

1 jurors in at this time.

2 (Jury present.)

3 THE COURT: You may be seated. And,
4 Mr. Fallon, are you going to be questioning the
5 State's first witness?

6 ATTORNEY FALLON: I am, thank you.

7 THE COURT: You may call your witness.

8 ATTORNEY FALLON: State would call Special
9 Agent Rod Pevytoe.

10 **SPECIAL AGENT RODNEY PEVYTOE**, called as
11 a witness herein, having been first duly sworn,
12 was examined and testified as follows:

13 THE CLERK: Please be seated.

14 THE WITNESS: Thank you.

15 THE CLERK: Please state your name and
16 spell your last name for the record.

17 THE WITNESS: My name is Rodney Pevytoe,
18 P-e-v-y-t-o-e.

19 **DIRECT EXAMINATION**

20 BY ATTORNEY FALLON:

21 Q. What do you do for a living?

22 A. I'm a Special Agent with the Wisconsin Department
23 of Justice, the Division of Criminal
24 Investigation. I'm assigned to work in the arson
25 bureau of that unit.

1 Q. And how long have you been employed for the
2 Division of Criminal Investigation, Wisconsin
3 Department of Justice?

4 A. It should be 27 years next week.

5 Q. How long have you been a law enforcement officer?

6 A. Over 30 years.

7 Q. And prior to joining the Department of Justice,
8 what law enforcement experience have you had?

9 A. I was a reserve deputy with the Marathon County
10 Sheriff's Department --

11 COURT REPORTER: I'm sorry, Judge, I
12 can't hear the witness.

13 THE COURT: You'll have to get a little
14 closer to the microphone.

15 COURT REPORTER: Could you repeat that,
16 please.

17 A. I was a reserve deputy with the Marathon County
18 Sheriff's Department in Wausau, Wisconsin.

19 Q. How long have you been assigned to the Arson
20 Bureau?

21 A. It will be 25 years next week.

22 Q. What types of cases does the Arson Bureau involve
23 themselves in?

24 A. Our primary emphasis is the investigation of
25 fires and explosions that occur in the State of

1 Wisconsin, determine their cause and assist in
2 further follow up criminal investigation, if it
3 is warranted.

4 Q. Approximately how many fire investigations have
5 you been involved in in your years of experience
6 in the Arson Bureau?

7 A. I don't have an exact number, but I can say it's
8 easily in excess of 800.

9 Q. Of those investigations, do you have an idea for
10 us approximately how many of them involved a
11 death?

12 A. The best estimate I could give you is
13 approximately 100 individual incidents. And some
14 of those would involve multiple fatalities.

15 Q. How does the Arson Bureau typically get involved
16 in a case?

17 A. When there is a fire or an explosion, we'll
18 receive a request from either a fire chief or a
19 law enforcement official to come there and work
20 with them in making determination as to the
21 events that occurred there and assist them in
22 further investigation, if warranted.

23 Q. And where are you currently based?

24 A. I work out of northern Wisconsin, near Eagle
25 River.

1 Q. Tell us about your educational background. Do
2 you hold a bachelor's degree?

3 A. Yes, I do. I have a bachelor's degree in
4 criminal justice from the University of Wisconsin
5 in Oshkosh.

6 Q. And approximately when did you receive that
7 degree?

8 A. 1978.

9 Q. Do you hold any certifications as a law
10 enforcement officer?

11 A. Yes, I do. I'm a certified law enforcement
12 officer in the State of Wisconsin.

13 Q. And do you belong to any particular associations
14 which are pertinent to the field of fire
15 investigation?

16 A. Yes, I'm a member of the International
17 Association of Arson Investigators in Wisconsin
18 Chapter, as well as in the International Chapter.
19 And I currently serve on the Board of Directors
20 for the International Association.

21 Q. And approximately how long have you been
22 associated with the International Association of
23 Arson Investigators?

24 A. Be 25 years next week.

25 Q. Do you have any estimate as to approximately how

1 many members, worldwide, are in this
2 International Association?

3 A. I believe that the total is somewhere between 7
4 and 8,000 right now.

5 Q. Are there any certifications that are awarded or
6 provided in conjunction with membership in the
7 International Association of Arson Investigators?

8 A. The International Association of Arson
9 Investigators has a certified fire investigator
10 program. You don't have to be a member of that
11 association to earn that accreditation, but they
12 do have a program to certify a level of
13 competency in fire investigators.

14 Q. All right. Have you received such a
15 certification from this association?

16 A. Yes, sir.

17 Q. And how long have you held such a certification?

18 A. I believe it's 22 years now.

19 Q. Are you currently still certified by the
20 association?

21 A. Yes.

22 Q. And do you continue to receive training in arson
23 investigation or fire investigations and
24 explosions?

25 A. Yes, I do. It's an ongoing basis always.

1 Q. As a result of your 25 years experience and
2 training and certifications, are you familiar
3 with the concepts of cause and origin of fire?

4 A. Yes.

5 Q. Are you capable of recognizing possible human
6 remains which have been damaged by fire as a
7 result of your training and experience?

8 A. Yes, sir.

9 Q. Are you familiar with the concept of accelerants
10 and their role in the cause and origin of fire?

11 A. Yes.

12 Q. Briefly, what is an accelerant?

13 A. An accelerant is typically either a fuel or an
14 oxidizer -- oxidizer that's added to the
15 combustion process to enhance it. Most of the
16 time we think of it as ignitable liquids, but
17 it's not necessarily always that.

18 Q. All right. What are some of the other forms that
19 an accelerant may take?

20 A. Well, in a solid or in a gaseous form.

21 Q. All right. Directing your attention to this
22 particular case, how did you get involved in this
23 investigation?

24 A. Well, on November 9th of 2005, I received a
25 telephone call. I was working on a case in

1 northern Wisconsin. And during that telephone
2 conversation, I was requested to come down to
3 Manitowoc to assist in the investigation of the
4 scene.

5 Q. And that -- November 9th would have been a
6 Wednesday; is that correct?

7 A. That's correct.

8 Q. And approximately what time did you arrive on
9 scene?

10 A. I'm not sure of the exact time, but I'm going to
11 estimate it was approximately mid-afternoon.

12 Q. And when you arrived, what was the first thing
13 you did in conjunction with this case?

14 A. Well, there was a security checkpoint, so I
15 checked in with a officer that was manning that.
16 And then I went over to a command area, if you
17 will, and I spoke to Special Agent Fassbender,
18 who was the leader of that. And then I was
19 introduced to Detective Wiegert, who was also
20 working on that.

21 Q. After this briefing and introduction, what first
22 investigative step, if any, did you take on that
23 day?

24 A. Just more or less got a tour of the whole
25 situation there, in order to make an assessment

1 of any potential needs that would be required for
2 further investigation on my part.

3 Q. As part of this initial tour, did you have an
4 opportunity to observe the area which has
5 previously been identified as the burn pit,
6 behind the residence of the defendant?

7 A. Yes, I did.

8 Q. Tell us your initial observations.

9 A. Well, what was described as the burn pit, is in
10 back of a car or automobile garage there. It was
11 a raised area of soil that had an indentation in
12 it. That indentation, approximately four feet
13 wide, maybe five feet deep, into that soil, or
14 mound, or plateau area. And it had some darkened
15 residue at the base of that. It had been covered
16 up with a tarp prior to my arrival.

17 Q. And did you attempt or begin any processing of
18 that area on Wednesday afternoon, November 9th?

19 A. No, I didn't feel that the weather or the
20 resources allowed it at that time.

21 Q. Did you conduct any other investigative activity
22 on that day?

23 A. No, other than just getting familiar with the
24 scene and making an assessment of the needs.

25 Q. All right. Directing your attention, then, to

1 Thursday, November 10th, in the morning, what was
2 the first investigative task that you undertook?

3 A. Well, the first thing I did on Thursday was
4 actually come here to Chilton to the sheriff's
5 department and I went and met with Deputy Riemer
6 of the Calumet County Sheriff's Department. And
7 myself, along with Special Agent Tom Sturtivant,
8 we did a re-examination of some char material
9 that had been previously removed from the burn
10 pit area.

11 Q. All right. And tell us about that particular
12 examination?

13 A. Well, in that examination, we set up some clean
14 tarps under -- or brand new tarps underneath,
15 elevated the debris so we could get very close to
16 it and look at it, put some very bright lights on
17 it to try to identify as much as we could and
18 then began a systematic process of evaluating the
19 material, going through it in an attempt to
20 identify potential evidentiary items that may be
21 in there.

22 Q. Did you locate any potential items of evidentiary
23 significance in your examination of the debris?

24 A. Yes, sir.

25 Q. And tell us about that?

1 A. Well, I encountered numerous items that I
2 suspected were bone fragmentation. I also
3 recovered something that I believed was part of a
4 tooth. And then a couple other items that were a
5 darkened mass roughly the size of, let's say, a
6 golf ball, maybe a little bit larger, that I felt
7 was charred muscle tissue.

8 Q. And what did do you with these materials that you
9 suspected to have evidentiary significance?

10 A. Deputy Riemer from the sheriff's department was
11 present with me and he was directly adjacent to
12 me. So, when we recovered items, I literally
13 just took them from my hand and put -- handed it
14 over to him.

15 Q. Approximately how long did this process take?

16 A. Until about midday.

17 Q. And during this process, were you assisted by
18 anyone other than Special Agent Sturtivant and
19 Deputy Riemer?

20 A. No.

21 Q. After completing your examination of this debris,
22 what was the next step, investigative step, that
23 you took in this case?

24 A. I went back out to the Avery property.

25 Q. Can you estimate for us your approximate arrival

1 time at the Avery property?

2 A. I believe it was the early part of the afternoon
3 on Thursday.

4 Q. All right. Upon your arrival at the property,
5 what task did you undertake?

6 A. Well, after checking in with everybody there and
7 going through the security procedures, I met with
8 other agents from the Arson Bureau there. They
9 went about some different tasks at the property
10 and then myself, and Special Agent Mike Rindt,
11 and Special Agent Jim Sielehr, we conducted a
12 re-examination of the burn pit area.

13 Q. All right. And what role did Special Agent Rindt
14 fulfill on this particular day with respect to
15 the burn pit?

16 A. Well, his initial role was to do some photography
17 of the scene. And then once that was completed,
18 or as part of that ongoing process, he did assist
19 in the examination and so did Special Agent
20 Sielehr.

21 Q. And what did do you when you arrived at the pit?

22 A. Well, the first thing we did is we documented
23 with photographs. And then there were some
24 evidence technicians from the City of Manitowoc
25 Police Department there, so I asked them to do a

1 grid search of the perimeter of that raised soil
2 area.

3 And there were three of them there, so
4 what I had them do in the grid search is, they
5 walk, literally, shoulder to shoulder. And they
6 were to go in a crisscross pattern, one
7 direction, then going perpendicular to it later.
8 They were supposed to walk through the grass. If
9 they saw anything that seemed out of place or
10 they didn't understand, they were just supposed
11 to mark it and not handle it.

12 I gave them some flags that would be
13 like you see for utility companies, a little flag
14 on a wire. And they would highlight those areas
15 and they would be looked at by Deputy Riemer.
16 And if it was potential evidence, he would be
17 taking it from that perimeter area, so to speak.

18 Q. Now, with respect to the actual burn pit itself,
19 what did you do there?

20 A. Well, maybe to back up a little bit, we didn't
21 start with the burn pit. The next step after
22 doing that perimeter search was to do the
23 elevated part of the sand area, which was larger
24 than the pit area. And then the pit was the last
25 part of the examination process, if you will.

1 Q. All right. Tell us about that.

2 A. Okay. Well, the first thing that we did when we
3 looked at that elevated area, after some
4 photography of it, is I established a path to
5 walk in, walked into the area, noticed some areas
6 that had some debris that had some potential
7 interest, that was up above. And I marked those
8 with flags. I exited in the same route that I
9 entered.

10 And then we developed a plan where the
11 three of us would begin to enter from the edge of
12 it; in other words, going from the grass and
13 working our way into the pit, from the far side
14 of the soil, the farthest distance from the burn
15 pit, and we would start to pick up evidentiary
16 items.

17 The first thing we encountered was a dog
18 house there. So I crawled into the dog house to
19 see if there was any evidence there. We moved it
20 out of the way. We eventually found, I think the
21 roof came off of it. So we examined the dog
22 house, the chain, a few other things that were
23 there, to see if there was anything that -- of
24 particular interest in that area. And then we
25 continued to progress throughout the soil.

1 Q. Did you find any interest in and around the dog
2 house?

3 A. Not in what I expected to be human remains, but
4 we were in the process of taking everything that
5 was there to ensure for it's preservation.

6 Q. After examining the dog house and the elevated
7 dirt pile, how did you proceed?

8 A. Once we completed that elevated area, we then
9 proceeded into this depression that's been called
10 the burn pit. I divided that pit in half,
11 visually, east and west. And we moved in from
12 its perimeter, the edge of it, on our hands and
13 knees and moved through that, and removing items
14 that we suspected would be evidence. And
15 eventually removed all of the ash, there was like
16 a caked, baked on layer of the top soil right
17 there. Actually crumbled that and sifted all the
18 debris and then preserved and removed all of that
19 from the same.

20 Q. All right. Tell us about the material that you
21 found as you began to examine the burn pit.

22 A. Well, there was this heavy layer of black --
23 blackened soil. It kind of had an oily residue.
24 There was some heavy black, dark charred
25 material. Didn't look like cellulose or wood

1 type charring, although there was some there.

2 There were some different remains of --
3 I think there was like a couple hinges, and like
4 different metal parts that we would encounter in
5 that process. And also we found some things that
6 we suspected were some potential bone
7 fragmentation.

8 Q. And tell us about some of the other items; did
9 you find any wire, for instance?

10 A. Yes, just off to the side of the burn pit there
11 was a large ball of intertwined wire that was
12 present. And then there was also the metal
13 remains of what I thought was the -- like a back
14 seat of a SUV type vehicle that had been removed
15 and that also was burned.

16 Q. All right. And tell us, was there anything
17 noteworthy about the balls of wire that you found
18 in conjunction with your examination of the pit
19 area?

20 A. Yes, the wire is consistent with what I have seen
21 in the past in other fires. And it's the wire
22 that remains after steel belted radial tires are
23 burned. So we had this large groupings of oval
24 shaped wires, so to speak, that were all
25 entwined. And in examining those, I noticed that

1 there was some bone fragmentation entangled in
2 the wires, so we attempted to photograph that and
3 recover those items also. And eventually took
4 the whole tangled wires and that rear car seat
5 that I had mentioned.

6 Q. All right. In your fire investigative
7 experience, can you tell us whether steel belted
8 radial tires, do they burn?

9 A. Yes.

10 Q. And is rubber considered an accelerant?

11 A. It can be. It certainly has -- When we look at
12 materials, we judge it by the amount of heat
13 energy it releases. And in my definition, tires
14 being introduced to a fire greatly enhances its
15 ability to burn. It releases a lot more heat
16 energy into it and I believe that tires can be
17 used as a form to accelerate a fire.

18 Q. All right. Now, why did you take the rear seat
19 of the vehicle; why was that of some particular
20 interest to you?

21 A. Well, first of all, because it was there. And it
22 was in the crime scene area, so we removed that.
23 And, also, I didn't know if it would be matched
24 up to a vehicle later on. And, also, the seat
25 itself may have had some impact on the way the

1 fire burned. The foam rubber on the seat, once
2 the seat covering is removed in a combustion
3 process, the foam rubber also burns with great
4 intensity.

5 Q. All right. Approximately how long did the
6 processing of this area take?

7 A. Several hours because we went into the hours of
8 darkness that day. I wanted to -- Once we
9 initiated the process, I wanted to complete it.
10 So we brought in a generator and some large --
11 several sets of large floodlights to illuminate
12 the area. It might have been as late as 9,
13 10:00, when we were completed.

14 Q. Okay. With the -- With the items that you
15 suspected of evidentiary value, what -- what did
16 you do with those items which were collected from
17 this area?

18 A. Deputy Riemer was, again, accompanying us in this
19 examination. His role was to take any items that
20 we seized as evidence and, then, he was the
21 evidence custodian for that process.

22 Q. All right. Upon completion of your work on
23 Thursday, November 10th, did you return to the
24 area on Friday, November 11th?

25 A. I did.

1 Q. What were your tasks to perform on Friday,
2 November 11th?

3 A. Well, there were some other areas at the property
4 that needed some examination and evaluation.

5 Q. And what areas were those?

6 A. There were several spots. The first one was an
7 aluminum smelter that was part of the junkyard
8 operation. There was an outdoor wood boiler at
9 the property that we looked at.

10 And then there were several areas, there
11 was a campfire pit in a backyard of one property.
12 And some other areas where some debris had just
13 been discarded at different times; we were
14 looking at that.

15 Q. Well, let's take those one at a time and let's
16 begin with the boiler area. Tell us about that.

17 A. This wood boiler is a commercially made outdoor
18 wood boiler that's used as a -- either a
19 supplemental or primary heat source for a
20 residence, or in this case, the commercial area.

21 It's a large self-standing unit and has
22 a large door. You open it up and if you were to
23 use it, you would ignite a fire in there, it
24 would heat water and then the water would be
25 circulated for the heating process in a remote

1 location.

2 Q. All right. And tell us your external visual
3 observations as to the condition of this boiler.

4 A. Well, the boiler, first of all, was cold. It
5 wasn't warm, did not give the appearance of
6 having been used at any time in the recent past.
7 In fact, on the smoke stack of the boiler, there
8 was a five gallon bucket over the top of it, I
9 assume to keep rain water from getting into it at
10 some point.

11 We then opened the door into the
12 combustion chamber and it was filled with paper
13 products that were unburned, as if items had been
14 placed in there in the past. So as part of our
15 examination process, we removed that unburned
16 paper, looked through it, and then eventually
17 removed all the ash that was in the bottom of it,
18 and looked through it. And, then, as the final
19 step, I partially crawled into it to -- with a
20 flashlight, to examine the area as best I could.

21 Q. I'm going to have Special Agent Fassbender
22 provide you some photographs for your
23 examination.

24 A. Thank you.

25 Q. I believe you are first examining, is it

1 Exhibit 381?

2 A. Yes, State's Exhibit 381 is a photograph.

3 Q. I'm sorry, is that 3-8 or 4-8-1? I'm sorry.

4 A. Oh, I'm sorry, yes, it's Exhibit 4-8-1. It's
5 Case 381, so my confusion, I apologize.

6 Q. Is that the boiler that you examined on Friday,
7 November 11th?

8 A. Yes.

9 Q. Does that appear to be a true and accurate
10 depiction of how it appeared to you when you
11 examined it on that day?

12 A. It does.

13 Q. All right. Directing your attention to the large
14 screen projection of that exhibit, does that
15 accurately reflect the exhibit itself?

16 A. It does.

17 Q. All right. Now, you mentioned something about a
18 bucket, is that depicted in the picture?

19 A. Yes, you can see a stainless steel smoke stack on
20 the boiler. And at the top of it, there's a
21 white, I assume it's a five gallon size, plastic
22 bucket covering that.

23 Q. All right. Upon making the observation of this
24 particular boiler, what was the next step in your
25 investigative process?

1 A. Well, we took some additional photographs and
2 then we began to look into the combustion
3 chamber.

4 Q. All right. If your -- If your attention then
5 would be directed to the next photograph,
6 Exhibit 482 is it?

7 A. Correct, 482, is an accurate depiction of the
8 scene when I saw it. And that photograph is
9 actually just a close up, more so of the
10 chimney --

11 Q. All right.

12 A. -- on this unit.

13 Q. Now, again, who was assisting you in the
14 investigative process on this particular date?

15 A. Special Agent Rindt was.

16 Q. All right. Next exhibit, please, 483, I believe.

17 A. Yes, State's Exhibit 483 is a photograph that is
18 an accurate prediction -- presentation of the
19 boiler unit when we opened up the door.

20 Q. All right.

21 A. And that shows the unburned paper products that
22 we found in there initially.

23 Q. Upon your examination of the inside of this
24 boiler, what did you do?

25 A. We removed these paper products and examined

1 them.

2 Q. All right. And next exhibit, please, 484.

3 A. State's Exhibit 484 is an accurate depiction of
4 the side of the wood boiler.

5 Q. Exhibit 485.

6 A. State's Exhibit 485 is a photograph we took and
7 that is an accurate depiction of the boiler unit
8 after we removed the ash from the bottom of it.
9 It's a gray cellulose type ash.

10 Q. All right. Tell us about the removal of the ash
11 from the boiler?

12 A. We employed a systematic process where we would
13 remove it and examine it as we were placing it
14 down onto this tarp. Photo editor doesn't look
15 like it's showing the whole bottom of the
16 photograph, at least in this depiction. There.

17 Q. All right. Why did you remove the ash?

18 A. To examine it.

19 Q. And what did you note, you said something about
20 the cellulite content of the ash?

21 ATTORNEY STRANG: Cellulose.

22 Q. (By Attorney Fallon)~ Cellulose, excuse me. What
23 did you mean by that?

24 A. Well, if you noticed, the ash is very gray in
25 color, much like you might get from the bottom of

1 a fireplace after you use it for a long time.
2 And this gray, very fine ash is typical of what I
3 have seen from wood products that are burned in a
4 relatively complete combustion process.

5 Q. Now, with respect to that ash, was that at all
6 similar to any of the ash you found in your
7 investigation of the burn pit area?

8 A. No, the ash from the burn pit was very dark black
9 in color and almost more granular in nature.
10 This was very, almost powder, something like a
11 talcum powder almost type consistency, if you
12 will.

13 Q. All right. Your next photograph is exhibit?

14 A. State's Exhibit 486. And that would be a
15 photograph and that depicts the internal part of
16 that burn chamber on the wood boiler. And I
17 believe you have it sideways, the left hand side
18 would be the top of it.

19 Q. The left hand side is the top?

20 A. Yes.

21 Q. All right.

22 A. Rotate it clockwise. And that photograph there
23 would be -- that's the inside of the boiler unit
24 after we have removed the ashen remains. And
25 that gray area is the bottom where the combustion

1 takes place. And so we removed that and then
2 that's where I eventually got partially into and
3 used a flashlight to examine and see if there was
4 anything that we missed in there.

5 Q. And in terms of your investigation of the boiler,
6 did you find anything of evidentiary significance
7 in your opinion?

8 A. No.

9 Q. All right. What do you have for your next
10 exhibit, 480?

11 A. I see some photographs of the smelter unit.

12 Q. All right. And is that where your investigation
13 took you next?

14 A. Actually, we did the smelter before we did the
15 wood boiler, but ...

16 Q. All right. Tell us about your investigation of
17 the smelter.

18 A. This smelter unit was kind of an addition onto
19 part of one of the buildings. It was just a
20 partially enclosed area. And it was an LP gas
21 fueled unit and it appeared, by the stock piles
22 of stuff there, it was used to melt aluminum
23 components from the automobile salvage area and
24 eventually render down into ingots at some point.

25 (Court reporter asked him to repeat.)

1 A. Into an ingot form.

2 Q. By the way, how did it come to pass that you were
3 examining the boiler and now this smelter?

4 A. I was requested to do so by Special Agent
5 Fassbender.

6 Q. And when you investigated the smelter, who
7 assisted you in this particular process?

8 A. Again, Mike Rindt, who is a special agent with
9 the Department of Justice, was with me.

10 Q. And what -- The next exhibit you have there, with
11 respect to the smelter, is Exhibit 480?

12 A. Well, I do have 145. I don't know if that's --

13 Q. That's fine, 145. Do you recognize Exhibit 145,
14 we're putting that on the screen; it's already
15 been received.

16 A. All right. State's Exhibit 145 is that smelter
17 unit that I previously described. You can see
18 some of the aluminum material in the background.
19 And the very center of the photograph, the
20 heavily oxidized unit, is the smelter.

21 Q. All right. And what's your next photograph?

22 A. 487.

23 Q. 487. And Exhibit 487 depicts what?

24 A. That's a depiction of the back of the smelter
25 unit. It shows where the fuel lines that feed

1 that unit are. And there's a couple blower
2 motors.

3 Q. All right. And the next exhibit?

4 A. 488.

5 Q. 488. And what is depicted in Exhibit 488?

6 A. That is the area where the material is introduced
7 and melted.

8 Q. All right. How was this picture obtained?

9 A. If you look in the bottom left hand corner, you
10 see my foot there. In order to look at this
11 smelter unit, I crawled up on top of it and was
12 standing over it, looked down into this melting
13 area, if you will. And I had Special Agent Rindt
14 hand me the camera. So, I'm standing on top of
15 it, looking straight down into this melting area,
16 or melting pot of the smelter.

17 Q. All right. Next exhibit, please.

18 A. Exhibit 489, it's again, another photograph of
19 part of that melting pot, if you will, of the
20 smelter. This one shows three beer cans in it
21 that are unmelted.

22 Q. Again, was this particular photograph taken by
23 yourself when you were on top of the smelter?

24 A. It is.

25 Q. Next exhibit?

1 A. 490.

2 Q. And again --

3 A. Exhibit 490 is another photograph that I took
4 looking down into the melting pot of the smelter.

5 Q. All right. Next?

6 A. 491 is similar.

7 Q. This is another close up of that?

8 A. Yeah, at one point I reached down and moved some
9 things around to see -- you can see there's some
10 like slag in the bottom and some heavy oxidized
11 pieces of metal, so. Because there were areas
12 that were kind of out of direct view of up and
13 down so I had to lean at different angles to take
14 the photograph and did it that way.

15 Q. All right. And I note there are a couple of what
16 appear to be pipes on one of the walls to the
17 melting chamber; do you know what those are?

18 A. Yeah, if you look at the top of that photograph,
19 that would correspond to those blower motors that
20 we saw in the previous exhibit and that would be
21 where they are forcing air into that area.

22 Q. And your next photograph?

23 A. My next one is 493. And this is a depiction of
24 the smelter. It's from the opposite side as the
25 very first exhibit we looked at.

1 Q. And your next?

2 A. Next one would be 494. And that's kind of into
3 the entrance of where the smelter was and it
4 shows a stockpile of, again, what I believe to be
5 aluminum automobile parts. I assume would be for
6 future operation and melt down.

7 Q. And your last exhibit?

8 A. Final photograph is 494 -- excuse me -- 495. And
9 that's a photograph taken from a distance looking
10 out to the smelter and you also see the LP tank
11 that fuels that process.

12 Q. All right. Did you make written documentation of
13 your investigation regarding the boiler and the
14 smelter?

15 A. I wrote a report on the boiler and I forgot to
16 write a report on the smelter.

17 Q. All right. Who assisted you in -- Let me ask you
18 this, was there anyone else assisting you, other
19 than Special Agent Rindt, in your examination of
20 the boiler and the smelter?

21 A. No, Mike Rindt, was the one that was with me both
22 times.

23 Q. In terms of your investigation of the smelter,
24 did you find anything of any evidentiary
25 significance?

1 A. We removed no items of evidence from there.

2 Q. In your opinion, did it appear to have been
3 recently used?

4 A. Not at all.

5 Q. After your examination of the boiler and the
6 smelter, what other investigative tasks did you
7 perform that Friday, November 11?

8 A. There was a -- Just so we maybe separate for the
9 sake of definition, there was a campfire pit in
10 back of the Janda property and Special Agent
11 Rindt and I went over and examined the contents
12 of that area.

13 Q. And did you find any items of evidentiary
14 significance in that?

15 A. We took some items from there, just on the
16 potential that they could be evidence of
17 something. They were men's clothing that were
18 unburned, heavily soiled with like grease and
19 oil.

20 Q. Did you examine any other general debris area on
21 that Friday afternoon?

22 A. One other area was examined.

23 Q. What was that?

24 A. On the back of the defendant's property, at the
25 very rear of the property, there was a sharp

1 depression that went into what looked like an old
2 quarry area, sand pit. Down on that hillside
3 there was some just debris that was located by
4 searchers. And they asked us to look at that
5 debris just in potential that it could have been
6 something of significance to the investigation.

7 Q. All right. I'm going to have Exhibit 86
8 displayed in a zoomed in mode and ask if that
9 might assist you in showing us where you examined
10 this other debris pile?

11 A. This other debris pile that I'm just referring to
12 would be -- This is the burn pit at the Avery
13 property and the debris pile, this is actually a
14 slope down that goes towards these automobiles.
15 And it was on the slope, right in this area, that
16 those items were discarded and we examined them.

17 Q. Did you find anything of evidentiary significance
18 in the examination of that debris pile?

19 A. No, sir.

20 Q. Directing your attention, then, to Saturday,
21 November 12th, did you continue to assist in this
22 investigation on that day?

23 A. I did.

24 Q. And on Saturday, November 12th, who assisted you,
25 if anyone?

1 A. Special Agent Ronald Evan was with me at a couple
2 points.

3 Q. And did you have the opportunity to examine other
4 potential debris locations on that day?

5 A. Yes, sir, we did.

6 Q. And what areas -- Did you come to examine an area
7 that's been referred to as the Radandt deer camp?

8 A. Yes, sir.

9 Q. And tell us about your examination of that area.

10 A. There were a couple burn barrels there. And we
11 went there with the intent of examining those to
12 see if there were any items that could be of
13 significance. So we went through that and the
14 immediate area around that.

15 Q. And did you find any items of evidentiary
16 significance there?

17 A. As I recall, there was one unburned bone. It
18 looked like a steak bone that was there, but we
19 did take that, just in the possibility that it
20 could be important.

21 Q. Now, was there another location for one of the
22 Radandt Sand and Gravel operation that you
23 examined some debris?

24 A. I don't recall. I believe it was right at the
25 trailer, there was a burn barrel there. And it

1 was around that area that we were looking.

2 Q. Okay. In terms of your investigation of these
3 areas and items, you indicate you didn't require
4 -- excuse me -- you did recover some men's
5 clothing. If you found anything you thought of
6 significance, who was your contact with the
7 Calumet Sheriff's Office for receipt of any
8 information you determined of evidentiary
9 significance?

10 A. That would be Deputy Riemer.

11 Q. Now, in your examination of the burn barrels, I
12 think you said your first task in this -- Well,
13 let me ask you, did you have an opportunity to
14 investigate or to examine some burn barrels as
15 part of this?

16 A. Yes, on Saturday, the 12th, I believe it was.
17 When I was done at the fire pit at the Avery
18 property, I came back over to the Sheriff's
19 Department and there were several 50 gallon
20 barrels that they asked us to go through.

21 Q. All right. And tell us about those burn barrels.

22 A. Those barrels were here at the Sheriff's
23 Department here in Chilton and Special Agent Evan
24 and I, along with Deputy Riemer, went to an area
25 and Deputy Riemer would produce a 50 gallon

1 barrel and its contents and we would conduct an
2 examination of it. If we found anything that we
3 suspected would be potential evidentiary value,
4 we separated that from the barrel. The barrels
5 were being retained for evidence. But we
6 separated out things that might have been
7 important and set them aside and gave them
8 directly to Deputy Riemer for preservation.

9 Q. Now, of those barrels, how many of them did you
10 actually find anything that had some potential
11 evidentiary significance?

12 A. I think only one barrel. We recovered some bone
13 fragments at the time.

14 Q. Now, those bone fragments which were recovered,
15 how did those bone fragments compare with the
16 fragments that you found that were sifted from
17 the burn pit itself; was there anything distinct
18 in your mind about the condition of those
19 fragments or the size of those fragments compared
20 to those in the burn pit debris?

21 A. Yes, the fragmentation that I was finding from
22 the burn pit was very small. Much of it was --
23 in some cases was the size of half of your little
24 fingernail, if you will. Most of the bones were
25 very fragmented in there. Where the bones that

1 were recovered from that barrel on Saturday, the
2 burn barrel, they were of larger mass.

3 Q. All right. In your examination of materials from
4 the burn barrel, did you find anything such as
5 rivets, or grommets, or any other articles of
6 clothing?

7 A. No.

8 Q. In terms of your examination of the -- of the
9 items from the burn pit itself, did you find
10 evidence of clothing such as rivets, or grommets,
11 or things?

12 A. Yes.

13 Q. Tell us about that.

14 A. Well, during this process of the burn pit debris,
15 we looked at several things that were small, bone
16 fragments, couple dental fragments, as well as I
17 recall, at a later date in the examination where
18 we were going through it, if you will, in a very
19 fine dedicated manner to look for small items, we
20 recovered a couple brass colored rivets that --
21 like what you might see on a pair of blue jeans
22 or jean type clothing.

23 Q. All right. And when did that occur?

24 A. That was in December.

25 Q. And where?

1 A. At the State Crime Laboratory in Madison.

2 Q. And who if -- And who else participated in the
3 investigation of the debris on that day?

4 A. There were numerous people there. Dr. Eisenberg
5 was there for a while, myself, Special Agent
6 Heimerl. I believe Special Agent Rindt was
7 there. At one point Special Agent Fassbender and
8 Inspector Wiegert were there. There were a
9 couple people that were there for part of the
10 process, because it took multiple days to go
11 through that.

12 Q. All right.

13 ATTORNEY FALLON: Your Honor, at this time
14 I would move into evidence Exhibits, I believe 481
15 through 495. Apparently we marked Exhibit 492 and
16 that's just a re-mark of I think it was 145, so
17 rather than duplicate the evidence, we'll just go
18 with Exhibit 145, I believe it was.

19 ATTORNEY STRANG: Counsel is correct on the
20 duplication and I have no objection to any of the
21 tendered exhibits.

22 ATTORNEY FALLON: And we would pass the
23 witness for cross-examination.

24 THE COURT: Very well. The exhibits are
25 admitted. Mr. Strang.

1 ATTORNEY STRANG: Thank you.

2 CROSS-EXAMINATION

3 BY ATTORNEY STRANG:

4 Q. Mr. Pevytoe, good morning.

5 A. Good morning.

6 Q. You -- You have a quarter century's training in
7 arson investigation sounds?

8 A. Yes, sir.

9 Q. And, really, no training at all in archaeology?

10 A. You know, as part of the process of investigating
11 fire scenes, especially in fatal fires, and we
12 cover that. We duplicate a process that's much
13 used by anthropologists. So in classes that I
14 have had, we talk about the process that might be
15 employed and how it actually compares to what an
16 anthropologist or an archaeologist might do in a
17 grave dig.

18 Q. Right, in a burial site recovery.

19 A. Correct, and they are very similar at times.

20 Q. But in terms of training in archaeology as a
21 field, that's not something you have pursued?

22 A. No, I'm not an archaeologist, I'm a fire
23 investigator, sir.

24 Q. Not an anthropologist?

25 A. No.

1 Q. There are --

2 A. Took some classes in college in anthropology, but
3 I don't profess to have any extreme knowledge in
4 that area.

5 Q. Okay. There are some system similarities,
6 though, in the burn site recovery or -- I'm
7 sorry -- burial site recovery that might be used
8 in an arson investigation and in archaeology, as
9 you say?

10 A. Correct.

11 Q. Now, in an arson that results in fatalities, one
12 or more deaths you -- you typically, in going
13 into the burned area, would find the remains sort
14 of where they fell?

15 A. Well, in most cases. Sometimes they are moved,
16 in order to preserve them, by firefighters, or
17 something from damage.

18 Q. Yes, either moved accidentally by firefighters in
19 the course of trying to extinguish the fire?

20 A. Correct. Or intentionally.

21 Q. Or intentionally, again, to try to preserve the
22 remains for arson investigators later?

23 A. Or if there is a question of a life, not being
24 able to see correctly, obviously, they may remove
25 a body.

1 Q. Right. There may be emergency efforts?

2 A. Correct.

3 Q. Obviously, to preserve life?

4 A. Right.

5 Q. But, typically, in your experience as an arson
6 investigator, in the instances where the body has
7 been moved at all, that's been by responding
8 emergency personnel?

9 A. Well, I did have -- I recall one case that comes
10 to mind where I had some individuals that were
11 murdered and they were moved. And then they were
12 burned again. And then they were moved again.
13 So I had some where a defendant or a perpetrator
14 has moved body remains.

15 Q. Okay. Let's go to that. But you will recall
16 that my question started with typically?

17 A. And, typically, you are right.

18 Q. So, you know, as they say, typically, then, the
19 body is in place, untouched, unless responding
20 emergency personnel have had some reason to
21 disturb the body?

22 A. Correct. In most occasions that would be
23 correct.

24 Q. Right. Now you spoke of one instance where there
25 was a murder and then an arson?

1 A. Yes.

2 Q. Okay. And let's take that in order. This is not
3 all that uncommon in your experience, to have a
4 murder occur and then somebody set a fire to try
5 to conceal the fact of the murder?

6 A. Well, I don't know what we say is common. It is
7 certainly a possibility that people would use
8 fire to conceal evidence of a homicide or
9 something like that. Fortunately, I don't run
10 into it as a common place thing.

11 Q. If I didn't say, I meant to say, it's not
12 uncommon. You have had the experience in
13 investigating arsons that you concluded were set
14 to conceal a crime?

15 A. Correct.

16 Q. Often that crime would be a murder?

17 A. Yes.

18 Q. In these instances that you have investigated?

19 A. There have been times, yes.

20 Q. Okay. And you described one prior experience
21 where your investigation concluded that there had
22 been a murder, and arson, and then burned bodies
23 were moved in some fashion, again?

24 A. Correct.

25 Q. And re-burned?

1 A. Well, they were murdered, moved, burned, and then
2 the incinerated remains were buried partially.
3 And some were left at the original site and some
4 were buried.

5 Q. Okay. That was one case, in 25 years?

6 A. Correct. And involved five victims, but yes.

7 Q. And in that -- On that occasion, where the
8 incinerator remains were removed and buried,
9 okay, are you with me?

10 A. Mm-hmm.

11 Q. You found the majority of the incinerated remains
12 in the burial site?

13 A. Correct. They were the large pieces, because it
14 wasn't a very good incineration process.

15 Q. And smaller pieces were left behind at what you
16 suspected as the original burn site?

17 A. Correct.

18 Q. Less noticeable pieces, other than to a trained
19 arson investigator?

20 A. I would say that's a fair statement.

21 Q. That is, you have experience, unfortunately, I
22 guess, or perhaps fortunately as a law
23 enforcement matter, of having learned to
24 recognize charred human remains?

25 A. Yes.

1 Q. Remains that might not appear to be human at all
2 to my eyes, or to someone without your
3 experience?

4 A. That's correct.

5 Q. That is, for example, charred muscle tissue looks
6 not much at all like muscle when it's been burned
7 and dried and what you could call desiccated?

8 A. Probably, yes.

9 Q. All right. So your eye picks up smaller remains
10 that an untrained eye may not perceive as human
11 remains at all?

12 A. That's possible, yes.

13 Q. You don't, though, hold yourself out as someone
14 with expertise in cremation, I take it?

15 A. I guess it depends on your definition of an
16 expert. I do have education, somewhat, in
17 cremations. I have gone and observed them and
18 did some studies on because of my position in the
19 arson bureau.

20 Q. And when you say cremations, we're talking about
21 a human body?

22 A. Correct, in a commercial application.

23 Incineration is what I consider to be something
24 that's done in the field.

25 Q. Okay. And so you had some training in commercial

1 cremation. You have obviously had job experience
2 in what you were describing as incineration.

3 A. Yes. And education there. So I had education
4 and experience in both.

5 Q. You know that in a commercial cremation, the
6 cremation will be accomplished in an enclosed
7 container or burn chamber?

8 A. Within our culture, yes. There's other cultures
9 that don't do it that way. But within North
10 America, that's typical.

11 Q. Sure. And that's a fair qualification, but let's
12 use North America as the cultural setting here,
13 not India, for example?

14 A. Correct.

15 Q. Typically here, a commercial cremation would
16 happen in an enclosed combustion chamber?

17 A. In a retort, it's called.

18 Q. Yes. And by retort, you mean a closed chamber?

19 A. Correct.

20 Q. All right. That allows for more intense heating
21 in the sense that the heat is captured by the
22 retort, or the enclosed chamber?

23 A. Well, the heat levels were probably the same. It
24 allows for better efficiency of the use of the
25 heat.

1 Q. And a cremation chamber typically would be fed by
2 accelerant, in some fashion.

3 A. Natural gas is the most common fuel product.

4 Q. With lines going into the chamber, correct?

5 A. Depends on the manufacturer of the retort. But
6 there are several avenues that the gas is
7 introduced into there.

8 Q. And then for combustion, you also need air to be
9 introduced into the chamber?

10 A. That's correct.

11 Q. Much, in this very general sense, a little bit
12 like the aluminum smelter you described for us
13 here this morning?

14 A. And adding air to it or what?

15 Q. Yes, I think you pointed out two pipes in one of
16 the photographs of the aluminum smelter that you
17 described as being attached to blower motors?

18 A. Correct.

19 Q. That was to introduce air into the -- the -- what
20 you call the melting pot of the aluminum smelter?

21 A. That's what it looked like they were used for.

22 Q. And then you also saw that there were LP gas or
23 liquid propane gas feeds into the smelter?

24 A. Yes.

25 Q. With the LP gas tank, 500 gallon, thousand

1 gallon, whatever it was, outside?

2 A. Correct.

3 Q. And so, you know, in that sense, the aluminum
4 smelter also was enclosed -- an enclosed
5 combustion area, when used?

6 A. Just partially enclosed, I think the top was open
7 because that's how I could take the photograph.

8 Q. Right. But it wasn't burning when you took the
9 photographs?

10 A. That's correct.

11 Q. And you would expect, in operation, one would
12 close the top?

13 A. Well, it appears it could have been left open at
14 times because there was some scorching to the
15 area a little bit, but it certainly could have
16 been covered at times.

17 Q. Okay. I mean, at least the manufactured design
18 would allow the top to be closed during
19 combustion?

20 A. It looked like it. I didn't operate the furnace
21 so I don't know if there was any switches to
22 prevent or whatever, but it had a cover that
23 could be used. At what point, I don't know.

24 Q. Okay. Fair enough. And do you have a sense of
25 the commercially common or standard temperature

1 at which, again, a commercial cremation is
2 conducted in North American culture?

3 A. Yes, most retorts are going to operate 16 to
4 1800 degrees. The temperature is going to vary
5 because at some points there's fluctuations,
6 depending on the fuel and when the body ignites
7 and becomes part of the of the fuel mass and then
8 there's a cool down process, but it's a general
9 operating range at times.

10 Q. Very good. 16 to 1800 Fahrenheit?

11 A. Correct. I'm sorry.

12 Q. Now, the -- let's -- I'm going to take you now and
13 talk for a little bit about the burn area behind
14 Steven Avery's garage.

15 A. Okay. The burn pit?

16 Q. Well, I'm going to talk about the larger area,
17 because I think you -- you distinguished,
18 somewhat, the area that was a pit or an
19 indentation --

20 A. Correct.

21 Q. -- from the overall area?

22 A. Yes.

23 Q. Your -- Your first call on this case came on
24 November 9?

25 A. Correct.

1 Q. A Wednesday, I think?

2 A. Yes.

3 Q. One of the things you were told that you were
4 being called because some suspected burnt bone
5 fragments had been found the day before?

6 A. I believe so, yes.

7 Q. And there had been some work at that burn area
8 including the indentation, you were told, the day
9 before, on November 8?

10 A. Correct.

11 Q. But, now, your expertise was being sought as an
12 arson investigator?

13 A. As a scene investigator, yes. And I believe also
14 because of the -- some expertise in looking for
15 bone fragmentation.

16 Q. Very well. You actually began that process on
17 November 10?

18 A. Correct.

19 Q. About, you know, give or take, two days after you
20 understood bone fragments first had been
21 discovered in the area?

22 A. That's right.

23 Q. You did not have an opportunity to photograph the
24 overall burn area, if you will, behind Steven
25 Avery's garage, before initial recovery efforts

1 had been made?

2 A. That's correct, I did not.

3 Q. You had an opportunity to photograph it after and
4 before you began any work, correct?

5 A. That's correct.

6 Q. All right. And you set up something of a
7 contamination path --

8 A. Yes.

9 Q. -- if you will?

10 A. That would be my typical procedure to do, just
11 out of habit.

12 Q. Habit in training?

13 A. That's just my habit. In fire investigation, we
14 emphasize a systematic process of evaluation.
15 And I try to continue that over into other things
16 I might be called upon. And that's just part of
17 my personal systematic process.

18 Q. And what the path does for you, in addition, you
19 know, to being routine and systematic, is it
20 allows you to keep to a minimum the amount of
21 earth you are tramping on?

22 A. Correct.

23 Q. So you are reducing, at least, the risk that you
24 will be stepping on, breaking, disturbing,
25 destroying, things that may turn out to be of

1 interest later?

2 A. Correct.

3 Q. And then you -- then you sort of worked from the
4 outside in?

5 A. Correct.

6 Q. You -- You -- And here I'm going to use a royal
7 view, in the sense that I think is it Rindt and
8 Sielehr who are with you on the 10th?

9 A. Yes, sir.

10 Q. At the burn area behind the garage?

11 A. Yes, sir.

12 Q. All right. So the three of you start well
13 outside this indentation area?

14 A. Correct.

15 Q. And examine the area, I would say, east of the
16 indentation, but on the overall, was a sandy sort
17 of mound you described?

18 A. Yeah, if you think of it in the -- as in the
19 sense of a plateau, we examined all of the sand
20 area, except for the pit, in one process, or the
21 indentation where the combustion was -- had taken
22 place.

23 Q. Okay. You don't have to buy into this and you
24 can tell it's February and what I have on my
25 mind, but in some ways, this area looked like a

1 large pitcher's mound with an indentation or a
2 notch in it?

3 A. A large pitcher's mound in it.

4 Q. Right, yes. A very large pitcher's mound, but,
5 roundish in general shape?

6 A. I actually had the impression that it might have
7 been a future building site, like it was a pad
8 that you might eventually put up a building or
9 garage on. But that's just the impression I had
10 from looking at it.

11 Q. Sure, but -- And it was roundish, in general?

12 A. Yeah.

13 Q. And -- And raised in elevation, other than the
14 indentation that you have described?

15 A. That's correct.

16 Q. So you -- you -- you examined the east sort of
17 area of that burn area, we'll call it that?

18 A. You are going to have to forgive me, I don't know
19 the compass direction as well. I think as far as
20 geographical items, I think we started by the dog
21 house --

22 Q. Okay.

23 A. -- and worked our way towards this depression of
24 the burn pit.

25 ATTORNEY STRANG: You know, it may be

1 helpful, we have all seen this quite a bit, but it
2 may be helpful just to pop up an overhead. That's
3 great, that will work just fine.

4 Q. (By Attorney Strang)~ This is a computer
5 generated --

6 A. Sure, I recognize it.

7 Q. -- schematic, okay. Now, counsel -- counsel can
8 object if he thinks I'm wrong, but I think we
9 have established that north is up --

10 A. North is up, okay.

11 Q. -- on Exhibit 109, which is now up on the screen
12 for you.

13 A. All right.

14 Q. Okay. So if you will accept that?

15 A. I trust you for that, sir.

16 Q. Okay. This is a pretty good schematic of the
17 area you have described.

18 A. Yes.

19 Q. All right. The dog house, then, would be
20 generally to the north at about an
21 11:00 position, if we used the round area?

22 A. Correct.

23 Q. And that's -- that's where you started?

24 A. Correct, we started up -- if you use your
25 terminology, the 11:00 position, worked our way

1 in to where we could get centered and then the
2 three of us advanced, we would say directly
3 south, towards the burn pit, and parallel. Each
4 of us spread out and covering an area and
5 overlapping.

6 Q. So, one of you west, one of you north and
7 central, and one of you east?

8 A. That would be correct.

9 Q. All right. And then just worked slowly to the
10 south?

11 A. Correct.

12 Q. All right. You found nothing of any interest in
13 this case in the dog house?

14 A. No.

15 Q. You did find some suspected bone fragments as you
16 worked, though, south along the west, the
17 central, and the eastern areas of that burn area?

18 A. Well, not really. And let me explain. When I
19 first did this initial walk in, I was standing
20 up. And throughout that area, there were -- I
21 could see in that elevated pit area, the
22 pitcher's mound area, as you described it, sir,
23 there were some small lengthy pieces of kind of a
24 chalk white material which looked very consistent
25 with bone fragmentation and it was scattered

1 throughout this upper portion.

2 However, as I started to get on my hands
3 and knees and pick it up in that layer process, I
4 actually realized that it was burned insulation
5 from some jumper cables that were entwined in the
6 dog's leash. And this burned insulation, with
7 the dog having moved around, it had fragmented
8 that burned insulation, which had a coloration
9 similar to bone, but on closer examination, we
10 could see it was synthetic material.

11 So we picked it up saying that just in
12 the event that we could miss one single bone
13 fragment somewhere in there, let's pick up every
14 thing so we have it and we'll let Dr. Eisenberg
15 sort it out. But in the reality of it, I don't
16 think we found any bone fragmentation in the
17 elevated area when it really came down to it.

18 Q. At least on the 10th?

19 A. Correct.

20 Q. When you were out there working?

21 A. Right, we didn't see anything up in that top
22 part.

23 Q. Now, have you worked with Dr. Leslie Eisenberg
24 before?

25 A. Yes.

1 Q. Did you call her on the 10th and say, we could
2 use you up here?

3 A. No, I spoke to her on -- I don't know if I spoke
4 to her on the 9th also. Either the 9th or 10th I
5 had several conversations with her.

6 Q. By telephone?

7 A. Correct, by cellphone.

8 Q. And you did not ask her to come to the scene?

9 A. No, I was describing the scene to her, indicated
10 that the area where the mass of the bones in the
11 burn pit had already been examined and excavated
12 and we opted not to do it at that point.

13 Q. The mass of the bones, were those excavated by
14 you?

15 A. No, this was in the first examination on the burn
16 pit, would be those items that I examined at the
17 sheriff's department on the 10th, in the morning,
18 that had been taken out in the first examination.

19 Q. Which -- Which is from this area, this is the
20 indentation area you described?

21 A. Yes, sir.

22 Q. So this was gone by the time you even got to the
23 scene?

24 A. That's right.

25 Q. What's this, if you know, intended to represent?

1 A. I assume that's that ball of wire.

2 Q. Is that about where you saw it?

3 A. Yes, I recall them being to the right, in that
4 area. There was a mass of wire, probably about,
5 you know, I'm just going to estimate, so big
6 around. Well, the size of a passenger car's
7 tire, but there was a mass of multiple tires
8 there entwined.

9 Q. It looked to you like more than one tire?

10 A. Oh, certainly.

11 Q. Okay. But all on the same area?

12 A. Well, no there were fragments of wires in the
13 burn pit also. So, there were broken pieces of
14 steel belted radials in the burn pit. And this
15 was the one accumulation in entirety there.

16 Q. All right. By the burn pit, the gray area?

17 A. Gray or black it looked like to me.

18 Q. Okay.

19 A. But in the burn pit there was short lengths of
20 fragmented wire. When you burn these tires, the
21 rapid oxidation of fire also compromises the
22 steel. And in some cases they can be, with
23 mechanical force, broken. And you find pieces of
24 the steel belts in the pit.

25 Q. Fair enough. And those -- those -- those broken

1 pieces in the pit, though, were by far the
2 smaller quantity?

3 A. Yes, the mass was that ball.

4 Q. Right. And that mass, if from more than one
5 tire, at least was all intermingled?

6 A. Correct. That's what it appeared to be.

7 Q. These are, you presume steel, since they come
8 from steel belted radials?

9 A. Yes.

10 Q. They had a highly oxidized appearance, though, to
11 your eye?

12 A. Correct, which is consistent when they burn.

13 Q. Yes, and by oxidized, I mean rusty.

14 A. Correct. Fire is a process of rapid oxidation,
15 so frequently we see iron or steel that's been
16 exposed to fire, rusting quickly.

17 Q. Yes, and that's where I was going. Fire actually
18 increases the rate of oxidation?

19 A. By its definition it is, yes.

20 Q. Because it's -- fire goes because of oxygen.

21 A. Fire is a rapid self-sustaining oxidation
22 accompanied by the evolution of heat and light in
23 varying intensity.

24 Q. So, in very common parlance, you will get more
25 rapid rusting when iron or steel are submitted to

1 or subjected to fire?

2 A. Many times, yes.

3 Q. To your eye, this mass of rusty, steel wires from
4 the tires, appeared to have bone fragment
5 intermingled with them?

6 A. Correct.

7 Q. You could draw to conclusion from that about how
8 the bone fragments came to be intermingled in the
9 wires?

10 A. That's correct. They were entwined in there to
11 the point where I actually had to physically, so
12 to speak, separate and try to recover. They
13 weren't right on the surface easily removed. But
14 they were into the depth of the wire at times.

15 Q. And you can think of possibilities of how that
16 might have happened, one would be that a body had
17 been atop a -- an intact tire at the time that
18 both were burned?

19 A. That's one possibility.

20 Q. That's one possibility. Another possibility
21 would be that the tires already had been burned
22 at some earlier time and a body was atop that
23 layer? That's the second possibility?

24 A. That's a possibility.

25 Q. A third possibility would be that bone fragments,

1 after the body was burned, not on top of the
2 wires, bone fragments could have been moved into
3 the wires or tossed into the wires, somehow
4 disturbed, so that they were introduced into the
5 wire mesh you have described?

6 A. That's a possibility, yes.

7 Q. And we probably could go on, but the reality is,
8 you can't narrow down to any one of the
9 possibilities we could identify?

10 A. That's correct.

11 Q. Neither could you assign a time frame within
12 which the rusty steel wires that you saw were
13 burned?

14 A. That's correct.

15 Q. You could not assign a time frame within which
16 the bone fragments, or suspected bone fragments
17 you saw, were burned?

18 A. Correct.

19 Q. This area was cool, wet, even cold, when you
20 examined it on November 10th?

21 A. Yes, sir.

22 Q. And just -- just to be clear, the burn pit, or
23 the gray or black area itself, had been excavated
24 before you got to it?

25 A. Correct.

1 Q. By others?

2 A. Yeah, best said, the loose ash was removed from
3 that area.

4 Q. And so you -- you and Rindt and Sielehr, I don't
5 mean disrespect, but it's Special Agents, all of
6 you, found nothing you thought was human in the
7 brown or sandy area here?

8 A. That would be correct, sir.

9 Q. Likewise, you found nothing you thought was human
10 in the grass around the perimeter that you
11 described asking deputies to comb in a grid
12 fashion?

13 A. Correct.

14 Q. Now, by grid fashion, you don't mean that you
15 actually laid out a string grid?

16 A. No, their search pattern was to go shoulder to
17 shoulder and walk north south and then they
18 walked east west over the same area, after they
19 completed it, so that they are crossing it twice.
20 And we call that a grid search pattern.

21 Q. And did they place any of those little flags?

22 A. Yes.

23 Q. They did? Did you examine those things, then,
24 with Deputy Riemer?

25 A. Some of them, I believe we did. Most of it

1 really was not related debris.

2 Q. Right.

3 A. But we asked them and said, if it wasn't a blade
4 of grass, mark it, we'll search -- sort it out.

5 Q. Decided none of it was of evidentiary value?

6 A. I think Deputy Riemer would have to say what he
7 took or didn't. But there might have been a few
8 pieces that we took just to make sure.

9 Q. Okay. But there, again, the grass area,
10 especially south of the burn area as I'm calling
11 it, that also had been examined and things had
12 been recovered, it was your understanding, on
13 November 8 or 9?

14 A. November 8, I believe it was, yes.

15 Q. You described, later in December, I'm going to
16 relate this to the burn area, going through
17 debris from that burn area, I think it was in the
18 Crime Laboratory, you said?

19 A. Correct.

20 Q. Is that right, in December of 2005?

21 A. Yes, sir.

22 Q. Did you go through debris in the Crime Laboratory
23 in December, 2005, from areas other than this
24 area behind the garage?

25 A. Yes.

1 Q. That included one of the burn barrels from behind
2 the Janda property?

3 A. I believe -- Yeah, I believe we did some
4 examination of burn barrels. At that time I
5 don't know where the barrels are, I just know
6 that it's barrel, shall we say, Barrel A, or B,
7 or whatever, but --

8 Q. Right.

9 A. -- we examined multiple things over the course of
10 several days.

11 Q. Do you remember whether you went through debris
12 from what we've called here the quarry pile? And
13 if that doesn't make any sense to you, because
14 you weren't here --

15 A. You're right, that doesn't make any sense to me.

16 Q. Okay. We have identified a -- or had identified
17 for us a site that was, oh, I don't know,
18 somewhere southwest of the Avery property
19 altogether, in or near the Radandt property to
20 the south?

21 A. Okay.

22 Q. Is that a site you went to?

23 A. At one time on Thursday, maybe on Friday, I went
24 to multiple sites, not to examine them, but to
25 check on the welfare of my fellow agents who were

1 doing those sites. So I didn't participate in
2 those areas, but it's possible I may have stopped
3 and asked if they needed some water, or
4 assistance, or special tools to complete their
5 job.

6 Q. All right. I'm just going to -- I'm going to pop
7 up here the -- an Exhibit 402 and see if --
8 this -- now this is just a schematic diagram.

9 A. Okay.

10 Q. All right. But, again, north is still up in
11 this, to get you oriented.

12 A. I believe you.

13 Q. And you see the little -- there's a little box
14 there that shows the Avery residence and the
15 garage area?

16 A. Okay.

17 Q. Okay. So the little red utility flag symbol, as
18 you described earlier, that's the -- what's been
19 described here as the quarry pile site. Do you
20 recall now whether you got down there?

21 A. I couldn't tell you. It's entirely possible I
22 may have stopped to just check on my agents, but
23 I can tell you that I did not search that area.
24 If that's -- I looked at one site Saturday
25 morning, briefly, but I don't believe that's the

1 same site that's being depicted here.

2 Q. And you never searched here?

3 A. Not to my knowledge, no.

4 Q. Neither do you know whether you looked in the
5 Crime Lab garage at debris from that site?

6 A. We looked at a lot of debris at the Crime Lab.
7 Some of the debris had rocks in it. Whether
8 that's specifically that one, I don't know. At
9 that time we're just saying this is Item A, Item
10 B, and we're searching it. Nobody had said this
11 is the quarry site, as you described it now. So
12 I can't tell you if I searched that or not.

13 Q. Sure. What you can say is that in going through
14 this debris very carefully on the tarp, one of
15 the things you were looking for were rivets.

16 A. Well, any artifacts of clothing, and rivets would
17 be part of that.

18 Q. Fair enough. Did you personally find any rivets?

19 A. I think there were two found and I think Kevin
20 Heimerl found one. I thought I found one, or
21 Kevin and I were next to each other and we saw
22 one. So, yes.

23 Q. Whether you found it directly or not, you got an
24 eyeball on at least a couple of rivets, if I
25 understand?

1 A. Sure, because I remember we cleaned them off and
2 got a magnifying glass to try to read it.

3 Q. All right. These were brass.

4 A. They were brass colored.

5 Q. Brass colored, okay. You have no idea what the
6 actual metal was?

7 A. No, a lot of times that's just a wash surface on
8 there and not -- the surface color is not typical
9 of it's parent metal.

10 Q. Sure. Okay. But whether a magnet was helpful or
11 not, you don't know, but in any event that was
12 the process --

13 A. Well, I had used magnets on there. When we did
14 that examination, I have a real large, foot long
15 oval shaped magnet that we passed over that area
16 first to remove sometimes those broken wires from
17 the steel belted radials --

18 Q. Sure.

19 A. -- and other things. The rivets weren't found in
20 that process, they were actually found visually,
21 so I don't believe it was a ferrous metal.

22 Q. Right. If these things -- if these things
23 weren't ferrous iron or steel, they aren't going
24 to attach to the magnet?

25 A. That would be correct.

1 Q. But you looked very carefully through the debris
2 and were able to find two or three rivets that
3 you were aware?

4 A. Yeah, I thought it was two, but.

5 Q. Okay. You also were looking for the larger
6 button that there might be as a waistband closure
7 on a pair of pants?

8 A. Well, we were going to look for any type of
9 artifacts that we could find.

10 Q. From clothing, period?

11 A. Clothing or human remains.

12 Q. You found no larger, brass colored button from,
13 you know, a blue jean closure at the waistband?

14 A. Not that I recall.

15 Q. Is that something you think you would recall?

16 A. Well, if I found it, I would have, yeah.

17 THE COURT: Mr. Strang, can you tell me how
18 long you think you might need yet?

19 ATTORNEY STRANG: I have a ways to go and
20 this would be a fine time to break.

21 THE COURT: All right. Let's take our
22 morning break at this time. Members of the jury, do
23 not discuss the case or this morning's testimony
24 during the break and we'll resume when the break is
25 over.

(Jury not present.)

THE COURT: You may be seated. Counsel,
see you in 15 minutes.

ATTORNEY STRANG: All right. Thank you.

(Recess taken.)

THE COURT: Mr. Strang, you may resume.

ATTORNEY STRANG: Thank you.

CROSS-EXAMINATION CONTD.

Q. We were in the basement of the Crime Lab
somewhere, when we left off, maybe it wasn't the
basement, but it was the Crime Lab?

A. All right.

Q. You were going through materials in different
places on tarps. And if one of those was -- one
of those items or areas that you were examining
on the tarps was from a burn barrel behind the
Janda house, you wouldn't know that other than by
the property tag number or whatever it was that
identified that -- that debris?

A. Correct.

Q. You had no opportunity to see the burn barrels
behind the Janda house before they were
disturbed?

A. Correct.

Q. But you did testify on direct examination that

1 there -- you saw suspected bone fragments from a
2 burn barrel behind the Janda house, later?

3 A. I believe my testimony was, is that if you are
4 referring to the examination of Saturday the
5 12th, that we examined some barrels, whether that
6 barrel was from behind the Janda house or not,
7 but one of the barrels we looked at, there was
8 some bone material in it.

9 Q. You looked at a total of four barrels or was it
10 more?

11 A. Four sounds correct.

12 Q. What you are sure of is that only one of them had
13 bone material in it?

14 A. Yes.

15 Q. That bone material -- And it's Saturday,
16 November 12, and we're in the Calumet County
17 Sheriff's Office now, correct?

18 A. Yes.

19 Q. Examining material there?

20 A. Mm-hmm, yes.

21 Q. So the barrels have been transported, somehow, to
22 the Calumet County Sheriff's Office, obviously?

23 A. Correct.

24 Q. There has been a sifting process?

25 A. By myself, or previous, or?

1 Q. If you know?

2 A. I don't know what happened to them. All I can
3 tell you is that when I got there the barrels
4 were there, we removed the contents and went
5 through them.

6 Q. Did you actually remove the contents from the
7 barrel?

8 A. Yes.

9 Q. Okay. Did you sift at that point?

10 A. Much of that debris was too big to sift. Our
11 screens are quarter inch in size so.

12 Q. Okay.

13 A. In -- I don't think any of it could have been
14 sifted, the debris was so massive.

15 Q. Would it have been on tarps on the floor?

16 A. Correct. We would lay a clean tarp down and then
17 go through it. And then I think we would wrap
18 all the material up from the barrel in that clean
19 tarp and then place that into the barrel as a way
20 of making sure that we were recovering everything
21 we looked at.

22 Q. Okay. In spreading the material from the barrel
23 onto the tarps, you did this with caution?

24 A. Yes.

25 Q. I mean, you know, to avoid further breakage of

1 whatever might be in there?

2 A. Yes, some of the stuff, you know, at least
3 initially, I believe the tarp -- the barrel was
4 upright and we were just hand removing it, so to
5 speak.

6 Q. Okay. Again --

7 A. Yes, yeah.

8 Q. Again, for good cautious handling?

9 A. Correct.

10 Q. Spread it out on the tarps, carefully?

11 A. Yes.

12 Q. And the things that you identified as possible
13 bone fragment from one of the barrels, you
14 thought, in general, looked larger than, in
15 general, the suspected bone fragments from the
16 burn pit behind the garage had looked?

17 A. Correct.

18 Q. Now, obviously there's some variation in size in
19 both -- in bone fragments from both places?

20 A. Correct.

21 Q. And these aren't uniformly sized pieces by any
22 means?

23 A. No, you're correct on that.

24 Q. But taking it on the whole, it looked to you like
25 most of the fragments from the barrel were a bit

1 larger than most of the fragments from the burn
2 area?

3 A. Well, from the barrel, as you are describing it,
4 there were only a few bones recovered. I don't
5 know the exact number. It might have been four,
6 or three, something like that. It was certainly
7 single digit numbers. From the burn pit, there
8 were, you know, tens of hundreds found of small
9 fragmentation, and probably by the end, in the
10 high hundreds of small fragments.

11 Q. Well, and we have had Dr. Eisenberg, so we have
12 got, you know, a better sense of what she
13 eventually identified as human as opposed to
14 nonhuman bone. So I don't need to try to get
15 numbers out of you.

16 A. Okay.

17 Q. Okay. But in general, little bit bigger bone
18 fragments from the barrel than from the burn
19 area?

20 A. Yeah, they were noticeably larger.

21 Q. Burned in both cases?

22 A. I believe, yeah, they looked like they had some
23 thermal exposure.

24 Q. You have had experience, obviously, as an arson
25 investigator, with burnt human bone?

1 A. Yes.

2 Q. From sort of light burning on through complete
3 incineration?

4 A. Yes.

5 Q. You know that as burn -- as bone, human bone,
6 becomes progressively more burned or charred, it
7 becomes fragile?

8 A. Yes, and it shrinks and you get some spiral
9 fracturing of it as you go.

10 Q. Right. It shrinks because you are losing
11 moisture?

12 A. Right. The fire dehydrates the body process as
13 part of that incineration.

14 Q. Exactly. And so you will get some spiral
15 fracturing of the bone, all on its own?

16 A. Correct. And some shrinkage of the bone.

17 Q. Which again causes breakage?

18 A. Yes.

19 Q. But beyond that, once the fire is out, you know
20 that those pieces are fragile once burned or
21 calcined?

22 A. Right.

23 Q. Part of the reason for the care with the
24 contamination paths, and getting down on hands
25 and knees, and the grid system of recovery?

1 A. That would be one of the reasons for doing it in
2 that manner, yes.

3 Q. The bones, in general, which you saw in the burn
4 area, looked like they had been subjected to
5 additional breakage, to which the bones in the
6 burn barrel had not?

7 A. There were smaller fragmentations so, yes.

8 Q. The work that you did in the burn area,
9 ultimately -- not ultimately -- but later, after
10 you had gone through for all items of possible
11 evidence you could see, it included actually
12 removing that pitcher's mound, so to speak?

13 A. Yeah, other agents did that. But, yes, that soil
14 area was examined.

15 Q. Examined in the sense of a backhoe was brought in
16 or a skidster or something?

17 A. I didn't participate in that, but, yeah there was
18 a -- a skidster or bobcat type excavator that was
19 used.

20 Q. Okay. Sort of this stuff was dug out, gathered
21 somewhere for further examination?

22 A. Correct. Where we had removed all of the foreign
23 debris from the area, then that area was exhumed
24 to see if there was anything intermed (sic) in
25 the soil.

1 Q. Did -- Did you later have a chance to participate
2 in the examination of all of that soil?

3 A. I didn't, other agents did.

4 Q. All right. You don't know what, if anything, was
5 found in that?

6 A. I wasn't there. I was examining these other
7 areas on Friday. A couple times I did come back
8 to that area to talk to them to see if they
9 needed additional resources. But I wasn't an
10 active participant in that.

11 Q. All right. And so this area you described as
12 really looking like a possible future
13 construction site, you know, something like a pad
14 that a building might have contemplated, that
15 area just gets swept clean, essentially.

16 A. Yes, it was exhumed and examined and then
17 deposited elsewhere.

18 Q. You were asked, and I don't remember, I think it
19 was the 11th of November, which would have been a
20 Friday, you were asked by Special Agent
21 Fassbender to look at some other sites on the
22 general Avery salvage property?

23 A. Correct.

24 Q. One of them was where debris had been dumped
25 down, sort of off the south edge of the yard,

1 behind Steven Avery's house, into what has also
2 been called the pit here where the cars were
3 stored?

4 A. Correct. As I showed you in the one exhibit,
5 that area, yes.

6 Q. That just turned out to be junk of no interest?

7 A. Correct.

8 Q. Another area was the wood furnace?

9 A. Correct.

10 Q. Now, does the 11th sound -- am I recalling your
11 testimony right, that this was the 11th.

12 A. Yes, the Friday the 11th.

13 Q. All right. So about 11 days, 12 days, after you
14 understand that Ms Halbach had been to the Avery
15 property to take photographs of a van.

16 A. Correct.

17 Q. At that time you found the wood furnace cold to
18 the touch?

19 A. Yes, it was.

20 Q. All right. This was obviously the first third of
21 November?

22 A. Correct.

23 Q. It had been sleeting and raining and doing all
24 kinds of things at various times during the 11 or
25 12 days?

1 A. That's what I understand. It didn't do that
2 while I was there, but it was cold a couple times
3 while I was there.

4 Q. It wouldn't surprise you that a furnace would be
5 cold to the touch if it hadn't been used in a
6 day, or two, or whatever?

7 A. You know, I guess the one thing with that unit,
8 it holds multiple gallons of water. And I would
9 think that that water would retain heat well
10 after the fire was out, for a period of time. At
11 that time, I don't know, but I think if it had
12 been used in the recent past it still might have
13 had some temperature in it because of the size of
14 that boiler and the amount of water it would have
15 contained.

16 Q. In the water?

17 A. Correct, in the water chamber, that's the
18 principle it works on.

19 Q. And the water chamber is where?

20 A. It surrounds the combustion chamber.

21 Q. Okay. And that your understanding was, it was
22 used to heat some of the commercial buildings for
23 the business?

24 A. I think so. It has underground lines, so I
25 didn't follow to what they went to, but.

1 Q. But whether the heat was on in the pole barns, or
2 whatever buildings it was intended to heat?

3 A. That I don't know.

4 Q. The smelter also was cold to the touch?

5 A. Correct.

6 Q. Or, you know, ambient temperature, so to speak?

7 A. Yeah, it didn't seem to have an unusual
8 temperature.

9 Q. Right. By ambient temperature, I mean, just to
10 the touch it was consistent with what the air
11 was?

12 A. It seemed so, I didn't take its temperature, but.

13 Q. I understand, I understand you didn't take its
14 temperature, but about how -- Let's back up just
15 a minute. You simply forgot to make a report
16 about the smelter, didn't you?

17 A. Correct, I should have added a couple sentences
18 to one report or made a special report. We made
19 a photo log and took the photos, but it was a
20 mistake on my part.

21 Q. And I'm not here to beat you up about that.

22 A. Thank you.

23 Q. In fact, I'm trying to throw you a line a little
24 bit, in the sense that I'm going to --
25 necessarily you are going to have to go off your

1 memory --

2 A. Okay.

3 Q. -- on the smelter here, other than the

4 photographs --

5 A. All right.

6 Q. -- which are similar if you want to take a look

7 at them. Okay. Actually, maybe we will. this

8 area in the -- this one will do as well as

9 anything. Which one is that?

10 A. This is Exhibit No. 490.

11 Q. Okay.

12 A. This exhibit is one of those that I took looking

13 down into the melting pot, if you will.

14 Q. Yeah, that was --

15 A. The smelter.

16 Q. By the melting pot, we could call it the chamber?

17 A. Sure.

18 Q. We could call it the combustion area?

19 A. Sure. It's where the metal and the heat come

20 together to form a liquid.

21 Q. Right. Exactly, where it's intended to melt

22 aluminum, right?

23 A. Appears to be so.

24 Q. So it appeared. And you saw transmissions and

25 parts like that stacked up outside the smelter

1 building?

2 A. Correct.

3 Q. Transmissions are aluminum?

4 A. I believe that they are.

5 Q. They looked aluminum to you, in any event. And
6 this -- this chamber, you stood on top and took a
7 photograph down into it?

8 A. That's correct.

9 Q. Correct? About how high up was that -- was the
10 edge on which you were standing?

11 A. You know, I'm not real sure. It was -- It took
12 me something to climb up onto it and that's why I
13 asked Mike Rindt, the special agent with me, to
14 hand me the camera, so I'm going to estimate it
15 was 4 and a half to 5 feet.

16 Q. Let's go at it this way, from your observation in
17 the smelter, did that -- did the open top that
18 you are looking down into, did that appear to be
19 the way at which one would, you know, toss in the
20 things you wanted to melt?

21 A. Yes, it looks like the product would be
22 introduced through the top area.

23 Q. So, however high it was, it was not so high that
24 someone couldn't, you know, sort of throw the
25 transmission in, or whatever aluminum?

1 A. I don't know how they use it, but it looks like
2 things could be loaded into the top, yes.

3 Q. All right. And then they melt and they run out,
4 channeled, the molten aluminum runs out channels
5 into ingot molds?

6 A. Correct.

7 Q. When the ingot's cool and then you can recycle
8 and sell it to an aluminum recycler?

9 A. I assume so, yes.

10 Q. Yeah. All right. And that chamber itself, on
11 the melting pot as you called it, in Exhibit 490,
12 give me a sense of the dimensions of that?

13 A. I'm not really sure. The opening on the top is
14 smaller than the actual melting chamber.

15 Q. Okay.

16 A. As we noted from the photographs. I would hate
17 to be inaccurate here, because I'm just going
18 from memory from almost two years ago or a year
19 and a half ago, 24 by 24, somewhere in that
20 neighborhood. And that's, you know, shall we use
21 the term, guesstimate?

22 Q. Yeah. Sure. And that's why I threw you the
23 lifeline, you didn't write a report, you are
24 going by memory. But a guesstimate would be
25 2 feet by 2 feet, something like that?

1 A. Yeah, I would say in that general neighborhood.
2 Could be 20 inches, it could be 26 inches, but.

3 Q. Fair enough. I mean, we're in the ballpark?

4 A. Yeah.

5 Q. Okay. And, roughly, again, a cubicle in shape?

6 A. Yes.

7 Q. Or cubic, whatever the word is?

8 A. Square, square opening on top.

9 Q. Although the chamber itself was larger than the
10 opening, per se?

11 A. Yes, there was some extension off to the sides
12 that I had tipped to look into.

13 Q. All right. So if in fact this thing was, you
14 know, useful for melting an automobile
15 transmission, whether it's 24 inches, or 20
16 inches, or 26 inches, or whatever the heck it is,
17 it is large enough to get an automobile
18 transmission into, to your eye?

19 A. Or at least a portion of it and then it would
20 melt into that area.

21 Q. You never climbed down into the melting pot?

22 A. I stuck my head down in there and reached around,
23 but I did not physically step into it.

24 Q. That sort of answers, I think, the question, but
25 I will nail it down. So there was no close

1 examination of the debris, or the -- whatever,
2 the slag, or melted contents at the bottom of
3 that chamber?

4 A. No, I bent over and looked in there, because of
5 not being able to see, and used a flashlight and
6 actually examined it. So I got my head close to
7 it, so I could see the best and looked into that
8 area. And then I physically disrupted the bottom
9 of it with my hand so I was within arms reach --

10 Q. Okay.

11 A. -- in order to see if there was any debris that
12 was covered by this aluminum or slag that was on
13 top. Or there's some old rusted metal in there.

14 Q. Then you took nothing out of interest?

15 A. Correct.

16 Q. I'm going to look at my notes just for a moment
17 and see that I covered what I wanted to cover
18 with you. If you will bear with me.

19 A. Sure.

20 Q. The only thing I over looked was the car seat
21 back out at the burn barrel?

22 A. Yes.

23 Q. Okay. Your guess was that this may have been
24 from an SUV?

25 A. It didn't look like a car seat. It -- I thought

1 it was like a bolt in backseat of like an older
2 SUV, bus seat type thing. It was more tubular
3 steel and construction.

4 Q. All right. But you have no idea, really, in the
5 end, what car this would have come from or
6 vehicle this would have come from?

7 A. That's correct.

8 Q. How old the vehicle would have been?

9 A. I have no idea.

10 Q. You are just trying to give us an idea of the
11 appearance?

12 A. Correct.

13 Q. Okay. This thing was burned?

14 A. Yes.

15 Q. It was sitting outside of the actual indented
16 burn pit or indentation?

17 A. On the 11th, when I examined it, it was off to
18 the side.

19 Q. Up sort of on the elevated area?

20 A. Yeah, adjacent to the pit, to the right, as I was
21 facing the north.

22 Q. The areas adjacent to the pit, or the
23 indentation, did not look as if they had been
24 used to burn anything, did they?

25 A. No.

1 Q. This was gravel and sand showing no signs of ash
2 or other burning?

3 A. Correct.

4 Q. So you have no idea how the -- whether it was
5 agents who put the seat there or how that came to
6 be adjacent to the burn area?

7 A. That's correct. I can only tell you it was there
8 when I examined it.

9 Q. It, too, was rusty?

10 A. Yes, it was oxidized.

11 Q. But, again, that could have happened very quickly
12 in the fire?

13 A. Yes.

14 Q. Or it could have happened with the elements over
15 a longer period of time?

16 A. That I don't know, because a lot of times
17 those -- those items have a surface coating on
18 them that inhibits the rust --

19 Q. Okay.

20 A. -- by it's appearance. And I also recall that
21 there was a seat belt buckle found, that would
22 look like it would be consistent with a car seat.

23 Q. Mm-hmm. Sure.

24 A. That buckle had the nylon web burned off of it.
25 So I was under the distinct impression that that

1 car seat, or vehicle seat, had been burned.

2 Q. So am I. I mean it was missing all the padding?

3 A. Right.

4 Q. Right. I mean, it was just down to the metal?

5 A. Correct.

6 Q. But -- But, again, whether -- whether it was

7 burned and then left out in the elements and

8 that, you know, the process of being in the

9 elements after being burned account for all the

10 rust, or whether it was just rapid oxidation from

11 being burned, you are not in a position to tell

12 us?

13 A. That's correct. I mean, the fire makes it happen

14 quicker, but it actually rusts after the fire.

15 Q. Okay. Fair enough. See, we -- we don't -- we

16 don't have any idea when this seat was burned?

17 A. No, I just know that it was burned.

18 Q. Right. And we can say it probably wasn't burned

19 where -- where it sat when you saw it?

20 A. Correct.

21 Q. You didn't see any bone fragments, or anything of

22 interest, sort of intermingled into the

23 components of that seat?

24 A. That's correct.

25 Q. The springs or anything like that?

1 A. I did not.

2 Q. So what was of interest was that it was a car
3 seat?

4 A. Correct.

5 ATTORNEY STRANG: That's all I have.
6 Thanks.

7 THE COURT: Mr. Fallon, any redirect?

8 ATTORNEY FALLON: Just a couple questions.
9 Thank you.

10 **REDIRECT EXAMINATION**

11 BY ATTORNEY FALLON:

12 Q. Counsel asked you some questions regarding the
13 spool of left over radial -- steel belted radial
14 tire?

15 A. Yes.

16 Q. And is it possible, from the condition in which
17 you examined it, that one other scenario is that
18 it had been -- could have been raked out of a
19 fire?

20 A. Yes, that's another one of the possibilities of
21 how the bone and the mass of the wires got
22 together as they are, through attending of the
23 fire.

24 Q. And I wanted to have you elaborate a little
25 further on another point counsel raised, and that

1 is, eventually there was a bobcat that was used
2 to excavate the site entirely?

3 A. Correct.

4 Q. Specifically, so that we're clear, that did not
5 happen on November 10th; is that correct?

6 A. That's correct, it happened on the 11th.

7 Q. On the 11th. And prior to doing that, you
8 mentioned something about after all the items
9 were removed from the pit?

10 A. Correct.

11 Q. And what was the surface of the ground like, at
12 that point, after all of the loose debris and
13 everything was removed?

14 A. In the bottom of the burn pit?

15 Q. Yes.

16 A. In the bottom of the burn pit, it was a real --
17 it had an appearance, I guess you could call it
18 like blacktop, but it was very crusty and black
19 and thick mass that came off as if it had been
20 adhered to. It's consistent of what I have seen
21 in fires like that. And we broke that apart to
22 make sure, some of it was soil, some of it was
23 burnt remains of what appeared to be tire
24 products in there.

25 Q. All right. Well, that was my next question, that

1 crusted surface, like, is that consistent with
2 the residue left over from tires burning?

3 A. It's similar to what I have seen in that same
4 situation, yes.

5 Q. All right. And did you remove that layer of
6 soil?

7 A. Yes.

8 Q. All right. And I take it, it was only after
9 that, then, after all the other items of
10 evidentiary significance were removed, that an
11 excavation occurred, on Friday, the 11th?

12 A. That's correct.

13 Q. All right. Are fires -- excuse me -- Are tires
14 considered an accelerant?

15 A. I guess it would depend on the method that it's
16 used. It certainly can be used to accelerate, as
17 a good fuel, into a fire scene. So you hear of
18 people using it to set brush piles on fire, as
19 the initial igniter, because it burns with great
20 intensity for a given period of time. So,
21 depending on it's use, yes, I would say it's an
22 accelerant.

23 Q. It would be a solid accelerant rather than
24 liquid?

25 A. In it's original form and then it converts during

1 the fire process.

2 Q. Because it's primarily an oil based product?

3 A. Correct.

4 Q. All right. Now, in your investigation of the
5 materials, did you come across any evidence of
6 any other liquid accelerant?

7 A. There was a couple jugs that had like a black oil
8 in it, but what its role in it or not, I don't
9 know.

10 Q. You don't know if that played any part at all in
11 -- in -- in the fire itself?

12 A. That's correct.

13 Q. Okay. You mentioned something about tires, do
14 they give off a lot of energy when they burn?

15 A. Yes, they are a very good source of energy, heat
16 energy.

17 Q. Do you have any idea?

18 A. Well, the one pound of tire gives you roughly
19 15,000 BTUs of energy. The average passenger
20 tire, according to the tire manufacturers, think
21 it's about 20 pounds. So depending on the
22 orientation and a few other things, you are
23 looking at about 300,000 BTUs per tire.

24 Q. Do all tires have steel belt -- are they all
25 steel belted radials or are there different types

1 of tires that wouldn't have steel belts in them?

2 A. There are different tires. A lot of times
3 trailer tires, are smaller tires for utility
4 vehicles, won't have steel belts. There's also
5 bias ply tires which don't have a steel belt in
6 it. So we see the steel wires there as the
7 remains of steel belted tires, but in those other
8 types of belts -- or tires, when they are burned,
9 we basically just see the black ash, like we saw
10 in the bottom of this pit remains.

11 Q. Are they also considered like a possible solid
12 accelerant, even though they don't have any steel
13 in them?

14 A. Correct, they are a very good fuel.

15 ATTORNEY FALLON: That's all. Thank you.

16 THE COURT: Mr. Strang.

17 **RECROSS-EXAMINATION**

18 BY ATTORNEY STRANG:

19 Q. I think, probably, we can agree, counsel
20 misspoke, at least in the tires that you and I
21 are familiar with, they are not primarily oil or
22 petroleum based, but primarily rubber based,
23 aren't they.

24 A. Well, I think they are synthetic rubbers, I don't
25 recall the exact breakdown, there's multiple

1 compounds in there.

2 Q. Okay. You are not an expert here to tell us
3 about the composition of tires?

4 A. No, I have information data about it that I use
5 as a resource, but I'm not into tire
6 manufacturing.

7 Q. They can be used as an accelerant in a fire,
8 growing in the same way that I suppose crumpled
9 newspaper can be used?

10 A. Well, it can be, but I think a tire is better
11 because the tire, in its solid format, burns with
12 great intensity for a longer period of time than
13 crumpled newspaper.

14 Q. Sure.

15 A. So it's giving off a lot of energy in a
16 concentrated area over a given period of time,
17 much longer than paper, so I would consider it to
18 be a much better product for that purpose.

19 Q. Right. And so would I, you know, newspaper burns
20 pretty quickly. But the idea is when you say
21 accelerant here, this is something used to get a
22 fire going?

23 A. Or to enhance its combustion process.

24 Q. All right. And you -- you -- you have acquired
25 your knowledge about the BTUs generated by a tire

1 through your professional training?

2 A. Correct.

3 Q. You have, just in the same way, I guess, you have
4 acquired knowledge about other possible
5 components of other accelerants in a fire?

6 A. Correct.

7 Q. This isn't knowledge you came to the job, a
8 quarter century ago, with?

9 A. No, I don't think so.

10 ATTORNEY STRANG: That's all I have.

11 THE COURT: All right. The witness is
12 excused.

13 THE WITNESS: Thank you, your Honor.

14 THE COURT: Were there any exhibits that --
15 introduced that this witness -- that either party is
16 requesting admission of?

17 ATTORNEY FALLON: I think we moved into
18 evidence the photographs, without objection, as I
19 understand it.

20 THE COURT: They are all in already, very
21 well. The State may call it's next witness.

22 ATTORNEY FALLON: State would call Mike
23 Riddle.

24 THE CLERK: Please raise your right hand.

25 **MICHAEL RIDDLE**, called as a witness

1 herein, having been first duly sworn, was
2 examined and testified as follows:

3 THE CLERK: Please be seated. Please state
4 your name and spell your last name for the record.

5 THE WITNESS: Michael Riddle, R-i-d-d-l-e.

6 **DIRECT EXAMINATION**

7 BY ATTORNEY FALLON:

8 Q. What do you do for a living?

9 A. I work at the Wisconsin State Crime Lab in
10 Madison where I'm a latent fingerprint and
11 footwear examiner.

12 Q. And I'm sorry, I didn't hear the end of it?

13 A. Latent fingerprint and footwear examiner for the
14 Wisconsin State Crime Lab in Madison.

15 Q. And how long have you been employed at the
16 Wisconsin State Crime Laboratory?

17 A. About 14 and a half years.

18 Q. Do you have any prior experience in the field of
19 fingerprinting, palm print analysis, elsewhere?

20 A. Yes, I started in Mississippi in about 1988. I
21 started in fingerprints there and worked there
22 for several years and came up here in 1992.

23 Q. And what are your official duties; in other
24 words, in your current role as an examiner, what
25 is it that you do?

1 A. I receive evidence from agencies to be processed
2 for the presence of latent fingerprints. We
3 process the evidence and the prints are obtained.
4 We compare the prints to standard fingerprint
5 cards. If identifications are made, whether they
6 are made or not, we report on our findings and at
7 times are required to also testify in court as to
8 our findings.

9 Q. Have you received any specialized training to
10 assist you in performing these duties?

11 A. Yes, I have. When I first started in 1988, I
12 worked under a certified examiner for three
13 years, received almost 300 hours of training
14 through the FBI Academy in Quantico. And at the
15 end of a three year internship, I tested with the
16 International Association For Identification for
17 my certification, which I passed the test and
18 have been certified ever since.

19 Q. All right. Any estimate as to how many
20 fingerprints or palm prints you have been asked
21 to examine in your career as an examiner?

22 A. Literally hundreds of thousands.

23 Q. Now, you mentioned this -- an organization, tell
24 us about this organization that you mentioned.

25 A. The International Association For Identification

1 certifies people in many different disciplines.
2 One of them is including fingerprints, footwear,
3 crime scene. They are an organization that not
4 only certifies us, but has yearly conferences and
5 educational conferences. We attend different
6 meetings.

7 Q. You mentioned something about a certification,
8 tell us about that.

9 A. The certification process with the IAI is -- I
10 think it's twofold. If you have a college
11 degree, you have to internship for three years.
12 I believe that's the way it is. It may have
13 changed since I took it. But for me it was three
14 years.

15 With a high school diploma, I think you
16 can be certified with eight years under a
17 certified examiner, before you are even eligible
18 to take that test. You have to pass a test that
19 is, I think, three phase. There's the latent
20 print test. You have to show where you testified
21 in court successfully. You have to prepare a
22 court chart and have that approved by them. And
23 then there's also a written test on top of that.
24 You have to pass all these phases before you can
25 become certified.

1 Q. And how long have you held this certification?

2 A. Since 1991.

3 Q. What kind of equipment do you normally use as an
4 examiner?

5 A. Well, in processing through latent prints, we use
6 several types of methods. We use super glue
7 chambers, where we fume evidence and try to
8 develop --

9 (Court reporter couldn't hear.)

10 A. Yeah, super glue fuming chambers. And we'll
11 place the evidence in these chambers and fume
12 them to develop latent prints. And then take it
13 a step farther and add dye stains and look at
14 them under laser lights and try to look at the
15 real fingerprints that may not be visible even
16 with the super glue. Then we use magnetic powder
17 or regular powder, use different methods of
18 lifting them also.

19 Q. Is there a substance that's called ninhydrin?

20 A. Yes, there is.

21 Q. And what is that?

22 A. Ninhydrin is used on porous surfaces such as
23 cardboard and paper. It reacts with amino acids
24 in the fingerprints, turns purple, leaving a
25 pattern of ridge detail behind. We have to use

1 that on porous items because it doesn't work well
2 with powders or super glue.

3 Q. Now, have you had occasion to identify persons by
4 comparing latent fingerprints or palm prints with
5 their own ink fingerprints or palm prints?

6 A. Yes, I have.

7 Q. Any estimate as to approximately how often that's
8 occurred?

9 A. I probably make several identifications on a
10 weekly basis.

11 Q. All right. Now, have you had -- been called upon
12 to express opinions in courts of law regarding
13 your findings on identification or the lack of an
14 identification?

15 A. Yes, I have.

16 Q. And approximately how often have you been asked
17 to render such opinions in a court of law?

18 A. I don't know the exact number here in Wisconsin,
19 probably between 40 and 50 times. In
20 Mississippi, was probably closer to 150, 200
21 times.

22 Q. Now, you used the term, and I thought it might be
23 a good idea at this point to define some of these
24 terms, lets begin with, what is an inked print?

25 A. An inked print is when a thin layer of printer's

1 ink is rolled across the top of the surfaces of
2 the ridges of your fingers. And the fingers are
3 rolled out on a white receiving surface such as a
4 fingerprint card, leaving a lasting impression of
5 the fingerprint detail.

6 Q. Is an inked print, is that also sometimes
7 referred to as a standard?

8 A. Yes, it is. That's what they are.

9 Q. And what do we mean by that?

10 A. A standard print is where it's a known print.
11 It's a print that we know who it is. We have
12 inked the fingers. We rolled the fingers out.
13 And we have identified the person who these
14 fingerprints were taken. That would be the
15 standard.

16 Q. And what is a latent print?

17 A. Latent print is also known as a crime scene print
18 or a hidden or invisible print. These are
19 typically found at a crime scene by the use of
20 powder. They have to be brought out and
21 developed with powders or chemicals.

22 Q. And is there such a thing, I have heard expressed
23 a patent print?

24 A. Yes, there is.

25 Q. What is that?

1 A. A patent print is a visible print, a print that
2 you can see that is left in maybe blood, or
3 grease, or dirt. Doesn't have to be developed or
4 brought out.

5 Q. Are there different distinguishing
6 characteristics of a fingerprint or a palm print
7 that makes identification possible?

8 A. Yes, in the fingers, you usually start out with
9 different pattern types; loops, swirls, and
10 arches. But these don't fully distinguish
11 between people, because everybody has some of
12 these patterns in their hands. But we have
13 individual characteristics within the pattern
14 area, such as ending ridges, dots, islands. The
15 placement of those individual characteristics in
16 the pattern area, compared to the standard print,
17 is what makes them unique.

18 Q. Are fingerprints specific to each individual?

19 A. Yes, they are.

20 Q. In your experience, have you ever found two
21 people with identical fingerprints?

22 A. No, I have not.

23 Q. Just generally, what are the basic factors that
24 you would use in analysis of fingerprints, to
25 determine identification?

1 A. First thing I would look at is pattern type. If
2 I'm looking at a latent print, it's a loop, and a
3 standard, it's an arch, I can eliminate it
4 automatically. If the pattern type is the same,
5 then I look for the individual characteristics
6 within that pattern area. If I were to find an
7 ending ridge in a certain part of a latent print
8 in identification, I would expect to find that
9 same ending ridge following in the print
10 standard.

11 Q. Now, is it possible -- Well, let me first ask,
12 what kind of surfaces are you generally called
13 upon to examine and look for the presence of
14 latent fingerprints?

15 A. All kinds of surfaces. Some of them are good,
16 some of them aren't very good.

17 Q. All right. And in your experience, what are some
18 of the areas, or if I can use the phrase richest
19 area, and which one is likely to find a latent
20 print suitable for examination?

21 A. Hard, smooth surfaces are best. Rough surfaces
22 are more difficult. Some porous surfaces, such
23 as paper, is also very good. Some porous
24 surfaces such as styrofoam are very bad. It
25 depends upon the nature of the surface and the

1 condition of a person's skin as to how -- latent
2 prints and how good they are.

3 Q. And does the presence or absence of perspiration
4 from an individual, is that a factor that is
5 known to contribute whether or not a print is
6 actually left behind?

7 A. Yes, a person with normally dry hands is probably
8 less likely to leave latent prints than would be
9 somebody with oily skin or very sweaty hands.

10 Q. All right. And directing your attention to this
11 particular case, how did you first become
12 involved in this investigation?

13 A. Well, I came to work on November 7th, on a Monday
14 morning, and I was informed by my unit leader
15 that a vehicle had been brought in in relation to
16 this case and I was assigned to process the
17 vehicle for the presence of latent finger and/or
18 palm prints and also to inventory the contents of
19 the vehicle.

20 Q. And that vehicle was a Toyota RAV4?

21 A. That's correct.

22 Q. Let's begin with your inventory and proceed from
23 there. First of all, tell us, what is an
24 inventory?

25 A. Inventory is just a itemization of everything we

1 find within the vehicle. What I did in this case
2 is I started with the front seat passenger side
3 and I inventoried everything that was in there.
4 Front seat driver side, middle console. I put
5 the vehicle into quadrants and inventoried each
6 one individually.

7 Q. All right. During the course of your inventory,
8 did you find a compact flashcard?

9 A. Yes, I did.

10 Q. Cargo area?

11 A. Yes, I did.

12 Q. All right. I'm going to have Investigator
13 Fassbender show you an exhibit.

14 (Exhibit 496 marked for identification.)

15 SPECIAL AGENT FASSBENDER: 496.

16 ATTORNEY FALLON: Thank you.

17 Q. (By Attorney Fallon)~ Agent Fassbender is showing
18 you what has been marked for identification
19 purposes as Exhibit 496; do you recognize it?

20 A. Yes, I do.

21 Q. What is Exhibit 496?

22 A. It is a Verbatim compact flash memory card with
23 the name Teresa on it.

24 Q. All right. And from what location in the vehicle
25 was that flash card obtained?

1 A. It was in the rear of the vehicle, in the cargo
2 area, behind the left passenger seat in the rear.

3 Q. All right. I'm going to have my colleague show
4 Exhibit 300 on the screen. Do you see the
5 presence of this flash card, Exhibit 496; is that
6 present --

7 A. Yes, it is.

8 Q. -- in the picture depicted in Exhibit 300?

9 A. Yes, it is.

10 Q. I believe there is a laser pointer to your
11 immediate right there; do you think you could
12 point that out for us, please?

13 A. Be right there.

14 Q. All right. Thank you. During the course of your
15 inventorying of the vehicle here in question, did
16 you find a compact disk carrying case?

17 A. Yes, I did.

18 Q. And where was the compact disk carrying case
19 located?

20 A. I believe that was in the front passenger side
21 area.

22 Q. All right. I'm having counsel show you exhibit,
23 what appears to be 292; do you recognize that?

24 A. Yes, I do.

25 Q. And is that the compact disk carrying case that

1 you inventoried in this particular case?

2 A. Yes, it is.

3 Q. And is that the location in which you first
4 observed it when you began your inventory?

5 A. Yes, I did.

6 Q. And, finally, during the course of your inventory
7 of the contents of this vehicle, did you find an
8 Air National Guard lanyard?

9 A. Yes, I did.

10 Q. All right. I'm going to have Exhibit 287
11 displayed to you at this time; do you recognize
12 that exhibit?

13 A. Yes, I do.

14 Q. And is that the Air National Guard lanyard that
15 you observed in the RAV4 vehicle?

16 A. Yes, it is.

17 Q. And if you recall, can you tell us the
18 approximate location of that lanyard?

19 A. Yes, it was in the center console between the
20 driver's -- front driver's seat and the front
21 passenger seat.

22 Q. I'm going to have Exhibit 293 displayed on the
23 screen for you. If you would take your pointer
24 and tell us the approximate location of that, if
25 you can, with the use of this exhibit.

1 A. It would be in the center console right in there.

2 Q. I see there are a bottle of Aquafina water and
3 some other items?

4 A. That's correct.

5 Q. And you are pointing to the area between the two
6 seats?

7 A. That's correct.

8 Q. Thank you. How long did the processing of the
9 vehicle -- your part of the processing of this
10 vehicle take?

11 A. I worked on the vehicle for most of that day and
12 the part of the next.

13 Q. And during -- Specifically to -- directing your
14 attention to November 8th, did you have occasion
15 to examine a wheel cover?

16 A. Yes, I did.

17 Q. And did you examine it for the possibility of
18 fingerprint analysis?

19 A. Yes, I did.

20 Q. Tell us about that.

21 A. The wheel cover on the back of it had
22 impressions, for fingerprint impressions. You
23 can see them on the top of it, but it was so
24 dirty that actually there weren't any impressions
25 left behind. It was more of the take away. If

1 you have a really dirty surface and you touch it
2 with your fingers, there's no way you can leave
3 the impression behind, but you are picking all
4 the dirt up and that's where the impressions are.
5 You are taking it away, you are not putting it
6 down.

7 Q. I'm showing you Exhibit 308, does that look
8 familiar to you?

9 A. Yes, it does.

10 Q. And I note, prominently on the top of the wheel
11 cover there, there appears some smudge marks that
12 actually look like fingerprints?

13 A. That's correct.

14 Q. All right. Tell us exactly what we're looking
15 at.

16 A. If you see this, you can tell that this is all
17 real dirty. This is just covered with road grime
18 and you can see what appears to be fingerprint
19 impressions here and down here, where somebody
20 put a right and left hand on here.

21 Unfortunately, when we processed, there's no
22 ridge detail to develop because most of this is
23 just dirt and it lifted up and there was -- no
24 latent prints were put down. The other ones that
25 were visible would be down here at the bottom,

1 but as you can see, these are basically smears,
2 no ridge detail in any one of those.

3 Q. So is that what you mean by this concept of a
4 take away?

5 A. That's correct.

6 Q. In other words, whatever was there was removed by
7 the hands; in fact, it could even have been
8 gloves that caused that?

9 A. That's correct.

10 Q. All right. Now, we're on this concept of
11 fingerprint analysis, did you process the vehicle
12 for possible fingerprint analysis?

13 A. Yes, I did.

14 Q. And in terms of your specific recollection here,
15 did you -- you processed the vehicle as a whole,
16 I take it?

17 A. That's correct.

18 Q. And outside?

19 A. Outside an inside, yes.

20 Q. All right. And in terms of the items that you
21 examined in -- Well, let's start with the outside
22 of the car. Were you able to develop any prints
23 that were useful or suitable for follow up
24 examination?

25 A. Yes, I was.

1 Q. And approximately how many prints did you locate,
2 suitable for examination?

3 A. I believe there was a total of eight areas where
4 there was prints that were suitable for
5 comparison.

6 Q. All right. In terms of the interior of the
7 vehicle, did you examine any of the items you
8 inventoried for the presence of latent prints?

9 A. Yes, I did.

10 Q. And give us a ballpark idea of approximately how
11 many items or the nature and type of items you
12 looked at.

13 A. I looked at the three Aquafina bottles. I also
14 processed a granola wrapper that was found in the
15 back of the vehicle, the CD case was also
16 processed. And several other items that ...

17 Q. A blinker light, lug wrench?

18 A. A blinker light kit, lug wrench.

19 Q. In addition to the wheel cover you just told us
20 about?

21 A. That's correct.

22 Q. During the course of your analysis, did you also
23 examine the license plates?

24 A. Yes, I did.

25 Q. And the license plates that you examined, were

1 you able to identify anything suitable on either
2 plate for purposes of subsequent analysis?

3 A. No, I was not.

4 Q. Now, in an effort to make an identification or
5 something to compare it to, you would need
6 standards; is that correct?

7 A. That's correct.

8 Q. In your effort to identify anyone as being the --
9 having put those prints on the items that you
10 were able to identify, what standards did you
11 have available to you; do you recall?

12 A. I don't recall the whole list of them. I know I
13 had Steven Avery's. I had a lot of the Avery
14 family's. I believe the wrecker drivers
15 submitted standards also.

16 Q. So if I were to read you a list of names, would
17 you recognize and be able to tell us as to
18 whether or not you had standards or compar --
19 from these individuals to assist you in your --
20 conducting your analysis?

21 A. Yes.

22 Q. All right. Allen Avery?

23 A. Yes, I did.

24 Q. Steven Avery?

25 A. Yes.

1 Q. Charles Avery?
2 A. Yes.
3 Q. Earl Avery?
4 A. Yes, I did.
5 Q. Delores Avery?
6 A. Yes.
7 Q. Bobby Dassey?
8 A. Yes.
9 Q. Brian Dassey?
10 A. Yes.
11 Q. Brendan Dassey?
12 A. Yes.
13 Q. Barb Janda?
14 A. Yes.
15 Q. Scott Bloedorn?
16 A. Yes.
17 Q. James Lenk?
18 A. Yes -- Not to the vehicle.
19 Q. Not to the vehicle. But eventually those -- you
20 had those prints as well?
21 A. That's correct.
22 Q. And Andrew Colborn?
23 A. That's correct.
24 Q. All right. Let's start with the vehicle. With
25 respect to the prints that you had and you

1 indicated you had 8 latent prints from the Toyota
2 itself?

3 A. That's correct.

4 Q. That were suitable for analysis. Were any
5 identifications effective?

6 A. No.

7 Q. How about the Sunbelt crunchy granola bar
8 wrapper, were there any identifications effected
9 in your comparison of that print with any of the
10 standards submitted?

11 A. No, there were not.

12 Q. The bottle of Aquafina water, were any
13 identifications effected there?

14 A. No, they were not.

15 Q. On the black CD carrying case, were any
16 identifications effective from that analysis?

17 A. No, sir.

18 Q. On the partially full bottle of Aquafina water,
19 were any identifications effective?

20 A. No, sir.

21 Q. At some point was a headboard from a bed
22 submitted to you for fingerprint analysis?

23 A. Yes, it was.

24 Q. And that headboard was represented to you as
25 having come from the residence of Steven Avery;

1 is that correct?

2 A. That's correct.

3 Q. All right. Was there an identification effective
4 there?

5 A. Yes, there was.

6 Q. And what was that?

7 A. I believe it was the right little fingerprint of
8 Steven Avery.

9 Q. Were any other fingerprint identifications
10 effected with respect to that item?

11 A. No, there were not.

12 Q. All right. At some point were you asked, during
13 the course of this investigation, to examine a
14 letter which was directed to the Manitowoc County
15 Sheriff's Office?

16 A. Yes, I was.

17 Q. Were you able to develop any latent prints from
18 that letter which were suitable for analysis or
19 comparison?

20 A. No, I was not.

21 Q. So it would be fair to say that no identification
22 could be effected from that examination?

23 A. That's correct.

24 Q. All right. At some point -- Recently, were you
25 asked to examine a cardboard box reputedly to

1 have contained a vial of blood?

2 A. That's correct, I was.

3 Q. All right. Did you examine any prints from that
4 box?

5 A. Yes, I did.

6 Q. And so that we're clear, where did you obtain the
7 prints from?

8 A. I obtained the prints, I believe, from Calumet
9 County Sheriff's Office, the standards.

10 Q. That would have been from Deputy Hawkins?

11 A. That's correct.

12 Q. All right. And you used those standards and you
13 made a comparison to prints of whom?

14 A. Lenk, and I can't remember. I can check my
15 notes.

16 Q. Sure, please.

17 A. Andrew Colborn and James Lenk.

18 Q. All right. With respect to your analysis of the
19 cardboard box, and the prints lifted from that
20 box, were any identifications effected?

21 A. No there were not.

22 Q. I'm going to show you Exhibit 473. And in the
23 background, does that look like the box that
24 you -- First of all, let me just ask, that's a
25 poor question. Let me back up before I go there,

1 I misspoke. Did you also examine a blood vial?

2 A. Yes, I did.

3 Q. All right. And, again, directing your attention
4 to Exhibit 473, does that look like the vial
5 which you were asked to examine in this
6 particular case?

7 A. Yes, it does.

8 Q. All right. How did the vial come to your
9 attention?

10 A. Came to my attention, I believe it was sent by
11 Jeremy Hawkins also from Calumet County?

12 Q. And had that vial previously been to the FBI for
13 some type of analysis, upon your receipt of it?

14 A. As far as I know it had, yes.

15 Q. All right. And were you able to process the vial
16 for any latent prints for examination?

17 A. Yes, I did.

18 Q. All right. Were any prints located on the vial?

19 A. There was some very faint ridge detail, but
20 nothing suitable for comparison was developed.

21 Q. So you weren't able to identify that ridge
22 detail, wasn't sufficient for identification
23 purposes?

24 A. That's correct.

25 ATTORNEY FALLON: Your Honor this might be

1 a good point to break for lunch.

2 THE COURT: All right. Members of the
3 jury, we'll break for lunch at this time and resume
4 at 1:00. I remind you not to discuss the case
5 during the lunch hour.

6 (Jury not present.)

7 THE COURT: You may be seated. Counsel,
8 then, I will see you back at 1:00.

9 ATTORNEY FALLON: All right. Thank you.

10 (Recess taken.)

11 (Jury present.)

12 THE COURT: Mr. Fallon, at this time you
13 may resume your direct examination.

14 ATTORNEY FALLON: Yes, thank you, Judge. I
15 see that we have the exhibit available. I would
16 like to ask Special Agent Fassbender to obtain the
17 exhibit for the vial of blood.

18 **DIRECT EXAMINATION CONTD.**

19 BY ATTORNEY FALLON:

20 Q. Mr. Riddle, I'm having Special Agent Fassbender
21 show you what has been received in evidence as
22 Exhibit 478. Do you recognize that item?

23 A. Yes, I do.

24 Q. And what is 478?

25 A. That's the container holding the vial of blood.

1 Q. All right. And are there some crime lab tape
2 markings on the outside exterior of that exhibit?

3 A. Yes, there is. I sealed this myself, and there's
4 my initials and date it was sealed right there.

5 Q. All right. And what is the date of the seal on
6 that?

7 A. February 26th of this year.

8 Q. All right. And Agent Fassbender would lift the
9 tube out. Do you recognize the contents of the
10 exhibit?

11 A. Yes, I do.

12 Q. And did you examine the vial which is contained
13 inside that exhibit?

14 A. Yes, I did.

15 Q. All right. And that is the item which you
16 attempted to process the prints from; is that
17 correct?

18 A. That's correct.

19 Q. And as I understand it, you said there was just
20 one ridge print?

21 A. There was very, very faint ridge detail that was
22 unsuitable for comparison, on the tube.

23 Q. So no identification could be effected?

24 A. No.

25 ATTORNEY FALLON: I will pass the witness

1 for cross-examination.

2 THE COURT: Mr. Buting.

3 ATTORNEY BUTING: Thank you, Judge.

4 **CROSS-EXAMINATION**

5 BY ATTORNEY BUTING:

6 Q. Good afternoon, Mr. Riddle.

7 A. Good afternoon.

8 Q. You have been a fingerprint examiner for, now,
9 how many years?

10 A. 19 years.

11 Q. 19 years. And about 14 of it, I think, was with
12 Wisconsin?

13 A. It will be 15 years in August, yes, sir.

14 Q. Okay. And in that capacity are you often called
15 to the scene of alleged crime or offense?

16 A. I have been on field response in the past, not
17 for the last three years, however.

18 Q. Typically you are just -- you just receive items
19 that are brought to you by the law enforcement
20 authorities?

21 A. That's correct.

22 Q. Okay. And is it in your experience that officers
23 would tend to bring items that they think are
24 important to their investigation?

25 A. Yes, that's correct.

1 Q. Items that they think might help identify who a
2 suspect is?

3 A. That's correct.

4 Q. Sometimes completely unknown person they don't
5 have any idea and they are just looking to see if
6 you can link somebody up?

7 A. That's correct.

8 Q. Some of those items might be, let's say,
9 something that's a suspected murder weapon in a
10 homicide case, right?

11 A. That's correct.

12 Q. Like a knife that they think might have been
13 used?

14 A. That's correct.

15 Q. Or a firearm that they think might have been
16 used?

17 A. That's correct.

18 Q. Did you have the opportunity to look at a .22
19 Marlin rifle, for fingerprints in this case?

20 A. I don't believe so, no.

21 Q. You never had one of these officers from the
22 State submit a .22 Marlin rifle for your analysis
23 to see if you could find any fingerprints?

24 A. No, they did not.

25 Q. Hmm. How about any bullet cartridges or shell

1 cases, did you ever get any of those?

2 A. I didn't receive any of those items, no, sir.

3 Q. Do you know -- Do you know anything about

4 firearms yourself?

5 A. Very little, some.

6 Q. Do you know how you have to load a .22 with

7 shells, cartridges?

8 A. Are you referring to a rifle or a revolver?

9 Q. Rifle.

10 A. Depending on the type of rifle, whether it's bolt

11 action or semiautomatic, there is a big

12 difference.

13 Q. Okay. So, if it's a semi-automatic, there's like

14 a little cartridge, or a little tube that goes in

15 underneath the barrel?

16 A. That's correct.

17 Q. And in order to fire it, one has to pickup

18 cartridges, which are fairly small, about an inch

19 and a half or so, right?

20 A. That's correct.

21 Q. And in doing that, then they have to load them

22 one, by one, by one into a tube.

23 A. That's correct.

24 Q. And have you ever been able to -- Have you ever

25 examined any cartridge cases before?

1 A. Yes, I have.

2 Q. Have you ever been able to find any kind of
3 fingerprints on them?

4 A. Very seldom but, yes, I have.

5 Q. Okay.

6 A. Not on a .22, though, sir.

7 Q. But you didn't in this case?

8 A. No, sir.

9 Q. No one even gave you cartridges to look at in
10 this case?

11 A. That's correct.

12 Q. While we're on the subject of important items
13 that maybe law enforcement might give you to look
14 at, how about if they find what they believe is
15 some personal item of a victim, in the bedroom of
16 a suspect, is that something they might want to
17 bring to you or you might be asked to look for
18 fingerprints?

19 A. I would assume so, yes.

20 Q. Any officer ever bring you a Toyota car key to
21 look at?

22 A. No, they did not.

23 Q. The -- Let me move ahead for a minute and then I
24 will go back to the RAV4. I'm going to show you
25 what's marked as Exhibit 497. Put your glasses

1 on, see if you can identify that for me, please.

2 A. That's a report that I issued on December 5th of
3 2006, with the results of the Item KT, letter to
4 the Manitowoc Sheriff's Office that I had
5 processed for prints.

6 Q. Okay. Before we talk about that any more, just
7 so no one is confused, there's some -- this isn't
8 an original of yours, right?

9 A. No, it is not.

10 Q. This is a copy of this. Some numbering at the
11 bottom that says State 1-9371, sort of a Bate
12 stamp kind of a thing? That's not normally on
13 your report, right?

14 A. No, it is not.

15 Q. Something that we have got that helps us, but
16 otherwise does this appear to be a accurate copy
17 of the report that you prepared?

18 A. Yes, it does.

19 Q. And attached to it, would you tell me what's
20 attached to this?

21 A. That's a copy of my handwritten notes.

22 Q. Okay. And keep going, what's attached to that?

23 A. It's a copy of a letter that was submitted, Item
24 KT.

25 Q. Okay. Let me put this up on the ELMO, so we can

1 talk about it that way.

2 ATTORNEY FALLON: Your Honor, I would like
3 to be heard on this, I think there's a hearsay
4 objection and a relevance objection that need to be
5 made.

6 THE COURT: The Court will excuse the
7 jurors for a few minutes to hear the motion.

8 (Jury not present.)

9 THE COURT: You may be seated. Mr. Fallon.

10 ATTORNEY FALLON: Yes, Judge. If counsel
11 is intending on displaying the actual cryptic letter
12 here, which was the subject of a -- an attempted
13 identification, which by the way was requested by
14 the defense, I have reason to object on grounds of
15 relevance, hearsay, lack of foundation, and what
16 have you, with respect to an anonymous letter sent
17 to the Sheriff's Department. So, I don't see any
18 relevance primarily, but it is also hearsay and
19 unidentified document.

20 THE COURT: The parties have the advantage
21 of me because I don't know what the letter is.

22 ATTORNEY BUTING: Sure. Let me show it to
23 the Court. Do we want to excuse the witness at all?

24 ATTORNEY FALLON: I don't see how that
25 would make any difference.

1 ATTORNEY BUTING: Okay. I just wanted to
2 bring it up. Well, Judge, the -- obviously the
3 document isn't offered for the truth of the matter
4 alleged in there, but it is -- it was brought up on
5 direct. I think under cross I can examine the
6 expert about his evaluation of the document. The
7 timing of how and when it was submitted is actually
8 already in the record. But it obviously goes to the
9 fact that this was just found, if the Court recalls
10 from an earlier witness, I believe, in the property
11 room a whole year after it had been received and
12 nothing had been done with it, goes to the
13 investigative bias, tunnel vision argument we have
14 been making for the last month. So for those
15 reasons it's certainly relevant and obviously it's
16 something that this witness -- this expert was asked
17 to examine, so it's relevant in that regard as well.

18 ATTORNEY FALLON: Your Honor, if I may
19 reply to that. The only reason this exhibit was
20 introduced is because counsel brought it up on
21 cross-examination of Investigator Fassbender, about
22 two weeks ago. It doesn't have any particular
23 relevance to this case whatsoever, other than it's
24 another rule out, another exclusion.

25 And by the way, I would also point out

1 that any attempt to discussion or display of the
2 writings of the particular exhibit go to, I think
3 are in violation of the Court's pre-trial ruling
4 suggesting some other unknown culprit committed
5 this particular offense. Again, it's an
6 anonymous letter, unaccounted for. So it's of
7 marginal relevance.

8 ATTORNEY BUTING: Judge, let me respond to
9 that. It doesn't go to any -- it's not, if you are
10 talking about third party liability, there is no
11 name on that, nobody that's particularly being
12 alleged. For all that matter, it could have been,
13 you know, it could be arguing that the defendant did
14 it. But the point of the matter is, it was a --
15 obviously, in our view, a very important tip that --
16 that may or may not have been acted on properly as
17 part of their investigative bias. So that's the
18 relevance.

19 THE COURT: Maybe the parties can refresh
20 my memory, I have a vague recollection of the
21 subject matter of the document; has the letter been
22 introduced as an exhibit?

23 ATTORNEY FALLON: No, that's it. It was
24 brought up in cross-examination of Special Agent
25 Fassbender on the first Friday of this trial, I

1 believe that is the 9th, if memory serves me.
2 Again, it was all -- that was the point -- that was
3 the time to cross-examine, if any.

4 ATTORNEY BUTING: Well, there was
5 cross-examination.

6 ATTORNEY FALLON: And here -- here's the
7 point, the probative value of showing that to the
8 jury is minimal, at best. It's the confusion, waste
9 of time, let's follow another dead end somewhere, is
10 the whole point of that. The time for
11 cross-examining, the time to make the point of
12 investigative bias, which was attempted and arguably
13 made or not, that's a subject for closing argument,
14 was in the investigation and cross-examination of
15 Special Agent Fassbender, when he said, well, we
16 ruled it out, or we just heard testimony from
17 Pevytoe, ruling it out.

18 ATTORNEY BUTING: Judge, first of all, how
19 can it not be relevant when there is a letter that
20 says the body was burned in the smelter at 3:00 a.m.
21 on Friday morn. It can't be more relevant than what
22 all the testimony we have heard about the body in
23 this case and the whole question of whether it's
24 location at Mr. Avery's -- behind Mr. Avery's
25 garage, was its original location or not is central

1 to this case and will continue to be central.

2 ATTORNEY FALLON: So, now he's arguing that
3 it's offered for the truth of the matter as it
4 affects the investigation?

5 ATTORNEY BUTING: No, but it's a tip that
6 was not followed on by the law enforcement agents in
7 this case because it did not fit their theory that
8 the body was burned behind Mr. Avery's garage.
9 And -- And the failure to do anything with this for
10 a whole year, supports that defense.

11 ATTORNEY FALLON: Then let counsel make
12 that argument in closing argument, based on the
13 evidence its exhibited.

14 THE COURT: If -- If Mr. Fassbender -- And
15 I have to say, this trial has now gone on long
16 enough, I don't have all the previous testimony
17 committed to memory. This letter was brought up to
18 Mr. Fassbender when he was examined and he said, we
19 didn't pursue it, is that --

20 ATTORNEY FALLON: He said they ruled it out
21 because we had already ruled out the smelter as
22 having any part of this particular case.

23 THE COURT: Okay.

24 ATTORNEY FALLON: He's already got the
25 evidence in to make the argument he wants to make.

1 ATTORNEY BUTING: No, because the -- I
2 don't know if we do or not, but I don't recall the
3 exact testimony myself right now. But, look, just
4 because they ruled it out, doesn't mean it's no
5 longer relevant. That's a central part of this
6 trial. That's a matter that the jury can decide,
7 whether or not this is just another piece of the
8 puzzle that, if we're going to use their analogy, a
9 piece of the puzzle that shows, time and time again,
10 they ignore anything that doesn't fit the State's
11 theory.

12 ATTORNEY FALLON: Are we now going to hear
13 testimony that the smelter was the source of
14 combustion of the remains of Teresa Halbach from,
15 presumably, Dr. Fairgrieve. We would certainly like
16 to know that. And I --

17 ATTORNEY BUTING: You have seen his report.

18 ATTORNEY FALLON: Well, counsel, we have
19 seen no report from Dr. Fairgrieve. We have seen a
20 rendition of what he might or might not say.

21 ATTORNEY BUTING: I'm sorry, that's what I
22 meant, you have seen a summary of what he says, and
23 the smelter is mentioned.

24 THE COURT: Maybe you can help me out,
25 what's he going to say?

1 ATTORNEY BUTING: I don't want to repeat at
2 this point, it's in the Court's file. I can't
3 restate it better than what we did in our summary.
4 But there are -- the evidence is clear that there
5 are multiple burn sites on that Avery property
6 alone, not to mention other sites outside of that
7 property. This was not reasonably considered. This
8 was dismissed as a possible site, despite the fact
9 that they are getting anonymous tips about it. And
10 more than anonymous tips that we haven't heard about
11 yet.

12 But, again, it shows investigative bias.
13 And it's clearly within the scope of direct. He
14 was asked about a letter that he -- that was sent
15 to the Manitowoc County Sheriff's Office and that
16 he did fingerprints on. If they didn't want it
17 in, it should never have been brought out. Now
18 the jury hears there's some letter, who knows
19 what it is.

20 ATTORNEY FALLON: Well, counsel, then you
21 shouldn't have asked the question on
22 cross-examination of Agent Fassbender, over
23 objection of the State.

24 ATTORNEY BUTING: Well, we wanted it,
25 you're the ones that don't.

1 ATTORNEY FALLON: Obviously they want it,
2 Judge, because they want to use it for this truth of
3 the matter asserted.

4 ATTORNEY BUTING: No.

5 THE COURT: All right. Here's my ruling.
6 To the extent that the -- and I'm basing this, I
7 guess, on the recollection of the testimony the
8 parties are providing me. To the extent -- First of
9 all with respect to the letter itself, it's not
10 admissible for the truth of the matter asserted, but
11 I believe I did admit -- admit it for the purpose
12 which I understand -- or not admit the letter, but
13 allow the question about it, not for the truth of
14 the matter asserted, but based on the proposition
15 advanced by the defense, which was that it was an
16 example of a lead that the State chose not to
17 follow.

18 The State has its own -- gave its own
19 explanation, I believe, for it, if I'm
20 understanding you correctly, Mr. Fallon. Again,
21 I don't remember Mr. Fassbender's explanation,
22 but both parties are telling me that this came in
23 and that it was the subject of questioning of
24 Mr. Fassbender.

25 ATTORNEY FALLON: Correct.

1 THE COURT: To the extent that point has
2 gotten in, that point has already been made. Since
3 Fassbender indicated it was not pursued of
4 necessity, the State didn't choose to send it to
5 this witness, and I'm not sure what -- what would be
6 added at this point by admitting it. Because to put
7 it up on the screen now raises the danger that the
8 jury will take it for the truth of the matter
9 asserted.

10 ATTORNEY BUTING: Judge, it's been talked
11 about. Now, the witness, on direct, was told that
12 he looked at a letter, the jury doesn't know what it
13 is, they brought it up, it's left hanging there, the
14 jury is going to, if anything, speculate about what
15 that letter is, whether it somehow relates to
16 Mr. Avery or not. And the fact his report shows
17 that it was a whole year until this was even sent to
18 be examined.

19 THE COURT: All right. This is a
20 fingerprint expert.

21 ATTORNEY BUTING: I understand.

22 THE COURT: As I understand this report, he
23 didn't find any usable fingerprints on the letter,
24 so what -- what is his testimony going to add to the
25 point that the Court has already been allowed to be

1 made with respect during Ms Fassbender's testimony.

2 ATTORNEY BUTING: I don't recall that we
3 have gotten the details out in Mr. Fassbender's
4 testimony. He didn't -- As I recall, he didn't
5 admit that he had even seen it. This witness has
6 seen it. He said, I think he indicated that he
7 didn't recognize it, didn't know what it was, other
8 than the defense wanted it sent for fingerprints a
9 year after the arrest of Mr. Avery, when we found it
10 in the property room.

11 THE COURT: Well, if there's a theory for
12 the defense to get this letter in, it may -- there
13 may be a way to get it in through another witness,
14 but this is a fingerprint expert. The only
15 testimony he would have to offer is that he didn't
16 find any fingerprints on the document and I don't
17 think this is an appropriate way to get the document
18 in.

19 ATTORNEY BUTING: All right. Then, for
20 this purposes then, I would like to just finish with
21 him on this point, and let the jury know that when
22 he received the letter, at least establish the date,
23 that it was not until December of '06. We're not
24 showing it, we'll work on the other issue later.

25 THE COURT: All right. I'm not sure I

1 understand what you are looking to do.

2 ATTORNEY BUTING: Finish up my questioning
3 on this issue, with him, by pointing out this
4 letter, without showing it, was not sent to him
5 until December of '06.

6 THE COURT: Okay. So, in front of the
7 jury, that a letter was sent to him. You can
8 identify this as a handwritten letter dated
9 whatever, or whenever it was received. Any
10 objection from the State?

11 ATTORNEY FALLON: If he wants to have it
12 identified as the letter examined with respect to
13 his December 5th report, that's fine.

14 THE COURT: Very well. That's permissible.

15 ATTORNEY BUTING: All right.

16 THE COURT: The jurors can be brought back
17 in. You may be seated.

18 (Jury present.)

19 THE COURT: Mr. Buting, you may proceed.

20 ATTORNEY BUTING: Sure.

21 Q. (By Attorney Buting)~ Okay. Mr. Riddle, again
22 showing you Exhibit 497, if you could just tell
23 us -- Well, let me do it -- Let me lead you
24 through it. This was a letter that was sent to
25 Manitowoc Sheriff's Department, as far as you

1 knew?

2 A. As far as this goes.

3 Q. Okay. And it was a handwritten letter, do you
4 know if there was anything about the date that it
5 was received, in the information you received?

6 A. Not that I received, no.

7 Q. Okay. Well, then, tell us when it was that you
8 received it and when it was you were asked to
9 do -- to test it for latent fingerprints?

10 A. I received this piece of evidence on December the
11 4th, of 2006, completed the work on December the
12 5th.

13 Q. Okay. So, a year after -- actually 13 months
14 after you were first brought into the case to
15 look at the RAV4 at the Crime Lab?

16 A. That's correct.

17 Q. Okay. The box, the cardboard box that contained
18 a vial of blood that you also looked at?

19 A. Yes.

20 Q. That was in -- when was it that you were asked to
21 look at that?

22 A. I believe that was just last week.

23 Q. Last week, okay. If you could check and be sure.

24 A. Actually, it was a couple weeks ago, February
25 the 19th, is when I issued the report on that.

1 Q. All right. And is that true also for the blood
2 vial itself; is that when you examined it?

3 A. The blood vial came in a couple days later, about
4 a week later, actually. I completed that report
5 on February the 26th.

6 Q. All right. Now, I noticed when you picked up the
7 lanyard in your direct testimony, you put on some
8 gloves before you did that?

9 A. That's correct.

10 Q. That's sort of a normal thing officers are taught
11 to do before they handle evidence, right?

12 A. That's correct.

13 Q. Because you know if you put on gloves, you are
14 not going to leave fingerprints, right?
15 Typically, with the right kind of gloves?

16 A. That's correct.

17 Q. And that's like second nature to a police
18 officer, right?

19 A. Yes, sir.

20 Q. So, really it would be very unusual for you to
21 find police officers' fingerprints on an
22 important item of evidence in a case?

23 ATTORNEY FALLON: Speculation.

24 A. Usually --

25 THE COURT: I think he can answer it.

ATTORNEY BUTING: Okay.

A. Occasionally there are slip ups where I have identified officers fingerprints on items of evidence, but for the most part they are very careful about wearing gloves and not leaving prints.

Q. All right. We went through a list of items.

(Exhibit 498 marked for identification.)

Q. We went through a list of items that earlier on you looked at in, like, I believe November of '05, on direct exam; do you recall that?

A. Are you referring to the inventory of the vehicle?

Q. Yeah, but I'm going to limit it; I'm going to narrow it down to just a few items, okay?

A. Okay.

Q. Just so we're clear, maybe I missed it, but it was actually November 7th of 2005 when you were first brought in at the Crime Lab?

A. That's correct.

Q. And at that time, the vehicle was -- the RAV4, Toyota RAV4, was still at the garage of the Crime Lab, right?

A. That's correct.

Q. And that was helpful to you because you have --

1 you've got decent lighting, and photographic
2 equipment with you, and all of that, right?

3 A. That's correct. We have photographers that take
4 our pictures for us there.

5 Q. Okay. I'm showing you Exhibit 498, could you
6 just identify that, please?

7 A. That's a report issued on December 7 of 2005.
8 Some of the items involved the RAV4 itself and
9 some items recovered from it that I processed for
10 fingerprints.

11 Q. Okay. Now, a number of those items that you
12 processed, you actually did find fingerprints
13 suitable for comparison, correct?

14 A. That's correct.

15 Q. Let's talk about those items for a moment. You
16 found suitable prints on the RAV4 itself, right?

17 A. That's correct.

18 Q. We'll get into where in a moment, but you also
19 found suitable prints on this crunchy granola bar
20 wrapper?

21 A. That's correct.

22 Q. And the bottle of Aquafina water?

23 A. That's correct.

24 Q. Were those both found in the front seat?

25 A. I believe the crunchy granola wrapper was found

1 in the rear of the vehicle, in the cargo area.

2 Q. Okay. Just so we're clear, you actually did the
3 search of that vehicle at that time as well,
4 right?

5 A. That's correct.

6 Q. And you made -- you made note of where you found
7 all of these items, including the lanyard, for
8 instance?

9 A. That's correct.

10 Q. Okay. And you also found and identified a print
11 suitable for comparison on the CD case, a black
12 plastic CD case?

13 A. Yes, that's correct.

14 Q. And on another partially full bottle of Aquafina;
15 is that right?

16 A. That's correct.

17 Q. So two of the three bottles of water, you were
18 able to find a suitable print?

19 A. Yes, sir.

20 Q. Okay. Now, let's talk about the RAV4 itself for
21 a moment. You mentioned the wheel cover on the
22 rear cargo gate had, I guess these patent or
23 patent prints, correct?

24 A. They were more take-aways than prints. A patent
25 print would be -- to me would be a fingerprint

1 that was visible --

2 Q. Okay. I'm sorry.

3 (Court reporter couldn't hear.)

4 A. The areas on the wheel cover are actually void
5 areas, that are in the shape of a hand print, but
6 there are actually no prints there.

7 Q. Okay. So this was something that -- These
8 were -- I'm using the wrong term. These were
9 just looking like fingers, prints, but there was
10 not -- no ridge detail?

11 A. That's correct.

12 Q. All right. Let's put up Exhibit 307 for a moment
13 here. And, actually, I'm going to put up the
14 other -- I'm going to put up Exhibit 308 first
15 and talk about that, that's a closer up picture
16 of the rear tailgate of the RAV4, right?

17 A. Yes, sir.

18 Q. Okay. And these sort of finger markings up here
19 on the top and the bottom are what you refer to
20 as take-aways, that you couldn't get a ridge
21 detail?

22 A. That's correct.

23 Q. But you did find some fingerprints that were
24 suitable, for identification purposes, on the
25 rear of this vehicle?

1 A. Yes, I did.

2 Q. Okay. And one of which is in this photograph.

3 Do you have the laser pointer with you; could you

4 point where it is?

5 A. Yes. You can't actually see the fingerprint.

6 What you are looking at here is the scale and

7 this points to where the fingerprint is for our

8 photographer, so he can take a picture of it. So

9 it would be right in front of that scale.

10 Q. Okay. Now, if I understand how this worked, you

11 found -- There was a number of places where you

12 found some prints that were suitable for

13 identification, but they didn't lift off of the

14 surface in that fashion, right?

15 A. No, they did not. None of the lifts I made were

16 suitable for comparison.

17 Q. Okay. But, there were fingerprints that you

18 found left on the vehicle that could be preserved

19 in another way, right?

20 A. That's correct.

21 Q. And that is where your photographer comes and

22 takes a close up photograph of the print that

23 shows a ridge detail, right?

24 A. That's correct.

25 Q. And it's actually done in sort of a negative

1 fashion?

2 A. That's the way I prefer it. I prefer them to
3 take the photograph and give me the negative, so
4 I can put it on a light box, where the light
5 shines through the back of it, makes the print
6 easier to see for me.

7 Q. Okay. And those are actually better sometimes
8 for identification purposes than the kind that
9 actually lift off with a piece of tape or
10 something, right?

11 A. It can be, yes.

12 Q. Okay. Could you use the pointer, laser pointer,
13 and let's talk about where you found these prints
14 that were suitable for comparison on this
15 vehicle, okay?

16 A. Okay. We had the one, I don't see the tag right
17 now, but the one right here, and most of the
18 other ones, actually came from this area right
19 here and a little farther around this side. I
20 think there was another one, can't see it in this
21 particular picture, but it's going to be around
22 the front of the vehicle. And then there is one
23 on an inside window.

24 Q. Okay. We'll talk --

25 A. I think a total of eight locations.

1 Q. Okay. We'll talk about those in a minute. There
2 were eight locations?

3 A. I believe so, yes.

4 Q. Okay. And if my recollection is correct, you
5 gave them numbers; I don't know if you recall
6 what the actual numbers are?

7 A. Yes, they were 8 -- inside of 825 -- and those
8 were eight latent lifts.

9 Q. Okay. But you found one -- right where we saw on
10 the earlier closeup, one right next to where the
11 key goes in for the cargo gate?

12 A. That's correct.

13 Q. And then three along this pillar to the left side
14 that goes above the taillight assembly?

15 A. That's correct.

16 Q. And then a fifth one was over on the other side,
17 sort of in shadows, on the other side of the
18 wheel cover?

19 A. That's correct.

20 Q. Okay. Now, I'm going to switch to Exhibit 289.
21 This is just a side shot of the vehicle. I don't
22 have a front shot, unfortunately. But the other
23 three that you found, if I'm correct, one of them
24 was in the -- one of them was actually on the
25 inside passenger window, right on this side of

1 the vehicle, wasn't it?

2 A. That's correct, it was.

3 Q. On the inside, right?

4 A. On the inside, yes.

5 Q. And another one was on the inside of the

6 passenger window of the rear window, on the other

7 side, on the passenger side, right?

8 A. Correct, yes, sir.

9 Q. And that was six and seven. And then the eighth

10 one was actually found on the hood?

11 A. That's correct.

12 Q. As if somebody would open a hood, might touch it

13 and leave a fingerprint?

14 A. That's correct.

15 Q. And you compared those fingerprints to the

16 fingerprints standard of Mr. Steven Avery?

17 A. Yes, I did.

18 Q. And they did not match, correct?

19 A. No, they did not, that's correct.

20 Q. And you went through a list of other people that

21 you -- other people's standards that you compared

22 to these unknown fingerprints. But am I correct

23 that you did not, and have not, as of today, ever

24 compared fingerprint standards from Lieutenant

25 James Lenk or Sergeant Andrew Colborn to any of

1 those fingerprints from the RAV4?

2 A. No, I did not.

3 Q. I am correct, you did not, right?

4 A. I did not, you are right.

5 Q. And still have not?

6 A. No.

7 Q. No one has asked you to do that?

8 A. No, they have not.

9 Q. Also, absent from that list of people who
10 Mr. Fallon ran down with you, of standards that
11 you compared, you did not compare any
12 fingerprints of Mr. Scott Tadych, T-a-d-y-c-h,
13 did you?

14 A. No, I did not.

15 ATTORNEY FALLON: Objection, relevance.

16 THE COURT: Sustained.

17 ATTORNEY FALLON: Ask that the answer be
18 stricken.

19 THE COURT: Court will order the answer to
20 that question be stricken.

21 Q. (By Attorney Buting)~ The standards that you
22 listed on direct are the only ones you got to
23 compare to these eight unknown fingerprints on
24 the RAV4?

25 A. That's correct.

1 Q. Were there also some palm prints found?

2 A. Yes, sir, there was. One of those eight
3 locations did contain a palm print.

4 Q. Okay. And you got actual palm print standards
5 from all of those people as well?

6 A. That's correct.

7 Q. And you did find a fingerprint of Mr. Avery's
8 that matched a fingerprint -- or latent that was
9 left or found on -- as reported to you, on a
10 headboard, right?

11 A. That's correct.

12 Q. Do you know where that headboard came from?

13 A. I was informed it came from Mr. Avery's bedroom.

14 Q. All right. So finding an owner's or occupant's
15 fingerprint on one's own headboard, would not be
16 that surprising, would it?

17 A. It would be expected.

18 ATTORNEY BUTING: All right. That's all I
19 have of this witness.

20 THE COURT: Any redirect?

21 ATTORNEY FALLON: Just a few questions.

22 **REDIRECT EXAMINATION**

23 BY ATTORNEY FALLON:

24 Q. Do you have any standards from Teresa Halbach to
25 assist you in making any comparisons?

1 A. No, I did not.

2 Q. And as a fingerprint examiner, would you trust,
3 if someone were to bring you a box of her
4 belongings, and say, well, her prints are
5 probably on there? As an examiner, would you use
6 that in making a comparison?

7 A. If they were to bring me --

8 Q. In other words -- Let me ask it, it's a poorly
9 worded question. What do you need for a standard
10 to assure yourself that you are making an
11 accurate comparison and subsequent
12 identification?

13 A. I would need a standard fingerprint card that was
14 received by that individual and we know that the
15 prints on that card were hers.

16 Q. All right. And if an item has been processed for
17 the presence of DNA, in other words swabbed, are
18 you likely to find any kind of prints suitable
19 for comparison after that has been done?

20 A. Not on the areas that were swabbed, no.

21 Q. And that would include a key?

22 A. That's correct.

23 Q. A gun?

24 A. That's correct.

25 ATTORNEY FALLON: Nothing else. Thank you.

1 ATTORNEY BUTING: Just a couple quick
2 follow-up there.

3 RECROSS-EXAMINATION

4 BY ATTORNEY BUTING:

5 Q. Do you have any information that -- that -- You
6 know what a .22 rifle looks like, right?

7 A. That's correct, sir, I do, yes.

8 Q. Okay. Has a long wooden stock, right?

9 A. Yes.

10 Q. That would be a good place maybe to find
11 fingerprints.

12 A. Depends on the condition of the wood, stocks
13 usually aren't that great for that.

14 Q. Okay. But, you know, top of the barrel, lots of
15 places on a rifle that might have suitable
16 prints, right?

17 A. That's correct.

18 Q. Do you have any information that anybody from the
19 DNA unit swabbed the complete surface all the
20 way, top, one end to the other, of that rifle?

21 A. I couldn't say what areas were swabbed, sir.

22 Q. Okay. And any areas that weren't swabbed, might
23 well have been suitable for you to look for
24 fingerprints?

25 A. That's a possibility, yes, sir.

1 ATTORNEY BUTING: Thank you, nothing else.

2 THE COURT: Very well, the witness is
3 excused.

4 ATTORNEY BUTING: Judge, I would move the
5 exhibits for the purposes stated.

6 THE COURT: Any objection?

7 ATTORNEY FALLON: As I see, 498, and 497,
8 is that it?

9 ATTORNEY BUTING: I believe so.

10 ATTORNEY FALLON: With respect to 497, only
11 for the -- well, for the purposes discussed, fine.

12 ATTORNEY BUTING: Right.

13 ATTORNEY FALLON: And for 498, that's fine.

14 THE COURT: Very well, 497 and 498 are
15 admitted.

16 ATTORNEY BUTING: Thank you.

17 THE COURT: Do I understand the State's
18 next witness is going to be appearing by telephone?

19 ATTORNEY KRATZ: Yes.

20 THE COURT: Members of the jury, I'm going
21 to give you a short break, hopefully short, so you
22 don't have to sit here while we're making
23 arrangements for the telephone. We'll call you back
24 as soon as we're ready.

25 (Jury not present.)

1 THE COURT: You may be seated. Mr. Kratz,
2 do you have the number to call?

3 ATTORNEY KRATZ: That would help. Yes, I
4 do, 817 -- We'll do this quietly.

5 (Off the record.)

6 THE COURT: Counsel, do I understand that
7 the relevant exhibits that are going to be the
8 subject of testimony, the witness has?

9 ATTORNEY BUTING: That's correct and they
10 are already exhibits that have been introduced here.

11 ATTORNEY KRATZ: Already admitted and he
12 has both of them already marked, Judge.

13 THE COURT: All right. Who is the witness?
14 Mr. Zimmerman, this is Judge Willis, can you hear
15 me?

16 THE WITNESS: Yes, Judge.

17 THE COURT: All right. We're outside the
18 presence of the jury at this time. In a few
19 minutes, we'll bring them in. I will let
20 Mr. Kratz -- Mr. Kratz, are you going to be doing
21 the examination?

22 ATTORNEY KRATZ: I will. Perhaps the
23 volume could be just a little louder.

24 THE COURT: I will let Mr. Kratz call you
25 as a witness and we'll let you know when we're

1 ready.

2 ATTORNEY KRATZ: Mr. Zimmerman, can you
3 hear me, okay? Mr. Zimmerman?

4 THE COURT: I don't think your microphone
5 is on.

6 ATTORNEY KRATZ: Mr. Zimmerman, can you
7 hear me, okay?

8 THE WITNESS: Yes, I heard that all just
9 fine.

10 ATTORNEY KRATZ: Okay. Thank you.

11 THE COURT: Mr. Zimmerman, can we hear you
12 again? Are you there?

13 THE WITNESS: Yes, I'm here.

14 THE COURT: All right. Why don't you talk
15 consistently for a few minutes while we adjust the
16 volume here. You can tell us how the weather is
17 there.

18 THE WITNESS: Well, today the weather is
19 fairly cool and mild. It's approximately 50 degrees
20 outside right now.

21 THE COURT: All right. When you are giving
22 your testimony, I'm going to ask you to speak
23 perhaps even a little closer into your phone or talk
24 a little louder if you are as close as you can get.
25 We can hear you here, but not quite as loud as

1 everybody else.

2 THE WITNESS: All right.

3 THE COURT: All right. Are we ready to
4 bring in the jury?

5 ATTORNEY KRATZ: We are, Judge, yes.

6 THE COURT: Very well, we'll bring in the
7 jury.

8 (Jury present.)

9 THE COURT: You may be seated. At this
10 time the jury is back in the courtroom. Mr. Kratz,
11 you may call your next witness.

12 ATTORNEY KRATZ: Thank you, Judge. Via
13 telephone, your Honor, we're going to be calling a
14 gentleman by the name of Tony Zimmerman.
15 Mr. Zimmerman, are you able to hear us okay?

16 THE WITNESS: Yes, I am.

17 ATTORNEY KRATZ: Mr. Zimmerman, I'm sure
18 the Clerk is going to ask you to raise your right
19 hand.

20 THE COURT: I will take care of that at
21 this time.

22 ATTORNEY KRATZ: I'm sorry, Judge.

23 THE COURT: Mr. Zimmerman, this is Judge
24 Willis. I'm going to ask you to raise your right
25 hand at this time; do you have it raised?

1 THE WITNESS: Yes, I do, Judge.

2 ANTHONY JOSEPH ZIMMERMAN, called as a
3 witness herein, having been first duly sworn, was
4 examined and testified as follows:

5 THE COURT: Would you please state your
6 full name and spell your last name for the record.

7 THE WITNESS: Anthony Joseph Zimmerman,
8 last name Z-i-m-m-e-r-m-a-n.

9 THE COURT: Mr. Kratz, you may proceed.

10 ATTORNEY KRATZ: Thank you.

11 **DIRECT EXAMINATION**

12 BY ATTORNEY KRATZ:

13 Q. Mr. Zimmerman, please do your best to speak up
14 nice and loudly and right into the phone so we
15 can all hear you, sir. How is it that you are
16 employed?

17 A. I am employed with Cingular Wireless.

18 Q. And how are you employed, sir?

19 A. You mean my job title?

20 Q. Your job title, yes.

21 A. I'm a network engineer.

22 Q. Are you currently working in any specific
23 departments within Cingular.

24 A. The department I work in, I am responsible for
25 technical support on our voice --

1 (Court reporter couldn't hear.)

2 Q. On your voice mail platform?

3 A. That's correct.

4 Q. There were some questions earlier in this trial,
5 actually a couple of weeks ago, regarding some
6 voice mails that had been received; were you
7 asked to appear today, either in person or by
8 phone, to clear up some of those questions about
9 voice mails?

10 A. Yes.

11 Q. First of all, Mr. Zimmerman, how long have you
12 been employed in that capacity?

13 A. In this capacity, I have been working for eight
14 years.

15 Q. And what are your general duties as in the voice
16 mail platform or as a network engineer?

17 A. Primarily responsible for ensuring our voice mail
18 systems are running without errors and providing
19 voice mail service to our customers.

20 Q. As part of that occupation, Mr. Zimmerman, are
21 you called upon from time to time to review
22 records regularly kept by Cingular?

23 A. Yes, I am.

24 Q. And in reviewing those records, specifically some
25 of those records as they relate to voice mail,

1 are you able to offer either opinions or
2 explanations about what some of the terminology
3 means in those records?

4 A. Yes, I am.

5 Q. Sometime prior to your testimony, Mr. Zimmerman,
6 you were provided with a couple of exhibits that
7 have already been introduced into evidence in
8 this case. One is Exhibit No. 361 and one is
9 Exhibit No. 372, do you have both of those
10 exhibits in front of you at this time?

11 A. I have Exhibit 361 and I have -- I believe I have
12 Exhibit 372; although, it's not marked as such.

13 Q. All right. We'll talk about 372 in just a
14 minute. I'm going to have my colleague, Mr.
15 Fallon, for the benefit of the jurors and
16 everybody in the court, put up Exhibit No. 361.
17 This is a Cingular document that has previously
18 been referred to and, in fact -- and, in fact,
19 was already received.

20 ATTORNEY KRATZ: And just for the record,
21 Judge, as this is a document that includes telephone
22 numbers, we would very much appreciate that the
23 media not film at least this particular document.

24 THE COURT: I think the -- I don't think
25 the camera is aimed at the screen. Is there a

1 camera man back there? I guess it's really not
2 aimed at the screen since there is nobody manning
3 the camera. It doesn't seem to be aimed that way,
4 so I think we'll be okay.

5 Q. (By Attorney Kratz)~ Mr. Zimmerman, this
6 subscriber activity report, do you recognize this
7 exhibit, 361?

8 A. Yes, I recognize it.

9 Q. All right. Now, as a network engineer in the
10 technical support area, Mr. Zimmerman, have you
11 been asked not only to review this particular
12 report, but other reports that deal with the
13 telephone -- or excuse me, the wireless usage of
14 a young woman by the name of Teresa Halbach?

15 A. Yes, I have been.

16 Q. Let me first ask you, Mr. Zimmerman, after
17 October 31st, 2005, at or about 2:27 -- excuse
18 me, 2:41 p.m., have you been able to determine
19 whether or not there was any what's called
20 activity, regarding Ms Halbach's cellular
21 account?

22 A. I have not been able to determine whether there
23 was any activity on that account.

24 Q. All right. The question that I have of you, and
25 I asked it in a negative way, so let me come

1 right out and ask you, was there any activity in
2 Ms Halbach's account after that time?

3 A. Not from the mobile itself, no, there was no
4 activity.

5 Q. All right. Now, is there anyway, Mr. Zimmerman,
6 from you, that is from technical support or as a
7 network engineer, to do determine why that might
8 be; in other words, although you can tell us that
9 there was no activity, are you able, just by
10 looking at records, to determine why a particular
11 account may be inactive?

12 A. Because there was no billing activity taking
13 place.

14 Q. All right. As an example, Mr. Zimmerman, if this
15 particular telephone, the cellphone of Ms
16 Halbach, had been used, even for something like
17 checking a voice mail account, would that be an
18 activity that you, through your review of the
19 records, would have been able to see?

20 A. Yes, that's correct.

21 Q. And, again, after -- sometime after 2:20 --
22 excuse me, 2:21 p.m. -- excuse me, 2:41 p.m., on
23 the 31st of October, it's your testimony that
24 there was no such activity; is that correct?

25 A. That is correct.

1 Q. All right. Next, Mr. Zimmerman, like to clear up
2 one last area and that is Exhibit No. 372. You
3 said that you may not know it as such, or at
4 least as a document that is marked as a exhibit,
5 or a State's exhibit, but do you have in front of
6 you a four page document which identifies various
7 voice mails that, again, are specifically related
8 to Teresa Halbach's account?

9 A. Yes, I have this document in front of me.

10 Q. And I would just ask you, as we discuss this, I
11 would ask you to consider that four page document
12 as Exhibit No. 372 if, in fact, we refer to it as
13 such; are you able to do that for us?

14 A. Yes, I am.

15 Q. All right. Thank you.

16 ATTORNEY KRATZ: Mr. Fallon, if you would
17 be so kind as to zoom into any of the messages; it
18 doesn't make any difference to me.

19 Q. (By Attorney Kratz)~ Let's just look at message
20 No. 2, the second message down, at least on our
21 screen. Mr. Zimmerman, on page number one of
22 that exhibit, do you see something called message
23 number two?

24 A. Yes, I see it.

25 Q. Now, within that message, or within the details

1 of that message, there is some jargon that is
2 used that I would ask you to tell our jurors what
3 it means. First of all, when something says
4 received, do you see where -- where you see that
5 the message or the voice mail was received?

6 A. Yes, I see that.

7 Q. Could you describe for the jurors, what does it
8 mean to, at least on this document, that a voice
9 mail was received?

10 A. That is the time and date stamp that the message
11 was recorded into the voice mailbox and the voice
12 mail system.

13 Q. When it says 11/2/2005, is that the date that a
14 voice mail for Ms Halbach was actually received
15 into her voice mailbox?

16 A. Yes, that's correct.

17 Q. And what does 14:28 mean?

18 A. That correlates to 2:28 p.m. in the afternoon.

19 Q. All right. Is there anything within that detail
20 of that message, or, in fact, any of the 18
21 messages that we are going to see in Exhibit No.
22 372, that describes for you the time or date when
23 that message may have been retrieved by somebody?

24 A. There is no such data in this report.

25 Q. Now, there are two other terms that I would ask

1 you to identify for us. First of all, what is an
2 unopened message?

3 A. It is simply a message that has not been saved.
4 And one can draw the conclusion that it was
5 either listened to or skipped while the playback
6 was taking place.

7 Q. And once again, when a message is not saved, that
8 is, whether it's been listened to or skipped, or
9 not, does that tell us anything about when that
10 message might have been retrieved or listened to?

11 A. No, that does not tell us anything about that.

12 ATTORNEY KRATZ: Ask Mr. Fallon to turn to
13 page two, if he would, about two thirds of the way
14 down the page.

15 Q. And, Mr. Zimmerman, I ask you to look at that as
16 well. It appears to say number of unopened
17 messages, eight; do you see that?

18 A. Yes, I see that.

19 Q. Can you describe for jury what that means?

20 A. That is the total count of messages that are
21 marked unopened, that have not been saved in the
22 mailbox.

23 Q. Now, other than unopened messages, there is
24 something that is called an old message; is that
25 correct?

1 A. That's correct.

2 Q. What is an old message?

3 A. And old message refers to a message that had been
4 saved in the mailbox.

5 Q. If a message has been saved in the mailbox, are
6 you able, as a network engineer in the technical
7 support area, able to render an opinion as to
8 whether that has physically been listened to?

9 A. It has. Yes, I can render an opinion that it has
10 been listened to, at least partially and most
11 likely entirely.

12 Q. All right. And is there a manual or some human
13 component to that which requires that message to
14 be saved?

15 A. Yes, there is, one must interact via the keys on
16 their handset or telephone.

17 ATTORNEY KRATZ: I would ask Mr. Fallon to
18 turn to the last page, that's page four of this
19 exhibit. That's Exhibit No. 372.

20 Q. Ask you, also, Mr. Zimmerman, to look at that on
21 page four, ask if you can tell us how many old
22 messages was there that were related to Ms
23 Halbach's voice mail?

24 A. There are 10.

25 Q. Of those 10 retrieved or saved messages, is there

1 any way for your company, and for you, as it's
2 representative and network engineer, to tell this
3 jury when those messages may have been listened
4 to?

5 A. I cannot determine when exactly these messages
6 were listened to, no.

7 Q. Mr. Zimmerman, with a Cingular voice mail
8 account, is it possible to retrieve or listen to
9 a voice message remotely, that is, from a phone
10 other than the cellphone for which that voice
11 mail attaches to?

12 A. Yes, that is possible.

13 Q. Could you tell the jury how that works, please?

14 A. Well, someone can call either the mobile number
15 itself from, say a land line telephone, as the
16 voice message begins playing the greeting, one
17 can interrupt that greeting with a key press and
18 enter that mailbox's password and gain full
19 access to the mailbox just as if they were the
20 subscriber.

21 Q. So if --

22 A. I'm sorry.

23 Q. Go ahead.

24 A. Besides calling the mobile number itself, they
25 can also call the voice mail system number, there

1 is a phone number associated with the voice mail
2 system, and that will simply place them into a
3 generic greeting, in which they can enter the
4 mobile 10 digit number to access the mailbox that
5 way.

6 Q. So if I understand correctly, if somebody wanted
7 to access Ms Halbach's voice messages, remotely
8 that is, using a phone other than Ms police
9 Halbach's cellphone, they could do so either by
10 calling her phone number and putting in a pass
11 word; is that right?

12 A. That's correct.

13 Q. Or they could call the Cingular system itself and
14 enter a -- what would be a 10 digit number, as
15 well as the password number; is that correct?

16 A. That is correct.

17 Q. And, once again, if somebody knew the password,
18 if somebody knew or figured out a password for
19 this particular cellphone account, it wouldn't
20 necessarily have to be the owner or holder of
21 that account to retrieve those; is that fair?

22 A. That's correct.

23 ATTORNEY KRATZ: I think that clears up
24 those two areas and those few questions. Thank you,
25 very much, Mr. Zimmerman, and I will pass the

1 witness, Judge.

2 THE COURT: All right. Mr. Zimmerman, just
3 a second, I want to ask, are the members of the jury
4 able to hear okay? I had maintenance turn the fan
5 off; hopefully we won't have trouble breathing, but
6 I think for the duration of this witness' testimony,
7 it works better, Mr. Buting.

8 ATTORNEY BUTING: Yes, thank you, Judge.

9 **CROSS-EXAMINATION**

10 BY ATTORNEY BUTING:

11 Q. Mr. Zimmerman, can you hear me?

12 A. Yes, I can.

13 Q. Good afternoon, this is Jerome Buting. I'm one
14 of the defense attorneys for Mr. Avery, who's on
15 trial here today, okay?

16 A. Okay.

17 Q. If you could explain for me a couple of things, I
18 would appreciate it. First of all, when one
19 calls into a voice mail account like this one --

20 ATTORNEY BUTING: Mr. Fallon, could you put
21 that last page back up again, please?

22 Q. (By Attorney Buting)~ When one calls into the
23 voice mail and you get a message that says you
24 have, I don't know, 18 messages holding; is that
25 how it works?

1 A. It usually plays the number of messages you have
2 that are new.

3 Q. Okay. So the very first messages that come on
4 are the most recent messages; is that right?

5 A. That's correct.

6 Q. And if somebody hasn't checked their phone for a
7 while and 18 messages have built up into the
8 system, when you start listening to it, the first
9 time, does it play the most recent messages first
10 and go in reverse order, chronologically?

11 A. It will play the oldest message first.

12 Q. Okay. So it will start off with number one and
13 go, chronologically, up to 18; is that right?

14 A. Yes.

15 Q. So, in turning to Exhibit No. 372 for a moment,
16 to page two -- We're just putting it up on the
17 screen, bear with us. Okay. So on page two,
18 about two thirds of the way down, it says
19 incoming old messages; do you see that?

20 A. Yes, I do.

21 Q. And the date of that is October 31 of 2005, at
22 1:54 p.m., right?

23 A. The date for that particular message, that's just
24 below the heading, yes, that's correct.

25 Q. So if one was to call in after all of these 18

1 messages had built up, into the account, this
2 would be the first one that would play; is that
3 right?

4 A. That's not totally correct, no. Would you like
5 me to expand on that?

6 Q. Sure.

7 A. If there are new messages in the account, those
8 new messages will play in chronological order,
9 starting with the oldest message. Now, if there
10 are no new messages in the mailbox, then it will
11 begin playing the skipped or unopened messages
12 first.

13 Q. From the oldest to the most recent?

14 A. Yes, that's correct.

15 Q. Maybe you need to define for us what you mean by
16 new messages, if there's new messages received?
17 What does that mean?

18 A. A new message would be one that has not been
19 listened to at all.

20 Q. Okay. So, taking this account and these records,
21 if all 18 of these messages built up into the
22 account, without any of them having been listened
23 to, when one first called to access that account,
24 would it start at this message that we're looking
25 at on page 2 that says October 31, of 2005, at

1 1:54 p.m.?

2 A. Yes, I believe that's the oldest message in the
3 mailbox, so, yes, that would be accurate.

4 Q. Okay. And, then, from this record, you can tell
5 that someone did listen to that message, right?

6 A. That's correct, yes.

7 Q. And as well as, if you follow with me on this
8 document, message two, message three, turning the
9 page to page three of the document, all of those
10 up to the last one on page four --

11 ATTORNEY BUTING: Can you turn to that one,
12 Dean?

13 Q. And, sir, if you would turn to the last page,
14 this is the last one, message number 10, that
15 appears to be categorized as an old message; is
16 that right?

17 A. That's right.

18 Q. And the date and time of this one is
19 November 2nd, 2005, at 8:05 a.m.; is that right?

20 A. That's correct.

21 Q. So, from this record, then, does it appear to you
22 that 10 messages were opened and listened to, or
23 at least partially listened to, as you said,
24 between October 31st, that first one we looked
25 at, and this 10th one on November 2nd, at 8:05?

1 A. I can't determine when they were listened to, or
2 saved, based on these records.

3 Q. I understand. I'm not asking you that. What I'm
4 asking you is, is it clear from these records,
5 though, that those first 10 messages, in
6 chronological order, were opened and listened to?

7 A. Yes. Yes, that is apparent.

8 Q. Okay. And, then, turning to page one, again, of
9 this exhibit, to message number one, on this
10 exhibit for the next -- on page one and two,
11 there's a series of -- a sequence of eight
12 messages that appear to be under this category
13 that says incoming unopened messages; do you see
14 that?

15 A. Yes, I see that.

16 Q. Do I understand, then, that incoming unopened
17 means they have not been listened to?

18 A. No. No, they are actually marked in the system
19 as having been listened to, but not saved.

20 Q. And how would that be? How do you listen to it
21 and not save it?

22 A. And you simply don't interact with the handset.
23 You don't interact. You don't press any keys,
24 the save key, you don't press the save key, and
25 it will stay in this date. You can press say,

1 for instance, a pound key, to skip the message,
2 but listen to the next one, but as long as you
3 don't save them, they will stay in this date,
4 after listening to them.

5 Q. Okay. So when it says unopened messages, it
6 doesn't necessarily mean that they weren't
7 listened to at all?

8 A. No, it simply means that they have not been
9 saved.

10 Q. Okay. And can you tell that they have been
11 listened to?

12 A. At least partially. They have been marked as
13 listened to in the system, but if one message was
14 to begin playing and the skip key was pressed,
15 that would also mark it as having been listened
16 to, in the system.

17 Q. Okay. So how does this differ from the opened
18 messages?

19 A. The opened messages have been saved. The saved
20 key has been pressed, after listening to the
21 message in its entirety, or at least partially,
22 which marks the message as saved, also known as
23 hold.

24 Q. Okay.

25 (Court reporter couldn't hear.)

1 Q. Hold. And I'm trying to get clear the difference
2 here then. So these eight messages that are
3 marked as incoming unopened messages, it's your
4 testimony that they -- that someone did open them
5 and listen to them, at least partially, and then
6 either let them play all the way through and not
7 interact and save, or push some button that skips
8 to the next before they're completed?

9 A. Yes, that is my testimony.

10 Q. Okay. And when you do that, they are
11 automatically saved as incoming, unopened
12 messages.

13 A. Yes, they stay in the mailbox as -- as incoming
14 unopened messages.

15 Q. Okay. And, then, when one listens to them, and
16 at the end of each message, chooses to push a
17 button to save them, that's when they get
18 reclassified as incoming opened messages; do I
19 have that right?

20 A. They are actually classified as incoming old
21 messages.

22 Q. All right. Then, from this document, can we
23 determine, then, that the -- in chronological
24 order, the first 10 messages were opened and
25 saved, each one, manually, by pushing a button,

1 beginning on October 31st; is that right?

2 A. Yes.

3 Q. But the next eight were listened to or skipped,
4 but not saved.

5 A. That's correct.

6 Q. Okay. Thank you, very much. That's very
7 helpful. Can you tell from this -- from these
8 records, whether or not someone listened to any
9 voice mails and then erased them?

10 A. I cannot tell from this record that that has been
11 done, no.

12 Q. And can you tell, from her account, what the
13 capacity for messages would be before you get a
14 message that says mailbox is full?

15 A. There is a way to tell that on an active voice
16 mailbox via a different report. This report does
17 not show that information.

18 Q. Okay. From your experience, your years in the
19 business, if you look at these -- By the way, let
20 me go back for a second. Is the capacity
21 determined by, like the length of the call, or
22 the number of the calls?

23 A. It is considered -- There are limitations placed
24 on both the length of each message and, also, the
25 number of messages that can be stored in the

1 mailbox.

2 Q. Okay. And the length of these messages are also
3 indicated on this report, right? Each message
4 has a -- third line down from the top says audio,
5 colon, and then a number with parentheses (SEC),
6 like seconds?

7 A. Yes, that's correct.

8 Q. So, for instance, on page number one, message
9 number one, under unopened, where it says audio,
10 69 seconds, that means it was a 69 second phone
11 call?

12 A. That's correct.

13 Q. Okay. Looking, if you would, for a moment, then,
14 at the length of all of these calls combined
15 together, with a number being 18, do you have an
16 opinion about whether or not this would fill up
17 the capacity of this subscriber's voice mailbox,
18 these messages?

19 A. This appears that it would not have filled up the
20 full capacity of the mailbox.

21 Q. All right. And, so, if one was getting a message
22 on November 3rd, when calling this particular
23 phone number, that said mailbox full, would that
24 indicate to you that perhaps some messages that
25 we now -- or that some messages had been erased

1 that are not reflected on this Exhibit No. 372?

2 A. Well, if somebody heard that recording, that the
3 mailbox was full, on November 3rd, then I would
4 say, yes, at least one or more messages had to
5 have been removed before the new message at the
6 stop of this document was received.

7 Q. Okay. And there's no way to tell what date or
8 time in this sequence that message or messages
9 might have been, that was erased?

10 A. There is no way to determine that from this
11 record, no.

12 Q. Okay. And is there also no way to tell what
13 time, I assume, if someone called in, what time
14 it would have been erased?

15 A. Not from this record, no.

16 Q. I have just got a couple of other questions that
17 I don't know that you can answer or not, but they
18 have to do with trying to access one's account,
19 such as this one, online; are you familiar with
20 that process at all?

21 A. From the internet?

22 Q. Correct. From your cingularwireless.com?

23 A. From our company website, I'm not aware of a
24 function we have that allows that.

25 Q. Maybe it's not the company website, but are you

1 aware that customers can go online and access
2 their accounts and find out, you know, the call
3 activity, what their last phone calls were?

4 A. Yes, I am familiar with that feature.

5 Q. Okay. And to do that, does one have to have a
6 user name and a password set up?

7 A. Yeah. In order to access your billing account
8 records, yes.

9 Q. But if you have that information, a user name and
10 a password, you can then access the billing
11 records, which would give you, for instance, the
12 most recent call activity on that account; is
13 that right?

14 A. Yes, that's correct.

15 Q. If you don't have -- If you have the password,
16 but you don't have the user name, you are not
17 going to be able to access that account?

18 A. If you are unable to correctly put in the user
19 name, yes, that's correct, you will not be able
20 to access it.

21 Q. Okay. So you have to know both the user name and
22 the password to be able to access the account?

23 A. Yes.

24 Q. And the password for that account, online, may or
25 may not be the same as the password one enters to

1 access their voice mail account?

2 A. I believe that's true; however, I'm not
3 100 percent familiar with our online account
4 security --

5 Q. Okay.

6 A. -- requirement.

7 Q. All right. So, you don't know, for instance,
8 whether an online password requires numbers and
9 letters, whereas the phone, probably just
10 numbers?

11 A. That's correct, yes.

12 Q. Okay.

13 ATTORNEY BUTING: All right. Thank you
14 very much, sir. That's all I have.

15 THE COURT: Mr. Kratz, any redirect?

16 ATTORNEY KRATZ: No. Mr. Zimmerman has
17 been very helpful. Thank you, that's all the
18 questions I have.

19 THE COURT: Okay. Thank you,
20 Mr. Zimmerman, you may hang up at this time.

21 THE WITNESS: All right. Thank you.

22 ATTORNEY BUTING: Thank you, sir.

23 ATTORNEY KRATZ: One very brief witness,
24 Judge. It's very well right at this time, if I
25 could call him.

1 THE COURT: All right. We'll take one more
2 witness, then, before the break.

3 ATTORNEY KRATZ: We would recall Mike
4 Halbach to the stand, your Honor.

5 MICHAEL DANIEL HALBACH, called as a
6 witness herein, having been first duly sworn, was
7 examined and testified as follows:

8 THE CLERK: Please be seated. Please state
9 your name and spell your last name for the record.
10 Michael Daniel Halbach, H-a-l-b-a-c-h.

11 DIRECT EXAMINATION

12 BY ATTORNEY KRATZ:

13 Q. And, Mike, please, remind the jurors how it is
14 that you know Teresa Halbach?

15 A. Teresa is my sister.

16 Q. And how are you employed, Mr. Halbach?

17 A. I work for the Green Bay Packers, in the Video
18 Department as a video assistant.

19 Q. As a video assistant with the Green Bay Packers,
20 are you -- or have you been provided with a
21 cellphone from the Green Bay Packers?

22 A. Yes, I have.

23 Q. Mike, upon learning of your sister's
24 disappearance, or that she was missing, did you
25 take any steps to try to ascertain where she was,

1 including trying to access her voice mail
2 messages?

3 A. Yes, I did.

4 Q. When did you do that, Mike?

5 A. My mom had called me that Thursday, November 3rd,
6 that afternoon, about Teresa, and wondering if I
7 knew where she was. And I didn't. So I had a
8 feeling that I might know her voice mail
9 password, because my mom had said that she had
10 tried calling and Teresa's in box was full.

11 So I guess what I was interested in was,
12 why it was full, or when the first new message
13 was from, was received in her in box. And so,
14 you know, that's why I did call her voice mail.

15 Q. And you said that you had called that on the 3rd
16 of November?

17 A. That's correct.

18 Q. Do you recall making that call, Mike?

19 A. I do.

20 Q. And were you able to accurately guess her
21 password?

22 A. Yes, it wasn't very difficult.

23 Q. Okay. How did you do that?

24 A. I had a feeling what it was, because of -- from
25 previous testimony, I said I did some website

1 design for her and her password for that included
2 her birthday, the month and day. And that was
3 successful in getting into her voice mail.

4 Q. She used her birth date as her password?

5 A. Yes.

6 Q. Mike, when you called your sister's voice mail on
7 the 3rd of November, do you recall what message
8 you first got? Now, I don't want to talk about
9 the messages that -- that were retrieved, but the
10 automated message; do you remember what that
11 said?

12 A. It just told me how many new voice mail messages
13 there were.

14 Q. Do you have a recollection of how many there
15 were?

16 A. I know that there were 18.

17 Q. So some automated voice said 18 new messages, or
18 something like that?

19 A. Correct.

20 Q. Did you listen to at least some of those messages
21 that day?

22 A. I did.

23 Q. Did you listen to all of them?

24 A. I believe that I did.

25 Q. Okay. Did you save some of them, or save all of

1 them, or skip them, or tell the jury what you
2 did?

3 A. Like I said, what was important to me was, I knew
4 that the first new voice mail message was from
5 Monday afternoon some time. So after hearing
6 that I was, you know, extremely worried just
7 because she checks her voice mail, you know, a
8 number of times every day. You know, she carries
9 her cellphone with her all the time. So that --
10 I mean, I was worried about that. So then I
11 listened to the first few messages, or I ended up
12 listening to all the messages, but as I listened
13 to the first half or so, I would save them when I
14 was done with them. And then we started -- or I
15 started to get into messages that were, you know,
16 later in the week, Tuesday night, Wednesday. And
17 at that point the messages just, you know, didn't
18 tell me anything about where Teresa was, just --
19 it was a lot of stuff about work and friends
20 calling about, you know, what they were going to
21 do that weekend. So I did begin to skip them.
22 But, yeah, I do believe I listened to at least
23 parts of all 18 messages. But I did not save --
24 I must have saved half of them.

25 Q. And the verification that it was you, in fact, on

1 the 3rd of November, that afternoon, that
2 accessed her voice mail; were you able to verify
3 that through the Green Bay Packers and through
4 their telephone records that could verify or
5 remind you that that was the time and date that
6 you accessed that voice mail?

7 A. I was able to, yes.

8 Q. All right.

9 ATTORNEY KRATZ: For this issue, that's all
10 I have of this witness, Judge. Thank you.

11 THE COURT: Any cross?

12 ATTORNEY BUTING: Very brief, Judge.

13 THE COURT: Go ahead.

14 **CROSS-EXAMINATION**

15 BY ATTORNEY BUTING:

16 Q. Mr. Halbach, did you -- as you listened to these
17 messages, you said you saved some and didn't save
18 the rest. You just kind of let them play and
19 skip through, hear a little bit and skip through
20 it; is that your recollection?

21 A. Right.

22 Q. Did you erase any of the messages?

23 A. I don't believe I erased any messages.

24 ATTORNEY BUTING: All right. Thank you.

25 THE COURT: Very well, you are excused.

1 All right. Members of the jury, we'll take our
2 afternoon break at this time. I will remind you,
3 again, not to discuss the case. And we'll see you
4 when the break is over.

5 (Jury not present.)

6 THE COURT: Counsel, we'll see you in 15
7 minutes then.

8 ATTORNEY BUTING: Thank you, Judge.

9 (Recess taken.)

10 (Jury not present.)

11 THE COURT: At this time we're back on the
12 record, outside the presence of the jury. Counsel,
13 is the State ready to call another witness?

14 ATTORNEY KRATZ: I am, Judge. I wanted to
15 place one thing on the record. In criminal cases,
16 Judge, it is permissible for testimony to be taken
17 by telephone. It does require, however, the
18 acquiescence of the defense. And the defendant, I
19 understood from Mr. Strang, prior to calling
20 Mr. Zimmerman, that, in fact, that procedure, for
21 the limited purpose of Mr. Zimmerman, was agreed to.
22 I simply wanted to make a record of that before the
23 close of this case.

24 THE COURT: All right. Mr. Strang.

25 ATTORNEY STRANG: Yes, Mr. Kratz is exactly

1 right. We discussed this before Mr. Zimmerman
2 testified. Given the nature of this witness, the
3 purpose of his testimony, the manner in which his
4 testimony was taken by telephone, we think
5 adequately satisfies both state and federal
6 constitutional rights to confrontation. We agreed
7 to the procedure, acquiesced in that, and have no
8 objection to it as it happened, as to that witness,
9 of course.

10 THE COURT: All right. And I should
11 indicate, the Court had been told in chambers
12 earlier that the parties had the agreement. I
13 probably should have put something on the record
14 before we had the witness testify, but the --
15 counsel let me know before the witness did testify
16 that they would be putting something on the record.

17 ATTORNEY STRANG: Right. It was discussed
18 before the witness testified.

19 ATTORNEY KRATZ: And the last matter that I
20 had for the record, Judge, yesterday, so that
21 Mr. LeBeau could find his way back to Virginia, or
22 do his travels, rather than calling Investigator
23 Wiegert, who would have packaged, and part of his
24 testimony would have included the packaging of the
25 vial of blood, which of course would have more

1 appropriately, or at least chronologically, had been
2 taken yesterday, the defense had agreed to taking
3 Dr. LeBeau out of order to accommodate that
4 schedule. I don't think that we need to tell the
5 jury that Investigator Wiegert, who is our next
6 witness, is taken out of order. I'm simply
7 explaining that for the jury that that was an
8 agreement between ourselves and Mr. Strang and
9 Mr. Buting.

10 THE COURT: Explaining it for the Court?

11 ATTORNEY KRATZ: I'm sorry?

12 THE COURT: You said you were explaining it
13 for the jury, you don't intend to tell the jury.

14 ATTORNEY KRATZ: I don't, Judge, I wanted
15 to place that on the record because this is a
16 witness who would normally have been called
17 yesterday, but with the acquiescence, once again,
18 and approval of Mr. Strang, we had agreed to call
19 Mr. Wiegert today and we intend to do that next.

20 THE COURT: Mr. Strang.

21 ATTORNEY STRANG: For the convenience of
22 Mr. LeBeau and for the State, Mr. Buting and I had
23 agreed yesterday that Mr. Wiegert could be taken out
24 of order, just as is happening. There is no
25 objection at all to it and there is no need for the

1 jury to be party to that agreement.

2 THE COURT: Very well. In terms of
3 scheduling, I know, again, from chambers, and the
4 Court has been meeting with the attorneys regularly
5 before we get started just to have some idea about
6 what the testimony for the day will be. Does the
7 defense intend to cross-examine Mr. Wiegert just on
8 the transmittal issue, or more broadly than that, I
9 know there was some discussion that he might be
10 called as part of the defense case?

11 ATTORNEY STRANG: No. I think, at least
12 the anticipation is, that we will just cover on
13 cross-examination here all that we have. I expect
14 to be able to finish that comfortably by 4:30, or
15 quite possibly before 4:30. And, you know, it could
16 happen that we recall him in the defense case, but
17 I'm not anticipating that at the moment.

18 THE COURT: Very well. We'll bring the
19 jury out at this time.

20 (Jury present.)

21 THE COURT: You may be seated. Mr. Kratz,
22 at this time you may call your next witness.

23 ATTORNEY KRATZ: Thank you. State will
24 call Mark Wiegert to the stand.

25 **INVESTIGATOR MARK WIEGERT**, called as a

1 witness herein, having been first duly sworn, was
2 examined and testified as follows:

3 THE CLERK: Please be seated. Please state
4 your name and spell your last name for the record.

5 THE WITNESS: Mark Wiegert, W-i-e-g-e-r-t.

6 **DIRECT EXAMINATION**

7 BY ATTORNEY KRATZ:

8 Q. Mr. Wiegert, tell us how you are employed,
9 please.

10 A. I'm an investigator with the Calumet County
11 Sheriff's Department.

12 Q. How long have you been a law enforcement officer?

13 A. All total, about 15 years, 14 with the Calumet
14 County Sheriff's Department.

15 Q. How long have you been an investigator?

16 A. Around five years, going on five years.

17 Q. And what are your general duties as a Calumet
18 County investigator?

19 A. We investigate all types of crimes from,
20 obviously the worst homicide, to burglaries,
21 thefts, sexual assaults, various nature of
22 things.

23 Q. So you have general investigative
24 responsibilities?

25 A. I do.

1 Q. With that occupation and with those duties,
2 sometime in early November of 2005, were you
3 informed of a missing persons investigation?

4 A. Yes, actually. On November 3rd our department
5 received a call from the Halbach family
6 indicating that they had some concerns about
7 their daughter and that she possibly was missing.
8 They did not know where she was. I did not take
9 the original call, one of our road deputies did
10 and then contacted me.

11 Q. Were you in charge of or what's known as the lead
12 investigator in that missing persons
13 investigation?

14 A. Yes, I was the one who received the call from the
15 road deputy. So at that point I was the lead
16 investigator on it, correct.

17 Q. Now, we have heard a great deal of testimony
18 about how that case developed thereafter. Let me
19 just ask you, though, if you remember the early
20 days of the missing persons investigation, that
21 is, the 3rd and 4th of November?

22 A. Yes, I do, in fact.

23 Q. Tell the jury, if you would, just the general
24 areas of investigative responsibility of those
25 first couple of days; in other words, what kinds

1 of leads were you following up on?

2 A. Well, any time you get a missing person
3 complaint, your first 24 to 48 hours are very
4 important, as we all know from watching TV. But
5 the first night when we initially got the phone
6 call, I initially met with the road officer who
7 had previously been at the Halbach residence or
8 had telephoned them. I'm not clear if she had
9 went there or telephoned them.

10 When she came in by me, she had already
11 talked to the Halbach's briefly. And then we
12 both went up to Teresa's residence where we met
13 with Karen and Tom Halbach, which would be
14 Teresa's parents. We also met with several of
15 her friends who had shown up at that time, and
16 also her roommate.

17 We did some brief interviews, basically,
18 to find out where she might have gone, if there
19 was any reasons, if there had been any
20 depression, any medication issues, anything like
21 that. We talked to the family. We talked to
22 Mr. Bloedorn, who would be the roommate. We
23 talked to a lot of friends who had arrived there.

24 We had also received a printout of some
25 phone calls, correction, a phone bill that --

1 Teresa's phone bill actually. So we had taken
2 that and tried to do some reverse directory
3 things to find out who some phone calls had been
4 made to. We also contacted *Auto Trader* because
5 we knew that she had worked for *Auto Trader*. And
6 they had given us some information, some
7 appointments that she was supposed to have on the
8 31st.

9 So we started following up on those type
10 of things on that Thursday night. We went as
11 long as we could on Thursday night, which I think
12 we worked till probably 11:30, maybe midnight or
13 so. We decided that we would meet back first
14 thing on Friday morning. I think we actually
15 came in early, around 7:00 in the morning.

16 That morning we sat down, myself, two
17 other investigators, and the sheriff, actually.
18 We sat down and put together kind of what we knew
19 at that point and decided that we would start
20 doing some interviews?

21 Q. Let me just stop you there, Investigator, because
22 I'm quite certain Mr. Strang would prefer I do
23 this more by question and answer. The 4th, that
24 is, the Friday, the 4th of November, did your
25 missing persons investigation continue?

1 A. Yes, it did.

2 Q. All right. And we have heard some of the details
3 of that missing persons investigation, but so
4 that I can move to the area of concern for why
5 you are being called at this moment as a witness,
6 the next day, that is, the 5th of November, were
7 you informed of and, in fact, did you participate
8 in a phone call from a Pam Sturm?

9 A. I did. You probably heard the phone call
10 earlier, in testimony. But we had received a
11 phone call at around 10:29 in the morning on that
12 Saturday from Pam Sturm, who had indicated that
13 she had located a vehicle matching the
14 description of Teresa's vehicle.

15 Q. Now, so that this jury understands, prior to that
16 phone call and, in fact, the prior 48 hours at
17 least, had you been in contact with Manitowoc
18 County authorities, specifically, a Detective
19 Dave Remiker?

20 A. Yes, among other people, I had been asking him to
21 do some things for us. We were out doing some
22 things, depending where the jurisdiction lied,
23 that's correct.

24 Q. On the 5th, then, on the morning of the 5th,
25 understanding that Ms Halbach -- or what was

1 suspected to be Ms Halbach's vehicle, was found
2 on the Avery salvage property itself, did you
3 agree to meet Detective Remiker and other law
4 enforcement officials out at that location?

5 A. Yes, actually, after we had gotten a phone call,
6 I had phoned Detective Remiker to let him know
7 that we had just received information that
8 Teresa's vehicle was possibly found.

9 So I immediately called Detective
10 Remiker, obviously, because it's in Manitowoc
11 County. I told Detective Remiker what I knew at
12 that time and told him that he probably should
13 get out there as soon as possible and that we
14 would be on our way out there to assist him in
15 any way we could.

16 Q. All right. Now, as we have heard for the last
17 four weeks, investigative efforts continued from
18 the 5th of November, really, up through mid
19 February of this year, 2007; is that correct?

20 A. Absolutely, yes.

21 Q. And as you sit here today, Investigator Wiegert,
22 if an investigative lead, or if there was
23 something relevant in this case, would you act
24 upon that, even during the trial?

25 A. I would, or I would have somebody else do it for

1 me, yes.

2 Q. Let's talk about blood planting, all right? Were
3 you aware, or let me ask it this way, when, if
4 ever, were you first made aware that the defense,
5 that is, somebody to my left, would have alleged
6 or was going to allege that there was going to be
7 a law enforcement officer involved in planting
8 some evidence in this case?

9 A. Specifically, in December of '06, we had gotten
10 word that Mr. Avery had indicated that the blood
11 had been planted by two specific officers.

12 Q. All right. Let's -- Let's -- Let's back up a
13 little bit. The planting of evidence and the
14 planting of a specific blood vial, do you
15 understand that to be two different issues?

16 A. Yes, sir.

17 Q. All right. Let's break that into its -- its
18 components then. When were you first informed
19 that a vial of Steven Avery's blood existed
20 anywhere within the confines of Manitowoc County?

21 A. Again, that would have been back in December of
22 '06 is when I first was made aware of that.

23 Q. Now, before December of '06, were you asked to
24 check into that very possibility?

25 A. Absolutely. We, as part of the investigation

1 and, again, as you had indicated before, the
2 defense had made some -- there were some comments
3 made about planting issues. So we did the best
4 we could at that time. We searched in all the
5 places which you would logically think that there
6 might be some DNA, blood, things like that.

7 I believe it was the April of '06, I had
8 contacted Detective Remiker at Manitowoc County
9 and said, this is what I'm hearing, what I need
10 you to do is check your evidence at the sheriff's
11 department, tell me, do you have any type of
12 blood, DNA, things like that.

13 Detective Remiker reported back to me.
14 He indicated that they had fingernail scrapings,
15 hair samples, and DNA swabs, from Mr. Avery. And
16 as you know, the DNA swabs have already been
17 introduced here. He had indicated DNA swabs were
18 still sealed by the Crime Lab.

19 ATTORNEY STRANG: This is hearsay, your
20 Honor, objection.

21 ATTORNEY KRATZ: It's not -- If
22 investigative bias is, in fact, still going to be
23 part of the defense in this case, Judge, it is not
24 for the truth of the matter, but for what this lead
25 investigator did in response to that.

1 THE COURT: As I understand it, it's being
2 offered to explain why the officer acted as he did,
3 not because of the truth of the matter. He can
4 testify as to his understanding of what the state of
5 the facts were. At some point, I suppose that there
6 may be more detail than is necessary but, generally,
7 I will allow him to answer the question.

8 Q. (By Attorney Kratz)~ And I will just ask you,
9 Investigator, if you can withhold saying what
10 somebody else might have been said; in other
11 words, quoting another officer, we would very
12 much appreciate that. But what you learned, is
13 what I'm interested in.

14 A. Sure.

15 Q. All right. Were you able, then, to determine,
16 back in April of 2006, that Manitowoc County,
17 that is, the law enforcement officials within
18 Manitowoc County, did not, in fact, have Steven
19 Avery's blood?

20 A. Yes, they did not have Steven Avery's blood.

21 Q. Were you asked, and were you able to verify that
22 any other DNA sample, like a buccal swab that we
23 have heard about, the Q-tip swab, that they were
24 in the possession of Manitowoc, were in a sealed,
25 that is, in a non-contaminated, pristine, if you

1 will, form?

2 ATTORNEY STRANG: This, again, it's not
3 relevant if it's not for the truth. So there's
4 hearsay and confrontation objections.

5 THE COURT: Well, at this point I'm going
6 to sustain the objection on the ground the question
7 is leading. For the purpose for which the Court
8 understands it's being offered, I don't believe it's
9 irrelevant.

10 Q. (By Attorney Kratz)~ All right. Could you tell
11 me, regarding buccal swabs, what, if anything,
12 you were able to determine?

13 A. I determined that there were buccal swabs at the
14 custody of Manitowoc County Sheriff's Department,
15 located in their evidence room, and that those
16 buccal swabs were packaged and sealed.

17 ATTORNEY STRANG: Same objection.

18 THE COURT: I think the witness has to
19 testify in terms of his understanding, rather than
20 what he learned. I'm not sure, Mr. Strang, if that
21 addresses your objection or not.

22 ATTORNEY STRANG: It would. That's right,
23 as long as it's clear that he's relying on
24 information given to him by others and we're just
25 learning this to explain why Investigator Wiegert,

1 then, acts on what others are telling him.

2 THE COURT: And I think taking into account
3 the validity of Mr. Strang's objection, I will
4 instruct the jury at this point, that the answers
5 this witness is giving are relevant to the extent
6 they deal with his motivation for acting as he did,
7 not for the truth of any of the information which
8 may have been passed on to him.

9 ATTORNEY KRATZ: Thank you, Judge.

10 THE COURT: Mr. Strang, does that address
11 your concern?

12 ATTORNEY STRANG: Yes, for the moment it
13 does. Thank you.

14 THE COURT: All right. Mr. Kratz, you may
15 proceed.

16 ATTORNEY KRATZ: Thank you.

17 Q. (By Attorney Kratz)~ The same inquiry, or the
18 same satisfaction to yourself and the prosecution
19 team, were you asked to determine whether any DNA
20 samples were in the custody of the Wisconsin
21 State Crime Lab?

22 A. I was.

23 Q. And were you able -- were you able to make that
24 determination?

25 A. Yes, I did contact the State Crime Lab. And we

1 actually spoke with, I believe it was Sherry
2 Culhane, and she informed me and indicated to me
3 that they did not have any blood from Steven
4 Avery, at the Crime Lab.

5 Q. All right. Satisfying yourself that law
6 enforcement didn't have any blood, that the Crime
7 Lab didn't have any blood -- By the way, did you
8 inquire, or make any other inquiries, about
9 Steven Avery's blood, of anyone?

10 A. I don't know that I made any other inquiries at
11 that point.

12 Q. Okay. Let me ask you, Investigator Wiegert, at
13 that point in the investigation, this is April of
14 '06, or the spring of '06, who were the law
15 enforcement agencies heading up or leading this
16 investigation?

17 A. The Calumet County Sheriff's Department and the
18 Department of Criminal Investigation.

19 Q. At that time, in the spring of '06, did you have
20 any reason to believe that there was a vial of
21 Steven Avery's blood, or any biological material,
22 within the Clerk of Court's Office in Manitowoc
23 County?

24 A. No, I would have no way of knowing that. I don't
25 routinely check Clerk of Court's Offices for

1 substances such as that. I mean, to my
2 knowledge, at that time, it would be stored
3 somewhere in another facility, like a law
4 enforcement facility, for several reasons. It's
5 biological hazard, number one. I wouldn't think
6 that would just be where it was.

7 Q. Then, back to my original question, when was the
8 first time that you were informed that the
9 Manitowoc County Clerk of Court's Office had a
10 vial of blood in their possession or control?

11 A. On or about December 13th or 14th of 2006.

12 Q. All right. After being informed of the existence
13 of a blood vial in Manitowoc County, in the Clerk
14 of Court's Office, were you asked to investigate
15 the facts and circumstances regarding that blood
16 vial?

17 A. Yes, we were.

18 Q. Were you asked, Investigator Wiegert, and, in
19 fact, did you determine who had access to the
20 Manitowoc Clerk of Court's Office, including who
21 had the keys, who had the codes to the entrance
22 doors; generally, in fact, not just generally
23 but, specifically, who had access to that
24 particular file?

25 ATTORNEY STRANG: This goes well beyond any

1 relevant purpose and is both -- presents both
2 hearsay and confrontational problems here. There
3 would be no other reason for offering this other
4 than to suggest the truth.

5 THE COURT: Mr. Kratz?

6 ATTORNEY KRATZ: I may agree, that's not
7 relevant, at least after yesterday, but if this is
8 still going to be part of the defense, this is
9 clearly relevant to the facts in this particular
10 case.

11 THE COURT: I'm going to sustain the
12 objection. I don't know that this witness is the
13 one to answer that. I'm going to sustain the
14 objection.

15 Q. (By Attorney Kratz)~ All right. Let me jump
16 ahead, then, Investigator Wiegert. Sometime in
17 mid December, were you, for the first time,
18 invited to actually view this vial of blood?

19 A. Yes, on December, I want to say 14th, I went to
20 the courthouse with people from the prosecution
21 side and several members of the defense. And
22 that was the first time I viewed that blood.

23 Q. And we saw a videotape, I don't know if it was
24 yesterday or the day before, that the defense had
25 showed, did that accurately depict the opening of

1 that particular packaging and the first time that
2 you saw that vial?

3 A. Yes, it did.

4 Q. Investigator Wiegert, sometime thereafter, were
5 you asked by the prosecution team, after a court
6 order had been issued, to actually package up, or
7 take that vial of blood and do something with it?

8 A. Yes, pursuant to the Court's order, I went to the
9 Clerk's Office in Manitowoc, at the courthouse.
10 I believe that was on February 5th, my
11 recollection, of this year. I was -- I then
12 provided the Clerk with the copy that the Court
13 had provided me, for release of the blood vial.
14 I took the blood vial into my possession and
15 transported it back here to Calumet County
16 Sheriff's Department.

17 Q. Now, February 5th of this year, just to put this
18 in perspective, is the same time that this trial
19 was starting; is that your understanding?

20 A. Yes.

21 Q. All right. Investigator Wiegert, as you are
22 putting your gloves on, you can do two things at
23 once, I'm going to have you look at the large
24 screen, Exhibit 471, which has already been
25 admitted in this case, is a photograph; do you

1 recognize that?

2 A. Yes, I do.

3 Q. What is that?

4 A. That's a picture that was taken, I can't say when
5 the picture was taken, probably one of the ones
6 that I took on -- in December, actually, when we
7 first opened that blood vial package, would be my
8 guess.

9 Q. When you saw that blood vial, as was shown in the
10 videotape, did the 10 year old vial of blood
11 still appear to be in non-coagulated, or in
12 liquid form?

13 A. Yes, we actually -- as you seen in the video
14 yesterday, we actually took the styrofoam box and
15 moved it back and forth and you could see the
16 blood actually move in there.

17 Q. All right. Moving on to February 5th, tell the
18 jury what you did?

19 A. On February 5th, when I picked the blood vial up,
20 and I transported it back here to the Sheriff's
21 Department, I took it down to our evidence room
22 where I un-packaged it from that package. And I
23 took the vial out and the vial was placed,
24 actually, into this red container that you see
25 right here. Inside this red container there is

1 another glass container. I first put it inside
2 that glass container and then it went inside this
3 red container. Then it was sealed, evidence
4 taped by me, and initialed by me.

5 Q. Now, Dr. LeBeau, I think, testified about that
6 particular exhibit and that that's a kind of
7 packaging that you, even in law enforcement,
8 don't typically see, is that right?

9 A. No, this was actually provided to us by the FBI,
10 the red packaging here.

11 Q. All right.

12 THE COURT: Mr. Kratz, I think the exhibit
13 number should be placed on the record.

14 ATTORNEY KRATZ: Right.

15 Q. (By Attorney Kratz)~ Is that Exhibit 478?

16 A. It is.

17 Q. Were you informed then, Investigator, that at
18 some point, at least at some point after
19 February 5th, that the FBI, the federal law
20 enforcement investigative body, was going to
21 attempt to do some analysis of that vial of
22 blood?

23 A. Yes, if I could just step back a second. On
24 February 5th, I was the one that turned this over
25 to the FBI. And then we did learn that they

1 would be attempting to do some testing for us.

2 Q. All right. And you were in court yesterday, you
3 heard the results of that testing; is that right?

4 A. Absolutely, I did.

5 Q. Now, notwithstanding the possibility of getting
6 some results from the FBI, had you and
7 Investigator Fassbender, as lead investigators,
8 performed another or a parallel investigation as
9 to the allegations of planting, specifically, by
10 Lieutenant Lenk and Sergeant Colborn?

11 A. Absolutely. I mean, I felt -- I can't speak for
12 Mr. Fassbender, but I felt it was our duty, that
13 we had to do everything we could to find out, one
14 way or another, whether it was true or it wasn't
15 true. And we did do that.

16 Q. And, yesterday, there was a scientific opinion
17 that was offered, without going into the
18 investigative efforts that you did, was that
19 investigation completed, your parallel
20 investigation?

21 A. To the best that we could, yes.

22 Q. You said that you packaged that vial yourself and
23 you provided it to the FBI. Could you just
24 explain, just briefly, and I'm almost finished
25 with you, Investigator, but just briefly, the

1 transmittal protocol, that is, how evidence gets
2 from you, in this case, to the FBI?

3 A. Sure. What we do is we contact the most local
4 FBI office. In our case here, that is the Green
5 Bay office. And in order for something to be
6 submitted to their lab, it has got to go through
7 the local office.

8 Things actually go from the local
9 office, in this case, Green Bay. They have to go
10 from there to Milwaukee, and there they are --
11 put their own labels on, it's packaged and things
12 like that in Milwaukee, and then it goes out to
13 Virginia. That's the only way we're allowed to
14 submit things, through that chain.

15 So what I did is, I had turned it over
16 to an agent by the name of Agent Hammond, from
17 Green Bay. And then I believe it went to
18 Milwaukee from there.

19 ATTORNEY KRATZ: For this purpose, Judge,
20 that is all the questions I have of Mr. Wiegert.
21 Thank you.

22 THE COURT: Very well, Mr. Strang, are you
23 going to be doing the cross?

24 ATTORNEY STRANG: I am.

25 **CROSS-EXAMINATION**

1 BY ATTORNEY STRANG:

2 Q. Judge, I just have a couple questions. I
3 thought -- I don't usually like to do this,
4 but --

5 A. Do I keep these on?

6 Q. I'm not going to tell a guy how to dress, do as
7 you please. Usually I would start at my own
8 place, but I just thought, I was curious with the
9 last couple questions you were asked. Are you
10 saying that under the rules of the FBI you
11 weren't allowed to send that directly to the lab?

12 A. That's my understanding, that I can't send it
13 directly to Virginia.

14 Q. Okay. So you had to give it to an FBI agent in
15 Green Bay?

16 A. Who was the closest agent, correct.

17 Q. Right.

18 A. To transport down.

19 Q. Closest, what they call a resident office?

20 A. Yes.

21 Q. And then he wasn't allowed to send it to the lab,
22 he had to send it to the Milwaukee office --

23 A. Yes.

24 Q. -- of the FBI?

25 A. I'm sorry. My understanding is that they do the

1 packaging in Milwaukee and things go out from
2 there.

3 Q. All right.

4 A. So Milwaukee is probably the regional office.

5 Q. Okay. So the FBI Green Bay sent it to FBI
6 Milwaukee and they repackaged it in some fashion
7 then. Were the Milwaukee people allowed to send
8 it to the lab?

9 A. It did go to the lab from Milwaukee.

10 Q. Any idea how long this all took?

11 A. I can tell you it made it to Milwaukee the same
12 day I turned it over to the agent. From there, I
13 have no knowledge of that.

14 Q. You prevailed on the FBI agent in Green Bay to
15 drive it right down to Milwaukee?

16 A. Yes, sir.

17 Q. All right. Let's go back, because you are the
18 initial lead investigator, as you said, in this
19 case, obviously, and then sort of split your
20 duties as lead investigator with Mr. Fassbender?

21 A. That's correct.

22 Q. And is it -- If we call you a case agent on this
23 case, is that a term you are familiar with?

24 A. You can call me that, sure.

25 Q. Okay. I mean, is that a term you use?

1 A. Generally not a term that we use.

2 Q. Lead investigator?

3 A. That's probably.

4 Q. That works for me, so.

5 A. Sure.

6 Q. So the two of you shared those duties because

7 this was a larger investigation?

8 A. Yes, sir.

9 Q. But you had it first, in the sense that the

10 person who took the call, she wasn't in the

11 business of investigation. She wasn't in your

12 Investigation Bureau, so she quite properly

13 referred it to an investigator?

14 A. That was correct, she was a road officer.

15 Q. You actually went out to Teresa Halbach's home

16 that very first evening, I don't know, I don't

17 remember now, I'm not sure it really matters, but

18 6, 6:30, something like that?

19 A. Somewhere in that area, yes.

20 Q. Met with Halbach family members, as you said, and

21 friends?

22 A. That's correct.

23 Q. Now, this was, at that point, a missing persons

24 investigation and a missing persons

25 investigation, I guess, only at that point.

1 A. Yes.

2 Q. You were able to, I guess not you personally, but
3 you watched others gain access to the Cingular
4 account on the website that we have heard about?

5 A. Don't know that I watched them, I know I was
6 provided with a printout that they had gotten off
7 the computer.

8 Q. Okay. All right. Did you personally try to call
9 Teresa's cellphone?

10 A. I did, as well as I believe the initial officer
11 had tried calling before me. But, yes, I did.

12 Q. Okay. And may not have been the only officer who
13 did that?

14 A. Probably not.

15 Q. Did you get a message that Ms Halbach's voice
16 mailbox was full when you called?

17 A. Trying to recall the exact -- I got the
18 impression it was full. And I don't remember
19 what it says, but I had the impression that it
20 was full, yes. I don't exactly remember the
21 verbiage that it says --

22 Q. Right. Okay.

23 A. -- but, yeah.

24 Q. The understanding you came away with was that it
25 was -- the mailbox was full?

1 A. I believe so, yes.

2 Q. Did you -- Do you think you made that call the
3 evening of November 3, that first night?

4 A. I think I did, to the best of my recollection.

5 Q. You didn't listen to any voice mail messages?

6 A. I did not.

7 Q. You certainly didn't erase any voice mail
8 messages?

9 A. I did not.

10 Q. Okay. Now, what -- what did happen is, while you
11 were still at Ms Halbach's home, you got a call
12 from Lieutenant James Lenk?

13 A. Eventually I did, however, there were some things
14 that happened before that. I had made the
15 initial call to Manitowoc County.

16 Q. Talked with Sergeant Colborn and Detective
17 Remiker, I'm not sure which order?

18 A. Initially, I called dispatch. They had Sergeant
19 Colborn call me back. And then later that
20 evening, I believe, I probably spoke with Remiker
21 and Lenk, later that evening.

22 Q. Okay. And it was Lenk who called you?

23 A. Yes, he did call me.

24 Q. You -- You know, just sort of get this out of the
25 way. You, at that point, had no idea that Mr.

1 Lenk and Mr. Colborn had had their depositions
2 taken in the civil lawsuit that Steven Avery had
3 brought?

4 A. No, I would have no reason to know that.

5 Q. And you didn't learn that until some time last
6 summer, summer of '06 probably?

7 A. Yes, that's correct.

8 Q. Now, one of the things you were doing that first
9 night, November 3, was trying to, you know, get a
10 handle on who were the close people in Ms
11 Halbach's life, so to speak?

12 A. Well, among other things, we wanted to know,
13 obviously, who her friends were and what kind of
14 family she had. Because I didn't know Teresa --

15 Q. Sure.

16 A. -- at that time. Didn't know her family at the
17 time. So I wanted to know who her family was,
18 who her friends were, among other things, like
19 where she might have went, you know, follow the
20 last 24 hours, something like that.

21 Q. Exactly, who would be likely to hear from her
22 frequently, what her circle of friends was, what
23 her business circle was, that kind of --

24 A. That's correct.

25 Q. -- thing? And what you try to do in a missing

1 persons investigation is figure out where we
2 think, you know, as best as we can find out,
3 where do we think this person was last seen and
4 last heard from and then let's try to work from
5 there?

6 A. That's true. It's more of a process of
7 elimination --

8 Q. Sure.

9 A. -- than anything, at that point when you have
10 some -- You're a broad perspective at this time
11 and you hope to narrow that down.

12 Q. Okay. And, so, in addition to family members and
13 friends, you learned something about her business
14 life, if you will, Tom Pearce and the photography
15 business?

16 A. Yeah, I had learned -- I'm not sure when I
17 learned it, but I learned, eventually, that she
18 had a business up in Green Bay, a photography
19 business in Green Bay.

20 Q. And then the *Auto Trader* freelance work --

21 A. Yes.

22 Q. -- or part time commission work that she did?

23 A. Right.

24 Q. Okay. And, then, you know, sort of her social
25 circle, which would include, obviously, family

1 members, with a close family like this, and also
2 friends who aren't family members.

3 A. Yes.

4 Q. She had a roommate, Scott Bloedorn?

5 A. That's correct.

6 Q. You were interested in learning whether these
7 were just people sharing a house or whether there
8 was some romantic linkage between the two of
9 them?

10 A. I wouldn't say initially. Initially, we were
11 concerned about where she might be. It wasn't my
12 concern, initially.

13 Q. Sure. But, I don't mean necessarily initially,
14 but sort of in the early steps, one would try to
15 ascertain, does this person have a boyfriend or,
16 you know, who is close --

17 A. Sure.

18 Q. -- to her?

19 A. Absolutely.

20 Q. So that -- that was something you pursued a
21 little bit as to Mr. Bloedorn, what's the nature
22 of his relationship as a roommate?

23 A. Sure.

24 Q. You learned about another fellow named Bradley
25 Czech, that first night, I think that's

1 C-z-e-c-h? Is that --

2 A. I believe that's correct.

3 Q. Okay. He was an acquaintance of Ms Halbach, you
4 learned that evening?

5 A. Yes.

6 Q. Pursued whether there was a romantic --

7 A. I guess I have to step back for a second. I
8 don't think it was that evening, I think it was
9 the next day.

10 Q. Okay. Fair enough.

11 A. My recollection.

12 Q. You know, and I'm -- if it's easier for you, we
13 can work with November 3 and November 4 together?

14 A. That's fine.

15 Q. Okay. Early on?

16 A. Sure.

17 Q. While this was a missing persons investigation.
18 So you learned about Mr. Czech?

19 A. Yes.

20 Q. Okay. And were you able to, you know, learn what
21 his connection was to Ms Halbach, at least in the
22 early stages of this investigation?

23 A. I determined that it was both a business and a
24 personal relationship.

25 Q. All right. And did you take any steps to pursue

1 that -- that aspect of the investigation further?

2 A. I spoke with Mr. Czech, if that's what you are
3 asking, yes.

4 Q. Okay. And that was early on?

5 A. I believe that was on Friday, the 4th.

6 Q. Would that have been the last time, to your
7 knowledge as the case agent, that an interview
8 was pursued with Mr. Czech?

9 A. You know, without reviewing 1,080 some pages of
10 just my reports, by mine I mean Calumet County
11 reports, I'm not willing to say that.

12 Q. And that's just --

13 A. That's just Calumet's reports. There's probably
14 6, 7, 800 of DCI reports, so I haven't memorized
15 them all.

16 Q. No, neither have I. And let's sort of pause on
17 that, and just to give this jury some
18 understanding of, you know, of the basic police
19 work here. When you say your reports, the way
20 the Calumet County Sheriff's Office works is that
21 you folks really just sort of run a continuous
22 flow of reports, with one reporting officer
23 adding on, essentially, to the foot of the
24 previous reporting officer's report?

25 A. No, I wouldn't classify it that way. I would say

1 numerically we do. I mean, if I have five pages
2 of report and another detective comes in on the
3 same case, it may start at number six --

4 Q. Right.

5 A. -- but his is not included in my report. His is
6 a separate report, obviously.

7 Q. Yes, that's exactly right, but the page number is
8 sequential?

9 A. Yes.

10 Q. So, when you say the Calumet County Sheriff's
11 Office report here is about 1,080 pages,
12 that's -- that's what it is, pretty close to
13 that, right up today?

14 A. Yeah, I would say it's in that range.

15 Q. And some of that you have actually authored, some
16 of that others have authored.

17 A. Certainly.

18 Q. But it just runs sequentially?

19 A. Numbers, yes.

20 Q. Right. And so there's just a huge amount of
21 preparation of basic police reports that's gone
22 on in this case, in your department?

23 A. Absolutely.

24 Q. You have heard me cross-examine others about the
25 purpose of police reports and, you know --

1 A. Yes.

2 Q. -- the training that goes into that. And I'm not
3 going to repeat that, but that's what you folks
4 have done?

5 A. Yes.

6 Q. And, then, the DCI, Mr. Fassbender and others
7 working for the DCI, have done sort of a parallel
8 reporting process, correct?

9 A. They have done their own reporting process. I
10 guess you could call it parallel, sure.

11 Q. Right. And they number their reports in sequence
12 rather than paginating them in sequence. But
13 it's the same idea that it's -- it's a whole run
14 of hundreds of pages of reports?

15 A. Yes.

16 Q. And so, at least as you sit here today, I guess
17 what you can say is that Bradley Czech, you sort
18 of talked to him and sort of set him aside pretty
19 early on in the investigation, so to speak?

20 A. Well, if I could preface that answer, we talked
21 to a lot of friends and acquaintances in a two
22 day period, among other investigative things we
23 were doing.

24 Q. Right.

25 A. Doesn't mean they were included, excluded, at any

1 point. It just means we got basic information
2 and we could always come back to those people if
3 we needed to do that, for whatever reason.

4 Q. Right. Basic information, name, date of birth,
5 address, phone number, how do we find this
6 person?

7 A. Probably a little more than that. Have you seen
8 Teresa? When was the --

9 Q. Right.

10 A. -- last time you saw Teresa --

11 Q. I know.

12 A. -- things like that.

13 Q. I'm just saying as a starting point.

14 A. Certainly.

15 Q. You get the information so you can come back to
16 them.

17 A. Yes, sir.

18 Q. And then it's, what's your relationship, have you
19 seen her, when did you last talk to her, that
20 kind of stuff?

21 A. Correct.

22 Q. Okay. And so Czech and Bloedorn fell into that
23 category early on and then you had that in case
24 you needed to go back to it.

25 A. Yes. And, actually, I know, again, I can't say

1 for sure Czech, but I know Bloedorn had been
2 talked to another time --

3 Q. Mm-hmm.

4 A. -- things like that, during the course of this.
5 But you are correct, but that's how we do every
6 missing persons complaint.

7 Q. Okay. And in this one, as you work back, you
8 learned that Ms Halbach had some plans, actually,
9 for Saturday night, October 29, the Saturday
10 before?

11 A. I believe so.

12 Q. Halloween party or something like that?

13 A. My recollection, yeah, there was a holiday party
14 type. I think maybe in Green Bay, but I don't
15 recall without reviewing that report.

16 Q. Right. And that's my recollection too. And as I
17 sit here thinking of all these reports you talked
18 about, I can't think of anyone who she was seeing
19 at that party, from whom you have ever heard?

20 A. Again, without going back and looking at all the
21 reports, I can't think of anybody offhand.

22 Q. Who popped up and said, hey, I saw her Saturday
23 night at the party?

24 A. Again, when I think back on it, there was a
25 multitude of people, not only that we contacted,

1 that contacted us and said, this is when I saw
2 her last, or this is when I saw her last. I
3 can't say, specifically, anybody told me they saw
4 her at the Halloween party, offhand.

5 Q. Yeah. No. And I -- Look, I would tell you if I
6 knew that and I'm suggesting I don't. So, at
7 least presently, your recollection is the same.

8 A. My recollection is that, without looking at the
9 report, I can't say nobody told me that, but I
10 don't recall anybody telling me that at this very
11 moment.

12 Q. Right. And, now, we have heard how early on in
13 the investigation you learned that there were to
14 be appointments at the Zipperer's and the Avery's
15 or somebody at the Avery --

16 A. Yes.

17 Q. -- property? And Mr. Colborn goes out to the
18 Avery property that very night, November 3rd?

19 A. She actually had, that we knew of, three
20 appointments that day. And we sent an officer
21 to -- actually, I made a phone call to the police
22 in our county --

23 Q. Right.

24 A. -- and then requested Manitowoc County to look at
25 the other two residents because it was in their

1 jurisdiction. And I also told them, eventually,
2 that I would send a detective over to assist them
3 with that.

4 Q. All right. So three, three and a half weeks ago,
5 actually, the fellow in your county, we heard
6 from Steven Schmitz?

7 A. Yes.

8 Q. And, then, the Zipperer residence was in
9 Manitowoc County; the Avery residence was in
10 Manitowoc County?

11 A. Yes.

12 Q. And this is how the name Steven Avery first gets
13 attached to the missing persons investigation?

14 A. Yes.

15 Q. You -- And I don't -- I don't -- I'm not now
16 suggesting that this happened right away on
17 November 3, or November 4, I don't think it did,
18 but one of the things you learned is that Mr.
19 Avery had a girlfriend at that time named Jodi
20 Stachowski.

21 A. That's correct.

22 Q. You learned that she was serving a jail sentence
23 right then?

24 A. Actually, I think I learned that several days
25 after this all started. But at one point in this

1 investigation, certainly --

2 Q. Right. Yeah.

3 A. -- I learned that.

4 Q. And I want to make that clear, I'm sure we're
5 well -- we're some days after November 4th at
6 this point, correct?

7 A. Correct.

8 Q. Okay. And you learned that Ms Stachowski was
9 doing a jail sentence at that point, in Manitowoc
10 County?

11 A. Yes.

12 Q. And you knew, because of your -- I guess, now, 15
13 years in law enforcement and 13 plus then, that
14 phone calls out of a jail are tape recorded?

15 A. I know ours were and our system is only a few
16 years old. I had no knowledge if Manitowoc's
17 were at that point or not.

18 Q. But you -- you -- you did learn, you came to
19 learn, as part of your investigation, that Ms
20 Stachowski's phone calls out of the Manitowoc
21 County jail were on tape?

22 A. Certainly.

23 Q. So you could go back and say to yourself, I
24 wonder if she made any calls on October 31, 2005;
25 specifically, I wonder if she called Mr. Avery?

1 A. You are asking me if we went back and looked?

2 Q. Yes.

3 A. Yes, we did.

4 Q. You -- You did and you found out that there were

5 two telephone calls from Ms Stachowski in the

6 jail, to Mr. Avery, the evening of October 31,

7 2005?

8 A. That is correct.

9 Q. You had a chance to listen to those?

10 A. I have.

11 Q. I mean, you personally?

12 A. I have.

13 Q. One of them you recall as being at 5:36 p.m.?

14 A. I can tell you there were two calls. I don't

15 want to say what time they were because I don't

16 recall what time they actually were made, but.

17 Q. You don't have any reason to disagree that the

18 first one was at 5:36 p.m.?

19 A. I will take your word for it. I know it was

20 earlier in the evening somewhere, but I can't say

21 what time.

22 Q. Subject to me being wrong, okay?

23 A. Sure.

24 Q. Does 8:57 p.m. sound about right for the second

25 phone call?

1 A. I know it was several hours after the first one.

2 Q. Okay. And those calls had to go to a land line,
3 so to speak, correct, from the jail?

4 A. Yes.

5 Q. Because you have to call collect from a jail?

6 A. Yes.

7 Q. And you can't call collect to a cellphone?

8 A. Some jails you can use calling cards; I don't
9 know if Manitowoc is set up that way, but.

10 Q. In any event --

11 A. One of the ways, you either have to use a calling
12 card or call collect.

13 Q. And, specifically, you were able to learn that
14 these calls were made to Mr. Avery's land line,
15 if that's the right word for your phone in your
16 house?

17 A. Yes, that's correct.

18 Q. Each one was about 15 minutes long?

19 A. I believe so, because I think that's as long as
20 those calls can go at Manitowoc.

21 Q. Okay. So you -- So you got to listen to those
22 and confirm -- And I'm not -- I don't -- I don't
23 get to put in anything Mr. Avery said, and I'm
24 not trying to, okay? But, you were able to say,
25 that's Steven Avery's voice and that's Jodi

1 Stachowski's voice on these two phone calls?

2 A. Yeah. I mean, I recognized the number,
3 certainly, that was called to Mr. Avery -- excuse
4 me, certainly that the number that Mr. Avery
5 picked up from, you know, the number from the
6 phone call. And, eventually, I recognized his
7 girlfriend's voice, after meeting with her on
8 other occasions, certainly.

9 Q. And you know Mr. Avery's voice, at least as you
10 sit here today, you know his voice, as well?

11 A. Certainly, yes.

12 Q. And now, on November 5, it's Saturday, and the
13 car gets found, and you folks go out to the Avery
14 property. And you are sort of off and running at
15 that point. One of the -- One of the assignments
16 you had, or you undertook, that afternoon, on
17 Saturday, November 5, was to be the one to
18 actually go and seek out a search warrant?

19 A. Yes.

20 Q. And this was to be a search warrant for the Avery
21 property in general, correct?

22 A. Yes.

23 Q. But it also identified a couple of specific homes
24 on the Avery property that, particularly, you
25 wanted to search?

1 A. I believe so. I don't recall what at all that
2 identified, but.

3 Q. And here, I tell you what, I don't know that I
4 even need to mark this, but I'm just -- I'm going
5 to give it to you because --

6 A. Sure.

7 Q. -- you can look at it.

8 A. Thank you.

9 Q. What I have handed you, at this point unmarked --

10 ATTORNEY STRANG: And, your Honor, if the
11 Court wants it marked with an exhibit number, I'm
12 happy to do that.

13 Q. (By Attorney Strang)~ -- but I just thought it
14 might help refresh your recollection to see the
15 affidavit, the search warrant. That's what I
16 have given you, right?

17 A. Yes.

18 Q. And it's got your signature on the second page?

19 A. Certainly.

20 Q. It's dated Mar -- November 5, I'm sorry, 2005?

21 A. Yes.

22 Q. And when you want a court, or a judge of a court,
23 to give you a search warrant, which is just
24 judicial permission to search a place or a
25 person, you have to apply for that warrant in

1 front of the judge, true?

2 A. Yes.

3 Q. And the application is called an affidavit, at
4 least typically?

5 A. Yes.

6 Q. And affidavit meaning because it's actually sworn
7 on -- on under oath.

8 A. That's correct.

9 Q. So you were the person who swore out the
10 affidavit here?

11 A. I did.

12 Q. You got it about 3:00 in the afternoon, from a
13 Manitowoc judge?

14 A. I actually think it was about 3:25.

15 Q. Okay. Good enough. We're talking about the same
16 search warrant?

17 A. Sure. Yes.

18 Q. And now that you have it, I think the --
19 Paragraph 4, you give your first description of a
20 specific home or residence that you want to
21 search, and that's Steven Avery's trailer home,
22 true?

23 A. Yes.

24 Q. Then, if you continue on in Paragraph 4, you
25 also, specifically, next describe Barb Janda's

1 trailer home?

2 A. Yes.

3 Q. And then you go on to say, and, you know, the
4 whole 40 acre parcel we want to search as well,
5 and that has a number of other buildings and
6 places to be searched?

7 A. It talks about the 40 acres, describes the
8 property.

9 Q. Right.

10 A. Talks about the outbuildings, the vehicles.

11 Q. And by -- by 3:25 p.m, that Saturday, what you
12 were saying under oath, to Judge Fox, was that
13 you believed that Teresa Halbach was the victim
14 of crimes, including among others, homicide?

15 ATTORNEY KRATZ: Objection, Judge, it's a
16 vague question and it's also misleading, did not
17 include the requisite legal standard in which
18 applications are presented to a Court.

19 ATTORNEY STRANG: Well, I can --

20 ATTORNEY KRATZ: Far different than what we
21 are doing here in trial, Judge.

22 ATTORNEY STRANG: No, I -- And that's -- If
23 that's the only concern, let's deal with that, you
24 and I, pretty easily. Okay?

25 Q. (By Attorney Strang)~ To get a search warrant,

1 you have to show something called probable cause.

2 A. Yes.

3 Q. Which is not proof beyond a reasonable doubt?

4 A. That's correct, something lower than that.

5 Q. It's -- Not getting into a legal lecture, it's
6 essentially a good reason, a reasonable basis, to
7 search a place or a person?

8 A. I would agree.

9 Q. Okay. And so what you are -- the actual
10 language, what you say in your affidavit, in
11 Paragraph 7, is you're saying you're affiant,
12 which is a formal way of saying to a judge, me,
13 I. Right? And you are describing yourself as
14 the affiant?

15 A. Yes.

16 Q. Okay. Affiant just being someone who makes out
17 an affidavit?

18 A. You are correct.

19 Q. So you are saying that you believe that, based
20 upon Teresa's lack of contact with her employer
21 and family members, and her vehicle being
22 abandoned at the Avery Auto Salvage Yard, that
23 Teresa Halbach is the victim of a crime,
24 including, but not limited to, and then you start
25 with homicide?

1 A. Are you asking me, that's what it says?

2 Q. Yes.

3 A. That's what it says.

4 Q. Right. And that's what you told Judge Fox in an
5 effort just to establish probable cause?

6 A. That's correct.

7 Q. Okay. So, I mean, in other words, at this point,
8 although you don't know for sure, you think you
9 have got probable cause by 3:25 on Saturday
10 afternoon, to believe that there's actual
11 criminal activity up to and including homicide,
12 and this is not just a missing persons
13 investigation?

14 A. I know it's out of character for Teresa not to be
15 home. I know it's out of character for Teresa's
16 vehicle to show up on the Avery property, to be
17 concealed on the Avery property.

18 Q. Sure.

19 A. Absolutely.

20 Q. So the answer to my question is yes?

21 A. Yes.

22 Q. Okay. Now, I want to -- I want to cover some
23 things, I guess in a summary way, Investigator
24 Wiegert, drawing on your deep familiarity with
25 this investigation as one of two lead

1 investigators.

2 A. Sure.

3 Q. All right. You know that during the course of
4 the investigation, up to today, you have not --
5 you collectively now, I mean investigators --
6 have not recovered anything identified as Teresa
7 Halbach's purse?

8 A. No, I don't know that.

9 Q. Did you -- Did you find a purse at her home?

10 A. No, but testimony from other witnesses, you know,
11 there was buckles, things like that, which could
12 have come from a purse. I don't know if we
13 collected anything from the purse or not.

14 Q. Yeah.

15 A. I can't say we haven't.

16 Q. Okay.

17 A. Very possible we have.

18 Q. I was trying to be careful with the question. I
19 mean, you're not -- you don't know that you've
20 recovered her purse?

21 A. I don't know if we have or if we haven't.

22 Q. Okay. You -- You -- You are aware that a Toyota
23 key was recovered?

24 A. Absolutely.

25 Q. Was found?

1 A. Mm-hmm.

2 Q. Mr. Lenk said he found that key or was the first
3 to see it?

4 A. Mr. Lenk found the key, yes.

5 Q. And you have no other keys that you've found in
6 the course of this investigation, other than any
7 you may have seen at Ms Halbach's own house?

8 A. We found a lot of keys.

9 Q. And, specifically, linked to Ms Halbach?

10 A. None that we could specifically link to her, but
11 we did find a lot of keys.

12 Q. That turned out to be not connected to Teresa
13 Halbach?

14 A. I wouldn't say that. I don't know if they are or
15 not. To the best of our ability, we tried to
16 determine if they were or not, and we haven't
17 been able to determine that to this date --

18 Q. All right.

19 A. -- what they are.

20 Q. I mean, that is, you tried them in her front
21 door, or in her business, the lock on the door of
22 her business?

23 A. There were some keys that we had recovered that
24 we had actually taken to -- I believe it was
25 where she coached volleyball at her church, and

1 attempted to use them there and they did not
2 work.

3 Q. They did not work?

4 A. That's correct.

5 Q. Didn't find a key that worked in the front door
6 of her house?

7 A. Not yet, no.

8 Q. Or in her business?

9 A. No.

10 Q. The -- One of the men that you later were able to
11 confirm that she visited and took a photograph of
12 a car he had for sale, on October 31st, was this
13 Steve Schmitz, whom we spoke about a few minutes
14 ago?

15 A. Yes.

16 Q. Mr. Schmitz, you learned, wrote a check for the
17 *Auto Trader* services?

18 A. I would have to see that report. I don't know
19 how he paid. I think you are right. I recall
20 seeing a check from him.

21 Q. Yeah, I think he actually testified --

22 A. That's possible.

23 Q. -- to that. That's a check that you never found?

24 A. Could you be more specific, never found, period?

25 Q. It never turned up?

1 A. Not to my knowledge.

2 Q. And you -- you -- you checked into this, so to
3 speak, and found out that the check was never
4 negotiated.

5 A. I believe, actually, now that you are talking
6 about, he had stopped payment on that check, I
7 think was his testimony, I believe.

8 Q. And you learned that no one ever presented the
9 check for payment, or tried to cash the check?

10 A. Not that we have been made aware of.

11 Q. At some point early on, and when I say early on I
12 mean in 2005, you were aware of an anonymous
13 letter being found at the Green Bay Post Office,
14 addressed to the Manitowoc sheriff?

15 A. Yes.

16 Q. You have heard testimony about that, I think a
17 little bit today, with Mr. Riddle?

18 A. That's correct.

19 Q. That's a letter you saw at the time?

20 A. No, I did not see it at the time.

21 Q. You didn't?

22 A. I have seen it since.

23 Q. Okay.

24 A. But when it was brought back, I did not see it,
25 no.

1 Q. This was Exhibit 497. I will show you exhibit
2 497.

3 A. Sure.

4 Q. Specifically, the -- three and four pages; it's a
5 five page exhibit. When, roughly, at least, was
6 the first time you saw that letter?

7 A. I know that I heard that this letter was at the
8 Green Bay Post Office. As a matter of fact, I
9 think I made arrangements with one of our
10 detectives to eventually get up there and pick it
11 up. I think, if memory serves me correctly, we
12 had Green Bay Police Department secure it for us.

13 Q. So you are involved in assigning somebody to go
14 get the letter --

15 A. Right.

16 Q. -- and bring it back?

17 A. But I can't tell you exactly when I saw it; I
18 don't recall.

19 Q. Would it have been shortly after it came back to
20 the Calumet County Sheriff's Office?

21 A. Again, I know I have seen it. I don't know
22 exactly when, because commonly when things come
23 back, if the officer needs to put that into a
24 short term storage, then I don't have access to
25 that. So I probably didn't see it that very day,

1 would be my guess.

2 Q. You do know that later in 2006 you saw it in the
3 property room at -- at your sheriff's office?

4 A. Yes.

5 Q. You are not aware of anything having been pursued
6 on the letter between the first time you saw it
7 and, then, the next time you saw it in 2006, in
8 the property room?

9 A. Well, again, I don't know dates, but I would
10 disagree with you. There were things pursued
11 about it.

12 Q. Oh. And what did you pursue on the letter?

13 A. I think the -- one of the DCI agents testified
14 this morning that they had looked into the
15 smelter and determined that it had nothing to do
16 with this case.

17 Q. Well, actually, you know, and I was here to, and
18 the jury will -- you are speaking about
19 Mr. Pevytoe?

20 A. Yes, that's correct.

21 Q. Okay. So we'll let the jury decide what they
22 heard, but I think what he said is he looked in,
23 felt around, and took -- took nothing, saw
24 nothing of evidentiary value and took nothing
25 from inside the smelter?

1 ATTORNEY KRATZ: I think that's a
2 mischaracterization. I know we're getting into what
3 the jury remembers. And I'm just interposing that
4 objection. Because he did testify as to whether or
5 not it was recently used or not.

6 THE COURT: I think he's asking the witness
7 if that's the witness' recollection.

8 ATTORNEY KRATZ: Okay.

9 Q. (By Attorney Strang)~ And we can -- we can step
10 off that because what another witness says is
11 really not the point here.

12 A. Sure.

13 Q. Other than Mr. Pevytoe looking at the aluminum
14 smelter, doing what he described himself, in the
15 same chair you're in, is there anything else you
16 did in pursuit of the letter marked as Exhibit
17 497, before sending it to Mr. Riddle in 2006?

18 A. No, I don't know what else could have been done
19 with it.

20 Q. Did you -- Did you personally ever see the
21 aluminum smelter, during the week, roughly, that
22 you were out at the Avery property, November 5
23 through November 12, 2005?

24 A. I don't believe so. And if I saw it, I probably
25 wouldn't have known what it was, so.

1 Q. You didn't make a point of going to the smelter?

2 A. No, I did not.

3 Q. I'm going to ask you to stick, for the time
4 being, during that same week --

5 A. Sure.

6 Q. -- while you are spending, basically all or most
7 of your waking hours out at the Avery property
8 that week, right?

9 A. That's correct, yes.

10 Q. You learned on Saturday, November 5, that one of
11 the human remains dogs had alerted strongly on or
12 neither the Janda burn barrels?

13 A. As well as by Teresa's vehicle, yes.

14 Q. Right. And there had been other alerts, for that
15 matter, down in the pit, or in cars near the
16 vehicle, near the Toyota?

17 A. Sure.
