18 Q. But there was -- You learned there was a strong
19 alert near one of the Janda burn barrels, or that
20 area?

21 A. I know that there was an alert. I can't say if
22 it was strong or not. I don't have any knowledge
23 of how the dog actually alerts, for the most
24 part. I know there was an alert, I can tell you
25 that.

1 Q. You learned -- You learned that some burnt bone
2 fragments later were found in one of the barrels?

3 A. Yes.

4 Q. You also were aware that there were several sites
5 off the Avery property, but in that, you know, in
6 that general part of the world, where possible
7 bone fragments were found and looked at?

8 A. I know there were other sites, you would maybe
9 want to call dumping areas, where maybe something
10 was there that resembled, and I will give you an
11 example, there was a gravel pit where one of
12 these searchers had found what they thought might
13 be a foot and it turned out to be a piece of
14 insulation that was burned. So there were a lot
15 of those false things that were going on,
16 certainly.

17 Q. Well, and not all of them -- not all of them
18 false, in the sense that --

19 A. I think the vast majority were.

20 Q. Okay. And then there were several, one, for
21 example, was in the Michel's Quarry to the east
22 of the Avery property.

23 A. I'm aware of one that I can say that the doctor
24 had said that there was possible human bone, or
25 bone, that was there, but that's the one I'm

1 aware of.

2 Q. East -- Is this the one east of the Avery
3 property or the one southwest?

4 A. I don't recall which one it was.

5 Q. Okay. But at least one of them resulted in bone
6 fragments, human or nonhuman, but bone fragments
7 and other debris, if you will, being sent to
8 Dr. Leslie Eisenberg?

9 A. Yes, and to my recollection, she determined she
10 didn't know for sure what it was, human or
11 nonhuman.

12 Q. And, again, we have her testimony to rely on for
13 that --

14 A. Absolutely.

15 Q. -- rather than your recollection or mine?

16 A. Certainly.

17 Q. But that -- that at least -- Do you remember that
18 being the site that was southwest of the Avery
19 property?

20 A. My recollection of it is, the map you showed
21 today. Now, if that was exactly the one, I would
22 not be able to tell you that.

23 Q. You personally never went there?

24 A. No, I did not.

25 Q. You were involved, if I recall correctly, because

1 I think you were in one of the pictures, in the
2 search on tarps, through debris in -- at the
3 Crime Lab in December of 2005?

4 A. Yes, I was present, I think for one day of that,
5 yes.

6 Q. That was a two day project in December of 2005
7 and then two more days, but I think back in the
8 Calumet Sheriff's Office in March of 2006; does
9 that sound right?

10 A. Sounds pretty close to it, yes.

11 Q. You were -- You were involved only in one day and
12 then in December at the Crime Lab?

13 A. I was involved in a day at the Crime Lab and I
14 would say maybe a day back here, later on in that
15 year.

16 Q. Okay. One of the reasons for that was to be
17 combing through, looking for pieces of metal, or
18 other, I guess bone fragments would have been of
19 interest, anything that might look important, or
20 possibly important, in going through that debris?

21 A. Yes, absolutely.

22 Q. At least two rivets were found in that debris?

23 A. Five rivets.

24 Q. Five total?

25 A. Yes, at this date we have -- to this date we have

1 five rivets identified as Daisy Fuentes rivets.

2 Q. Okay. And that's why it's useful to have you as
3 a lead investigator here, so.

4 A. Thank you.

5 Q. No, I mean you have -- but you have got -- you
6 have got sort of the overview of things?

7 A. Yes, I would, probably better than some other
8 people, yes.

9 Q. Right. So five Daisy Fuentes rivets, no Daisy
10 Fuentes button, metal button?

11 A. Five rivets, a zipper; no, I don't believe we
12 ever found, if you are talking about the main
13 button?

14 Q. Yeah, on a pair of jeans?

15 A. I don't believe we ever recovered that. And
16 there were some eyelets that looked like they
17 came from shoes, actually, that were recovered.

18 Q. Okay. And the zipper was not something that said
19 Daisy Fuentes?

20 A. No, my recollection, it had the initials YKK on
21 it.

22 Q. Mine too, or something like very close to that.
23 I think it was YKK too, that's my recollection
24 too, which you learned is a very large zipper
25 manufacturer?

1 A. Sure. Yes.

2 Q. So that -- that zipper, you never were able to
3 link to any special pair of jeans, or coat, or
4 any other garment?

5 A. I can tell you it matches the one on the jeans
6 which we had brought into court, same holes, same
7 letters, everything, that I can tell you.

8 Q. But, again, it's sort of -- it's a large zipper
9 manufacturer, which makes lots and lots of sort
10 of generic zippers.

11 A. The initials on there, yes. Whether the holes
12 are in the same place on all pants, I don't have
13 that.

14 Q. Right. Okay. Same week, one of the places you
15 did personally get to, was Steven Avery's garage?

16 A. I know I had been down to the garage that week we
17 were out there, yes. I don't know what day for
18 sure, I wouldn't be able to tell you that.

19 Q. I could probably show you a report, although, I'm
20 not -- I'm not sure you and I would really have
21 any dispute over this. If I suggested to you
22 that November 12 is the day you folks pulled up
23 stakes --

24 A. Sure.

25 Q. -- and stopped --

1 A. Yes.

2 Q. -- and you ended that search, so to speak, of the
3 whole property?

4 A. Yes, we did.

5 Q. You and Mr. Fassbender did a final sort of walk
6 through on at least some of the sites on that
7 property?

8 A. As best we could. We felt it was our
9 responsibility to know the condition of it when
10 we left, because we were the lead agents on that
11 case, that's correct.

12 Q. You knew that earlier in the week, I say the
13 week, I mean this seven or eight day period you
14 folks were out there, that shell casings had been
15 found in the garage, on the floor?

16 A. I know there were some found. I don't know what
17 day but, yes, had to be earlier than the 12th,
18 correct.

19 Q. Turns out to be 11 brass shell casings?

20 A. Yes.

21 Q. .22 caliber?

22 A. Yes.

23 Q. You -- You had told investigators, people
24 involved in actually searching the garage, in
25 your role as a lead investigator, you had told

1 folks, in essence, where there are cartridge
2 shells there may be bullets?

3 A. Did I specifically tell somebody that, no.

4 Q. You understood that they would be looking for
5 bullets?

6 A. I can't testify to what they understood. They
7 were to look for all sorts of evidence. Would
8 that be included in there, if they knew what they
9 were looking for, yeah, I'm sure.

10 Q. Well, did you try to assign people who you
11 thought knew what they were looking for?

12 A. I would think I would know what I'm looking for,
13 but I wouldn't know what a spent bullet would
14 look like.

15 Q. I guess my question is, did you -- did you try to
16 assign people who you thought would know what
17 they were looking for?

18 A. I assigned people that I trusted, as evidence
19 technicians, to do the job.

20 Q. All right. And you would expect, if they had
21 recognized a bullet, or a fragment of bullet, in
22 the garage, you would have expected somebody to
23 have said this may be important enough to pick
24 up?

25 A. If they, in fact, had saw it and recognized what

1 it was, absolutely, I'm sure they would have.

2 Q. All right. And you were satisfied, by the time
3 you did that final walk through with
4 Mr. Fassbender, that the garage had been searched
5 as thoroughly as reasonably possible?

6 A. I was satisfied that the people who were
7 searching the garage had did the best job they
8 could, under the circumstances.

9 Q. Did a walk through yourself, saw nothing that you
10 recognized as being possibly important as
11 evidence?

12 A. I don't know if I did a walk through the garage.
13 I went down to the garage. I know I walked into
14 the house trailer. I can't say that -- I don't
15 believe I did walk through the garage, to the
16 best of my recollection.

17 Q. Okay. But you were satisfied that where the
18 searching productively could have been done, had
19 been done by that time?

20 A. To the best of their ability at the time, I'm
21 sure, yeah.

22 Q. Yeah. And I mean, and let's be clear, I mean,
23 ultimately, it was -- it was a law enforcement
24 decision on when to turn this property back over
25 to the Avery family, right?

1 A. It certainly was. And if I -- Do I wish I could
2 have had another three weeks to move everything
3 out of every garage, and every air compressor,
4 every refrigerator, go through every part of that
5 salvage yard, with a fine tooth comb, I would
6 love to have, but it's not feasible.

7 Q. All right. So you made the decision, that
8 Saturday morning, November 12, was the day?

9 A. Yes, because, you know, for several reasons, we
10 did the best we could in that time period. The
11 Avery's had a business to run. We had already
12 put them out for a week. And it was a hard
13 decision to make, to be honest with you.

14 Q. Was that a business that at some point you, in a
15 moment -- in an unguarded moment, said you wanted
16 to shut down?

17 A. No, I don't ever remember saying that.

18 Q. Now, in any event, you knew that when you turned
19 the property back over to the people who lived
20 and worked there, you would lose control over the
21 property, that's obvious?

22 A. Certainly.

23 Q. Law enforcement would?

24 A. Yes.

25 Q. People would come and go as they pleased?

1 A. I would think that -- I don't know if people come
2 and go as they please. The Avery's would assume
3 back their responsibility for their residences
4 and business.

5 Q. Right. And customers would come to the business?

6 A. I'm sure.

7 Q. People would live in their houses, use their
8 garages, that kind of stuff?

9 A. Yes, sir.

10 Q. Two of the people -- I don't know that you
11 personally had contact with either one, you may
12 have, I don't know. But two of the people whom
13 investigators working under your joint direction
14 with Mr. Fassbender met and had contact with that
15 week, were Bobby Dassey and Scott Tadych?

16 A. Could you ask the question again, I'm not sure
17 what you are asking?

18 Q. Got pretty long. Someone, during the week you
19 were out searching the Avery property, had
20 contact with Bobby Dassey and Scott Tadych?

21 A. I believe so. I know somebody had contact with
22 Bobby on Saturday already.

23 Q. Saturday, the 5th, the first Saturday?

24 A. That's correct, yes.

25 Q. You personally didn't have any contact, that you

1 remember, with Bobby Dassey or Scott Tadych, that
2 week?

3 A. Not to my recollection, no. I don't believe I
4 personally have. But I know that there was
5 another investigator who actually talked to Bobby
6 from our department. That I know, but I don't
7 know about Mr. Tadych.

8 Q. Okay. Now, you did learn, in the course of your
9 work as a lead investigator here, that Bobby and
10 Scott each sort of were the only one who could
11 say the other was going deer hunting the
12 afternoon of October 31?

13 A. No, I don't know that that's true, that I can say
14 that they were the only ones who knew they were
15 going deer hunting. No, I can't say that. I
16 know they passed each other on the road, if
17 that's what you're asking.

18 Q. Right.

19 A. That I know.

20 Q. I mean, Bobby said, I passed Scott. Scott said,
21 yeah, I passed Bobby. And each says I'm going
22 deer hunting, and the other guy is going deer
23 hunting; that you knew?

24 A. I know they passed each other on the road. I
25 know they were going hunting, yes.

1 Q. Or that that's what they said?

2 A. Yes.

3 Q. Did you -- you, also, I guess, learned that

4 Mr. Tadych had not gone to work on October 31?

5 A. Did I know that? Is that what you're --

6 Q. Yeah. Did you learn that during the course of

7 your investigation?

8 A. I learned that he had been to visit his mother in

9 the hospital, in Green Bay. Yeah, I did hear

10 that.

11 Q. That that's what he said?

12 A. Yes.

13 Q. Anybody ever check out, you know, check whether

14 the mother in fact was in the hospital, or had an

15 operation?

16 A. I don't believe so. I just know that people

17 had -- that we eventually asked Barb the same

18 thing. And Barb had -- which is his girlfriend,

19 or wife, now.

20 Q. Right, girlfriend, then.

21 A. She had verified that that's where he was. And

22 she, eventually, I believe, went up there with

23 him, to my recollection.

24 Q. She goes up for an evening trip?

25 A. I believe she said so, yes.

1 Q. Right. Okay. Anyone ever ask Bobby why, if he
2 was going deer hunting, he would have taken a
3 shower right before going deer hunting?

4 A. Again, I didn't interview Bobby, so I wouldn't be
5 able to answer that.

6 Q. You don't remember whether he was --

7 A. I don't know if anybody asked him why he took a
8 shower. No, I don't.

9 Q. Let's move forward, then. The next time you are
10 on the Avery property is about four months later,
11 March, 2006, at least on to search?

12 A. Yes, certainly.

13 Q. Another search warrant?

14 A. That's correct.

15 Q. And we're talking about the first two days of
16 March, 2006?

17 A. I believe it was the first and second of March,
18 we were back out there.

19 Q. Now, this was a more focused search, if you will,
20 in terms of the actual physical area you were
21 searching?

22 A. Yes, we had developed new information on the case
23 and we acted on that information.

24 Q. And what you were searching this time was Steven
25 Avery's garage and Steven Avery's trailer. And

1 then I think probably the Janda house as well,
2 correct?

3 A. We had a search warrant, again, based on new
4 information that was learned in the case, for
5 Mr. Avery's trailer and Mr. Avery's garage. And
6 Barb Janda, I don't recall what her new last name
7 is. I will refer to her as Janda, at the time,
8 had given us verbal permission to enter her
9 house. I think we might have even had written
10 permission from her. So that wasn't included in
11 the search warrant, but she had given us
12 permission --

13 Q. Okay.

14 A. -- to go in there.

15 Q. The point is, we're not -- this isn't a search of
16 the whole 40 acres again, this is some specific
17 areas that were in the northwest corner?

18 A. For specific areas spelled out in the search
19 warrant, which was granted to us.

20 Q. Now, by -- by that time, four months into the
21 investigation, essentially, did you have
22 sufficient evidence technicians available to you,
23 in the Calumet Sheriff's Office and the DCI, to
24 conduct the search of Mr. Avery's garage and the
25 search of his trailer, in March, 2006?

1 A. I probably can't answer that yes or no. I would
2 probably have to expound on that a little bit.

3 Q. Well, who invited the Manitowoc County Sheriff's
4 Department back to help in that search?

5 A. Matter of fact, I notified Manitowoc County
6 Sheriff's Department because it is in their
7 jurisdiction and I feel it's my duty that they
8 know that we're going out to the Avery property.

9 Q. Okay. And that's certainly courteous, but who
10 invited Manitowoc County Sheriff's personnel to
11 help search and collect evidence in the garage
12 and the trailer, in March, 2006.

13 A. I believe that we utilized Detective Remiker and
14 it was a joint decision between Mr. Fassbender
15 and myself. And I stand by that decision.

16 Q. Okay. Was Detective Remiker the only Manitowoc
17 officer, to your knowledge, that you used --

18 A. Searching?

19 Q. -- in the March search?

20 A. If you're talking about the physical searching?

21 Q. Yes.

22 A. That is my recollection, yes.

23 Q. Now, let's -- let's move forward, finally, to the
24 blood vial --

25 A. Sure.

1 Q. -- sitting there in front of you. In fact, you
2 knew, just from watching TV, I guess, back in
3 November of 2005, that Mr. Avery, personally, was
4 saying, you know, if my blood is in the Toyota,
5 someone must have put it there, words to that
6 affect?

7 A. You know, something to that affect. Again, I
8 couldn't say but, yeah, there was something to
9 that affect, where he would talk about planting
10 it or something, I recall.

11 Q. Yeah. Sure. And, in fact, you were standing
12 probably closer to Mr. Kratz than I'm standing to
13 you, at a news conference, in November of 2005,
14 where you heard Mr. Kratz --

15 ATTORNEY KRATZ: Objection, it's
16 irrelevant. My comments in this case are
17 irrelevant.

18 ATTORNEY STRANG: I'm not at all sure they
19 are, given the direct examination here.

20 THE COURT: I'm going to sustain the
21 objection.

22 Q. (By Attorney Strang)~ You were aware of the
23 agents of the State, back in November of 2005,
24 publicly ridiculing the claim that law
25 enforcement officers would be walking around with

1 vials of Mr. Avery's DNA? You were aware of that
2 weren't you?

3 A. Yeah, absolutely.

4 Q. Okay.

5 A. I agree with that.

6 Q. But you also know that a Clerk of Court's Office
7 is a public office, right?

8 A. It's open, the lobby is open to the public.

9 Q. Right.

10 A. That's true.

11 Q. It keeps public records?

12 A. Yes.

13 Q. Court records?

14 A. Mm-hmm.

15 Q. These are available to be looked at for the
16 asking, for any member of the public who comes to
17 the counter at the Clerk's Office?

18 A. I assume so, yes.

19 Q. And you know that, I mean, there's a Clerk of
20 Court's Office right across the hall in this
21 building; isn't there?

22 A. Yes.

23 Q. Sure. And you, as a law enforcement officer,
24 interact with the Clerk's Office from time to
25 time?

1 A. No, I can honestly say, in my 14 years here,
2 other than when I'm on the stand in the court
3 office, I don't interact with the Clerk of
4 Court's.

5 Q. Don't you file returns for search warrants?

6 A. That's about the only thing I do, from the front
7 window, yes. I mean, that's my -- If you are
8 saying that's interaction, yes, you are correct.
9 That would be the extent of my interaction.

10 Q. I should not use 69 cent words but, I mean, you
11 know, you go there yourself to file a return for
12 a search warrant?

13 A. Yes, that would be the extent of my interaction.

14 Q. Okay. And you were aware, from very near the
15 beginning of this investigation, that Mr. Avery
16 had this lawsuit pending against Manitowoc
17 County?

18 A. Certainly I was aware of that, yes.

19 Q. For the wrongful imprisonment?

20 A. Against Manitowoc County, certainly.

21 Q. Right. Against Manitowoc County. But as I
22 understand you, in pursuing this, look for, you
23 know, gee, does Manitowoc County have his DNA
24 somewhere, neither you, nor anyone under your
25 direction, ever just went to the Clerk of Court's

1 Office to look at the old case file?

2 A. I did not. And I would never think of looking in
3 a case file for blood. And I don't know that
4 anybody else probably would either, unless they
5 had some knowledge of it being there.

6 Q. Okay. We didn't have knowledge of it being
7 there, but we looked, and that's how you found
8 out, right?

9 A. I would think you would probably have more
10 knowledge of it being Mr. Avery's attorney, than
11 I would. Because, obviously, he knew this blood
12 was drawn.

13 ATTORNEY KRATZ: I'm going to interpose an
14 objection, that's providing testimony.

15 THE COURT: Yeah, I don't think this line
16 of questioning is proper. I'm going to sustain the
17 objection.

18 ATTORNEY KRATZ: Ask that be stricken,
19 Mr. Strang's testimony or comment.

20 THE COURT: We'll strike the question, the
21 comment, and the answer. The Court will order that
22 it be stricken.

23 Q. (By Attorney Strang)~ You did not, in any event,
24 go to the Clerk's Office until after receiving
25 notice that the defense had found this box that

1 we have seen?

2 A. Yes, sir, that's correct.

3 Q. All right. And, then, as you said before, you
4 were one of a group of people, from the
5 prosecution and the defense, who were there when
6 the box, the styrofoam box was opened?

7 A. Yes, I was.

8 Q. In fact, I was about the only person who wasn't
9 there?

10 A. Yes. I think Mr. Buting was there, I believe.

11 Q. All right. And I'm going to -- We have already
12 played part of, or we played all of Exhibit 470.
13 And I just want to go back to part of that.

14 THE COURT: Let's take a stretch break
15 while he's doing that. Just in terms of timing, how
16 long are you looking at?

17 ATTORNEY STRANG: Another 90 seconds.

18 THE COURT: Okay. Go ahead.

19 Q. (By Attorney Strang)~ All right. We're going to
20 do it this way, come on over.

21 A. Sure.

22 Q. What I have got is Exhibit 470 here. Now, the
23 jury can't see this, but look upside down, this
24 is the blood vial that you saw when you guys went
25 and looked and videotaped this?

1 A. Yes, sir.

2 Q. Okay. What does that say right there, on the
3 manufacturer label?

4 A. There's some numbers and it says EXP March '90
5 something, I can't say.

6 Q. March '96?

7 A. '96 or '98, I can't tell.

8 Q. Okay. You can go back, you are not miked. Same
9 tube, right? Inside here?

10 A. I believe so, I would need to look at it.

11 Q. Sure.

12 A. Looks like the same tube.

13 Q. Yeah. Now somebody has written initials over
14 that last digit, but EXP is -- you recognize that
15 as a common abbreviation for expiration, right?

16 ATTORNEY KRATZ: Objection, speculation,
17 Judge. I don't know that he has a foundation for
18 that on a purple-topped tube.

19 THE COURT: There would have to be a
20 foundation for the witness to answer the question.

21 Q. (By Attorney Strang)~ Did you ever buy Advil, or
22 Pepto-Bismol, or anything at the grocery store,
23 that has an expiration date?

24 ATTORNEY KRATZ: I'm sorry, Judge, I am
25 going to interpose an objection. I don't know that

1 that applies to this case.

2 THE COURT: I agree, I don't think it would
3 be that simple to lay a foundation for this witness
4 to be qualified to answer.

5 Q. In any event, what you see is EXP and then a
6 space and then March '96 or '98, whatever the
7 last digit is?

8 A. Yeah, nine something, along with a lot of other
9 writing, but that's one of the things.

10 Q. Somebody has written initials on that now, right?

11 A. Initials, Steven Avery's name. There's a lot of
12 writing on this tube.

13 Q. Okay. All right. You can pop it back in there.

14 ATTORNEY STRANG: That's all I have.

15 THE COURT: Any redirect?

16 ATTORNEY KRATZ: No, not for this witness.

17 THE COURT: Very well, the witness is
18 excused. Do we have any exhibits that require
19 action?

20 THE CLERK: 496 from the State, that was
21 the flash card.

22 ATTORNEY KRATZ: We would offer that,
23 Judge. Actually, before the close of the case
24 wanted to have an accounting of things but, that not
25 withstanding, we do know that the flash card we are

1 moving.

2 THE COURT: Any objection?

3 ATTORNEY STRANG: There is no objection to
4 Exhibit 496.

5 THE COURT: Very well, that exhibit is
6 admitted. Mr. Kratz, anything from State before we
7 adjourn for today?

8 ATTORNEY KRATZ: Not for -- from the State,
9 for today, Judge. There is something outside the
10 presence of the jury I would like to address with
11 the Court, but nothing further at this time.

12 THE COURT: Is it something that requires
13 the jury to come back?

14 ATTORNEY KRATZ: Not today, Judge.

15 ATTORNEY STRANG: We can just take a brief
16 side bar.

17 ATTORNEY KRATZ: Side bar.

18 THE COURT: Okay.

19 ATTORNEY STRANG: Deal with that.

20 THE COURT: Okay. We'll do that.

21 (Side bar taken.)

22 THE COURT: All right. The record will
23 reflect that I just met with the attorneys to talk
24 about a stipulation, which I understand I'm going to
25 be hearing in a minute, before we send the jury home

1 for the day. Mr. Kratz.

2 ATTORNEY KRATZ: Thank you, Judge. Your
3 Honor, subject to the State offering and the Court
4 ruling on exhibits, which I believe -- or which the
5 State believes will be appropriately part of the
6 record in the State's case-in-chief, at this time
7 the State intends to rest.

8 THE COURT: Okay. And those are exhibits
9 that have already been marked, correct?

10 ATTORNEY KRATZ: That's right, Judge.

11 THE COURT: But the State may be requesting
12 the admission of some exhibits that have not been
13 admitted yet, and subject to that, the State is
14 resting?

15 ATTORNEY KRATZ: That's right, Judge.

16 THE COURT: First, Mr. Strang, does the
17 defense have any objection to that procedure?

18 ATTORNEY STRANG: We do not. We understand
19 that the State has rested and that there may be some
20 housekeeping to do on exhibits already marked and
21 identified in the State's case-in-chief. No
22 objection to that.

23 THE COURT: And I further understand that
24 the parties are requesting the Court to consider
25 matters outside the presence of the jury, which

1 would result in not needing the jury until tomorrow
2 afternoon; is that correct?

3 ATTORNEY STRANG: Yes.

4 THE COURT: Mr. Kratz.

5 ATTORNEY KRATZ: Unless they object, Judge,
6 yes.

7 THE COURT: Members of the jury, I'm not
8 going to ask you if you would like to sit around all
9 morning tomorrow before we get started. So let's do
10 this, how about if we have you meet at the normal
11 location for the bus at 12:30 tomorrow and we'll
12 bring you back for a session just tomorrow
13 afternoon.

14 I probably should have asked, I don't
15 know the transportation arrangements for the
16 morning, does that pose a problem for any member
17 of the jury? Very well. Then, Robbie, I will
18 ask you to notify the bus people of that change.
19 And you are excused for today. I will remind
20 you, again, not to discuss the matter or look at
21 anything on TV, radio, or any other media. And
22 we'll see you tomorrow, sometime around 1:15 or
23 so.

24 (Jury not present.)

25 THE COURT: You may be seated. Counsel,

1 STATE OF WISCONSIN : CIRCUIT COURT : MANITOWOC COUNTY
2 BRANCH 1

3 STATE OF WISCONSIN,

4 PLAINTIFF,

JURY TRIAL
5 TRIAL DAY 19

6 vs.

Case No. 05 CF 381

7 STEVEN A. AVERY,

8 DEFENDANT.

9
10 **DATE:** MARCH 8, 2007

11 **BEFORE:** Hon. Patrick L. Willis
12 Circuit Court Judge

13 **APPEARANCES :**

14 KENNETH R. KRATZ
Special Prosecutor
15 On behalf of the State of Wisconsin.

16 THOMAS J. FALLON
Special Prosecutor
17 On behalf of the State of Wisconsin.

18 NORMAN A. GAHN
Special Prosecutor
19 On behalf of the State of Wisconsin.

20 DEAN STRANG
Attorney at Law
21 On behalf of the defendant.

22 JEROME BUTING
Attorney at Law
23 On behalf of the defendant.

24 STEVEN A. AVERY
Defendant
25 Appeared in person.

1 (Reconvened at 9:07; jurors not
2 present.)

3 THE COURT: At this time the Court calls
4 the State of Wisconsin vs. Steven Avery, Case No.
5 05 CF 381. We're here this morning for a
6 continuation of the trial in this matter outside the
7 presence of the jury at this time. Will the parties
8 state their appearances for the record, please?

9 ATTORNEY KRATZ: The State appears by
10 Calumet County District Attorney Ken Kratz,
11 Assistant Attorney General Tom Fallon. I should
12 tell the Court that, uh, Mr. Gahn, uh, has been,
13 uh, delayed for a few minutes but will be joining
14 us during these proceedings, Judge.

15 ATTORNEY STRANG: Good morning. Uh,
16 Steven Avery in person, Jerome Buting, Dean
17 Strang on his behalf.

18 THE COURT: All right. We're here, uh,
19 this morning to take up, uh, some outstanding
20 motions, uh, that were raised during the course of
21 the trial thus far, and, uh, also hear what the
22 Court anticipates will be a -- a new motion or
23 motions from the defense.

24 One of the items yesterday that was left
25 unresolved was, um, somewhat of an inventory of

1 the exhibits, uh, to make sure that, uh, exhibits
2 that have been marked but not yet received, uh,
3 may -- that one party or the other may request
4 that they be received and to verify, I guess,
5 that the exhibits that have been marked and not
6 received were done so intentionally.

7 I'm going to ask the parties to address
8 that item with the clerk, uh, after I hear
9 argument on the motions, since I want some time
10 to, um, um, consider the arguments that are made
11 on the motions, and I think that will give the
12 parties more than adequate time to, uh, uh, check
13 with the clerk on the status of any exhibits that
14 haven't been resolved.

15 Um, we can go back on the record before
16 the jury is brought in this afternoon to address
17 any items with respect to exhibits, uh, that
18 require attention.

19 Uh, looking at the inventory of motions
20 that have been made but not yet finally
21 addressed, uh, one of them -- and it wasn't
22 really a motion, there was an objection made back
23 on February 27, uh, to an offer by the defense
24 concerning, uh, telephone records regarding the
25 accessing of voice mails. That matter was --

1 I -- I reserved ruling, uh, on that matter.

2 Finally, uh, pending receipt of
3 additional evidence from the, um, phone company
4 representative that we heard yesterday, um, Mr.
5 Buting, I believe you were acting on behalf of
6 counsel at the time. Are you satisfied the
7 evidence that was permitted in yesterday
8 addresses that matter sufficiently?

9 ATTORNEY BUTING: Uh, in the sense that,
10 uh, the evidence I wanted to get in, came in,
11 yes. Uh, I'm -- I'm not commenting that it
12 satisfied me from an evidentiary reconciliation
13 type of perspective, but certainly the in -- the
14 information that, uh, I think, actually, the --
15 the witness that was present from Cingular on
16 that February 27 date wasn't as knowledgeable
17 about the records, and, actually, gave us some
18 incorrect information about what those, um, uh,
19 open versus unopened meant. And I think this
20 witness cleared that up and, uh, provided some
21 other helpful information. So, uh, I'm satisfied
22 that -- that we, uh -- we -- we got what we
23 wanted.

24 THE COURT: All right. I was not looking
25 for a stipulation as to the significance of any of

1 the testimony but, rather, whether the evidentiary,
2 uh, issue had been resolved, and I take it that it
3 has been?

4 ATTORNEY BUTING: Yes.

5 THE COURT: Uh, one other, uh, matter
6 that I wanted to address this morning was a, uh,
7 motion, uh, from Mr. Strang back on February 23
8 renewing the defense challenge to the, uh -- what
9 has been referred to in, um, earlier portions of
10 these proceedings, as multiple entries under the
11 November 5 search warrant.

12 Uh, I note that after the Court heard
13 argument from both parties on that date, um, I
14 indicated that I would not hear further from the
15 parties on the issue at that time, but because
16 there may be additional evidence yet to be
17 introduced, I would give the parties an
18 opportunity to argue the matter, um, further.

19 Um, to refresh everyone's memory, the
20 Court's understanding of the argument made by the
21 defense at that time was that it came in, uh,
22 three parts. Um, first of all, a challenge to
23 the sequential nature of the searches of the
24 defendant's trailer, garage, and surrounding
25 property.

1 Uh, second, a renewed argument, um,
2 under a **Franks** theory that the, uh,
3 representations of the State in the affidavit for
4 the November 5 warrant, uh, did not have a
5 factual basis.

6 And, third, there was a challenge which
7 the Court would consider to be more in the nature
8 of a new challenge rather than a refinement of
9 the old one, which related to the, uh, State's
10 alleged failure to search the burn area in a
11 timely manner, uh, to summarize it as the Court
12 understands it.

13 Uh, but with that background and my
14 understanding, uh, Mr. Strang, I'll hear from you
15 first.

16 ATTORNEY STRANG: Thank you. At the
17 time the, um, reply I intended to make to, uh,
18 Counsel's argument would have focused on, um, the
19 issue of abandonment, of, um, property that
20 Counsel argued as to items in the backyard or,
21 um, in what we've called the burn area. And as
22 I -- as I understood Mr. Fallon's argument, um,
23 it was that, um, Steven Avery had no further
24 privacy interest in anything that was found in
25 the, uh -- in the burn area, uh, and, therefore,

1 there just was not a Fourth Amendment interest at
2 stake.

3 Um, irrespective of how close the, um,
4 area was to the house or its -- or the -- the
5 private areas of the property, I think the
6 analogy Counsel drew was to garbage that's set
7 out on the curb for disposal, uh, or in -- in a
8 trash bin, that sort of thing, the idea, that,
9 uh, burning, um, is -- is an act of disposal, or
10 abandonment, or relinquishment than he took a
11 privacy interest in the -- in the items.

12 Uh, Counsel did argue that, uh, um, uh,
13 curtilage no longer is a dispositive concept, uh,
14 at least as the Wisconsin courts apply the Fourth
15 Amendment, and, uh, Article I, Section I of the
16 Wisconsin Constitution. And to an extent,
17 Counsel's right. It -- it's clear that courts
18 are getting away from arcane terms like curtilage
19 or, um, a mechanical assessment of, um, you know,
20 where a treeline is or where a picket fence may
21 be, um, so up to -- up to a point I agree with
22 Counsel on -- on his assessment of the
23 development of case law.

24 But it remains true that, um, areas of
25 a -- of a person's home and accompanied property

1 that he seeks to preserve for private use or the
2 intimate activities of life, uh, remain within
3 the scope of the Fourth Amendment, and, uh,
4 carried it to its ex -- extreme, and I don't know
5 that in the end Mr. Fallon would carry it this
6 far, but carried to its logical end, his argument
7 that curtilage doesn't matter, and that burning
8 is an act of destruction that relinquishes all
9 privacy rights for purposes of Fourth Amendment,
10 would mean that, uh, I have no privacy interest
11 in my fireplace in my living room. Which, of
12 course, just can't be.

13 And, here, I acknowledge that we're not
14 talking about a fireplace inside someone's living
15 room or home, we're talking about an area outside
16 of the immediate home. But what -- what we have
17 here is an area that is behind the garage, not,
18 uh, easily viewed from anyplace that, uh, an
19 uninvited visitor, or sales person, newspaper
20 delivery boy, or somebody -- post--- postal
21 carrier would likely be. Um, it's behind the
22 home.

23 And on the State's own theory here, um,
24 you know, if we accept the State's argument, the
25 theory of prosecution, then it is that Mr. Avery

1 burned bone -- bone, burned the body, and the
2 personal items of Teresa Halbach in that area.
3 We dispute that entirely, but -- but let's work
4 with the State's theory, uh, and that he did so,
5 not as an act of abandonment, but as an act of
6 concealment, uh, or -- or intention not to be
7 discovered, uh, on the crime that the State
8 contends he -- he committed.

9 Moreover, the State has educed evidence
10 that the doghouse and the dog, which associates
11 with Mr. Avery, were positioned in such a way as
12 to keep people away from the burn area. Um,
13 indeed, uh, when it suits the agents of the
14 State, they've argued here, that they couldn't
15 go. They were kept away from the burn area by,
16 uh, the dog, um, and the -- the -- the range of
17 its leash, the location of its doghouse.

18 So it -- it really is, I think,
19 inconsistent here for the State to argue that
20 Mr. Avery did not show a subjective interest in
21 the privacy of the area behind his garage. Um,
22 he did, and that subjective interest in privacy
23 is, uh, the first important aspect of standing or
24 the right to assert a Fourth Amendment claim.

25 And the other, then, is whether that

1 subjective assertion of a privacy interest is one
2 that society, at large, objectively, uh, views as
3 reasonable or recognizes, and I think here, uh,
4 it -- it's -- it's really beyond serious debate
5 that for an area 20 feet, or 40 feet, or whatever
6 it is behind your house, immediately behind your
7 garage, uh, in an area that looks like a
8 construction site to be situated in an area in
9 which the grass is mowed, it's a backyard that's
10 tended as the -- the evidence showed here. We --
11 you know, the photographs. I think, some of the
12 testimony referred to the grass being short and
13 mowed.

14 Uh, it's really beyond serious argument,
15 but that's sort of a -- an immediate backyard
16 area, um, is something in which the public, our
17 culture, doesn't recognize, a right to privacy.
18 Um, people do private things in the backyard.
19 It's a -- it's a different area of the backyard,
20 but there's a swimming pool, for instance, in the
21 backyard here as the Court has seen. There's a
22 back deck off the house. As I say, the -- the
23 area is mowed and tended as a lawn.

24 Farther out in that yard, um, than,
25 um -- than the burn area, there -- there are cars

1 to the south. They're, you know, lined up or
2 parked, um, not as if they belong to this -- the
3 business or the salvage property, uh, business,
4 but as if they are associated with the yard of --
5 of, uh, the red trailer which -- which clearly is
6 Steven Avery's building.

7 So, um, this is his pet. He keeps the
8 pet in this area, quite apart from whether it was
9 intended to exclude others. You keep your pet in
10 an area that you expect to be private, and, um,
11 don't expect others to be walking through or
12 disturbing your pet, at least where the pet is
13 leashed, uh, and housed as it was here.

14 So, um, I don't think that, uh, the
15 State can succeed at the threshold question here
16 saying that there was not, um, both a subjective
17 and objective reasonable privacy interest in this
18 area immediately behind Steven Avery's detached
19 garage in his backyard and, you know, just
20 several yards, uh, uh, away from his trailer.

21 So, um, that -- that at the time is when
22 I recall, um, wanting to add, um, by way of
23 reply, and I don't think there's much more I can
24 do to freshen my original arguments with the
25 evidence that we've heard since I've made them.

1 THE COURT: All right. Let me ask a
2 question with --

3 ATTORNEY STRANG: Sure.

4 THE COURT: -- respect to the burn pit
5 area. I understand the, um -- the -- the
6 challenges made to the searches of the trailer
7 and the garage, um, the -- there was a concession
8 that the initial brief sweep searches would not
9 have been the searches that count, but that the
10 lengthier searches shortly thereafter of the
11 garage and the trailer should have been the end
12 of it.

13 The, uh -- in reviewing my notes and --
14 and the argument with respect to the search of
15 the burn pit area, uh, the focus seemed to be on
16 the fact that, uh, well, the -- the State could
17 have searched it earlier, uh, the State could
18 have, uh, neutralized the dog that was guarding
19 the burn pit area, and searched it earlier, but
20 I'm not -- I guess it's not immediately apparent
21 to me what the significance of the timing of the
22 search of the burn pit area is, assuming it was
23 done within the time within which the State could
24 effectuate the warrant.

25 Uh, in other words, if it was done

1 later, uh, so what? Is -- is there -- I -- I
2 didn't -- I didn't detect in the argument a claim
3 that there were -- there was somehow an improper
4 multiple search of the burn pit area. So I want
5 to make sure I'm not missing your argument there.

6 ATTORNEY STRANG: Well, um, it -- it --
7 it's a very good question, and I -- and I'm --
8 I'm pausing only because I'm trying to remember,
9 um, when the first search warrant expired, or --
10 or would have expired on its own terms. I think
11 it was either the 9th or the 10th.

12 There's at least a second search warrant
13 obtained on the 9th, as I recall. Um --

14 ATTORNEY FALLON: I can help out. It
15 would have ex -- If the warrant was obtained
16 on --

17 ATTORNEY STRANG: The 5th.

18 ATTORNEY FALLON: -- Saturday, the 5th,
19 at 3:25 p.m., then, technically, according to
20 statutory interpretation, its arguable expiration
21 would have been Thursday, the 10th, at 3:25, if I
22 count correctly.

23 ATTORNEY STRANG: Yeah, I -- that --
24 that sounds -- that sounds right to me as a
25 matter of statutory expiration. Um, I think the

1 first search of the burn area is the 8th. Um,
2 off the top of my head, I'm not sure we had any
3 testimony about anything happening on the 9th in
4 the burn area. We certainly do on the 10th.

5 Um, and so the 8th would have been in
6 the -- within the statutory time, um, but, you
7 know, the statute isn't the begin -- isn't --
8 isn't the end of it. Um, what -- what we've done
9 here, if -- if the search of the Avery -- of the
10 Steven Avery part of this property reasonably
11 should have ended with the first thorough
12 searches on the evening of the 5th, or the
13 garage, I guess, at the latest, the morning of
14 the 6th, then holding the entire property and
15 excluding it from him unreasonably impinged on
16 his possessory interest.

17 And the Fourth Amendment protects the
18 privacy interest and also the possessory interest
19 that -- that we have, and there's really no
20 justification, once you complete the search of
21 the house and the garage, for not also completing
22 the search of the private areas associated with
23 those -- those two buildings. And from the 6th
24 on, you're unreasonably depriving this man of his
25 possessory interest in -- in his home, in the

1 place he lives.

2 Um, and, um, you know, I -- I don't rely
3 as much on the privacy interest in that yard as
4 to a first search, but, again, if the first
5 search isn't timely, isn't reasonably timely, and
6 he's being excluded from his possessory interest
7 in his home, um, and its, you know -- and it --
8 and its useful property, the private areas
9 surrounding the home, then you do trigger the
10 reasonableness requirement of the Fourth
11 Amendment as well, um, by the passage of time.

12 So I think the -- the search on the 8th
13 is -- is already beyond a reasonable time as a
14 matter of his possessory interest, and certainly
15 the work on the 10th, and the 11th, and whatever
16 is done after in the, uh, burn area, itself, um,
17 is outside the statutory limits of that warrant
18 and, um -- and -- and all the more unreasonable
19 just by virtue of further passage of time, um, in
20 which he's denied his possessory interest.

21 And then, also, the privacy interest is
22 triggered, again, as you have serial searches at
23 the convenience of law enforcement people rather
24 than recognizing this isn't their property, it's
25 someone else's property. They are the unwelcome

1 visitors. They are the intruders from the
2 standpoint of the Fourth Amendment, not the other
3 way around.

4 And, um, so you -- you have the privacy
5 interest escalating and being affected
6 unreasonably as time passes after the 6th.
7 That's not terribly articulate, but it did -- I
8 did, at least, answer the question.

9 THE COURT: All right. So the -- as --
10 as I understand it, it's not a -- so much a
11 parallel argument to the garage and the house and
12 that there were improper multiple searches made
13 of the burn area, but, rather, once the house and
14 the garage searches were completed, there was
15 adequate time to also search the burn area had
16 the State wished, and because they didn't,
17 therefore, it should be suppressed?

18 ATTORNEY STRANG: Yes. And the backup
19 argument, then, is that anything after the first
20 search on the 8th also triggers the serial search
21 concern, and -- and really the 10th -- um,
22 because the searching on the 10th, as I -- I may
23 be wrong about Mr. Pevytoe's testimony. I -- I
24 know he arrives in the afternoon on the 9th, and
25 I guess I don't remember right now, but I can

1 look at my notes. Um --

2 THE COURT: Well, let me address that,
3 though. The --

4 ATTORNEY STRANG: Sure.

5 THE COURT: I thought that the State's
6 argument that the searches of the house and the
7 garage were completed earlier was premised on
8 statements from the officers who participated that
9 they had found everything that they wanted after
10 what the defense characterized as the search. The
11 difference with the burn area is, it's my
12 understanding that the initial items found on the
13 8th immediately triggered a desire to search it
14 further because it looked like burn fragments, and
15 then later people who knew more about it came in.
16 Maybe I'm missing --

17 ATTORNEY STRANG: No --

18 THE COURT: -- something.

19 ATTORNEY STRANG: -- I -- I think that's
20 right. And there -- there -- there was initial
21 searching on the 8th as I recall. Um, and then
22 I'm trying to remember when -- I was just trying
23 to remember when the search on the 10th starts,
24 and if -- if Mr. Pevytoe or Mr. Ertl gave us a
25 time of day. I didn't note it in my notes. I

1 apologize. Um, but -- but, as I say, by the
2 10th, you're in the serial searching and you're
3 also, at some point, bumping up on the -- the
4 statutory expiration of the warrant.

5 So that -- that would be the -- the
6 second or alternate argument that -- that we're
7 making in that respect.

8 THE COURT: Okay. Mis -- Mr. Fallon?

9 ATTORNEY FALLON: Thank you, Judge. The
10 hallmark of any interpretation or application of
11 the Fourth Amendment under current standards is
12 reasonableness. And reasonableness is determined
13 by the totality of the circumstances under which
14 an exercise of judgment occurs. And, in effect,
15 that's what we have here, an exercise of judgment
16 based on an assessment of facts.

17 The testimony educed during the course
18 of the trial does nothing to undermine the
19 original Court's ruling on the motion to suppress
20 and the lengthy briefing that occurred in
21 relation thereto.

22 In fact, I would argue to the Court that
23 the testimony, uh, elicited during the course of
24 the trial does nothing but further support,
25 further augment, and demonstrate the

1 reasonableness of the law enforcement efforts
2 involved in this case. Uh, and not to --
3 unnecessarily redundant, but I think it certainly
4 bears in mind that we're looking at a piece of
5 property of approximately 40 acres in size, with,
6 as I recall, 15 buildings in total, 4 residences,
7 and somewhere between 3,800 and 4,000 junked
8 cars.

9 It is within that context that law
10 enforcement obtained and executed a search
11 warrant on Saturday, November 5. As -- as I
12 indicated, I believe the warrant -- uh, they
13 returned to the property with the warrant at
14 about 3:25 p.m. on Saturday, began execution
15 thereof short -- shortly thereafter.

16 Again, I focus the Court's attention on
17 the fact that there were searches on Saturday,
18 two sweeps and one initial search on Saturday
19 evening, which are apparently not at issue.

20 The first search of the garage on
21 Satur -- on Sunday morning is not at issue. And
22 as a result, we're looking at sub -- subsequent
23 searches to each of those locations.

24 Again, the premise upon which the
25 Court's original decision was made remains firm

1 and is still a valid premise, it's still a valid
2 justification for denying the motion to suppress,
3 and that is, there was one warrant and one
4 continuous ongoing search of various locations.

5 The defendant's argument has legs. It
6 holds water if, and only if, one looks at it in
7 one microscopics point in time and one location
8 in time.

9 As the testimony of Agents Fassbender,
10 uh, and Investigator John Ertl from the Crime
11 Lab, uh, even Mr. Wiegert yesterday, and numerous
12 other officers, including, interestingly enough,
13 Special Agent Pevytoe, yesterday, indicates that
14 he was, um, bouncing around on a -- various sites
15 on both Friday and Saturday, uh, touching base
16 with colleagues on other locations both in the
17 salvage yard and beyond the salvage yard. So you
18 have one continuing search.

19 I find Counsel's argument most
20 interesting with respect to the burn pit, that
21 that's somehow not to be considered part of the
22 search or that somehow law enforcement should
23 have, uh, worked in the pit, as it were, sooner
24 than they did.

25 Um, let me digress here momentarily to

1 make one observation with respect to, uh, the
2 privacy interest or this whole curtilage argument
3 and just make one observation. Just because
4 someone evinces a motive to conceal, and just
5 because they take acts in furtherance of their
6 concealment, and just because they exercise
7 dominion or control over a particular item,
8 doesn't necessarily, under all sets and
9 circumstances, uh, establish a privacy interest
10 in the area which society is necessarily, uh,
11 expected to honor and accept, as reasonable,
12 under all the circumstances.

13 And, again, I come back to that point.
14 There is nothing that refutes the argument that
15 that burning, whether it's in a burn barrel on
16 the side of the road containing cell phone parts,
17 or a burn pit in the back of -- uh, from which
18 remains of a person are obtained, there's nothing
19 there that, um, disputes the fact that the
20 concealment, uh, also, in this case, goes hand in
21 hand with the a -- a -- abandonment -- uh, the
22 abandonment of whatever is in those items.

23 But, again, that's a digression, because
24 the Court need not reach that argument, although
25 I think it's supportive of the State's position.

1 What you have here is a continuing execution of a
2 search warrant. Day by day methodical process
3 engaged in by law enforcement based on -- upon
4 arra -- available resources, based upon
5 information which was coming in, literally, by
6 the hour, making an assessment as to its
7 importance, the need for the, um, dispatchment of
8 resources to address discoveries and the whatnot.

9 And in this particular case, uh, as
10 indicated, um, search of the burn pit was not
11 exactly the highest priority, nor was its
12 evidentiary significance apparent on Saturday or
13 Sunday. And -- and we have numerous bits of
14 testimony from Agents Fassbender and Mr. Ertl,
15 and the, uh, uh -- the handlers of the human
16 remains stuff.

17 But, again, returning to the question of
18 the pit in -- inferentially, I see nothing in
19 their argument that makes any sense whatsoever
20 about why the search of the pit is somehow
21 invalid because it occurs on the 8th, because it
22 occurs at that time upon the discovery of -- of
23 what looks like a piece of human bone in the
24 grass near the pit, which then draws the
25 attention of law enforcement officers and they

1 begin to work that information.

2 And, next, I would point out that, um, a
3 second warrant, and I'm not even convinced that
4 it was required, but, clearly, in a precautionary
5 safety mode effort, the officers did apply and
6 renew the original search warrant on Wednesday
7 afternoon, and that search warrant, as noted in
8 previous proceedings, was executed on Thursday.

9 Interestingly enough, um, Special Agent
10 Pevytoe had already begun working the pit. As I
11 recall his testimony quite clearly yesterday in
12 response to my question, he began Thursday
13 afternoon, shortly after the noon hour, after
14 working all morning here in Calumet County
15 sifting debris which is a -- was obtained from
16 that very same burn pit, mind you, uh, here at
17 the Sheriff's Office on Thursday morning.

18 He returned to the scene at that time
19 with the needed equipment and personnel to begin
20 processing this scene in greater detail. And by
21 the scene I mean the burn pit. So that
22 processing began, uh, on Thursday afternoon and
23 went late into the night as we heard Agent
24 Pevytoe describe.

25 So, clearly, we have a continuing

1 search, uh, based upon an evaluation of what has
2 occurred. What do we know so far? Uh, we had,
3 as Special Agent Sturdivant said with respect to
4 the pit, those bone fragments. I made the call.
5 I made the decision. I wanted to know if those
6 were human remains. I wanted to know if there
7 was reason to look at this pit more closely. I
8 wanted to know if they were Teresa Halbach's
9 remains. We packaged up as many as of we thought
10 were bones, sent them to the Crime Lab. They
11 made their way to Ms. -- to Dr. Bennett.

12 I believe we heard some testimony on,
13 uh, who in -- initially was able to make a
14 determination on Wednesday that there were some
15 human remains. And then, of course, we heard
16 testimony from Dr. Eisenberg that she began her
17 involvement on Thursday, the 10th. And,
18 interestingly enough, as we've heard from Agent
19 Pevytoe, there was discussion between, uh,
20 herself and Agent Pevytoe about the status of the
21 affairs at that time.

22 So, clearly, law enforcement's efforts
23 here, I premise all that, or put that all out
24 there, as evidence of the reasonableness of the
25 efforts undertaken by the officers to search what

1 they searched, when they searched it, and why
2 they did it, and the manner in which they did it,
3 because all those factors go back, again, to the
4 reasonableness of the manner of which the
5 searches were carried out.

6 And I think it's -- it's quite apparent
7 here, more important, to note that there's not
8 just one, but there were two search warrants here
9 authorizing the -- the efforts of law enforcement
10 here. And, again, any evaluation of
11 reasonableness must take into, um -- into, uh --
12 lost my train of thought -- must take into
13 account all of the facts, all of the
14 circumstances of what was being searched, not
15 just the 40 acres.

16 Uh, there were searches of all of the
17 surrounding gravel pits areas. There were, uh,
18 uh, the Radandt fre -- uh, gravel pit area, there
19 was the markings, uh -- the exhibit number
20 escapes me at the moment -- that, uh, Counsel
21 displayed even as late as yesterday in his
22 examination of Agent Pevytoe. There were
23 multiple sites. Uh, we had the, uh -- the -- the
24 Maribel park incident that pulled resources away.

25 So they were attempting to respond to

1 what they thought was the most important, most
2 needed information to be, uh, assessed and
3 addressed, and proceeded in accordance therewith.

4 So without repeating, uh, the arguments
5 any further than were made both in the briefs, in
6 which I note that abandonment was argued in the
7 briefs, as well as inevitable discovery premised
8 upon the additional warrant, all of this has
9 already been set forth in written argument and
10 the subject of the Court's previous decision.

11 So, in effect, we see nothing in the
12 evidence educed at trial which should cause the
13 Court to rethink that decision, and we ask the
14 Court not to, and continue to rule the evidence
15 admissible for proper jury consideration. Thank
16 you.

17 THE COURT: Anything else, Mr. Strang, on
18 that motion?

19 ATTORNEY STRANG: No. I -- I -- I think
20 a great deal has been said and I -- I'd probably
21 be repeating myself.

22 THE COURT: Very well. Uh, there's
23 another -- There is another, um, outstanding, uh,
24 motion, uh, regarding the, uh, renewal by the
25 defense of its, uh, fair forensic testing, uh,

1 motion. I know that, uh, originally I believe
2 Mr. Buting argued it for the defense and Mr. Gahn
3 wanted a chance to respond.

4 ATTORNEY FALLON: Uh, he did. Uh, as,
5 uh, indicated by, uh, Mr. Kratz, Mr., uh, Gahn
6 had some transportation issues. We expect his
7 arrival about 10:30, if that would be all right,
8 if we could defer that one until a little bit
9 later?

10 THE COURT: Very well. That's, um, what I
11 have as far as the inventory of -- of outstanding
12 prior motions. Uh, the Court understands that the
13 defense has a motion, or some motions, uh, to raise,
14 uh, following the close of the State's case. Uh --

15 ATTORNEY STRANG: Yes.

16 THE COURT: Who -- who wishes to be heard
17 on that?

18 ATTORNEY STRANG: I -- I'll -- I'll be
19 happy to argue those, Your Honor. The -- the
20 State now having rested its case in chief, um, my
21 motion is for judgment of acquittal on all four
22 counts, uh, now under consideration, and -- and
23 I -- I don't know if there's been a second
24 Amended Information filed or not. I maybe just
25 don't remember right now, but we've -- we've at

1 least referred to the four remaining counts here
2 as, uh, Count 1, first degree intentional
3 homicide; uh, Count 2, I think, is mutilating a
4 corpse; as I recall, Count 3 is the felon in
5 possession of a firearm count; Count 4 is, uh,
6 false imprisonment. So I move for a judgment of
7 acquittal and dismissal, uh, on all four counts.

8 Um, the -- the -- the argument I make,
9 uh, as to all four is that all of the evidence
10 presented in the State's case in chief, viewed in
11 the light most favorable to the State, drawing
12 all reasonable inferences, um, in favor of the
13 State at this point, but, of course, drawing no
14 unreasonable inferences that way, um, still, um,
15 by that standard, the evidence is insufficient to
16 warrant a reasonable fact finder in returning
17 verdicts of, uh, guilty on any of the four counts
18 under consideration, um, so whether we call it a
19 directed verdict or dismissal, uh, or an
20 acquittal, um, the relief we seek, uh, really is
21 the same, functionally, uh, now that the State
22 has rested its ca -- its case.

23 That's, as I say, the -- the -- the
24 general argument, and as to the first three
25 counts, I'll -- I'll stand on that argument.

1 I do want to amplify with some more
2 specific comments on Count 4, the false
3 imprisonment charge. When Mr. Avery first was
4 charged with murder of Teresa Halbach in
5 November, 2005, um, he faced two charges with
6 respect to that core set of allegations by the
7 State. One charge was first degree intentional
8 homicide and one was mutilating a corpse. Those
9 were joined, I think, without objection from the
10 defense, with the very first charge filed against
11 Mr. Avery as a matter of chronology under this
12 case number, which was the felon in possession of
13 a firearm, or at least that was the, uh -- the
14 warrant on which he was arrested.

15 So those three charges together stood
16 until, um, the State, uh, obtained some
17 statements from Brendan -- Brendan Dassey in the
18 end of February and the first day of March, 2006.

19 On March 1 and March 2, 2006, as this
20 record shows, and as we -- we had discussed a
21 number of times, uh, agents of the State appeared
22 at televised news conferences and laid out a
23 chilling, gripping story of the last minutes, or
24 perhaps hours, of Teresa Halbach's life. And
25 that story, in large part, was reflected in the

1 Criminal Complaint about -- at about the same
2 time against Brendan Dassey, and much of that
3 story found its way into the Amended Criminal
4 Complaint against Steven Avery, but added three
5 more charges. Those were first degree sexual
6 assault, kidnapping, and false imprisonment.

7 Added so far as the Complaint made
8 clear, and so -- insofar as any viewer of these
9 news conferences would have concluded, added on
10 the basis of Brendan Dassey's supposed confession
11 and allegations.

12 Now, we argued at -- at the time, I
13 think indisputably, the inadmissible nature of
14 Brendan Dassey's statements against Mr. Avery.
15 We lost that argument.

16 We sought to subject the new allegations
17 to the minimal testing of a preliminary hearing.
18 We lost that argument.

19 We sought an interlocutory appeal, or a
20 permissive appeal, because we thought strongly
21 that Wisconsin law required the ta -- the State
22 to put up or shut up to some degree, at least to
23 a probable cause level of admissible evidence, on
24 those three new charges. The Court of Appeals
25 declined to hear the permissive appeal.

1 This Court raised, by 50 percent, as I
2 recall, Mr. Avery's cash bail on the basis of the
3 new allegations attributed to Brendan Dassey.
4 And shortly before this trial, two of those three
5 added charges the State abandoned, acknowledging
6 the obvious to everyone else that the State
7 couldn't prove first degree sexual assault, the
8 State couldn't prove kidnapping, the State had no
9 admissible evidence. Indeed, I'm not sure the
10 State has inadmissible evidence to support those
11 two charges.

12 But over my objection, and in the face
13 of my motion to dismiss false imprisonment as
14 well, the State persisted, asserted its right to
15 decide what to go to a jury on, and at least
16 implicitly represented to the -- to this Court
17 that it would offer evidence sufficient to
18 establish at least the false imprisonment charge
19 that it wished to present. So that -- The Court
20 acceded to -- to the State's request, and we all
21 have to acknowledge that the prosecution, in
22 general, gets to decide, uh, what charges to go
23 forward to on those that have been bound over and
24 on which the defendant has been arraigned, and I
25 said at the time that if the State fell short, I

1 thought there might be grounds for a mistrial.

2 Why? Because the false imprisonment
3 count here is the last vestige of the
4 unsupported, inaccurate, uncorroborated claims of
5 Brendan Dassey that were broadcast by agents of
6 the State to everyone who had a TV turned on in
7 this part of the state that threatened the right
8 to a fair trial, that threatened the right to
9 have a jury drawn from the venue in which this
10 cr -- crime was charged, and that curled the hair
11 of anyone who listened to the description of a
12 naked woman manacled to a bed, sexually
13 assaulted, stabbed, throat cut, strangled when
14 slashing of her throat didn't kill her, and then
15 only later, a corpse, shot 11 times. That was
16 the story. That was the horror story that was
17 present. And the false imprisonment charge, as I
18 say, is the last vestige of that horror story.

19 And the State went forward with it. And
20 what we have here, now that the State has
21 presented its entire case in chief, what we have
22 here is nothing to support a belief that Brendan
23 Dassey had anything to do with Steven Avery on
24 October 31, 2005. Nothing to support the notion
25 that he had anything to do with anything criminal

1 in which Mr. Avery may have been engaged.

2 Again, giving the State the benefit of
3 all reasonable inferences and viewing the
4 light -- the evidence in the light most favorable
5 to the State, anything Mr. Avery may have done on
6 October 31, there is nothing that has been
7 presented to show that Brendan Dassey had a
8 culpable connection to any of it. There is
9 nothing to suggest that Ms. Halbach ever was in
10 Mr. Avery's bedroom, let alone restrained there,
11 let alone assaulted there, let alone stabbed
12 there, or with her throat slashed.

13 Indeed, the physical evidence beyond
14 serious dispute, beyond peradventure that
15 physical evidence has destroyed or revealed the
16 inaccuracy of that horror story. It was a fable.
17 An ugly, horrific fable, but a fable, all the
18 same, belied by the physical evidence and by the
19 testimony in the State's own case in chief.

20 And we now learn that the cause of
21 death, in the State's view, isn't stabbing, it
22 isn't throat-slashing, it isn't strangling. What
23 is it? It's two gunshot wounds to the head. The
24 gunshot wounds that, according to the Complaint
25 and the news conferences, were supposed to have

1 been fired after she was dead, now become the
2 cause of death. Not 11, but 2.

3 Do we know at all? Do we have any basis
4 to draw reasoned inference from the State's case
5 in chief about where those gunshots were fired?
6 From how far away? In what position Ms. Halbach
7 was at the time? Whether she was alive at the
8 time? Who fired the gunshots? On that, we have
9 evidence that the gun that fired at least one of
10 the bullets was found in Steven Avery's bedroom,
11 and that shell casings found in the garage were
12 identified, also, as having been fired by that
13 gun.

14 So, again, viewing the light in -- or
15 the evidence in the light most favorable to the
16 State, one might say that a reasonable jury,
17 perhaps, could find that Mr. Avery was the one
18 who fired the bullet that later we are told has
19 Teresa Halbach's DNA on it. I don't think that's
20 a reasonable interpretation of the evidence as a
21 whole, but let's spot the State that one. We
22 still don't know where, when, from how far away,
23 or in what condition Ms. Halbach was at the time.

24 And to the extent that the State's
25 evidence has put her in Mr. Avery's house at all,

1 the rich irony, of course, is that that rests --
2 that inference rests on one offhand statement of
3 Mr. Avery to which Detective Remiker testified, a
4 statement of the defendant that was undisclosed
5 with which we were caught at surprise at this
6 trial.

7 And beyond that, what we have here,
8 viewed in the light most favorable to the State,
9 is Bobby Dassey's testimony that he saw Ms.
10 Halbach walking toward Steven Avery's trailer.
11 Not that she went in, not that Mr. Avery had any
12 interaction with her, but saw her walking toward
13 his trailer after taking photographs of the van.
14 That's it.

15 No reasonable jury here, viewing the
16 light -- the evidence in any light, could infer,
17 reasonably, from here that Ms. Halbach was
18 restrained or confined by Mr. Avery in his house
19 in any way. Of course, walking into somebody's
20 house isn't an unlawful confinement or restraint.
21 We do that all the time. People visit other
22 people's homes. Strangers are admitted. That's,
23 in itself, no proof of an intentional and
24 unlawful confinement or restraining. And, at
25 best, that's what the State has as to the home.

1 The State has no evidence at all putting
2 Teresa Halbach, herself, in the garage. Her
3 blood isn't found there. What is found there is
4 a bullet, four months later, on which her DNA is
5 identified. Not her blood, but her DNA.

6 How the bullet comes to be there we
7 don't know, but it's lying out on the floor under
8 an air compressor four months after the garage is
9 searched repeatedly, and that's the only
10 connection, immediate though it is, between
11 Ms. Halbach and the garage as a possible place of
12 confinement.

13 Moreover, if she ever was in the garage,
14 we don't know. We have no evidence on which we
15 can do anything more than speculate that she was
16 alive when she was in the garage. And while you
17 certainly can mutilate a corpse, or treat a
18 corpse unlawfully, you can't confine or restrain
19 a corpse. And this Court acknowledged that in
20 its preliminary instructions to the jury on the
21 essential elements of false imprisonment under
22 Section 940.30 of the Wisconsin Statutes. So the
23 garage isn't a place in which a reasonable jury
24 can find Ms. Halbach was restrained or confined
25 under any view of the elements.

1 And that leaves the Toyota by my lights.
2 The Toyota has, uh, bloodstains in the rear cargo
3 area that a reasonable jury certainly could
4 conclude were made by bloodied hair up against
5 the passenger side wheel well of the rear cargo
6 area. A reasonable jury certainly could conclude
7 that this was Teresa Halbach's blood. There was
8 ample testimony from Sherry Culhane to warrant
9 that conclusion.

10 But if the State's theory is, as it now
11 apparently is, that the cause of death was being
12 shot in the head twice, two gunshot wounds, the
13 State presented that evidence from Leslie
14 Eisenberg and from Dr. Jeffrey Jentzen, then
15 Teresa Halbach was dead when her hair was
16 bloodied by a hole in the occipital bone and a
17 hole in the parietal bone. We have nothing else
18 here. Nothing on which a reasonable inference
19 would arise, from which an infer -- a reasonable
20 inference would arise that there was any other
21 reason for bloodied hair but two gunshot wounds
22 to the head.

23 Now, if that happened, if that was the
24 cause of death, highly speculative, but let's set
25 that aside for the sake of argument, if that was

1 the cause of death, then, again, it's a body in
2 the back of the Toyota, not another person. Not
3 a living human being. Not only is that the -- a
4 reasonable inference, it's the only reasonable
5 inference if one credits the State's cause of
6 death. The State has produced no other evidence
7 that would suggest another cause of death.

8 So what we're left with in the end is
9 nothing on which a reasonable jury, acting on
10 evidence and reasonable inferences from evidence
11 rather than on horror stories or fables or
12 imagination or guesses, could come to a conclu --
13 conclusion here that the State in its case in
14 chief has proven the essential elements of false
15 imprisonment beyond a reasonable doubt.
16 Beyond -- Nothing that would allow a reasonable
17 jury to find those essential elements proven
18 beyond a reasonable doubt.

19 So I'm asking the Court to, in a sense,
20 ratify what the State has already done, which is
21 the abandonment of this charge and the
22 abandonment of a theory that Brendan Dassey had
23 anything to do with this or that the story that
24 Brendan Dassey told under police questioning has
25 any veracity, corroboration, or foothold in the

1 evidence presented at this trial.

2 THE COURT: Before I hear from the State,
3 uh, I'm going to check something in my office.
4 We're going to take a five-minute break and we'll
5 come back.

6 (Recess had at 10:03 a.m.)

7 (Reconvened at 10:11 a.m.; jurors not
8 present.)

9 THE COURT: Who will be arguing this motion
10 for the State? Mr. Kratz?

11 ATTORNEY KRATZ: Yes. Thank you, Judge.
12 The posture -- procedural posture of this
13 particular argument is hardly unique to the case
14 of, uh, State vs. Avery. Any serious, um, case,
15 or any, uh, defense attorney, uh, worth, uh, his
16 weight at all, brings motions to dismiss at the
17 close of the, uh -- the State's case, and, uh,
18 although, uh, not at all meaning to, uh, demean
19 or to discredit the defense attorney's, um,
20 bringing this particular motion, uh, it is, uh,
21 procedurally very common.

22 That having been said, Your Honor, the
23 standard that the Court must apply, Mr. Strang
24 has, uh, accurately indicated, uh, that is, in
25 considering the light -- or excuse me,

1 considering the evidence in the light most
2 favorable to the State, the evidence, uh, if,
3 believed, uh, and, uh, if rationally considered
4 by the jury, would be sufficient to prove the
5 defendant's guilt beyond a reasonable doubt.

6 Importantly, in this case, uh, is the
7 jury instructions that not only talk about direct
8 evidence, but also include that of circumstantial
9 evidence, because this jury, and, uh, at least
10 by, um, application to this motion, this Court
11 can and should not only consider direct evidence
12 that has been, uh, presented, but, also,
13 reasonable inferences. That is, any inference
14 that -- and in -- in this posture, that this
15 Court could, uh, reasonably infer, uh, based upon
16 a fair consideration of all the evidence in the
17 case.

18 Mr., uh, Strang, although arguing for
19 dismissal of the, uh, first, uh, three counts,
20 makes no specific, uh, arguments, uh, as to those
21 bases, uh, most of his, uh, argument as to the
22 Count 4, which is, in fact, included in the
23 second Amended Information, uh, which is a charge
24 of false imprisonment, and, therefore, my, uh,
25 response to Mr. Strang will, uh, in kind, uh,

1 most, uh, predominantly, uh, relate to that
2 count.

3 False imprisonment, as this Court knows,
4 uh, is a count which does not usually, uh, stand
5 alone. False imprisonment is a crime that is
6 usually charged with another more serious crime.
7 In this case, a homicide. Sometimes, uh, a
8 sexual assault, sometimes a carjacking, or
9 robbery, or, uh, something like that. But it is,
10 uh, almost by definition, a crime of motive.
11 That is, requires juries to consider why. Why is
12 somebody confined? Why is somebody restrained?
13 Why is somebody, uh, held or compelled, uh, to
14 remain in a place against their will? Again,
15 usually in conjunction with another crime.

16 And although it would be a luxury, uh,
17 to have, uh, whatever evidence the State might,
18 uh, believe, uh, it has available to it, uh, and,
19 most notably, and, uh, I guess, most pointedly to
20 Mr. Strang, uh, noting Mr. Dassey's, uh,
21 involvement, Mr. Dassey's statement, uh, and
22 although academically we can talk about, well, if
23 the State had Mr. Dassey available and had his
24 testimony available in this case, uh, what might
25 this jury consider?

1 The fact of the matter is, Judge, we
2 don't. We don't have Mr. Dassey available. And
3 so you, the Court, and the jury, eventually, will
4 have to consider the evidence that is before it,
5 not the evidence that might be, or the evidence
6 that's been excluded, or the evidence that has
7 been ruled unavailable to the State, but that
8 which the State does have. And, again, we're
9 entitled at this stage of the proceedings, uh, to
10 have this Court consider not only the evidence,
11 but the inferences that may draw therefrom.

12 I mention, Judge, that the false
13 imprisonment, uh, count, itself, is a charge of
14 motive. Uh, that is, the "why". And, as Mr.,
15 uh, Strang, digressed, uh, at least briefly, to,
16 uh, some procedural parts of this case, uh, I
17 feel it necessary to do the same. The State
18 attempted in this case to show this jury, uh, the
19 why. That is, why would this kind of crime --
20 why would the very crime, the false imprisonment,
21 have taken place?

22 Uh, on nine separate motions brought by
23 this State, uh, we were unsuccessful in something
24 called "other acts motion". That is, uh,
25 attempting to show this jury, uh, the very

1 history of this man, Mr. Avery, uh, of his, uh,
2 not only violent history, uh, but also his, uh,
3 very history of assuring compliance, uh, with,
4 uh, other young women at gunpoint. Uh, that, uh,
5 if, uh, allowed in this case, uh, may very well
6 have ended this discussion right there.

7 But, again, we don't have those kinds
8 of, uh, evidence available, at least,
9 unfortunately, in the State's perspective, uh, to
10 present or to argue in this case.

11 Importantly, or maybe just as
12 importantly, uh, during this trial, uh, we
13 attempted to provide and have the jury consider
14 evidence of Ms. Halbach, herself, and her state
15 of mind. That is, whether Ms. Halbach would
16 voluntarily go into Mr. Avery's trailer. The
17 Court may remember the testimony of Ms. Pliszka,
18 uh, when the State at least elicited, or
19 attempted to elicit, testimony about a prior
20 contact between Ms. Halbach and Mr., uh, Avery,
21 where Ms. Halbach felt creepy, uh, about Mr., um,
22 uh, Avery, and that, uh, she very much would not
23 have voluntarily gone into Mr. Avery's trailer.

24 And although not available, uh, to the
25 State in -- at least for, uh, this part of the

1 trial, uh, I make -- uh, I may renew, as this
2 trial goes forward, uh, our request to introduce,
3 uh, just that evidence. But we are, as I
4 mentioned, entitled to inferences. And the
5 inferences still available, that is, that
6 Ms. Halbach would not voluntarily go into Mr.,
7 uh, Avery's trailer, would not, certainly, uh,
8 voluntarily, without compulsion, or without being
9 compelled, uh, remain there where harm could come
10 to her.

11 So back to my original premise, Judge,
12 that this is a crime of motive, that is, a crime,
13 uh, typ -- typically accompanied by a more
14 serious crime or series of crimes, I'm asking
15 this Court at this stage of the proceedings to
16 consider all of the evidence and to consider the
17 in -- the inferences that may draw therefrom.

18 The Court can probably, uh, uh,
19 understand that these kinds of crimes are not
20 usually committed with lots of witnesses around.
21 In this case there's no victim to tell the story,
22 uh, of what happened, and so, necessarily, the
23 jury, and in this case the Court, will have to
24 rely upon those inferences.

25 The State believes, Your Honor, uh, that

1 inferences can be drawn in this case. First of
2 all, the State can and is asking this Court to
3 draw the inference that the defendant's motive,
4 that is, his request to have Ms. Halbach come to
5 his property, was not an innocent, uh, request,
6 was not an innocent motive.

7 We've argued that he's lured Ms. Halbach
8 to his property by using the name, B. Janda.
9 Although Mr. Strang may argue that one inference,
10 uh, may be that that is innocent in nature, uh,
11 the State is entitled to an inference that
12 supports conviction. That is, that it's not a
13 coincidence that Mr. Avery used an alias, used a
14 different name to lure Ms. Halbach.

15 That becomes important when we talk
16 about the second part of this case. That is,
17 when Ms. Halbach actually gets to the property.
18 We've heard testimony from Bobby Dassey, uh, that
19 he saw Ms., uh, Halbach walk towards the trailer.
20 That he took a shower, and when leaving to go
21 hunting, uh, and coming out to, uh, his truck, he
22 saw nobody in the vicinity of, uh -- did see Ms.
23 Halbach's vehicle.

24 We're entitled at that point, Judge, to
25 the inference that Ms. Halbach is inside of

1 Mr. Avery's trailer. Uh, although Mr., uh,
2 Strang characterizes that as speculation, uh, the
3 State certainly believes that that is a
4 reasonable inference not just that this Court can
5 draw, but that a jury, eventually, uh, can draw.

6 We have to, for the next inference,
7 Judge, go to the end of the case, uh, in order
8 to, uh, ask the Court to draw the inferences in
9 the middle, and that is, where is Ms. Halbach
10 killed? The State believes, as Ms. Strang --
11 Mr. Strang has, uh, accurately indicated, that,
12 uh, Ms. Halbach was killed in the garage.

13 I think it is, um, uh, although an
14 inference, not a reasonable inference, uh, that
15 Ms. Halbach was shot, uh, while she was al --
16 already in a -- a -- a -- a -- a state of being a
17 corpse when she was deceased, the reasonable
18 inference is that you shoot somebody in the head
19 to cause their death.

20 And so where this happened, as Mr., uh,
21 Strang I think rhetorically asked, although I
22 will answer that question, the inference is, in
23 the garage, because the bullet, uh, which passed
24 through Ms. Halbach's body, is in the garage.
25 You've heard testimony, Your Honor, as to the

1 weapon that was used, by experts, as to the shell
2 casings that came from that weapon, as to the
3 bullet that came, uh, from that weapon, to the
4 exclusion of all others.

5 And so while Ms. Halbach was killed in
6 the garage, and while she -- the inference was
7 earlier in Mr. Avery's trailer, the inference
8 that we're asking this Court, and eventually the
9 jury, to draw, is that, uh, she is transported
10 from the trailer to the garage.

11 We're asking, Judge, and I think
12 reasonably, uh, asking, that the inference is
13 also that she wouldn't do that voluntarily.
14 Again, not just because of the statements of
15 friends and family, Mr. Pearce, and others, uh,
16 as to warnings as to not going into individuals'
17 homes and the like, uh, but just the surrounding
18 circumstances, and circumstantial evidence, and
19 common sense, uh, should dictate, uh, that she
20 would not, uh, go from a place, that is, from a
21 trailer, uh, to a place, uh, where she was killed
22 in the garage without being compelled to do so.

23 Again, Judge, there may be other
24 reasonable inferences. There may be other
25 inferences that can be drawn. But at this stage

1 of the proceedings we are entitled to the Court's
2 inference that supports a conviction. We're
3 entitled to those reasonable inferences, uh,
4 that, if believed by a jury, would lead to a
5 conviction. Permis -- permissive inferences, uh,
6 are not, again, just unique, uh, to this part of
7 the proceedings, um, but are, uh, oftentimes
8 applied by juries when I mentioned the
9 consideration of circumstantial evidence.

10 There aren't very many cases as, uh, we
11 discussed, at least, uh, parenthetically, uh,
12 yesterday directly on this topic, uh, although
13 there are some cases on false imprisonment,
14 itself, and many of those cases are reflected or
15 adopted in the jury instruction, itself,
16 Instruction 1275, uh, when, uh, false
17 imprisonment, or the confinement, or restraint
18 can be proved by acts, by words, or by a
19 combination, uh, of the two, uh, and so the
20 combination here of acts, uh, or words, the acts,
21 of course, uh, being the, uh, pointing, uh, of a
22 firearm at another, uh, the words, uh, whatever
23 there may -- they may have been, all do, uh, I
24 believe, uh, support the reasonable inference
25 that Ms. Halbach's, uh, freedom of movement was

1 compelled. That is, that she did not go
2 voluntarily to the garage, the ultimate place
3 where she was killed.

4 Once again, Judge, uh, we are not here,
5 we are not before this Court, uh, arguing
6 whether, uh, the case, uh, is proved, uh, beyond
7 a reasonable doubt. Simply, if a jury, or if
8 this Court at this time, when considering the
9 facts in a light most reasonable and most
10 favorable to the State, would, um, uh, support a
11 conviction, and it does.

12 Uh, we have, uh, other evidence. I'm
13 not going to belabor the point as to the where
14 and the when, uh, statements, uh, by, uh,
15 Mr. Fabian, uh, statements by others, uh, who may
16 place a timeline as to where Ms. Halbach was or
17 what, uh, she may have been doing.

18 Uh, the bottom line, uh, does, however,
19 suggest, I think, quite reasonably, uh, that her,
20 that is, Ms. Halbach's, uh, freedom of movement
21 was, in fact, uh, restrained, was -- she was, in
22 fact, confined, uh, that she was deprived of that
23 freedom of movement that, uh, individuals do
24 enjoy, that physical force, uh, although not
25 required, uh, I think it certainly was, uh, used

1 in this case, or at least threatened, uh, by use
2 of a -- a firearm, and the State is entitled to
3 those inferences.

4 Again, not what evidence that the State
5 wishes, uh, we could, uh, have presented in this
6 case, but the inferences from the evidence that
7 we have educed, uh, we do believe supports a
8 conclusion that the Count 4, the 4th count of the
9 Information, that is reasonably included in this
10 case, is supported by the evidence.

11 We'll ask the Court at this time to deny
12 the, uh, defense's motion, uh, for an acquittal
13 or for dismissal, uh, at this stage of the
14 proceedings, that is, after the State has rested
15 its case in chief. That's all I have, Judge.
16 Thank you.

17 THE COURT: Mr. Strang, anything in reply?

18 ATTORNEY STRANG: Yes, Your Honor. Uh,
19 although it came only at the end, I -- I
20 appreciate Counsel's concession that the proper
21 standard here for the Court is, uh, assessing the
22 sufficiency of the evidence, not assessing the
23 sufficiency of the proof that the State wishes,
24 or would like to have offered but did not.

25 So confining my reply to the evidence,

1 I'll start with this. Um, seems a small point,
2 but, perhaps, it's really not. The evidence is
3 undisputed that Teresa Halbach was 25 years old,
4 um, on October 31, 2005. The State's first
5 argued inference, um, in support of false
6 imprisonment is that she was lured to the Avery
7 property at all, um, by a -- by a lie, by a -- a
8 sham, or a pretense that, uh, Mr. Avery
9 undertook.

10 I -- I raised her age, because if it
11 were true that he lured her there, or that a
12 reasonable jury could find so, that wouldn't make
13 out false imprisonment as a matter of law.
14 Luring someone, an adult, a competent adult,
15 someplace, is not intentionally confining or
16 restraining them in that place.

17 Now, a child can be lured into a
18 secluded or enclosed place, and if the purpose of
19 luring the child there is one of several that the
20 child enticement statute, 948.07, sets out, then
21 that's a crime. But an -- but an adult, uh,
22 isn't falsely imprisoned by being lured to go
23 someplace under, uh, false pretenses, and
24 there's -- there's no decisional support or case
25 law that would support the luring theory of false

1 imprisonment here of which I'm aware.

2 In any event, uh, I also note in that
3 respect that the evidence is undisputed that
4 Ms. Halbach had been to this very address several
5 times before for the purpose of taking pictures.
6 The evidence is undisputed, offered by the State,
7 that there was a maroon van. Um, if -- if -- if
8 we -- we saw one picture we must have seen ten,
9 of the maroon van from -- from almost every
10 possible angle. I would -- I was going to offer
11 to buy the van myself in order not to see one
12 more picture of it. So that's undisputed.

13 It is undisputed in the evidence that
14 Barb Janda, B. Janda, was offering the van for
15 sale. That ev -- that evidence came from, uh,
16 Bobby and Blaine Dassey, at least, and it may
17 have been mentioned by Scott Tadych, although I
18 don't say that to the Court because I'm not
19 certain.

20 So, you -- you -- you know, even if
21 hypothetically luring an -- a competent adult in
22 some circumstances could amount to false
23 imprisonment, it doesn't here on the evidence or
24 on any reasonable inference from the evidence.

25 The State, next, hones in closer and

1 says, well -- offers an argument that perhaps the
2 place the jury can infer Ms. Halbach was falsely
3 imprisoned is Mr. Avery's trailer.

4 Now, Counsel, uh, accurately describes,
5 uh, how one reasonably could view Bobby's
6 Dassey's testimony, uh, insofar as Counsel went.
7 Uh, Bobby Dassey did testify that he saw Ms.
8 Halbach walking toward the trailer as he looked
9 out the kitchen window before taking a shower and
10 saw her car there. Bobby Dassey didn't say, and
11 no one else suggested, that Steven Avery was
12 outside, or was marching Ms. Halbach,
13 involuntarily, toward the trailer, or interacting
14 with her in any way, or even visible. Um, Bobby
15 Dassey does not see Steven Avery at the time that
16 he sees Ms. Halbach walking toward the trailer.

17 So, again, we've got nothing on which to
18 base an inference that she's walking toward that
19 trailer for anything other than a business
20 purpose, uh, that she's undertaking. Um, nothing
21 to suggest she's being compelled to do that in --
22 you know, in the sense that the false
23 imprisonment statute speaks of a confinement or
24 restraint, uh, absent someone's consent.

25 It is also true that Bobby Dassey does

1 not see Ms. Halbach or Mr. Avery immediately
2 after his shower, but does see her car.

3 Now, what -- what the State omits was
4 Bobby Dassey's testimony, not put in dispute,
5 that his shower was three or four minutes. It's
6 three or four minutes, roughly, between his two
7 observations out the kitchen window.

8 If Ms. Halbach, in fact, is in
9 Mr. Avery's trailer at all, and let's -- let's
10 assume that's a reasonable inference from Bobby
11 Dassey's testimony if its credited, if she's in
12 his trailer at all, we don't know what she's
13 doing there, what's being said, whether any
14 effort is being made to keep her there. And
15 three or four minutes, by itself, is not a time
16 frame that would raise an inference that somebody
17 is being held against her will, um, raises no
18 inference of that at all, especially in light of
19 the undisputed business purpose, um, that
20 Ms. Halbach had for coming to the property in the
21 first place.

22 So there -- there -- Again, there's
23 really nothing. It -- it collapses, as this
24 would be wild speculation to assume that she's
25 being confined or restrained behind the door, if

1 she is, in fact, in the trailer, that she's being
2 confined or restrained against her will. We've
3 got nothing on that.

4 Her blood isn't there. There isn't any
5 sign of a struggle. Uh, nothing. Um, none --
6 none of her blood, hair, you know, anything.
7 Saliva. Nothing's found, uh, evidencing her
8 physical presence in the trailer or, perhaps more
9 importantly, a struggle or some effort to
10 restrain her in any way.

11 So the State then moves next saying,
12 well, maybe there's a reasonable inference that
13 she's transported between the trailer and the
14 garage involuntarily. That's nothing but a
15 guess, if one looks back over the evidence the
16 State has presented.

17 No one sees Mr. Avery and Ms. Halbach
18 going from house to garage either alone or
19 together. Certainly, no one sees them walking
20 from house to garage, or otherwise moving from
21 house to garage, in a way that would suggest that
22 Ms. Halbach's doing this against her will.
23 Nothing. Just nothing on that.

24 In fact, the notion that she gets to the
25 garage at all, under any circumstances, rests,

1 again, on -- on another series of inferences.
2 Um, and tho -- those inferences are that she must
3 have been killed in the garage because the bullet
4 bearing her DNA later is found in the garage.

5 There, again, um, if she's killed in the
6 garage, that's maybe a first degree intentional
7 homicide or a homicide of some sort. We don't --
8 we don't have any idea if this is a contact
9 wound, or if it's -- the gun is fired from a
10 hundred feet away, or anything at all. You know,
11 what her -- her condition is in the garage or
12 what her interaction with a shooter is, even if
13 we assume she's shot, and assume that she's shot
14 in the garage, um, and we certainly have nothing
15 other than the bullet to tell us anything about
16 confinement or restraint in the garage.

17 His blood is found in the garage, but
18 hers isn't. So, again, on the evidence we have,
19 if the State hypothesizes that some effort was
20 made to clean up the garage, which, itself, is
21 speculative, there's no evidence of it, but if
22 that's the hypothesis, then somehow, selectively,
23 the person cleaning the garage was able to remove
24 Ms. Halbach's blood but not able to remove
25 Mr. Avery's blood, or distinguish between the two

1 sources of blood and deliberately left
2 Mr. Avery's blood while removing all trace of
3 Ms. Halbach's blood.

4 You know, it's, um -- it -- it -- it
5 collapses just by -- by explaining what the
6 undisputed evidence here is, and there's nothing
7 else suggesting confinement or restraint as
8 opposed to a gunshot wound in the garage.

9 Now, if, implicitly, this Court is being
10 asked to find that every homicide also involves
11 false imprisonment, that proposition can't stand.
12 There -- there isn't any legal support for it.
13 And if, indeed, every homicide did involve un --
14 false imprisonment, then false imprisonment would
15 be a lesser included offense, and one couldn't be
16 convicted of both of them anyway if, necessarily,
17 a false imprisonment happened -- false
18 imprisonment happens with every first degree
19 intentional homicide. Um, I don't think the
20 State really means to say that the mere fact of a
21 homicide establishes a false imprisonment. If
22 the State does, it's wrong.

23 THE COURT: Anything else, Mr. Kratz?

24 ATTORNEY KRATZ: Nothing, Judge. Thank
25 you.

1 THE COURT: All right. Let's take our
2 break this time. Uh, resume -- Hopefully, Mr. Gahn
3 will be here within 15 minutes, and, um, then the
4 Court will hear argument on the, um, fair testing
5 motion.

6 (Recess had at 10:39 a.m.)

7 (Reconvened at 10:58 a.m.; jurors not
8 present.)

9 THE COURT: At this time we're back on
10 the record and the Court will take up the, uh,
11 motion from the defense -- it's actually a
12 renewal of the, uh, forensic fair testing motion.
13 And, um, before I, uh, hear argument from
14 Mr. Gahn, uh, Mr. Buting, I'll give you a chance
15 to reiterate your motion. I didn't mean to catch
16 you unaware there.

17 ATTORNEY BUTING: No, I was not unaware,
18 it's -- I've been told the table mike doesn't
19 work so I was trying to put this thing on.

20 THE COURT: Okay.

21 ATTORNEY BUTING: Um -- All right.
22 Thank you, Judge. This motion, although I don't
23 mean to make it sound this way, really is kind of
24 a, I told you so, because when we were here on
25 March 17, I have the transcript, uh, that's when

1 our motion for fair forensic testing was actually
2 heard. We filed it earlier than that, a couple
3 weeks earlier than that, and I predicted that
4 what would happen is there would be contamination
5 and there would be consumption of all of the
6 evidence related thereto.

7 Because of that, I asked for one of two
8 remedies, either that the defense expert be
9 present to observe or that it be videotaped. The
10 videotape remedy, had that been granted, probably
11 wouldn't have made a difference other than we
12 would have had a clearer record of how it would
13 have been contaminated and we would have had a
14 record of whether or not Ms. Culhane's
15 explanation that she was just talking and somehow
16 her saliva managed to find its way into a control
17 was credible.

18 But had -- had our expert been there,
19 um, when it became obvious, she probably would
20 have talked to him and said, look at the bullet,
21 it is such that I'm only going to be able to do
22 it once, or that we're not going to be able to
23 cut it in half. And an agreement might have been
24 reached at that point of a way to -- to separate,
25 once she puts the bullet into solution, to -- to

1 divide that solution, buffer, I think she called
2 it, in half, to preserve half for the defense.

3 At a minimum, she could have done that
4 on her own by simply, uh, you know, cutting it in
5 half, saving a buffer, running the first half of
6 the buffer. If, at that point, she's not getting
7 a high enough quantitation from that -- from that
8 amount, then she might have had at least a better
9 argument to say, okay, I got to use it all. I
10 got to consume it all.

11 But, instead, she didn't. She just took
12 it upon herself, knowing in her own mind, as she
13 described, that this was probative evidence, she
14 took it upon herself to, uh, wash the bullet in
15 one buffer solution and to, uh, consume that in
16 her test, leaving nothing left for independent
17 testing.

18 Now, I pointed out that the, uh --
19 there's **Arizona v. Youngblood** and the **Trombetta**
20 cases, also Arizona, I believe, United States
21 Supreme Court decisions, are, uh -- talk about,
22 um, the problem when there's a des -- a -- a
23 destruction of evidence, and the Supreme Court
24 had said, at any rate, that the -- the remedy
25 of -- of suppression, or even, potentially,

1 dismissal, is only available if the State acts in
2 bad faith when they destroy potentially
3 exculpatory evidence.

4 Um, that's, obviously, a pretty high
5 burden. It has to be more than negligence, but I
6 think that there's reasons to believe that we --
7 that there is bad faith here on the part of the
8 State. And I say that for this reason: We
9 asked -- made a reasonable request for fair
10 forensic testing in this case. We did so
11 explaining clearly on the record that this case
12 was unusual because of the allegations that were
13 made, before we even came into the case, by
14 Mr. Avery that somebody was -- was planting
15 evidence, messing around with the evidence, and
16 that for that reason, this case deserved,
17 warranted, required, a little different procedure
18 to protect his rights, as well as the public's
19 rights, to be sure that -- that, uh, process is
20 properly being done.

21 The State resisted that, and did so
22 while arguing that, uh, we don't have to worry
23 about things like this. We have a fine Crime
24 Lab. We have an accredited Crime Lab. Uh, we
25 can't allow Mr., uh, Friedman, Dr. Friedman, or

1 any defense expert, to be there while it's being
2 tested because, by gosh, that could increase the
3 chance of contamination. Well, what do we hear
4 happened?

5 She -- Ms. Culhane introduces other
6 people into the very process, herself, while
7 she's doing a training program. Now, how, having
8 a defense expert present, would increase --
9 greater increase the risk of contamination than
10 doing that, I don't know.

11 Um, so while arguing on the one hand
12 that defense experts shouldn't be allowed because
13 it would increase the risk of contamination,
14 Ms. Culhane then acts in a way that is directly
15 contrary to that, and she's got at least two
16 people, I don't recall how many trainees, I think
17 she said two, um, which, obviously, should
18 increase the risk even more than would have been
19 had a defense expert been there.

20 In addition, Mr. Gahn acknowledged that
21 there are circumstances where, um -- when -- when
22 it appeared that there might be complete
23 consumption of a piece of evidence, where it is
24 warranted for the State and the defense to -- to
25 work on agreement that the defense expert is

1 present when that's being done.

2 Um, Mr. Gahn has been a big champion of
3 independent testing. And his -- his remedy for
4 all of this was, don't worry, Judge, they can
5 retest. They have an opportunity to retest that
6 will protect, uh, an -- any outcome. Well, it
7 doesn't work. I -- I told the Court back then
8 that it -- that it does not work if the
9 material's already contaminated.

10 And, here, she did testify that she had
11 the extract that could have been retested, but
12 that's clearly an insufficient remedy when the
13 contamination, if at all, occurred, most likely,
14 during the extract process anyway. So if it's
15 contaminated at that point, then the extract,
16 itself, is going to be contaminated. And the
17 surest evidence of that, the surest evidence that
18 simply retesting the extract would not be a
19 sufficient remedy for the defense, is her own
20 unit deviation request. I forget the actual
21 exhibit number, but it's in the record.

22 And what she says is, under the proposed
23 deviation, quote, normally the sample would be
24 re-extracted, but in this case there is no sample
25 to re-extract. According to our current

1 protocol, this sample could only be used for
2 exclusionary purposes. However, in this case,
3 she then proposes the deviation of -- from
4 protocol.

5 So if the existence of a remaining
6 portion of the extract was sufficient to, uh --
7 if Mr. Gahn's going to argue that somehow we
8 could test that, and that that would protect Mr.
9 Avery's interests in the, um -- this crucial
10 evidence, that totally undercut by her own
11 admission that she can't extract anything else.
12 She didn't retest the extract, herself, because
13 she knew, as Mr. Gahn does, that that does not
14 constitute independent testing. That's just the
15 retesting of a contaminated, uh, product which
16 will confirm the contamination that's already
17 occurred.

18 Second, now, or finishing the second
19 point, I believe it is, which is that Mr. Gahn
20 says -- acknowledges that there are times when
21 having the defense expert present is -- is
22 warranted, and -- and those circumstances are
23 when it appears that there's only one chance, one
24 shot at the test, uh, we had that here. We had
25 it here. He acknowledged it.

1 And, yet, his own agent of the State,
2 the -- the Crime Lab analyst, um, clearly also
3 recognized that this was going to be a one-shot
4 deal and went ahead and did it, knowing that a
5 month earlier we had filed a motion that the
6 Court had ruled just two weeks earlier, because
7 her test, as I recall, was going on around
8 April 3, um, I believe the testimony was the
9 bullet arrived -- bullet fragment arrived, I
10 think, the day before our motion was decided, it
11 was May -- March 16, and she was beginning the
12 extract process the end of March and into the
13 beginning of April, no call to the defense to
14 say, hey, you were right, this is the situation
15 where there's only one chance to test this
16 evidence, would you like to have your -- your
17 expert there, or would you -- is there some
18 remedy or -- that you can propose? Nothing
19 like -- of that sort was done.

20 Instead, they went ahead and consumed it
21 deliberately knowing what this Court's ruling was
22 as well, which I'll get to in a moment.

23 The, uh -- I also pointed out that one
24 of the reasons for my motion was because the
25 public was beginning to learn in other parts of

1 the country that this sort of thing happened in
2 crime labs. It had been kept under wraps for
3 years. Finally, it was coming out, and I
4 mentioned that there was 17 states now in which
5 incidents had occurred, either fraudulence,
6 mistakes, contamination, or all of the three, um,
7 in crime labs in those states.

8 This Court, though, said -- Let me just
9 find it in quote. This Court said, I will --
10 quote, I'll al -- I will -- I'm sorry. This is
11 on page 43 of that transcript of March 17.

12 THE COURT: Thank you.

13 ATTORNEY BUTING: At the bottom of the
14 last paragraph. Quote, I will also note that
15 although there have been incidents of mistakes in
16 other crime labs, and I think anytime you're
17 dealing with human beings that's always a
18 possibility, I'm not aware that our State Crime
19 Lab has ever been involved in this type of thing.

20 Now, this is said in front of Mr. Gahn,
21 it's on March 17, and we now know that at that
22 moment the Crime Lab in Wisconsin had a re --
23 recorded history of contamination incidents going
24 back for years.

25 The State did not disclose that to the

1 Court, um, and I would, on that point, note, by
2 the way, uh, there is -- there's been some
3 inference that somehow, uh, the -- the
4 discovery -- in fact, I think there was an
5 argument that -- that -- at the hearing that
6 the -- the defense is going to get all the bench
7 notes, and lab notes, and the printouts, and --
8 and can have their own expert look at that, and
9 if that's an adequate remedy -- The contamination
10 log is not part of discovery in these cases. It
11 was not received as part of the discovery request
12 in this case. It was only received by me because
13 I made a specific request when I had some
14 information that, perhaps, a log of this sort was
15 being kept.

16 The Crime Lab initially resisted, and
17 then -- then -- then, initially, turned over a
18 redacted copy that had lack -- blacked out all of
19 the other case numbers so that, perhaps, they
20 were afraid that it would get out and other
21 defense attorneys in other cases would be able to
22 see, hey, there was contamination on my case.
23 Eventually, Mr. Gahn, to his credit, did prevail
24 upon them to provide an un-redacted copy, and
25 that's in the record now here.

1 But on March 17, when this Court was
2 under the impression that our Crime Lab had no
3 such history, the State did not correct the
4 Court's misconception. Mr. Gahn either knew or
5 should have known about that, or, when he then
6 learned about it, perhaps he should have gone
7 right back to the Crime Lab after hearing what
8 the Court's, uh, belief was, and said, hey, is
9 there any history of the -- of contamination that
10 I need to know about that -- to correct the
11 Court's misinterp -- impression. The State did
12 not do that, and so this Court's ruling was based
13 upon, uh, incorrect information withheld by the
14 State.

15 The sum of all of these, uh, points, I
16 think, constitutes bad faith sufficient under
17 ***California v. Trombetta*** to warrant in the -- the,
18 uh, suppression, or perhaps even greater remedy,
19 uh, of the evidence that the State did consume --
20 And in this instance what I'm focusing on -- only
21 focusing on here is Item FL, the bullet fragment
22 from -- on which they claim Ms. Halbach's DNA was
23 discovered during a test that was contaminated,
24 uh, uh, clearly had a contaminated control, and
25 by inference may also have been

1 cross-contaminated, which is something that I
2 pointed out.

3 So I would ask, first, the remedy that
4 that be suppressed, that the jury be
5 so-instructed. Alternatively, if the Court does
6 not believe that it rises even to the level of
7 bad faith to -- to require that kind of a remedy,
8 certainly it rises to the -- to the level that
9 this jury should be instructed of the three
10 following things:

11 Number one, that the State resisted the
12 defense attempts to be present during this test.

13 Number two, that the State totally
14 consumed the bullet fragment evidence without any
15 attempt to preserve a portion of it for
16 independent defense testing.

17 And, number three, that the State
18 withheld evidence that existed before the test of
19 Item FL, that the Wisconsin Crime Lab had a
20 recorded history of contamination incidents.

21 I don't know that this remedy would be
22 adequate, and I'm asking for something greater,
23 but I think at a minimum, uh, given the conduct
24 of the State in this case, this Court should
25 adopt that remedy at a minimum. Thank you.

THE COURT: Mr. Gahn?

ATTORNEY GAHN: Yes, Your Honor. In *State v. Noble*, which is at 246 Wis. 2d 533, um, the principles, um, that Wisconsin cases have derived from United States Supreme Court decisions in *Trombetta* and *Youngblood*, and I quote from the *Noble* case, the defendant's due process rights are violated by the destruction of evidence if, number one, the evidence destroyed was apparently exculpatory and of such a nature that the defendant would be unable to obtain comparable evidence by other reasonably available means, or, two, if the evidence was potentially exculpatory and was destroyed in bad faith. And I think that's the analysis that the Court must apply in Mr. Buting's motion.

The issue for, uh, the fair and independent testing to have, uh, an expert present was decided by the Court. I think that's a completely different issue than what we're discussing here.

Um, when Mr. Buting brought up at the March 17 hearing about other crime labs, uh, he was bringing up what are referred to as scandal issues. And there were some scandals in other

1 crime labs. And, um, the Wisconsin Crime Labs in
2 Milwaukee or Madison, neither of them have been
3 involved in any type of scandal issues of the
4 nature that Mr. Buting was referring to.

5 I think that we have to put this in
6 perspective, and I think part of the Court's
7 ruling, um, that it made in March 17 was the
8 reasonable -- reasonableness of the request of
9 the defense.

10 You have to look at what a State Crime
11 Lab operates and how they operate, and as Ms.
12 Culhane stated, since I think it was January 1 of
13 2001, have examined over 50,000 samples of DNA,
14 and she went through the procedure of how they
15 examine these samples, and first is that
16 extraction process and then it goes to the
17 quantitation.

18 And it -- it came out in the testimony,
19 also, you just don't know if you even have DNA.
20 You don't even know if you have a biological
21 substance these days, and the DNA testing is so
22 sensitive that until you get past the
23 quantitation stage, you don't even know if
24 there's anything there, and you don't even know
25 if that's even going to amplify and you're even

1 going to get an end result. And that's just the
2 nature of the science.

3 And when you're dealing with something
4 like that, it would be absolutely unreasonable to
5 have to stop everywhere along the way when you're
6 doing 50,000 samples, almost 10,000 a year, and
7 stop and say, wait, we have to call every defense
8 attorney, we have to, you know, see if they want
9 someone to come in. You can't stop that process
10 like that and wait and put it off for two weeks.
11 It would be a -- an absolutely -- so burdensome
12 that no crime lab could even operate to have to
13 stop every time.

14 And everyone knows, and I'm sure Your
15 Honor is knowledgeable, articles in the paper,
16 and just the last election, the backlog at the
17 Crime Lab is, um -- is -- is huge, and this would
18 just add to that burden of getting cases out.

19 In any event, Mr. Buting has been trying
20 to, I guess, inform the Court that this
21 contamination, uh, log is something that is,
22 um -- it rises to a level of a scandal. I think
23 the testimony from Ms. Culhane was clear. Um,
24 it's maintained, it's kept, it's used for
25 corrective action.

1 Um, I -- I disagree with Mr. Buting when
2 he says there's resistance by the State to turn
3 over the contamination logs. He requested them
4 and I obtained them. But of -- in 50,000 samples
5 in about five years there were 89 cases of
6 contamination. That's all. This isn't a scandal
7 issue. This is normal course of business. You
8 expect contamination when you're dealing with
9 forensic samples. This is something that one
10 expects and you do your best to prevent it.

11 But, um, I -- I just don't see how 89
12 out of 50,000 is -- raises to a level of, um,
13 what Mr. Buting feels is a -- is a scandalous
14 issue.

15 I found a, um -- my review of a A.L.R.
16 article. Uh, basically, I'd like to summarize,
17 uh, one of the statements from the A.L.R.
18 article, and it was from 40 A.L.R. 4th at 594.
19 In my review of the case law, it is found that
20 with respect to hard, physical evidence, it is
21 generally held that, uh, the necessary
22 consumption of evidence in state crime labs does
23 not violate the defendant's rights even though
24 the defendant is prevented from subse --
25 subjecting any of the hard ev -- physical

1 evidence to test by his own expert.

2 But that's not even the case here. Now,
3 I know that Ms. Culhane did not do a second
4 washing, and I believe there was questions on
5 cross-examination about that, but the bullet
6 still exists. And due to the sensitivity of
7 this, uh, DNA, a second washing could be
8 possible, uh, to try and extract DNA from that
9 bullet.

10 But, secondly, and more importantly, as
11 Ms. Culhane testified, the extract tube is
12 available, and that is available for testing, and
13 the defense can run this with their own control,
14 and Ms. Culhane made it very clear the
15 contamination was in the control, not on the
16 evidentiary item. So the evidentiary item
17 still -- the, uh, fact that bullet is available,
18 as well as the extract tube.

19 However, any independent defense testing
20 will likely find the same inculpatory DNA profile
21 that Teresa Halbach is on the bullet, and -- just
22 as Ms. Culhane did. So far, the defense has made
23 no effort to explore either of these options.
24 They've had the discovery in this case for a
25 very, very long time, and they could have, a very

1 long time ago, asked for the extraction tubes or
2 the bullet to at least attempt their own
3 re-examination of the DNA contained on those
4 items.

5 THE COURT: Let me stop you there, because
6 that was one of my questions in anticipation today.
7 Did, uh -- did the -- And this is for both counsel.
8 Did the report, uh, from Ms. Culhane to the defense
9 disclose not only the results of the testing but
10 the, um, contamination problem with the control?

11 ATTORNEY GAHN: Yes. The report that
12 she filed stated that her profile was in the
13 control.

14 THE COURT: And when was that provided
15 exactly?

16 ATTORNEY BUTING: I believe the date of
17 the report is May 8. Is it the May 8 report?

18 ATTORNEY GAHN: It -- it may be the
19 May 8 report. I -- I know that --

20 ATTORNEY BUTING: I think we -- we got
21 it in --

22 ATTORNEY GAHN: It would have been the
23 May 8 report because it was in, um, March that
24 the bullet was, um, discovered and I believe she
25 did her extract later that month. So it would

1 have been the next report, which would have been
2 the May 8 report.

3 ATTORNEY BUTING: I think we probably
4 got it in a -- a packet from June. Um, we got a
5 big packet in early June. Let me just see here.
6 Yes, Item FL is in the May 8 report, and I think
7 that was first, to answer the Court's question,
8 turned over to us in June. We, of course, did
9 not have any lab notes, lab sheets, until
10 sometime after that but...

11 THE COURT: Well, how did the report
12 reference the contamination in the control sample?

13 ATTORNEY GAHN: I --

14 ATTORNEY BUTING: I'll read it, if you'd
15 like.

16 THE COURT: Go ahead.

17 ATTORNEY BUTING: It's in a manner,
18 frankly, that I think is -- it -- I mean, it's --
19 it's truthful, but it's not exactly --

20 ATTORNEY GAHN: If -- if you'd just read
21 it --

22 ATTORNEY BUTING: -- as --

23 ATTORNEY GAHN: Why don't you just read
24 it there, Mr. Buting.

25 ATTORNEY BUTING: The profile developed

1 from the bullet fragment, Item FL, and the
2 interior of the driver's door handle, Item IG,
3 which isn't relevant here, but are consistent
4 with the profile developed from the pap smear,
5 Item EF, reportedly collected from Teresa
6 Halbach. And it says, see laboratory reports,
7 earlier ones.

8 The manipulation control extracted with
9 the bullet fragment, Item FL, contains DNA that
10 is consistent with this analyst.

11 And then it goes onto another, um -- you
12 know, another item is tested. So...

13 ATTORNEY GAHN: So it was revealed in
14 that report, but also all the bench notes, the
15 raw data, all the, um, electropherograms, which
16 they're called, was provided to the defense, and,
17 um, was available for their expert to review.
18 And a review of the raw data and a review of all
19 of the reports clearly showed that issue, the
20 manipulation control with Ms. Culhane's, um,
21 profile in it, um, all of that was provided to
22 the defense for their expert, and, um -- and I
23 will say it was used, um, uh, very, um,
24 efficiently by the defense in their
25 cross-examination of Ms. Culhane.

1 Um, at the very least, the defendant has
2 offered, I think, no proof, um, that the bullet
3 was apparently exculpatory, or that the State
4 acted in any type of bad faith.

5 But, also, I -- I think, one has to look
6 at this in the context of this case. The
7 defendant, as I gather, has used this
8 contamination issue and deviation from protocol,
9 uh, regarding this bullet, um, sort of in their
10 overall conspiracy, planting, frame-up, bias,
11 rush to judgment type defense that the police,
12 basically, had manufactured evidence against
13 them. Um, I just don't believe that even a
14 **Trombetta** or an **Arizona v. Youngblood** analysis is
15 even warranted.

16 So I respectfully ask the Court to deny
17 the defendant's motion to sup -- to suppress
18 that, um, evidence for the stated reasons.
19 Basically, nothing exculpatory was suppressed by
20 the State. There's no evidence to test -- There
21 is evidence available to test, um, but the
22 bullet, likely, has only inculpatory value. Um,
23 they're welcome to retest the extract and share
24 those results with us. We'd be more than happy
25 to see it.

1 I'm confident that their expert, at an
2 accredited lab, would test the extract and find
3 Ms., uh, Halbach's DNA profile on the bullet.
4 Um, I just don't believe there's any bad faith by
5 the State. So I thank you, Your Honor. That's
6 all I have.

7 THE COURT: Mr. Buting?

8 ATTORNEY BUTING: Yes, I -- I have some
9 response. Um, first, it -- it's a total red
10 herring to say that we can test the extract and
11 get any information that's independent of what's
12 already occurred, and Mr. Gahn knows that. If
13 the ex -- if the -- if the sample is contaminated
14 in the extraction process, then the extract will
15 be contaminated, too. It's -- it's just simple
16 common sense and it's supported by the fact that
17 the -- the analyst, herself, did not bother to
18 retest.

19 THE COURT: Now, wait. Let-- let's stop
20 there, because I -- I know I had trouble
21 following the testimony as it came through. It's
22 my understanding that the control that was
23 supposed to be blank was contaminated with the
24 operator's DNA, but that the extract was -- was
25 not. What -- Substantively, what calls into

1 question the, uh, validity of the results on
2 the -- on the bullet?

3 ATTORNEY BUTING: Okay. Sure. I'll --
4 I'll explain that.

5 THE COURT: Go ahead.

6 ATTORNEY BUTING: The problem is,
7 when -- when there's evid -- the -- the control
8 is run along together in this little block we --
9 she sort of mention -- uh, demonstrated it, um,
10 in these various little tubes, or whatever --
11 their -- their vials, or whatever they're called,
12 they're all run together through this same
13 instrument at that particular, uh, process.

14 The -- the sample -- the bullet that --
15 that gets extracted by, she said a -- a wash that
16 she said that -- I mean, she said did consume,
17 and one could reasonably expect would consume,
18 whatever DNA was on there, is taking place on her
19 lab bench. If she's capable of contaminating the
20 control with her own, then that's evidence of
21 cross-contamination right there.

22 She's also testified that at -- in that
23 very same bench she's had Teresa Halbach's DNA,
24 and that it's as reasonable an inference that
25 she's able to cont -- cross-contaminate from that

1 to the bullet fragment as it is that she
2 contaminated her own on the control.

3 And it's for that reason that the
4 protocol says, when you get a contaminated
5 control, you throw it out, because you cannot
6 assume that the evidence sample, itself, has not
7 also been contaminated.

8 THE COURT: Okay. The other question I had
9 is, um, let's suppose that the defense had had, uh,
10 an observer there. Um, perhaps the observer would
11 have been able to provide an explanation for how Ms.
12 Culhane's DNA found its way to the control sample,
13 and, uh, the State could have used that at trial.
14 But her -- The State did, in fact, cross-examine her
15 about that at trial. It certainly goes to the --
16 the weight or the validity of her test results.

17 What -- what did the defense lose, uh,
18 the way the testimony came out, that it -- that
19 it would have gained had an observer been there?

20 ATTORNEY BUTING: Okay. Had a defense
21 expert been there, the very first step where
22 she's analyzing the sample -- I recognize that --
23 that there's several different ways to get -- to
24 test for DNA. Most of what she did, I think,
25 here were -- were these cotton swabs, where

1 there's a apparent stain, and then the swab is
2 taken, and then it -- it absorbs whatever the
3 substance is, and you can cut it and save a
4 portion of the swab.

5 Um, but in a case like this, she chose
6 not to do that. She chose not to swab it. So a
7 defense expert would have said either we want you
8 to -- to use a swab, like you did in every other
9 test, swab the bullet and then cut and save half
10 of it, or, if she really felt it was necessary to
11 put it into this little buffer and -- and, uh,
12 dissolve it that way, to preserve half of that
13 ex -- that buffer before it gets done -- before
14 anything else gets done with it so that that
15 could be retested. More likely, it would have
16 been do the swab.

17 If you've got the forceps to hold the --
18 the -- the bullet with a forceps, you take a
19 swab, and you swab it around, and you get
20 everything you can get, just like she did with
21 the key and other items, then we would have half
22 of that, uh, swab that would have been preserved
23 for retesting. Instead, we only have extracts
24 that have been, uh, potentially already
25 contaminated.

1 Did that answer the Court's question?

2 THE COURT: Yes, it does.

3 ATTORNEY BUTING: Okay. Can I address a
4 couple of other --

5 THE COURT: You may --

6 ATTORNEY BUTING: -- points?

7 THE COURT: -- continue, yes.

8 ATTORNEY BUTING: Thank you. Um, the --
9 Counsel's right that there's sort of two
10 different levels, um, that -- that a -- a Court
11 engages in -- in -- under **Trombetta**, which is
12 whether evidence is apparently exculpatory and
13 destroyed versus when it's potentially
14 exculpatory and destroyed.

15 I'm not out -- I'm not arguing the
16 evidence was apparently exculpatory and was
17 destroyed, because then it would be even easier.
18 You don't have to show bad faith. Um, mo -- this
19 case, like most, fall in the category where
20 evidence is potentially exculpatory and then
21 destroyed, and if you can show bad faith, then --
22 then the remedy is warranted.

23 Um, there's always an argument the State
24 always says whenever they get a result that
25 favors them, see, it would have been inculpatory.

1 But there's no reason to think that the result
2 would be potentially exculpatory because, look,
3 we tested it, and it came back inculpatory.

4 But what -- what Mr. Gahn's ignoring
5 here is, looking at all of the evidence as a
6 whole, you have to consider how -- what's the
7 likelihood of it being potentially exculpatory?
8 There were two bullet fragments found. The other
9 one did not have, um, Ms. Halbach's DNA found on
10 it. So that's at least fifty-fifty that this one
11 wouldn't either.

12 Secondly, of all of the other 180 or
13 more items that she looked at and tested, none of
14 them had Teresa Halbach's DNA on it. This was
15 the only one. So if the odds are 1 out of 180
16 that this would be potentially inculpatory, it's
17 obviously much more likely, in my view, if it had
18 been properly tested and preserved for -- in a --
19 in a test, to have been shown to be exculpatory,
20 not inculpatory.

21 Um, also, Mr. Gahn says is this process
22 is -- would be burdensome and, um, the Crime Lab
23 has a backlog, they -- they can't stop and call a
24 defense expert every time they're in the middle
25 of these tests. The Court's not being asked to

1 make some sweeping decision that applies to every
2 test. We're focused on Mr. Avery's case.

3 And the unique circumstances of
4 Mr. Avery's case are that before this sample was
5 consumed, we asked the Court for relief, and we
6 put the State on notice, and despite that notice,
7 the State, nevertheless, went ahead and consumed
8 this cru -- this piece -- crucial piece of
9 evidence.

10 Secondly, focusing directly on this
11 case, Mr. Gahn said that she was testing a lot of
12 items, and you can't tell until you go to the
13 quantitation that there's even DNA. That's true.
14 But what she also testified to was her personal
15 knowledge that this particular item of evidence
16 was probative in her view. It fit the -- the
17 message that she'd gotten on the phone to try and
18 put -- somehow put her into the house or the
19 garage, and, indeed, she said the reason she
20 applied for this deviation request, for the first
21 and only time of her entire career, was because
22 she knew that this was a probative piece of
23 evidence.

24 So it's not like this was just some
25 random 1 out of 180 pieces that may or may not

1 have DNA. She knew ahead of time the potential
2 value, and the -- and the importance of it.

3 The contamination log and -- and the
4 comments that I made on the 17th were not
5 limited, by the way, to scandals in the crime
6 labs. What I said was, quote, on page 29, now 17
7 states, crime labs in 17 different states, have
8 been found to either -- I'm sorry -- to have
9 either had fraudulent behavior by one of the
10 analysts, or erroneous test results,
11 incompetence, everything, the entire spectrum of
12 problems, that results in false tests.

13 That in some instances, in Kansas, for
14 instance, resulted in the correct suspect being
15 released, going out and committing another
16 offense. And in other instances, innocent people
17 being wrongly identified through DNA testing, and
18 only later, fortuitously, was it determined that
19 the mistake was made, closed quote.

20 This exhibit, 346, which is the
21 contamination log from the Wisconsin State Crime
22 Lab, shows serious instances way beyond just
23 contamination of controls, and, in fact, on
24 the -- it's -- it says page 7, but I think it's
25 more than page 7 here, on a date of November 22,

1 '05, Ms. Culhane, herself, admits that she had a
2 contamination where there was a carryover of the
3 sperm fraction into the manipulation control, and
4 that the result of that was that the D.A. refused
5 to proceed with charges, uh, and the case was
6 closed.

7 Now, we don't know whether that person
8 was really guilty and got off because she screwed
9 up, or whether the person was really innocent
10 and -- and justice was served. But these kinds
11 of mistakes, I don't care whether there's only 89
12 out of 50,000, they are important, and they
13 deserve to have the -- the -- the light of
14 transparency shined on them, shown on them, and
15 that is what we were trying to do when we asked
16 for this motion.

17 And so I think, in -- in total, when you
18 look at all of what's happened, I think that
19 there is bad faith for the ultimate remedy, or,
20 at a minimum, for the alternative remedy that
21 I've -- that I propose, or something similar to
22 that. Thank you.

23 THE COURT: Anything else, Mr. Gahn?

24 ATTORNEY GAHN: I would just say that
25 I -- I wish that, um, he had asked Ms. Culhane

1 about the specific instance that he read in the
2 contamination log. I think it's unfair to, uh,
3 derive some meaning from that, uh, without having
4 Ms. Culhane explain what happened in that case.

5 I think that, um, Counsel also is wrong
6 when he says Teresa Halbach's DNA was not found
7 in any of the samples. Good Lord, where was he
8 during her testimony? Ms. Halbach's DNA was
9 found in A1, A2, A3, A4. It was on the Pepsi
10 can. There was a -- a -- a -- She had Teresa
11 Halbach's DNA, um, in many, many samples. So
12 I -- I don't know how he says that there wasn't
13 any, um, testimony to that effect.

14 But I would, um, just -- And with, um --
15 Perhaps, Your Honor, would -- I had a partial
16 transcript prepared of, uh, Ms. Culhane's, um,
17 testimony on this issue, and I would just direct
18 your attention --

19 THE COURT: I -- I have received that, and
20 it's my understanding that counsel for the defense
21 has also got a copy; correct?

22 ATTORNEY BUTING: Yes. I have seen that
23 and I'm not going to re-argue it. It -- that's
24 the whole point about extracts.

25 ATTORNEY GAHN: But she answers the

1 question, um, Mr. Buting asked her. Therefore,
2 the extract was contaminated already; isn't that
3 right? And she states, the control was
4 contaminated with my DNA, not the extract.

5 THE COURT: I think I understand the
6 arguments of the two parties. All right. With
7 respect to -- Well, first of all, do I have all the
8 outstanding motions at this time? Uh, you have both
9 made, uh, good arguments. Um, the motions were in
10 consideration more than I can give in the next ten
11 minutes or so, so I'm going to, uh, do more
12 examination this weekend.

13 What I would suggest is this, so that we
14 don't hold up the jury, uh, I will, uh, present
15 decisions on the motions at 8:30 on Monday
16 morning. Uh, so let's plan on starting early at
17 8:30. The jury won't be here, but I expect
18 counsel to be here and, uh, the Court will issue
19 rulings on the motions at 8:30 on Monday, uh,
20 before we proceed to testimony before the jury.

21 ATTORNEY GAHN: Thank you.

22 ATTORNEY BUTING: Thank you, Judge.

23 THE COURT: Uh, otherwise, I'll see you at,
24 uh, 1:30, uh, with the jury.

25 ATTORNEY BUTING: Thank you.

1 THE COURT: They should be here by 1:15,
2 so at 1:30 we should be ready to go. We're
3 adjourned for this morning.

4 (Recess had at 11:38 a.m.)

5 (Reconvened at 1:30 p.m.; jurors not
6 present.)

7 THE COURT: We're on the record outside the
8 presence of the jury. At this time, uh, counsel, is
9 there anything either party wishes to place on the
10 record concerning, uh, exhibits?

11 ATTORNEY KRATZ: Yes, Judge. The -- Uh,
12 the State went through with, uh, your clerk, uh,
13 exhibits that were referred to, identified what
14 we believed were offered but she does not have
15 lif -- listed as offered, and, uh, we can go
16 through those at this time.

17 Photos that we would offer at this time
18 include 164 and 165. That's the evidence photo
19 of the .22 caliber and .50 caliber, um, rifles.
20 Item 416 --

21 ATTORNEY STRANG: Sorry, um --

22 ATTORNEY KRATZ: I'm sorry, 164 and 165.

23 ATTORNEY STRANG: Both are --

24 ATTORNEY KRATZ: Are pictures of the --
25 of the guns. One of each. Item 416, which is

1 the CV of Mr. Newhouse. Photos 458 through 463.
2 I'm sorry, Janet, I -- I don't know -- how do I
3 identify those? I can in just a minute, Judge.

4 THE CLERK: Those were the swabs.

5 ATTORNEY KRATZ: Oh. Those are the
6 swabs that, um, Dr. Lowe (phonetic) had
7 identified and referred to.

8 I will tell the Court that there are
9 other exhibits which have been marked and are not
10 being offered. I don't know if you want me to
11 put that on the record as well. I can do that.
12 I went through all those with Janet, as well, but
13 at -- at least from my perspective, um, those
14 that I've just identified are the balance of the
15 exhibits that we would offer that have not yet
16 been received by the Court.

17 THE COURT: Does the defense have any
18 objection to the admission of those exhibits?

19 ATTORNEY STRANG: Uh, no, we -- we
20 don't. Um, like to talk a little bit about some
21 that I'm -- I'm not sure have been offered or
22 not, but...

23 THE COURT: All right. The exhibits,
24 then, that were just mentioned by Mr. Kratz will
25 be admitted. Uh, Mr. Strang.

1 ATTORNEY STRANG: The only ones that I
2 wanted to talk about, and just nail down the, um,
3 status, are the, um, summaries of phone records.
4 Um, I -- Here's what I think I understand.
5 Initially, we were working toward a stipulation
6 on summaries of phone records that would have
7 names but not telephone numbers and only list
8 calls that the parties jointly thought relevant.

9 Um, I had asked for some changes to be
10 made to the -- the -- the two the State wanted to
11 offer, I think one for Teresa Halbach's cell
12 phone and one for Steven Avery's cell phone, and
13 I also wanted, um, um, the -- a summary for
14 Steven Avery's landline, which the State
15 originally had prepared, and I think we were in
16 agreement about the two relevant calls.

17 Um, my -- my current understanding is
18 that, um, counsel for the State did not agree to
19 my proposed additions, um, to those exhibits,
20 and -- and decided not to offer the summaries at
21 all, but I'm -- I didn't had a chance to confirm
22 that with Mr. Kratz, so I'm looking in his
23 direction.

24 THE COURT: Mr. Kratz?

25 ATTORNEY KRATZ: That's true, Judge.

1 The -- Mr., um, Strang proposed a, uh -- an
2 additional column to the State's prepared summary
3 exhibit, um, which the State believed
4 misrepresented the calls. There -- there's no
5 secret about this. Mr. Strang wanted the column
6 that said "answered" uh, on the exhibit.

7 Uh, "answered" we believed
8 misrepresented because it could have been either
9 to a voice mail or actually physically answered,
10 um, so rather than, um, argue back and forth, and
11 I appreciate that Mr., uh, Strang and I were not
12 able to come to a, uh, stipulation, I've simply
13 withdrawn my summary, Exhibits 360 and 362.

14 The records, themselves, uh, although
15 the, uh, records refer, as the Court knows, to
16 phone numbers rather than names, uh, have been
17 received by the Court. Uh, from my perspective,
18 that is, what the State intends, that with the
19 live testimony, I believe, that, uh, I can, uh,
20 get by with -- with those.

21 Uh, if, uh, Mr. Strang would, um, want
22 those other exhibits, uh, resubmitted, uh,
23 without the "answered", um, column, I'm certainly
24 willing to do that as well. But the fact remains
25 it's a State's summary exhibit, and -- and

1 whether the defense, uh, agrees or wants
2 something on it or not, they're certainly not
3 entitled to that, but that notwithstanding, uh, I
4 was happy to try to work something out with
5 Mr. Strang. That didn't happen. So I've simply,
6 uh, uh, agreed that those exhibits not be
7 received into evidence.

8 ATTORNEY STRANG: And -- and we're
9 actually not in disagreement about that. These
10 are State summaries. He's well within his right
11 to decline to modify them as I'm proposing. So
12 there's no rub on that. The only rub here, um,
13 and I'll -- I'll take the blame for this in the
14 sense that I probably let this go on for a couple
15 of days or three days longer than I should have
16 before checking back in with Mr. Kratz, I was --
17 not that he would know this, but I was relying on
18 an understanding that at least the Steven Avery
19 landline phone records, or summary of them,
20 would -- would come in.

21 Now, I don't think, as it turns out,
22 there's any disagreement about the two phone
23 calls from the Manitowoc County Jail about which
24 we had testimony through Investigator Wiegert,
25 uh, and I don't care whether it's a summary or

1 whether it's a page of those phone records,
2 themselves, that come in, um, I just -- maybe
3 this is something we can just stipulate that
4 document in. Um, I -- if -- I -- he's perfectly
5 fine to not offer the summaries and I don't have
6 any problem with the underlying records.

7 THE COURT: I understood, Mr. Kratz, the
8 concern about the, uh, phone records with respect
9 to, uh -- I assume they were Teresa Halbach's
10 records that would be answered? Issue? Was a
11 cell phone?

12 ATTORNEY KRATZ: Yes.

13 THE COURT: Um, is there any objection to
14 the, uh, summaries for the defendant's phone? The
15 landline phone?

16 ATTORNEY KRATZ: Only in the sense that
17 there's been nobody to put those in. In other
18 words, that would either have to come from
19 Mr. Avery or from somebody on -- on the other
20 end.

21 Now, in fairness to Mr. Strang, he asked
22 Mr. Wiegert yesterday, do you remember calls at
23 5:36 and 8:57? Uh, as an officer of the Court, I
24 can tell the Court those are the correct times.
25 I don't have a problem with that. The testimony

1 is in there just isn't a, um -- a summary of
2 that. Perhaps that's something Mr. Strang and I
3 can work out. I don't have --

4 ATTORNEY STRANG: Yeah.

5 ATTORNEY KRATZ: -- really any dispute
6 as to that.

7 ATTORNEY STRANG: Right. I -- I suspect
8 this will be worked out and I'm not trying to
9 force him to put in the two summaries. That's --
10 that's really is his decision as -- as he says,
11 um, so we can try to work out, uh, anything in
12 the record.

13 THE COURT: Anything else before we bring
14 in the jury?

15 ATTORNEY STRANG: Were there any other
16 exhibits that were withdrawn was the only other
17 question I had.

18 ATTORNEY KRATZ: There were some not
19 offered, if that's what you're talking about.

20 ATTORNEY STRANG: Um -- Oh, uh, and 372
21 I think has not been offered; is -- is that
22 right? The voice mail document. One of the two
23 that, uh, Mr. Zimmerman identified.

24 THE CLERK: That's correct.

25 THE COURT: That's correct.

1 ATTORNEY STRANG: Okay. Is the State
2 not offering --

3 ATTORNEY KRATZ: Oh, no, we -- we were
4 offering that. That wasn't included, Janet, this
5 morning.

6 THE CLERK: It was marked as a defense
7 exhibit.

8 ATTORNEY KRATZ: Yes, we would offer
9 that.

10 ATTORNEY STRANG: Okay. And that's --
11 there's no objection.

12 THE COURT: All right, 372 is admitted.

13 ATTORNEY STRANG: I think 361 is in.
14 That was the other Zimmerman exhibit.

15 THE CLERK: Yes.

16 THE COURT: Yes. The clerk informs it's
17 already admitted.

18 ATTORNEY STRANG: All right.

19 THE COURT: Very well.

20 ATTORNEY STRANG: Anything else that was
21 withdrawn?

22 ATTORNEY KRATZ: There was a
23 duplicate -- 492 is a duplicate. We simply gave
24 that back to the clerk.

25 ATTORNEY STRANG: And, then, um, 126 was

1 a -- was a defense exhibit. It's the CD of the
2 radio log dispatch, November 5. I -- if -- if --
3 I move that in if I forgot to at the time.

4 ATTORNEY KRATZ: No objection, Judge.

5 THE COURT: All right, 126 is admitted.
6 Anything else?

7 ATTORNEY STRANG: I don't think we've
8 covered all the withdrawn exhibits. Just so my
9 records are straight, then we're okay.

10 THE CLERK: I believe so.

11 ATTORNEY STRANG: Okay. We're set.

12 THE COURT: Uh, at this time we'll call in
13 the jury then. And, Counsel, I've been informed
14 there still is a member of the jury who's not
15 feeling well, so if we have a fast recess, you'll
16 know why.

17 ATTORNEY KRATZ: Okay.

18 (Jurors in at 1:41 p.m.)

19 THE COURT: You may be seated. At this
20 time, uh, we'll begin the defense case, then.
21 Mr. Strang, you may call your first witness.

22 ATTORNEY STRANG: Thank you, Your Honor.
23 The, uh, defense calls Lisa Buchner as its first
24 witness. She'll swear you in.

25 THE CLERK: Please remain standing. Raise

1 your right hand.

2 **LISA BUCHNER,**

3 called as a witness herein, having been first duly
4 sworn, was examined and testified as follows:

5 THE CLERK: Please be seated. Please state
6 your name and spell your last name for the record.

7 THE WITNESS: Um, Lisa Buchner,
8 B-u-c-h-n-e-r.

9 **DIRECT EXAMINATION**

10 BY ATTORNEY STRANG:

11 Q Good afternoon, Ms. -- Ms. Buchner. You'll
12 probably have to stay somewhere close to the
13 microphone --

14 A Okay.

15 Q -- um, as it doesn't pick up very far away. Um,
16 back in, uh, October of 2005, did you live, uh,
17 in Manitowoc County?

18 A Uh, yes.

19 Q Did you also work in Manitowoc County?

20 A Yes.

21 Q Um, had you been in Manitowoc County for some
22 time at that point?

23 A Yes.

24 Q How were you working, uh, back in October, 2005?

25 A I drove school bus for Mishicot.

1 Q For the entire school district?

2 A Yes.

3 Q Okay. And when you say drove school bus for
4 Mishicot, were you assigned to one school, or
5 more than one school, or how did that work?

6 A Um, I picked up at, uh, Holy Cross, the elementary,
7 and the middle school, and high school.

8 Q Okay. So you're actually covering four schools?

9 A Yeah.

10 Q I mean, Holy Cross is one?

11 A Right.

12 Q And then there's, uh, Mishicot Elementary; is
13 that right?

14 A (No verbal response.)

15 Q Mishicot Middle School?

16 A (No verbal response.)

17 Q You'll have to say yes or no for --

18 A Oh, okay.

19 Q -- the court reporter. And the Mishicot High
20 School?

21 A Yes.

22 Q Okay. Uh, about how long did you drive school
23 bus for the Mishicot schools?

24 A About a year-and-a-half.

25 Q And you were doing that all -- all through the

1 month of October, 2005? That was in that
2 year-and-a-half?

3 A Yes.

4 Q Okay. Um, so would -- would your school bus --
5 was it -- is it a standard big longer yellow
6 school bus?

7 A Yes.

8 Q Okay. Would your school bus have kids from five
9 or six years old up to 17?

10 A Yes.

11 Q All right. And, um, did you have a morning
12 route, an afternoon route, or both?

13 A I had a morning and afternoon.

14 Q Okay. Uh, what -- what time would you start your
15 morning route?

16 A Um, I'm not really sure. I don't remember what time
17 I would have started in the morning.

18 Q Okay. Do you remember when you had to be at the
19 first school?

20 A To drop the kids off?

21 Q Right.

22 A Um, I don't recall.

23 Q Okay.

24 A I mean, I haven't drove bus all year so I --

25 Q Sure. And -- and it -- Actually, the exact time

1 isn't important, but what is important was did --
2 did school start at the same time everyday for
3 these --

4 A Yes.

5 Q -- schools? Okay. And then, um, same thing in
6 the afternoon? Did it let out at the same
7 time --

8 A Yes.

9 Q -- everyday?

10 A Yes.

11 Q Okay. So, um, I guess, um, in the morning, um,
12 where -- which school would you stop at first and
13 let the kids off after you picked them up?

14 A Uh, the high school.

15 Q And then would --

16 A The high school and the elem -- uh, the high school
17 and the middle school would get off together.

18 Q Because those two buildings are together?

19 A Yes.

20 Q Okay. And then where would you go from Mishicot
21 High School and Mishicot Middle School?

22 A Um, actually I would go to Holy Cross and drop off
23 first, and then I would go to the middle school and
24 high school and drop off, and then go to elementary
25 school.

1 Q Okay. And that's in the morning?

2 A Yes.

3 Q When you're dropping all the kids off? Okay. Is
4 that right?

5 A Yes.

6 Q Okay. All right. Holy Cross is just a private
7 school; is that --

8 A Right.

9 Q Okay. Um, and then, in the afternoon, um, where
10 would you first pick kids up at the end of the
11 day?

12 A Holy Cross.

13 Q Where would --

14 A At 2:30.

15 Q -- you go after Holy Cross?

16 A Uh, elementary school.

17 Q And then?

18 A High school, middle school.

19 Q Again, a joint --

20 A Yes.

21 Q -- stop?

22 A Yes.

23 Q Okay. Um, and, uh, do you remember what time you
24 had to be in the afternoon at the -- at the first
25 school, Holy Cross, to pick the kids up?

1 A I'd be there at 2:30.

2 Q Okay. And do you remember when you had to be at
3 the Mishicot Elementary School?

4 A At 2:45.

5 Q How about, then, at the, uh, middle school and
6 the high school?

7 A I'm not sure on the time. We just followed after the
8 elementary let out and everybody loaded the buses.

9 Q Then you would just -- as soon as the elementary
10 kids were loaded on, you'd go straight to the
11 high school --

12 A Yes.

13 Q -- and middle school? Okay. Um, and the
14 afternoon route, did you drive the same route
15 everyday, so to speak? I mean, stop at the same
16 places in the same order everyday?

17 A Yes.

18 Q Um, and what time would you typically finish?
19 You know, drop the last kid off in the afternoon?

20 A Um, 4:00.

21 Q Was that pretty predictable?

22 A Yes.

23 Q I mean, unless there was really bad weather or
24 something or --

25 A Right.

1 Q Okay. Um, and I take it everyday you'd be making
2 exactly the same stops unless --

3 A Somebody was not --

4 Q -- kid missed school or something?

5 A Yes.

6 Q Hm?

7 A Yes.

8 Q Okay. When we talk over each other, one --

9 A Sorry.

10 Q -- of our mikes cuts out, so... Um, were --
11 did -- did you pick up, uh, two boys, whose last
12 name was Dassey, back in October of 2005?

13 A Yes.

14 Q They -- they rode the bus every school day?

15 A Yes.

16 Q Okay. Did -- and did you pick them up in the
17 morning?

18 A Yes.

19 Q Where did you pick the Dassey boys up in the
20 morning?

21 A Right in front of their driveway.

22 Q And can you tell us sort of where that was?

23 A Uh, down -- I believe, it's Avery Road. Not really
24 sure.

25 Q How would you get to Avery Road?

1 A I would -- What do you mean?

2 Q What -- what -- what larger road would you use

3 to --

4 A 147.

5 Q -- get -- Okay. And then you would turn down

6 Avery Road?

7 A Yes.

8 Q Where would you go when you turned down Avery

9 Road?

10 A I would go to the end and pick the boys up in front

11 of their driveway and then turn around.

12 Q Okay. So when you say "the end", down to the end

13 of the paved road that ran north/south?

14 A Yes. It was a paved road and they were on a gravel

15 road.

16 Q That you're calling their driveway?

17 A Yes.

18 Q Okay. Um, as you're driving down Avery Road,

19 which -- uh, which side of you was the driveway

20 on?

21 A The right.

22 Q Okay. And then what did you do at the end of

23 that road? Or how did you go to the next stop

24 from that --

25 A I would have to turn around and come back out the

1 same way.

2 Q Turn the bus around --

3 A Yes.

4 Q -- and -- Okay. Do you remember that -- the
5 first names of the Dassey boys?

6 A Um, Blaine and Brendan, I think.

7 Q All right. And did -- then did you also drop
8 Blaine and Brendan Dassey off in the afternoon?

9 A Yes.

10 Q Um, in the same order that you dropped -- you
11 know, I mean, you would go in the same rote in
12 the afternoon?

13 A The morning route would be different than the
14 afternoon route, but they were always the same
15 everyday.

16 Q The afternoon route would be the same everyday?

17 A Yes.

18 Q Okay. Um, and what time did you find that you
19 got to that -- you know, the end of Avery Road
20 where you dropped the Dassey boys off?

21 A Um, between 3:30 and 4 -- or 3:40.

22 Q Between 3:30 and 3:40?

23 A Yes.

24 Q And how do you know that?

25 A Because it was about the same time everyday. Same

1 route.

2 Q Okay. Um, during the week of -- that began on
3 Monday, October 31, 2005, um, do you remember
4 seeing anything that, you know, you remembered
5 later when you dropped the Dassey boys off on
6 that -- that week?

7 A I, um, remember seeing a woman taking photographs.

8 Q Could you tell what the woman was taking
9 photographs of?

10 A A van.

11 Q And where -- where was the woman taking
12 photographs of a van?

13 A In the driveway.

14 Q The driveway you just described?

15 A Yeah. The one on the right.

16 Q Okay. About -- Could you see about how far down
17 the van was?

18 A It was right by the pavement. In the -- I mean,
19 right at -- right there. I don't know.

20 Q Okay. Um, remember anything about the van?

21 A It was -- No, it was junk.

22 Q Okay. All right. And, um, do you remember
23 where -- How did you know the woman was taking
24 photographs?

25 A I saw a woman taking photographs. I saw a camera.

1 Q Okay. Um, at the time, I assume, this was no big
2 deal?

3 A No.

4 Q All right. Uh, how is it that you later
5 remembered that?

6 A I remember, um, that I -- I was laying -- laying down
7 on the couch and I remembered that I made the comment
8 to myself, um, why would anybody take a piece -- a
9 picture of that piece of junk?

10 Q Okay. Um, and within a few days after this, um,
11 did -- were you encountering the -- the road
12 being closed off by police in that general area?

13 A The road was closed off, yes.

14 Q I mean, a few days after the -- you saw this
15 woman taking photographs of the van?

16 A Um, when I remembered, it was already closed off.

17 Q Okay. Um, now, as you sit here today, do you --
18 do you remember what day, exactly, of the week of
19 October 31 you saw the woman taking photographs
20 of the junky van?

21 A Uh, no I don't remember the day.

22 Q Okay. Do -- was there only one day when you saw
23 a woman in October, 2005, or early November, if
24 that's what it was, taking pictures --

25 ATTORNEY GAHN: Objection, Your Honor.

1 The -- He's leading the witness for a while now.

2 THE COURT: Um, well, I don't think that
3 last question's leading so I'm going to allow it.

4 ATTORNEY STRANG: Okay.

5 Q (By Attorney Strang) Was -- was there more than
6 one day in this time period when you saw a woman
7 taking photographs of the junky van?

8 A Uh, not that I remember. I only remember seeing one
9 woman taking pictures.

10 Q Okay. Um, do you personally know Steven Avery?

11 A No.

12 Q Uh, do you personally know any of Halbach family?

13 A No.

14 Q Okay. Um, I -- I -- I take it, if I understand,
15 you -- you simply happened to be a bus driver who
16 dropped the Dassey boys off?

17 A Yes.

18 Q And picked them up?

19 A Yes.

20 Q Um, when you saw this woman taking the
21 photographs, was -- was that when you were
22 dropping the Dassey boys off or some other time?

23 A Um, when I was dropping them off.

24 Q Okay. So in -- again, that would have been about
25 when? What --

1 A Three-thirty.

2 Q -- time of day?

3 A I'm sorry. Three-thirty to three-forty.

4 Q That's all I have. Thank you.

5 THE COURT: Mr. Gahn?

6 ATTORNEY GAHN: Yes, Your Honor.

7 THE COURT: You may proceed.

8 ATTORNEY GAHN: Thank you.

9 **CROSS-EXAMINATION**

10 BY ATTORNEY GAHN:

11 Q Good afternoon, Ms. Buchner. Um, do you recall
12 when you, um, reported this? What -- Your
13 observations to the police?

14 A I believe it was Saturday.

15 Q Saturday? Could -- could it have been, um,
16 Monday? The following Monday? On -- on
17 November 7 --

18 A Could have been.

19 Q -- do you recall? Okay. And do you remember,
20 um, how did you contact the police?

21 A I walked up to the barrier.

22 Q And, um -- and what prompted you to -- to go to
23 the police?

24 A Because I had remembered seeing a woman taking
25 pictures.

1 Q Okay.

2 A And I thought maybe I should say something.

3 Q As a good citizen?

4 A Yeah.

5 Q Okay. And, um, do you, um, remember who you
6 talked to?

7 A Um, when?

8 Q Uh, when you reported this.

9 A Uh, when I walked up to the barrier, and there was a
10 woman cop, and I spoke -- spoke to a male cop, but I
11 don't remember the name.

12 Q And this was over at the Avery Salvage Yard you
13 went to report this; correct?

14 A It was -- it was at a barrier by my house.

15 Q I'm sorry? By where?

16 A By my house where I lived.

17 Q Do you live nearby?

18 A Yeah. I did.

19 Q Do you -- so -- where did you live, then?

20 A I lived, um, on County Road Q.

21 Q And how far was that from the Avery Salvage Yard?

22 A I don't know. Not far. I don't --

23 Q Uh, did you drive over there or walk over there?

24 A I walked to the barrier at the intersection.

25 Q Okay. And -- and when you say "the barrier", you

1 mean the barrier over at the Avery Salvage
2 Yard?

3 A No. The barrier at the intersection of Q and -- and
4 147. The barrier --

5 Q But then from there did you go further to the,
6 um -- towards the Avery property?

7 A An -- another day I did. They called me back a
8 different day.

9 Q Oh. And -- and -- All right. So -- Did you talk
10 to anyone or tell anyone that first time you went
11 to the barrier?

12 A Tell them what?

13 Q What you just -- what you're telling today?

14 A Yes.

15 Q And then you say you went back again?

16 A And gave a statement.

17 Q Okay. And do you remember to whom it was you
18 gave a statement?

19 A No.

20 Q Okay. Could it have been Detective -- Officer
21 Wiegert, here?

22 A Um --

23 Q He's sitting right here behind --

24 A The glasses? I -- I think I was in his -- in his
25 cruise -- in his cop car. I don't -- I don't

1 remember. There was a cop I talked to, too, and then
2 somebody in a building.

3 Q And was that over by the Avery Salvage Yard?

4 A Yes.

5 Q Okay. All right. Um, and you -- you told him on
6 that day these observations of yours; correct?

7 A Yes.

8 Q And you can't tell us, though, to the exactly
9 what day it was you made these observations?

10 A No.

11 Q And can you say for sure whether it was the week
12 of October 31?

13 A No.

14 Q Could it have been before October 31?

15 A Yes.

16 Q Could it have been a week before?

17 A Yes.

18 Q Could it have been two weeks before?

19 A Yes. I -- I don't know.

20 Q So you don't know exactly when it was you saw
21 this woman taking pictures?

22 A No.

23 Q And do you remember -- Well, let me ask you this:
24 How close did you get to her?

25 A I have no idea how far away it would have been. I

1 was in a school bus, dropped kids off and drove away.

2 I'm --

3 Q I mean, um, five feet? Ten feet? Twenty feet
4 away?

5 A Um, not really sure.

6 Q Um, two blocks away?

7 A No.

8 Q Okay. Could you just give us an idea --

9 A Um --

10 Q -- of how far away she was when you saw her? And
11 it's okay if you can't.

12 A I -- I have no idea.

13 Q And that's okay. Um, and do you know where the
14 vehicles were that she was taking photographs of?

15 A They were at the end of the driveway.

16 Q And at the end of the -- where you enter the
17 Avery property?

18 A The, uh -- the gravel driveway to the right off of,
19 um, Avery Road by the mailboxes.

20 Q By -- Um, if you were to see a diagram of that
21 property, could that help you?

22 A Yes.

23 Q Very good. Thank you, ma'am. I'm putting up,
24 um, what has been previously, in this trial,
25 ma'am, as Exhibit 81, and I'm going to ask you,

1 does that have the road that you would drive down
2 to pick up or drop off the boys?

3 A The, um, road where all the cars are parked? That's
4 Avery Road?

5 Q Okay. Is it -- And -- and to -- are you sh --
6 sure that's Av -- that's Avery Road?

7 A I -- I don't know. I'm asking. Is it?

8 Q Okay. Yes, that's Avery Road.

9 A And then the gravel road would be the one to the
10 right there.

11 Q And where were the -- where -- If I were to give
12 you a laser pointer, could you show us where the
13 woman was taking pictures on this --

14 A Yes.

15 Q Okay. And, also, um, Ms. Buchner, let me know if
16 it would be helpful, because we can zoom in to
17 these intersections --

18 A Okay.

19 Q -- and make this closer. Could -- could you show
20 the jurors where Avery Road is and --

21 A Oh.

22 Q -- where you would drive your bus in?

23 A I would drive this way and then drop off right there.

24 Q Okay. That's where you would drop off the boys?

25 A Yeah. And then turn around right there.

1 Q All right. And where did you see the woman who
2 you believe was taking the pictures?

3 A Would be in the middle of right there. And --

4 Q And --

5 A -- taking --

6 Q You're -- You're doing just fine. Thank you.
7 Could you also -- Would there be any way to show
8 the jurors where you believe the cars were that
9 she was taking photographs of?

10 A Um, right there would be -- right there and on both
11 sides of this driveway right there. There was the
12 van, and then a car, and then a car on the other
13 side, and I think a car behind it, but I'm not sure.

14 Q And when you dropped the boys off after school,
15 is that where you always dropped them off?

16 A Yes.

17 Q Do you know how many cars she was taking
18 photographs of?

19 A No.

20 Q And, um, could you describe any of the clothing?

21 A No.

22 Q Could it have been a man with long hair?

23 A I don't think so.

24 Q Okay. I -- I'm just -- I know -- You're --
25 you're sure it was a woman?

1 A Yes, I remember it being a woman.

2 Q Okay. All right. Thank you so much, Ms.

3 Buchner. Appreciate it.

4 THE COURT: Mr. Strang?

5 **REDIRECT EXAMINATION**

6 BY MR. STRANG:

7 Q Ms. Buchner, um, I understand you don't remember
8 the day anymore, but did you -- did you -- did --
9 did you -- you walked up to tell the police about
10 this on your own?

11 A Yes.

12 Q And was that just a few days after this happened?

13 A Um, I believe it was Saturday.

14 Q Of the same week?

15 A Right.

16 Q At the end of that week? Okay. And then you --
17 then they asked you to come back a few days later
18 and give a statement?

19 A Yes.

20 Q But that was still a week or a little more than a
21 week after this -- after you saw this woman
22 taking the picture of the van?

23 A Yes.

24 Q Uh, that's all I have. Thanks.

25 THE COURT: Very well. You are excused.

1 Defense may call its next witness.

2 ATTORNEY STRANG: And that witness is a
3 gentleman named John Leurquin.

4 THE CLERK: Please raise your right hand.

5 **JOHN LEURQUIN,**

6 called as a witness herein, having been first duly
7 sworn, was examined and testified as follows:

8 THE CLERK: Please be seated. Please state
9 your name and spell your last name for the record.

10 THE WITNESS: John T. Leurquin,
11 L-e-u-r-q-u-i-n.

12 **DIRECT EXAMINATION**

13 BY ATTORNEY BUTING:

14 Q Good afternoon, Mr. Leurquin.

15 A Good afternoon.

16 Q Did we just meet?

17 A Yes.

18 Q For the first time today?

19 A Yes.

20 Q Okay. Can you, uh, tell the jury how you're
21 employed?

22 A Uh, I'm employed at Valders Co-op. I de -- I deliver
23 propane with a -- a propane truck.

24 Q Okay. And when you say you deliver propane, who
25 do you deliver it to?

1 A Residential and commercial customers.

2 Q Okay. And this is a, uh -- a -- a -- like a big
3 bulk tanker-type truck that you have or what?

4 A Yes.

5 Q Okay. And where do you get the fuel for that?

6 A Uh, my bulk tank that I load my truck is on the
7 southeast corner of Avery Road and 147.

8 Q Okay. We have, uh, Exhibit 91 up on the screen
9 for you. Um, I don't know if that can orient
10 you -- orient yourself by that at all? You don't
11 usually see it viewed from that side, from that
12 far up, I'm sure, but... Do you know where
13 Highway 47 is on that? One forty-seven, rather?

14 A Uh, yeah, that's in the top left corner.

15 Q Okay. You have a laser pointer in front of you.
16 Um, if you could turn it on and maybe point to
17 the location where your filling station is?

18 A Right there.

19 Q Okay. And so where is Avery Road?

20 A Right here.

21 Q And where is 147?

22 A Right here.

23 Q All right. So to get to your filling station,
24 then, you would have to turn off of 147 onto
25 Avery Road, itself?

1 A Yes.

2 Q There's no other entrance way to it?

3 A Nope.

4 Q Okay. And did you have like a regular route of
5 customers that you would deliver to?

6 A Yes, I do.

7 Q Um, well, tell me how that would work?

8 A Um, when we're on our -- our computer system that
9 goes off the degree days for the route, itself, and
10 then we have call-in customers that call when they
11 want LP, so we go to whoever's on the schedule or
12 whoever calls --

13 Q Okay.

14 A -- to deliver it.

15 Q And you, uh -- What were your normal work hours?

16 A Uh, normal work hours are 7:30 to 4.

17 Q Okay. Do you ever work after that?

18 A Yes.

19 Q How would that come about?

20 A Uh, if -- if I got work I got to do or somebody calls
21 later in the day, if I ain't done, you know, I'll get
22 there yet.

23 Q Okay. Um, how often would you visit that -- Is
24 filling station the wrong term for -- What do you
25 call it?

1 A It's a bulk plant.

2 Q A bulk plant?

3 A Yeah.

4 Q Okay. How often would you visit that bulk plant
5 to fill your truck?

6 A On -- on a day like during that time it would be
7 usually once a day.

8 Q Okay. Now, during that time, jumping ahead a
9 little bit, but I'm going to direct your
10 attention now to October of 2005, okay?

11 A (No verbal response.)

12 Q You have to say yes or no --

13 A Yes.

14 Q -- you understand? Um, is most of your business
15 in the winter heating?

16 A Yes. Except for farm accounts and stuff like that.

17 Q Okay. Um, so on October 31 of 2005, was that a
18 day in which you filled your tank?

19 A Yes.

20 Q Your truck?

21 A Yes.

22 Q Um, and what was your normal process, or how --
23 during that time, when would you go to the bulk
24 plant and, you know, when would you do your
25 deliveries?

1 A I do my deliveries during the day. And then usually
2 about 3:30 I go and fill my truck, because that way
3 it's full for the end of the -- at the end of the day
4 so to the next day I can start with a full truck.

5 Q Okay. And when you said -- Can you tell me
6 how -- how you would do it? What would you have
7 to do to fill your truck?

8 A Well, I would turn on Avery Road, and then I back
9 into my plant, onto the west side of the tank, or
10 south side of the tank I should say, and get out and
11 hook the hoses up and get back into the truck.

12 Q Mind if I zoom in on this a little bit? Okay. I
13 zoomed in a little bit now. Could you, uh, use
14 the laser pointer and point out where the -- the
15 bulk plant is again? Okay. And in this
16 particular photograph do you see a lot of
17 vehicles parked along Avery Road?

18 A Yes.

19 Q Was it usually like that?

20 A On any day?

21 Q Yeah.

22 A No.

23 Q Okay. Um, this was taken on a particular day
24 and -- and we've had testimony about that. But
25 which way would your be -- your truck be facing

1 while you were filling it up?

2 A Towards Avery Road.

3 Q Okay. I don't know if you can point out where

4 the -- the tank where you would pull up to is?

5 Okay. And so you would be facing this way? Uh,

6 what, west? Southwest would it be?

7 A Yeah. Well, it would be, actually, north -- kind of

8 northwest.

9 Q Okay.

10 A 'Cause the Avery Road runs kind of northwest right

11 there.

12 Q Okay. So you -- you say you back your truck in

13 there, and you hook it up, and then what do you

14 do?

15 A I get back into my truck and I write, uh, percent

16 number down on my log book and just basically wait

17 'til it's done.

18 Q Okay. And how long would it take for you to fill

19 up your truck?

20 A It takes roughly about a half hour.

21 Q All right. But what do you do when you -- during

22 that half hour?

23 A Sit in my truck, listen to the radio, and when cars

24 go by, look up at cars, and that's about it.

25 Q Okay. Now, on October 31 of 2005, do you recall

1 seeing any particular vehicle that later it
2 became of interest of -- to you?

3 A Uh, yes. I recall seeing a green SUV.

4 Q Okay. When you say "a green SUV", um, how big
5 was it?

6 A Uh, midsize SUV. Not the large size.

7 Q What kind of vehicle do you have?

8 A I have a Tahoe.

9 Q And is that a full size --

10 A Uh, generally speaking, yeah.

11 Q Okay. And the -- and the vehicle you saw, was it
12 as big as that? Or smaller? Or what?

13 A It was smaller.

14 Q Okay. Um, so tell us what you saw?

15 A I seen a vehicle pass by the front of my truck, and I
16 just glanced up, and it was just a green SUV, and
17 that -- that's all.

18 Q Well, which direction was it going?

19 A Back towards Avery Road. So that would be to the
20 north. I mean, towards 147.

21 Q Can you just show us on the -- with your pointer,
22 and -- and just with your pointer kind of draw
23 direction -- the direction that it was going? So
24 did it look like it was going into the Avery Auto
25 Salvage area or out of the Avery --

1 A It was leaving.

2 Q Okay. And are you familiar with the Avery Auto
3 Salvage?

4 A Yes.

5 Q Do you know them personally?

6 A Uh, somewhat.

7 Q Are you -- Would you consider yourself a friend
8 of any of the Averys?

9 A No.

10 Q Have you ever done business there?

11 A I was there, yes.

12 Q How many times?

13 A Um, three or four times.

14 Q Okay. Um, and did you happen to see which
15 direction that green SUV went when it got to the
16 intersection of Highway 147?

17 A No, I didn't pay attention.

18 Q Did there come a time when this, um -- this
19 recollection that you have become of interest or
20 importance?

21 A Uh, not necessarily. I -- I mean, I -- I -- At
22 first, I said I recalled seeing a green SUV, but that
23 was about it. I -- I didn't think nothing of it.

24 Q Okay. Well, let -- let me -- I'm -- Let me ask
25 it this way: Did you later learn or see any kind

1 of publicity about a missing person?

2 A Yes.

3 Q And, um, was there a description of the vehicle?

4 A Yes. There was, I think, actually a picture.

5 Q Okay. And when you saw that picture, did that
6 connect in any way to you?

7 A Um --

8 ATTORNEY FALLON: Objection. There's no
9 question -- There's no, um, foundation that he
10 actually saw a picture. He said there was a
11 missing person notice.

12 ATTORNEY BUTING: I'll ask --

13 ATTORNEY FALLON: It's a foundational
14 objection --

15 ATTORNEY BUTING: I'll -- I'll --

16 ATTORNEY FALLON: A few more
17 questions --

18 ATTORNEY BUTING: I'll move back and --
19 and bring -- bring it forward a little bit.

20 THE COURT: Go ahead.

21 Q (By Attorney Buting) Do you recall the name of
22 the missing person?

23 A Yes, Teresa Halbach.

24 Q Okay. Did you see any publicity on television
25 about it?

1 A Uh, yes.

2 Q Okay. And do you recall seeing any photographs
3 on television of both Teresa and the vehicle?

4 A Yes.

5 Q All right. And what did that do -- or what did
6 that, uh -- what did you think when you saw
7 that -- this -- this missing person, and you saw
8 that vehicle, and did you also -- I'm sorry,
9 another foundation. Did you also hear any
10 information on TV and the media about where she
11 had been?

12 A Yes.

13 Q Which is where?

14 A Over at Steven Avery's.

15 Q Okay. And so did you make any kind of
16 connection?

17 A Uh, other than recall seeing that green SUV, that --
18 that's it.

19 Q Okay. Well, did you say anything to anybody?

20 A Um, at work and at home I says I possibly mighta seen
21 it and that was -- that was it.

22 Q Okay. When you say, might have seen it, what are
23 you referring to?

24 A I seen a green SUV. I can't say it was that one or a
25 different one.

1 Q Okay. Um, do you know whether it was on that
2 day? October 31?

3 A Yes.

4 Q How do you know that?

5 A Because I remembered that part.

6 Q Okay. And -- and it -- How many days after
7 October 31 was it that your memory was drawn back
8 to that day?

9 A That I was asked about it? Is that what you're
10 saying?

11 Q Or that you told anybody about it or talked about
12 it at work or whatever?

13 A Um, maybe four or five days later.

14 Q Was it right when the publicity was beginning?

15 A Yes.

16 Q About Teresa Halbach?

17 A Yes.

18 Q Okay.

19 THE COURT: Mr. Buting, is your microphone
20 on? I'm not sure.

21 THE DEFENDANT: Yeah, I think it is.

22 THE COURT: Okay. Um, oh, yeah. Okay.

23 ATTORNEY BUTING: Okay.

24 Q (By Attorney Buting) Um, okay. Can you -- As
25 you sit here -- Actually, let me do it this way.

1 When you saw this publicity about the missing
2 person and the vehicle, did you, in your own
3 mind, think, hey, that's -- that's the one I -- I
4 saw, or what -- Tell us what you thought?

5 A Um, I thought that --

6 ATTORNEY FALLON: Objection to what he
7 thought. How is that relevant now? The question
8 is, did he see it or not?

9 ATTORNEY BUTING: Well, going to his
10 memory and how he's -- recalls what he recall --
11 what he recalls.

12 ATTORNEY FALLON: It's a memory of a
13 past recorded event. I don't -- I still don't
14 see the relevance of that.

15 THE COURT: Why don't you rephrase the
16 question.

17 Q (By Attorney Buting) When you saw the -- the
18 publicity about the missing woman and her
19 vehicle, what -- what was your thought process in
20 terms of whether there was any connection to
21 anything you saw or not?

22 A That it was possible that it was hers, but that it
23 was also a -- possible that it wasn't.

24 Q Okay. So what did you do, if anything?

25 A I didn't do nothing.

1 Q Did you come forward and talk to the police?

2 A No.

3 Q Um, did there come a time when you noticed that

4 there was a roadblock near there?

5 A Yes.

6 Q When was that?

7 A Um, it started on a Saturday, I think.

8 Q Okay. What are -- what are your work days?

9 A Um, my -- it's -- it's Monday through Saturday, and

10 then I'm on call 24 hours a day.

11 Q Okay. And is that the -- the only filling

12 station or -- or pump -- uh, bulk station that

13 you used?

14 A Yes.

15 Q So when was the next time that you used it when

16 it was -- you noticed there was a roadblock?

17 A On, uh, Monday.

18 Q That would be a week after the 31st?

19 A Yes.

20 Q Okay. And was there any way for you to get to

21 your -- your bulk station without going through a

22 roadblock?

23 A No.

24 Q So what did you do at the roadblock?

25 A I stopped, and then I had to show them my driver's

1 license, tell them what I was doing.

2 Q Okay. Did you explain at all what your job was,
3 or your route, or how often you had to come
4 there?

5 A Uh, they never asked how often. I just had to tell
6 them what I was doing. What -- That I had to go
7 through there.

8 Q Okay. And did they -- They let you through?

9 A Yes.

10 Q Um, and how many days was it that you -- you did
11 it that way?

12 A Uh, usually everyday.

13 Q Well, for how many days was it when there was a
14 roadblock is what I'm asking?

15 A Oh, well, at least a week.

16 Q Okay. Did you have to give your name every time?

17 A Uh, yes.

18 Q Did you ever, uh, say anything to the -- to -- to
19 any of the police at that time about what you
20 believed you saw?

21 A No.

22 Q Why not?

23 A 'Cause I don't -- I -- I didn't think it was a --
24 a -- a definite that it was hers, or -- and I don't
25 speculate unless I know the truth.

1 Q Okay. Well, did there come a time when you --
2 when you did speak with a police officer?

3 A Yes.

4 Q Do you recall how -- Tell us how that happened?
5 Was it in person or on the phone?

6 A Uh, he called my house.

7 Q And do you recall who it was?

8 A Agent Fassbender.

9 Q Okay. Had you ever met Agent Fassbender?

10 A Um, not 'til today.

11 Q All right. Um, so tell us what you talked about
12 when you first -- when he called?

13 A Um --

14 ATTORNEY FALLON: Objection. Hearsay.

15 ATTORNEY BUTING: I'm asking for his --

16 ATTORNEY FALLON: An out of court
17 statement.

18 THE COURT: Yeah. The question should be
19 rephrased.

20 ATTORNEY BUTING: Okay.

21 Q (By Attorney Buting) Um, did Agent Fassbender
22 tell you the purpose of the call?

23 A Uh, yes, I think so.

24 Q Did he say why he was calling you?

25 A Uh --

1 Q Or how he got your name to call?

2 A He got my name from that -- that check-in log I
3 think.

4 Q Okay. You mean the -- the -- the roadblock?

5 A Yes.

6 Q And did you tell him what you saw?

7 A Yes.

8 Q What did you tell him?

9 A That it was possible that I seen a -- Well, I told
10 him that I seen a green SUV leave, but I wasn't sure
11 if it was hers or not.

12 Q All right. Did you tell him what time?

13 A Uh, yeah.

14 Q And --

15 A Yes.

16 Q -- I'm not sure you told us what time. What time
17 was it on the 31st?

18 A In between 3:30 and 4.

19 Q And how do you know that?

20 A Because that's when I loaded my truck.

21 Q All right. Thank you. That's all I have, sir.

22 THE COURT: Mr. Fallon?

23 ATTORNEY FALLON: Yes. I'm going to try
24 this mike if it doesn't work. Test. Test. Try
25 it again.

1 THE COURT: Uh, just a second. I think
2 it's No. 7, but somehow the volume --

3 ATTORNEY FALLON: I have eight.

4 THE COURT: You got eight?

5 ATTORNEY FALLON: Right.

6 THE COURT: Oh. Well, that explains that.

7 ATTORNEY BUTING: We're seven.

8 THE COURT: You're seven. Okay.

9 ATTORNEY FALLON: Thank you.

10 **CROSS-EXAMINATION**

11 BY ATTORNEY FALLON:

12 Q Uh, good afternoon, Mr. Leurquin.

13 A Good afternoon.

14 Q Um, I just want to begin, uh, I'm Tom Fallon, one
15 of the prosecutors, and, uh, just want to let you
16 know if there's something you don't know, just
17 tell us you don't know, and if you're not sure,
18 just tell us you're not sure.

19 A Okay.

20 Q There are no right or wrong answers. Just what
21 you remember, okay?

22 A Yes.

23 Q All right. Um, how long have you been working in
24 the propane fuel business?

25 A In the propane it was eight years.

1 Q All right. And as of October 31, 2005, how long
2 had you been working this particular job where
3 you were making these deliveries to residences
4 and businesses in the general Mishicot area?

5 A Uh, six years.

6 Q Six years? And would it be fair to say that, uh,
7 for six Octobers, uh, you would come to the
8 bulk -- bulk plant station that you've described
9 there and fill up at least once a day during the
10 month of October?

11 A Yes.

12 Q That would be fair?

13 A Yes.

14 Q Okay. And, um, did you always fill up at the end
15 the day or were there other times where you
16 filled up earlier in the day?

17 A Uh, there -- Well, I fill up sometimes early in the
18 day, but it's always usually at the end of the day
19 also.

20 Q Just so you get a good start the next day?

21 A Yes.

22 Q All right. Now, if you had a lot of business
23 orders, for instance, if there was something
24 going on, you might fill up more than once a day
25 even as -- as early as the end of October; right?

1 A Yes.

2 Q Okay. Now, um, I would imagine, but October 31,
3 as you think back about it now, was pretty much
4 like any other Monday morning; right?

5 A Yes.

6 Q Monday afternoon?

7 A Yes.

8 Q All right. Went to work at your usual time early
9 in the morning?

10 A Yes.

11 Q Knocked off about four?

12 A Yep.

13 Q And, um, as you think back right now, you can't
14 tell us what the weather was like that day;
15 right?

16 A No.

17 Q You don't know -- You don't remember if it was
18 cold?

19 A Uh, not offhand.

20 Q And you don't remember if it was one of those
21 really warm autumn days, do you?

22 A No.

23 Q Um, you can't tell us it was really cloudy, or
24 overcast, or bright sun that afternoon, can you?

25 A Nope.

1 Q All right. Now, um, as I understand it, the one
2 thing that you do remember is that it was a green
3 SUV that you saw?

4 A Yes.

5 Q Okay. And you said you, yourself, drive a Tahoe?

6 A Yes.

7 Q Now, that's a -- a much larger size sports
8 utility vehicle; right?

9 A Yes.

10 Q All right. And then we have the medium size,
11 then we have the compact size; right?

12 A Yes.

13 Q Uh, the SUV you saw was a medium size?

14 A Uh --

15 Q Or you don't know?

16 A Yes.

17 Q Medium, or you don't know? Which --

18 A Um, medium.

19 Q Okay. Um, now, would it be fair to say that, um,
20 the car drove by -- your recollection is you had
21 already hooked up your pipes or your, um -- to
22 your main, uh, tank there to fill your truck;
23 right?

24 A Yes.

25 Q And you get in, you fill up, you're doing some

1 log bookwork I take it?

2 A Yes.

3 Q Uh, listening to the radio?

4 A Yes.

5 Q Uh, so you've got 30 minutes to kill, more or
6 less, to fill a relatively empty tank?

7 A Yes.

8 Q Okay. So you're not particularly paying any
9 great attention to what's going on around you I
10 would imagine; right?

11 A No.

12 Q And, uh, your recollection is is that a vehicle
13 went by?

14 A Yes.

15 Q All right. Um, so would it be fair to say you
16 look up, see a vehicle go by, and then start
17 thinking or doing something else?

18 A Yes.

19 Q All right. Now, would it be fair to say that you
20 only glanced up at this vehicle for a half a
21 second, a second, just to see that it's a car
22 going by?

23 A It's uh -- it's usually a little longer than that.

24 Q Okay. So you got a -- a good look at it?

25 A Well, not a good, great, great look, but a -- a look

1 that every time a vehicle goes by I look at -- look
2 up and see what it is.

3 Q All right. Um, in this particular case -- But
4 you can't tell us whether there was a -- a man
5 driving the vehicle or a woman, can you?

6 A Nope.

7 Q As a matter of fact, you can't tell us if it was,
8 um, um, somebody who's only 18, 19 or 20 driving
9 the vehicle? A kid, right?

10 A No.

11 Q All right. And the vehicle didn't stop; right?

12 A At the stop sign.

13 Q All right. But I mean in front of your vehicle?

14 A No.

15 Q All right. And there was nothing else unusual or
16 anything else happening on that road that
17 afternoon; right?

18 A No.

19 Q And, um, as you think about it now, the reason
20 you didn't report it, your observations, sooner
21 to law enforcement, was that you weren't really
22 sure that you had seen the vehicle they were
23 looking for; right?

24 A Yes, I wasn't sure if it was that one or not.

25 Q All right. And you didn't want to say anything,

1 because you're one of those people that likes to
2 make sure that you're right when -- if you say
3 something; right?

4 A Yes.

5 Q Uh, just like you're trying your best today to
6 remember whatever you can remember; right?

7 A Yes.

8 Q Okay. Now, you can't -- As you sit here today,
9 you can't really tell us whether you saw the
10 vehicle that the people were concerned about on
11 that day, can you?

12 A No.

13 Q In fact, whatever you saw may have even been a
14 different day?

15 A No, it was that day.

16 Q Okay. But there's nothing outstanding about that
17 day, is there?

18 A No.

19 Q No. Thanks.

20 THE COURT: Mr. Buting?

21 REDIRECT EXAMINATION

22 BY ATTORNEY BUTING:

23 Q Okay. Sir, on a -- on a typical day while you
24 were sitting there -- for about a half hour you
25 said?

1 A Yes.

2 Q Filling at the bulk station, you'd be sitting
3 there about a half hour?

4 A Yes.

5 Q How many cars on a typical day would be coming or
6 going on Avery Road?

7 A About two easily.

8 Q Okay. So just a couple of cars a day?

9 A Yep.

10 Q All right. Now, I understand your -- your memory
11 was such back then, in -- in October, November of
12 '05, that you weren't certain that the vehicle
13 that you saw go by, leaving the Avery property,
14 was the one that you later saw on TV as being
15 Teresa Halbach's; correct?

16 A Yes.

17 Q But did it look similar to the one you saw on TV?

18 A Yes.

19 Q And is that why you remembered it now or
20 remembered it back then?

21 A Uh, yes.

22 Q Okay. And as you sit here today, I understand
23 you can't tell us certainly that the vehicle you
24 saw drive out of the Avery property was Teresa
25 Halbach's, but can you tell us whether or not it

1 was similar?

2 A Yes, it was.

3 Q Did it appear to be enough similar that you --
4 you recall it and recalled it back then in -- in
5 November of '05?

6 A Yes.

7 Q Okay. Thank you.

8 THE COURT: Mr. Fallon, anything else?

9 ATTORNEY FALLON: Yes.

10 **RECROSS-EXAMINATION**

11 BY ATTORNEY FALLON:

12 Q Are you sure you were there between 3:30 and
13 4:00?

14 A Yes.

15 Q What other vehicles drove by?

16 A Uh, the ones that I remember is not -- that -- that I
17 can't -- I can't remember.

18 Q You can't remember any other vehicle?

19 A No. Because I -- I -- I see certain vehicles go by
20 everyday at certain times.

21 Q Right.

22 A And -- and, to me, I -- I can't even say that -- that
23 those vehicles drove by because I see it everyday.

24 Q Right. And, um, you don't have any specific
25 recollection of any other vehicle driving down

1 that road that afternoon, do you?

2 A No.

3 Q You didn't see any school bus drive down that
4 road, did you?

5 A No, because I see that everyday so I really --

6 Q You would --

7 A -- didn't dawn on me.

8 Q You wouldn't know if you saw it or not, would
9 you?

10 A No.

11 Q Thank you.

12 ATTORNEY BUTING: Just -- Not going to
13 go on forever. I just have a couple of questions
14 to clarify, though.

15 RE-REDIRECT EXAMINATION

16 BY ATTORNEY BUTING:

17 Q You say that you see -- Sometimes you see the
18 same vehicles everyday?

19 A Yes.

20 Q Um, would the school bus be one -- one like that?

21 A Yes.

22 Q Okay. This particular green SUV that you say you
23 recall seeing leaving the Avery property, did you
24 see it come in?

25 A No.

1 Q Was that a vehicle that you -- that you did see
2 everyday or was that a -- a different one you'd
3 never seen before?

4 A Different one.

5 Q But do you recall ever seeing it before there?

6 A Nope.

7 Q All right. That's all.

8 THE COURT: All right. Witness is excused.
9 Defense may call its next witness.

10 ATTORNEY STRANG: Next -- next up, Your
11 Honor, is, um, Roland Johnson.

12 THE CLERK: Raise your right hand.

13 **ROLAND JOHNSON,**

14 called as a witness herein, having been first duly
15 sworn, was examined and testified as follows:

16 THE CLERK: Please be seated. Please state
17 your name and spell your last name for the record.

18 THE WITNESS: Pardon?

19 THE CLERK: Please state your name and
20 spell your last name for the record.

21 THE WITNESS: My name is Roland Johnson.
22 The last name, J-o-h-n-s-o-n.

23 **DIRECT EXAMINATION**

24 BY ATTORNEY BUTING:

25 Q Okay. Sir, you're going to have to talk into the

1 microphone a little bit, okay?

2 A Okay.

3 Q Um, let me just adjust it for you. I think it
4 might work better if it's right about like that.
5 Okay?

6 A Okay.

7 Q All right. Thank you. Um, Mr. Johnson, uh, are
8 you employed?

9 A No. I'm retired.

10 Q And what did you use to do?

11 A I was a tool and diemaker.

12 Q Okay. Can you tell me where you live now? What
13 community?

14 A I live in Jackson, Wisconsin. Washington County.

15 Q Do you own any property in Manitowoc County?

16 A Yes. I own that one acre of land in the back of
17 Averys. I bought that at least 30 years ago.

18 Q Okay. Well, let's -- let's get into that a
19 little bit. Do you know any of the Averys?

20 A I know all of them.

21 Q Okay. Do you know -- Well, who's the first one
22 you came to know?

23 A Allen. Allen.

24 Q And how did that come about?

25 A I own -- or operated a bar in Manitowoc County and I

1 leased it. I didn't own it. And I met him at the
2 bar, and I was talking to him, got to know him fairly
3 well, and he -- I knew him, his brothers. I know
4 Delores. I know the whole family.

5 Q Okay. And from this relationship that grew out
6 of your acquaintance there, um, did you come at
7 some point to have some connection with the
8 property that Allen Avery owned?

9 A Yes. Allen rented that property in the back corner.
10 It was set up for a trailer with a well and septic
11 tank, and it was vacant, so he rented it to me after
12 I left the tavern. I had to have a place to go to.

13 Q You said it was just like a vacant pad?

14 A That's all it was was a vacant pad. Concrete slab.
15 And it had a well and a septic tank. At one time it
16 must have been used.

17 Q All right. Um, did you -- So did you do that?
18 Did you -- Did you go to that area?

19 A Yes. I moved my trailer up there, rented it from him
20 for a period of time. Eventually bought it from him.

21 Q All right. Just a minute. I'm going to try and
22 find a photograph to show you. I'm going to show
23 you -- Actually, I'm going to put it up on the
24 screen, if you -- Well, I'll let you look at them
25 first. Do you recognize Exhibit 39 and Exhibit

1 46?

2 A That is my trailer and that is my garage.

3 Q Okay. Now, you say that you -- you moved the --
4 the trailer -- I need the remote. I'm putting up
5 on the screen, uh, Exhibit 39. Is this the
6 trailer that you --

7 A Yes, that is my trailer.

8 Q You still own it?

9 A Yes, I do.

10 Q And are you the one who put it on that -- on its
11 current prop -- uh, parcel?

12 A Yes, I am.

13 Q Do you know when that was?

14 A Uh, probably '78 or '79.

15 Q Okay. And then showing you Exhibit 46, that is
16 what?

17 A That is my garage.

18 Q And was that there when you got there?

19 A No. We built that. Allen and I built that one.

20 Q Allen and you? All right. Um, so did you own
21 it, or were you leasing it, or how did it work?

22 A I was leasing it at the time.

23 Q And for how long did that --

24 A That was a period of maybe four or five years.

25 Q And then what happened?

1 A Then he offered -- I asked him a number of times
2 during that time if I could buy it. Finally, he
3 decided I could buy it.

4 Q And buy what?

5 A The lot that I was on. Instead of leasing it.

6 Q Okay. And so what -- What did you actually end
7 up buying? How much?

8 A I bought one acre of land in that back corner.

9 Q And do you know when that was?

10 A Not exactly. I don't remember anymore.

11 Q Okay. Well, would it have been in the '80's, or
12 the '70's, or...

13 A It would have definitely been in the '80's somewhere.

14 Q All right. I'm going to show you a -- a diagram,
15 Exhibit, uh, 111, see if that -- if you recognize
16 or can orient yourself with that?

17 A Yes.

18 Q Okay. And let me put it up on the screen and
19 let's talk about it for a moment. This is the
20 computer rendering that we -- we talked about
21 here quite a bit. Uh, do you see that round
22 brown area behind the garage?

23 A Yes, I do.

24 Q Um, is there such a place in real life as well?

25 A Yes, there is.

1 Q And how did that come to be?

2 A I was planning on building that garage longer, and I
3 got fill to level off the land to the same height as
4 the existing garage so I could just pour another slab
5 and extend that garage length.

6 Q Okay. So you -- you had that mound of dirt
7 put -- put there yourself?

8 A Yes, I did.

9 Q Do you know when that was?

10 A At least ten years ago. If not, more.

11 Q All right. So, now, you were going to extend the
12 garage but never did for some reason?

13 A Well, I wasn't living up there and it wasn't a urgent
14 need at the moment. So I just kind of put it off
15 time to time.

16 Q Okay. All right. So how long -- did -- or did
17 you -- You said you bought it. Did you actually
18 live in the trailer?

19 A Yes, I did. I lived there for at least ten years.

20 Q And can you tell me approximately when that was?

21 A Well, I would say approximately from '78 'til '88.

22 Q All right. And then what happened?

23 A I was working in, uh, Two Rivers, and I checked out
24 the wages in Milwaukee, and the wages doubled, so I
25 just opted to go back to Milwaukee and keep this

1 place as a weekend getaway.

2 Q Okay. So you switched jobs down in -- Where were
3 you working up here?

4 A I was working at Paragon Electric in Two Rivers.

5 Q Uh, is it still there?

6 A No, it's not.

7 Q Okay. And so you went down to Milwaukee to
8 change jobs?

9 A That's right. I went to Milwaukee. The wages were
10 so much higher. They were doubled or better than
11 what I was making here. So I went to Milwaukee.

12 Q Okay. And did you buy a house there?

13 A I had a house down there that I was renting out. And
14 I just told them that I'd like to move back in.
15 They'd have to find a house.

16 Q Okay. And so after you moved to Milwaukee -- You
17 say it was in '88?

18 A About 1988.

19 Q Okay. Did you, uh, continue to own this trailer
20 and this little one-acre plot?

21 A I owned that continuously from the time I bought it
22 from them 'til the present.

23 Q So you still own it?

24 A I still own it.

25 Q Okay. After you moved to Milwaukee, did you --

1 you said that you had it for a weekend getaway.

2 Did you come up and visit it?

3 A When I lived in the Milwaukee area, I came up every
4 weekend, because where I lived in Milwaukee was a
5 little too noisy to suit me on weekends.

6 Q All right. Let me ask you, um, did there come a
7 time when you rented it out -- when you stopped
8 coming as frequently?

9 A Uh, it was probably about '97 or '98 had to quit
10 coming out every weekend.

11 Q All right.

12 A It -- I moved to a quieter area where I'm now living,
13 and I didn't have to come up here as often. The
14 place was basically empty most of -- not of
15 furnishings -- but of people most of the time.

16 Q Okay. Was it furnished, though, even when no one
17 was in it?

18 A Yes, it was. It was something that I could get to on
19 a weekend or a week or whatever I wanted to stay up
20 here.

21 Q Okay. Um, did there come a time when you allowed
22 someone else to live in the trailer?

23 A Yes. A friend of mine asked if she could have a
24 friend of hers move in and use it temporarily. And I
25 agreed to this.

1 Q And who was that person that you allowed to move
2 in temporarily?

3 A It was Jodi Tikowsky (phonetic) or something.

4 Q Stachowski? Is that --

5 A That's the name.

6 Q All right. And what was -- Can you tell me when
7 that was?

8 A Probably 2003, 2004, someplace in that general time
9 limit.

10 Q Okay. And what was your arrangement? Did she
11 pay rent or how was it arranged?

12 A No. She was basically being tossed out of anything
13 other than her car, and I had the house, so the
14 friend of mine, who knows her quite well, asked if
15 she could move in. And I said, yes.

16 Q And so that was it? She didn't have to pay a
17 thing or...

18 A She -- all she had to do was cut the grass and clean
19 the house up.

20 Q Okay. Do you know Steven Avery?

21 A I know him very well.

22 Q Okay. And did there come a time when, uh, he was
23 released from prison that you recall?

24 A Yes. That was probably, what, 2002? I offered him
25 the place to stay at first, and he said he didn't

1 need it. He was going to stay with his parents.

2 Q Okay. So, initially, then, the -- the -- the
3 trailer was being occupied, to your knowledge, by
4 Jodi Stachowski?

5 A Correct. She was -- To the best of my knowledge, she
6 was supposed to be living in there. And I never said
7 that she had to live alone. And I'm not quite that
8 way.

9 Q All right. Did you at some time learn that --
10 that someone else was -- had moved in with her?

11 A Yes. After a period of time, I found out that Steve
12 had moved in with her.

13 Q Okay. Now, the furnishings in the trailer, who
14 owned those?

15 A As of the last time I looked, 90 percent of them I
16 owned. The only thing I didn't own was computer,
17 computer desk, and a bedroom -- bedroom set that was
18 in the main bedroom.

19 Q Okay. So you owned, like, the liv -- the living
20 room furniture and --

21 A That was mine. Except for that, uh, computer desk
22 that's -- that's up there. Or was up there. That
23 was new. That was added after. After I let them use
24 the house.

25 Q All right. I'm going to show you some

1 photographs that have been marked as exhibits
2 already and have you tell us about them if you
3 can. Can you tell me the first, um -- How many
4 bedrooms is this trailer?

5 A It's a two-bedroom trailer. A master bedroom and a
6 much smaller one.

7 Q All right. I'm going to show you a -- just
8 another one of these computer schematics and see
9 if this is familiar to you. Is that the layout,
10 more or less, of your trailer?

11 A Yes, it is.

12 Q And the deck around it? Did you build that deck
13 too?

14 A I built that, yes.

15 Q Okay. And you say that almost all of furnishings
16 in that trailer, even today, are yours?

17 A Yeah. Everything except that bed that's set in
18 there. My bed is the one that's in the other room.
19 That's the one I had in there. And that computer
20 desk in the living room is not mine.

21 Q Okay. There's a laser pointer here that you can
22 turn on and -- and point at some things. I guess
23 you have to hold the button in when you point.

24 A Okay.

25 Q If you could just show us, when you say, that

1 bed, and this bed, which bed are you talking
2 about?

3 A The bed over there is not mine. This bedroom is the
4 one that I had in that bedroom. This computer desk
5 here, right in here, that's not mine.

6 Q Okay. When you lived there, what bedroom did you
7 sleep in?

8 A I slept in that bedroom.

9 Q Okay. And when Jodi moved in, did she move any
10 furniture into that room?

11 A After she was there, she moved that bed in there. As
12 far as I know, that's her bedroom set.

13 Q Okay. And then she moved yours into --

14 A Into this room right here.

15 Q The smaller one? Okay.

16 A And there wasn't much room to move around the bed in
17 that bedroom.

18 Q Okay. All right. I'm going to show you
19 another -- a last exhibit, just for the record is
20 No. 101, does this item in Exhibit 167 that's on
21 the screen now look -- look familiar to you, sir?

22 A Yes. It's the gun rack I had on the wall in the
23 master bedroom.

24 Q Okay. Did you put it there?

25 A I put it there.

1 Q I'm going to show you Exhibit -- Exhibit 165.
2 Does that look familiar to you? I recognize it's
3 not in front of -- the actual item isn't in front
4 of you, but...

5 A I had a black powder rifle up there, but this one
6 looks like it's got two triggers on.

7 Q Okay. And what about this one?

8 A That looks like the Marlin .22 that I had up there.

9 Q Let me actually show you that exhibit for a
10 moment. This is Exhibit 247.

11 A That is my gun. I can remember it by the scratch
12 back here.

13 Q Okay. You're sure of that?

14 A I am sure of that now.

15 Q And when did you purchase this gun?

16 A Prior to 1977, or '76 I know for sure. I don't know
17 exactly when, but I'm positive I bought it at Fleet
18 Farm.

19 Q Okay. And where did you keep it when you lived
20 there?

21 A On the gun rack that was on the wall in the bedroom.
22 That, with the black powder rifle, were the two guns
23 that were sitting up there.

24 Q Okay. And did you -- Did you ever use that gun
25 on the property?

1 A Many times. Many, many times.

2 Q Have you ever fired that gun?

3 A I fired that gun at chipmunks, and I fired that gun
4 at targets all over the lot. I mean, I could have
5 been standing back end of the lot, down by -- far end
6 of the lot. I fired it all over the yard. I fired
7 it off the deck.

8 Q All right. What would you be shooting at?

9 A De -- Depending on -- more often than not, targets.
10 But targets of opportunity were gophers.

11 Q Gophers? Okay. Um, were there any -- Let me
12 direct your attention to the garage area, okay?
13 Did you ever fire that gun in the area of the
14 garage?

15 A I fired it all around the garage. I fired it all
16 around the lot. There, again, mostly for gophers.
17 It was fired many times.

18 Q Was there a gopher somewhere near the garage
19 or...

20 A Several of them. The whole yard was full of them.

21 Q That's -- Um, well, what would happen to the
22 shells?

23 A Basically, they'd be ejected. No matter where I was,
24 that's where they were ejected and that's where they
25 stayed.

1 Q So they would just fall on the ground?

2 A Yes, they would.

3 Q Did you pick them up?

4 A No, I did not.

5 Q Why not?

6 A Why? They're only a little .22 shell. There's no
7 value in them. They are not worth picking up.
8 They're small enough that they don't hurt anything.
9 I just left them. In fact, if you take a metal
10 detector and go over the yard, you'll probably find
11 many of them out there.

12 Q All right. Would that be true near the garage as
13 well?

14 A Anyplace on that lot, on that acre, it would be true.

15 Q All right. Did you ever fire the gun in the
16 garage?

17 A Not that I recall. I, basically, don't believe in
18 guns in a -- in a building.

19 Q Sure. I understand. But how close do you think
20 you ever were to -- to the garage when you'd be
21 shooting it?

22 A Right at the garage door opening.

23 Q Why?

24 A The main door. Here, again, gophers. I had a hole
25 under that door about that big, and I don't know how

1 far the tunnel went in, but I fired in -- into that
2 hole many times.

3 Q And that hole is where in relation to the garage?

4 A Right -- Basically, on the left-hand side of the main
5 garage door. The, um, opening garage door.

6 Q All right. I just want to verify that. I'll
7 show you Exhibit 101. Show me, approximately,
8 where these -- this gopher hole was?

9 A Approximately right in front of that truck. Right by
10 the edge of the door.

11 Q All right. Can you give me any kind of estimate
12 of how many times you would have -- well -- would
13 have fired that gun in front of you on that ac --
14 that one-acre parcel?

15 A Maybe five or six bricks, which are 500 in a brick,
16 25, 3,000 times.

17 Q Speaking of br -- of bricks, what kind of
18 ammunition did that gun use?

19 A Used .22 long rifle.

20 Q Did you buy that kind of ammunition while you
21 were there?

22 A While I was there, lot of it.

23 Q Okay. Now, you -- you left the gun there while
24 you rented it out to -- to --

25 A Yes, I did. Most of the furnishings and stuff were

1 mine, and I kind of figured if I'd come up on a
2 weekend and wanted to use it for any reason or come
3 up there, it was there.

4 Q All right.

5 A If I brought it down where I live now -- I live in
6 the city -- no use for a gun at all.

7 Q Okay. Do you know whether there was any ammo
8 that you also had in the --

9 A I could not say. I know for a fact there was
10 absolutely nothing for the black powder. For this, I
11 don't know if I had any laying around up there or
12 not. I could not tell you.

13 Q Okay. When do you think was the -- the last time
14 you would have been up on that property your --
15 yourself shooting the gun?

16 A Hm. Well, maybe --

17 THE COURT: Let's, uh -- Let's hold it
18 right there. We're going to take a break at this
19 time.

20 ATTORNEY BUTING: Okay. That's good.

21 THE COURT: Take our afternoon break.

22 ATTORNEY BUTING: Sure.

23 THE COURT: And we'll resume in 15
24 minutes.

25 (Jurors out at 2:57 p.m.)

1 THE COURT: All right. We'll come back at
2 quarter after three.

3 ATTORNEY BUTING: All right.

4 (Reconvened at 3:17 p.m.)

5 THE COURT: You may be seated. And, uh,
6 Mr. Buting, you may resume.

7 ATTORNEY BUTING: Thank you, Judge.

8 Q (By Attorney Buting) Okay. Mr. Johnson, you
9 were talking about the, um -- the -- the times
10 that you would fire that .22. By the way,
11 what -- what kind of .22 is it again?

12 A It's a long rifle. The gun is a Marlin.

13 Q All right. Do you know what model?

14 A It's a Glenfield. It was the cheapest one -- rifle
15 that you could buy, actually, at the time I bought
16 it.

17 Q Um, I think you said that around 1997 you
18 stopped -- you didn't come up as frequently to
19 the property?

20 A That's correct. No, '99.

21 Q Ninety-nine. What happened in '99?

22 A I bought my house where I'm at now. And I remember
23 exactly, it was October -- or, uh -- yeah, October
24 13, 1999. And it was a Friday the 13th. That's the
25 only reason I can remember that day.

1 Q Okay. Did you -- What happened to your house in
2 Milwaukee?

3 A It was flooded twice in a two-year period, and I
4 could not repair the house. The city of Milwaukee
5 ended up having to buy it.

6 Q Okay. Did you, then, um -- Once you moved to --
7 You say you're in Jackson?

8 A That's correct.

9 Q How frequently would you come up to the
10 property -- the one-acre property over on Avery
11 Road?

12 A Uh, basically, often enough to cut the grass and keep
13 it looking halfways decent. After that, '99.

14 Q All right.

15 A It wasn't weekly like it was before, but it was often
16 enough to keep it trimmed up a little bit.

17 Q Sure. Now, when, uh -- After Jodi Stachowski
18 moved in -- You said that was 2003?

19 A I think about 2003, 2004. Must have been 2004, not
20 2003.

21 Q Okay. After she moved in, did you continue to
22 come up to --

23 A I'd come up to visit her a number of times, yes, but
24 not -- not over -- Well, a couple times I stayed
25 overnight. I slept on the couch in the living room.

1 Q All right. And so when do you think was the last
2 time that you would have fired that .22 Marlin
3 that we had in front of you a little while ago?

4 A Probably -- It was definitely before Jodi moved in.

5 Q So sometime before 2003 or 4?

6 A Yeah.

7 Q After she moved in, you weren't in the -- uh,
8 you -- you never fired the gun again?

9 A Not up there, no. I didn't take it with me. I never
10 fired the gun again, after.

11 Q And to your knowledge, where did the gun -- where
12 was the gun after Jodi moved in?

13 A It was hanging on the wall on that gun rack in the
14 bedroom.

15 Q With the -- the -- the muzzleloader? The black
16 powder --

17 A Correct.

18 Q The -- After you -- After the police released the
19 property back to you, um, what condition did you
20 observe that it was in?

21 A The place was pretty much in complete shambles.
22 Panel was pulled off the wall. All the traps were
23 taken out the sinks. Toilet was broke out. The two
24 doors are damaged. One is completely broke and has
25 to be replaced. Garage door was broken, has to be

1 replaced. The carpeting was cut up. Couch was --
2 pieces were cut off, and it was my mother's couch,
3 which can't be replaced. And --

4 Q All right. Let me ask you about the carpeting
5 for a minute. The carpeting inside the
6 trailer --

7 A Yes.

8 Q -- um, how long had that been there?

9 A About a year. Before Jodi.

10 Q A year before Jodi?

11 A Yeah.

12 Q All right. So maybe a couple years before the
13 police search of the --

14 A Yes. As I said, it probably was used carpeting. It
15 was in excellent condition and I had somebody install
16 it.

17 Q All right. I'm going to show you a few more
18 exhibits. There's an item that we had some
19 discussion about in this trial. It's depicted in
20 Exhibit 168. If you could take a look at that
21 and tell me whether you recognize that?

22 A Yes, I recognize that. That's mine.

23 Q And what is it?

24 A It's a World War II model record cabinet for record
25 albums.

1 Q Now --

2 A That's why they're divided as such. You could stack
3 three albums in each one of the sections, and flat
4 records went on top.

5 Q I see. Now, it's been referred to here by some
6 people as a bookcase.

7 A Well, it's not a bookcase. But that's what it's been
8 referred to I guess.

9 Q All right. But -- but you refer to it as a -- a
10 record album --

11 A That's what it is.

12 Q -- cabinet?

13 A And it was bought in World War II. I remember that.

14 Q Okay.

15 A I was too young to be in it, but I remember what it
16 was.

17 Q I'm showing you Exhibit 169, which is sort of
18 a -- a closeup of the rear of that furniture
19 item? Um, we had some testimony that that back
20 panel was -- was loose. Did you ever see it that
21 way?

22 A I do not recall seeing it that way.

23 Q Okay. You had -- Had you checked it recently or
24 looked at it?

25 A I just looked at where it was at. I haven't looked

1 at that, specifically, because of -- it was no real
2 treasure.

3 Q Okay. I show you Exhibit 37. That's your
4 trailer?

5 A Yes, it is.

6 Q In the foreground, kind of surrounded by some
7 yellow police tape, is an item. Can you tell us
8 what that is?

9 A That's my burn barrel for burning up the paper and
10 garbage around the area.

11 Q You put it there?

12 A I did.

13 Q And did you use it?

14 A Yes, I did.

15 Q How often?

16 A Probably every time I came up there.

17 Q What sort of things would you burn there?

18 A Oil bottles, oil filters, paper garbage, and stuff
19 that comes, for the most part, in the mail, and bags
20 and stuff from the grocery store.

21 Q Was that -- Did you have a garbage pickup?

22 A No, you don't have a garbage pickup. You can go over
23 to the dump, but I never -- never went to the dump.

24 Q So what would you do with your regular household
25 garbage that would accumulate?

1 A Burn it in that barrel.

2 Q All right. Did you ever have any bigger fires

3 than -- other than --

4 A Occasionally, I would have cuttings and weeds and

5 stuff that I would burn, but it was basically just a

6 little bit further -- closer to those trees.

7 Q Out in the front here?

8 A Yes.

9 Q Did you ever burn anything back behind the

10 garage?

11 A No, I didn't.

12 Q Wasn't an area that you used for that --

13 A Not for burning.

14 Q Okay. Did you ever burn any tires?

15 A Only in the front here.

16 Q Okay. Now -- That's not going to work. The

17 barrel appears to be rusty. Um, was it new when

18 you bought it?

19 A When I put it there, it was new, but after the first

20 time you burn it, it's, you know, rust overnight.

21 You get that barrel hot and it will rust.

22 Q How do you know that?

23 A I'm a tool and diemaker. I have an idea what metal

24 does.

25 Q Okay. Showing you Exhibit 145. Can you

1 recognize this?

2 A Yes, I do.

3 Q What is it, sir?

4 A It's a aluminum melting smelter at Mr. Avery's
5 property.

6 Q Did you ever see anyone operating that smelter?

7 A Yes, I did.

8 Q And who would -- Who?

9 A Allen has --

10 ATTORNEY KRATZ: Judge --

11 A -- operated it.

12 ATTORNEY KRATZ: Judge, objection,

13 unless we establish a time frame, please.

14 Otherwise it's just not relevant to this case.

15 ATTORNEY BUTING: It's foundation.

16 THE COURT: Well, I think a time frame can
17 be used for foundation. I'll sustain the objection.

18 Q (By Attorney Buting) Um, well, tell us, first,
19 how often do you think you saw someone operating
20 this smelter?

21 A Three, four times for sure.

22 Q Okay. And when you think was the last time you
23 saw it?

24 A I honestly couldn't even give you a -- a date. I was
25 up there, and I remember Allen burning -- melting

1 down transmission housings and various other things,
2 but I can't tell you what -- when it was.

3 Q The, uh -- To me, as I see this, it looks kind of
4 rusted. Would you agree?

5 A It's definitely rusted. But anytime you put high
6 heat on metal, it'll rust.

7 Q Does it -- When you saw it being operated, did
8 it, uh, look like that either while it was being
9 used or -- or shortly thereafter?

10 A Shortly after. But while it's being used, it's
11 almost red hot.

12 Q Really? The whole --

13 A Yeah.

14 Q The whole outside panels?

15 A It will get real close to red.

16 Q And then how soon after that does it -- would it
17 have -- would it turn into a condition similar to
18 this?

19 A Probably overnight.

20 Q Really? As you see this smelter in its current
21 condition, did that look consistent with the
22 smelter that -- as -- how the smelter would
23 appear to you shortly after you saw someone using
24 it?

25 ATTORNEY KRATZ: Objection. Irrelevant,

1 Your Honor.

2 THE WITNESS: Yeah.

3 THE COURT: Uh, just a minute. Stop a
4 minute.

5 THE WITNESS: Okay.

6 THE COURT: Um, I -- I'm going to
7 sustain the objection.

8 Q (By Attorney Buting) As you look at the smelter
9 in -- in this picture, is there any -- does this
10 picture -- I'm sorry. Does -- does the condition
11 of the smelter tell you anything about how
12 recently or how long ago it had been used before
13 this photograph was taken?

14 A Not at all.

15 Q Why not?

16 A I would imagine if you go there right this instant it
17 would probably look the same way. I do not see
18 anything that could tell me when it was used before
19 or after. Nothing tells me that.

20 Q And what -- and what about the con -- the rust
21 condition? Doesn't that look -- tell you
22 anything?

23 A Not a bit.

24 Q Could that smelter have been used a few days
25 before that?

1 ATTORNEY FALLON: Objection.

2 Speculation.

3 ATTORNEY KRATZ: Objection.

4 Speculation, Judge.

5 THE WITNESS: It's -- it's --

6 THE COURT: Sus -- sus -- Sustained. The
7 objection's sustained.

8 Q (By Attorney Buting) All right. Thank you, sir.

9 ATTORNEY BUTING: That's all I have.

10 THE COURT: Mr. Fallon or Mr. Kratz?

11 ATTORNEY KRATZ: Yes. Janet, could you
12 get me, uh, Exhibit 248, please, while I start
13 my -- It's the other gun that we haven't seen
14 yet.

15 **CROSS-EXAMINATION**

16 BY ATTORNEY KRATZ:

17 Q Good afternoon, Mr. Johnson. How are you?

18 A Hello. I'm fine, thank you.

19 Q Mr. Johnson, prior to the 31st of October of
20 2005, when had you last seen your friend, Steven
21 Avery?

22 A I don't know. It was probably a month before, maybe.
23 I do not know for sure. I can't recall any reason
24 that I would have been out there.

25 Q Was it a month before?

1 A Could have been.

2 Q Do you remember, Mr. Johnson, being interviewed
3 by law enforcement officers in this case?

4 A Yes, I do.

5 Q And do you remember being interviewed on February
6 6 of 2006?

7 A Yes. That was at my house in Jackson.

8 Q Okay. At that time, Mr., uh, Johnson, do you
9 remember telling law enforcement officers that
10 you must have seen Steven Avery just prior to
11 October 31 of 2005?

12 A Yes, I do, because he had a cut on his hand.

13 Q Who's he?

14 A Steve.

15 Q Can you describe that cut for us, please?

16 A I can't even -- It's not uncommon to have your hands
17 cut in the junkyard, but I can't -- it was across --
18 it was a pretty nasty gash.

19 Q Across which finger? Do you remember?

20 A I think it was across the knuckle or the hand. I
21 can't swear to it.

22 ATTORNEY BUTING: Record should reflect
23 the witness was pointing to the, um -- Do that
24 again, sir?

25 ATTORNEY KRATZ: Well, no, I asked him

1 which finger.

2 Q (By Attorney Kratz) Do you know which finger,
3 Mr. Johnson?

4 A I think it was acrossed -- right acrossed the, what,
5 index finger?

6 ATTORNEY BUTING: All right. Record
7 should reflect --

8 THE WITNESS: It was --

9 ATTORNEY BUTING: -- he's --

10 THE WITNESS: -- a jagged-looking cut.

11 ATTORNEY BUTING: Sir, just one moment.
12 The record should reflect that he's pointing to
13 the -- the back or side of his hands, right near
14 the knuckles. And it, um --

15 THE COURT: I can't see his hand. Is that
16 a fair characterization, Counsel?

17 ATTORNEY KRATZ: I -- I suspect, Judge,
18 that's what Mr. Johnson today is saying.

19 THE COURT: All right. The record will so
20 reflect.

21 Q (By Attorney Kratz) Mr. Johnson, I'm going to
22 show you what's been marked for -- and, in fact,
23 received for identification, as Exhibit No. 193.
24 Do you see that?

25 A Yeah.

1 Q You know what that is?

2 A It's a cut finger.

3 Q Do you know whose finger that is?

4 A Not really. I can't see a face so I couldn't tell
5 you, but I can assume.

6 Q Does that -- Does that cut look, uh, the same or
7 similar as the cut that you described --

8 A Yes, it does.

9 Q -- to law enforcement? Mr. Johnson, you're going
10 to have to wait until I finish an -- asking --

11 A Oh.

12 Q -- my question. Otherwise, this young lady here
13 is going to get angry with one of us and it will
14 probably be me. Okay? Do you remember, uh,
15 seeing, a -- seeing a cut that looked just like
16 that on Mr. Avery's hand; is that right?

17 A A gash of that type, yes.

18 Q Do you remember telling law enforcement that you
19 saw that just before October 31 of 2005?

20 A I think I do. I remember the nasty-looking cut.
21 That's all I can say. I thought it should have been
22 stitched.

23 Q Mr. Johnson, I'm going to have Mr. Fassbender
24 hand you, um, what has been received as Exhibit
25 No. 248 and have you take a look at that firearm

1 and tell the jury if you recognize it?

2 A If it's got a wooden ramrod, it's mine.

3 Q Well, first take a look at Exhibit No. 248. Tell

4 us what that is, please?

5 A That is a firearm. A black powder gun.

6 Q All right. Um, have you ever seen this gun

7 before?

8 A I seen one. If it isn't the same one, it's almost

9 identically the same.

10 Q All right. Do you -- do you feel comfortable

11 handling that weapon? Or would you prefer

12 that -- that somebody else -- I want you to look

13 at both sides of it just to -- to make sure. Um,

14 you -- you feel comfortable in handling a -- a

15 weapon, I assume?

16 A (Unintelligible.)

17 Q In looking at both sides of Exhibit No. 248, do

18 you recognize that gun and have you ever seen it

19 before?

20 A Yes, I did. And now I remember. Yes, I have. That

21 was my gun.

22 Q That is. Okay. And despite having the -- It's

23 got two triggers?

24 A It's got a -- a safety device.

25 Q All right.

1 A The most I fired out of it was about 20 rounds.
2 Twenty rounds.

3 Q All right. And I'll have that taken from you.
4 So that, and the .22 caliber Marlin, were both
5 in --

6 A Those were the two guns I had. Oops.

7 Q They were both in the master bedroom; is that
8 right? Yes?

9 A Correct.

10 Q When was the last time that you saw that,
11 Mr. Johnson?

12 A Whenever I went up there -- Jodi was living there. I
13 know that. I can't tell you what year it was. 2004?

14 Q All right. Do you know if your friend, Steve,
15 was living with Jodi at that time?

16 A By that time, yes, I did.

17 Q And so when Steve Avery was living in that
18 trailer, including in that bedroom, did you see
19 that firearm and the .22 firearm in his bedroom?

20 A I can't honestly say if I did or not, because I
21 didn't go in the bedroom at that time.

22 Q You talked about something that was called a
23 brick of ammunition. Can you describe that
24 again?

25 A It's a package of ten boxes of .22 shells.

1 Q And how many shells are in each box?

2 A Fifty in each one. There's 500 rounds in a brick.

3 Q Now, are those boxes, uh, cardboard?

4 A Yes.

5 Q And all of the ammunition, at least for the

6 .22 caliber Marlin that you owned, uh, came in

7 this brick form? Is that your testimony?

8 A That's the way I bought it. It was cheaper.

9 Q You never bought, uh, .22 caliber ammunition in

10 plastic boxes?

11 A I might have from time to time. Depends on how the

12 brick came.

13 Q All right.

14 A I don't even remember. I just went to the store and

15 bought it.

16 Q All right. So as you sit here today, you don't

17 know what kind of .22 caliber ammunition you may

18 have had in the trailer?

19 A I have no idea what brands they were. They would

20 have been several different kinds.

21 Q My question, though, is do you believe that they

22 were in these 50, uh --

23 A Yes.

24 Q -- cartridge -- They were in these 50 cartridge

25 cardboard boxes?

1 A Cardboard or plastic --

2 Q All right.

3 A -- yes.

4 Q And if I understand this correctly, then, the
5 cardboard or plastic box would be grouped
6 together and you buy them in bulk, basically; is
7 that right?

8 A You'd buy them in a packaged up in the shape of a
9 brick.

10 Q All right. I show you, Mr. Johnson, what's been
11 received as Exhibit No. 246. Ask if you
12 recognize what that is, please?

13 A It's a box of shells out of the brick.

14 Q All right. And is this --

15 A And they're .22 long rifles.

16 Q And is this the kind of shell that you had in the
17 trailer at least the last time that you were
18 there?

19 A Probably is. Very, very likely.

20 Q Now, the brand of .22 long rifle shell, it says,
21 CCI. Do you know what that stands for?

22 A I don't remember, but I bought it for my .357. I
23 bought it for a .22 caliber pistol that I had. And I
24 used it -- The pistol and the rifle used the same
25 ammunition.

1 Q And that would be a .22 long rifle -- These are
2 hollow point, uh --

3 A Yes.

4 Q -- bullets; is that right?

5 A Right.

6 Q Are you familiar at all with ammunition? Do you
7 know what a hollow point bullet is?

8 A Yes. It's one that will fragment over and expand.

9 Q In fact, when it, uh, enters whatever the target
10 is, uh, whether it's a -- an animal or something
11 else, it's intended to create more damage; is
12 that --

13 A Correct.

14 Q -- correct? On -- on the -- would be the end of
15 these shells, um, you see a, uh -- a logo -- a --
16 a -- a letter C. You see that?

17 A Yes, I do.

18 Q That how you remember those shells looking?

19 A I bought so many shells I can't honestly tell you
20 what they look like.

21 Q I understand. All right. Do you know what a
22 rimfire --

23 A Yes, I do.

24 Q If I could just finish asking the question. You
25 know what a rimfire, uh, shell is?

1 A Yes, I do.

2 Q And what is that, sir?

3 A It is one that will fire anyplace along the rim as
4 opposed to having a firing pin for a primer.

5 Q So different kind of bullets, uh, ignite or
6 operate in different kind of ways? Is -- is that
7 your understanding?

8 A That's my understanding.

9 Q And .22 caliber shells are unique, as I
10 understand, or at least are typical for having
11 this rimfire, uh, uh, capacity; is -- is that
12 true?

13 A As far as I know, it's true.

14 Q Uh, larger caliber, um, bullets, uh -- Your .357,
15 as an example, uh, you're talking about a
16 handgun; is that right?

17 A Yes.

18 Q And .357 is just a different caliber? It's a
19 much larger caliber than a .22?

20 A Correct.

21 Q That .357 bullet, as an example, would -- on the
22 end of the bullet, if I can just show this again,
23 where I'm pointing here, instead of -- of it
24 being relatively flat, would have a -- a primer
25 in the center of the bullet; is that -- is that

1 correct?

2 A That's correct.

3 Q Now, you mentioned to Mr. -- Mr. Buting on his
4 direct examination that although you shot this
5 weapon, uh, around or near the garage, that you
6 never shot it inside of the garage. Is that
7 still your testimony?

8 A That is part of my testimony. I don't believe in
9 guns in a building.

10 Q All right. And, in fact, Mr. Johnson, uh, at
11 least the last time that you were there, last
12 time that you were in the garage, did you ever
13 notice any .22 caliber shell casings inside of
14 the garage?

15 A Not that I recall.

16 Q Well, if you would have seen a .22 caliber shell
17 casing inside of the garage, is that something
18 that you think that you would have remembered?

19 A Not really.

20 Q All right. How come?

21 A As I said, I fired outside the garage door, and I
22 pointed to the area, and if the door was open, shells
23 could have land in there as well as out.

24 Q All right. How far in the garage you think those
25 shells would have landed if you fired outside the

1 garage?

2 A I have no real idea.

3 Q Well, let me show you some pictures and ask you
4 some questions. First of all, I'm going to show
5 you Exhibit No. 221. Do you know what we're
6 looking at here?

7 A .22 shell.

8 Q And I suspect just from this photo you can't tell
9 me where that was taken, can you?

10 A I cannot.

11 Q All right. In the garage, Mr. Johnson, had --
12 there was, um, stuff?

13 A Understatement.

14 Q That's a nice way of putting it. I'm showing you
15 Exhibit No. 232. Some of the stuff is, uh,
16 exhibited in this photo; is that right?

17 A Yes, it is.

18 Q Uh, you'll see a -- a red -- larger red tool box.
19 That was yours; right?

20 A Correct.

21 Q You'll see a -- next to that a green air
22 compressor? You see that?

23 A Yes. That's mine.

24 Q That's yours as well? And to the right of the
25 red tool box, do you see, uh, at least the, uh,

1 edge of a gray workbench?

2 A Yes, I see what appears to be a workbench or
3 whatever.

4 Q Well, I -- I'm going to ask you about your
5 recollection. Do you recall seeing those items
6 there the last time that you were in the garage?

7 A Yes.

8 Q In fact, all of those items, and most of the
9 things that we see in this picture --

10 ATTORNEY BUTING: Your Honor, ob -- can
11 I just ask Counsel to clarify the last time? I
12 mean, he's been -- he's probably been in the
13 garage. He still owns it. He's probably been in
14 there recently, so you might want to give that
15 time frame.

16 THE COURT: There should be clarification
17 as to time.

18 ATTORNEY KRATZ: I'd be happy to do
19 that.

20 Q (By Attorney Kratz) The last time prior to
21 October of 2005 that you were in the garage, uh,
22 did you see those items in there?

23 A Yes, I did.

24 Q Do you remember, Mr. Johnson, you saying that you
25 had, or remembering now, that you had seen your

1 friend, Steven, before or just before the 31st of
2 October? Do you remember why it was that you
3 were talking to him?

4 A No. I'm trying to think of it. I was trying to
5 think of it after --

6 Q All right. You don't --

7 A Any reason for it.

8 Q You don't remember why you were visiting him --

9 A Not really.

10 Q -- that fall, huh? You had, uh, spoke -- or
11 answered some questions from Mr. Buting about the
12 rear area of the garage. Let me just grab a
13 photo here. I think it was your testimony that
14 you hadn't burned anything behind the garage?

15 A I had not burned anything behind the garage.

16 Q Showing you what's been received as Exhibit No.
17 47. Show you what appears to be a, uh -- a
18 charred or burned area. First of all, uh, do you
19 see that in the large screen?

20 A I see it, yes.

21 Q Uh, is that, um, an area that you ever burned in?

22 A No, it is not.

23 Q Now you see, also, in this photograph, a -- a
24 shovel and some other items; is that right?

25 A Yes, I do.

1 Q Have you ever seen that shovel before?

2 A It was in the garage.

3 Q Whose shovel was it?

4 A Mine.

5 Q Now, let me ask you, Mr. Johnson, and -- and I
6 may already know because of the -- the kind of
7 person that you are, but would you have left, uh,
8 your shovel or your tools just laying out in the
9 yard like this?

10 ATTORNEY BUTING: Objection.

11 A No, they would have been back in the garage.

12 ATTORNEY BUTING: Objection.

13 Irrelevant.

14 THE COURT: Um, based on the phra --
15 phrasing of the question, I'll sustain the
16 objection.

17 Q (By Attorney Kratz) The last time that you were
18 at your property, had you ever left, uh, any
19 tools, including a shovel like that, in the
20 condition that you see in Exhibit No. 47?

21 A No, I wouldn't have.

22 Q Mr. Johnson, you had identified a -- a burn
23 barrel, um, in front of the garage. Excuse me,
24 in front of, uh, the trailer. This is another
25 view of it. It's Exhibit No. 51. Uh, does that

1 look like your burn barrel?

2 A It could very well be, yeah. I can't say that it's
3 definitely mine because all barrels look pretty much
4 alike.

5 Q I understand. Let's go to a -- a view I think
6 that's -- I think Exhibit 37 is -- is the one
7 that he had been talking about. Is that now a --
8 look like your burn barrel?

9 A Yes, it does.

10 Q Now, when you talked to the jury, or at least
11 when you testified on direct examination, you
12 called it my burn barrel; is that right?

13 A That is correct.

14 Q When's the last time you burned anything in your
15 burn barrel?

16 A Probably just after Jodi came in, because I had
17 plastic oil bottles and oil filters, which you can't
18 get rid of.

19 Q Do you know what month or year that was?

20 A Well, if she moved in in 2004, might be closer to the
21 fall of the year.

22 Q Fall of 2004? It's fair to -- I'm sorry. When
23 (unintelligible.)

24 A I would think it was 2004. I said after Jodi moved
25 in. It wasn't when the two of them were together. I

1 might have left some stuff up there for them to burn
2 for me, but that would have been the last time I
3 burned.

4 Q It's fair, then, Mr. Johnson, that at least after
5 2004, whether it was Steven Avery or Jodi
6 Stachowski, other individuals may have burned in
7 that barrel?

8 A Correct.

9 Q In fact, do you know that to be the case?

10 A No.

11 Q You just know the last time you burned in it was
12 in '04?

13 A Yes.

14 Q All right. Did you ever burn a -- Let me first
15 ask the -- the foundation question. Do you know
16 what a digital camera is?

17 A Yes, I do.

18 Q And have you ever owned a digital camera?

19 A No, I have not.

20 Q Have you ever burned a digital camera in this
21 burn barrel?

22 A No, I have not.

23 Q Do you know -- Do you know what a cell phone is?

24 A Yes, I do.

25 Q Do you own a cell phone?

1 A No, I don't.

2 Q Have you ever burned a cell phone in this burn
3 barrel?

4 A I have not.

5 Q By the way, Mr. Johnson, this, um -- this burn
6 barrel, does it appear to be in about the same
7 position, at least relative position, as compared
8 to the garage and the trailer as when you left
9 this lot?

10 A It was moved there. Originally, I lived closer to
11 the garage, and they moved it up there, and I used
12 it, or Jodi started moving it up there because it was
13 making too much smoke in the trailer.

14 Q All right. Let me ask the question a little
15 differently. Exhibit No. 37, looking at that
16 burn barrel, does that look like the last place
17 that you had seen that burn barrel?

18 A Yes, it does.

19 Q That's all I have. Thank you very much, sir.

20 THE COURT: Mr. Buting, anything else?

21 ATTORNEY BUTING: Yes.

22 **REDIRECT EXAMINATION**

23 BY ATTORNEY BUTING:

24 Q Mr. Johnson, uh, Mr. Kratz reminded you that the
25 police spoke to you in February?

1 A I don't know what month it was, but I know they spoke
2 to me.

3 Q And you recall that because it was in your --

4 A They parked in my driveway in Jackson. They pulled
5 up into the driveway, and I looked, and what's a
6 squad car doing here? Or it appeared to be a squad
7 car.

8 Q All right. At any rate, was that the first time
9 that you had spoken to any police officers about
10 this --

11 A Yes --

12 Q -- incident?

13 A -- about that. It's the first time that I can recall
14 speaking to police officers about it. And I was kind
15 of surprised that they didn't act sooner.

16 Q So that was like three months later?

17 A It was a considerable period. If it was February, I
18 can't remember the month, because I -- I know it was
19 a long period of time after what was said was done.

20 Q Sure.

21 A It seemed like a long time before they came to see
22 me.

23 Q And by that time there had been, um, reports on
24 the television about the charge against
25 Mr. Avery?

1 A I've heard the charges about him, but I didn't talk
2 to anybody about them. I didn't know anybody.

3 Q No. That's fine. I -- I'm just saying, by the
4 time they came to talk to you, you knew something
5 about --

6 A Oh, yes, I did, by that time.

7 Q Sure. Okay. And, um, when they asked you about
8 when you were last up there to see, uh, Mr. --
9 Um, let -- let me clear this up first. Mr. Kratz
10 keeps saying that when you went up to see your
11 friend, Steven Avery, is that why you would go
12 visit the property?

13 A That's part of the reason I'd go and see him. I
14 wouldn't have to have a reason to go up there.

15 Q Okay. Who -- who's the -- Of the Averys, who are
16 you the closest to?

17 A I would say Allen.

18 Q Okay. So would you go up to see Allen,
19 primarily, and then see --

20 A I'd look at my trailer, and go up to see Allen, some
21 of my other friends in the area, too.

22 Q Okay. Um, and if you told the police that you
23 thought you were up to -- to see the trailer area
24 sometime just prior to -- or prior to Halloween,
25 2005, what kind of a time frame were you thinking

1 of or what did you have in mind?

2 A I almost think about within a month of Halloween.

3 Q Okay. So you didn't mean just the -- the week

4 before or --

5 A No, I didn't mean the week before. It could have

6 been, but I don't know.

7 Q And in all the times that you would visit the

8 Averys, um, was it unusual to see cuts on their

9 hands?

10 A It's not unusual to see cuts on anybody up there. In

11 a junkyard, wrenches slip easy.

12 Q Would that include Chuck?

13 A Chuck would have cuts.

14 Q Earl?

15 A Earl.

16 Q Allen?

17 A All of them.

18 Q Okay. Did, uh -- The -- the -- the photograph

19 that Mr. Kratz put up for you, um, as I

20 understand it, you said that the -- the gash that

21 you saw, or recall Steven Avery having, was

22 similar to that?

23 A It was a wide open cut like that. That -- that's

24 what I was referring to.

25 Q But you described it when you motioned you to --

1 you --

2 A I said that's where I thought it was. I can't
3 remember for sure. I had no real reason to -- to
4 think anything more about a cut in a junkyard.

5 Q Okay. And so the photograph that Mr. Avery
6 showed you may not have been the -- the cut that
7 you discussed with the police?

8 A It is possible that it's not the same cut. I don't
9 know.

10 Q Okay. You didn't make particular note of that
11 when you saw it?

12 A There was no reason to.

13 Q And they were talking to you how much after
14 the -- the, uh, event?

15 A When the police were talking to me?

16 Q When they were asking you about this cut? This
17 was several months?

18 A Yes. And I don't even recall exactly where he was
19 cut at that time, but I do know he had a cut.

20 Q Okay. That's all I have. Thank you, sir.

21 ATTORNEY KRATZ: Nothing else, Judge.
22 Thank you.

23 THE COURT: Very well. The witness is
24 excused. The, uh, defense may call its next
25 witness.

1 ATTORNEY STRANG: Next witness is, uh --
2 if this is working -- is Debra Kakatsch.

3 THE CLERK: Raise your right hand.

4 **DEBRA KAKATSCH,**
5 called as a witness herein, having been first duly
6 sworn, was examined and testified as follows:

7 THE CLERK: Please be seated. Please state
8 your name and spell your last name for the record.

9 THE WITNESS: My name is Debra Kakatsch,
10 and it's spelled D-e-b-r-a, and the last name is
11 K-a-k-a-t-s-c-h.

12 **DIRECT EXAMINATION**

13 BY ATTORNEY STRANG:

14 Q Good afternoon.

15 A Good afternoon.

16 Q How are you employed, Ms. Kakatsch?

17 A I'm employed as the Manitowoc County Coroner.

18 Q How long have you been the Manitowoc County
19 Coroner?

20 A Uh, I'm going into my 15th year and, also, I was, uh,
21 chief deputy two years before that.

22 Q So what -- what does that mean you started?

23 A As coroner?

24 Q Or as chief deputy?

25 A Uh, chief deputy, '91-'92. Coroner started '93.

1 Q Okay. What -- what sort of, um, work background
2 did you have before becoming the chief deputy
3 coroner?

4 A Um, my background was primarily nursing at that time.
5 I worked in several different areas. I was an
6 obstetrical nurse and delivered babies. Sometimes
7 doctor always didn't get there. Uh, also worked in a
8 nursing home, taught childbirth education. Uh,
9 chemotherapy. Worked in the emergency room. Uh,
10 intensive care area.

11 Q Um, when you first started nursing, what sort of
12 nursing certification, if any, did you have?

13 A In the beginning --

14 Q Yes.

15 A -- of my nursing career? Uh, I became, um, certified
16 in obstetrics in my earlier years.

17 Q And was -- I know there are different types of
18 nursing and just different certifications. Did
19 you have any of those initially?

20 A Well, uh, to be a nurse, you need to have a license
21 under the state of Wisconsin. Um, but then I went on
22 to be certified in other areas.

23 Q What was your first license as a nurse?

24 A Licensed Practical Nurse.

25 Q Did you continue your education in the field of

1 nursing after becoming a licensed practical --
2 practical nurse?

3 A Yes, I went back to school for a registered nurse.

4 Q And did you eventually get the RN?

5 A Yes, I did.

6 Q Or registered nurse?

7 A Yes, I did, 1980.

8 Q Do you have any schooling beyond the registered
9 nurse, uh, status?

10 A Yes, I do.

11 Q What's that?

12 A Um, I went back to school and, uh, I got a Bachelor's
13 Degree in management. And then I also went back to
14 school for a paralegal degree. And then I went back
15 to school for, uh, a police science degree. Not a
16 full degree, but at that time I was looking for, um,
17 more classes to help me do my job as a, uh, coroner
18 and also in other fields that I was pursuing later
19 on. But, uh, it helped me quite a bit in, um, my
20 coroner work. And -- and by doing that I got
21 involved in teaching some things, too.

22 Q Have you had any spec -- any training specific to
23 your work as the, uh, coroner?

24 A Yes, I have. Um, I have taken, uh, numerous other
25 trainings, um, such as, uh, anthropology,

1 autopsy-type, um, courses. I've been in a number of
2 autopsies, signed permits for a number of those. Um,
3 oh, DNA. I've taken a couple of Dr. Henry Lee's
4 courses. I don't know if you're familiar with him.
5 Um, Dr. Michael Bodden. I've taken some courses from
6 Dr. --

7 Q These --

8 A -- Bodden.

9 Q These are well-known medical examiners --

10 A Yeah.

11 Q -- from --

12 A Yes.

13 Q -- Connecticut in Dr. Lee's case, um, and
14 Pennsylvania in Dr. Bodden's case?

15 A Yes.

16 Q Okay.

17 A Um, and I felt I -- I learned a lot specifically from
18 getting training from those particular people. So,
19 um, then I try to keep on that -- keep up on that
20 training, uh, every year with whatever comes along
21 that best fits the scope of my job to do it better.

22 Q Do you have any certifications, um, connected to
23 your work as coroner?

24 A Yes, I do. I'm certified as a forensic nurse.

25 Q What does that mean?

1 A Forensic nurse deals more with the -- the
2 investigation part of nursing and the medical field,
3 and, uh, to do that I had to submit numerous types of
4 educational things that I attended, and, then, uh, I
5 also had to take an advanced condensed program and
6 then write an exam.

7 Q Okay. Uh, and other than forensic nursing, um,
8 have we covered your certifications?

9 A I also got certification as, um, Homeland Security,
10 which deals with, uh, the medical field death
11 investigation, disaster-type situations, death
12 investigations.

13 Q When you say, "Homeland Security", the United
14 States Department of Homeland Security?

15 A Uh, well, it's through our organization, the American
16 College of Forensic Examiners, so --

17 Q All right. Um, in addition to the American
18 College of Forensic Examiners, do you belong to
19 any professional associations?

20 A Yes. I belong to the Wisconsin Coroners Medical
21 Examiners Association, the Forensic Nurses
22 Association. I used to belong to the Homicide
23 Investigators Association.

24 Q All right. Now, what -- what is the position of
25 coroner, um, in, uh -- in Wisconsin?

1 A In Wisconsin it, uh, revolves around death
2 investigations and it can -- the types of deaths we
3 get involved in are, um, homicides, suicides, traffic
4 accidents, industrial deaths. Um, sometimes if there
5 would be a, uh, death in police custody or in jail,
6 or bodies found, remains found, um, drug deaths,
7 emergency room deaths, drug reactions. There's many
8 things we get involved in that the State requires us
9 to investigate.

10 Q All of them in -- involve, unfortunately, someone
11 dying?

12 A Yes.

13 Q Okay. And how do you -- how do you -- how do you
14 get this job of coroner?

15 A Coroner's elected.

16 Q What -- what's the current term?

17 A The current term is four-year term now. It -- it had
18 been two years.

19 Q Okay. And, uh, when you say "elected" is that
20 a -- a municipal position? A county position? A
21 state position? What --

22 A It's a county position.

23 Q All right. Um, does -- does your work as
24 coroner, uh, involve a duty to determine manner
25 of death? Uh, at least in some instances of a

1 sudden death?

2 A Well, that's our job everyday.

3 Q Now, but -- but if a death happens, let's say, in
4 a hospital or a nursing home, would you be
5 involved, typically, in that?

6 A Sometimes we are. It depends. Um, let's say, for
7 example, a person has a hip fracture and they're in
8 the nursing home, those we have to accept as a case.
9 If someone's choked, if someone's had a drug
10 reaction, we have to accept those as case as well.

11 Q So how would we -- how would we describe simply
12 for the jury what sort of deaths become the
13 coroner's business and what don't?

14 A Well, it -- it would fit under the criteria of what I
15 explained. If there's some kind of accidental
16 nature, suicide nature, homicide nature to it, um,
17 undetermined nature, um, we have to get involved.

18 Q Okay. In other words, if it's -- if -- if it's
19 natural causes, you might not be involved?

20 A We may still be involved because you may not know the
21 death is a natural death until you completed whatever
22 you need to do to arrive at that determination.

23 Q Okay. But, I guess, if I understand you, you
24 won't be involved in every natural death if a
25 doctor has attended --

1 A No. No.

2 Q Okay. Um, do you have the -- the power to sign
3 and issue a death certificate?

4 A That's our job everyday, yes.

5 Q Do you have any statutory or, you know, duties
6 under law, to, um, uh, control the disposition of
7 human remains?

8 A Yes.

9 Q What -- what are those?

10 A Um, well, particularly where I get involved, um, with
11 disposition is unclaimed bodies, bodies that are not
12 identified. We have to provide indigent burial if we
13 don't find anybody to claim that body.

14 Q All right. Did you, um, in November of 2005, uh,
15 come to learn of some suspected human bones found
16 on or near what we call the Avery property in
17 Manitowoc County?

18 A Yes, I did.

19 Q How did you learn about that?

20 A From television.

21 Q And, um, had you had any -- any prior involvement
22 in the investigation into Teresa Halbach's
23 disappearance?

24 A Could you repeat that?

25 Q Had you -- Before you saw this on the

1 television --

2 A Uh-huh.

3 Q -- did you have any prior involvement into the
4 investigation of Teresa Halbach's --

5 A No.

6 Q -- disappearance? Okay. Um, but, again, I
7 guess, it would be a death that would trigger the
8 coroner's involvement?

9 A Yes.

10 Q What did you do after you saw on television, uh,
11 something about the discovery of possible human
12 remains?

13 A Well, I got a few phone calls, uh, and particularly
14 from my deputies, as to what the plan of action would
15 be when --

16 Q Okay. I'm going to interrupt you just a moment.
17 I'm sorry. How many deputy coroners do you have?

18 A Uh, at that time I believe it was six.

19 Q Okay. I'm sorry I -- I interrupted.

20 ATTORNEY GAHN: Your Honor, I -- I'm --
21 I'm sorry, Your Honor. I think we need to be
22 heard outside the presence of the jury.

23 THE COURT: All right. At this time the
24 Court will excuse the jurors for a few minutes.

25 (Jurors out at 4:08 p.m.)

1 THE COURT: You may be seated.

2 ATTORNEY GAHN: I believe it would be
3 better if the witness were to leave the
4 courtroom.

5 THE COURT: All right. Ms. Kakatsch, we'll
6 excuse you from the courtroom at this time.
7 Mr. Gahn?

8 ATTORNEY GAHN: Yes, um, I guess we're
9 at a loss here. We don't know what is going --
10 happening here. We've received no discovery. I
11 see that the witness has a folder in front of
12 her. Um, looks like two folders. Um, I don't
13 know if she's going to be asked to render any
14 type of opinion. I don't know if this is --
15 involves the lawsuit that was pending at the
16 time.

17 But, more importantly, on, um, just
18 January 19 of 2007, uh, one of our agents,
19 Special Agent Heimerl, um, spoke with the
20 coroner, and at that point she stated that, uh,
21 she was not aware of being on the list as a
22 potential defense witness. She stated she did
23 not know why she would be called as a witness.
24 She stated that she does not know what type of
25 testimony may be needed from her as a defense

1 witness as she felt she had no relevant
2 information.

3 So I guess, under the rules of
4 discovery, we would like to know exactly what
5 documents the defense has, what they plan to
6 elicit from this witness. Uh, we just, um, have
7 no idea.

8 THE COURT: Mr. Strang?

9 ATTORNEY STRANG: I have no documents
10 from the witness. Never have. Um, because she
11 brought the files, I asked her to bring them in,
12 anticipating that maybe the State would want to
13 see them. Um, there's no discovery I have that's
14 to be turned over. She is not an expert witness.
15 She's purely a fact witness.

16 I understand I -- I asked some questions
17 about her background, but simply by way of
18 establishing who she is and why she has the job
19 of coroner. She was, of course, listed on our
20 witness list, uh, timely filed. Um, and, um, I
21 guess they could have interviewed -- they could
22 have interviewed her, um, as I have.

23 Um, she will, um, testify, um, to the
24 response that she began, in her capacity as the
25 Manitowoc County Coroner, um, in her efforts,

1 then, to obtain access to human remains, uh, how
2 those were rebuffed by, um -- specifically by
3 Investigator Mark Wiegert, as the person with
4 whom she recalls having contact, um, and then she
5 was later, um, told that, uh, she was not to get
6 involved, um, by the unusual, she will say,
7 intervention of the Manitowoc County Executive
8 and, later, the Corporation Counsel. Uh, and in
9 the end, she was prevented from discharging her
10 statutory duties as coroner.

11 ATTORNEY GAHN: And I would ask what is
12 the relevancy of this? Um, the Manitowoc County
13 Corporation Counsel, is my understanding, wanted
14 to remove all Manitowoc County officials from
15 this investigation. Um, it was a prudent, wise
16 move on their part.

17 And to come in now, because, perhaps,
18 some disgruntled Manitowoc County employee, uh,
19 didn't like that decision? I don't see the
20 relevancy at all in this.

21 ATTORNEY STRANG: Well, it probably
22 would have been prudent to remove all Manitowoc
23 County officials from the investigation. But
24 we've heard for a month just exactly how that
25 wasn't done with the Manitowoc County Sheriff's

1 Department. And, unlike the Sheriff's
2 Department, neither Ms. Kakatsch, nor the office
3 of coroner, nor anyone in the coroner's office,
4 had any prior involvement in Steven Avery's civil
5 lawsuit. Um, hadn't been deposed, hadn't been
6 interviewed, had no statutory responsibilities
7 for the 1985 crime.

8 And, um, yet, her office alone,
9 apparently, among Manitowoc County law
10 enforcement offices, uh, was walled off entirely,
11 uh, from performing, uh, legal duties, lawful
12 duties in connection with discovery of human
13 remains.

14 THE COURT: Assuming she was walled off,
15 what's the relevance of that for purposes of this
16 trial?

17 ATTORNEY STRANG: This -- this goes
18 directly to investigative bias and decisions to
19 prefer the involvement of certain Manitowoc
20 County officials and not other Manitowoc County
21 officials even when there were statutory duties,
22 uh, to be performed in connection with a death.

23 ATTORNEY GAHN: Your Honor, now, I
24 guess, the Corporation Counsel of Manitowoc
25 County is involved in the bias in this case. Um,

1 I don't see any relevance at all. But if -- if
2 Your Honor sees some shred of, uh, relevance,
3 then I would ask the Court to give a, um,
4 analysis under 904.03 as this is just, uh -- the
5 probative value is just so low that it just, um,
6 is outweighed by the, uh -- the prejudice this
7 could cause, the confusion of issues with the
8 jury, and -- and waste of time for the jury also.

9 ATTORNEY STRANG: Well, if there's -- if
10 there's any 9-0-4-0-3 concern, I guess that would
11 um -- and turning to the Milwaukee County Medical
12 Examiner a year after this death, uh, when he had
13 no involvement at the scene, uh, rather than
14 having the local official whose job it was to
15 investigate a suspicious death, to sign a death
16 certificate, to determine manner of death, the
17 State -- the State's put all of that, uh, in play
18 with Dr. Jentzen and even trying to use an
19 anthropologist for that. Here's the official
20 under Wisconsin law whose duty it is to do
21 exactly these things, and in her county she was
22 prevented from discharging that duty.

23 THE COURT: What -- what would be her
24 competence to perform this duty considering the
25 other plain state people that we've heard from?

1 ATTORNEY STRANG: Well, unlike the
2 State, she will testify that she immediately
3 contacted a forensic pathologist with whom she's
4 worked before and immediately contacted a
5 forensic anthropologist with whom she's worked
6 before, and told them, come to the scene. We've
7 got work to do at the scene, uh, there, as part
8 of a death investigation.

9 But there, again, relevance in how the
10 recovery of bones could have been done so that a
11 more useful assessment of -- of where the body
12 was burned, uh, where remains were found and how
13 they were distributed might have been done had
14 she been allowed to do her job.

15 THE COURT: Well, this may be relevant or
16 have probative value as it relates to a turf war,
17 but I -- I'm failing to see the -- the probative
18 value of it for purposes of this case. I think it
19 has much more potential to mislead the jury, um, and
20 I -- I don't see how anything the coroner would have
21 done, um, would have somehow contributed to a less
22 biased investigation in this matter.

23 ATTORNEY STRANG: Well, I think
24 preferring one Manitowoc County office to another
25 Manitowoc County office in itself, here, Your

1 Honor, bears on investigative bias. It goes
2 directly to the issue of consistency, if you
3 will, and inconsistency that reflects a
4 particular bias. This jury is entitled to see it
5 and, uh, rule upon.

6 THE COURT: I've already given the defense
7 quite a bit of latitude. I've allowed reference to
8 the lawsuit, uh, the fact that, uh, Lenk and
9 Colborn, uh, gave their depositions. I think the
10 Court has granted the defendants, uh, adequate means
11 to make the point as it relates to bias.

12 But the, um -- this witness has nothing
13 to do with the Sheriff's Department. The
14 decisions of Manitowoc County officials, uh, not
15 to become involved that started with the, um --
16 the district attorney, and, uh, whether Manitowoc
17 County higher officials made the right decision
18 or the wrong decision, for purposes of this
19 criminal case, uh, I fail to see any measurable
20 probative value and I think the State's objection
21 is well taken.

22 ATTORNEY STRANG: I think there's also
23 probative value more narrowly in showing this
24 jury that a forensic anthropologist could have
25 been there, could have been at the scene and

1 involved in the recovery, um, had the law
2 enforcement people followed the usual lawful
3 routine of notifying the county coroner upon
4 discovery of suspected human remains. Um, that
5 could have happened here, and the normal steps
6 contemplated by Wisconsin Statutes been taken
7 here.

8 Um, so I would -- I would tender, uh,
9 that as relevant, uh, as well, uh, Your Honor.
10 Uh, there will be testimony in the defense case
11 about, um, destruction of bodies by thermal
12 injury or cremation, uh, about what could have
13 been learned if this site had been properly
14 preserved and recovered, and this is, uh,
15 foundation in part for that testimony as well.

16 THE COURT: Well, if we hear some testimony
17 from a defense expert that creates some relevance
18 I'm not aware of right now, Ms. Kakatsch could
19 always, I suppose, be recalled. But, again, uh,
20 if -- if the reason that the coroner was told to
21 stay off the case was because of fear of a conflict,
22 uh, whether there was any or not, um, I -- I -- I
23 don't believe that the -- the probative value of
24 such evidence, uh, is very great.

25 And I'm -- I'm more worried about

1 creating confusion for the jury when I think the
2 real issue, as -- as I understand it, on the bias
3 issue from the defense has been the, uh, bias,
4 specifically, of Officers Lenk and Colborn, and I
5 think the Court has, uh, allowed, uh, the defense
6 to present a great deal of evidence with regard
7 to that issue.

8 Uh, but I think to further bring the
9 coroner involved, I -- I -- I just think, uh,
10 it's too dangerous to confuse issues when weighed
11 against -- against the probative value.

12 ATTORNEY STRANG: I understand the
13 Court's ruling. I -- I respectfully, uh, suggest
14 that the bias of any witness called by the State
15 is a relevant area of exploration. It's not
16 collateral to the issue and, specifically, this
17 would be -- this witness had telephonic contact,
18 she will say, with Investigator Mark Wiegert, uh,
19 who's been identified as one of the two lead
20 investigators on the case and who testified, um,
21 yesterday.

22 So -- but -- but, again, I -- I -- I
23 recognize the rulings that the Court has made and
24 the rulings allowed us on the bias of Mr. Lenk
25 and Mr. Colborn, but the bias of any state

1 witness is relevant, particularly somebody who
2 has a role like Mr. Wiegert, uh, did here.

3 Um, if -- if -- if the Court's ruling is
4 to stand, what I would simply propose to do is to
5 make a verbal, uh, offer of proof. Proffer her
6 testimony. I can do that in three or four or
7 five minutes just by running through my -- the
8 outline for my direct examination.

9 THE COURT: Anything from the State?

10 ATTORNEY GAHN: No, Your Honor.

11 THE COURT: Well, I -- I -- Maybe I'm
12 missing something. I don't recall any questioning
13 about Ms. uh -- Detective Wiegert in this regard.
14 I'm -- I'm only basing my ruling on what I know. If
15 you want to put something on the record as to what
16 you, uh, would intend to prove, and if, uh, further
17 witnesses from the -- the defense, uh, believes you
18 should ask the Court to reconsider its decision, I
19 will. I'm making my decision based on what I know
20 now.

21 ATTORNEY STRANG: Well, and I'll -- I'll
22 make an offer of proof of what I would expect to
23 elicit from Ms. Kakatsch.

24 THE COURT: Go ahead.

25 ATTORNEY STRANG: Um, I left off with

1 asking her, essentially, how did she learn that
2 suspected human bones, uh, had been discovered on
3 the Avery property. She said she learned by
4 television.

5 Uh, she -- I would -- I expect that she
6 would then testify that her response was to talk
7 to one or more of her deputy coroners. That she
8 then called, um, a forensic pathologist named
9 Dr. Doug Kelly, who at that time worked, uh,
10 with -- although she's not sure -- he was
11 actually employed by the Waukesha County Medical
12 Examiner's Office. He's no longer there. I
13 believe he's the Fond du Lac County Medical
14 Examiner today.

15 Um, she also asked Dr. Kelly to arrange
16 the services of Patrick J. Schoebel,
17 S-c-h-o-e-b-e-l, whom she refers to as P.J., uh,
18 a forensic anthropologist with whom she had
19 worked in the past.

20 I further expect that she would testify
21 that she then contacted, um, investigators at the
22 scene, um, asked why she had not been called.
23 Um, made arrangements to come to the scene, uh,
24 on the 9th of November. Uh, was put off, um, in
25 two or three telephone conversations with

1 Mr. Wiegert. First told, essentially, that he
2 had to check. Uh, next told that her services
3 weren't needed.

4 Um, she has notes that document those
5 conversations. And I'm just giving the general
6 gist of them. Uh, she was not, in the end,
7 allowed on the scene. Uh, she did not have a
8 chance to determine the cause or the manner of
9 death. Um, to her knowledge, neither Dr. Doug
10 Kelly nor Patrick J. Schoebel, um, reported to
11 the scene.

12 She did receive, on the 9th or 10th of
13 November, a phone call from Dan Fischer, who she
14 identifies as the County Executive of Manitowoc
15 County, uh, telling her, in essence, that there
16 was a conflict of interest and she ought not push
17 to be involved.

18 Uh, she disagreed with that. She would
19 say that it was very unusual for her to get a
20 phone call from the County Executive at all. She
21 later received a phone call from a -- from a
22 Steven Rollins, the Manitowoc County Corporation
23 Counsel. Actually, who I -- I know has written
24 the Court here on this case recently. Uh, he,
25 too, advised that she should not be involved

1 because of a conflict.

2 She protested that she and her office
3 had nothing to do with the civil lawsuit that
4 Mr. Avery had brought. Had no involvement in it
5 whatsoever, um, but realized that she was meeting
6 firm resistance.

7 And she, then, contacted the Calumet
8 County, uh, Medical Examiner. I believe he is in
9 Calumet County. A gentleman named -- she would
10 say his name, Mike Klaser. I think that's
11 K-l-a-s-e-r. She contacted him just because
12 somebody had to fulfill the obligations of the
13 coroner. And, as a matter of good faith and
14 doing what she could to discharge her duties, um,
15 she thought the next best thing she could do was
16 to contact the medical examiner in the county
17 that employed the, um, uh, investigator from the
18 Sheriff's Department with whom she was having,
19 uh, contact.

20 And, finally, she would explain that she
21 had no involvement at anytime with Steven Avery's
22 civil lawsuit. She wasn't deposed. She wasn't
23 interviewed by either side. So nobody had any
24 contact with her at all, um, in relation to the,
25 uh, civil lawsuit against Manitowoc County.

1 So that's, uh -- that's, in a nutshell,
2 or in -- in skeleton form, the, uh, testimony I
3 expect that she could offer and that I think is
4 relevant for these as I explained it.

5 THE COURT: Anything else from the State?

6 ATTORNEY GAHN: No, Your Honor.

7 THE COURT: All right. Based on that, uh,
8 testimony, um, I think it's summarized, is that her
9 inability to participate in the case was based on a
10 directive from the County Executive at the time and
11 the Manitowoc County Corporation Counsel. If memory
12 serves me right, may have been involved in the
13 initial decision to turn investigation over to
14 Calumet County, but I'm not -- I don't trust my
15 memory anymore. I know the district attorney was
16 there. I don't remember if the corporation counsel
17 was involved or not.

18 Uh, but at any rate, whether they made
19 the right decision or the wrong decision, uh, it
20 seems to me it was based on the effort of some
21 higher officials in Manitowoc County not to
22 create or further, if you will, from the defense
23 perspective, the appearance of a -- of a, uh,
24 conflict of interest. And, um, I -- I don't
25 perceive how pulling a Manitowoc County person

1 off would somehow add to any bias on any part
2 when the purpose for making the decision was to
3 avoid the creation of bias.

4 And whether that's right or wrong, the
5 probative value of that decision, uh, is so
6 minimal to the facts in this case, which is a
7 criminal case, uh, that I don't believe the
8 evidence has much probative value. Um, and for
9 that reason the Court is not going to allow it.
10 I believe it would tend to confuse the issues in
11 this case. Uh, and Mr. Strang's objection is
12 noted on the record and his offer of proof.

13 ATTORNEY STRANG: Right. It's -- it's
14 bias. It's a double standard that's employed, in
15 our view by, um, uh, the people running
16 investigation, including those who testified as
17 witnesses here, or were involved in it.

18 THE COURT: All right. I think we
19 should, um, bring the jury in and tell them
20 they're going to be excused for the day and then
21 we'll resume tomorrow morning.

22 ATTORNEY STRANG: Very well.

23 THE COURT: Bring the jurors in at this
24 time.

25 (Jurors in at 4:29 p.m.)

1 THE COURT: You may be seated. Uh, members
2 of the jury, it's 4:30, so we're going to conclude
3 our proceedings for today. Uh, I will remind you,
4 uh, again, when you go home, don't discuss the case
5 with anyone, don't discussed it among your --
6 discuss it among yourselves, and be sure not to, uh,
7 expose yourself to any media accounts about the
8 case. We will see you tomorrow morning, uh, at the
9 normal time.

10 (Jurors out at 4:30 p.m.)

11 THE COURT: You may be seated. And then
12 Counsel will, um -- I'd appreciate it tomorrow
13 morning if you can, uh, meet with the Court about
14 quarter to nine to give me an idea of what's going
15 to be going on.

16 ATTORNEY GAHN: Could we meet for a few
17 minutes in chambers, uh, tonight, Your Honor?

18 THE COURT: Now? Sure.

19 ATTORNEY GAHN: Thank you.

20 THE COURT: See you in a couple minutes.

21 (Wherein Court stands adjourned at 4:31 p.m.)

2 BRANCH 1

3 STATE OF WISCONSIN,

4 PLAINTIFF,

JURY TRIAL

TRIAL - DAY 20

5 vs.

Case No. 05 CF 381

6 STEVEN A. AVERY,

7 DEFENDANT.

8 **DATE:** MARCH 9, 2007

9 **BEFORE:** Hon. Patrick L. Willis
10 Circuit Court Judge

11 **APPEARANCES:** KENNETH R. KRATZ
Special Prosecutor
12 On behalf of the State of Wisconsin.

13 THOMAS J. FALLON
Special Prosecutor
14 On behalf of the State of Wisconsin.

15 NORMAN A. GAHN
Special Prosecutor
16 On behalf of the State of Wisconsin.

17 DEAN A. STRANG
Attorney at Law
18 On behalf of the Defendant.

19 JEROME F. BUTING
Attorney at Law
20 On behalf of the Defendant.

21 STEVEN A. AVERY
Defendant
22 Appeared in person.

500	33	104	104
501		206	206

1 THE COURT: At this time the Court calls
2 State of Wisconsin vs. Steven Avery, Case No. 05 CF
3 381. We're here this morning for a continuation of
4 the trial in this matter. Will the parties, again,
5 state their appearances for the record.

6 ATTORNEY FALLON: Good morning, your Honor,
7 may it please the Court, the State appears by
8 Assistant Attorney General Tom Fallon, District
9 Attorney Ken Kratz, and in a very short moment,
10 Assistant District Attorney Norm Gahn on behalf of
11 the State.

12 ATTORNEY STRANG: Good morning, your Honor,
13 Attorneys Jerome Buting and Dean Strang appearing
14 with Mr. Avery.

15 THE COURT: Very well. The defense may
16 call its next witness at this time.

17 ATTORNEY BUTING: Okay. The defense calls
18 Janine Arvizu.

19 THE CLERK: Please raise your right hand.

20 **JANINE ARVIZU**, called as a witness
21 herein, having been first duly sworn, was
22 examined and testified as follows:

23 THE CLERK: Please be seated. Please
24 state --

25 ATTORNEY FALLON: Could we have just one

1 moment for Mr. Gahn, this will be his witness. He
2 apparently is momentarily delayed.

3 ATTORNEY KRATZ: It will just be a moment,
4 Judge, he's carrying some things in.

5 THE COURT: All right. I will allow the
6 Clerk to swear the witness, and then we'll wait for
7 the examination until Mr. Gahn gets here.

8 ATTORNEY FALLON: Thank you.

9 THE CLERK: Please state your name, spell
10 your last name for the record.

11 THE WITNESS: My name is Janine Arvizu,
12 A-r-v-i-z-u.

13 ATTORNEY BUTING: This microphone has been
14 a little bit touchy the whole time, so we'll try it
15 right about there.

16 THE WITNESS: Okay. Thank you.

17 ATTORNEY GAHN: I'm so sorry, your Honor.
18 I was held up on something. I apologize to the
19 Court.

20 THE COURT: All right. Mr. Buting, you may
21 begin.

22 ATTORNEY BUTING: Thank you, your Honor.

23 **DIRECT EXAMINATION**

24 BY ATTORNEY BUTING:

25 Q. Ms Arvizu, would you tell us your occupation,

1 please.

2 A. Yes, I'm a Laboratory Quality Auditor.

3 Q. Okay. And how are you employed?

4 A. I do independent contracting for people who use
5 analytical data and want to understand how much
6 reliable -- how reliable and how valid the data
7 are.

8 Q. Okay. And before I get into that a little bit
9 more, would you tell me, first, what your
10 educational background is?

11 A. Yes, sir. I have a Bachelor of Science in
12 Bio-Chemistry from Cal Poly in San Luis Obispo
13 and a ABD in Chemistry from the University of New
14 Mexico. And I'm certified as a quality auditor
15 by the American Society for Quality.

16 Q. Okay. And what is an ABD?

17 A. ABD is all but dissertation, it's, essentially,
18 that you have completed all the course work and
19 examinations for a Ph.D. but did not complete the
20 dissertation.

21 Q. Okay. Maybe just explain to us why you got to
22 that point and didn't complete your Ph.D.?

23 A. I accepted employment with one of the DOE,
24 Department of Energy, National Laboratories, to
25 continue the work I was doing my dissertation on,

1 that was funded by the Department of Energy.
2 After I accepted employment and started working,
3 we lost funding for that project, so I elected to
4 keep the job rather than go back to school.

5 Q. Okay. And do you have exhibit -- I'm sorry, what
6 is the exhibit number in front of you?

7 A. 499.

8 Q. 499. Can you just identify that for the record?

9 A. It's a copy of my resumé.

10 Q. Okay. And does that summarize your educational
11 background, as well as your areas of expertise
12 and your professional experience?

13 A. Yes.

14 Q. All right. We'll talk a little bit about your
15 professional experience in a minute, but, first,
16 the chemistry that you are involved with, is that
17 analytical chemistry?

18 A. Yes.

19 Q. And what is a lab auditor and who uses them?

20 A. A lab auditor is pretty much similar to what you
21 would expect for an auditor of any other
22 discipline. Lab auditors go into laboratories
23 and, essentially, look at how reliable and how
24 valid the data are that are reported by a
25 laboratory.

1 The people who use lab results, it's not
2 like buying a pound of sugar or buying a pound of
3 flour, different laboratories produce different
4 quality data. And so if the data that are being
5 used by a data user are real important and they
6 make real important decisions based on those
7 results, then they can hire an auditor to come in
8 and look at the lab's operations and see whether
9 or not the lab was operating in accordance with
10 good scientific principles and had good quality
11 control practices at the time the laboratory work
12 was done.

13 And so, over the course of my career,
14 the majority of my work assessing data quality
15 and looking at labs has been done for the federal
16 government, because they are probably the biggest
17 consumer of laboratory results. They use a lot
18 of analytical results. And so it's real -- And
19 they make very important decisions based on those
20 results, so it's real important to them to
21 understand how reliable and how valid their data
22 are.

23 Q. Does your employment -- or has your professional
24 experience involved review of commercial, private
25 laboratories exclusively, or government

1 exclusively, or combination, or what?

2 A. Mm-hmm. I have conducted audits of both
3 commercial and government laboratories. Because,
4 again, the government both operates its own
5 laboratories and contracts with commercial
6 services.

7 So I have audited state laboratories,
8 federal laboratories, commercial laboratories, in
9 a wide variety of disciplines. These are labs
10 that test environmental samples, food samples,
11 pharmaceutical samples, the whole manufacturing,
12 a whole gamut of samples.

13 Q. So what -- what arm of the federal government
14 would employ you to do an audit of another
15 government lab? I mean, you know, one part
16 auditing another part, right hand, left hand?

17 A. I'm not sure that's exactly the way it happens.
18 For example, I would be contracted by the U.S.
19 Navy to audit the laboratories that did
20 analytical work for the Navy. So that would
21 include both Navy laboratories, actually staffed
22 by Navy personnel, as well as commercial
23 laboratories.

24 So, it was -- And the Navy, if you will,
25 was the user of the results, and so they wanted

1 to know how much confidence they could have, but
2 it included -- I guess they were in a different
3 part of the Navy, if that's what you mean.

4 Q. Okay. And why is it important that a government
5 lab or a private lab be audited?

6 A. Experience has shown, in the business of science,
7 you know, it's really, really hard to do science
8 on a production line. I managed an analytical
9 lab for the Department of Energy for a number of
10 years, and it's a really, really hard job to do.

11 And that's what we're really asking of
12 these laboratories who are testing unknown
13 samples, is to practice science day, after day,
14 after day, in a highly defensible and valid
15 manner. It's a really hard job.

16 And the -- Experience has shown in the
17 measurement in science business, that the best
18 way to insure the reliability and the validity of
19 the results is to have a very rigorous, quality
20 assurance program in place.

21 It's not a management gizmo of the week;
22 it's a very technically driven job to put in
23 place quality control practices and measures, to
24 ensure that you consistently and reliably produce
25 good quality data.

1 And so that's what drives it, ensuring
2 that you understand the quality of your data and
3 that your data is good enough so you can make
4 good confident decisions based on them.

5 Q. And does the -- does the government, federal
6 government in the instance -- in the situation
7 that you had some experience in, do they ask for
8 audits of -- let's say, let's go to private labs
9 first a minute, just to check up and see if they
10 are okay, or are they sometimes concerned about
11 more serious things in the use of tax dollars?

12 A. It's a little bit of both. And the nature of the
13 problems can be either that the lab doesn't know
14 they have a problem, so when you go in as an
15 auditor you're identifying a problem that they
16 were largely unaware of.

17 For example, I did some work for the
18 Navy where they were interested in the presence
19 of a particular contaminant in bay water. And
20 the laboratory reported that it was not detected.
21 Lots and lots of samples, it was a very expensive
22 analysis. It was hundreds of thousands of
23 dollars worth of analysis in question, and the
24 laboratory reported it was not detected.

25 But when I went in and audited the

1 laboratory, I saw that the laboratories detection
2 limit was way up here, and the detection that the
3 Navy was interested in, where they knew they had
4 to pay attention to, was way down here.

5 So the fact that the lab said it wasn't
6 detected at this very concentrated level, really
7 didn't answer the Navy's question, and so they
8 ended up not having to pay for all that analysis,
9 because it really -- although, it's true that the
10 lab didn't detect it, it was really inappropriate
11 for the Navy's use, and so they ended up not
12 having to pay for it.

13 Q. So you saved the Navy some money --

14 A. Mm-hmm.

15 Q. -- by showing that the laboratory just didn't
16 provide what was asked for?

17 A. Correct.

18 Q. Okay. And has some of your investigation also
19 involved, or uncovered, any kind of fraudulent
20 practices by laboratories, government or
21 otherwise?

22 A. Yes. One of the things that you do as an auditor
23 is, is you try to reconstruct things after the
24 fact. All I'm dealing with, after the fact, is a
25 pile of paper. And so I'm trying to reconstruct

1 everything that happened with that sample, from
2 the time it was collected in the field, all the
3 way till it was ultimately reported on a piece of
4 paper in a lab report. And try to understand
5 whether all the controls were in place, and the
6 integrity of the sample was maintained, and the
7 results are valid and reliable.

8 So that's the whole process. And I have
9 kind of forgotten the beginning of that question,
10 I apologize.

11 Q. Whether or not you have had any experience in
12 detecting, or anything fraudulent.

13 A. During the course of that process, for example,
14 at a commercial laboratory, I determine that
15 although it appeared that they had results and
16 they had data, the paper data that looked like
17 results, when you put it altogether, I realized
18 that they were actually reporting more data than
19 they had the capacity to generate with their
20 instrument. It was like they only had the
21 ability with their instrument, for how long the
22 method took, to run one sample in one day, and
23 they were reporting results from many samples in
24 one day.

25 That meant that they were -- in our

1 local term it's "dry labbing", they were making
2 up results. They weren't testing the samples;
3 they were just making up the results. Obviously,
4 a clearly fraudulent practice that the government
5 doesn't want to pay for.

6 So that's the kind of big picture
7 perspective that you look at when you try to
8 audit laboratories.

9 Q. And as a result of some of your work or
10 investigations, has there been any criminal
11 penalty -- criminal or civil penalties imposed on
12 labs when they do that sort of thing?

13 A. You know, I just -- I just report it to the
14 government. I don't know what they do as a
15 follow-up.

16 Q. Okay. By the way, I don't know if it was made
17 clear, but what is your -- where -- who do you
18 work for now?

19 A. In this case?

20 Q. No, I'm sorry. What's your employment, your
21 business?

22 A. I'm an independent contractor in my -- in my
23 assessment duties as a forensic.

24 Q. Okay. Where is it based?

25 A. In the Albuquerque, New Mexico area.

1 Q. Okay. Do you work -- do you have any limits on
2 where you work, or are you all over the place, or
3 what?

4 A. I'm all over the place. I get data from all over
5 the country, even from overseas. I have
6 testified overseas as well.

7 Q. And you have been doing this for approximately
8 how long?

9 A. Well, I have been auditing labs and doing data
10 quality assessments for many, many years. But do
11 you mean, specifically, in the forensic
12 discipline?

13 Q. Sure.

14 A. In the forensic discipline, since the late '90's.

15 Q. Okay. And in terms of auditing labs, in general,
16 how long has your career been in that?

17 A. Since the '80s.

18 Q. And have you published any articles or anything?

19 A. The business of data quality assessment, I'm
20 working for the people using the results, and
21 they generally have proprietary use to the
22 results that I report to them. However, when I
23 was working for the Navy, I actually authored
24 their quality standard that they used for the
25 evaluation of laboratories. And it, essentially,

1 was the rules of the road for government
2 commercial labs that they wanted to work for the
3 Navy.

4 Q. All right. Are you familiar with -- We have had
5 some testimony about different types of
6 instruments that analytical chemists use. Are
7 you familiar with liquid chromatography?

8 A. Yes.

9 Q. And mass spectrometry -- spectrometry?

10 A. Yes.

11 Q. And the instruments that are used for those kinds
12 of tests?

13 A. Yes.

14 Q. Have you operated those kinds of instruments?

15 A. I have operated both.

16 Q. Okay. Can you tell us what a protocol is?

17 A. Mm-hmm. A protocol simply describes how a
18 laboratory does a -- performs a particular
19 method. It sets down the recipe, if you will,
20 for how they treat samples and what controls they
21 introduce, what it takes to have acceptable
22 performance or not.

23 Q. And as part of your auditing process, when you go
24 to a lab, what things do you look at; is it
25 people, instruments, method, what?

1 A. And then some. The process of doing an on-site
2 laboratory audit, personally, I find it very,
3 very interesting, because you always see things
4 in person that you will just never see on the
5 paper.

6 So, on-site, I'm looking at everything
7 from how they actually perform the manipulations;
8 whether they use good laboratory practices;
9 whether they seem to understand the principles of
10 contamination control, which are so important in
11 a laboratory; to looking at the heating,
12 ventilating, and air-conditioning system. I'm
13 looking to see where the make up vents provide
14 air, to see whether that could be a potential
15 contamination problem.

16 I'm looking at how they set up
17 instrumentation. I'm looking at the
18 documentation maintained by the lab. I look at
19 everything.

20 Q. You look at the, specifically, protocols; is that
21 something that you examine, consider, and
22 evaluate in the process of doing these lab audits
23 you refer to?

24 A. Absolutely. Always read the protocols before
25 going on-site, to understand how they say they do

1 their method, and then watch them and look at the
2 written work that they generate to see whether
3 they, in fact, followed their method.

4 The nature of chemistry is such that
5 it's so very important to follow protocols. For
6 any time that you deviate from a protocol, then
7 you have got to make a note of it.

8 It's a lot like a recipe. Again, if you
9 don't follow the recipe exactly, then that
10 chocolate cake isn't going to be as good as the
11 one that grandma makes. But if grandma doesn't
12 want to share her recipe, and she leaves out
13 ingredients, or doesn't really follow hers
14 exactly, you're not going to be able to reproduce
15 her work.

16 The same thing applies in the
17 laboratory. As scientists, we want to be able to
18 reproduce somebody else's work. That means they
19 have to have a completely documented protocol and
20 they have to follow it.

21 Q. And do you also, as part of this analysis that
22 you go through, consider whether or not the
23 protocol is being used for the purpose that it's
24 intended and whatever limitations there may be in
25 its actual scientific validity?

1 A. What you are referring to is, essentially,
2 deciding whether or not a method is valid. A
3 method that's perfectly acceptable for use in one
4 application may be completely inappropriate for
5 use in another application. So it's really
6 essential to understand exactly the scope of what
7 you are trying to use the results for.

8 When I managed the Department of
9 Energy's Analytical Laboratory, people were
10 always calling me up on the phone asking me: So,
11 can you analyze for beryllium? Yes, sir, I can.
12 And how low can you go? What detection limit can
13 you detect, they would ask me. And I would stop
14 and say: Depends on what question you are trying
15 to answer. Because you use different methods
16 depending on different applications of the
17 results.

18 Q. All right. Did you -- Did you have an
19 opportunity to review a report by a Dr. Marc
20 LeBeau?

21 A. Yes.

22 Q. And do you know who he is?

23 A. I do.

24 Q. Okay.

25 THE WITNESS: Excuse me, is it okay if I

1 get a drink of water?

2 ATTORNEY BUTING: Sure, isn't there one?

3 THE WITNESS: Yeah, thank you.

4 ATTORNEY BUTING: Usually there's some up
5 there.

6 Q. All right. I'm going to show you some exhibits
7 that have been marked earlier in this case and
8 see if you can identify or recognize them. Do
9 you see Exhibit 435?

10 A. Yes.

11 Q. And what is that?

12 A. That's a copy of the FBI Laboratory's report in
13 this case.

14 Q. By?

15 A. Authored by Marc LeBeau.

16 Q. Okay. And have you reviewed that report?

17 A. Yes.

18 Q. All right. And I'm going to show you what's
19 Exhibit 434. And tell us what that is.

20 A. This is a nine page standard operating procedure
21 by the FBI Laboratory that describes their
22 procedure, their recipe for analysis of EDTA in
23 dried bloodstains.

24 Q. Okay. And the date of --

25 A. This particular procedure is dated 2/15/2007.

1 Q. Okay. And then, also, Exhibit 446, can you
2 identify that?

3 A. Well, without looking at every page, this looks
4 like the package that I received for review in
5 this case, that consists of a letter from your
6 office, as well as all the materials received
7 from the FBI Laboratory in this case.

8 Q. Okay.

9 A. It's about the right size.

10 Q. Okay. The -- Going to the report, do you have an
11 opinion whether this protocol, as reported in the
12 report -- the use of this protocol as reported in
13 the report -- can determine, with scientific
14 validity, whether -- if a stain is tested for
15 EDTA under this protocol, and not found, whether
16 that -- a conclusion can be given that it was not
17 present in the stain?

18 A. I do have such a conclusion, and it's based on
19 more than just the procedure, but the fact that a
20 stain -- EDTA is not detected in a stain, does
21 not mean that EDTA was not present in the stain.

22 Q. Okay. Do you have an opinion about whether -- if
23 one tests three stains and gets some results, or
24 lack of results, whatever, whether one can
25 express an opinion about what may or may not be

1 in three untested stains?

2 A. Well, I'm in the business of analytical
3 chemistry, and we're not in the business of just
4 making guesses about what might be in samples; we
5 have instrumentation to test samples and that's
6 how we determine results. There's no way for an
7 analytical chemist to know what's in a sample
8 unless we test it.

9 Q. All right. Going more particularly to the
10 materials that you reviewed, let's talk about the
11 protocol for a moment. It's 434, I believe.

12 A. Yes.

13 Q. There's a section called scope, does the protocol
14 appear to be adequate for the scope, as it's
15 defined?

16 A. Yeah, it's a very short description of scope and
17 it's an accurate description of the applicability
18 of this method. It states that this procedure
19 allows for the screening and confirmation of EDTA
20 in suspected bloodstains. So that's exactly what
21 it does, it allows you to screen for EDTA in a
22 bloodstain and to detect EDTA in a bloodstain. I
23 will mention that that's probably the shortest
24 description of method scope I have ever read.

25 Q. Okay.

1 A. They are generally much more -- there's a little
2 more scientific meat in it in terms of describing
3 under what conditions and so forth.

4 Q. Does this protocol, as its designed, or
5 reportedly designed here, you say that it -- if
6 one follows this recipe and there is EDTA
7 present, that this protocol would allow one to
8 detect it; is that right?

9 A. To detect and identify it.

10 Q. Okay. Is it also possible, from this protocol,
11 to draw any conclusions, though, if one runs the
12 tests and does not detect EDTA?

13 A. That's really the problem. The issue with this
14 procedure is not whether or not it's a valid
15 result, if you were actually detecting EDTA.
16 This is a good method. If the results end up
17 that you detect EDTA and you identify EDTA,
18 that's a good -- good indication that EDTA was
19 present in that sample.

20 The problem really occurs when EDTA is
21 not detected in a bloodstain. And the problem in
22 that regard is, from this method, I don't know
23 whether that's simply because they didn't detect
24 it, or because it wasn't there. I can't tell the
25 difference between those two, for this method.

1 I don't know, really, what their method
2 detection limit is. So I don't know whether they
3 didn't see it or it wasn't there.

4 Q. Okay. You mentioned method detection limit; is
5 there also something called instrument detection
6 limit?

7 A. Yes.

8 Q. And as you look at this protocol -- or I'm
9 sorry -- look at the report for a moment, on Page
10 2, where Mr. LeBeau indicates that, using the
11 procedure employed in this case, EDTA is readily
12 identified at a concentration of 13 --
13 micrograms?

14 A. Milligrams per litre. The common term is parts
15 per million.

16 Q. Okay. As you go through his -- the stack of data
17 there that was provided to you, is that a
18 instrumentation limit or is that a method limit?

19 A. From reviewing the data, that appears to be an
20 instrument detection limit. That is, they figure
21 that out by starting out with a 100 PPM sample
22 and they would inject that right into the
23 instrument and see if they could see EDTA. And
24 they did.

25 So they cut it in half, diluted it in

1 half, and ran it again. When they ran 50, they
2 still detected EDTA. And each time they cut it
3 in half. When they ran 25, they detected EDTA.
4 When they cut 25 in half, at 12.5, or 13, they
5 still detected it. But when they cut that sample
6 in half and cut it down to about six parts per
7 million, they were not able to detect and
8 identify EDTA.

9 So based on that, they drew the
10 conclusion that their detection limit, or limited
11 detection as they called it, was 13 parts per
12 million. That, however, represents sort of the
13 theoretical best case of injecting a sample
14 directly into the instrument.

15 It does not reflect the detection limit
16 for going out and swabbing a stain and extracting
17 the sample from that stain and diluting it before
18 you get it into the instrument. Those are two
19 different things. Instrument detection limits
20 are usually very small. Method detection limits
21 are larger. That's just sort of the natural
22 order of things.

23 Q. Okay. Well, focusing specifically on this type
24 of a method detection limit, why would it be
25 different; why would you be able to detect a

1 smaller amount if you just inject the sample
2 directly into the machine versus if you have to
3 go through the process of taking a dried stain,
4 swabbing it, extracting that, diluting it, all of
5 that? Why is there a difference?

6 A. The difference is really because there are so
7 many other complicating factors associated with
8 taking a real world sample and getting it to the
9 point where it's clean and pristine enough to be
10 able to inject it into an instrument.

11 In the case of a bloodstain, that sample
12 is on a surface, it has to be removed from that
13 surface. So it's swabbed. There may be
14 interferences from the swab. They may not
15 completely recover the stain.

16 Then they try to extract the blood
17 sample off of the swab. Extractions, generally,
18 are not completely efficient. In some of the
19 reference material in this case, some work done
20 some years ago, extraction efficiencies were
21 typically 90 percent or so, on a first run. It
22 was quite common, if you do multiple extractions,
23 to extract more DNA so -- or more EDTA.

24 So in each -- in each step of the
25 process, you will lose a little bit. There's

1 issues that arise. And so, by the time you get
2 to the instrument, your effective method
3 detection limit is much higher.

4 Q. Is it possible to determine what the effective
5 method limitation is, in this case, from the
6 materials you reviewed?

7 A. No, it is not.

8 Q. Do you have an opinion whether it is the actual
9 effective method limit of this -- this test, to
10 be able to detect EDTA in a bloodstain, is higher
11 than 13 parts per million?

12 A. Yes, I do, and I believe that it is.

13 Q. Can you quantitate how much higher?

14 A. Unfortunately, that's -- that's a study that's
15 best done empirically, by actually doing
16 analytical work. Method detection limits are
17 best determined using actual analytical work. I
18 can infer some information from the data that
19 were obtained in this case, but I can't just
20 compute one from the data that are available.

21 Q. And looking at the data that is available in this
22 stack, the validation tests that were done, and
23 those sorts of things, is there any indication
24 that the FBI ever found out what the actual
25 detection limit, or method detection limit, would

1 be for this kind of a test?

2 A. No, there's no such indication in these data.

3 Q. Okay. Well, what does that tell you about the
4 use of this kind of a protocol?

5 A. This kind of protocol, there's basically two
6 things that can happen when you run this kind of
7 a method; either you detect EDTA or you don't.
8 From an analytical perspective, the results
9 either say, yes, we detected EDTA, or, no, we did
10 not.

11 This report makes it seem like those two
12 outcomes only can arise from two conditions. And
13 it makes it seem like if the answer is, yes, we
14 detected EDTA in a bloodstain sample, then it
15 kind of makes it seem like, then that means it
16 must have come from a tube of EDTA preserved
17 blood.

18 There is -- There was reference to the
19 fact that the control samples that they took from
20 the car were blank, so that's probably the more
21 likely interpretation.

22 The problems really come if the results
23 from testing are, no, there is no EDTA present in
24 those samples. Nothing there. We didn't see
25 anything.

1 The problem is, you just don't know
2 whether EDTA -- you didn't detect EDTA because
3 there was none there, or because your detection
4 limit wasn't low enough to see it, even if it had
5 been there. That's really the problem.

6 So just because EDTA is not detected by
7 the laboratory, doesn't mean that -- that that
8 blood sample came from somebody actively bleeding
9 onto that spot. It still means, that if your
10 detection limit is out of sync with the samples
11 in question, there could be EDTA in those samples
12 from that blood tube, you just didn't see it.

13 Q. All right. Now, the next sentence in his report,
14 Dr. LeBeau's report, talks about, that EDTA is
15 also detectable when a 1 microliter drop of EDTA
16 preserved blood is analyzed. As you reviewed the
17 data in that four or five inch package there,
18 would you agree or disagree with that statement?

19 A. I disagree with that statement.

20 Q. And why is that?

21 A. Because in the results reported by the
22 laboratory, if this statement says, I tested a 1
23 microliter drop of blood from a purple-topped
24 tube, from an EDTA tube, and I detected it, the
25 problem is -- and that was done in this case --

1 the problem is, they ran a 2 microliter drop of
2 EDTA preserved blood on a spot, a more real-world
3 kind of application, and they did not detect EDTA
4 in this lab.

5 Now, gosh, that might sound a little bit
6 counterintuitive, what do you mean they could
7 detect 1 microliter, but they couldn't detect --
8 they detected EDTA in a 1 microliter sample, but
9 they didn't detect EDTA in a 2 microliter sample.

10 If, in fact, the detection limit used by
11 this laboratory was down around that level,
12 that's -- I just have to tell you, that's not an
13 unexpected result. Sometimes you see it and
14 sometimes you don't, if an element -- If a
15 compound is present near it's detection limit.

16 In fact, that's, essentially, the
17 definition of a detection limit. It means that
18 if it's present at that concentration, sometimes
19 you'll see it and sometimes you won't.

20 So to state that he -- that the lab is
21 -- that EDTA is detectable when a 1 microliter
22 drop of preserved blood is analyzed, is really
23 not a true statement, even as evidenced by his
24 own results, because he didn't detect it in a 2
25 microliter sample of blood.

1 Q. Could you maybe find the --

2 A. I will try.

3 Q. -- the information that's in there that you are

4 referring to? And I'm going to take just a few

5 moments to show that on the ELMO. You -- Did you

6 find it already?

7 A. Yes.

8 Q. Okay. I have a copy, let me just see if I can

9 work from my copy while you have that, or else

10 you can use my copy?

11 A. There's only two pages, which one do you want?

12 Q. Okay. Why don't you use mine and I will use the

13 actual exhibit on the ELMO.

14 A. Okay.

15 Q. I'm going to start and just put this first --

16 first page of this stapled packet together.

17 A. Oh.

18 Q. Do you have that?

19 A. Yes.

20 Q. At the top it says the date of 2/16/07, 12:03:08?

21 A. Yes.

22 Q. Okay. What is this?

23 A. This is, essentially, a set of data that came off

24 the LC/MS instrument from running the entire

25 batch of case samples in this case. So it

1 includes all the question samples, all the known
2 samples, and all the control samples that were
3 run by the laboratory in sequence, in time
4 sequence, so you can sort of reconstruct what
5 happened to -- which samples were run through the
6 instrument plan. And, boy, you will never be
7 able to read that on top.

8 Q. I can zoom in, when we need to, believe me. And
9 so is this kind of -- these kinds of reports
10 are -- what do you call these, spectrographs,
11 mass specs?

12 A. Yeah, it's chromatograms and spectra.

13 Q. Are these the kinds of things that you see in
14 your review of lab data?

15 A. On a regular basis.

16 Q. Okay.

17 ATTORNEY GAHN: I'm sorry, could we have
18 this marked as an exhibit so we know what we are
19 talking about?

20 ATTORNEY BUTING: I think it is. It's
21 part --

22 THE WITNESS: This is part of this big
23 package, if you -- this big one that is called
24 Exhibit 446.

25 ATTORNEY GAHN: I understand that, but I

1 would like that -- this exact page, so we know what
2 pages you are talking about.

3 THE WITNESS: Sorry.

4 ATTORNEY BUTING: Would you like to do
5 that, your Honor.

6 THE COURT: Is the page numbered in any
7 fashion?

8 ATTORNEY BUTING: No, there are no numbers.

9 THE WITNESS: Unfortunately, no.

10 THE COURT: All right. Then let's label it
11 as a specific exhibit.

12 ATTORNEY BUTING: Okay. What I would like
13 to do, there's a stapled set, just mark them
14 altogether and then we'll talk about pages in there.

15 A. This includes all the samples that were run
16 between 12:03 and 5:40 on February the 16th, in
17 time sequence order.

18 (Exhibit No. 500 marked for identification.)

19 Q. All right. We finally made it to 500. Exhibit
20 500, can you tell us what that is?

21 A. Yes, this is a dataset that represents all the
22 results from running the case samples in this
23 case. They were run on February 16th. And they
24 started at 12:03 and ran through 5:51. And each
25 of these takes about 11 minutes to run, so the

1 time dates on each of them are about 11 minutes
2 apart.

3 Q. Are these run, you know, sort of automatically,
4 or robotically, or do you need to have a lab
5 person there to do this?

6 A. It's absolutely standard practice throughout the
7 industry, that these types of instruments -- it's
8 called "rack and run". You set up your samples,
9 you extract your samples, you load the tubes into
10 a little auto sampler set in certain labeled
11 positions. Then you let the instrument
12 automatically, or robotically, sample them;
13 typically, at night, while you are at home
14 sleeping, the instrument's in the lab working.

15 Q. Okay. And then when you come in the morning,
16 does it print out something like this for you?

17 A. Yes.

18 Q. And these are, then, the reports that the analyst
19 would review to determine if -- if it seems like
20 the test ran properly, or didn't, and what the
21 results are?

22 A. Exactly.

23 Q. Okay. All right. Now, the first page of
24 these -- I'm not going to bore everybody too much
25 here with great detail, but at the top, just so

1 people understand, on the upper left, there's a
2 staple sort of blocking it, but it's like a -- it
3 looks like a computer path, right?

4 A. Yeah, it's the identification of the file. The
5 instrument's collecting all these data,
6 electronically, and that's just the file where
7 it's storing that data for the analyst to come in
8 and look at it the next day.

9 Q. So, for instance, where this says cali --
10 Xcalibur data/Brewer, Brewer being -- would be,
11 in this case, the analyst?

12 A. Yes.

13 Q. Okay. And as you go over towards the center,
14 then, it has the 2/16/07, that's the date and the
15 time?

16 A. Yes, that's the date and time stamp for the time
17 the data was acquired by the instrument.

18 Q. All right. And then over on the right, at the
19 top, what is that referring to?

20 A. That's a description of the sample --

21 Q. All right.

22 A. -- that's entered by the analyst, at the time
23 they are preparing this set to run.

24 Q. Okay. And so in each of these -- or each of
25 these pages that I'm going to flip through, do

1 they - is it one page per sample, typically, or
2 can you determine that by what's up at the top?

3 A. You have to determine that by what's at top.
4 Often -- Well, sometimes they can zoom in so
5 there will be more than one page. So I can't
6 give you --

7 Q. Okay.

8 A. -- a direct answer.

9 Q. Very good. So this first one is a blank negative
10 blood, and that would be -- that's one of the
11 controls you mentioned?

12 A. Mm-hmm.

13 Q. You have to say yes or no?

14 A. Yeah, that's a quality control sample.

15 Q. All right. The next one is negative control?

16 A. Yes.

17 Q. And then another blank?

18 A. Two more blanks.

19 Q. Two more blanks. Okay. And, then, K-2 extract,
20 what does that mean?

21 A. That's one of the samples in this case identified
22 as K-2. And this is analysis of an extract that
23 was prepared from K-2, from the K-2 swab.

24 Q. Okay.

25 A. So this isn't a case where they are actually

1 taking a liquid sample and injecting it to the
2 instrument, because those blanks were, in fact,
3 just liquid samples. This is a case where they
4 took a solid sample on K-2 and had to do the
5 extraction before they injected it into the
6 instrument.

7 Q. All right. And from your review of the
8 materials, do you know what K-2 refers to, in
9 general?

10 A. I could look it up. Under report, it's simply
11 identified as two control swabs, Item 9802.
12 There's another record in here that describes
13 where it was taken from, I don't remember right
14 off the top of my head.

15 Q. Okay. The next page is another blank?

16 A. Yup.

17 Q. Two blanks, actually?

18 A. Yeah, there's always two blanks in between each
19 evidentiary sample.

20 Q. Okay. And is that done in part to get rid of the
21 possibility of effective carryover?

22 A. It's done to both get rid of the effects of
23 carryover and to be able to identify it in the
24 event that it's happening.

25 Q. All right.

1 A. It's a very good quality control practice.

2 Q. And, by the way, let me just go back for a
3 minute, at the bottom, turn to the very first
4 page, at the bottom of each page there's some
5 handwriting; what does that refer to?

6 A. That's the initials of the responsible analyst
7 who essentially made the call. On each and every
8 sample, a qualified analyst is responsible for
9 deciding, well, is EDTA there, or isn't it; is it
10 detected, or positive, or is it not detected.

11 So -- And by signing it and making that
12 entry on each page, that's acknowledgment that
13 that individual has made that call. So in this
14 particular case, the little -- just looks like a
15 sort of scribbled M's or something, that's the
16 initials of the analyst who made the call, ND, or
17 not detected, for this particular sample.

18 Q. Okay. And since this is a blank, you would
19 expect it to be not detected?

20 A. You would hope so.

21 Q. However, there is a line on it, with a number,
22 223, at the top. Is this -- What does this
23 indicate?

24 A. It indicates that blanks are not necessarily
25 always completely blank. But that particular

1 peak is not an indication that it's EDTA that is
2 present, so it doesn't create a problem for us.

3 Q. Okay. So it's something, but it's not -- it's
4 not EDTA?

5 A. That's correct.

6 Q. Okay. Move back ahead to where we were at Q-46
7 extract?

8 A. Yes.

9 Q. Okay. And this one he -- is there a call at the
10 bottom of that?

11 A. Yes, not detected.

12 Q. Okay. And then there's two more blanks, right?

13 A. Yes.

14 Q. And the next is a K-3 extract?

15 A. Yes, not detected.

16 Q. Okay. And then two more blanks?

17 A. Yes.

18 Q. The second blank. Now, this one is a little bit
19 different, there's the 223 showing up, but
20 there's also a 293 showing up; what does that
21 tell you, if anything?

22 A. Again, it tells you that that particular item was
23 detected, but that does not meet the criteria for
24 calling it EDTA, so it's something, but it's not
25 EDTA.

1 Q. Okay. And so the conclusion of EDTA is, again,
2 another ND, not detected?

3 A. That's correct.

4 Q. Okay.

5 A. They are really only looking for EDTA here. If
6 there's other things present, there's no attempt,
7 and, in fact, the method doesn't even allow for
8 identifying what the other things were.

9 Q. Okay. The next page, then, is Q-47 extract?

10 A. Yes.

11 Q. And you understand that to be one of the question
12 samples?

13 A. That's correct. It's a swab; it's a swab
14 extract.

15 Q. And could you understand that the -- the swab
16 stains reportedly taken from the RAV4 were
17 designated Q-46, Q-47, and Q-48?

18 A. That's correct.

19 Q. Okay. And this one is called, also, ND?

20 A. Yes.

21 Q. Okay. There is, again, 275 detected, but that's
22 not a concern as far as EDTA goes, there's
23 something else?

24 A. That's correct.

25 Q. All right. Bear with me, two more blanks, K-4

1 extract.

2 A. Not detected.

3 Q. Not detected, even though there is, again,
4 something there that's 208, correct?

5 A. Correct.

6 Q. Two pages further, again, another blank, not
7 detected, but once again there are things showing
8 up, it's just not the ion --

9 A. They don't meet the rules for calling it an EDTA.

10 Q. Okay. And then Q-48 extract, not detected, as
11 well, right?

12 A. Right.

13 Q. Okay. Two more blanks. Now, lets talk about
14 this for just a moment. You get to the page, it
15 says Positive Control A (MAL EDTA extract). As
16 you review the data, what does this tell you, or
17 what is -- what is this made of?

18 A. Well, from the data, from the record, it's not
19 really possible to tell. But my understanding is
20 that this is a sample prepared by Mark LeBeau.
21 MAL represents his initials and that he
22 volunteered his blood sample for this particular
23 sample. And created -- created a purple-topped
24 tube, did an extract, and then determined that he
25 was able to actually detect EDTA in this sample

1 of his blood.

2 Q. Now, is that -- would that be considered a proper
3 positive control, in your opinion?

4 A. No, it is not.

5 Q. And why not?

6 A. Control samples, there's rules, essentially, for
7 control samples. Control samples are of known
8 origin and purity. They have been tested to
9 determine their actual composition. And then
10 there's typically a certificate of analysis that
11 tells you, we have analyzed it and we note, with
12 this degree of confidence, that this is exactly
13 what's in this sample.

14 He, essentially, just took a sample out
15 of the production line, his own, introduced it,
16 and called it a positive control. So it's not,
17 it doesn't really conform to sort of the -- the
18 quality standard for what a positive control is.

19 Q. So when you say a certified known quantity, but
20 here, this is a control in order -- he is using
21 this as a control to -- just to find EDTA; is
22 that right?

23 A. Yes, to see whether he can detect EDTA during the
24 course of this run.

25 Q. So what would be a proper positive control for

1 that?

2 A. If they had a whole blood standard, and there are
3 supply houses that sell those kind of whole blood
4 standards, that had a known quantity of EDTA
5 present in it.

6 Q. So there are commercial labs that sell certified
7 specific --

8 A. Yes.

9 Q. -- things like this?

10 A. Yes.

11 Q. And those are intended to be used as a positive
12 control?

13 A. That's correct. Those are reference materials
14 intended for that use.

15 Q. Well, why would this be any different, if he puts
16 it in a purple-topped tube?

17 A. Because he doesn't know how much EDTA is in that
18 purple-topped tube.

19 Q. Okay.

20 A. So the fact that he detected it means it was
21 there, but how significant is that? Was that --
22 was that a very concentrated sample or a very
23 diluted one; he doesn't really know.

24 Q. Do -- Does the quantity of EDTA that one finds in
25 these commercially prepared purple-topped tubes

1 vary?

2 A. Yes.

3 Q. By how much, typically?

4 A. I don't know. I wasn't able to find any very
5 specific actual lab data reporting that. But in
6 the FBI Lab's own protocols, they describe it as
7 ranging typically from a thousand parts per
8 million to two thousand parts per million. So
9 it's a fairly broad range.

10 Q. Okay. Now, at the bottom of this, there's some
11 handwriting as well. What does this appear to
12 be, or what does this tell you?

13 A. Actually, this is an indication that, apparently,
14 this person whose initials look like some kind of
15 an M, went through and initially called this as a
16 not detect. Because you have seen this quite a
17 few times already this morning, the initials and
18 then ND circled, but then subsequently the
19 analyst went back and decided, you know what, I
20 think this really meets the criteria for being
21 able to call it EDTA, so they changed their mind,
22 lined out the not detected and indicated that it
23 was positive. And that's why there's a second M
24 up there, they indicated when they made that
25 decision to change that call.

1 Q. Okay. And this is even on a sample of
2 Mr. LeBeau's own blood?

3 A. Yes. This is the sample of an extract prepared
4 from Mr. LeBeau's own blood.

5 Q. Okay. And, then, keep looking -- bear with me
6 again -- another couple of pages of blanks. And
7 then we get to something called Positive Control
8 B, Q-49 extract; what is this?

9 A. I have to interpret this based on the information
10 you see there. They are calling this a positive
11 control, a second positive control, in this run.
12 However, it's an extract of Q-48, which --

13 Q. Q-49?

14 A. Q-49, excuse me, which tells me it's a question
15 sample, it actually is an extract of Q-49, which
16 is the liquid blood sample from Mr. Avery. Why
17 they are calling it a positive control, truly is
18 a puzzle to me. That is not what a positive
19 control is. This is a question sample. It's a
20 case sample. It's an unknown sample, as far as
21 this laboratory is concerned.

22 Q. Okay. And in this particular one there is an
23 indication of positive?

24 A. Yes.

25 Q. Okay. The next page, what's this? It has the

1 same heading or the same --

2 A. Same sample description, same date and time.

3 These -- This is a different display of the same
4 electronic file. So all they are doing is going
5 in and zooming in on part of the spectrum from
6 the previous page that -- in order to try to
7 decide and confirm the assignment. It's a normal
8 kind of a practice.

9 Q. And so this reference up here, zoom?

10 A. Yeah, parenthetically, the analyst went in there
11 and noted that this is simply a zoom of that same
12 file.

13 Q. So this is a zoom page of the very same page
14 right before it?

15 A. That's correct.

16 Q. All right. Two more blanks, and now we come to
17 something called Spot LOD, 1 microliter?

18 A. Yes.

19 Q. This has -- This is also called a positive?

20 A. This sample is called positive, yes.

21 Q. Okay. And the three ions that they seem to be
22 looking for through all these tests are a 160, a
23 247, and a 132, and certain ratio to each other,
24 right?

25 A. I -- You know what, I would have to look those

1 up, because I haven't been that familiar with it,
2 but there are certain characteristic ions that
3 are EDTA and it's not just the presence of those
4 ions, but the relative ratios of those ions that
5 matters to the interpretation.

6 Q. Well, let's just go back for a second to Mr --
7 Mr. LeBeau's own blood and see the ions that are
8 reported here that are showing up as detected,
9 the one that he had crossed out and then put
10 positive, just a couple pages back?

11 A. I must have missed it. Oh, okay.

12 Q. Okay. And what are the ions that are being
13 reported by the instrument in this?

14 A. There are -- There are three ions that are
15 reported, 132, 160, 247, 293. There's actually
16 four that are present in this sample.

17 Q. And 160 is the one that's always expressed at
18 the -- the highest is always up at the top?

19 A. Yeah, this -- if you look at that scale there, it
20 goes from 0 to 100, on the left, no matter how
21 much of the compound is present, it always sets
22 that at 100 percent. That's essentially a
23 percentage. And the highest peak is always set
24 at 100 percent and everything else is measured in
25 relation to that highest peak. Whether it's one

1 inch tall or a foot tall, the highest peak is set
2 at 100 percent.

3 Q. And does that mean -- does that have any
4 indication about the quantity of the -- of the --

5 A. No.

6 Q. -- of the substance that they found?

7 A. No, it's simply that the most abundant peak that
8 we saw, the ion that was there with the highest
9 frequency, the most abundance, is set at 100. It
10 doesn't relate to the quantity at all.

11 Q. Okay. If we could flip back to where we were, at
12 the Spot LOD, 1 microliter, a few pages later.

13 A. Okay.

14 Q. Start at 5:07:38 seconds?

15 A. Mm-hmm.

16 Q. Okay. This one is marked as a positive, right?

17 A. Yes.

18 Q. Do you see any -- or what ions do you see
19 expressed in this?

20 A. It has three of the four that you saw in the
21 previous sample; it has 160, 247, and 293.

22 Q. All right. Now, what's the very next page?

23 A. A blank.

24 Q. No, before that, the zoom?

25 A. Oh, okay, sorry, I was looking at the zoom page.

1 Q. Oh, you were, okay.

2 A. Yeah. The first page has those three ions, the
3 second page, just like the previous example, is a
4 zoom of the same result.

5 Q. And even though it's a zoom, is there any --
6 there's still not a 132 ion showing, right?

7 A. That's correct.

8 Q. But it's marked as a positive?

9 A. That's correct.

10 Q. Okay. We're almost done, two more blanks. And
11 now we come to the second to the last page of
12 this exhibit. This is February 16, 5:40 at 13
13 seconds, right?

14 A. Yes.

15 Q. It says Spot LOD, 2 microliters, at Q-49. By the
16 way, just so we're clear, what does this tell
17 you, the way it's designated as Spot LOD?

18 A. It appears that the laboratory is trying to
19 decide a detection limit for a sample of blood
20 that's collected from the Q-49 file, that they
21 are actually trying to use the purple-topped tube
22 that was submitted in this case, and trying to
23 see whether or not I can see 1 -- I can see EDTA
24 in a 1 microliter sample and whether or not I
25 could see EDTA in a 2 microliter sample. So

1 they're actually trying to empirically determine
2 whether they can even see EDTA when they know
3 that it's a sample from Mr. Avery's tube of
4 blood.

5 Q. And does this relate, then, to the sentence, the
6 remark in Mr. LeBeau's report, that,
7 specifically, EDTA is detectable when a 1
8 microliter drop is analyzed?

9 A. Yes. This is 2 microliters that's displaying on
10 the screen right now, but I would conclude, from
11 his report, that he is referring to when he ran a
12 1 microliter sample, he detected and identified
13 EDTA. And so that's the source of his statement
14 in the report.

15 Q. That's the one we saw that shows three of the
16 four ions, but is missing one of them?

17 A. Yes.

18 Q. Now this one, though, what's marked at the bottom
19 of this page? Is there any call made on this
20 page?

21 A. Yeah, this is the 2 microliter sample, so they
22 are taking --

23 Q. A bigger sample.

24 A. -- a tube of Mr. Avery's blood, and instead of
25 just extracting a 1 microliter stain, they are

1 taking a 2 microliter sample of his blood and
2 taking it through the process. In this case,
3 when they ran it through their process, they did
4 not detect EDTA. This is a sample that they took
5 from Mr. Avery's purple-topped tube, 2
6 microliters, they did not detect EDTA.

7 Q. Well, on this particular page, his initials are
8 there, but he doesn't appear to be making a call?

9 A. Yeah, I can infer from that that as he was going
10 through these results, when he got -- he
11 expected, probably, to see EDTA, because he had
12 seen it in the 1 microliter sample. And when he
13 got here, he probably said, oh, this doesn't meet
14 the criteria. This isn't passing. What's going
15 on. So if you go to the next page, he zoomed
16 in --

17 Q. I will in just one second, but this one does show
18 a 133 ion, a 160, and where are we?

19 A. You're making me dizzy.

20 Q. I'm sorry. And a 247, which are three of the
21 ones you were looking at before. Why wouldn't
22 this -- Why isn't he making a call that it's
23 present in this instance?

24 A. I can only infer that, because he doesn't
25 indicate that in any of his records, the basis

1 for whether he made a call or not. However, this
2 does not conform to the FBI Laboratory's own
3 rules for making a call, because I got a copy of
4 their procedure for mass spectral interpretation.
5 And this has an ion ratio problem. You may
6 recall that the 160 is usually the biggest peak
7 that relates to very characteristic ion.

8 Q. Right.

9 A. In this sample, 160 is not the biggest peak, that
10 -- this 293 is the --

11 Q. Over here.

12 A. -- is the large peak. Yeah.

13 Q. Okay. So then --

14 A. It flaunts their own ion ratio rules for making
15 an assignment.

16 Q. Okay. So then what does he do then; what's the
17 very last page?

18 A. On the very last page, he zoomed in to see if
19 there was any more information he could elicit
20 from doing a more detailed analysis.

21 Q. And how can you tell this is a zoom of the very
22 same results, other than obviously he's got it
23 written there?

24 A. Again, it's because it's the same date and time.
25 So it's just processing exactly the same

1 electronic file, looking at the same data, just
2 zooming in on it.

3 Q. Okay.

4 A. Much like we can do when we zoom in on things on
5 a computer.

6 Q. And when he zooms in, does he get the same --
7 have the same issue, same problem?

8 A. Yes.

9 Q. Once again, 160 is not at the right ratio; so
10 then what does he call?

11 A. So he makes a call on this sample, this 2
12 microliter sample, as not detecting any EDTA.

13 Q. All right. I'm -- Just so we're clear, there's
14 one last page, and it's a blank?

15 A. That's correct.

16 Q. All right. So, in his report, then, when he says
17 that EDTA is also detectable as low as a 1
18 microliter drop, his own data, does it support
19 that at all?

20 A. The problem is, he has data that indicates he can
21 not detect EDTA in a 2 microliter drop. That
22 kind of a result is entirely consistent with the
23 fact that his method has a hard time detecting it
24 at the concentrations in question here.

25 It's an overstatement, if you will, to

1 say it can be -- to say -- I want to get the
2 exact words -- to say that it's detectable when a
3 1 microliter drop of EDTA preserved blood is
4 analyzed. That's an overstatement, because his
5 own data shows that he can't detect it in a 2
6 microliter spot.

7 Q. All right. Now, his data did -- or he does
8 express the opinion that EDTA was detected in
9 Q-49, the tube of Mr. Avery's blood, 11 year old
10 tube, right?

11 A. Yes.

12 Q. Is there any data that quantitates how much that
13 EDTA is there?

14 A. None.

15 Q. You mentioned before that, you know, a new,
16 pristine, brand new blood tube sample, according
17 to his own protocol, would be between a thousand
18 and 2,000 parts per million, EDTA concentration,
19 right?

20 A. Correct.

21 Q. Is there any way to tell whether or not, after 11
22 years, the EDTA that would have been in
23 Mr. Avery's purple-topped tube is -- has degraded
24 down to even a barely detectable limit?

25 A. There certainly -- If they quantitated how much

1 EDTA was present; they did not do that. They
2 simply identified the fact that EDTA was present
3 in Mr. Avery's blood sample. They made no
4 attempt to say how much EDTA was present.

5 Obviously, I don't know how much was present 11
6 year ago, but they could have looked in the
7 sample now to see how much was present in his
8 blood today. But their method was not designed
9 to do that and was never validated to do that.

10 Q. So when they find a positive result for EDTA in
11 that Q-49 tube of Mr. Avery's blood, it could be
12 a thousand parts per million or 50 parts per
13 million?

14 A. We just have no way of knowing, no way at all of
15 knowing.

16 Q. And is EDTA the kind of chemical that will
17 degrade over time?

18 A. It's like any other chemical, it's dependent on
19 the conditions that it's exposed to in a length
20 of time. Chemicals, in general, are subject to
21 degradation from things like light and
22 temperature and biological activity.

23 I have not -- I don't know what the
24 degradation curve is for EDTA, but in analytical
25 chemistry, we put shelf lives on materials. And

1 the manufacturers who certify their reference
2 materials and who certify their results, know how
3 long that material is stable in that environment.
4 So they assign a shelf life, much like the FBI
5 did in their procedure. Their procedure for
6 analysis of EDTA in bloodstains has requirements
7 for preparation of EDTA solutions, and they
8 impose a shelf life on them.

9 Say that their EDTA performance mix that
10 has EDTA in water is stable for a period of at
11 least six months, what that means is, when you
12 get past six months they can't use it any more.
13 It's just like when milk is a week past it's
14 expiration date, you shouldn't be drinking it.

15 Q. And that's their own protocol imposes a six month
16 limit on a solution that they mix up of known
17 EDTA, right?

18 A. Yes.

19 Q. Commercially purchased.

20 A. Yes, of reagent grade EDTA, that's of known
21 purity and we actually know its chemical
22 composition.

23 Q. All right. If you would step over here, please,
24 we have had some problems today and yesterday
25 with Mr. Strang's computer being able to project.

1 THE COURT: Mr. Buting, can I ask how long
2 you think your direct is going to continue yet.

3 ATTORNEY BUTING: Just one moment. Not
4 much more; we could probably finish in about five
5 minutes I would think.

6 THE COURT: All right. You can have five
7 minutes, go ahead.

8 ATTORNEY BUTING: Okay.

9 Q. (By Attorney Buting)~ For some reason -- This is
10 the videotape that we showed the jury a couple of
11 days ago, and for some reason I'm not able to get
12 it up there, but it is on the computer screen
13 here. Do you see anything that looks like an
14 expiration date on this particular tube?

15 A. Yes.

16 Q. Okay. You can retake your seat. And tell the
17 jury what you see as an expiration date on this
18 11 year old tube of blood, Q-49, that is
19 Mr. Avery's blood that was found in the Clerk's
20 Office.

21 A. These tubes are routinely manufactured and
22 provided by their manufacturer with expiration
23 dates. In this case, it's March of '96.

24 Q. So when Mr. LeBeau tested this tube for the
25 presence of EDTA in February of 2007, he was

1 testing it approximately -- almost 11 years
2 beyond its expiration date?

3 A. That's correct.

4 Q. All right. Having reviewed all of this data,
5 then -- By the way, were you able to see
6 Mr. LeBeau's testimony, recorded?

7 A. Yes, the online streaming video, I was able to
8 see it there.

9 Q. Okay. And did you see the PowerPoint
10 presentation where he talked about his thought
11 process or the hypothesis he was considering?

12 A. Yes.

13 Q. And he mentioned only two, do you recall that?

14 A. Yes.

15 Q. Could you talk about that for a moment, what you
16 think about that?

17 A. Yeah, he, essentially, says that, when I get
18 results -- when I get results from the
19 laboratory, it either shows that EDTA is detected
20 or not detected. Those are the only two options.

21 I agree that those are the only two
22 options that can come out of his protocol. It's
23 either detected or it's not.

24 But then he draws the conclusion that in
25 the event that it's not detected, which is the

1 case here, in these stain samples, in the event
2 that EDTA is not detected in the stain samples,
3 he draws the conclusion that that means it must
4 have come from active bleeding, rather than from
5 Mr. Avery's tube. That's just simply not
6 supported by the actual laboratory results in
7 this case.

8 Q. And why not, is there some other conclusion?

9 A. Yes, it certainly is quite plausible that the
10 bloodstains that were swabbed from the RAV4
11 contained EDTA, but the lab simply was not able
12 to detect it, as was the case in that 2
13 microliter sample of Mr. Avery's blood that they
14 attempted to test and were not able to detect
15 EDTA.

16 Q. And, for the record, we have finally been able to
17 display the still, frozen part of the video of
18 the -- I don't know the exhibit number -- 1 --
19 470, where the container contain -- the tube of
20 blood was opened at the Clerk's Office. And do
21 you have a laser pointer available? No, no laser
22 pointer here today?

23 ATTORNEY KRATZ: Oh, I have one.

24 ATTORNEY BUTING: Oh, you do. Can I borrow
25 it, please?

1 ATTORNEY KRATZ: Sure, let me help you out.

2 ATTORNEY BUTING: There you go. Thank you.

3 Q. (By Attorney Buting)~ Could you point with the
4 laser to what you were referring to when you were
5 talking about expiration date.

6 A. Okay. It's upside down here, so you have to see
7 that it's upside down. It's right here, it says
8 EXP March '96.

9 Q. So from this data -- Well, let me just make it
10 clear for the jury, first of all. Were you able
11 to actually test any of these samples in this
12 case?

13 A. No.

14 Q. All right. And when did you receive the
15 materials that you have in front of you?

16 A. Late on Tuesday, this week.

17 Q. Okay. But it refers to tests that were done just
18 last week on March -- or February 26?

19 A. This is probably the fastest turn on any data I
20 have ever reviewed.

21 Q. What would be a more typical length of time for
22 one to do a -- develop a brand new protocol and
23 validate it and do all that?

24 A. Development, validation, performance of the
25 testing of unknown samples, is usually -- you

1 know, there's no set rules, but it's usually
2 something that takes considerably longer than the
3 very aggressive time frame in this case. In this
4 case, they were actually running the case samples
5 before they even had the results of their
6 competency sample, so it was very, very
7 compressed.

8 Q. And, so, from this data, can you express any
9 opinion about whether the 3, as Q-46, 47, and 48,
10 questioned stains examined by Mr. LeBeau, could
11 have come from the blood sample, the blood tube,
12 Q-49, that was also examined?

13 A. It's quite consistent with the results that were
14 presented by the laboratory. Because of their
15 inability to detect EDTA in the 2 microliter
16 sample of Mr. Avery's blood, it's quite possible
17 that those blood swabs could have come from
18 Mr. Avery's blood tube, but simply not been
19 detectable by the laboratory.

20 Q. And what about the three swabs from the RAV that
21 were not tested by Mr. LeBeau; can any conclusion
22 be drawn on that?

23 A. I'm an analytical chemist, I'm not in the
24 business of just guessing on some samples. We
25 have to test samples to decide what's in them.

1 Q. Is there any kind of a -- We were talking about a
2 limit of detection, and, you know, what the
3 method can detect. And a lot of this is
4 technical stuff for us lay people. Is there any
5 kind of analogy that you can draw about, you
6 know, some sort of instrument, or some sort of
7 detection limit that we have?

8 A. You gave me the entree. This -- We have pretty
9 good detection limits. Our noses are able to
10 smell things. People are -- have different
11 sensitivities to different smells. And that
12 means we have different instrument detection
13 limits, if you will.

14 Some of us can detect things that are
15 present at very, very low levels. And some of us
16 require that more of it be present before we can
17 detect it. So our nose is analogous to an
18 instrument, in terms of its ability to detect a
19 smell.

20 Q. So if one was blindfolded and given a -- say a
21 warm apple pie or something, and asked, can you
22 smell an apple pie, is that an example of your
23 nose being able to detect something?

24 A. Yeah. Yeah. And although I suspect that most of
25 us who at least have well-functioning noses could

1 detect a warm apple pie if there were no
2 complications, if that apple pie was present in a
3 room with a lot of other smells, or the doors and
4 the windows were open and there was a brisk wind
5 blowing through, you might not be able to detect
6 it. Doesn't mean that the apple pie is not
7 there, doesn't mean it's not giving off odor, it
8 just means you can't detect it. So that's the
9 difference between an instrument detection limit
10 and a method detection limit.

11 Q. All right. And, finally, as a matter of
12 scientific adequacy, can the protocol that
13 Mr. LeBeau developed, I think it's 434, be used
14 to rule out the presence of EDTA in those three
15 RAV4 bloodstains that were tested, just because
16 it's not detected in their tests?

17 A. No.

18 Q. And why not?

19 A. Because we just don't know what the method
20 detection limit of his method was, as evidenced
21 by the fact that he couldn't detect a 2
22 microliter sample of Mr. Avery's blood -- he
23 couldn't detect EDTA in a 2 microliter sample of
24 Mr. Avery's blood.

25 Q. So even having gone through this test, is it

1 possible that EDTA is, or was, in those 3 RAV4
2 stains?

3 A. Yes.

4 Q. Thank you.

5 THE COURT: All right. At this time we'll
6 take our morning break. We'll resume in 15 minutes.
7 Members of the jury, I will remind you, again, not
8 to discuss this case, this morning's testimony, or
9 any other element about the case during the break.

10 (Jury not present.)

11 THE COURT: All right. Counsel, we'll
12 return in 15 minutes.

13 ATTORNEY BUTING: All right.

14 (Recess taken.)

15 (Jury Present.)

16 THE COURT: Mr. Gahn, will you be doing the
17 cross-examination for the State?

18 ATTORNEY GAHN: Yes, I will.

19 THE COURT: You may begin.

20 ATTORNEY GAHN: Good morning.

21 THE WITNESS: Good morning.

22 **CROSS-EXAMINATION**

23 BY ATTORNEY GAHN:

24 Q. I would first like to explore a little more, I
25 looked over your resumé, and a little more of

1 your experience, actual hands-on-experience with
2 the LC/MS/MS technology?

3 A. I have operated liquid chromatographs and mass
4 spectrometers. I have not operated them
5 configured, essentially connected together in the
6 manner in which they were in this case.

7 Q. Okay. And -- And could you just describe the
8 difference in the way they were connected
9 together in this case and what you are familiar
10 with.

11 A. I'm not sure I understand your question. The
12 physical difference between how they are
13 interfaced or?

14 Q. No, if you, yourself, have not performed
15 analysis, on chemicals, using the LC/MS/MS
16 technique?

17 A. That's correct.

18 Q. Have you ever performed any type of analysis to
19 test bloodstains for EDTA?

20 A. No.

21 Q. Have you ever conducted any type of analysis to
22 detect blood EDTA levels in a lavender-topped
23 tube?

24 A. No.

25 Q. How about any type of blood collection tube?

1 A. No.

2 Q. You talked about blood collection tubes and -- in
3 reference to the expiration date; what is your
4 experience with blood collection tubes?

5 A. Part of what I do when I assess data quality, if
6 the sample was collected in any particular
7 container, be it a blood collection tube or any
8 other kind of container, part of what I'm doing
9 is seeing whether that container was appropriate
10 to protect the integrity of the sample, so that
11 its composition was not altered or degraded over
12 time to the extent possible by its interaction
13 with the tube.

14 So whether it's in a quart jar, or a
15 purple-topped tube, I'm looking at, did they know
16 that that container was of appropriate
17 cleanliness before the samples were put in, and
18 that type of thing. And these things are
19 typically purchased in lots. And they are
20 certified for a particular lot. So that
21 manufacturer has actually tested those samples,
22 made sure that they met their specifications, and
23 certify the lot.

24 If there's a problem, then they can go
25 back and find out which lot caused the problem,

1 just like they could find out which peanut butter
2 had the problem and so forth. So it's a lot
3 identification.

4 Q. So, again, what is your personal experience on
5 how a purple-topped tube works?

6 A. My personal experience with how it works?
7 Obviously, I have the same lay experience that
8 everybody in the courtroom does with when I have
9 had blood samples collected. My experience as a
10 quality auditor is simply reconstructing the
11 paper trail associated with the integrity of that
12 sample.

13 Q. Are you stating that the expiration date on that
14 vacutainer applies to the stability of EDTA?

15 A. No, sir.

16 Q. What does the expiration date on the
17 purple-topped tube, ma'am, apply to?

18 A. The expiration date is determined and assigned by
19 the manufacturer. And it provides the user with
20 a date beyond which they cannot certify the
21 appropriateness of that tube for it's intended
22 use; that is, protecting the integrity of that
23 blood sample.

24 And that's a combination of all the
25 things that go into that. It's the combination of

1 maintaining the integrity of the vacuum, the
2 EDTA. It's the package. They don't have
3 separate expiration dates.

4 Q. What can you point to that states that the
5 expiration date on the purple-topped tube
6 pertains to the stability of EDTA?

7 A. Nothing. It does not do that.

8 Q. All right. I just wanted to make that clear.
9 The expiration date has to do with the efficiency
10 of the vacuum in the tube; isn't that true?

11 A. It's not just the vacuum; it's the entire package
12 for its inappropriate use. They don't try to
13 parcel out the parts.

14 Q. You are not stating that, because of that
15 expiration date, the EDTA has broken down?

16 A. Oh, no, sir. No.

17 Q. Thank you. That's all I needed.

18 A. Okay.

19 Q. I just wanted to clear that up. Mr. Buting put
20 up a number of exhibits that you looked at. And
21 one of the things I noted was that you only
22 looked at the results in what is concerned --
23 called the positive ion mode; is that correct?

24 A. When he went through the page by page one?

25 Q. Yes.

1 A. This is the one on the 16th -- You know, I'm
2 not -- I don't remember if this was positive or
3 negative; I would have to go back and look at the
4 sequence.

5 Q. Could you do that?

6 A. Okay. No, sir, I believe it's the negative ion
7 mode. Is there some misunderstanding of which
8 data we're actually talking about?

9 Q. My understanding is that the data that Mr. Buting
10 put up, for you to look at, was from the positive
11 ion mode; isn't that correct? First of all, what
12 is the positive ion mode?

13 A. It's just the operating mode for the instrument,
14 whether you are looking at positive ions or
15 negative ions.

16 Q. And what does this look at for the EDTA? What is
17 it looking for in the EDTA?

18 A. In the course of the analysis, I believe you have
19 probably already heard a brief introduction of
20 this, a mixture is separated into its component
21 pieces, or its component chemicals, with use of
22 the chromatography instrument, used with the
23 liquid chromatography.

24 And then as each set of chemicals comes
25 out, or each package of chemicals comes out, is

1 introduced in the mass spectrometer where it's
2 frag -- it's subject to very high energy and it's
3 fragmented. And when it breaks into pieces, the
4 mass spectrometer then detects those
5 characteristic fragments.

6 Q. What I'm asking for is, in the positive ion mode,
7 what form of EDTA are you looking at?

8 A. Well, I'm -- I'm not -- What am I looking at?
9 It's -- In this case --

10 Q. In this case, what did the FBI's Laboratory
11 protocol, what form of the EDTA did it look at in
12 the positive ion mode?

13 A. It's -- It's actually, analytically, the sample
14 can contain EDTA in any number of forms. And so
15 it can be present as a sodium salt. It can be
16 present -- During the course of extraction, it's
17 converted largely into -- During the course of
18 extraction and interaction with the blood calcium
19 in iron; is that what you are asking, whether
20 it's the ion form or --

21 Q. I guess what I'm looking for is whether it's --
22 what form and whether it's in its free acid form
23 or in its comp -- metal or -- metal iron complex?

24 A. We can look for both.

25 Q. You can look for both?

1 A. Oh, sure.

2 Q. Okay. And what I'm asking you is, what form did
3 the FBI look for in the positive ion mode?

4 A. Oh, I don't know. I would have to -- I believe
5 it was the free acid, but I would have to look.
6 If that's what --

7 Q. You don't have to, I will agree with you.

8 A. Okay.

9 Q. Maybe we can come to some agreements here --

10 A. Okay.

11 Q. -- and it will be easier for the jury.

12 A. Okay.

13 Q. And in the negative ion mode, is it fair to say
14 they were looking for the forms of EDTA, not only
15 in free acid form, but also in the metal iron
16 complex?

17 A. That's correct.

18 Q. Okay.

19 A. That's correct.

20 Q. Now, back to my original question.

21 A. Okay.

22 Q. The data that you looked at and you showed up on
23 the big screen, wasn't that only from the
24 positive ion mode; only -- in other words, only
25 in its free acid form?

1 A. Yes, you are targeting, specifically, the ions
2 attributable to that -- from that one breakdown,
3 yes.

4 Q. So no data in the negative ion mode was shown on
5 the big screen, correct?

6 A. I don't remember, but there's some in the
7 package, if that's your question.

8 Q. That's my question. Did you display, or did
9 Mr. Buting display, any of the data in the
10 negative ion mode, which would be in the free
11 acid and in the iron complex forms?

12 A. I don't remember if he did.

13 Q. Well, let me ask you this, then, ma'am.

14 A. Okay.

15 Q. Do you remember reviewing that data?

16 A. Yeah.

17 Q. And what did -- What did the data tell you in the
18 negative ion mode?

19 A. Well, it's -- it's quite clear that -- I don't
20 know what you mean, which data you are talking
21 about, but it's quite clear that the method is
22 capable of detecting EDTA and -- and its iron
23 complex, as I would expect to be the case.

24 Q. So the protocol that the FBI put together is
25 capable of making an analysis for the presence of

1 EDTA in a lavender-topped tube, correct?

2 A. Yes, that's correct.

3 Q. And, likewise, in a non-preserved tube?

4 A. Yes.

5 Q. And, likewise, in dried bloodstains?

6 A. Yes.

7 Q. Now, did you read any articles or publications
8 that had to do with the analysis of EDTA in dried
9 bloodstains?

10 A. Only those articles that were provided by the FBI
11 Laboratory as part of their foundational
12 reference material along with this case.

13 Q. I'm going to ask that Mr. Fallon hand you two
14 exhibits. And I would ask you to identify each
15 of them for us, please.

16 A. Yes, sir. Exhibit 436 is an article from the
17 *Journal of Analytical Toxicology, The Analysis of*
18 *EDTA -- sorry, I'm going too fast -- in Dried*
19 *Bloodstains by Electrospray LC-MS-MS and Ion*
20 *Chromatography.*

21 Q. Let's stick with that one just for a minute.

22 A. Okay.

23 Q. Did you read that?

24 A. Yes.

25 Q. And is analytical -- I'm sorry, was that

1 Analytical Chemistry or Toxicology?

2 A. This particular one is Analytical Toxicology.

3 Q. And the *Journal of Analytical Toxicology*, is that
4 a well recognized scientific publication?

5 A. Yes, it is.

6 Q. And it's scholarly authoritative in the field?

7 A. Yes.

8 Q. And an article such as this would be a peer
9 reviewed article?

10 A. Yes.

11 Q. And that article also determined that it's
12 possible to test for the presence of EDTA in
13 dried bloodstains?

14 A. That's correct.

15 Q. And, also, the article, which would be the next
16 exhibit, please, could you state where that was.

17 A. That's an article from *The Analytical Chemistry*,
18 Exhibit 437, dated August 1st, 1997.

19 Q. And that, also, is a scholarly, authoritative,
20 scientific publication?

21 A. Analytical Chemistry is, yes.

22 Q. How about Analytical Toxi -- I'm sorry --
23 Analytical Chemistry?

24 A. Yes.

25 Q. And, again, that would be a peer reviewed

1 article.

2 A. I presume so.

3 Q. And, again --

4 A. This is a web version. I don't -- I don't know
5 if this was one of the ones subject to the same
6 peer review, but I would presume so.

7 Q. And did you -- When you read the FBI protocol and
8 compared it to those two articles, did you note
9 any improvements that the FBI made in the
10 development of the protocol that was used in this
11 case?

12 A. Yeah, I would presume that there were several
13 things that they did that would have to be
14 considered improvements against these early
15 versions.

16 Q. And could you tell us what those improvements
17 were that they made?

18 A. Their extraction procedure is substantially
19 different. One of these techniques uses
20 capillary electrophoresis instead of liquid
21 chromatography. They each have their own issues.
22 They are using tandem mass spec, mass spec, mass
23 spec, in the FBI's method. And the extraction
24 procedures are substantially different. I would
25 have to presume that those -- that they did those

1 because they considered it to be an improvement.

2 Q. Do you believe it was an improvement, by doing
3 the analysis, looking for not only the free acid
4 form and also the iron complex form of EDTA?

5 A. That would be considered a benefit.

6 Q. Correct.

7 A. Yeah.

8 Q. And why would that be a benefit? Why would you
9 want to look for it in the negative ion mode in
10 both forms?

11 A. Well, because it's a better -- essentially, if
12 you will, a better recovery, better understanding
13 the path that EDTA took in your samples.

14 Q. So there were significant improvements made in
15 this current protocol over the two articles that
16 you --

17 A. Oh, certainly, yes. Science isn't static, we
18 hope to improve it all the time.

19 Q. All right. Thank you. With that, significant
20 improvements, I do note from your direct exam
21 that you had a little problem with the -- I
22 guess, what, the uncertainty of their measurement
23 system, or their -- that -- their detection
24 level?

25 A. Detection limit -- method detection limit, that's

1 correct.

2 Q. What is the difference between a qualitative
3 assay and a quantitative assay?

4 A. That's a very good question. A qualitative assay
5 or qualitative measurement doesn't tell you how
6 much of something is present; it simply detects
7 it and identifies it. So, qualitatively, I can
8 say that EDTA is present, but it says nothing
9 about how much EDTA is present.

10 In contrast, a quantitative assay tells
11 you how much of something is present. There is
12 an entirely different calibration protocol to get
13 to how much of a given compound is present.

14 Q. And both are scientifically sound procedures?

15 A. Absolutely.

16 Q. And how would you characterize the FBI's protocol
17 or testing methodology in this case?

18 A. This is a purely qualitative method.

19 Q. And that, again, is a valid scientific method of
20 developing an analysis methodology?

21 A. Absolutely.

22 Q. Now, if you would please pick up the -- their
23 protocol, please. Do you have that?

24 A. The FBI's protocol?

25 Q. Yes, please.

1 A. Yeah. Yes. Okay.

2 Q. And on Page 7, under Paragraph 14, Limitations,
3 No. 8, the Limit of Detection, is it -- it was
4 your testimony that this was under a valid method
5 for determining their limits of detection?

6 A. It's not a universally used method, but it's an
7 appropriate means of getting to an instrument
8 detection limit.

9 Q. And one that could be used in detecting the
10 levels of EDTA, whether in a purple-topped tube
11 or in a dried bloodstain?

12 A. No, the method that they used, that they referred
13 to in this paragraph, is simply a means of
14 determining an instrument detection limit. So
15 it's -- it detects how much -- it gives you an
16 indication of how much EDTA you can detect from a
17 solution that you actually take a syringe and
18 inject into the instrument. It doesn't tell you
19 anything about how much EDTA you can detect from
20 a stain sample.

21 Q. But this limitations in their protocol clearly
22 state, and the data shows, that they are able to
23 detect -- 1 microliter drop is readily detectable
24 in this protocol?

25 A. I don't believe that that's true.

1 Q. So when they state that the 1 microliter drop was
2 readily detectable using this technique, are you
3 saying that's not true?

4 A. That particular statement is in reference to this
5 paragraph about a separate LOD study where some
6 EDTA was placed into a lavender-topped tube.
7 That's not what I'm referring to when I say they
8 had problems detecting it in a 2 microliter spot.
9 I'm referring to the actual case samples in this
10 case, where they -- where they were not able to
11 detect it from a 2 microliter set of blood, of
12 Mr. Avery's blood, as opposed to this one, which
13 is a more sort of theoretical, pristine case.

14 Q. I think we're talking about the same thing, but
15 maybe my question was not very good.

16 A. Okay.

17 Q. The system that they developed, the methodology
18 that they developed, allows them to detect levels
19 of EDTA to the 1 microliter level?

20 A. Okay. The reason that's not a true statement,
21 generally, is because we don't know how -- the
22 concentration of EDTA that's present in that
23 microliter. I don't know if there's 100
24 micrograms or 1 microgram present in that 1
25 microliter sample.

1 So saying it's possible to detect EDTA
2 in 1 microliter of blood really, scientifically,
3 doesn't mean much unless you also know the
4 concentration of EDTA. In this case, they state
5 that the 1 microliter drop that they prepared
6 from -- from a whole blood sample and known EDTA,
7 they knew the concentration of EDTA in that
8 sample.

9 I was unable to find the data related to
10 this particular experiment that they described.
11 It wasn't in this package, as far as I could
12 tell.

13 Q. And that would be important in a quantitative
14 aspect?

15 A. It is absolutely important in a quantitative
16 assay, but it's -- the reason it's important
17 qualitatively is because when you say not
18 detected, it's not detected at what level. Is it
19 not detected at a very, very concentrated level,
20 or is it not detected at a very, very weak level?

21 If I have my glass of water here and I
22 drop in two drop -- two crystals of sugar, there
23 is sugar in my water. But I may or may not be
24 able to detect it. If I run it by some
25 techniques, I may say not detected. It doesn't

1 mean it's not there, it just means I can't detect
2 it.

3 (Court reporter asked the witness to slow down.)

4 A. I'm sorry. If I run it by a method with a very
5 high detection limit, I won't be able to detect
6 -- find the sugar. It doesn't mean it's not
7 there; it just means that I can't find it. If I
8 put a lot of sugar in there, that method might be
9 able to detect it. And I would say, yes, I saw
10 sugar in that water. So it really depends on how
11 much sugar is in my water sample, or how much
12 EDTA is in the blood sample.

13 Q. When you looked at the data, did the testing
14 procedures employed by the FBI detect, at the 1
15 microliter level, EDTA in the blood tube of
16 Steven Avery?

17 A. In the 1 microliter sample that they reported, a
18 single instance, yes, they did report a positive
19 for EDTA. The 2 microliter sample, they did not
20 detect EDTA.

21 Q. But, again, that was just looking in the positive
22 ion mode, just --

23 A. Yes, that was the same set, yes.

24 Q. Just the free acid form?

25 A. Yes.

1 Q. Did you look at the negative ion form in the more
2 sensitive testing?

3 A. I believe that by the FBI's own data, they
4 indicate that both methods are comparably
5 sensitive. They report the same detection --
6 instrument detection limit for both. Let me look
7 and see if I can find some negative here. Okay.
8 I'm not sure this is your question, so tell me if
9 I'm off track here.

10 Q. Would it be helpful if I were to put up, on the
11 big screen, the 1 microliter results from the
12 tube of Avery -- tube of Steven Avery's blood?

13 A. I completely concur that that shows the positive
14 detection and identification of EDTA.

15 Q. And what I'm saying, though, ma'am, is that, what
16 you put up during direct exam was just in the
17 positive ion mode. I would like to put it up in
18 the negative ion mode --

19 A. Okay.

20 Q. -- also.

21 A. Okay. Okay.

22 Q. Would that be helpful for you instead of trying
23 to --

24 A. Well --

25 Q. I will directly go to it.

1 A. Okay. Thank you.

2 Q. And could you look -- does this state that these
3 are the test results, in the negative ion mode,
4 for the 1 microliter?

5 A. Yeah. I don't know where that is in my package
6 but, yes, that's what that looks like.

7 Q. Okay. But you did see this and review this?

8 A. Oh, yeah. There's a lot of stuff here.

9 Q. And EDTA is clearly present in the negative ion
10 mode. This is in the acid free, as well as the
11 iron complex, in the tube of Steven Avery's
12 blood, at the 1 microliter level, right?

13 A. The way that the laboratory runs their protocol,
14 their screening and confirmation, and they,
15 essentially, have to have confirmation both ways.
16 They have to have a positive in both techniques.

17 That's why, frankly, once I saw that it
18 was not detected, I didn't spend a lot of time
19 looking at the rest of it, but I will try to find
20 this, if that's okay.

21 Q. Or if we zoomed out more --

22 A. I don't see the analysts call on here, so to see
23 the criteria that they used. Okay. Thank you.
24 That helps.

25 Q. We can set this up anyway you like. We're

1 just -- And look through the files, if you want.
2 If this is helpful, we can move on. Can you work
3 with this?

4 A. That's just fine, yeah.

5 Q. Does this show that EDTA is present in the vial
6 of Steven Avery's blood, at the 1 microliter
7 level?

8 A. No, it doesn't, because there's inconsistent
9 results for that conclusion from the other
10 technique. You know, when you do it practicing
11 analytical chemistry, you don't get to cherry
12 pick which results you want to accept or not when
13 you run a given sample through an instrument.

14 Q. What is it about the data, that is on this form
15 in front of you, that states that EDTA is not in
16 Steven Avery's tube?

17 A. Nothing.

18 Q. Nothing?

19 A. Nothing.

20 Q. Okay. So, I will ask again, at the 1 microliter
21 level, in the negative ion mode, looking at free
22 acid form, as well as iron metal complex form,
23 EDTA is present in the tube of Steven Avery's
24 blood at the 1 microliter level?

25 A. As called here, that is a correct statement.

1 Q. Thank you.

2 A. Sorry.

3 Q. That's fine. Also, do you remember looking at
4 the data at the 2 microliter level?

5 A. Yes.

6 Q. In the negative ion mode?

7 A. No, I don't. I don't remember that. I'll bet
8 you can put it up there for me.

9 Q. I bet I can. Would you like to look at that,
10 too?

11 A. Please.

12 Q. And, again, what I'm going to ask is that whether
13 in the negative ion mode, looking at the free
14 acid form and the metal complex -- iron complex,
15 that EDTA is present at the 2 microliter level?

16 A. It appears that the analyst has called it a no in
17 this case. You know what, I'm sorry, can I get
18 you to zoom in a little more --

19 Q. Sure.

20 A. --right up here.

21 Q. Mm-hmm.

22 A. I'm sorry. Okay. Yeah, it appears that the
23 analyst in this case has -- has called this a no.
24 And if you go back to the kind of left side where
25 he's -- the left side of the page --

ATTORNEY BUTING: Zoom out.

A. Yeah, be easier if you back up a little. Down lower. There we go. Clearly, in this case -- actually, if you go a little bit down, it will be more obvious that there is really nothing showing there.

Yeah, in this particular case, on this 247 ion, there's an indication that they simply did not detect it. And the analyst in this case is speculating as to whether that possibly may have been a weak injection.

Q. Correct. But at the 1 microliter level, in the negative ion mode, which we saw before, EDTA is in the blood tube of Steven Avery?

A. Based solely on that data, yes.

Q. Now, when you -- And, clearly, whether you are in the positive ion mode or the negative ion mode, EDTA is present in the 5 microliter sample of Steven Avery's blood in the tube, correct?

A. I don't recall ever seeing data from a 5 microliter sample of Mr. Avery's blood. I only recall seeing one, two, and the actual lead sample.

(Court reporter couldn't hear.)

A. And the actual sample of Mr. Avery's blood. I

1 recall seeing a 1 and 2 microliter spot sample
2 and what they called the positive control from
3 the Q sample.

4 Q. But this morning or late -- earlier this morning,
5 Mr. Buting put up the Positive Control B.

6 A. Yes.

7 Q. Which you --

8 A. Yes.

9 Q. And you recognize that that's the 5 microliter
10 level -- that's the 5 microliter level from his
11 EDTA tube?

12 A. Oh, I see. I see what you are saying, I think.
13 That particular sample, I have no way of knowing
14 exactly how much sample they used. That --
15 Because the sole identification of that is
16 Positive Control, Q-49.

17 Q. But, ma'am, in their notes -- don't they clearly
18 state, in their handwritten notes, that for the
19 Positive Control B, 5 microliters?

20 A. All these samples have a 5 microliter injection
21 volume. That's just how much of the sample is
22 injected to the instrument, but it's not how much
23 of the blood sample is injected in the instrument
24 in that case. It's how much of the extract
25 volume is injected into the instrument. Those

1 are two completely different things, with
2 completely different concentrations.

3 Q. Are you stating that the Positive Control B, Q-49
4 extract, is not the 5 microliter level of Steven
5 Avery's blood from the tube?

6 A. I -- As I understood it, that was a prepared
7 extract sample so -- and there's -- I will just
8 mention there's -- there are very few words in
9 this document. I can only infer from sample
10 description, sample titles.

11 Q. Would you look at the handwritten notes --

12 A. On the one that's been admitted previously?

13 Q. No, it might be easier if I were to bring you
14 what I have.

15 A. Okay.

16 Q. Instead of -- And I recognize that this -- such a
17 large volume, is difficult for you to go through.
18 We'll put it on the screen and, then, if you feel
19 as though you want to look through your notes to
20 find that section.

21 A. Okay.

22 Q. And do you see where it says Positive Control B,
23 it's probably the third little hash mark down
24 from the notes, Positive Control, 5 microliters?

25 A. Can you zoom in on that, please?

1 Q. Sure.

2 A. Okay.

3 Q. Do you see that?

4 A. Uh-huh.

5 Q. So, when you put up this morning, the positive
6 ion mode for the examination of the analysis, of
7 this positive control, that showed that EDTA was
8 present in the tube of Steven Avery, this was at
9 the 5 microliter level?

10 A. I'm sorry, but that's a misunderstanding. If you
11 continue to read here, it says 5 microliters of
12 blood was pipetted onto a clean cotton swab. So
13 he was not just taking 5 microliters and
14 injecting it into the instrument.

15 He was taking 5 microliters and putting
16 it onto a swab. And, ultimately, then it gets
17 into the instrument. Now, that's analogous to
18 if -- I'm not sure I'm understanding you
19 properly -- but that is just analogous to the
20 sample that I had concerns about, the 2
21 microliter sample. It's directly analogous to
22 that, in terms of it wasn't directly injected
23 into the instrument; it was placed on a swab and
24 then that was extracted.

25 Q. Will you agree that the Positive Control B, Q-49,

1 the tube of Steven Avery's blood --

2 A. Mm-hmm.

3 Q. -- that at -- that in the data that you looked
4 at, at the 5 microliter level, EDTA was present?

5 A. Yes, sir, it was.

6 Q. Okay.

7 A. I'm sorry, I thought that was like very clear.

8 Q. My questions may be inarticulate. I don't know.

9 A. I want to make sure I answer the right one.

10 Q. And you did. Okay.

11 A. Okay.

12 Q. All right. So, now, when you are talking 1
13 microliter, 2 microliters, 5 microliters, it's an
14 awfully small amount.

15 A. It sure is.

16 Q. And I think you said on direct exam that
17 sometimes, you know, you get down and there can
18 be things that can cause -- when you are down
19 that low in your detection levels, whether 1 or 2
20 microliter, something can skew one, one way or
21 the other; is that what you said or --

22 A. Well, it's just that, when you are down that low,
23 it's a more complicated analysis. And there is
24 more variability, if you will, in the results.
25 If the sample concentration isn't homogeneous,

1 any number of things can cause differences.

2 Q. But the data that we have just put up, as far as
3 the 1 microliter of Steven Avery's blood -- And
4 when we're talking 1 microliter, it's about like
5 1/50th of a drop, correct?

6 A. Right. And it's only a very small fraction of a
7 drop. If you look at this little pipette, it
8 would be obvious how small it is.

9 Q. And that's a very small amount we're dealing
10 with?

11 A. Yes, it sure is.

12 Q. And down to that level, EDTA was detected in the
13 blood of Steven Avery?

14 A. In the one not in the two.

15 Q. Pardon me?

16 A. In the 1 microliter sample, not in the 2
17 microliter sample.

18 Q. But also in the 5 microliter?

19 A. And in the 5, that they call the Positive
20 Control, that's correct.

21 Q. And some artifact, or some interference, or
22 whatever, may have caused the 2 microliter level
23 to -- under their protocol, to not call it?

24 A. Sure. And that's -- that's why you do detection
25 limit studies, because detecting it sometimes and

1 not detecting it other times, is entirely the
2 kind of thing you expect if you are operating at
3 the detection limit.

4 Q. It's not unusual?

5 A. That's not unusual.

6 Q. And even at the 2 microliter level, the presence
7 of EDTA was indicated, but wasn't called, maybe
8 because the ratio with one of the other ions was
9 out of place, that's all?

10 A. Well, you know, in analytical chemistry, close
11 doesn't count. You either call it or you don't.

12 Q. Correct, and they didn't call it?

13 A. That's correct, they did not.

14 Q. But still, when you looked at the data, at the 2
15 microliter level, the presence of EDTA still was
16 indicated?

17 A. That's correct.

18 Q. Okay. Now, maybe we don't even have to go
19 through the graphs. When you looked at the
20 extract, Q-46, which was -- under Q-46, do you
21 know which one I'm talking about?

22 A. Mm-hmm.

23 Q. When you looked at the data in the positive ion
24 mode and the negative ion mode, correct?

25 A. Okay.

1 Q. No EDTA was detected?

2 A. I will look just to make sure, but that's my
3 recollection.

4 Q. Okay.

5 A. That's correct.

6 Q. And in -- And that Q-46, as you know, is a
7 bloodstain from the dashboard of the RAV4?

8 A. That's correct.

9 Q. And on Q-47 extract, which was the bloodstain
10 from the rear passenger door of the RAV4?

11 A. Yes.

12 Q. No EDTA was detected?

13 A. That's correct.

14 Q. And on Q-48, which was a bloodstain from the CD
15 case that was in Teresa Halbach's RAV4, in the
16 positive ion mode, as well as in the negative ion
17 mode, no EDTA was detected?

18 A. Correct.

19 Q. I'm going to show you a picture of the swabs.
20 Have you seen the photographs of the swabs that
21 were --

22 A. Xerox copies, I haven't seen the photographs
23 themselves.

24 Q. Would those be helpful, to see the photographs of
25 them?

1 A. I can.

2 Q. Okay. I want to show you, this was a -- where --
3 this would be Q-46. This would be where the swab
4 was taken from by the Crime Lab analyst.

5 A. Mm-hmm.

6 Q. And I would like to show you, now, a photograph
7 of the swab, Q-46, that was sent to the FBI for
8 testing in this case. Now, again, we're dealing
9 with 1 microliter, which is, I think we agreed,
10 1/50th of a drop.

11 A. Okay. Here's the problem, we don't know what
12 volume we're dealing with. After -- You know, we
13 don't know what volume of blood was deposited on
14 the dashboard, if you are referring to this
15 particular -- these photographs?

16 Q. Yes, ma'am. I understand.

17 A. You said -- Okay.

18 Q. What I'm stating is that the detection limit for
19 the FBI protocol was they can detect the presence
20 of EDTA at the 1 microliter level. Isn't that
21 what the study stated?

22 A. It stated that. I don't believe the data support
23 that conclusion.

24 Q. But you just stated that there was no EDTA
25 present in the extract, Q-46, from the dashboard?

1 A. True, but you can't run a detection limit study
2 on unknown samples. That's an unknown sample.
3 We don't know whether EDTA is present in that
4 sample or not. You can only run detection on a
5 set of unknowns.

6 Q. And there was no EDTA detected on the rear door
7 of Q-47?

8 A. That's correct.

9 Q. And there was no EDTA detected on the stain from
10 the CD case in Teresa Halbach's car?

11 A. That's correct.

12 Q. Yet, in the blood tube of Steven Avery, clearly,
13 in the 1 microliter level, in the positive mode
14 and negative ion mode, testing for free acid EDTA
15 and metal iron complex EDTA, it was present?

16 A. It was present and confirmed in the 1 microliter
17 sample.

18 Q. Thank you.

19 ATTORNEY GAHN: Thank you, so much. That's
20 all I have, ma'am.

21 THE COURT: Any redirect, Mr. Buting?

22 ATTORNEY BUTING: Yes.

23 **REDIRECT EXAMINATION**

24 BY ATTORNEY BUTING:

25 Q. Let's just -- Let's pick up right there for a

1 moment. Mr. Gahn was limiting, very carefully,
2 his question to the 1 microliter level. But as
3 we have shown and discussed here, both direct and
4 cross, the data that the FBI -- the only data
5 they generated shows different results when you
6 test an even larger stain at 2 microliter, in the
7 positive mode, right?

8 A. That's correct.

9 Q. To an analytical chemist, what does it mean,
10 then, when you get what appears to the layperson
11 to be inconsistent results?

12 A. I can certainly see how it seems inconsistent,
13 but just based on my experience with detection
14 limit studies, is that that's not an unexpected
15 result if you are trying to analyze samples that
16 are at or near the detection limit. The fact
17 that sometimes you will see them and sometimes
18 you won't, even at slightly higher
19 concentrations, is not an unexpected result.

20 Q. But does it allow you to draw the conclusion that
21 Mr. LeBeau did in his report that, therefore,
22 this protocol is detectable, or shows that EDTA
23 can be detectable as low as 1 microliter?

24 A. I believe that's not supported by the data.

25 Q. Let me go back to the beginning of Mr. Gahn's

1 questioning for a minute, because I want to make
2 sure that it's clear to the jury, he asked for
3 your opinion about whether or not this protocol
4 was sufficient to test for the presence of EDTA,
5 correct?

6 A. Correct.

7 Q. And you agreed that it is?

8 A. It is. If it detects EDTA, it's a reasonable
9 conclusion that it is present.

10 Q. Okay. Is the protocol also, however, adequate,
11 or not adequate, to establish the absence of
12 EDTA?

13 A. It is insufficient to establish the absence of
14 EDTA at or near its detection limit.

15 Q. All right. So you can use this protocol in one
16 way, but you can also incorrectly use it in
17 another way?

18 A. Yes.

19 Q. And in this -- Dr. LeBeau's attempt to use this
20 protocol, to exclude the presence of EDTA in the
21 bloodstains; is that a correct or incorrect way
22 of using this protocol?

23 A. I believe that's incorrect.

24 Q. The questions about the expiration date, for a
25 moment, on the tube, you indicated the

1 manufacturer's expiration date is for the whole
2 package?

3 A. That's correct.

4 Q. Part of which is EDTA, right?

5 A. Yup.

6 Q. And the -- As far as the stability of EDTA and
7 its -- how long it lasts without beginning to
8 degrade, does the FBI's own protocol establish
9 only a six month limit for a known reagent
10 quantity EDTA solution that they prepared?

11 A. That's correct.

12 Q. And in so doing, does that limit, in their
13 protocol, express a -- I guess an opinion about
14 the stability of EDTA in that solution?

15 ATTORNEY GAHN: Objection, your Honor,
16 foundation for that question.

17 THE COURT: Sustained.

18 Q. (By Attorney Buting)~ Is the fact that the FBI
19 themselves, when they make up a -- mix up a
20 solution of EDTA, in their protocol, the fact
21 that they limit its use to only -- or
22 approximately six months, is that an indication
23 then of -- is that a shelf life?

24 A. That is, effectively, a shelf life.

25 Q. And is that -- Similarly, is that similar to the

1 kind of shelf life that manufacturers put on
2 products?

3 A. Yes. You use it after the shelf life at your own
4 risk. It may or may not be what they put into
5 it.

6 Q. Okay. Let me just -- Let me just clear up a
7 little bit the whole idea of detection limit.
8 When you get down to a detection limit for a
9 sample, does that mean that at that limit you are
10 100 percent of the time able to find what you
11 expect to find?

12 A. No, it does not. It means that 50 percent of the
13 time you will be able to see it and the rest of
14 the time you won't.

15 Q. Really? So it's an equilibrium sort of, I mean,
16 a null, or what would you call that?

17 A. I wouldn't really call it equilibrium because
18 that means something pretty different. But
19 it's -- it's like you are trying to see whether
20 or not there is one spike growing out of a field
21 of grass. There is a lot of variability, and you
22 are trying to see if one of them is big enough
23 than the rest -- bigger than the rest of them,
24 enough that you can detect it.

25 Q. And what you are saying is when someone -- when a

1 chemist establishes a limit, a lower limit of
2 detectability, whatever that level is that's
3 found, even there, 50 percent of the time the
4 substance may be present and not detected?

5 A. At that concentration, yes.

6 Q. And the other 50 percent of the time it would be
7 detected?

8 A. Yes. When you get about an order of magnitude
9 above a detection limit, that's the point where
10 you can start to quantitate. You have to be
11 higher than detection limit to be able to
12 quantitate.

13 At a detection limit, you can only tell
14 you whether or not it's there. You can't tell
15 how much is there. In order to be able to tell
16 how much is there, to actually get a quantitative
17 analysis, you have to be substantially above the
18 detection limit -- the instrument detection
19 limit.

20 Q. And you mentioned, early on in the direct, about
21 some experience that you had and -- with the
22 Navy, trying to examine the limits of detection
23 that a particular protocol actually is designed
24 to do, right?

25 A. Mm-hmm.

1 Q. You have to say yes or no, I'm sorry.

2 A. Yes, sorry.

3 Q. And in that instance you -- I believe you said
4 you found that even though the lab was reporting
5 that this -- to the Navy, that this chemical in
6 the bay was not present, by reviewing the same
7 kind of data you are seeing now, you were able to
8 determine that that was a worthless opinion
9 because the level was simply too high?

10 A. Yeah. It was meaningless in that particular
11 application. It's not -- It wasn't exactly the
12 same kind of data. It wasn't LC/MS data, it was
13 actually a different instrumental technique.

14 Q. Okay. I don't want to confuse things then. So,
15 finally, then, when Mr. Gahn asked you, based on
16 this test and this data, whether or not EDTA was
17 detected in Q-47 -- Q-46, Q-47 and Q-48, does
18 that mean that none of those samples have EDTA in
19 them?

20 A. Not necessarily.

21 Q. Because of what you talked to us before about
22 detection limit?

23 A. Yes.

24 Q. So, can you conclude then, that any of the RAV4
25 -- 3 RAV4 stains that were examined by the FBI

1 could not have come from the blood tube that
2 contained Mr. Avery's blood?

3 A. I can't conclude that.

4 Q. Based upon the data that's presented there,
5 generated from the FBI's own tests?

6 A. Right.

7 ATTORNEY BUTING: Thank you.

8 THE COURT: Anything else, Mr. Gahn?

9 ATTORNEY GAHN: Just a few follow-up
10 questions.

11 RECROSS-EXAMINATION

12 BY ATTORNEY GAHN:

13 Q. Again, back to this tube, and the vacutainer
14 tube, and the expiration date.

15 A. Okay.

16 Q. You are not stating that, in March of 1999, EDTA
17 broke down and was not present in that vial?

18 A. No. In March of '96, when it hit its expiration
19 date, it doesn't suddenly go bad on April Fool's
20 Day. Just like milk doesn't suddenly go bad on
21 its expiration date. But that's as far as the
22 manufacturer can certify to its acceptability.

23 Q. But doesn't that expiration date really have to
24 do with the vacuum and they can't guarantee that
25 the vacuum of bringing the blood from the vein

1 into the tube is going to operate?

2 A. That's a serious limiting factor for those tubes,
3 yes, absolutely.

4 Q. And that's what they are stating by that
5 expiration date, correct?

6 A. You know, it sounds subtle, but really it is the
7 system for its intended use. If you go back and
8 you look in the manufacturer's specs for these
9 things, that's the way they describe them. They
10 always talk about intended use.

11 Q. But probably most noteworthy in this case is that
12 the blood is still in its liquid form 11 years
13 later?

14 A. It is.

15 Q. And that means that the anticoagulant is working
16 very efficiently?

17 A. That's correct.

18 Q. And that's due to the EDTA in the tube?

19 A. That's correct.

20 ATTORNEY GAHN: Thank you, ma'am. that's
21 all I have.

22 THE WITNESS: Thank you.

23 ATTORNEY BUTING: A real couple quick
24 follow-ups.

25 **FURTHER REDIRECT EXAMINATION**

1 BY ATTORNEY BUTING:

2 Q. If the tube, Q-49, that Mr. Avery has, says it's
3 got EDTA in it, on the label, right?

4 A. Yes. Well, it doesn't say it has it, it's
5 implied by the presence of the purple top.

6 Q. Okay. But I haven't brought that actual tube out
7 for you to look at it so, but assuming that it
8 does, then it would not be terribly surprising
9 that some level of EDTA would be detected in that
10 still liquid form, right?

11 A. I would have expected that, yes.

12 Q. Okay. But the real question that is of interest
13 here is the stains in the car of the vehicle,
14 right?

15 A. That's correct.

16 Q. And that's what you are saying Mr. --
17 Dr. LeBeau's report cannot rule out?

18 A. Exactly.

19 Q. Thank you.

20 THE COURT: All right. Members of the
21 jury, at this time we're going to take our lunch
22 break. I will remind you, again, not to discuss the
23 case in any fashion, during the lunch break. We'll
24 resume about 1:00.

25 (Jury not present.)

1 THE COURT: You may be seated. Will the --
2 You may be seated. Will the defense be ready to go
3 at 1:00 --

4 ATTORNEY BUTING: Yes, we will.

5 THE COURT: -- with the next witness?

6 ATTORNEY BUTING: Yes, we will.

7 THE COURT: Very we'll. We'll see you
8 then.

9 (Recess taken.)

10 THE COURT: Mr. Strang, at this time the
11 defense may call its next witness.

12 ATTORNEY STRANG: Thank you, your Honor.
13 And, actually, before I do that, and while I'm
14 thinking of it, I would move into evidence Exhibits
15 499 and 500, which relate to Ms Arvizu.

16 THE COURT: Any objection?

17 ATTORNEY GAHN: No objection.

18 THE COURT: Very well, those two exhibits
19 are admitted.

20 ATTORNEY STRANG: And then the next witness
21 is Dr. Scott Fairgrieve.

22 THE CLERK: Please remain standing and
23 raise your right hand.

24 **DR. SCOTT FAIRGRIEVE**, called as a
25 witness herein, having been first duly sworn, was

1 examined and testified as follows:

2 THE CLERK: Please be seated.

3 THE WITNESS: Thank you.

4 THE CLERK: Please state your name and
5 spell your last name for the record.

6 THE WITNESS: Yes, my name is Dr. Scott
7 Fairgrieve, F-a-i-r-g-r-i-e-v-e.

8 **DIRECT EXAMINATION**

9 BY ATTORNEY STRANG:

10 Q. Are we good on volume? Maybe just pull the mike
11 down just a little bit?

12 A. Is that better?

13 Q. Yes. Probably so, yes. Good afternoon. I
14 wonder if we could start, Dr. Fairgrieve, with
15 explaining to our jury why it is that we brought
16 you down from Laurentian University in Ontario,
17 Canada.

18 A. I was requested by the defense counsel in this
19 particular case to review the reports and
20 circumstances surrounding the investigation of
21 the Avery property and, specifically, with
22 respect to cremated remains in this case and the
23 forensic anthropologist report.

24 Q. And how -- how, in general, are you employed?

25 A. I am currently employed as the chair of the

1 Department of Forensic Science at Laurentian
2 University in Sudbury, Ontario, Canada. And I am
3 also a forensic anthropology consultant to the
4 Office of the Chief Coroner for Ontario.

5 Q. Okay. Let me show you your curriculum vitae,
6 which I have marked -- had marked as Exhibit 501.
7 And we'll give the people a little bit of an
8 overview of who you are without -- I promise you
9 -- and without going through all 18 pages of
10 this.

11 A. Okay.

12 Q. You have a bachelor's degree?

13 A. Yes, I have a bachelor of science in biological
14 anthropology from the University of Toronto.

15 Q. Where did you take your education after that?

16 A. I then proceeded on to do my master's level
17 degree at Cambridge University in England, also
18 in biological anthropology.

19 Q. What is biological anthropology?

20 A. It's the examination, and my specific speciality,
21 of the human skeleton. We also refer to it as
22 human osteology. And I'm an expert -- or
23 received education in the area of the analysis of
24 the skeleton in a variety of contexts, both
25 archaeological and modern.

1 Q. Did you attain, what is it, a master's in
2 philosophy in biological anthropology from
3 Cambridge University?

4 A. That's correct. It's referred to as an M.Phil.
5 Degree.

6 Q. All right. You come back from Great Britain,
7 obviously, at some point, back to Canada, and
8 where do you -- where do you go with your
9 education from there?

10 A. From there, I attended the University of Toronto
11 for my doctoral degree, a Ph.D. in human skeletal
12 biology within the Anthropology Department.

13 Q. When did you obtain the Ph.D.?

14 A. In 1993.

15 Q. What have you done in general, big picture, what
16 have you done with your professional life since
17 you completed the doctorate?

18 A. In general, I have, obviously, as a forensic
19 scientist, I belong to several associations, but
20 in my actual work, I am employed, since 1991, at
21 Laurentian University as a forensic
22 anthropologist and have undertaken teaching
23 courses at the undergraduate level.

24 Q. Where is Laurentian University, specifically?

25 A. It's about -- It's in the town of Sudbury,

1 Ontario, which is a very well-known mining
2 community. It is located approximately four hour
3 drive north of Toronto.

4 Q. What -- Give us a run down, if you would, on a
5 little bit more about the faculty position you
6 hold as Chair of the Department of Forensic
7 Sciences at Laurentian?

8 A. Well, I oversee the operation and administration
9 of the department; however, I'm also a teacher,
10 if you like, a university professor. So I
11 instruct students in various different courses,
12 including forensic biology, introducing --
13 introduction of forensic science, forensic
14 anatomy of the human skeleton, as well as
15 forensic analysis of the human skeleton.

16 Q. Outside of an undergraduate or graduate student
17 classroom, do you do any training or teaching of
18 law enforcement?

19 A. Yes, I have. I have -- actually, was invited,
20 back in, I believe it was 2002, to form the very
21 first course in recovery of human remains from
22 crime scenes, for police officers; what we refer
23 to in Canada as forensic identification officers,
24 here they would be crime scene technicians, and
25 that went until 2005.

1 Q. Do you -- Are you involved in research as well as
2 the practical work you described?

3 A. Yes, sir. I am very active in research.

4 Q. What is your primary area of research interest?

5 A. My primary area is in the study and
6 interpretation of cremated human remains. So any
7 human tissues that are subjected to fire in a
8 variety of circumstances, but more commonly in
9 the forensic circumstances.

10 Q. Have you written anything about this?

11 A. I am published in the area of forensic cremains
12 through journal articles as well as book chapters
13 and conference presentations. And I have an
14 upcoming book coming out through a publisher in
15 the U.S. on the forensic cremation analysis and
16 interpretation.

17 Q. And we can look for that at amazon.com soon?

18 A. I'm hopeful.

19 Q. All right. Now, again, the jurors, I think, will
20 probably have your resumé, so I don't want to go
21 through everything, but give me a sense, give the
22 jury a sense of the professional associations to
23 which you gravitated or that you found, you know,
24 to enrich your work?

25 A. Professional associations are very important to a

1 scientist, in growth for both peer review of your
2 own work, but also further training and,
3 basically, communicating with other members of
4 your field.

5 I'm known as a fellow in the American
6 Academy of Forensic Sciences within the Physical
7 Anthropology Section. I'm a member of the
8 American College of Forensic Examiners
9 International and I'm also on the Editorial
10 Advisory Board for their publication known as the
11 Forensic Examiner.

12 Q. Actually, I'm going to stop you right there.

13 A. Yes.

14 Q. We have heard talk about peer reviewing articles;
15 is that exactly what somebody on the Editorial
16 Advisory Board does?

17 A. Well, in my case, from the editor of a specific
18 journal, I would receive the actual article in
19 question and they ask me to examine it for the
20 science behind the article, in order to make sure
21 that the procedures followed, and the way that
22 the article is written, conforms to scientific
23 standards.

24 Q. You are describing peer review, is that what peer
25 review is?

1 A. That's exactly what it is, literally a review by
2 your colleagues.

3 Q. Okay. Are any of the professional associations
4 to which you belong tilted towards law
5 enforcement or defense in the criminal justice
6 system?

7 A. Forensic science, as we deal with it, is meant to
8 be an unbiased profession. We are to undertake
9 analysis of evidence and present our findings of
10 that evidence in courts of law via either
11 reports, or through reports and testimony, such
12 as here.

13 Q. Have you testified in court before today?

14 A. Never in American court; however, in Canadian
15 courts, yes.

16 Q. And I'm -- I'm -- I'm actually curious, who --
17 who has called you as a witness in the past,
18 which side?

19 A. I have only testified for the Crown in Canada,
20 which is -- the equivalent here would be
21 prosecution, so the State.

22 Q. Okay. This is the first time both in an American
23 court and being called by the defense?

24 A. That's correct.

25 Q. Okay. And I want to get now into the more -- the

1 more practical or field work that you do. And
2 I'm curious, is there a tie between the research
3 interest in cremated human remains, or cremains,
4 and the practical field work that you do?

5 A. Yes. Well, my interest in cremains came out of
6 the fact that I was being called in order to, not
7 only recover in the field, cremated remains, from
8 crime scenes, but also to interpret those
9 remains. And so my research has very much
10 centered on the problems and the challenges that
11 one encounters with remains that are in such a
12 degraded state.

13 Q. Do you find yourself still called to consult at
14 crime scenes?

15 A. Yes, I am. I'm currently a consultant for the
16 Office of Chief Coroner in northern Ontario.

17 Q. Which covers how big an area?

18 A. Approximately western Europe. Land area, very
19 wide, from Sudbury on up through northern
20 Ontario, right up to Hudson Bay.

21 Q. Okay. So just part of the province.

22 A. Yes.

23 Q. But a large land area.

24 A. Yes.

25 Q. And who calls you in to crime scenes?

1 A. The -- Usually the procedure is I'm sometimes
2 contacted by police to tell me that there is a
3 scene that they will suspect they will want me to
4 attend; however, as per our protocol, I am called
5 to the scene and to attend by the Regional
6 Supervising Coroner and so I represent the
7 Regional Coroner as far as --

8 Q. Okay.

9 A. -- activity is concerned.

10 Q. So you may be working shoulder to shoulder with
11 police officers, but you are there under auspices
12 of the coroner -- auspices of the coroner, if I
13 understand?

14 A. That is correct, yes.

15 Q. Okay. When -- when you have a case, you are
16 called to the field, crime scene, or suspected
17 crime scene, and you have got human -- cremated
18 human remains?

19 A. Yes.

20 Q. What's -- What are the tasks for a forensic
21 anthropologist like yourself in that role?

22 A. Well, initially, what we do is, I will certainly
23 meet first with the law enforcement officials who
24 are responsible for the investigation as well as
25 the forensic officers. And we will -- I will get

1 background information from them, prior to even
2 attending the scene.

3 And, then, upon attending the scene we
4 will examine the general area in order to -- how
5 to approach. I usually check to see if there is
6 a path of contamination that has been initiated.
7 And we, essentially, work from the outside of the
8 scene to the inside. So I'm very much there
9 working shoulder to shoulder with the forensic
10 identification officers at the scene and --

11 Q. And --

12 A. -- and offering advice on how to do the recovery.

13 Q. Okay. And that's what we're talking about --

14 A. Yes.

15 Q. -- we're still at a point where we're trying to
16 recover --

17 A. Oh, yes.

18 Q. -- remains --

19 A. Oh, yes.

20 Q. -- when it was at the site?

21 A. And documenting those remains at the scene.

22 Q. Okay. So contamination path and I think you just
23 said you work in --

24 A. Yes.

25 Q. -- from the edges?

1 A. Yeah.

2 Q. What are you trying to do?

3 A. Well, we're first of all trying to preserve the
4 context of the evidence as best as possible, and
5 to do as little contamination as possible to the
6 actual scene. So by having a path of
7 contamination, this is a pathway, if you like,
8 that the police officers will have established
9 saying, well, this is the way we got on to the
10 scene originally, so we're just going to keep
11 walking on this path and not possibly contaminate
12 outside of that pathway.

13 Q. Okay. So, in addition to preservation, then,
14 what would be the next task?

15 A. Well, as with anything, as items are identified
16 and, typically, because we're dealing with
17 cremains, I'm the one to identify, okay, this is
18 a cremain and that's a cremain. I would actually
19 be indicating those and we would flag them, for
20 example; in other words, mark them, without
21 touching them, their location, so that we know
22 where they are.

23 And we start from the outside, as I said
24 before, from the areas of lowest concentration,
25 so that we can clear other areas around the scene

1 and then work into where we suspect the highest
2 concentration of the remains may be.

3 Q. As you are working in, what are you -- what are
4 you doing, if anything, to document what you are
5 finding as you work your way in?

6 A. As -- As I work with the ident officers, we --
7 everything that's found, in order, is given an
8 evidence number. And that is controlled by the
9 forensic ident officers. So I will indicate an
10 item, for example, and -- which is items, that
11 is, within my area of expertise, in this case
12 cremated remains.

13 And they will keep an evidence record
14 log and they will say, what description should we
15 give this. And I may say bone fragment, or
16 something of that ilk, and it would be
17 photographed and the flag would be remaining
18 there and subsequently mapped into place.

19 Q. By the time you are getting around to
20 photographing the things that you found, has
21 anything yet been touched, physically?

22 A. No. Nothing is touched until the photography is
23 done and -- but the mapping may be done a little
24 later, because we leave the flags in place.

25 Q. What goes around comes around, I think this jury

1 has heard about the system of mapping that you
2 have --

3 A. Sure.

4 Q. -- now days. Tell us just a little bit about
5 that?

6 A. Well, there's a few different ways to do it. I
7 mean, one -- one way is to superimpose a sort of
8 grid over the scene, which basically looks like a
9 bunch of squares. And then you approach the
10 scene such that you are taking care of the
11 squares around the scene first, clearing those
12 and then going in towards those areas of higher
13 concentration. And that, generally, is done in
14 order to control the method by which you are
15 processing the scene.

16 There are instances, however, where
17 we'll do a combination of this with an electronic
18 means of documenting a scene. And that's using
19 something known as a Total Station Unit, which is
20 basically a surveyors -- computerized surveyors
21 unit. And that helps us to generate a
22 computerized map of the scene.

23 Q. When I say what goes around comes around, we have
24 heard about the Total Station Unit already in
25 this trial. But you -- you folks are using that

1 as well.

2 A. Oh, yes.

3 Q. And what -- what are you -- what specifically are
4 you mapping with that when you use it?

5 A. We're mapping sometimes individual fragments,
6 perhaps fragments that are clustered together in
7 a tight grouping, in a context. It could be long
8 bones that we would see, or other elements of the
9 skeleton. And those are getting numbered as we
10 go along and their position is being noted. This
11 way we get a distribution.

12 Q. Why note the position of every single fragment
13 that you find?

14 A. Well, documentation, it is required for us, first
15 and foremost, for court purposes, in order to
16 document where everything comes from in its
17 original found location. Secondly, by
18 documenting this, this can tell us all sorts of
19 different things about the circumstances
20 surrounding this find.

21 So what we would look for would be bones
22 that happen to be in their relative position to
23 one another, such as the bones of the lower arm
24 being next to one another, and being close to or
25 joined up with the bones of the upper arm.

1 We're interested in the position of the
2 body, if that can be ascertained. We're
3 interested in whether the remains have been
4 purposely manipulated, moved, redistributed,
5 crushed actively, mixed up or comingled. All
6 those things can be ascertained through proper
7 excavation and recovery technique.

8 Q. So with that background, I guess, let's -- let's
9 get specifically to this case and your role in
10 this case. Are you familiar with a Dr. Leslie
11 Eisenberg?

12 A. Yes, I am.

13 Q. How -- How do you know her, or how have you
14 become familiar with her?

15 A. I have known Leslie for, must be over 10 years
16 now, as colleagues through the American Academy
17 Forensic Science, the Physical Anthropology
18 Section.

19 Q. Have you had a chance to review her report in
20 this case?

21 A. Yes, I have.

22 Q. And some photographs?

23 A. Yes.

24 Q. What -- What can you tell us about the common
25 ground you share with Dr. Eisenberg, the points

1 on which you agree with her work, based on the
2 work you have done here?

3 A. Oh, I agree with many points of Dr. Eisenberg's
4 research or study on, in this case, and her
5 report. I certainly have no reason to question
6 the parts of her analysis that deal with the fact
7 that the remains are representative of a single
8 individual, an individual who is female, as well
9 as a mature individual, that is, not a pubescent
10 if you like, or somebody who is post-pubescent.

11 Q. Do you have any reason to disagree with
12 Dr. Eisenberg's assessment of the rough age
13 range?

14 A. She did note in her report that there was a lack
15 of arthritic changes to the skeleton. And as I
16 recall, to the best of my ability, she was
17 indicating an age, an upper age limit of 30 to 35
18 years. That can be problematic. I agree that
19 there was no lipping, however there are --

20 Q. Stop. Time out. That was a technical word.

21 A. Pardon me, sorry. There were no arthritic
22 changes. And I certainly agree from what the
23 photos were I saw, I certainly didn't see any.
24 However, she's using that as a basis to say 30 to
25 35 and I know of no empirical studies to support

1 that. That would be purely speculation.

2 Q. But -- But you have no reason to doubt it either,
3 I mean, you are not -- I take it you don't --

4 A. Not one way or another.

5 Q. -- (inaudible) over that.

6 A. No. No.

7 Q. What else do you find yourself in agreement with?

8 A. Specifically, her analysis of the trauma to the
9 head, I am certainly in agreement with. She
10 indicated two gunshot wounds and I'm in agreement
11 with that.

12 Q. When you say you are in agreement with two gun
13 shot wounds, as a forensic anthropologist, are
14 you qualified to say, yeah, I look at that defect
15 in a bone and in my professional judgment it's an
16 entrance wound from a bullet?

17 A. What we do is, we describe the actual
18 characteristics of a specific lesion or
19 discontinuity, if you like, an opening. And we
20 look at the various signatures of that. And, in
21 fact, in this case, certainly, they do conform
22 with a high velocity projectile, meaning a
23 bullet.

24 Q. Do you think, as a forensic anthropologist, that
25 you also, though, could take the next step from

1 gunshot wound to assigning a manner of death or a
2 cause of death.

3 A. The problem with that is that with wounds such as
4 this, in my profession, we will tend to report
5 that something such as this is perimortem,
6 literally meaning around the time of death. We
7 cannot prove that that was actually the cause of
8 death. We can't prove that it happened shortly
9 after death, or it was a wound that was shortly
10 before death and the person survived for a few
11 minutes and may have been killed through some
12 other means.

13 Because we are dealing with skeletal
14 remains, I do not have the soft tissue that a
15 pathologist does in order to make some of these
16 other determinations; hence, we usually are stuck
17 with the term perimortem.

18 Q. Okay. And here, in specific, after your review
19 of the occipital bone fragment and the parietal
20 bone fragment --

21 A. Yes.

22 Q. -- and the unnatural opening or defect, you are
23 calling it a lesion --

24 A. Yeah.

25 Q. -- discontinuity, the bullet hole?

1 A. Yeah.

2 Q. Okay.

3 A. Trauma.

4 Q. Are you able to offer an opinion, as a forensic
5 anthropologist, on whether those gunshot wounds
6 occurred after the person was dead or before the
7 person was dead?

8 A. No, I cannot.

9 Q. Why not?

10 A. Well, the problem is that I just don't know what
11 actually did cause the death. I'm a reasonable
12 person in that, yes, I recognize that gunshot
13 wounds to the head are not conducive of long
14 life, however --

15 ATTORNEY FALLON: Your Honor, I'm going to
16 interpose an objection at this point, and it may be
17 cleared up with a few more questions from counsel,
18 but I don't think there's been any foundation for
19 this gentleman to render an opinion, vis-a-vis,
20 cause of death. Such was not rendered by
21 Dr. Eisenberg either, I might add.

22 Q. (By Attorney Strang)~ Well, actually, I think
23 we'll step back. I mean --

24 A. Sure.

25 Q. -- if I wasn't clear about this, I want to be.

1 As a forensic anthropologist, are you
2 professionally qualified to render an opinion on
3 cause of death?

4 A. No.

5 Q. As a forensic anthropologist are you
6 professionally qualified to render an opinion on
7 manner of death?

8 A. No.

9 Q. Okay. And I guess, if I understand you, what you
10 are saying here is, you cannot assign a manner of
11 death within your profession or calling?

12 A. No, we cannot. And, certainly, in my
13 jurisdiction as well, what -- how we proceed is
14 that I will evaluate trauma and then this goes to
15 the forensic pathologist, as well as the coroner
16 or medical examiner, as the case may be, and they
17 make that final determination.

18 Q. Now, as a forensic anthropologist, and one who's
19 got a strong interest in cremated human
20 remains --

21 A. Yes.

22 Q. -- can you offer us an opinion on whether the --
23 a gunshot wound to the head, for example, the two
24 here, were before or after burning of the bones;
25 is that something you can do?

1 A. Yes. Yes, that is something I can do.

2 Q. And do you agree or disagree with Dr. Eisenberg's
3 conclusion that the gunshot wounds here were
4 before burning of the bones?

5 A. Yes, I do agree with that.

6 Q. Okay. But whether the gunshot wounds were before
7 or after the death of the person on that --

8 A. I cannot say.

9 Q. Okay. Within the field of forensic anthropology
10 you cannot say that?

11 A. That's correct.

12 Q. Okay. Any other points of agreement with
13 Dr. Eisenberg's work here?

14 A. I agree that she -- I agree with her opinion that
15 she was not able to determine the ancestry of the
16 individual, or the stature of the individual.

17 Q. Height.

18 A. Yes.

19 Q. Okay. What -- What did the -- You just looked at
20 photographs, not actual bone fragments, correct?

21 A. That's correct.

22 Q. Okay. What did -- What did you see in the
23 condition, the exterior condition of the bone
24 fragments that -- that you saw in photographs?

25 A. Well, certainly subjected to an intense heating

1 event, a fire. The types of fractures that I saw
2 there were very consistent with those caused by
3 heat, so you have what we generally refer to as
4 heat induced fractures. And there's a variety of
5 these.

6 Q. Tell -- Tell us about those, a little bit about
7 heat induced fractures.

8 A. Sure. Heat induced fractures are actually caused
9 during the burning process, to any sort of
10 tissue, specifically bone in this case. Because,
11 when you have a fire, it's actually leaching the
12 water out. So you actually are losing water
13 content. And as a result of that, you get a
14 shrinkage of the bone that's occurring and then
15 you get a fracturing that occurs as well.

16 Q. And does it happen in the heating phase, or in
17 the cooling phase, or just throughout?

18 A. Initially, what happens is, as it's being
19 consumed the bone will heat up, and with anything
20 that does heat up, it expands. It's been found
21 through experimentation that the actual -- a lot
22 of the fracturing does really get undertaken at
23 the cooling stage. So as the bone cools, if
24 you -- particularly if it's been in a fire, let's
25 say like a house fire, or something like that,

1 and fire personnel come along and put water on it
2 to cool it fast, that will actually cause it to
3 fracture even more.

4 However, with fires that are attended by
5 a perpetrator, you do get the fracturing taking
6 place naturally; however, the bone will remain in
7 its same location as where it was put with the
8 rest of the body at the time.

9 Q. We heard -- We heard testimony from Dr. Eisenberg
10 to the effect that the recovery process here of
11 the human bone fragments she described was well
12 done. I'm not quoting her exactly, but she --
13 she offered some testimony to that affect. Is
14 that a view with which you can agree?

15 A. I'm afraid I have to differ with that opinion.

16 Q. Why?

17 A. Well, from the photographs that I received, first
18 of all, the documentation with the photography
19 was fairly poor. It was very difficult to tell
20 anything as far as in situ, or the original
21 location.

22 Q. In situ meaning the original site --

23 A. Yes.

24 Q. -- as found?

25 A. As found, would probably be a better way to put

1 it. So the photography was very poor from that
2 perspective. The accounts that I understand
3 occurred as far as the excavation procedures,
4 there was no systematic approach to the
5 collection of the evidence at first processing,
6 from what I saw. I know there was no grid
7 imposed at that time, during the initial
8 excavation.

9 I was informed that shovels were used in
10 order to do that and it wasn't, shall we say, a
11 more forensic archaeological approach and that,
12 essentially, Dr. Eisenberg received the materials
13 directly from the police services involved,
14 without her having been in the field.

15 Q. Okay. So other than nitpicking, why does this
16 matter. Why does it matter?

17 A. Well, it matters as far as what I mentioned about
18 the documentation and being able to tell things
19 about the circumstances surrounding the burning
20 of the body. One of things the context can tell
21 you, if it's well done, is to approach the
22 question of where the body was burned. Was it
23 moved? Was this the actual location or not?

24 Q. How do you approach drawing a conclusion about
25 where the original burn site, or where the body

1 was burned; how do you approach that through a
2 proper recovery?

3 A. Well, within the recovery and, certainly, in
4 recoveries I have been involved with, what is
5 done is, as you proceed through the careful
6 excavation, removing soil, soil is removed from a
7 particular square, for example, that you have
8 identified as being of interest within your grid.
9 And you proceed, vertically, from the highest
10 point of that square, down to a level until you
11 start finding material.

12 When you find that material, you clear
13 it off very carefully. You actually switch from,
14 shall we say, a trowel type implement, to
15 actually wooden implements, because they have the
16 same approximate density as bone and even
17 cremated bones, so you have less risk of actually
18 causing damage, shall we say, extra damage to the
19 remains.

20 Q. Why is that a concern, by the way, with burnt
21 bone?

22 A. Well, burnt bone is extremely fragile. You -- We
23 tend to have a little axiom that we refer to in
24 teaching cremation studies to students, and that
25 is, if you take a cremated bone and you pick up

1 one bone, you end up putting down 10. What that
2 means is, that it's very fragile and it can,
3 quite often, when moved, unless it's been, shall
4 we say, fixed together in some fashion, using a
5 glue or something of that ilk, you are actually
6 going to pick it up and you are going to cause
7 some damage.

8 Q. Now, is that -- is that breakage, or that
9 fragility, universally true through all the
10 stages of from, you know, light charring to a
11 complete calcination of the bone?

12 A. No, it's -- because a body burns what we call
13 differentially, in other words, it doesn't burn
14 evenly, you actually have some areas of the
15 skeleton that are going to burn, or the body,
16 that will burn more quickly.

17 If you think about it, areas where
18 there's not a lot of skin coverage, such as the
19 ends of fingers, the top of the head, these sorts
20 of areas will burn more quickly. So we'll
21 actually see them go through the various
22 different color changes and stages of the fire
23 process ahead of other areas, such as the torso.
24 More meat on the torso, certainly mine. And
25 that's going to take longer to actually be

1 consumed, as opposed to say the limbs or the head
2 and face and such.

3 Q. So when -- But I'm curious, I mean, does the
4 actual fragility, if you will, of the bone --

5 A. Yes, it's going to vary as a result of that. So
6 the earlier on, where you have the dark
7 blackened, if you like, charring of the bone, is
8 not as fragile as the bone that has gone to sort
9 of a gray-blue stage and approaching what we call
10 a calcined stage.

11 The actual end stage, if you like, the
12 ultimate extreme of burning bone is where we have
13 the white calcined stage. And, in fact, the
14 molecules of the minerals in the bone actually
15 reorient themselves into a structure that is more
16 akin to porcelain, so it actually becomes quite
17 strong at that point.

18 Q. Okay. So it's going through sort of a curve
19 where it's becoming more and more fragile. And
20 at the final stage, you are saying it's
21 actually -- regain --

22 A. It can be.

23 Q. -- some strength.

24 A. It's very much dependent upon the actual density
25 of the bone.

1 Q. Okay. All right. And you were -- you were
2 explaining how this, you know, this sort of
3 layered excavation and identifying pieces in
4 place --

5 A. Yes.

6 Q. -- helps -- helps get you to being able to draw a
7 conclusion about whether the body was burned
8 there, or moved, or, you know, otherwise
9 disturbed, and I want to go back to that.

10 A. Sure. The actual -- When we actually do an
11 excavation like this, and let's say we come
12 across, as I have, I will describe an actual
13 scene I have been involved with, the lower end of
14 the upper arm bone. And upon excavation, by
15 excavating it carefully, one can see the actual
16 lines of the fracture from the heat and see that,
17 yes, this bone is in a location; however, if we
18 move this bone, it is going to fall apart. That
19 tells us that this is the original context of
20 where that was burned, because if we moved it, we
21 would already find it in the smaller pieces.

22 Q. Okay. All right.

23 A. Quite logically, you know, if you have got
24 something that's -- if you -- it's akin to taking
25 a piece of glass and putting it on the floor and

1 stepping on it; well, you can see the outline of
2 the glass and the size of the piece of glass, but
3 you will also see all the cracks. So if you move
4 it, you are not going to be able to see that
5 outline any more in it's original form.

6 Q. Okay. Do you -- Do you agree here with
7 Dr. Eisenberg that it's clear in this case that
8 bones were moved?

9 A. I agree that bones were moved.

10 Q. In the human -- When I say bones, I'm talking
11 about human --

12 A. Human remains.

13 Q. -- human remains.

14 A. Yes.

15 Q. Okay. You -- you -- you do agree with that?

16 A. I do.

17 Q. Okay. And based on the recovery method that was
18 used here, are you able to offer an opinion, to a
19 reasonable degree of scientific certainty, about
20 where these human remains were burned?

21 A. No, I'm not.

22 Q. Why not?

23 A. Well, the fact is, that because I don't have any
24 records from which to examine that would actually
25 indicate to me that there are bones in the

1 original location, where they were burned, I
2 can't offer an opinion on that.

3 Q. You know, when -- if you -- if you go to a site
4 and you have the opportunity to recover a burnt
5 human remains, are you able to identify the, you
6 know, the specific bones by name and location in
7 the body when you are looking at them in place?

8 A. Yes.

9 Q. How is that?

10 A. Well, there are anatomical landmarks on the
11 various different bones. And if they are in
12 their original location where they were burned,
13 we'll even see them on what we call relative
14 anatomical position. So that if you burn remains
15 in a specific location and no other force acts
16 upon them except the actual burning process, then
17 the materials that make up the head will be at
18 the head end of the body and then you will have
19 the neck, the thorax, and then the legs and then
20 the arms off to the side. So that's -- that
21 makes logical sense.

22 Q. How -- How about when these things are fractured,
23 because I get -- I gather from what you said a
24 few minutes ago, some breakage and fracturing
25 will occur just because of the heating and

1 initial contraction as the bone dries?

2 A. Yeah, the heat actually will definitely cause
3 fracturing and you see all sorts of different
4 types of fractures within the bone itself.

5 Q. And -- But you're -- But you're still able, if
6 the bones are in place, to identify the type of
7 bone you are looking at?

8 A. Oh, yes.

9 Q. And that's something a forensic anthropologist
10 can do with training?

11 A. Oh, yes, absolutely.

12 Q. Back to the moving of bones now, when you say you
13 agree that human remains were moved here, are you
14 talking about moved a little bit within one site,
15 or moved from point A to point B, or both?

16 A. Given that there are three locations, from my
17 understanding, where we have bone having been
18 documented to have come from, then we are talking
19 point A to B or to C, as the case may be.

20 Q. Okay. Now, we have been calling these the area
21 behind Steven Avery's garage, or sometimes called
22 it the burn area?

23 A. Yes.

24 Q. The Janda burn barrel, is that --

25 A. Yes.

1 Q. -- the second. And then there's what I call, at
2 least, the quarry pile or quarry site.

3 A. Yes.

4 Q. On that, Dr. Eisenberg testified, as I recall,
5 that she only suspected that she was seeing human
6 bone fragments, maybe two from the pelvis, one
7 from the iliac crest and that there were other
8 bones that she initially suspected to be human,
9 some of which she later determined were animal --

10 A. Yes.

11 Q. -- bone, and some of which remain undetermined,
12 still possibly human and possibly not?

13 A. Yes, that's my understanding.

14 Q. Do you have any reason to disagree with that?

15 A. No, I do not.

16 Q. Okay. So -- But -- But as I understand it, in
17 your opinion, human bone fragments were found in
18 the Janda burn barrel?

19 A. Yes, that's my understanding from the report.

20 Q. And human bone fragments behind Mr. Avery's
21 garage?

22 A. Yes, that's correct.

23 Q. Okay. So, at least those two sites, to a
24 reasonable degree of scientific certainty, in
25 your opinion, you got human bone?

1 A. Yes, I take Dr. Eisenberg at her word.

2 Q. Okay. And, again, I think we touched on this,
3 but do you see any evidence, in your independent
4 review, that we have the remains of more than one
5 person?

6 A. No, it is consistent, from the inventory that she
7 provides in her report, it's consistent with one
8 individual.

9 Q. Are you able to say anything about whether bone
10 fragments in the area behind the garage were or
11 were not moved, disturbed, or the verb was you
12 used, in that general area behind Mr. Avery's
13 garage?

14 A. Based on the recovery techniques, I have no
15 evidence or any documentation to be able to make
16 any determination.

17 Q. Well, can you agree with Dr. Eisenberg's opinion,
18 as I recall it, that probably the area behind
19 Mr. Avery's garage was the original burn site for
20 the bone fragments, wherever found?

21 A. I cannot agree with that at this point.

22 Q. Why not?

23 A. Well, because, firstly, the documentation. The
24 documentation itself did not lend itself to that
25 interpretation, so I can make no inference

1 whatsoever from that.

2 Q. Okay. Well, let's -- let's go to the reasons
3 that Dr. Eisenberg gave in support of her -- her
4 view. She -- she -- she told us that the greater
5 amount -- the greatest amount, by far, of human
6 bone or human remains, was found behind the
7 garage, with much less found in the Janda burn
8 barrel, and still much less, if it was human at
9 all, at the quarry site?

10 A. Yes, that's what I understand.

11 Q. Does that, in your professional opinion, support
12 the view that, therefore, the Avery garage was
13 the most likely burn site?

14 A. No.

15 Q. Why not?

16 A. I have been involved in cases where human
17 cremains have been burned in one location and
18 moved to another location. And in those cases,
19 in fact, the actual location where the bones have
20 been moved to, in other words, their ultimate
21 location of where they have been buried, or
22 placed in another context, tends to be the
23 location where most of the remains are. And in
24 those -- in that instance, for example, I have
25 recovered elements or parts of the skeleton from

1 all areas of the body.

2 Q. Okay. Wait a minute, I want to stop you.

3 A. Sure.

4 Q. Are you saying that in your experience, when --
5 when burnt bones are moved, you tend to find the
6 majority of them away from the place in which
7 they were burned; in other words, find them in
8 the place to which they were moved, not from
9 which they were moved?

10 ATTORNEY FALLON: Objection, leading.

11 ATTORNEY STRANG: I want to make sure I
12 understood your testimony.

13 THE COURT: I'm going to allow it.

14 A. I understand that, from your question, the answer
15 is, yes, in the cases I have dealt with where
16 human cremains have been moved, the majority of
17 them have been from the body and making up the
18 largest portion of the body, from the ultimate
19 final place where they were actually moved to.

20 Q. When you had those situations, how have you been
21 able to determine that?

22 A. As far as the numbers, or --

23 Q. No, the -- you know, that the bones were moved to
24 this place.

25 A. Well, we have found small fragments in some in

1 situ, or shall we say the original location of
2 the burn, determined by the excavation techniques
3 I have told you about where items have been
4 missed. And then other -- all the other items
5 have been taken and moved.

6 Q. Well, and this brings me back to Dr. Eisenberg,
7 because it's -- as I recall, the second point she
8 made in support of the conclusion that the area
9 behind the garage was the probable burn site, is
10 that that's where she found the smaller, more
11 delicate bones, facial bones, dental structures,
12 that kind of thing. Does finding the smaller and
13 more delicate bone fragments support the
14 conclusion, in your experience, that this must be
15 the place where the original burn occurred?

16 A. No, it does not.

17 Q. Why not?

18 A. Well, we have actually been able to recover
19 fragmentary teeth, facial bones, very small bones
20 from the body, including even we found bones from
21 the middle ear, which are about a millimeter in
22 size, in one of these locations where the bones
23 have been moved to.

24 Q. In other words, they have survived -- some of
25 these small bones have survived moving?

1 A. Yes, they have.

2 Q. And then identifiable in another place?

3 A. Yes, that's correct.

4 Q. Say the bones in the middle ear?

5 A. Yes.

6 Q. How many of these bones are there?

7 A. Three in each middle ear.

8 Q. One millimeter each?

9 A. Approximately, yeah.

10 Q. Okay. Well, and I think the third thing, as I
11 recall Dr. Eisenberg's testimony, which she cited
12 in support of her opinion, that the area behind
13 the garage was the probable burn site, is that it
14 looked like there had been only one burn event;
15 you know, that there had been only one fire. Do
16 you follow what I'm saying, everything had been
17 burned in one place?

18 A. Yes.

19 Q. Does that support the opinion that the Avery
20 garage was the probable site?

21 A. Not necessarily, as a result -- one cannot tell
22 how many burns actually took place in that
23 location. From my own experience, I have
24 actually dealt with cremation cases where
25 somebody has actually used a traditional burn

1 area in there own yard for the location of a burn
2 itself. So if there's a fire pit that's at hand,
3 then that's where it's been.

4 Q. Well, but I guess I'm talking about cases in
5 which we're agreed that bones have been moved --

6 A. Yes.

7 Q. -- after burning.

8 A. Yes, that is, in fact, the case, yes. We do have
9 instances where there can be even re-burning
10 going on and certainly burns going on before
11 that. So you can't tell how many burn events
12 took place, that's the bottom line.

13 Q. Okay. Can you -- Can you give us an opinion
14 about where the original burn site was for the
15 human remains, eventually given to Dr. Eisenberg?

16 A. No, I cannot, not from the evidence that I have
17 reviewed.

18 Q. Is -- Is -- Can you rule out the area behind the
19 Avery garage?

20 A. The way I would phrase it is, I fail to exclude
21 it.

22 Q. So, in other words, it's a possible place?

23 A. Certainly.

24 Q. Okay.

25 A. Certainly.

1 Q. Based on the information you have, were there
2 other possible burn sites, let's say, on the
3 larger Avery property?

4 A. Oh, certainly, yes.

5 Q. Such as?

6 A. The barrel for one; I -- I can't rule that out.
7 My understanding, from the scene of the actual
8 overall property, that there is a wood type of
9 furnace, I understand, on the property. And
10 there's even, as I recall, an aluminum smelter on
11 the property.

12 Q. Okay. Now, you personally haven't looked at any
13 of these?

14 A. I have not examined any of these. I have never
15 been to the Avery property.

16 Q. All right. Yet alone in November of 2005?

17 A. Not at all.

18 Q. Okay. And what -- what can you say about other
19 unknown possible burn sites here?

20 A. Well, I can't exclude any other location as being
21 impossible, because simply I have no evidence to
22 that affect.

23 Q. Well, let's -- let's go back --

24 ATTORNEY FALLON: Your Honor, may counsel
25 and I approach the bench?

THE COURT: Sure.

(Side bar taken.)

THE COURT: Members of the jury, we're going to take a short break at this time. I remind you not to discuss the case during the break. You are excused at this time.

(Jury not present.)

THE COURT: And, Dr. Fairgrieve, I will have you step out in the hallway at this time.

THE WITNESS: Okay. Thank you.

THE COURT: Please be seated. I will indicate for the record that Attorney Fallon asked for a side bar and raised an issue which I suggested be raised on the record, outside the presence of the jury. At this time the jury has been excused and the witness is also excused from the courtroom. Mr. Fallon.

ATTORNEY FALLON: Yes, thank you, Judge. I just wanted to express concern, I don't know where counsel is going with the rest of this examination on this point. But from my review of the amended disclosure of expert witness, Scott Fairgrieve, the amended disclosure states, at the bottom of page four, most notably the first full sentence on page five, that there would be an opinion expressed that

1 there is no evidence that these cremains were
2 originally burned in the barrel where they were
3 found.

4 So the testimony, as elicited by Dr.
5 Fairgrieve, it's not the opinion that we were led
6 to believe would be he expressed. And, again,
7 this was one of the reasons we filed our demand
8 for a disclosure -- full disclosure in a report,
9 for fear that such an opinion like this would be
10 expressed, without notice to the State.

11 THE COURT: Mr. Strang.

12 ATTORNEY STRANG: Yes, and I understand the
13 confusion, which I probably created in the summary
14 here, or maybe here, although I don't think he's
15 offered any opinion that bones were burned in the
16 burn barrel. What this is meant to say and what I
17 will assure counsel and the Court, is that
18 Dr. Fairgrieve is -- is -- I expect him to say that,
19 I have no evidence that allows me to conclude where
20 these bones were burned. I can't -- I can't say
21 they were burned in the burn barrel. I can't say
22 they were burned behind the garage. I can't say
23 they were burned anywhere else. In other words, I
24 can't assign a place, nor can I necessarily rule out
25 possible burn sites.

1 So I do understand the concern, because
2 the specific sentence says, there is no evidence
3 that these cremains were originally burned in the
4 barrel where they were found. And that is his
5 opinion, in the sense that, I can't say they were
6 burned there, I don't have evidence that the body
7 was burned in the barrel. What I expect him to
8 say is, I -- I can't rule out, or I -- I fail to
9 exclude any possible burn site, we'll just never
10 know, is the bottom line.

11 ATTORNEY FALLON: That's an entirely --
12 That's an entirely different -- well, not entirely
13 different, but it's clearly a different opinion. He
14 is saying here, they were not burned in the burn
15 barrel. That's what we expected him to say. Now
16 he's saying, I can't rule it out.

17 ATTORNEY STRANG: It doesn't -- it doesn't
18 say that. I mean, I understand the confusion and
19 I --

20 THE COURT: Well, there is a difference
21 between saying I can't rule out the burn barrel and
22 saying there's no evidence to suggest that they were
23 burned in the burn barrel. Perhaps that's something
24 the State can bring up on cross-examination. Did
25 the -- did the report come from the doctor or --

1 ATTORNEY FALLON: No, it's from counsel,
2 there is no report, that's our problem.

3 ATTORNEY STRANG: This is the disclosure
4 that we filed of potential expert witnesses, is the
5 overall -- the broader opinion here is that he may
6 agree with, challenge, or differ with any of the
7 opinions offered by the State's expert forensic
8 anthropologist and, more particularly, I'm quoting
9 from page three of the disclosure, Dr. Fairgrieve
10 may testify that while it is possible that the
11 cremains found were originally burned in the pit
12 behind Steven Avery's garage, in his opinion it was
13 also possible that they were burned in another
14 location.

15 He goes on to mention the smelter and
16 the wood furnace and in his opinion it is
17 possible that the cremains were rendered at
18 either of those locations or another undetermined
19 location. And that is the intended scope of the
20 testimony.

21 THE COURT: Well, taking what you just
22 read, together with what Mr. Fallon just read, I
23 would interpret that to mean they could have been
24 burned in another location besides behind the
25 garage. They could have been burned in the smelter

1 or whatever the other reference was, but I would
2 have interpreted it as excluding the burn barrel.

3 ATTORNEY STRANG: No, he won't say that.
4 He's saying, I can't exclude it, but neither do I
5 have any evidence that they were burned in the burn
6 barrel.

7 ATTORNEY FALLON: Well, I guess I disagree.
8 I think the opinion should be excluded. The
9 language that he read is helpful on the one hand,
10 but not helpful on the other; in so far as we fully
11 expected Dr. Fairgrieve to refute some, none, or all
12 of the opinions expressed in Dr. Eisenberg's report.
13 That's certainly fair game and I don't have a
14 problem with that. But then to try to say he may
15 offer some other opinions about some other stuff, to
16 which we're not privy yet, that creates the whole
17 problem of not having a report in the first place
18 from which to base a cross-examination upon.

19 So I understand counsel's point, but I
20 don't know how you get around the fact that he's
21 saying, it wasn't in the burn barrel, so that
22 leaves us the burn pit, the smelter, the boiler,
23 or some other place, God knows where. But it
24 certainly doesn't include the barrel.

25 ATTORNEY STRANG: No, what he's saying is,

1 I have no evidence that they were burned in the
2 barrel. I can't rule it out, but I have no evidence
3 that it happened.

4 THE COURT: All right.

5 ATTORNEY STRANG: And it might be helpful
6 to -- if we could go back with the court reporter
7 and find out just exactly where we were when we
8 stopped.

9 THE COURT: Before we do that, I'm going to
10 rule as follows: I believe that the information was
11 slightly misleading, but not so much so that I'm
12 going to grant a remedy to prevent this witness from
13 giving the testimony he did; that is, there is not a
14 significant difference between saying there's no
15 evidence to suggest it was burned in the barrel and
16 based on the evidence available, essentially, I have
17 no idea where it was burned.

18 I understand what you are saying
19 Mr. Fallon, I think there is somewhat of a
20 difference, but I'm going to rule that it's not
21 enough of a difference to impose a sanction on
22 the defense.

23 ATTORNEY FALLON: Very well. Thank you.

24 ATTORNEY STRANG: And I do want to go back
25 so that I -- I really can try to steer away from any

1 problem I created.

2 THE COURT: All right. Let's go off the
3 record for a couple of minutes before we bring the
4 jury back in.

5 (Brief recess.)

6 THE COURT: All right. We'll bring the
7 jury back in at this time.

8 (Jury present.)

9 THE COURT: You may be seated. And,
10 Mr. Strang, you may resume.

11 ATTORNEY STRANG: Thank you.

12 Q. (By Attorney Strang)~ Dr. Fairgrieve, within the
13 field of forensic anthropology and drawing on
14 your experience with cremated human remains, are
15 you able to offer an opinion, to any reasonable
16 degree of scientific certainty, about whether the
17 remains found here were burned in the area behind
18 Mr. Avery's garage?

19 A. No, I'm not.

20 Q. Are you able to offer an opinion, to a reasonable
21 degree of scientific certainty, that the remains
22 here were burned in any other particular
23 location?

24 A. No, I am not.

25 Q. On the evidence you have, to a reasonable degree

1 of scientific certainty, are you able to rule out
2 any possible burn site?

3 A. No, I am not.

4 Q. Are you able to say that, to a reasonable degree
5 of scientific certainty, bone -- human bones here
6 were moved, or remains were moved, after burning?

7 A. Yes.

8 Q. What is your opinion on that?

9 A. Well, the fact that we have burned bones in at
10 least two locations, logically, they have been
11 moved.

12 Q. Are you able to offer an opinion about the means
13 by which those were moved, or the, you know, the
14 mode of transport --

15 A. No, I am not.

16 Q. -- of the bones. Are you able to rule anything
17 out in that respect?

18 A. No, I am not.

19 Q. And in your professional experience, what
20 significance, if any, do you assign to the
21 majority of bone fragment being found behind
22 Mr. Avery's garage?

23 A. Just the fact that the majority of the bones
24 representing the individual are in that position.

25 Q. And in your experience, is that more consistent

1 with being a place that bones were moved to or
2 bones were moved from?

3 A. To.

4 Q. What, if any, significance do you assign to the
5 fact that somewhat larger bone fragments, in
6 general, or on average, may have been found in
7 the Janda burn barrel than on average were found
8 behind the Avery garage?

9 A. I don't really attach any significance to that
10 other than an incomplete movement.

11 Q. Why not?

12 A. Well, the fact that things do get left behind, I
13 don't know the motivation, as far as what's been
14 going on behind the actual movement of these
15 remains, and so why they are in one place and not
16 completely moved to another is beyond my
17 understanding.

18 Q. Okay. And how about size, the relative size of
19 the fragments, does that tell you anything about
20 movement, or where these -- why these things were
21 found where they were found?

22 A. Not specifically, no.

23 Q. Is it sometimes difficult, in the field, at a
24 burn site, to identify cremated human remains, I
25 mean by the -- to the naked eye?

1 A. To the trained eye, we do recognize specific
2 human elements, and it is possible, but it always
3 depends on what is present at the scene.

4 Q. And I'm not sure, I want to chase that just a
5 little bit. I mean, with burnt remains, is it
6 always obvious to the untrained eye what one is
7 looking at?

8 A. No.

9 Q. Why not?

10 A. Well, it takes -- In order to be able to
11 recognize human cremains, you are going to have
12 to have some fairly advanced training in the
13 anatomy of the human skeleton and what bones look
14 like. And also what, specifically, human bones
15 look like, because people will burn garbage
16 outside and there will be remnants from meals and
17 things like that, and being able to distinguish
18 animal from human, so that does take training.

19 Q. Did you see any differences that struck you, in
20 your experience, as significant, in the range of
21 heat damage to the bones found at either of the
22 two, or possibly three, locations?

23 A. From what I recall, the bones from the pit area,
24 as I recall, seemed to be more calcined, that is,
25 towards the white stage; and I believe there was

1 a higher preponderance of charred remains from
2 the burn barrel.

3 Q. And which -- which, if either, would be more
4 easily identified to the untrained eye as being
5 human bone?

6 A. Oh, the charred remains, the ones that are white
7 charred.

8 Q. More -- More easy by color or appearance than
9 the --

10 A. Form.

11 Q. I'm sorry?

12 A. Due to its form, shape.

13 ATTORNEY STRANG: Thank you. That's all I
14 have.

15 THE WITNESS: Thank you.

16 THE COURT: Mr. Fallon.

17 **CROSS-EXAMINATION**

18 BY ATTORNEY FALLON:

19 Q. Good afternoon, Doctor.

20 A. Good afternoon.

21 Q. Welcome to Wisconsin.

22 A. Thank you.

23 Q. Is this your first trip?

24 A. No, I have been to Wisconsin before.

25 Q. You have. But this is the first time you have

1 been asked to be a witness in a case, I take it.

2 A. That is correct.

3 Q. All right. And this is the first time you have
4 been here with respect to this case?

5 A. Yes, it is.

6 Q. Okay. Now, I take it from your experience and
7 training and your -- more importantly your resumé
8 and your work for the Crown, it looks like you
9 have done a fair amount of forensic work?

10 A. Yes.

11 Q. And I take it you are routinely asked to go to
12 what are suspected crime scenes and assist law
13 enforcement in the processing of those?

14 A. That is correct.

15 Q. All right. And you have been doing that for
16 about 15 years?

17 A. Sixteen.

18 Q. Sixteen years?

19 A. Sixteen, yes.

20 Q. All right. And I take it, in the Province of
21 Ontario, you have provided expert testimony on a
22 number of occasions?

23 A. That is correct.

24 Q. And, frequently, if not almost in all cases, as I
25 understood it, you provided testimony for the

1 Crown or the prosecutor?

2 A. All cases.

3 Q. All right. Okay. For this case, help us out
4 here and tell us what information you had to
5 assist you in expressing the opinions you have
6 expressed this afternoon.

7 A. I received photographic files in the form of CDs.
8 I received reports from -- that were, shall I
9 say, compiled by Dr. Eisenberg.

10 Q. All right.

11 A. I have received a transcript of testimony of
12 Dr. Eisenberg's from, I believe it was a
13 preliminary hearing. And I received background
14 from the defense concerning the circumstances
15 surrounding the case.

16 Q. Background from the defense?

17 A. Yes.

18 Q. All right. We'll get to that in a minute. So
19 that I'm clear, in terms of the documents you had
20 for purposes of expressing the opinion today, you
21 had the preliminary and final report of
22 Dr. Eisenberg?

23 A. Correct.

24 Q. You had a copy of her testimony from the
25 preliminary examination in this case, which is

1 now about 14 months ago, I guess?

2 ATTORNEY STRANG: Let's just take one
3 moment at side bar, counsel, and your Honor, if we
4 may.

5 THE COURT: Members of the jury, I'm going
6 to excuse you for a much shorter period than the
7 short period I just excused you for a few minutes
8 ago. You are excused at this time.

9 (Jury not present.)

10 THE COURT: You may be seated. Mr. Strang.

11 ATTORNEY STRANG: I think probably the best
12 way to spend the time is just to go off the record
13 and counsel can try to work out here where he's
14 going and how we get there without, you know, going
15 into inadmissible material.

16 THE COURT: Go ahead. We'll go off the
17 record for a minute.

18 (Off record discussion.)

19 THE COURT: All right. Counsel, before I
20 bring the jury back, since we did have a side bar, I
21 will leave it to one of the two of you to put
22 something on the record concerning the contact.

23 ATTORNEY STRANG: I interrupted Mr.
24 Fallon's cross-examination to suggest a side bar
25 because, although I thought his questions proper, in

1 the proper area, I recognized that we might be
2 getting into a situation where the witness, quite
3 honestly, would respond by referring to information
4 attributed to Brendan Dassey, or from Brendan
5 Dassey's case, some of which was shared with the
6 witness.

7 I didn't think that's where Mr. Fallon
8 meant to be going and I just didn't want, you
9 know, to have an honest answer to an unintended
10 question and create a problem. So, that was the
11 reason for the side bar and what we discussed
12 briefly at side bar.

13 THE COURT: All right.

14 ATTORNEY FALLON: That's accurate. All I
15 wanted to know was the base of information upon
16 which he was operating. And I'm comfortable with
17 his not mentioning whatever information they
18 obtained from him because it's not germane to the
19 rest of my examination.

20 THE COURT: Very well, we'll bring the
21 jurors back in at this time.

22 (Jury present.)

23 THE COURT: You may be seated. And,
24 Mr. Fallon, you may resume.

25 ATTORNEY FALLON: Thank you.

1 Q. (By Attorney Fallon)~ Doctor, as I understand,
2 when we left off, you were telling us about the
3 information that you had at your disposal to
4 assist you in expressing these opinions this
5 afternoon. So, let me begin by saying and
6 summarizing, you had the two reports from
7 Dr. Eisenberg?

8 A. That's correct.

9 Q. A copy of her transcript from the preliminary
10 examination?

11 A. That is correct.

12 Q. Okay. You had a CD Rom of the -- I would imagine
13 fairly numerous amount of photographs taken just
14 by Dr. Eisenberg, of all the bone fragments she
15 examined?

16 A. Yes.

17 Q. Maybe not all, but quite a sizable amount of them
18 anyway?

19 A. Yes, that's correct.

20 Q. All right. And you also examined a few pages of
21 police reports as I understand it.

22 A. That is correct, yes.

23 Q. Now, the police reports you examined, were they
24 reports authored by an agent from the Division of
25 Criminal Investigation by the name of Tom

1 Sturtivant?

2 A. I believe so.

3 Q. All right. And there were about four pages?

4 A. I don't recall the number of pages.

5 Q. But it would have been about the initial -- the
6 initial discovery -- the reports -- But they were
7 brief reports from the officer regarding the
8 initial discovery?

9 A. I believe so, yes.

10 Q. Okay. Now, any other police reports?

11 A. I can't think of any offhand.

12 Q. All right. Other than the photographs of the
13 bone fragments made by Dr. Eisenberg, did you
14 obtain any other crime scene photographs?

15 A. Yes, I did.

16 Q. Okay. Tell us about the crime scene photographs
17 that you received?

18 A. Various views of the Avery property.

19 Q. Aerial views?

20 A. Aerial views.

21 Q. Okay.

22 A. Landscape views, so down, obviously taken by
23 somebody on the ground, various different angles;
24 exteriors views of dwellings; distant views of
25 the pit behind the garage, general area photos as

1 well.

2 Q. All right. How about any of the photographs
3 obtained prior to the processing of the pit,
4 developed by the Wisconsin State Patrol on Sunday
5 or Monday, that would be November 6th or 7th, the
6 days before the pit was discovered on the 8th?

7 A. I believe there were some, as I recall.

8 Q. Some?

9 A. Yeah, I'm trying to picture the images in my
10 mind, but I do believe I received those.

11 Q. Did you receive any photographs regarding the
12 processing of the pit by Special Agents Pevytoe,
13 Sielehr and Rindt, occurring on Thursday the
14 10th?

15 A. Not to my recollection.

16 Q. Okay. So you did not see any photographs showing
17 the pit covered in a blue tarp?

18 A. I do recall a photograph with a blue tarp over
19 it.

20 Q. A blue tarp over it. And how many of those
21 photographs do you recall? There were three
22 rolls of prints.

23 A. I can't recall, specifically.

24 Q. All right. Counsel has provided me some
25 information, so let's take a look.

1 ATTORNEY FALLON: If I may approach the
2 witness, Judge.

3 THE COURT: Go ahead.

4 ATTORNEY FALLON: Thank you.

5 Q. (By Attorney Fallon)~ I'm showing you what has
6 been marked, at least on the information provided
7 by counsel, as roll four; does that look like a
8 series of photographs that you are familiar with?

9 A. Yes, it does. Yes.

10 Q. Great. All right. How about another stack of
11 photographs, looks like D-16, 1 through 23, take
12 a quick look at those.

13 A. Yes, I do recall these.

14 Q. Okay. Great. And D-14, 1 through 28?

15 A. I recall some of the photos within this.

16 Q. Some, but you did not see all of them?

17 A. I cannot state with any certainty that I recall
18 seeing all of them.

19 Q. One last look here, if you would be so kind,
20 D-15, 1 through 24.

21 A. Yes, I do recall these.

22 Q. All right. And you have seen those photographs?

23 A. Yes, I do recall those.

24 Q. As well as the photographs provided to you that
25 were taken by Dr. Eisenberg?

1 A. Yes.

2 Q. Okay. Any other law enforcement reports, did you
3 have the opportunity to examine?

4 A. There was a compiled report that was a
5 computerized simulation of the scene.

6 Q. All right.

7 A. And I did have access to that document in
8 computerized form.

9 Q. That would have been an overview animation by
10 Trooper Austin?

11 A. Yes, that's correct.

12 Q. Now, with respect to the photographs that you
13 have seen there, did you have all of the reports
14 which were generated in conjunction with those
15 photographs?

16 A. I don't know for a certainty that I had all
17 reports.

18 Q. All right. Do you know when those photographs --
19 what day those photographs were taken, from the
20 information you were provided?

21 A. I don't recall.

22 Q. All right. When were you first asked to assist
23 in reviewing this information on behalf of the
24 defense?

25 A. I believe it was November, early November of

1 2006.

2 Q. All right.

3 A. If I recall.

4 Q. And in this particular case, you did not issue a
5 report of your findings, correct?

6 A. No, I did not.

7 Q. You were not asked to write one, I take it?

8 A. That's correct.

9 Q. All right. In the cases that you have testified
10 for the Crown, you usually write a report, do you
11 not?

12 A. I do.

13 Q. As a matter of fact, I suspect that's probably
14 required.

15 A. Oh, yes, absolutely.

16 Q. And that's so that when the gentleman who happens
17 to be on the other side of the prosecution by the
18 Crown, so that they would have fair notice of
19 exactly what opinions you were going to express
20 so they would know what they were?

21 A. Yes.

22 Q. Okay. By the way, while we're at that, when you
23 work for the Crown, generally you have access to
24 all of the information that the officers generate
25 to assist you in formulating the opinions that go

1 into that report; isn't that right?

2 A. I do have access, yes.

3 Q. And I would hazard a guess that it's probably
4 pretty routine practice that you would review all
5 that information before putting your report
6 together as the consulting forensic
7 anthropologist?

8 A. Correct.

9 Q. And that is because forensic means of, by, or
10 pertaining to a court; that's right?

11 A. A legal context.

12 Q. Right. So, in other words, it's taking your
13 field of biological anthropology, your specialty,
14 and kind of merging those principles with the
15 principles of the law, to formulate an opinion
16 and express it in a court of law?

17 A. Yes.

18 Q. Okay. Very good. Let's talk a little bit about
19 your experience, a little more detail. You would
20 agree, would you not, that no two crime scenes
21 are alike?

22 A. I would indeed.

23 Q. As a matter of fact, each crime scene presents a
24 host of different issues and problems that need
25 to be addressed and resolved by those

1 investigating what's before them?

2 A. Yes.

3 Q. And as such, there is a certain amount of
4 professional judgment that needs to be exercised
5 to perform your duties, which takes into account
6 these varying conditions?

7 A. Yes.

8 Q. And while you may have a standard operating
9 practice or procedure, sometimes that procedure
10 has to be modified from time to time, given
11 whatever you find at a location?

12 A. I would accept that.

13 Q. In fact, not every location can be processed with
14 a grid format or a forensic mapping format, can
15 they?

16 A. I don't know if that's true.

17 Q. Well, have you been to any disaster locations or
18 sites?

19 A. Yes.

20 Q. Not all of them are forensically mapped or
21 gridded, are they?

22 A. The ones I have been involved with they have had
23 a form of grid put in.

24 Q. But you can't say that that necessarily occurs in
25 all cases?

1 A. No, I cannot state that. That's correct.

2 Q. All right. And there may very well be good
3 reasons to depart from standard protocol and
4 procedures when processing a scene?

5 A. I would accept that.

6 Q. And I would imagine in your neck of the woods in
7 northern Ontario, weather is a pretty important
8 factor in processing scenes, especially this time
9 of year?

10 A. Absolutely.

11 Q. That might be one of the reasons that you might
12 depart from a certain set of procedures, to
13 account for that?

14 A. I have yet to do so. I have done winter
15 recoveries in cremains cases and have not
16 deviated from the protocols that I have been
17 using.

18 Q. But you can imagine a situation where that is
19 likely to occur?

20 A. I suppose.

21 Q. Sure. All right. I would like to talk a little
22 bit about fires. In your work, as I understand
23 it, and maybe this is a good way to get into it,
24 you specialize in studying cremations?

25 A. Cremated remains.

1 Q. Cremated remains. Now, are those cremated
2 remains, are those the kind that we're talking
3 about in crematoriums, or do you use the word
4 cremated remains in a more natural consequence?
5 A. A more natural consequence.
6 Q. All right.
7 A. Not commercial cremations.
8 Q. Not commercial cremations. Are you familiar with
9 commercial cremations?
10 A. Yes, I am.
11 Q. All right. And while we're at that, would it be
12 fair to say that it takes about 3 million BTUs to
13 cremate a human body?
14 A. 3 million?
15 Q. Yeah.
16 A. I wouldn't know that, specifically.
17 Q. You wouldn't know.
18 A. My knowledge is with time and temperature.
19 Q. Time and temperature.
20 A. Correct.
21 Q. All right. Then the average temperature to
22 cremate remains varies somewhere between 1600 and
23 1800 degrees, anywhere from an hour and a half to
24 two and a half hours? That sounds about right?
25 A. I take it the degrees are in Fahrenheit?

1 Q. Correct.

2 A. Yes, that would be correct.

3 Q. That's right, I forget, you guys use Celsius.

4 A. Right.

5 Q. You are not going to make me convert centigrade
6 to Fahrenheit, are you?

7 A. That's --

8 Q. Because I'm a lawyer, I can't do that.

9 A. I will do my best to convert my numbers.

10 Q. We might need a translator yet. All right. And
11 while we're at it, a BTU is a British Thermal
12 Unit?

13 A. Yes.

14 Q. And would you accept the general proposition that
15 one BT is the -- BTU is the amount of energy to
16 raise the temperature of water one degree from 59
17 1/2 degrees Fahrenheit to about 60 1/2 degrees
18 Fahrenheit?

19 A. I believe that's the definition.

20 Q. All right. And actually --

21 ATTORNEY STRANG: We would need a volume of
22 water for BTU.

23 ATTORNEY FALLON: Liter of water, excuse
24 me, you're right.

25 A. Yes.

1 Q. (By Attorney Fallon)~ And a BTU is a means of
2 measuring energy, right?

3 A. Yes, it is.

4 Q. All right. Now, when you are looking at cremated
5 remains in nature, one of the things that you
6 would ask yourself, as a forensic anthropologist,
7 you would want to know what the fuel load was;
8 you might be interested in how such a fire was
9 created?

10 A. The type of fuel, yes.

11 Q. Right. And we have at least four basic types of
12 fuel, do we not? We have a liquid form of fuel?

13 A. Yes, liquid. Solids.

14 Q. We have solids?

15 A. Gaseous.

16 Q. We have gas or vapor?

17 A. Yes.

18 Q. And we have aerosols and even dust?

19 A. Yes.

20 Q. Right?

21 A. That's correct.

22 Q. In fact, some powders, even wheat flour can
23 somehow be exploded?

24 A. Yes.

25 Q. Okay. So you would agree, that in terms of

1 determining the probability of burning human
2 remains at nature, depends in large part on the
3 fuel load, and more importantly, the exposure of
4 the body to the heat itself?

5 A. That's correct.

6 Q. As a matter of fact, in terms of the exposure of
7 the body to the heat, the more surface area which
8 is exposed to the heat, the quicker and faster
9 the remains will reach that cremated state,
10 correct?

11 A. That is correct.

12 Q. So the bottom line is, whenever you are looking
13 at that, what you want to do is try to assess, is
14 how long the parts of the body were expursed --
15 were exposed to a certain temperature?

16 A. Yes.

17 Q. All right. And it's not so much the flame, by
18 the way, that we're worried about, it's the
19 exposure to the heat --

20 A. Yes.

21 Q. -- generated by the flame?

22 A. Yes.

23 Q. Now, we have a variety of solid fuels that are
24 commonly used to burn, most notably, wood seems
25 to be the most common, correct?

1 A. Certainly.

2 Q. All right. And would you disagree with me if I
3 were to tell you that per pound of wood would
4 generate about 5,000 BTUs?

5 A. I have no basis to disagree with that.

6 Q. All right. And that a pound of coal would
7 generate, roughly, about 12,000 BTUs?

8 A. That sounds about right.

9 Q. And oil would be about 16,000 BTU?

10 A. Yeah, 16. Yeah.

11 Q. All right. Now, one of the things that could be
12 used for a fuel would be a tire, correct?

13 A. Absolutely.

14 Q. And as a matter of fact, a tire generates
15 anywhere from about 14,000 BTU to 16,000 BTU per
16 passenger tire?

17 A. Yes.

18 Q. And it's 14 to 16 because, if you shred the tire,
19 you are likely to end up with about 16,000 BTUs
20 of energy per pound of tire?

21 A. That would be right.

22 Q. And the reason that happens is because there is
23 more surface area of the tire which is exposed,
24 and thus generating more heat?

25 A. Precisely.

1 Q. The average passenger tire is about 20 pounds,
2 right?

3 A. Thereabouts, yeah, I would agree.

4 Q. All right. So, then, the average passenger tire
5 would generate anywhere from about 280,000 to
6 300,000 BTUs of energy?

7 A. I would accept that.

8 Q. And tires are a pretty good source of fuel
9 because they burn consistently and they burn very
10 hot?

11 A. Oh, yes.

12 Q. They generate a great deal of heat?

13 A. I agree.

14 Q. And, as a matter of fact, you would expect to see
15 a very large flame pile from one burning tires,
16 correct?

17 A. Flame pile?

18 Q. Flame, a high flame.

19 A. Oh, a high flame, yes.

20 Q. All right. And they would generate a great deal
21 of heat?

22 A. Yes.

23 Q. Okay. Now, before a body can be cremated,
24 whether it's in the crematorium or in the wild,
25 as it were, the body first has to be heated to a

1 significant degree or temperature, correct?

2 A. Yes, that would be correct.

3 Q. All right. As a matter of fact, you have to, for
4 all intents and purposes, you have to dehydrate
5 that body first?

6 A. The process begins with, obviously, the exterior
7 of the body. And heating things such as hair,
8 for example, would be the first area that is
9 lost, if there is no clothing.

10 Q. And as you heat the body, it begins to dehydrate.
11 And after a particular point in time, the body
12 itself, the remains become actually more fuel for
13 the fire?

14 A. Once you get through the skin, it becomes more
15 fuel, the fats of the body do serve as a fuel for
16 the fire, that is correct.

17 Q. As a matter of fact, back in days of antiquity,
18 when they had funeral pyres, they would often
19 smear the bodies with animal fat to assist in
20 creating the funeral pyre?

21 A. In order to get the ignition, yes.

22 Q. Now --

23 ATTORNEY FALLON: What time -- do you want
24 to take a break?

25 THE COURT: If you are at a logical break

1 in the questioning, I think that's a good idea.

2 ATTORNEY FALLON: Sure.

3 THE COURT: All right. Members of the
4 jury, we're going to take our afternoon break at
5 this time. I will remind you not to discuss the
6 case during the break. You are excused at this
7 time.

8 (Jury not present.)

9 THE COURT: You may be seated. Counsel, I
10 would like to see you briefly in chambers, now, at
11 the start of the break.

12 ATTORNEY FALLON: Okay.

13 (Recess taken.)

14 (Jury present.)

15 THE COURT: Mr. Fallon, you may resume.

16 ATTORNEY FALLON: Thank you, Judge.

17 **CROSS-EXAMINATION CONTD.**

18 BY ATTORNEY FALLON:

19 Q. Doctor, I would like to finish up our discussion
20 of the burning human remains in the natural
21 setting. You would agree, would you not, that
22 there are several variables that are at play in
23 trying to decide how a body was burned and how
24 long it would have taken and things of that
25 nature, correct?

1 A. Yes, I would agree.

2 Q. All right. For instance, you would want to know
3 the type and the amount of the fuel?

4 A. Yes, that would be important.

5 Q. And you would certainly want to know what the
6 weather conditions were, correct?

7 A. That would have an influence.

8 Q. That would have an influence. You would want to
9 certainly know what the ratio is of the fuel
10 mixture to the -- what is the item being burned?

11 A. If possible.

12 Q. And very importantly you would want to know the
13 extent to which the body was exposed to the heat
14 generated by the fuel?

15 A. Yes.

16 Q. Now, you would agree, would you not, that an
17 unattended -- we will use the term "funeral
18 pyre".

19 A. All right.

20 Q. Given all other variables being the same, but an
21 unattended funeral pyre would burn at a slower
22 rate than an attended one?

23 A. In general, yes.

24 Q. Because one -- an attended one, presumably the
25 person who is conducting the fire, or managing

1 the fire, that's probably a better word, would be
2 able to make sure that the fuel load is
3 adequately distributed to all parts of the fire?

4 A. Yes.

5 Q. All right. And, as a matter of fact, if the
6 attending person wanted to make sure that the
7 human remains were fully exposed to the heat,
8 there may be some dismembering, correct?

9 A. Dismembering in what sense?

10 Q. Well, if you were to -- if you were to -- Let's
11 put it right on the table. If you were to chop
12 up human remains, there would be more surface
13 area exposed to the heat?

14 A. Yes, I would accept that.

15 Q. All right. And, as a matter of fact, if that was
16 occurring, then the remains would be consumed
17 more quickly than if you had just left a body in
18 toto, laying on a funeral pyre?

19 A. Yes, I would agree.

20 Q. All right. I want to go back and visit the
21 testimony that you discussed with counsel
22 regarding the burn pit as being the potential, or
23 possible, area of initial or original burn, and
24 talk also about the impact, or no impact, of the
25 burn barrel.

1 A. Okay.

2 Q. Just so we're oriented.

3 A. Sure.

4 Q. Perhaps the best place to begin is, I think we
5 have an agreement, that for the minutest form of
6 human bone, which has been subjected to a great
7 deal of heat, professional training, in all
8 likelihood, would be required to identify those
9 items?

10 A. I would agree.

11 Q. In fact, there are certain bits of human remains
12 which are so small they could actually be the
13 quarter -- quarter -- one quarter of a finger
14 nail, might be just that much of a sliver of a
15 bone that could be -- that the remains are
16 present for?

17 A. Yes.

18 Q. And to the average person, and that includes all
19 of us here, with the exception of yourself I
20 would imagine, the chances of us being able to
21 recognize an item that small as part of a human
22 anatomy are about slim to none?

23 A. That sounds reasonable.

24 Q. And you are aware that the vast majority of human
25 remains, fragmented human remains of that size,

1 were recovered from the burn pit area, correct?

2 A. Yes.

3 Q. And you are also aware, are you not, that various
4 articles of clothing were recovered from that
5 burn pit as well, correct?

6 A. Yes.

7 Q. All right. You are aware that there were some
8 rivets that looked like they went to a pair of
9 blue jeans?

10 A. Yes.

11 Q. A zipper?

12 A. Yes.

13 Q. All right. And all of those were recovered from
14 the burn pit and from no other location that you
15 are aware of?

16 A. To my knowledge, that's correct.

17 Q. All right. And just so that I'm clear, it's your
18 understanding that, clearly, the -- some bones
19 had to have been moved because we have human
20 remains not only in the burn pit, but we have
21 them in this burn barrel a couple hundred feet
22 away?

23 A. Yes.

24 Q. All right. So you would agree that the only real
25 explanation for that to have happened is human

1 agency?

2 A. I would agree.

3 Q. In other words, a person had to have taken them

4 from one place and put them in another?

5 A. Yes.

6 Q. And in terms of the burn barrel, you are aware

7 that there was no articles of clothing found from

8 that particular burn barrel; there were no

9 rivets?

10 A. That's my understanding.

11 Q. No grommets from shoes?

12 A. That's correct.

13 Q. No zippers?

14 A. That's correct.

15 Q. And most of the bone fragments were of -- well,

16 they were of a larger variety than those

17 recovered from the pit itself?

18 A. Yes.

19 Q. Right?

20 A. Right.

21 Q. Okay. Now, one thing, if you could clear up for

22 me, I'm not sure, did you say that the bones in

23 the barrel had a greater degree of burned affect,

24 or was it the burns (sic) in the pit, which was

25 it?

1 A. I believe it was the burns -- the bones in the
2 pit appeared to have a greater -- a longer stage,
3 shall we say.

4 Q. A longer exposure, as it were, to the heat.

5 A. Yes.

6 Q. In other words, they showed greater
7 fragmentation?

8 A. Greater heat condition -- damage, yeah.

9 Q. Right.

10 A. Yeah.

11 Q. Which may very well account for the fact that we
12 have all of the really microscopic and very, very
13 small fragment of bone recovered from the pit;
14 that would certainly be consistent, right?

15 A. I can't deny that.

16 Q. Okay. Now, as I understand your testimony, it's
17 clear to you that the remains that were recovered
18 here, most of which came from the burn pit, are
19 the remains of an adult female?

20 A. Yes.

21 Q. And you do not take any issue with the fact that
22 there is clear evidence of at least two gunshot
23 to the cranial pieces, which were able to be
24 recovered?

25 A. That's correct.

1 Q. And you would agree, would you not, that they are
2 entrance defects, correct?

3 A. Yes.

4 Q. And that's because the beveling, which is
5 present, is on the outside of the -- in other
6 words, the entrance area, correct?

7 A. No, that is not correct.

8 Q. It's on the inside?

9 A. It's on the inside.

10 Q. And if they were exit wounds where would the
11 beveling be?

12 A. On the exterior.

13 Q. On the exterior?

14 A. Right.

15 Q. And in your opinion -- Well, let's digress
16 momentarily. You had some question regarding
17 cause of death and manner of death, let's just --
18 the only matter at issue here is manner of death.
19 Now, in the remains that you observed here, you
20 would agree, would you not, Doctor, that there
21 would be no point in attempting an autopsy?

22 A. Not in the traditional sense, no.

23 Q. There's certainly not enough tissue, in fact
24 there's no tissue left to examine?

25 A. I understood there to be some tissue recovered.

1 Q. Some tissue?

2 A. Some tissue, however charred.

3 Q. However charred. Which some DNA analysis was
4 undertaken; are you aware of that?

5 A. Yes, that's my understanding.

6 Q. But, by and large, that's really the only piece
7 of mushel -- muscle tissue that was recovered?

8 A. Yes.

9 Q. And that alone, certainly would not be enough for
10 one to conduct an autopsy in the traditional
11 sense, correct?

12 A. That is correct.

13 Q. All right. And you would agree, as an
14 anthropologist, whether you have an
15 archaeological perspective, or even a biological
16 perspective, that examining bones in the
17 condition in which these were found is, in large
18 part, almost strictly the purview of a forensic
19 anthropologist?

20 A. We are best to quantify and examine the cremains,
21 certainly for the traditional areas that forensic
22 anthropology deals with.

23 Q. And you certainly wouldn't disagree with the fact
24 that what you have is an individual who was
25 murdered, would you?

1 A. I don't know that to be true or not.

2 Q. Well, you wouldn't disagree with that as a
3 logical conclusion to be drawn from the evidence
4 provided, would you? I mean, she didn't jump in
5 the fire herself?

6 A. No. No. I would agree with that.

7 Q. And certainly didn't shoot herself in the head
8 twice, right? That would be pretty hard to do.

9 A. It may surprise you to know that I know that it's
10 been done, but.

11 Q. How many times have you seen that done, Doc?

12 A. One.

13 Q. All right. Out of how many thousands of cases?

14 A. Yeah, exactly.

15 Q. All right. Now, you can't say, to a reasonable
16 degree of scientific certainty, that that burn
17 pit was not the original place of the burning,
18 can you?

19 A. That's correct.

20 Q. I would like you to tell me just what evidence
21 you have that the body could have been burned in
22 the burn barrel?

23 A. I have none to support it.

24 Q. Absolutely none, right?

25 A. That's correct.

1 Q. In fact, the greater weight of the evidence,
2 which is presented to you, would show that that
3 barrel, in all likelihood, was not the location
4 of the original burning?

5 A. I can't say one way or the other.

6 Q. Well, a typical 55 gallon drum, in which it
7 certainly would be difficult to put an adult
8 female of approximately 5 foot 6 in stature, and
9 stuff her into a barrel and burn her; that
10 wouldn't be the easiest of things to do, right?

11 A. I wouldn't imagine it being easy, no.

12 Q. And a matter of fact, it would be -- it would
13 take -- you would have to agree, it would take
14 far longer time to actually reduce a human being
15 to the level of which you found the bones in the
16 burn pit? It would take a lot longer to do that
17 in a burn barrel?

18 A. Not necessarily.

19 Q. There is not enough exposure. You would have
20 to -- you would have to expose that body to a
21 great deal of heat, correct?

22 A. You would, yes.

23 Q. All right. And it would be certainly really
24 difficult to put in a lot of tires and high
25 burning accelerants in that particular barrel,

1 correct?

2 A. A large number of tires would be very difficult,
3 yes.

4 Q. Nor can you say, Doctor, that the boiler on the
5 property was the place where the original burning
6 occurred, can you?

7 A. That's correct.

8 Q. And you can't say that the smelter is the place
9 of the original burning, correct?

10 A. That is correct.

11 Q. Now, you had photographs of those items, right?

12 A. That's correct.

13 Q. And you looked at the cellulose ash which was
14 recovered from the wood burner boiler, right?

15 A. Yes.

16 Q. That ash is entirely inconsistent with the type
17 of ash and debris which was recovered from the
18 pit, correct?

19 A. From what I recall, yes.

20 Q. All right. And in your -- And your review of
21 strictly the photographs of the smelter, there
22 was no ash, or charring, or anything inside the
23 smelter, right?

24 A. That's correct.

25 Q. That you could see?

1 A. That I could see, that's correct.

2 Q. So, we certainly can't say that the smelter was
3 the place where the remains were burned, right?

4 A. Not to my knowledge, no.

5 Q. All right. By the way, are you familiar with a
6 process called board certification?

7 A. Yes, I am.

8 Q. And what is that?

9 A. It's -- Board certification for forensic
10 anthropologists is the American Board of Forensic
11 Anthropology.

12 Q. You have not yet pursued that certification; is
13 that right?

14 A. That is correct.

15 Q. Okay. All right. Oh, one more thing, Doc, you
16 never looked at the bones in this case, did you?

17 A. I did not.

18 Q. Thanks.

19 A. Thank you.

20 THE COURT: Mr. Strang, any redirect?

21 ATTORNEY STRANG: I do, thank you.

22 **REDIRECT EXAMINATION**

23 BY ATTORNEY STRANG:

24 Q. Dr. Fairgrieve, you were asked a number of
25 questions about what it is that you had to look

1 at?

2 A. Yes.

3 Q. Was there anything at all that you asked Mr.

4 Buting or me for that we declined to give you?

5 A. Not to my knowledge. I don't recall that there
6 was anything denied that I was asked for.

7 Q. And anything you thought you needed that you
8 asked us for and we said we had but wouldn't give
9 you or that we didn't have, for that matter?

10 A. No, I don't believe so.

11 Q. Is there any evidence at all that you have seen,
12 in all of the photographs you have looked and
13 Dr. Eisenberg's two reports or in her testimony,
14 that the body you have seen here was dismembered
15 in any way, before burning?

16 A. Prior to burning, no.

17 Q. Had tires, rubber tire, car tires, some sort of
18 tire, been used as a fuel to burn this body,
19 would you have expected a burnt rubber residue
20 sort of smell on at least some of the bone
21 fragments?

22 A. I have encountered that myself, in
23 experimentation.

24 Q. Is it a pungent or a strong smell?

25 A. When you are close to the bones, it can be

1 strong.

2 Q. And when you say you have encountered that
3 yourself in experimentation --

4 A. Yes.

5 Q. -- perhaps you can tell us what that is.

6 A. Part of the research that I undertake is to do
7 test burns. And we utilize, for these purposes,
8 pig carcasses, of varying sizes, to mimic human
9 remains. And burning up tires is just one such
10 scenario of consuming the flesh.

11 Q. And as a fuel?

12 A. As a fuel, yes.

13 Q. Have you done that yourself?

14 A. Yes, I have.

15 Q. And what did you smell with the -- you know, the
16 burnt remains of the pig, afterwards?

17 A. Quite a pungent odor associated with the remains
18 from the actual smell of the rubber.

19 Q. Is there any reason at all -- No, let me back up,
20 because I want to be clear. You are not here to
21 tell us that you can say any particular site is
22 the burn site in this case?

23 A. That's correct.

24 Q. Okay. Neither are you able to rule out or
25 exclude any possible burn site, if I understood

1 you?

2 A. That's correct.

3 Q. What you have told us is, that in your
4 experience, you find the majority of bones
5 usually in the place to which bones are moved,
6 not the place from which they are moved.

7 A. Yes, that's accurate.

8 Q. Including smaller or more delicate bones?

9 A. Yes, I have found that to be the case.

10 Q. In your experience, do you have any reason to
11 think that a dead human body could not be put in
12 a 55 gallon drum or burn barrel?

13 A. No, I see no reason why it couldn't.

14 Q. Do you have any idea at all here, in the end,
15 where clothing fragments, whether that's fabric
16 or metal items, or grommets from clothing, were
17 recovered?

18 A. From other locations?

19 Q. Do you have any idea where -- where the police
20 may have found remnants, or possible remnants of
21 clothing?

22 A. From what I understood, it was from the actual
23 burn barrel. The pit behind the Avery garage.

24 Q. Okay. You don't know whether fragments were
25 found elsewhere?

1 A. Not to my knowledge.

2 Q. Neither do you know whether they were missed
3 elsewhere?

4 A. Definitely not.

5 Q. You spoke of the -- on the average, of the
6 fragments in the burn barrel being larger than,
7 on the average, the fragments in the burn area --

8 A. Yes.

9 Q. -- behind the garage? What were the largest
10 fragments you saw of bone here, regardless where
11 found?

12 A. As I recall, I believe it was the cranial
13 fragments.

14 Q. And about how big were those?

15 A. Oh, I would say, looked like about an inch and a
16 half in diameter.

17 Q. Okay.

18 A. Something on that order.

19 Q. So when we're talking about large and small --

20 A. Yeah.

21 Q. -- as I understand, everything here is about an
22 inch and a half on down, to smaller than that?

23 A. From what I recall, yes.

24 Q. Is a barrel something in which burnt human
25 remains might be moved and then, you know, turned

1 over or dumped elsewhere?

2 A. Oh, sure.

3 ATTORNEY STRANG: That's all I have. Thank
4 you.

5 THE COURT: Mr. Fallon, anything else?

6 ATTORNEY FALLON: About three questions.

7 **RE-CROSS-EXAMINATION**

8 BY ATTORNEY FALLON:

9 Q. The smell that one might, on occasion, find from
10 human remains subjected to a fire involving
11 rubber, that smell would dissipate over time,
12 right?

13 A. It is possible, yes.

14 Q. As a matter of fact, it would certainly be
15 subject to the elements of weather, would it not?

16 A. I agree.

17 Q. And that would certainly help dissipate the
18 smell?

19 A. That's possible, yes.

20 Q. As a matter of fact, the greater degree of
21 charring and calcination the less likelihood you
22 are going to have that kind of smell, because
23 there's not much for it to attach it to, right?

24 A. That is correct.

25 Q. I lost my train of thought. If I may have one

1 moment.

2 ATTORNEY FALLON: I'm afraid you're lucky,
3 Doc, I lost that train of thought. I'm done.

4 THE COURT: Mr. Strang, anything else?

5 ATTORNEY STRANG: No, thanks.

6 THE COURT: Very well, you are excused.
7 Mr. Strang.

8 ATTORNEY STRANG: What I would propose to
9 do at the moment is simply to read a stipulation to
10 which both Mr. Avery and the State have agreed, as I
11 understand it.

12 THE COURT: Is that correct, counsel?

13 ATTORNEY KRATZ: Yes, that's fine, Judge.

14 THE COURT: All right. You may do so.

15 ATTORNEY STRANG: Ladies and gentlemen, the
16 parties agree that, on October 31, 2005, Steven
17 Avery spoke twice with Jodi Stachowski, his
18 girlfriend, on his cordless land telephone line.
19 Each conversation was about --

20 THE COURT: Just a second, Mr. Strang, I
21 don't think number seven is working any more. So
22 you may want to use the --

23 ATTORNEY STRANG: The trial is over when
24 the electronics die? Do I need to start over?

25 THE COURT: I think that would be best.

1 ATTORNEY STRANG: All right. The
2 stipulation reads as follows: The parties agree
3 that, on October 31, 2005, Steven Avery spoke twice
4 with Jodi Stachowski, his girlfriend, on his
5 cordless land telephone line. Each conversation was
6 about 15 minutes. The first began at 5:36 p.m. and
7 the second began at 8:57 p.m.

8 THE COURT: And, Mr. Kratz, is the State
9 joining in that stipulation.

10 ATTORNEY KRATZ: It certainly is, Judge.

11 THE COURT: Very well. We'll receive the
12 stipulation. Mr. Kratz -- or Mr. Strang, excuse me.

13 ATTORNEY STRANG: Next defense witness,
14 briefly, is Investigator Mark Wiegert.

15 THE COURT: Very well.

16 **INVESTIGATOR MARK WIEGERT**, called as a
17 witness herein, having been first duly sworn, was
18 examined and testified as follows:

19 THE CLERK: Please be seated. Please state
20 your name and spell your last name for the record.

21 THE WITNESS: Mark Wiegert, W-i-e-g-e-r-t.

22 **DIRECT EXAMINATION**

23 BY ATTORNEY STRANG:

24 Q. Good afternoon, again, Mr. Wiegert.

25 A. Good afternoon.

1 Q. I think you probably were here in the courtroom
2 with us when a young woman named Lisa Buchner
3 testified yesterday?

4 A. Yes, sir.

5 Q. Had you interviewed her previously?

6 A. Yes, I remember the interview very well.

7 Q. Was that -- Did the interview take place on
8 Monday, November 7, 2005?

9 A. It did, yes.

10 Q. All right. And among other things, did Ms
11 Buchner tell you, on Monday, November 7, 2005,
12 that she remembered some things on Saturday,
13 November 5, and thought it would be important
14 that we would know; we, meaning law enforcement,
15 would know that information?

16 A. Yes, she had basically shown up at the checkpoint
17 where we had security up out on Highway 147. And
18 I had gotten a call from them stating that
19 there's somebody at the checkpoint that had
20 information. And that would happen periodically
21 throughout the time we were out there.

22 And, in fact, we would get a lot of
23 phone calls about information as well. But, what
24 had happened is, I didn't have any other
25 detectives to interview her because they were all

1 out doing other interviews, on leads and things
2 like that. So I told them to let her through the
3 checkpoint. I met her at the Command Post.

4 Q. On the 7th?

5 A. On the 7th.

6 Q. Right. Okay. And she -- You interview her and
7 she tells you, you know, that she saw a female
8 taking pictures around 3:30 p.m. one day?

9 A. That's correct.

10 Q. And when you are talking to her on Monday,
11 November 7, she was able to tell you that this
12 observation of a female taking pictures of the
13 van happened either on Monday, October 31, or
14 Tuesday, November 1, or maybe Wednesday,
15 November 2; do I understand that correctly?

16 A. That's -- That's what she had told me that day,
17 or she did not know what color the van or
18 anything was.

19 Q. Right. And -- And she could narrow it down only
20 to one of those three days, but it was the week
21 before she was speaking to you on Monday,
22 November 7th?

23 A. That's what she had indicated that day; however,
24 she couldn't give me a -- what kind of weather it
25 was that day. Nothing else stood out in her mind

1 that day. She just thought it was between those
2 three days. Again, she didn't know what color
3 the van was or anything.

4 ATTORNEY STRANG: Okay. That's all I had.
5 I just wanted to nail down the time. Thank you.

6 THE COURT: Mr. Kratz.

7 ATTORNEY KRATZ: Thank you, Judge.

8 **CROSS-EXAMINATION**

9 BY ATTORNEY KRATZ:

10 Q. Mr. Wiegert, I'm showing you what's been received
11 as Exhibit No. 86. When you spoke to Ms Buchner
12 early on in this investigation, was she able to
13 explain or describe for you where this woman was
14 seen taking the photographs?

15 A. She had indicated, at the time she saw this woman
16 taking photographs, was towards the shop area, if
17 you will, at the intersection of Avery Road,
18 where it meets with the driveway, where you go
19 down to the residences. There's a set of mail
20 boxes there and right in that area.

21 Q. I'm going to use my laser pointer, is this the
22 area where Ms Buchner said she saw the person
23 taking those photographs?

24 A. That's what she had thought, yes.

25 Q. Now, when you got to the Avery Salvage property

1 on the 5th, that's the first day that you were at
2 the property, we have seen photographs, but
3 wasn't the van that Ms Halbach was taking
4 pictures of actually down in this area, near
5 Mr. Avery's residence?

6 A. Yeah, it was still down there. And that's what
7 other witnesses had told us, too, that it was
8 down there.

9 Q. All right. Last question I have for you,
10 Investigator Wiegert, at least on this point is,
11 this intersection here, is that the main road or
12 intersection, if you will, for people coming into
13 the business property itself?

14 A. Yeah, I think it's actually a town road, I think
15 it's -- from my recollection, I think the town
16 upkeeps that road, so it's actually a traveled
17 roadway that leads down to the salvage yard and
18 that's where people come and go to do their
19 business.

20 Q. And, in fact, I think there is one other exhibit
21 that may show this a little bit better even,
22 Exhibit No. 81, that's been received. I will
23 show you and the jurors that intersection; do you
24 recognize that?

25 A. I do, yes.

1 Q. In fact, this intersection, which shows actually
2 two Command Post vehicles, I'm pointing to those;
3 is that where the law enforcement officers set up
4 their command center?

5 A. Yes.

6 Q. And isn't it, in fact, true, Investigator
7 Wiegert, that this very vehicle I'm pointing to
8 here, a Blazer, as well as a Pontiac Grand Prix
9 behind it, were vehicles that were for sale at
10 the Avery Salvage property when you arrived there
11 on the 5th?

12 A. Yes. And that would make sense, I mean, if
13 you're going to sell a car, you're going to have
14 it up where people are coming and going.
15 Wouldn't make sense to have it down --

16 ATTORNEY STRANG: That's pretty
17 speculative, your Honor, I will object.

18 THE COURT: The Court will sustain the
19 objection and order that the last part of the answer
20 be stricken.

21 ATTORNEY KRATZ: That's fine.

22 Q. (By Attorney Kratz)~ Let's talk about this
23 Blazer, right here, the red and black Blazer. In
24 fact, did you see photographs earlier, that is,
25 that that's one of the pictures that Teresa

1 Halbach took, a photograph of that very Blazer
2 that's depicted in Exhibit 81?

3 A. That is true, yes. I did see those pictures.

4 Q. The Grand Prix behind it is another photograph
5 that Ms Halbach took, that is, the Grand Prix for
6 sale directly behind that Blazer as well; is that
7 right?

8 A. Yes.

9 Q. And, again, both of these vehicles, at least on
10 the 5th, as you got there, were located in the
11 same intersection that Ms Buchner told you she
12 saw some woman out taking pictures of vehicles;
13 is that your understanding?

14 A. That's true, yes.

15 ATTORNEY KRATZ: All right. That's all I
16 have for cross-examination, Judge. Thank you.

17 THE COURT: Any redirect?

18 **REDIRECT EXAMINATION**

19 BY ATTORNEY STRANG:

20 Q. So, if Teresa Halbach was taking pictures of a
21 van or some cars up by the shop area that you
22 have described, on October 31, presumably, or
23 November 1 or November 2, that's not a photo you
24 could attribute to the call to **Auto Trader**
25 earlier on October 31, could you?

1 A. I guess I'm not sure what you are asking.

2 Q. Well, somebody else would have had to ask her to
3 take a photograph up at this end, because that's
4 not where the maroon van was, right?

5 A. The maroon van was not up there.

6 Q. And so if she was taking a picture, she was
7 either doing that on her own or because someone
8 else asked her.

9 A. I don't know that anybody has established that
10 she was taking a picture down there.

11 Q. Well, if Ms Buchner is correct, that she saw a
12 female photographing a van up at that end of the
13 driveway ...

14 A. Ms Buchner didn't say who was taking a picture.
15 She couldn't even give me a description of who it
16 was; she said it was a female.

17 Q. Right, I understand.

18 A. And didn't know what day it was. So it was
19 between a set of days, she thought.

20 Q. Did you find any other information that female
21 photographers were out taking pictures of cars
22 near Avery Road, or that driveway, on any day
23 between October 31 and November 2, 2005?

24 ATTORNEY KRATZ: I'm going to object as to
25 the characterization, Judge. I don't think you have

1 to be a professional photographer to take a picture.

2 ATTORNEY STRANG: I'm not suggesting a
3 professional photographer.

4 Q. (By Attorney Strang)~ Do you have any information
5 at all, as the case agent, or one of the two lead
6 investigators here, of any female taking
7 photographs of a van, or any other car, other
8 than Teresa Halbach, on October 31 to November 2,
9 2005, anywhere on that driveway?

10 A. Where the picture is there?

11 Q. Anywhere on Avery Road or that driveway --

12 A. The only --

13 Q. -- any information at all?

14 A. No, I don't.

15 ATTORNEY STRANG: Okay. That's all I have.
16 Thanks.

17 ATTORNEY KRATZ: One other question.

18 **RE-CROSS-EXAMINATION**

19 BY ATTORNEY KRATZ:

20 Q. But yesterday you heard Ms Buchner say it could
21 have been a week before, or two weeks before. It
22 wasn't the 31st, even necessarily anywhere around
23 that time frame; you heard that didn't you?

24 A. I did hear her say that yesterday, that's
25 correct.

1 ATTORNEY KRATZ: That's all I have got,
2 Judge.

3 THE COURT: All right. The witness is
4 excused.

5 ATTORNEY STRANG: Scheduling at side bar?

6 THE COURT: Mr. Strang, any more witnesses
7 today?

8 ATTORNEY STRANG: No, that's why I was
9 going to approach side bar; we don't have any more
10 witnesses for today.

11 THE COURT: All right. I will meet with
12 counsel after we conclude today. Members of the
13 jury, we're going to break early today, before you
14 leave, I have an announcement to read to you at this
15 time. Some of these things you have heard before.

16 As you know, the Court's decision not to
17 sequester the jury during the trial is dependent
18 on the jurors not listening to, watching, or
19 reading any news accounts of the case, nor
20 discussing it with anyone, including members of
21 your family or other jurors.

22 For these reasons, it is vital that you
23 do not listen to any conversation about the case,
24 do not read any newspaper or internet reports, or
25 listen to any news reports on the radio or

1 television, about this trial.

2 To assure that you are not exposed to
3 any improper media coverage, the Court has
4 ordered that, for the duration of the trial, you
5 do not watch the local news on television; do not
6 listen to the local news on radio; and do not
7 read the newspaper, unless you first have someone
8 remove any articles about the case.

9 In addition, do not visit any internet
10 websites or web logs, which may include any
11 information about the case, or for that matter,
12 watch any national shows that have any
13 information about the case.

14 The Court understands that some of you
15 may be working at places of employment during the
16 weekend, do not discuss the case with any
17 employers, employees, or patrons. Do not
18 volunteer your status as a juror to anyone.

19 If anyone attempts to discuss the case
20 with you, politely but firmly notify them that
21 you are prohibited from discussing the case. If
22 you are involuntarily exposed to information
23 about the case, from any source, take steps
24 immediately to avoid any further exposure.

25 Should you be exposed to any reports or

1 communications from any source concerning the
2 case during the trial, or should you become aware
3 of anything you believe may affect your ability
4 to serve as a juror, you should not discuss your
5 concerns with any other jurors, but should report
6 any concerns to the jury bailiff.

7 As you know, we are getting close to the
8 end of this trial. It is important for the Court
9 to know that each of you has been able to comply
10 with the Court's restrictions on outside
11 information about this case.

12 Should any of you believe that you have
13 been exposed to any outside information about the
14 case, such as through the news media, or from any
15 other persons, including other family members, or
16 jurors, it is important that you report such
17 information to the Court. You may do so,
18 confidentially, in writing.

19 I would like each of you to think about
20 that matter during the weekend. The Court may
21 individually question members of the jury before
22 we proceed to the final stages of the trial on
23 Monday, to make sure that no juror has been
24 exposed to any improper outside information about
25 the case. With that, you are excused for today.

(Jury not present.)

THE COURT: You may be seated. And, counsel, then, I will see you in chambers in a few minutes.

ATTORNEY STRANG: Your Honor, before we go off the record, I just want to move Exhibit 501, which is Dr. Fairgrieve's CV.

THE COURT: Any objection?

ATTORNEY FALLON: None.

THE COURT: Exhibit 501 is admitted.

(Proceedings concluded.)

I, Diane Tesheneck, Official Court Reporter for Circuit Court Branch 1 and the State of Wisconsin, do hereby certify that I reported the foregoing matter and that the foregoing transcript has been carefully prepared by me with my computerized stenographic notes as taken by me in machine shorthand, and by computer-assisted transcription thereafter transcribed, and that it is a true and correct transcript of the proceedings had in said matter to the best of my knowledge and ability.

Dated this 2nd day of January, 2008.

Diane Tesheneck, RPR
Official Court Reporter

1 STATE OF WISCONSIN : CIRCUIT COURT : MANITOWOC COUNTY
2 BRANCH 1

3 STATE OF WISCONSIN,

4 PLAINTIFF,

JURY TRIAL

TRIAL - DAY 21

5 vs.

Case No. 05 CF 381

6 STEVEN A. AVERY,

7 DEFENDANT.

8 **DATE:** MARCH 12, 2007

9 **BEFORE:** Hon. Patrick L. Willis
10 Circuit Court Judge

11 **APPEARANCES:** KENNETH R. KRATZ
Special Prosecutor
12 On behalf of the State of Wisconsin.

13 THOMAS J. FALLON
Special Prosecutor
14 On behalf of the State of Wisconsin.

15 NORMAN A. GAHN
Special Prosecutor
16 On behalf of the State of Wisconsin.

17 DEAN A. STRANG
Attorney at Law
18 On behalf of the Defendant.

19 JEROME F. BUTING
Attorney at Law
20 On behalf of the Defendant.

21 STEVEN A. AVERY
Defendant
22 Appeared in person.

23 **TRANSCRIPT OF PROCEEDINGS**

<u>COURT'S DECISION</u>	
FAIR TESTING MOTION	3
MOTION TO SUPPRESS MULTIPLE SEARCHES	11
MOTION TO DISMISS ALL CHARGES AGAINST THE DEFENDANT AT CLOSE OF STATE'S CASE	16
INDIVIDUAL VOIR DIRE	25
DEFENDANT WAIVES RIGHT TO TESTIFY	78
DEFENSE RESTS	83

1 THE COURT: At this time the Court calls
2 State of Wisconsin vs. Steven Avery, Case No. 05 CF
3 381. We're here this morning for a continuation of
4 the trial in this matter. Will the parties state
5 their appearances for the record, please.

6 ATTORNEY KRATZ: Good morning, Judge. The
7 State appears by Calumet County District Attorney
8 Ken Kratz, Assistant Attorney General Tom Fallon,
9 and Assistant District Attorney Norm Gahn, appearing
10 as Special Prosecutors.

11 ATTORNEY STRANG: Good morning, Steven
12 Avery is present. Jerome Buting and Dean Strang
13 also present on his behalf.

14 THE COURT: The first item of business
15 today is for the Court to issue its decision on
16 three outstanding motions. The Court has already
17 heard argument on these motions. I'm ready to issue
18 the decisions at this time.

19 The first motion the Court will address
20 is a renewal from the defense of its fair testing
21 motion; that is, a motion that was filed
22 pre-trial by the defense, last summer, asking for
23 permission to have an observer present while the
24 Wisconsin State Crime Lab was performing analysis
25 of various pieces of evidence.

1 The defense counsel argues that the
2 defendant in this case was prejudiced because the
3 defense was not permitted to have an observer
4 present while DNA testing was conducted of a
5 bullet, by Sherry Culhane. Ms Culhane testified
6 that during the testing process, some of her DNA
7 made its way into a control sample that should
8 not have contained anyone's DNA.

9 She believes it happened as a result of
10 saliva that came from her mouth while she was
11 speaking to observers from within the lab who
12 were being trained at the time. Ms Culhane
13 testified that there was no evidence of
14 contamination in the test of the extract from the
15 bullet itself, which is found to contain Teresa
16 Halbach's DNA.

17 The defense argues that this account
18 given by Ms Culhane demonstrated the defenses
19 need to have an observer present during testing.
20 The observer might have suggested splitting the
21 extract from the bullet as a control, before the
22 remainder of the test was completed, in order to
23 determine whether Teresa Halbach's DNA was, in
24 fact, on the bullet, or somehow found its way
25 into the abstract -- into the extract through

1 contamination.

2 An observer may also have seen, argues
3 the defense, how Teresa Halbach's DNA may have
4 gotten into the extract if it happened through
5 contamination. As a remedy, the defendant asks
6 that the Court suppress the test results, or in
7 the alternative, if suppression is not granted,
8 instruct the jury that the State resisted a
9 defense request to observe the testing process.
10 The State's testing totally consumed the sample.
11 And the State withheld the Crime Lab's
12 contamination log until it was specifically
13 requested by the defendant.

14 Both parties acknowledge in their
15 argument that the test, which the Court must
16 apply, is that set forth in the United States
17 Supreme Court case of ***Arizona vs. Youngblood***;
18 that is, unless a criminal defendant can show bad
19 faith on the part of the police, failure to
20 preserve potentially useful evidence does not
21 constitute a denial of due process in law. The
22 issue boils down, then, to whether or not the
23 State was guilty of bad faith in this matter.

24 The evidence that the defense cites as
25 evidence of bad faith on behalf of the State is

1 the following: First of all, the State resisted
2 the defendant's initial request to observe the
3 testing.

4 Second, the State did not disclose the
5 Crime Lab's contamination log history to the
6 defense at the time of the original fair testing
7 motion. The argument is that earlier disclosure
8 may have allowed the defense to succeed in its
9 earlier motion.

10 Third, that the State did not provide a
11 copy of the contamination log as part of the
12 defendant's original general discovery request.

13 Fourth, the defendant expressed its
14 concern about contamination at an earlier stage
15 in this proceedings and Ms Culhane's testimony
16 demonstrated that contamination occurred.

17 Fifth, the defendant personally
18 expressed his concern about being framed at an
19 early stage in the trial.

20 And, sixth, there is no clean sample
21 left for the defendant to test because the
22 extract that was found to contain the victim's
23 DNA may have already been contaminated and
24 the -- there is not sufficient DNA left on the
25 bullet to independently test.

1 The Court concludes that those facts do
2 not demonstrate a finding of bad faith on the
3 part of any representatives of the State.

4 With respect to the first part of the
5 defendant's request, that the State resisted its
6 request to observe the testing, the law in
7 Wisconsin is that the State had a right to resist
8 that request. Relevant are Wisconsin Statute
9 Section 176.79 (1), as interpreted in the Court
10 of Appeals case of **State vs. Franszczak**,
11 F-r-a-n-s-z-c-z-a-k, a 2002 reported decision.

12 The Court in that case summarized the
13 law under the statute as follows: All evidence,
14 information, and analyses of evidence submitted
15 to the Crime Lab by law enforcement is privileged
16 and, therefore, is off limits to a defendant
17 prior to trial. The same is true as to the
18 analyses of such evidence by the Crime Lab. This
19 privilege also bars any effort, by a defendant,
20 to examine Crime Lab personnel as witnesses prior
21 to trial.

22 There is an exception with respect to
23 such evidence as is subject to discovery under
24 Section 971.23 and, in fact, discovery was
25 exercised here and the State did present

1 materials. The point is there's nothing improper
2 about the State's initial resistance to the
3 defense request for fair testing. It's
4 authorized under the statute.

5 The second State argument is that the
6 State did not timely disclose the contamination
7 log history to the defense, or the Court's
8 original decision might have been different
9 because the defense argument for observation
10 would have been stronger.

11 The Court would not have ruled
12 differently on the original motion, even if it
13 had known of the existence of the contamination
14 log earlier. Frankly, the Court is relieved to
15 know that such a log is kept as an aid to
16 defendants who are able to make use of it in
17 cross-examination, as the defendant did in this
18 case.

19 The Court believes it is far preferable
20 to have a contamination log than if the Crime Lab
21 was hiding its mistakes. I will also note there
22 is no evidence to suggest the contamination log
23 demonstrates any fraud on the part of the Crime
24 Lab in its history, as the defense referred to in
25 other State Crime Labs as part of its original

1 argument.

2 The defense also argues that the State
3 did not provide a copy of the contamination log
4 as part of the defendant's general discovery
5 request. The Court wasn't really presented with
6 information to suggest whether or not the
7 contamination log would have been within the
8 scope of the original request made by the
9 defense.

10 However, it appears that the State did
11 provide a copy of the contamination log, to the
12 defendant, upon specific request for the log, and
13 the Court believes that the defense was able to
14 effectively use the information from the
15 contamination log in its cross-examination of Ms
16 Culhane. That is, the Court doesn't believe
17 there was any prejudice to the defense in the
18 conduct of its case.

19 The fourth argument advanced by the
20 defendant is that the defense expressed concern
21 for contamination, and in this case contamination
22 admittedly occurred as Ms Culhane testified. The
23 Court finds that despite that express concern on
24 the part of the defense, doesn't change the law
25 in this area, that the State is simply not

1 required to permit an observer at the Crime Lab.

2 The defense also argues that the
3 defendant himself personally expressed concern
4 about being framed earlier in this case. The
5 Court understands that that in fact was the case
6 here, but the Court also understands that the
7 defendant's claim is that he was being framed by
8 members of the County Sheriff's Department and
9 not by members of the Crime Lab.

10 I think it's worth noting in this case
11 that it was Ms Culhane's testing of the DNA in
12 the 1985 case that, in fact, led to the
13 defendant's exoneration. The Court is not aware
14 of any allegations that the Crime Lab was a party
15 to any frame up here and the Court finds no
16 reason to believe that was the case.

17 The last argument was there's no clean
18 sample left to test, as while there is an
19 abstract of the blood evidence, that abstract may
20 have been already contaminated. There's no
21 indication here that the operator, Ms Culhane,
22 used more of the sample than was necessary. She
23 used her best judgment in testing the bullet as
24 she did.

25 She testified that there was nothing

1 visible on the bullet and she felt she had to
2 take an extract from the bullet in order to get
3 enough of a sample to test. The Court can't find
4 anything wrong with that, which would constitute,
5 in any fashion, bad faith on the part of the
6 State.

7 The bottom line is that Ms Culhane did
8 somehow contaminate the control sample in the
9 course of the testing process and she disclosed
10 that contamination. She followed protocol in
11 asking for an exception. Her mistake was
12 disclosed to the defense in a timely manner as
13 part of discovery and the defendant skillfully
14 elicited her testimony about the mistake in
15 cross-examination. The Court does not believe
16 that any bad faith has been shown or that the
17 defendant has not been -- has been unfairly
18 prejudiced in any manner and for that reason that
19 motion is denied.

20 The next motion renewed by the defense
21 is the -- is motion to suppress evidence from
22 multiple searches. This motion was renewed
23 outside of the presence of the jury during the
24 trial, on February 23rd. At that time the
25 defense renewed its motion to suppress evidence

1 based on illegal searches, which was initially
2 denied by this Court in a 21 page written
3 decision on December 12 of last year.

4 Defense counsel cited three separate
5 bases for renewal of the motion at this time,
6 based on evidence that was introduced up to
7 February 23rd. First, the defendant claims that
8 the testimony of Special Agent Fassbender and the
9 other officers who participated in the execution
10 of the multiple day search is not consistent with
11 the facts which formed the basis of the Court's
12 original ruling. Specifically, the defendant
13 characterized the initial entries as prohibited
14 warm-up searches, which are not constitutionally
15 permitted.

16 In the Court's view, the evidence
17 introduced at trial was consistent with the
18 Court's earlier understanding of the bases for
19 the various entries into the trailer and garage
20 that were occupied by the defendant. The Court
21 is not going to repeat here its earlier findings
22 or conclusions, other than to note that the
23 evidence supports the Court's prior understanding
24 of the circumstances under which the entries to
25 the defendant's trailer and garage were made.

1 The fact that there were admittedly
2 multiple entries, raises a number of interesting
3 legal issues of apparent first impression in the
4 State of Wisconsin, but the Court believes it
5 addressed those issues in its written decision
6 and the evidence introduced does not change the
7 factual assumptions which were part of that
8 decision.

9 The defendant's second argument is that
10 the facts introduced give new life to the
11 defendant's **Franks** motion. Specifically, the
12 emphasis by law enforcement in the early stages
13 of the search, treating the case as a missing
14 persons case, the defense alleges undercut the
15 representation made in the affidavit for the
16 initial search warrant by Mr. Wiegert.

17 Mr. Wiegert's specific representations
18 in the affidavit for the warrant were the
19 following: Your affiant believes, that based on
20 Teresa's lack of contact with her employer and
21 family members, and her vehicle being abandoned
22 at the Avery Auto Salvage Yard, that Teresa
23 Halbach is the victim of a crime, including but
24 not limited to, homicide, sexual assault,
25 kidnapping, false imprisonment, and theft.

1 Essentially the Court understands the
2 defense argument to be that the State is not
3 permitted to suspect the worst, but hope for the
4 best. The Court does not agree, given the facts
5 available to law enforcement authorities at the
6 time, primarily the lack of conduct -- or contact
7 with Teresa Halbach for a number of days, and the
8 circumstances surrounding the discovery of her
9 vehicle, even before anyone's blood was found
10 inside the vehicle, there was more than probable
11 cause to suspect serious foul play, in the form
12 of the crimes listed in the affidavit.

13 It is not inconsistent, in those
14 circumstances, for law enforcement personnel to
15 hope that their legitimate suspicions are wrong
16 and that there might be some explanation which
17 would be consistent with Teresa Halbach still
18 being alive. There is nothing unreasonable about
19 what the State did, or what the State gave as
20 bases in the affidavit for the search warrant.
21 The information known to the State at the time,
22 which was reflected in the search warrant,
23 provides adequate probable cause for its
24 issuance.

25 The defendant's third separate argument

1 is that the State waited too long to commence its
2 search of the burn pit area behind the
3 defendant's garage, where the victim's bone
4 fragments were found. As the Court understands
5 the argument, it's different from the challenges
6 to the searches of the trailer and the garage
7 because the claim is not based on improper
8 multiple searches, but rather on an improper
9 delay in conducting the search at a time after
10 the possession of the defendant's living quarters
11 should have been turned back to him.

12 The Court finds nothing improper about
13 the timing of the search in this case. Section
14 968.15 requires that a search warrant be executed
15 and returned within five days. The search of the
16 burn pit commenced before that time period
17 expired.

18 The defense makes much out of the fact
19 that the searchers initially refrained from
20 starting the search because of the presence of
21 the defendant's dog and that's not a valid reason
22 for not starting the search earlier, even if the
23 dog appeared to be dangerous. The Court agrees
24 that the presence of the dog alone would not
25 excuse the timing of the search in this case.

1 However what does excuse it are a number
2 of factors. First, as the Court noted, the
3 search was commenced within the five day time
4 limit.

5 Second, law enforcement personnel had a
6 very large area to search under the warrant, that
7 is, the entire Avery Auto Salvage Yard, and they
8 did not artificially delay, in any way, their
9 search of the burn pit.

10 Third, and most significant, the
11 significance of the burn pit site was not
12 apparent until what appeared to be human remains
13 were discovered there. Once that discovery was
14 made the authorities worked promptly to collect
15 the evidence.

16 There was nothing unreasonable about the
17 search of the burn pit. For these reasons, the
18 defense renewed motion to suppress evidence based
19 on unlawful searches is likewise denied.

20 Third motion that the Court addresses
21 this morning is the defense motion to dismiss all
22 charges against the defendant at the close of the
23 State's case. The standard that the Court is to
24 apply in this situation has been stated as
25 follows:

1 The test is whether, considering the
2 State's evidence in the most favorable light, and
3 the evidence adduced, believed, and rationally
4 considered, is sufficient to prove the
5 defendant's guilt, beyond a reasonable doubt.
6 That is, the Court has to look at the evidence in
7 a light most favorable to the State and ask
8 itself whether a reasonable jury could find that
9 the defendant is guilty beyond a reasonable
10 doubt.

11 In this case, the defendant moved to
12 dismiss all charges, but did not present specific
13 argument on the homicide, mutilation of a corpse,
14 and possession of a firearm charges. The Court
15 is not going to summarize all the evidence here,
16 but it concludes that the State has introduced
17 evidence which, if believed by the jury, would be
18 sufficient to prove the defendant's guilt, beyond
19 a reasonable doubt, on these three particular
20 charges.

21 The argument advanced most strenuously
22 by the defendant is that the evidence introduced
23 by the State, even if believed by the jury, would
24 not be sufficient to sustain a guilty verdict on
25 the false imprisonment charge. The elements the

1 State must prove on the false imprisonment charge
2 are the following:

3 One, the defendant confined or
4 restrained Teresa Halbach during her lifetime.

5 Two, the defendant confined or
6 restrained Teresa Halbach intentionally.

7 Three, Teresa Halbach was confined or
8 restrained without her consent.

9 Four, the defendant had no lawful
10 authority to confine or restrain Teresa Halbach.

11 Five, the defendant knew that Teresa
12 Halbach did not consent and knew that he did not
13 have lawful authority to confine or restrain her.

14 The Court understands the defense
15 argument primarily to be that there's no evidence
16 the defendant confined or restrained the victim
17 in this case. The State introduced no direct
18 proof of that particular element, but asserts
19 that it has a circumstantial evidence case. The
20 State points to evidence that the defendant used
21 his sister's name in requesting the victim to
22 come to the property.

23 Bobby Dassey testified he saw Teresa
24 Halbach heading toward the defendant's trailer
25 after he observed her taking pictures of his

1 mother's van and did not see her three to four
2 minutes later when he looked again after taking a
3 shower.

4 The bullet fragment with the defendant's
5 DNA was found on the floor of the garage. The
6 State submits this evidence demonstrates that the
7 victim was killed in the garage by two bullet
8 wounds to the head. The State also argues the
9 evidence demonstrates that the victim was forced,
10 involuntarily, from the trailer to the garage,
11 and that's the basis for the false imprisonment
12 charge.

13 The State does offer a plausible
14 scenario for what happened; however, that's not
15 the standard that the Court must apply. The
16 evidence has to be sufficient to support a jury
17 verdict of guilt, beyond a reasonable doubt. The
18 circumstantial evidence introduced by the State
19 is, if believed by the jury, sufficient to
20 sustain a guilty verdict on the other charges,
21 but the Court believes there's minimal evidence
22 supporting the false imprisonment charged.

23 Viewed most favorable to the State,
24 there is a logical inference that the victim
25 entered the defendant's trailer for some

1 unspecified period of time and that she was
2 killed by the defendant in his garage. There is
3 no evidence from which a jury can determine the
4 circumstances of how she went from the trailer to
5 the garage.

6 To conclude, on the evidence presented,
7 that she was forced there against her will would
8 require speculation on the part of the jury. The
9 Court believes it is not coincidental that the
10 defendant was not charged with false imprisonment
11 until after the State received statements from
12 Brendan Dassey. That fact alone would not
13 prevent the State from pursuing the false
14 imprisonment charge if there was other evidence
15 to support the charge. But the record does not
16 contain such other evidence.

17 During voir dire, a number of jurors
18 indicated they were at least somewhat familiar
19 with the case against Brendan Dassey. To submit
20 this charge to the jury would, the Court
21 believes, invite the jury to fill in the blanks,
22 if you will, by what they might otherwise
23 remember about allegations that have not been
24 supported by evidence in this case.

25 The Court concludes there is not

1 sufficient evidence in the record to support a
2 jury finding of guilt, beyond a reasonable doubt,
3 on the false imprisonment charge. And the Court,
4 therefore, grants the defendant's motion to
5 dismiss that charge.

6 Counsel, is there anything further
7 before we bring in the jury?

8 ATTORNEY STRANG: I don't know that I need,
9 given the Court's ruling, but if I do, I would move
10 for entry of judgment of dismissal or acquittal on
11 Count 4 of the second Amended Information.

12 THE COURT: Anything else from State?

13 ATTORNEY KRATZ: No.

14 THE COURT: All right. The Court will
15 enter, then, a judgment of dismissal of that charge.

16 I will indicate for the record that the
17 Court met with counsel before beginning today.
18 And after discussion, I believe both parties and
19 the Court is in agreement that the Court is going
20 to individually voir dire the jurors, because of
21 the length of the trial, the extensive publicity
22 that it received, in order to make sure that the
23 Court's order has been adhered to in this case.
24 And before doing that, I think it's beneficial to
25 bring in the jurors briefly and let them know

1 what's going on.

2 I will also indicate, before we bring
3 the jury in, that the Court has spent a good deal
4 of time examining the circumstances under which
5 that individual voir dire should take place.
6 Because the subject of the voir dire could
7 include information about whether or not the
8 jurors violated the Court's order, the Court does
9 not believe that the voir dire should take place
10 in the confines of this courtroom, which could
11 easily be found to be somewhat intimidating to
12 the jurors.

13 It's very important in this case to make
14 sure that the jurors express candor in giving
15 their answers. In many cases voir dire is
16 conducted in chambers, without anyone else being
17 present. But this case is different from many
18 other cases because of the intense media coverage
19 that it's received.

20 The media is very interested in this
21 case and while the Court believes there may be
22 grounds to completely close individual voir dire,
23 the Court also believes that consideration must
24 be given to the interests of the media. And,
25 therefore, I have decided that, although the voir

1 dire will take place in a small conference room
2 that has very limited seating, the Court is going
3 to allow a media representative to be present
4 during the questioning of the jurors.

5 Earlier this morning, I instructed the
6 media coordinator to contact the media folks who
7 are here today and designate one of their members
8 to be present. It will be the obligation of that
9 member to report back to the other members of the
10 media. Obviously, they still will be prohibited
11 from disclosing the identity of any juror.

12 If any action is required as a result of
13 the answers given by the jurors, the Court
14 anticipates that that would take place in open
15 court and not in the voir dire investigation in
16 chambers.

17 Anything further that either party would
18 like to add to that before we bring in the jury?

19 ATTORNEY STRANG: Nothing -- Nothing from
20 the defense.

21 ATTORNEY KRATZ: No, Judge.

22 THE COURT: All right. Let's call in the
23 jurors at this time.

24 (Jury present.)

25 THE COURT: You may be seated. Good

1 morning, members of the jury. I can tell you that
2 your first sitting in the jury box this morning will
3 be probably the shortest sitting that you have
4 during the course of this trial.

5 I indicated last Friday, that because of
6 the length of the trial and the concerns about
7 exposure to media coverage and other items, that
8 it was entirely possible that the Court would
9 conduct some questioning of the jurors on an
10 individual basis before the end of the trial in
11 order to make sure that no improper information
12 had found its way to the jury. Before we proceed
13 further with the defense case this morning, that
14 is what we're going to do.

15 We're not going to conduct the voir dire
16 in this courtroom; it's going to be done in a
17 small conference room and you will be escorted by
18 a sheriff's deputy, one by one, to the conference
19 room, so that the questioning may take place. I
20 only called you out here this morning so I would
21 have a chance to tell you that.

22 So at this time, I'm going to allow you
23 to go back to the jury room and in a few minutes
24 we'll begin the individual questioning. Although
25 you will be questioned individually, the Court

1 does not anticipate that the process will be very
2 long, with respect to any individual juror. So
3 you are excused at this time.

4 (Jury not present.)

5 THE COURT: You may be seated. Counsel,
6 then, I will see you in the conference room near the
7 judge's chambers in 10 minutes.

8 (Individual voir dire in conference room.)

9 THE COURT: I'm not going to take them all
10 in order, we'll start out with Mr. Slaby.

11 Mr. Slaby, I think I indicated on the
12 record the reason for our little session here.
13 Because of the length of this trial, which was
14 kind of unusual in the amount of media attention
15 it's received.

16 You probably have memorized by now the
17 admonition I normally give at the end of the
18 week. And we just wanted to take -- give each
19 juror an opportunity to let us know if there have
20 been any problems, if they have been exposed to
21 any information from any source whatsoever about
22 the case, that, you know, might have an effect on
23 the juror. So, is there anything that you feel
24 the Court should know?

25 MR. SLABY: I don't believe so.

1 THE COURT: You feel you have been able to
2 follow the instructions okay?

3 MR. SLABY: Yes.

4 THE COURT: All right. Can you tell me,
5 have you heard any other persons, whether they be
6 jurors or otherwise, say anything about the case?

7 MR. SLABY: No, not about the case.

8 THE COURT: Okay.

9 MR. SLABY: I mean --

10 THE COURT: I'm sure there's been talk
11 among the jurors, we have heard it sometimes as you
12 leave.

13 MR. SLABY: I don't think there's been
14 anything improper.

15 THE COURT: All right. Very well, I'm
16 going to excuse you then. The sheriff will escort
17 you back to the jury room.

18 *****

19 ATTORNEY STRANG: If we're going to
20 continue this, we should see if Mr. Avery is willing
21 to waive his presence. We have got the sheriff
22 walking these people in. We've got two armed law
23 enforcement officers right outside the door, and
24 we've got a fourth one right in here. It just has a
25 feeling of, you know, an encampment. I don't think

1 anybody would assume that they are worried about
2 Norm Gahn.

3 ATTORNEY FALLON: I'm worried, he is right
4 behind me.

5 THE COURT: Well, we'll -- There's only one
6 sheriff's person in the room. And I think at
7 defense counsel request, I deliberately kept them
8 stationed behind the juror.

9 ATTORNEY STRANG: If he was going to be
10 here at all, that's right. But the sheriff is
11 walking them in and there are two armed, in uniform,
12 officers right outside the door.

13 ATTORNEY BUTING: Could they be out that
14 door?

15 ATTORNEY STRANG: There's another one out
16 there. That's five.

17 THE COURT: Let's do this, after this next
18 juror, we'll take it up and we'll ask the sheriff to
19 return.

20 ATTORNEY BUTING: Okay. Sure.

21 THE COURT: Hi.

22 MS DORN: Hi.

23 THE COURT: Have seat.

24 MS DORN: Is this the hot seat?

25 THE COURT: That's the hot seat. I told

1 you the room wouldn't be very big.

2 MS DORN: Yup.

3 THE COURT: As I explained late Friday and
4 this morning, because of the length of this trial
5 and the publicity that's it's received, now, as
6 we're getting toward the final stages, we just want
7 to make sure that there haven't been any problems
8 with jurors being exposed to information they
9 shouldn't be.

10 MS DORN: Mm-hmm.

11 THE COURT: So what I'm primarily looking
12 for is, do you feel that you have been exposed to
13 anything that you shouldn't have been?

14 MS DORN: My night ends at 8:30 at
15 night. I'm running -- too much running with the
16 kids, tournaments, everything.

17 THE COURT: So you have been busy and you
18 don't feel there's anything you have been exposed
19 to?

20 MS DORN: No.

21 THE COURT: Have you -- Let me ask you
22 this, has there been -- I know that the jurors talk
23 to each other, but has there been any discussion
24 about anything involving the case, that you are
25 aware of?

1 MS DORN: No.

2 THE COURT: There's not been.

3 MS DORN: No.

4 THE COURT: Okay. Very well, thank you.

5 *****

6 THE COURT: At this time we're back on the
7 record. The sheriff is in the conference room, the
8 juror is outside the conference room. The defense
9 counsel, I think, expressed concern about the jurors
10 seeing the sheriff's deputies as they came into the
11 room. It's not a problem with the deputy in the
12 room, as I understand it, but the defense was asking
13 if the deputies outside could, what?

14 ATTORNEY STRANG: Not be there. I mean
15 that's, you know, I'm just concerned about doing
16 this in a way that --

17 THE COURT: Okay.

18 ATTORNEY STRANG: -- has as heavy a law
19 enforcement presence as we have got here.

20 THE COURT: What about if they sat in the
21 outer conference room, behind the wall that's
22 behind?

23 OFFICER: That was a jailer and State
24 Patrol. We could dismiss the State Patrol
25 officer.

1 ATTORNEY BUTING: If they are sitting out
2 there no one is going to see them.

3 ATTORNEY STRANG: I think Brett Bowe is
4 already out there.

5 ATTORNEY KRATZ: Can I ask, in this room,
6 why we're not using a stun belt?

7 THE COURT: That's been ruled on already.

8 ATTORNEY KRATZ: That's been ruled on in a
9 court proceeding, not in a conference room, Judge.

10 THE COURT: I think the concern about what
11 could happen with the stun belt remains the same.
12 I'm not going to revisit that. There has not been
13 any problems with the defendant throughout this
14 trial; I see no reason to revisit it.

15 But security wise sheriff I guess the
16 question is, does that work for you?

17 OFFICER: Sure, if I could just be
18 standing out here after I bring the juror in?

19 THE COURT: Right.

20 OFFICER: Okay.

21 THE COURT: You can stay out there, I think
22 they're asking -- and the deputies, if you like them
23 nearby for security, that's fine.

24 OFFICER: Okay.

25 THE COURT: Have them sit in the outer

1 office rather than standing by the door. Am I
2 correct?

3 ATTORNEY STRANG: Yeah, and if that doesn't
4 work, we will talk about waiving his presence, so to
5 speak.

6 THE COURT: Okay. For what it's worth, I
7 should note that when I saw the first juror come in,
8 and the kind of surprised look on his face on the
9 way out of this room, I didn't get the impression it
10 was due to a couple deputies outside so much as all
11 of us sitting in this room, with one -- just one
12 chair left for him. That was my impression.

13 But at any rate, Sheriff, if that works
14 for you, you can have your deputies sit down in
15 the other outer office. Take Ms Dorn back.
16 Let's bring in Mr. Mahler, Richard Mahler.

17 OFFICER: Okay.

18 ATTORNEY STRANG: Do you have a particular
19 order in your head?

20 THE COURT: No, I'm trying to go as random
21 as I can.

22 ATTORNEY STRANG: There was much less
23 physical fidgeting with this juror.

24 ATTORNEY GAHN: She saw the other one come
25 back so.

1 ATTORNEY STRANG: Right. Some Stranger
2 wasn't sent in to pick up his coat.

3 ATTORNEY BUTING: She was always a little
4 more effervescent in court. The other guy wasn't
5 quite as talkative.

6 THE COURT: Good morning, Mr. Mahler.

7 MR. MAHLER: Good morning.

8 THE COURT: Well, there's no secret why you
9 are here, I indicated in the courtroom.

10 MR. MAHLER: Right.

11 THE COURT: Because of the fact that the
12 trial has gone on for six weeks and that there's
13 been a fair amount of publicity about the trial, I
14 have given the jurors warnings at the end of every
15 day and admonishments not to watch the news media.
16 We just want to make sure that none of the jurors
17 have been exposed to information that they shouldn't
18 have been seeing.

19 MR. MAHLER: Okay.

20 THE COURT: And so at this time, I'm just
21 asking, is there anything that you feel you have
22 been exposed to that could impact your service as a
23 juror.

24 OFFICER: No. In the beginning, my wife
25 said that Channel 12 humiliated me and my family

1 on TV, but that was about it. That has no affect
2 on what I'm doing here.

3 THE COURT: I don't think they would have
4 been permitted to identify a juror.

5 MR. MAHLER: Well, they didn't say my
6 name, but my wife said she knew who I was because
7 they said a musician living on the wife's trust
8 fund, which kind of pissed her off. So she wants
9 nothing to do with it.

10 THE COURT: Channel 12 is in Milwaukee?

11 MR. MAHLER: Yes.

12 THE COURT: Hopefully people in Milwaukee
13 didn't know, but do you feel that that would have
14 any impact on your ability to be fair in this case?

15 MR. MAHLER: No, I'm here to take in the
16 evidence and weigh it out.

17 THE COURT: Okay. Have you heard any
18 discussion of the case by any of the jurors, or
19 anything about the case?

20 MR. MAHLER: Nobody has said anything.

21 THE COURT: Okay. All right. Good. Thank
22 you. You may step outside, the sheriff will take
23 you back.

24 *****

25 THE COURT: All right. How about

1 Mr. Wardman? Good morning, Mr. Wardman. As I
2 indicated on the record, we're having this session
3 just because this is a trial that's gone on for six
4 weeks. There's been a lot of publicity about it.
5 And for the benefit of the Court and the parties and
6 to make sure there is a fair trial, we're just
7 double checking to see if any of the jurors may have
8 been exposed to any information about the case that
9 would affect their ability to serve as a juror. Can
10 you tell us if you feel you have been.

11 MR. WARDMAN: No, last night is the only
12 night I seen it on TV and I had clicked it real
13 quick.

14 THE COURT: You turned it off right away?

15 MR. WARDMAN: Yeah, after I was watching
16 ***Deal or No Deal***, I was surprised they put you on
17 there in commercial time.

18 THE COURT: They tell me I have been on
19 there more than I should be. Okay. So -- But that
20 was it and you turned it off right away.

21 MR. WARDMAN: Yeah. And I don't get the
22 paper so.

23 THE COURT: And the second question, to the
24 best of your knowledge has there been any discussion
25 about the case by any of the jurors?

1 MR. WARDMAN: No.

2 THE COURT: No. Okay. Thank you. You can
3 step outside, the sheriff will take you back.

4 *****

5 And let's try, if the sheriff can duck
6 in here for a minute. Sheriff, Diane Free,
7 number two.

8 THE COURT: Good morning, Ms Free.

9 MS FREE: Good morning.

10 THE COURT: As I indicated in the
11 courtroom, the reason we're doing this is because
12 the trial has gone on for, you know, five weeks now.
13 And there's been a good deal of publicity about the
14 case, so just to make sure that both sides get a --
15 a fair trial, we're double checking to see if any of
16 the jurors may have been exposed to any information
17 about the case that you feel could impact your
18 ability to serve as a juror. Have you been exposed
19 to any information about the case?

20 MS FREE: No, I'm -- I miss the news,
21 though.

22 THE COURT: You are not that many days
23 away. And the second question I have is, are you
24 aware of any conversations that have taken place
25 among any of the jurors involving the case.

1 MS FREE: No, we have done really good
2 policing ourselves.

3 THE COURT: Okay. I'm glad to hear that.
4 All right. Thank you, that's all I have. You are
5 excused.

6 MS FREE: Thanks.

7 *****

8 THE COURT: Number seven, Paul Nelesen.
9 Good morning, Mr. Nelesen.

10 MR. NELESEN: Good morning.

11 THE COURT: First of all, how are you
12 feeling today?

13 MR. NELESEN: Oh, fair to partly cloudy,
14 I guess.

15 THE COURT: Better than last week?

16 MR. NELESEN: Yeah, a little bit better.

17 THE COURT: As I indicated on the record,
18 because of the fact that the trial has gone on for
19 six weeks and has been the subject of a lot of
20 publicity, as we get toward the end stages of the
21 trial here, I'm just trying to make sure that there
22 haven't been any problems of the nature --

23 MR. NELESEN: Sure.

24 THE COURT: -- I addressed. So my question
25 is, whether you have been exposed to any

1 information, whether anybody tried to talk to you or
2 anything, anything that -- information about the
3 case that could affect your ability as a juror?

4 MR. NELESEN: No, I have had people ask
5 me, but I just pretty much tell them what you
6 told me, no, I can't talk about it. Everyone
7 pretty much just drops it.

8 THE COURT: Okay. That's good to hear.
9 And the second and the final question is, are you
10 aware of any discussion that's taken place among any
11 of the other jurors about the case?

12 MR. NELESEN: No, we usually keep pretty
13 quiet.

14 THE COURT: Okay. All right. That's good.
15 You are excused.

16 MR. NELESEN: That's it? Okay.

17 THE COURT: That wasn't so bad.

18 MR. NELESEN: No.

19 *****

20 THE COURT: Let's do number eight, Nathan
21 Klein. Good morning, Mr. Klein.

22 MR. KLEIN: Good morning.

23 THE COURT: As I indicated on the record,
24 because of the fact the trial has gone on for six
25 weeks and has been the subject of a lot of publicity

1 and the trial is starting to wind down and we're
2 getting near the end, we're taking the opportunity
3 to make sure that the -- that the jurors haven't
4 been exposed to anything they shouldn't be. So my
5 first question would be, have you inadvertently, or
6 otherwise, heard anything on the news, or had
7 persons talk to you, or anything else --

8 MR. KLEIN: No.

9 THE COURT: -- about the case?

10 MR. KLEIN: No, I have been very good
11 about it. Immediate family, nor anybody else in
12 the group.

13 THE COURT: And I did get your note about
14 the propane delivery driver, as I understand it that
15 was one of the witnesses from a few days ago.

16 MR. KLEIN: Correct.

17 THE COURT: You indicated you spoke to him
18 two or three years ago when your propane tank --

19 MR. KLEIN: Yeah.

20 THE COURT: Did you just talk about the
21 propane?

22 MR. KLEIN: Yes. There was nothing
23 more, but I felt that I should let you guys know.

24 THE COURT: Is that the extent of your
25 acquaintance with him?

1 MR. KLEIN: Yes.

2 THE COURT: You don't think that would
3 impair --

4 MR. KLEIN: I don't know the guy. He
5 doesn't hardly know me.

6 THE COURT: Last question is, are you aware
7 of any discussion that's taken place about the case
8 by any other members of the jury?

9 MR. KLEIN: No. No, I feel we have a
10 really good group in this. Everybody is very
11 diligent about not speaking of anything.

12 THE COURT: Okay. Very good. Thank you.

13 MR. KLEIN: Yeah, thanks.

14 *****

15 THE COURT: How about number 12, William
16 Mohr? Good morning. Mr. Mohr.

17 MR. MOHR: Good morning.

18 THE COURT: As I indicated on the record,
19 because of the fact that a trial has gone on for six
20 weeks and it's been the subject of a good deal of
21 publicity, we're just questioning the jurors to make
22 sure that they haven't been exposed to anything that
23 could jeopardize the right of either side to a fair
24 trial.

25 So my first question is whether,

1 inadvertently or otherwise, you have heard
2 anything on the news, or other persons have
3 talked to you or tried to talk to you about the
4 case?

5 MR. MOHR: No.

6 THE COURT: Anything?

7 MR. MOHR: No.

8 THE COURT: Thanks. And the second
9 question I have is, are you aware of any
10 conversations that have taken place among any
11 members of the jury that were related to the case or
12 about the case?

13 MR. MOHR: No.

14 THE COURT: Okay. Very good. You may
15 stand up and you will be escorted back.

16 MR. MOHR: All righty.

17 *****

18 THE COURT: Number three, Terri Temme.
19 Good morning.

20 MS TEMME: Good morning.

21 THE COURT: Have a seat.

22 MS TEMME: Okay.

23 THE COURT: As I indicated on the record,
24 because of the fact that a trial has gone on for
25 five weeks now and it's been the subject of a good

1 deal of publicity, we're just taking this
2 opportunity as we near the end of the trial to make
3 sure that, inadvertently or otherwise, none of the
4 jurors have been exposed to any information about
5 the case that they shouldn't be. So, my first
6 question is, has there been anything on the news, or
7 any person who has tried to talk to you, or anything
8 else, with information about the trial?

9 MS TEMME: No.

10 THE COURT: Okay. And my second question
11 is, are you aware, have you heard of any discussions
12 by any other members of the jury about the case?

13 MS TEMME: No.

14 THE COURT: Okay. Thank you. That's it.

15 *****

16 THE COURT: Let's try Barbara Schmidt,
17 number four. Good morning. Good morning, Ms
18 Schmidt. As you know, the trial has been going on,
19 we're in our fifth week now. And because of the
20 fact of the length of the trial and the amount of
21 publicity that it's received, it's very important to
22 both sides that the trial is heard by a fair and
23 impartial jury. And we want to make sure, that
24 whether through inadvertence or otherwise, or for
25 any other reason, that none of the jurors has been

1 exposed to any information that could affect their
2 ability to serve as a juror.

3 So I have a few questions for you. Have
4 you heard anything about the case from any of the
5 media during the trial?

6 MS SCHMIDT: No, sir.

7 THE COURT: The other thing that we asked
8 about and I know that sometimes through inadvertence
9 or through no fault of the jurors, it can happen,
10 but have any other persons attempted to talk to you
11 about the trial, whether other jurors, or family
12 members, or anything else?

13 MS SCHMIDT: No.

14 THE COURT: Okay. Have -- Is there anybody
15 else that lives in your household with you?

16 MS SCHMIDT: Well, my husband, my three
17 sons.

18 THE COURT: Okay. Are your three sons home
19 during the day?

20 MS SCHMIDT: Mostly the older one is a
21 foreman at EVM and the other two go to school.

22 Q. Okay. Have either -- Any of your children or
23 your husband said anything to you about the trial
24 during the course of the trial?

25 MS SCHMIDT: They mention things, but I

1 just kind of ignore them.

2 THE COURT: Okay. Who would mention
3 things?

4 MS SCHMIDT: Mostly my husband. I think
5 he knows more about what's going on than I do.

6 THE COURT: Can you tell me some of the
7 types of things he might mention?

8 MS SCHMIDT: Well, Saturday he said
9 something to the affect that it didn't make any
10 difference what the jurors would decide because
11 everybody would go to appeals and all that kind
12 of stuff. So that's basically it.

13 THE COURT: Has he -- do you know where
14 he's gotten whatever information he has about the
15 trial?

16 MS SCHMIDT: I don't know. He has -- he
17 goes out to the greenhouse, which is our part
18 business. And I imagine he has got a radio out
19 there.

20 THE COURT: Has he said anything to you
21 that in any way is for or against one of the parties
22 to the trial?

23 MS SCHMIDT: No, sir.

24 THE COURT: Okay. So he's mentioned things
25 to you about the trial, but he hasn't said anything

1 about, for example, how he feels?

2 MS SCHMIDT: No, sir.

3 THE COURT: Okay. And what have you done
4 when he's talked to you about the trial?

5 MS SCHMIDT: Well, on Saturday, I went
6 down to carry in wood. See, we have a wood
7 burner in our basement so that's what I do in my
8 spare time. Carry in, putting in, carry in,
9 putting in, that kind of stuff.

10 THE COURT: So you have walked away when
11 he's talked about it?

12 MS SCHMIDT: Yeah, it kind of perturbed
13 him, but I did walk away, yes.

14 THE COURT: And is he aware of the
15 restrictions the Court has placed on you, that you
16 are not supposed to talk about it.

17 MS SCHMIDT: He's aware, but he likes to
18 see if he can get my goat, so to speak.

19 THE COURT: Okay. Has he attempted to
20 provide you with any information outside of what the
21 jury has heard in court about the case.

22 MS SCHMIDT: No, sir, that he won't do.

23 THE COURT: Okay.

24 MS SCHMIDT: But I do have a problem
25 with those little -- I don't know what you call

1 them -- tickers across the bottom of the screen.
2 I usually pay attention because it means
3 something has happened, or like the kids don't
4 have to go to school that day --

5 THE COURT: Sure.

6 MS SCHMIDT: -- because of bad storms,
7 that kind of bothers once in a while, if I don't
8 catch it in time.

9 THE COURT: So you -- What do you do if you
10 see a ticker that involves the trial?

11 MS SCHMIDT: Well, I have been engrossed
12 pretty much in books and stuff. I don't pay too
13 much attention to TV, but when this little sign
14 goes off and then all of a sudden the ticker
15 flies across, well, you kind of pay attention to
16 it.

17 THE COURT: Okay.

18 MS SCHMIDT: But when it involves the
19 trial or something like that, I turn it off
20 quick.

21 THE COURT: Okay. All right. So do you
22 feel that you have been exposed to any information
23 that would affect you or your ability to be fair as
24 a juror?

25 MS SCHMIDT: Not that I know of.

1 THE COURT: Okay. Are you -- Have you
2 talked to any other jurors about what you just
3 talked to me about?

4 MS SCHMIDT: No, sir.

5 THE COURT: Do you know if any other jurors
6 have talked to you or have you heard anything about
7 similar situations where they might -- somebody in
8 their family might be talking to them?

9 MS SCHMIDT: No, sir. I kind of sit
10 back in the room and read all day. And they go
11 around talking, talking, talking.

12 THE COURT: Okay.

13 MS SCHMIDT: And I kind of absorb bits
14 and pieces here and there but.

15 THE COURT: Has any other juror said
16 anything to you on the bus about them talking to
17 their spouse or anything?

18 MS SCHMIDT: Not their talking to their
19 spouse, no.

20 THE COURT: Talking to anybody about the
21 case?

22 MS SCHMIDT: Not about the case, about
23 their measures as to not hearing it, you know,
24 like turning off the radio --

25 THE COURT: Okay.

1 MS SCHMIDT: -- or listening to the PF,
2 whatever, public service thing, you know.

3 THE COURT: Okay.

4 MS SCHMIDT: I don't know what that's
5 called, PBS.

6 THE COURT: So, based on what you know, you
7 feel that the other jurors are doing their best not
8 to hear anything about the case?

9 MS SCHMIDT: That's right.

10 THE COURT: All right. I'm going to have
11 you -- why don't you just step outside for a second
12 with the sheriff there.

13 MS SCHMIDT: Excuse me.

14 *****

15 THE COURT: Let's just hold for a second,
16 shut the door.

17 OFFICER: Okay.

18 THE COURT: We'll be right with you.

19 ATTORNEY FALLON: The only thought I had is
20 you might want to ask her what she's learned from
21 the tickers.

22 ATTORNEY KRATZ: If she learned anything
23 that wasn't in the trial.

24 ATTORNEY FALLON: Depending on what she
25 reveals, whether you go further is entirely

1 dependent on that answer.

2 ATTORNEY GAHN: The tickers, I wouldn't
3 even bring her back in for that.

4 ATTORNEY BUTING: It's kind of hard to
5 believe that as to how many times that her husband
6 has said anything and if he is trying to get her
7 goat all the time, but I'm not sure what would
8 provoke that thing, doesn't matter what the jurors
9 are going to do, everybody is going to appeal.

10 THE COURT: Yeah, well, that can be a
11 situation where a spouse, you know, if they know
12 they are not supposed to be talking about the case,
13 can tease them without saying anything that would
14 prejudice the juror.

15 ATTORNEY STRANG: Let's ask her what her
16 husband thinks about the case.

17 ATTORNEY BUTING: More open ended, what
18 does he think about the case. He knows more about
19 it, what's going on, than I do. How can that be?

20 THE COURT: Sure. Anything else before we
21 bring her back in? I will ask her both, I'll ask
22 her about the tickers.

23 Ms Schmidt, I just have a couple
24 follow-up questions. One was about the tickers
25 you mentioned. Do you know, before you were able

1 to turn the TV off, or look away, do you remember
2 anything that you saw on the tickers?

3 MS SCHMIDT: Not -- Not particularly,
4 no. It just -- it mentioned you and something
5 about Mr. Avery. And then I don't have any idea.
6 But see like the something is, you know, it goes
7 -- like I said, it goes in one ear and out the
8 other and sometimes it doesn't register in
9 between.

10 THE COURT: So whatever you saw on the
11 tickers, you can't remember?

12 MS SCHMIDT: No, sir.

13 THE COURT: The other question I have is
14 with respect to your husband, do you know what his
15 opinion is about the case? Does he think --

16 MS SCHMIDT: He has strong opinions,
17 they don't always agree with mine.

18 THE COURT: Okay. But what opinions of his
19 has he given to you?

20 MS SCHMIDT: Just what he mentioned
21 about, no matter what happens to the trial, you
22 are going to have appeals and all kinds of stuff
23 anyway, so.

24 THE COURT: Has he told you anything about
25 whether he thinks the defendant is guilty or

1 innocent?

2 MS SCHMIDT: No. No.

3 THE COURT: He has not.

4 MS SCHMIDT: No.

5 THE COURT: When you say he has strong
6 feelings, what -- what are those strong feelings
7 that he passed on to you?

8 MS SCHMIDT: Not anything regarding the
9 trial, but -- but like home things. Like if the
10 boys have trouble with this or that, they know
11 better, they are supposed to do this and they are
12 supposed to do that. He doesn't holler at them
13 or scold them, it's always up to me to do the
14 punishing.

15 THE COURT: How often has your husband
16 attempted to talk to you about the case?

17 MS SCHMIDT: Well, twice for sure. As
18 long as this has been going on, maybe twice.

19 THE COURT: Over the five weeks.

20 MS SCHMIDT: Yes, sir.

21 THE COURT: Do you remember which -- about
22 when they were?

23 MS SCHMIDT: No, I couldn't tell you on
24 it.

25 THE COURT: Do you remember the most recent

1 one?

2 MS SCHMIDT: Just that Saturday, this
3 past Saturday.

4 THE COURT: This past Saturday?

5 MS SCHMIDT: Yeah.

6 THE COURT: And the other one would have
7 been about how long before that?

8 MS SCHMIDT: Probably when it just
9 started.

10 THE COURT: Nothing other than that?

11 MS SCHMIDT: No, sir.

12 THE COURT: All right. Thank you. You may
13 step outside.

14 *****

15 THE COURT: Just hold it for a second and
16 shut the door.

17 ATTORNEY BUTING: I think we need to hear
18 from the reporter next, we're kind of shooting in a
19 vacuum.

20 THE COURT: Do you have any questions for
21 this juror at this time?

22 ATTORNEY FALLON: On the thing as a result
23 of that family dynamic, do you think that's going to
24 have any problem for you?

25 COURT REPORTER: I'm sorry, you're going

1 to have to talk a little louder.

2 ATTORNEY FALLON: Okay. I'm sorry. The
3 only thought I had and I'm not saying you definitely
4 need to ask it, but the only question I had is, do
5 you think as a result of the family dynamics here
6 that you would still be able to fulfill your role or
7 duty as a juror in this case, or something to that
8 affect. But other than that, I don't really see
9 anything else.

10 THE COURT: I think I asked her something
11 like that earlier, but it's a good idea to ask her
12 again, now that we have heard everything. Let's
13 bring her back for that one question.

14 One more question.

15 MS SCHMIDT: All right.

16 THE COURT: Ms Schmidt, you will be
17 relieved to know I only have one more question. As
18 a result of whatever discussion you had with your
19 husband on those two occasions when he's tried to
20 talk to you about it; do you feel that anything he
21 said would affect your ability to be fair and just
22 base your decision on the evidence in this case?

23 MS SCHMIDT: No, sir.

24 THE COURT: Okay. Thank you.

25 MS SCHMIDT: This is it, this time,

1 right?

2 THE COURT: I promise, you are not coming
3 back.

4 *****

5 THE COURT: Nancy Stienmetz.

6 ATTORNEY STRANG: As a matter of demeanor
7 and watching her, listening to the answers, I don't
8 believe her. I don't think this is a candid juror.

9 *****

10 THE COURT: Good morning.

11 MS STIENMETZ: Good morning.

12 THE COURT: Have a seat. Ms Stienmetz,
13 we're bringing all of the jurors in this morning to
14 ask some questions, because of the length of the
15 trial and the amount of publicity that it's had,
16 just to make sure that all the jurors can be fair
17 and impartial.

18 You should know that, although there's a
19 reporter sitting behind you, they are prohibited
20 from identifying any juror by name. And I told
21 him also by sex. So any reporting as a result of
22 what happens here cannot in any way identify
23 anything that is said by any particular juror.

24 MS STIENMETZ: Okay.

25 THE COURT: The first thing I want to ask

1 is that the trial has gone on for five weeks now and
2 it's received a great deal of publicity, so we're
3 calling in each of the jurors in order to find out
4 whether any juror may have, through inadvertence or
5 anything else, been exposed to any information about
6 the case from the news media, another person, or any
7 other source, that you can remember? Have you been
8 exposed to any such information?

9 MS STIENMETZ: I have been exposed to --
10 I have not seen a thing on TV, absolutely nothing
11 media wise. I have just been exposed to some
12 chit chat that I have heard, but that's --

13 THE COURT: Chit chat from who?

14 MS STIENMETZ: Some of the other jurors.

15 THE COURT: Okay. Are you referring to the
16 information you provided the Court earlier?

17 MS STIENMETZ: Yeah.

18 THE COURT: Okay. And we have heard
19 something about that as well from one of the
20 participants. I'm going to ask you, if you will, at
21 this time, to tell me as best you can remember, the
22 circumstances and what happened.

23 MS STIENMETZ: For -- From the whole
24 perspective of what I have heard --

25 THE COURT: Yes.

1 MS STIENMETZ: -- since the beginning of
2 everything?

3 THE COURT: Yes. My understanding, it
4 involves two other jurors.

5 MS STIENMETZ: Correct. From what I had
6 heard. The first week, first couple of days
7 Auggie, he sits right next to me, made the
8 comment that when he got --

9 THE COURT: Sits next to you on the bus?

10 MS STIENMETZ: No, he sits next to me at
11 our long table in the room.

12 THE COURT: Oh, not in the courtroom,
13 though?

14 MS STIENMETZ: No.

15 THE COURT: Okay.

16 MS STIENMETZ: No, in that sitting room.

17 THE COURT: Okay.

18 MS STIENMETZ: So, you know, there's
19 always conversation, everyone is laughing and
20 having a pretty good time, generally speaking,
21 but the first week he made a couple comments that
22 when he would get home that his wife watches the
23 trial while he is in there and that she would
24 tell him what transpired when we would be sent
25 out of the courtroom.

1 And one of the other jurors went, shh,
2 shh, you are not supposed to be talking about
3 that. You are not supposed to do that, you know.
4 And then he was quiet. And then a couple of days
5 later, again, he started saying that. And he got
6 shooed by several people and -- Oh, man, I don't
7 like having to do this. And, um, then that was
8 like the first week. Then you had said that you
9 were going to be giving a CD to keep everyone's
10 temptation.

11 THE COURT: Mm-hmm.

12 MS STIENMETZ: So, I think that was like
13 on a Friday and about a few days after that,
14 beginning of the next week, it was conversation
15 about how nice it was and that, you know, no one
16 should be tempted now and whatever. And then
17 there was conversation, just everybody generally
18 here and there popping in something. And they
19 were saying how you could -- you were not
20 supposed to -- because you were doing this, were
21 not supposed to be watching TV, reading
22 newspapers, the computer and stuff like that.
23 And then computer talk started and Auggie, he
24 tends to want to, I know we're not supposed to
25 talk about it but, and he wants to try to start a

1 conversation and he gets shooed.

2 But then when we were on the computer
3 stuff, saying well, you can pull stuff up. And I
4 had said, I think what started that was I had
5 said, well, I had a girlfriend who said that we
6 were all in the computer with our occupations,
7 our family, and I was kind of worried about it
8 because I didn't want anybody to know who I was.
9 I think that's how the computer started.

10 And then Auggie, he was saying, well,
11 how can you erase something on the computer, to
12 have it off of the C drive, I believe. And they
13 were telling him, but then they said, well, once
14 you delete it, it's still in the memory, etched
15 in the computer and anyone can still pull that
16 information out if they want to.

17 It was just speculation on my part. It
18 just was all very coincidental. And he got like
19 whiter than a ghost and didn't say a word the
20 rest of the day. So that was just
21 circumstantial, but I mean it was -- it put a
22 flag in my mind and I'm thinking, well, should I
23 say something, not, no. So I didn't, thinking
24 that was the end of it. Then, I guess what made
25 me think, well, I better say something was then

1 Wednesday on the bus, him and Barb were sitting
2 together and Barb is very quiet.

3 THE COURT: Mm-hmm.

4 MS STIENMETZ: And she was talking about
5 all her things going on at home on the farm and
6 stuff. And I heard Auggie mention, again, about
7 his wife watching it and wanting to tell him what
8 happens.

9 And Barb said that her husband watches
10 it, too, during the day, but he tries to pressure
11 her, influence her with his opinions. She
12 wouldn't mind if he -- She doesn't mind him
13 watching it, but he pressures her with his
14 opinions.

15 And then they were talking -- I don't
16 know, I heard bits and pieces about when news
17 flashes pop up on the screen with film flashes,
18 Auggie was saying that it's hard to get up and
19 leave. I don't know if he said he does or
20 doesn't, but that when they pop up, because they
21 pop up frequently, it's difficult.

22 And that's when I heard Barb,
23 specifically say, that she sees when the ticker
24 tape goes across the bottom of the screen, even
25 though there is a program on, that she does read

1 that ticker tape, that she doesn't leave the
2 room. And that's when I sat on it for a couple
3 days and I thought, well, I better say something.

4 THE COURT: Sure. Let me ask you just a
5 few follow-up questions. First of all, that
6 represents the extent of exposure you have had,
7 right?

8 MS STIENMETZ: Yes.

9 THE COURT: As I understand what you are
10 saying --

11 MS STIENMETZ: Yeah.

12 THE COURT: -- from what you reported that
13 Auggie said, did you get the impression that besides
14 his wife watching what happens when the jurors leave
15 the room, that -- that she's passing that
16 information on to him?

17 MS STIENMETZ: Yeah.

18 THE COURT: Do you have any reason to
19 believe anybody else on the jury is getting that
20 information?

21 MS STIENMETZ: From someone else?

22 THE COURT: Well, but if Auggie passing on
23 what he knows to anybody else.

24 MS STIENMETZ: I don't think so, I mean
25 Auggie, he -- he didn't say, oh, this is what

1 happened and this is what happened, but he just
2 said my wife tells me --

3 THE COURT: Okay.

4 MS STIENMETZ -- when I had come home. A
5 few times I have heard him say that.

6 THE COURT: Did he say if he makes any
7 effort to stop her?

8 MS STIENMETZ: I did not hear that.

9 THE COURT: And with Barb, did you learn
10 anything about what her husband's opinions are?

11 MS STIENMETZ: No.

12 THE COURT: So you don't know what they
13 are?

14 MS STIENMETZ: No. All I heard was, she
15 said that her husband watches the court
16 proceedings on TV, too, while she's in -- in here
17 and that she doesn't mind except that he
18 pressures her with his opinions about what goes
19 on in the courtroom.

20 THE COURT: When she -- When you heard her
21 say, pressures her with his opinions --

22 MS STIENMETZ: Mm-hmm.

23 THE COURT: -- were you sure that it was
24 pressures her with his opinions about this case, as
25 opposed to pressures her with his opinions about

1 other things.

2 MS STIENMETZ: I got the impression it
3 was with the case, because that's what they were
4 talking about.

5 THE COURT: Okay. But she didn't say what
6 those opinions were?

7 MS STIENMETZ: No, no, they did not. I
8 have not heard any of them say what someone had
9 told them, other than that they had been told.

10 THE COURT: Okay.

11 MS STIENMETZ: Influenced, or whatever,
12 I don't know. So, I'm sorry this has turned into
13 a mess.

14 THE COURT: No reason to be sorry for being
15 conscientious.

16 MS STIENMETZ: It's probably nothing,
17 but if it is something and if I didn't say
18 anything, it would be very difficult.

19 THE COURT: Believe me, everybody has to
20 live with themselves and it's good to be
21 conscientious.

22 MS STIENMETZ: So.

23 THE COURT: All right. I think that's all
24 I have for you. I'm going to let the sheriff take
25 you back.

1 MS STIENMETZ: Give me a minute to -- I
2 blush very easily.

3 THE COURT: Ms Stienmetz.

4 MS STIENMETZ: Yes.

5 THE COURT: When you leave with the
6 sheriff, you can tell them, if you want to sit down
7 outside for a little while, you can go in my office
8 if you want.

9 MS STIENMETZ: They have already made a
10 comment that Barb was out so long and I'm out as
11 long as she. And I don't want them to get any
12 ideas.

13 THE COURT: At any rate, you take whatever
14 time you need and we'll have the sheriff take you
15 back.

16 MS STIENMETZ: Okay.

17 THE COURT: Thank you.

18 *****

19 THE COURT: Let's try 16, Laura Barber.

20 ATTORNEY BUTING: We may want to ask this
21 next juror a little more pointed questions about,
22 you know, how you police yourselves. If she says
23 that nobody is talking about it, does it come up at
24 all, you know, what do you say, or how far does it
25 get, or sounds like something that's happened more

1 than once.

2 ATTORNEY KRATZ: Might want to keep her a
3 longer time.

4 ATTORNEY BUTING: Right. I knew they were
5 going to wonder because Barb was back here longer.

6 ATTORNEY GAHN: I was wondering that too.

7 THE COURT: Good morning, again.

8 MS BARBER: Good morning.

9 THE COURT: As I indicated on the record,
10 because of the fact that the trial has gone on for a
11 number of weeks and because it's gotten a lot of
12 publicity and, now, as we're getting toward the end
13 of the trial, we're taking time to make sure that
14 none of the jurors has been exposed to anything they
15 shouldn't be. So, my first question for you would
16 be, can you think of any information from the news
17 media, or any persons who said or tried to say
18 anything to you, has anything about the case been
19 presented to you.

20 MS BARBER: Not at all. Not at all. In
21 fact, if I can just speak, my family, once they
22 knew I was going to be on this jury, as soon as
23 anything comes on, you know, they mute it.

24 It's --

25 THE COURT: Okay.

1 MS BARBER: And I, then, avoid all
2 visual contact with the television. When it's
3 over, they will say it's over and put it back on.
4 People I work with, even, avoid saying. They
5 will come up and say glad to see you're still
6 working here. I work one day a week, you know,
7 and that's the extent, they don't care anything
8 else. And I appreciate that. I haven't picked
9 up a newspaper, I don't even go through the sale
10 papers on Sunday any more.

11 THE COURT: Okay.

12 MS BARBER: Just in case.

13 THE COURT: That's good to know. Next, I'm
14 wondering, and we're asking all the jurors about
15 this, have you heard any discussion about the case
16 during the course of the trial from any of the other
17 jurors?

18 MS BARBER: No, we make it specific that
19 we do not talk about the case. We may talk about
20 some of the people --

21 THE COURT: Okay.

22 MS BARBER: But that's -- usually it's
23 in a humorous -- in fact, I have never been with
24 a group, this long, this close, that everyone
25 gets along so well.

1 THE COURT: Okay.

2 MS BARBER: It's sometimes rather
3 humorous.

4 THE COURT: Sure.

5 MS BARBER: And I appreciate that,
6 because the time goes a lot nicer.

7 THE COURT: Okay. Have any members of the
8 jury had to kind of hush up any other ones before
9 they started talking about the case or --

10 MS BARBER: Someone might have started
11 to say something and it's like, whoa, hold it,
12 that's it, and it's quiet.

13 THE COURT: Okay. So there's pretty good
14 policing?

15 MS BARBER: Very much, very much.
16 Everybody keeps track of everybody else. Unless
17 they are talking to themselves in the bathroom, but
18 to me that's --

19 THE COURT: And you haven't heard --

20 MS BARBER: I'm sorry.

21 THE COURT: And you haven't heard anything
22 come from any of the jurors in this case?

23 MS BARBER: No. Not at all.

24 THE COURT: All right. Thank you.

25 MS BARBER: Oh, darn, I was kind of

1 enjoying this.

2 THE COURT: Well, it's a break from the
3 norm.

4 MS BARBER: Definitely, actually, we
5 were just discussing, we missed our morning
6 break, is it okay if we have one.

7 THE COURT: It's going to be running
8 altogether.

9 MS BARBER: I'm telling you, that's why
10 it's such an enjoyable group. Because this is
11 one of the things, we're worried about our break.

12 THE COURT: Well, that is good.

13 MS BARBER: Thanks.

14 *****

15 THE COURT: Let's try Marion Flint.

16 ATTORNEY FALLON: We don't talk about the
17 trial, but we talk about the people.

18 THE COURT: Talking to themselves in the
19 bathroom. I didn't know that any of you guys wanted
20 me to pursue that. I didn't know if they meant
21 other jurors or the participants in the trial.
22 Marion Flint is the next one.

23 Good morning, have a seat.

24 MS FLINT: Good morning. Okay.

25 THE COURT: We saved you the only chair

1 that's left. This is, as I explained on the record,
2 because of the fact the trial has gone on for a
3 number of weeks, it's gotten a lot of publicity.
4 We're near -- getting near the final stages of the
5 trial. And because of the length of the trial and
6 the publicity, we're taking this opportunity to talk
7 to each of the jurors, just to make sure that the
8 jurors haven't heard anything inadvertently or
9 otherwise, that could impact their ability to serve.

10 So, my first question is, are you aware
11 of any information that you have been exposed to,
12 by accident or otherwise, on the news or from
13 other persons, or any other member of the jury,
14 anything about the case?

15 MS FLINT: No.

16 THE COURT: You have been able to --

17 MS FLINT: I live alone.

18 THE COURT: Okay.

19 MS FLINT: And so I can monitor myself.

20 THE COURT: Sounds like you are doing a
21 good job. Next question is, I know the jurors have
22 been together a lot about this case, are you aware
23 of any instances that came to your attention in
24 which any of the jurors, other jurors, said anything
25 about the case?

1 MS FLINT: None, they have been really
2 good.

3 THE COURT: Okay. All right. Well, that's
4 good to hear. I think that's all I have got for
5 you.

6 MS FLINT: Okay. Thank you.

7 *****

8 THE COURT: Mr. Schuette. Good morning.

9 MR. SCHUETTE: Good morning.

10 THE COURT: We're, as I indicated on the
11 record, in recognition of the fact that the trial
12 has gone on for five weeks now and it's been the
13 subject of a good deal of publicity, and now that
14 we're starting to get near the end of the trial, we
15 wanted to make sure that -- that all the jurors
16 haven't been exposed -- or that none of the jurors
17 have been exposed to any information through
18 inadvertence, or otherwise, about the trial, because
19 of the importance to both parties to get a
20 absolutely fair trial.

21 And we're especially doing it because we
22 understand, even if the parties try to avoid
23 information, it's not always easy to do that.
24 So, in that light, I would like to ask you a
25 couple questions. First of all, whether or not

1 you have been exposed directly to any media
2 reporting about the case during the course of the
3 trial?

4 MR. SCHUETTE: No, I have not.

5 THE COURT: The next question I have
6 relates to information gained from other parties, or
7 other persons, whether there's been any personal
8 acquaintances, other jurors or, I know in special
9 cases, members of the person's family, whether any
10 such information, or any persons have attempted to
11 talk to you about the case in any way?

12 MR. SCHUETTE: No, nobody has. No there
13 have not.

14 THE COURT: Have there been any other
15 conversations with -- involving other members of the
16 jury about the case?

17 MS SCHUETTE: None at all, no.

18 THE COURT: Okay. There -- In cases with
19 people that have spouses, especially, we're asking
20 the question, do you have a spouse at home?

21 MS SCHUETTE: Yes, I do.

22 THE COURT: Has there been any discussion
23 whatsoever between you and your wife about the case;
24 is she following the case in any way?

25 MS SCHUETTE: She's limitedly following

1 it. We have had no discussion that would be
2 involved. I think the only thing about the whole
3 procedure, is what we have for lunch.

4 THE COURT: Okay.

5 MR. SCHUETTE: So there hasn't been
6 anything as far as any details, as far as the
7 trial itself.

8 THE COURT: Okay. Has she been following
9 the trial in any sense at home, on the internet?

10 MR. SCHUETTE: Well, somewhat, I think a
11 little bit in the newspapers. Not on the
12 internet, she doesn't know how to get on the
13 internet. Limitedly on the radio. I don't think
14 the radio, just limitedly.

15 THE COURT: And you said she hasn't talked
16 to you about the facts of the case; has she said
17 anything to you about the case during the course of
18 the trial?

19 MS SCHUETTE: No, not that I can
20 remember. I pretty much told her let's not talk
21 about it. She may well talk about it to some of
22 her family members, but she doesn't relay that to
23 me.

24 THE COURT: Are you aware of any
25 discussions that have been had between any members

1 of the jury about the case during the course of the
2 trial.

3 MS SCHUETTE: Not at all, no. I think
4 the jury, in my observation, I think they have
5 been very observant of your request not to talk
6 about anything.

7 THE COURT: Have any of the jurors had to
8 be told to stop talking about the case by any other
9 jurors?

10 MR. SCHUETTE: Not that I can recall.

11 THE COURT: Okay. Has anybody given -- any
12 person given any information to you about what was
13 happening during the trial while the jurors were
14 outside of the courtroom?

15 MR SCHUETTE: No.

16 THE COURT: Thank you. I think that's all
17 I have. The sheriff will take you back.

18 MR. SCHUETTE: Thank you.

19 *****

20 THE COURT: And Ms Thorne will be next.
21 Good morning.

22 MS THORNE: Good morning.

23 THE COURT: By luck of the draw, you are
24 the last person.

25 MS THORNE: Yeah, I get to wait the

1 longest and sit and wonder.

2 THE COURT: We, as I indicated on the
3 record, this trial is different than most in a
4 number of ways and one of the reasons is it's gone
5 on for five weeks now.

6 MS THORNE: Mm-hmm.

7 THE COURT: It's been the subject of a good
8 deal of publicity. And as we now get near the end
9 of the trial, because of the length of it and the
10 publicity, we're interviewing each of the jurors to
11 make sure that they haven't been exposed, through
12 inadvertence, no fault of their own, or any other
13 reason, deliberate or not, to any information about
14 the case.

15 MS THORNE: Okay.

16 THE COURT: So the first question I have
17 for you, is whether, during the course of the trial,
18 through the news media, family members, employers,
19 members of the public, anyone, have you received any
20 information about the case during the trial?

21 MS THORNE: No.

22 THE COURT: Okay. I'm trying to remember,
23 where are you employed, again?

24 MS THORNE: Waitress, but I'm off the
25 schedule until I go back.

1 THE COURT: Oh. So you have been off --
2 off the --

3 MS THORNE: Right.

4 THE COURT: -- schedule?

5 MS THORNE: Mm-hmm, ever since it
6 started.

7 THE COURT: Do you remember the last time
8 you worked there?

9 MS THORNE: The Sunday right before we
10 started.

11 THE COURT: Before the trial started?

12 MS THORNE: Uh-huh. Yeah.

13 THE COURT: So it was after the jury
14 selection, but before the trial started.

15 MS THORNE: Right. Right.

16 THE COURT: And you haven't worked since
17 then?

18 MS THORNE: No.

19 THE COURT: Okay. Has anyone -- Do any
20 family members or anyone live with you at home?

21 MS THORNE: My fiance.

22 THE COURT: Has he attempted to talk to you
23 about the case?

24 MS THORNE: No, huh-uh.

25 THE COURT: Have any fellow employees,

1 members of the public, anyone else, talked about it?

2 MS THORNE: No.

3 THE COURT: And are you aware as to whether
4 or not there's been any discussion by any of the
5 other jurors about the case?

6 MS THORNE: No, huh-uh.

7 THE COURT: No one has tried to talk to
8 you?

9 MS THORNE: No.

10 THE COURT: And you haven't heard anyone
11 else?

12 MS THORNE: No.

13 THE COURT: Okay. All right. I think
14 that's all I have.

15 MS THORNE: Okay.

16 THE COURT: You can step outside with the
17 sheriff.

18 MS THORNE: All that wondering for
19 nothing, huh.

20 THE COURT: We were trying to get you some
21 exercise this morning.

22 MS THORNE: Okay.

23 *****

24 THE COURT: All right. Counsel, what I'm
25 going to do at this time is adjourn for a break. I

1 will give you a chance to look at your notes and
2 digest things. And I have 11:22 right now, about 20
3 minutes to 12 report to chambers.

4 ATTORNEY KRATZ: This isn't something we'll
5 do on the record?

6 THE COURT: We'll determine --

7 ATTORNEY KRATZ: Oh, I see what you are
8 saying.

9 THE COURT: -- what's the next step after
10 that.

11 ATTORNEY KRATZ: Okay.

12 (Jury not present.)

13 THE COURT: At this time we are back on the
14 record, outside the presence of the jurors. All
15 counsel and the defendant are present. Mr. Strang,
16 does the defense have any additional evidence it
17 wishes to present?

18 ATTORNEY STRANG: We do not, your Honor.
19 We intend to rest, formally, before the jury next
20 joins us in the courtroom.

21 THE COURT: Very well, before we bring the
22 jurors in the courtroom to inform them of that fact,
23 the defendant in this case has a right to testify if
24 he wishes. And the Court wants to make sure that if
25 he is declining to exercise that right, that it is

1 done so knowingly and voluntarily. Mr. Strang, have
2 you raised this issue with your client?

3 ATTORNEY STRANG: I have raised it with
4 Mr. Avery; that is, Mr. Buting and I both have,
5 jointly, several times, probably beginning before
6 trial and then during the trial.

7 THE COURT: Thank you. You can move the
8 microphone over to Mr. Avery then.

9 Mr. Avery, do you understand that you
10 have a constitutional right to testify in this
11 case, if you wish?

12 THE DEFENDANT: Yes, I do.

13 THE COURT: And do you further understand
14 that you have a constitutional right not to testify,
15 if you wish?

16 THE DEFENDANT: Yes, I do.

17 THE COURT: Do you understand that the
18 decision whether to testify or not is yours to make?

19 THE DEFENDANT: Yes.

20 THE COURT: That means, you can listen to
21 your attorneys and listen to their advice, but,
22 ultimately, it's your call; do you understand that?

23 THE DEFENDANT: Yes, I do.

24 THE COURT: Has anyone made any threats or
25 promises to you to influence your decision?

1 THE DEFENDANT: No, they didn't.

2 THE COURT: Have you thoroughly discussed
3 your decision with your attorneys?

4 THE DEFENDANT: Yes, I did.

5 THE COURT: And have you made a decision as
6 to whether or not you wish to testify in this case?

7 THE DEFENDANT: Yes.

8 THE COURT: What is your decision?

9 THE DEFENDANT: My decision is, I'm an
10 innocent man and there's no reason for me to
11 testify. Everybody knows I'm innocent.

12 THE COURT: Okay. So you wish not to
13 testify; is that correct?

14 THE DEFENDANT: Yes.

15 THE COURT: Thank you. You may be seated.

16 THE DEFENDANT: Thank you.

17 THE COURT: Mr. Strang and Mr. Buting, have
18 each of you had sufficient opportunity to thoroughly
19 discuss this case and the decision whether or not to
20 testify with your client?

21 ATTORNEY BUTING: Yes, we both have.

22 THE COURT: And are each of you satisfied
23 that he's making his decision not to testify
24 knowingly, intelligently and voluntarily?

25 ATTORNEY BUTING: Yes.

1 THE COURT: Very well, the Court finds that
2 Mr. Avery's decision not to testify in this case is
3 knowingly and voluntarily made. I'm satisfied he's
4 aware of his constitutional right to testify, if he
5 wishes. And he is knowingly and voluntarily
6 declining the right to exercise the right to
7 testify. Is there anything else that either party
8 wishes to address before we bring the jurors in?

9 ATTORNEY STRANG: There is, from the
10 defense, your Honor. I cannot remember when, but
11 sometime earlier in this trial, we discussed the
12 issue of one of our juror's participation on an
13 earlier civil jury in which the witness here was a
14 party. I will not name the juror, but the juror is
15 known to the Court and to opposing counsel.

16 We argued at the time, that although
17 this was uncharted territory, as a matter of case
18 law, that the juror having once passed on the
19 credibility of a witness here, and that witness'
20 role as a party in a prior civil lawsuit, we
21 thought would leave a strong enough impression on
22 a juror and enough commitment to conclusions
23 about credibility that there would be at least
24 objective bias, if not also subjective bias, and
25 reason to relieve the juror from further

1 responsibilities. The Court disagreed.

2 We went back to the case file in the
3 earlier civil case and had our defense
4 investigator look at that file in the Manitowoc
5 County Circuit Court. And it appears from our
6 investigator's review that the real crux of the
7 dispute that was to be resolved by that earlier
8 civil jury was whether the man who was a witness
9 here and the plaintiff in that earlier case was
10 malingering or not.

11 So his credibility, as we understand
12 that earlier file, was not only in issue, but
13 probably the main fighting issue, the main point
14 of dispute in the earlier case. Clearly, given
15 the jury's award of something better than
16 \$170,000, to the plaintiff, that credibility
17 contest was resolved in favor of the plaintiff
18 there, witness here.

19 What we would like, and ask the Court to
20 do, is to transfer the whole of the file from the
21 earlier case to your Honor's custody now, so that
22 your honor might review both the Clerk's minutes
23 and such trial transcripts as there are. The
24 parties also should have an opportunity to review
25 those.

1 I have no reason to think that opposing
2 counsel have seen the file and I know that
3 neither Mr. Buting or I, personally, had seen the
4 file. We simply delegated this to an
5 investigator to take a first pass through that
6 earlier file.

7 So I request that the Court bring the
8 file, physically, to Chilton, from Manitowoc,
9 review the file itself, allow the parties an
10 opportunity to do that. And we anticipate
11 renewing our motion to relieve this juror from
12 further responsibilities in this case,
13 acknowledging, as we have from the beginning,
14 that the juror did the right thing by raising the
15 issue at all, with the Court.

16 So this isn't a juror misconduct issue,
17 claim, not even remotely. We think it's an
18 interesting, as far as we know, unprecedented
19 factual situation that arises, that we believe
20 does require that the juror be relieved. So
21 that's the request I'm making today and the one
22 I'm forecasting later.

23 THE COURT: Let me ask one question before
24 I ask the State if they wish to comment, just to
25 enable me to prepare to reevaluate your request. Is

1 it the defense position that even if this juror is
2 not subjectively biased, that by virtue of the
3 juror's participation in this prior trial, that the
4 juror is objectively biased?

5 ATTORNEY STRANG: Yes, in a word. And I
6 won't labor again to the argument I made earlier,
7 but I spoke to the Court, at the time, about the
8 unique function of being a judge of facts. And the
9 stylized way in which judges of facts, namely
10 jurors, assess the credibility of witnesses and that
11 it's very different than the way we assess
12 credibility day-to-day, or in the grocery store, or
13 barbershop, or wherever we may have conversation
14 with people.

15 And having -- having undertaken that
16 very special and stylized credibility assessment,
17 I think it's unlikely that a juror would
18 reconsider the credibility assessment, once
19 arrived at, as a matter of judgment, as a judge
20 of the facts. And that, objectively, this looks
21 like someone who comes in with an opinion on the
22 credibility of a witness, that has been cast by a
23 very special prior intense experience, with a
24 heavy responsibility for weighing credibility in
25 that earlier role, and now being asked to do so

1 again under the same pattern instruction and with
2 the same special and stylized considerations that
3 apply, in a trial, to the judges of the facts,
4 who fill out the array of 12 people in a jury
5 box.

6 We don't think, reasonably, she could be
7 expected, entirely, to set aside that prior, not
8 just experience with the witness, but conclusions
9 about credibility that she endorsed and drew
10 after deliberations with -- with a group of 12 in
11 that case and affirmed with her verdict.

12 THE COURT: All right. I take it at this
13 point the defense is not asking to argue the merits
14 of its request, but rather simply asking the Court
15 to have the file transmitted here tomorrow.

16 ATTORNEY STRANG: Well, that is correct. I
17 argued the merits earlier. I anticipate I will
18 argue the merits again, but for today, if we can get
19 the file and all counsel can have whatever
20 opportunity they wish to avail themselves of to look
21 at the file, will be in a better position to discuss
22 the issue on the merits tomorrow, or at the Court's
23 convenience.

24 THE COURT: Anything from the State?

25 ATTORNEY FALLON: I would simply say that

1 we don't oppose that suggestion and would certainly
2 like the Court to examine the file at its leisure.
3 I will no doubt be heard tomorrow regarding any
4 renewed motion for the recusal of the juror. I will
5 save my argument until then.

6 THE COURT: Very well, the Court will make
7 sure the file is here tomorrow. I don't know how
8 much leisure time I will have to review it, but I
9 will make sure that it does get reviewed.

10 Anything else before we bring the jurors
11 back in? All right. You may bring the jury in
12 at this time.

13 (Jury present.)

14 THE COURT: You may be seated. Mr. Strang,
15 at this time the defense may call its next witness.

16 ATTORNEY STRANG: Your Honor, Mr. Buting
17 and I jointly have elected to rest at this time on
18 behalf of Steven Avery.

19 THE COURT: Thank you. Mr. Kratz, does the
20 State have any witnesses or testimony to offer in
21 rebuttal?

22 ATTORNEY KRATZ: We do not, your Honor.

23 THE COURT: All right. Members of the
24 jury, that concludes the evidence portion of this
25 trial. I have a couple of notices to read to you.

1 I can tell you that the parties informed
2 me earlier today that they expected the evidence
3 to end some time early this afternoon. They have
4 also requested that they have tomorrow to prepare
5 closing arguments and address some other matters
6 that must be addressed before we have jury
7 instructions and closing arguments of the parties
8 and I have granted that request.

9 So I'm going to, at this time, excuse
10 you for the rest of the day and also notify you
11 that you won't have to report to court tomorrow.
12 You should report at the normal time on Wednesday
13 morning. And when you get here we will then
14 proceed with final jury instructions and also
15 closing arguments of the parties.

16 I do have a few notices to read to you
17 before I excuse you for the day. As you know,
18 the Court's decision not to sequester the jury
19 during the trial is dependent on the jurors not
20 listening to, watching, or reading any news
21 accounts of the case, nor discussing it with
22 anyone including members of your family or other
23 jurors.

24 For these reasons it is vital that you
25 do not listen to any conversation about the case,

1 do not read any newspaper or internet reports, or
2 listen to any news reports on the radio or
3 television about this trial.

4 To assure that you are not exposed to
5 improper media coverage, the Court has ordered
6 that, for the duration of the trial, that you do
7 not watch the local news on television, nor
8 listen to the news on radio, nor read any
9 newspaper accounts, unless you first have someone
10 remove any articles about this case from the
11 newspaper.

12 In addition, do not visit any internet
13 websites or web logs which may include any
14 information about the case. I should add at this
15 point that although the evidence portion of the
16 trial is complete, the Court's order remains in
17 affect. It is especially important at this time
18 that you not be exposed to any information about
19 the case.

20 The Court is asking that for those of
21 you who are employed, that you not report to work
22 tomorrow. I will make sure that you get paid a
23 full day's jury pay, even though we're not asking
24 you to be here tomorrow because of the request
25 that I'm making.

1 Make sure that you do not disclose your
2 status as a juror to anyone, if anyone attempts
3 to discuss the case with you, politely but firmly
4 notify them that you are prohibited from
5 discussing the case. If you are involuntarily
6 exposed to any information about the case from
7 any source, take steps to immediately avoid any
8 further exposure.

9 Should you be exposed to any reports or
10 communications from any source concerning the
11 case during the trial, or should you become aware
12 of anything that you believe may affect your
13 ability to serve as a juror, you should not
14 discuss your concerns with any jurors, but report
15 any concerns to the jury bailiff.

16 I also have a -- prepared a memo, which
17 the jury bailiff will give to you before you
18 leave today. There is a copy for each of you.
19 As I think the parties disclosed during the jury
20 selection process, it's difficult to predict --
21 difficult to predict how long jury deliberations
22 may take, as disclosed in the memo, the Court is
23 requesting that you pack some luggage, overnight
24 belongings, in the event deliberations go on for
25 more than a day and it's required that you stay

1 over.

2 If deliberations do go on more than a
3 day, we'll put you up at a hotel, make sure you
4 get all your meals taken care of and everything
5 else. There is further information in the memo
6 that you will be receiving. With that I'm going
7 to excuse you for today.

8 (Jury not present.)

9 THE COURT: You may be seated. Counsel, is
10 there anything further either party wishes to put on
11 the record at this time?

12 ATTORNEY STRANG: The defense moves now, at
13 the close of all evidence, for a judgment
14 dismissing, with prejudice, the remaining three
15 counts of the second Amended Information. I ask the
16 Court, without further argument, to consider all of
17 the evidence now received and to conclude that, even
18 in the light most favorable to the State and drawing
19 all reasonable inferences in the State's favor, the
20 evidence is insufficient, as to each one of the
21 three counts, to justify a reasonable jury
22 concluding that the State has proven all essential
23 elements as to each of those counts.

24 And I acknowledge, again, that as to one
25 of the counts, Count 3, the felon in possession

1 of a firearm count, we did stipulate to one
2 element, so as to that element, the status as a
3 convicted felon on the relevant date, there the
4 evidence is sufficient because stipulated. But
5 as to the other charges and their essential
6 elements, I ask for judgment of dismissal for
7 want of sufficient evidence.

8 THE COURT: Anything from the State?

9 ATTORNEY KRATZ: Just that the actual legal
10 standard the Court is supposed to apply at this
11 stage, not in the light most favorable to the State,
12 but could a reasonable juror find guilt, beyond a
13 reasonable doubt. We do believe that that slightly
14 higher standard has also been met regarding the
15 three remaining counts. Would ask the Court,
16 without further argument, deny that motion.

17 THE COURT: For many of the reasons which
18 the Court gave this morning, the Court believes that
19 it has already had adequate opportunity to address
20 this motion and the Court is going to deny the
21 motion to dismiss the remaining three counts against
22 the defendant at this time. Anything else before we
23 adjourn this afternoon?

24 ATTORNEY STRANG: Yes. Mr. Buting was
25 concerned that I was unclear, and I often am, as to

1 the felon in possession count. I meant to concede
2 only that one of the essential elements of that
3 count is established, not concede that any of the
4 other essential elements of that count are
5 established. And second --

6 THE COURT: That's how I understood your
7 argument.

8 ATTORNEY STRANG: Well, then, the Court's
9 become accustomed, perhaps, unfortunately, to my
10 clumsy way of speaking. I also had, before this
11 trial started, I think on February 2, suggested that
12 a mistrial may be warranted, if, in fact, the State
13 sought to proceed on the false imprisonment count
14 and then fell short in its case-in-chief. That's
15 what happened. I am not at the moment moving for a
16 mistrial, because I want to think long and hard
17 about whether necessity for that really is manifest.
18 And there's nothing happening with the jury now so,
19 sequentially, if I wish to make that argument, I
20 know that I could do it tomorrow, out of the jury's
21 presence. So I'm not making that motion now, but I
22 want to alert the Court and counsel that the matter
23 is fresh in my mind and under consideration.

24 THE COURT: Very well. If there's nothing
25 further, we're adjourned for this afternoon.

(Jury not present.)

(Jury instruction conference.)

At this time the Court calls State of Wisconsin vs. Steven Avery, Case No. 05 CF 381. We are here this afternoon to conduct the jury instruction conference and address a few other matters that still require the Court's attention. We're obviously not in the presence of the jury at this time. Will the parties state their appearances for the record, please.

ATTORNEY FALLON: Good afternoon, your Honor. May it please the Court. The State appears by Assistant Attorney General Tom Fallon, District Attorney Ken Kratz, and Assistant District Attorney Norm Gahn, as Special Prosecutors for Manitowoc County.

ATTORNEY STRANG: Good afternoon. Steven Avery is present in person. And Dean Strang appears on his behalf. I specifically want to note that the defense thinks it proper to have conducted a discussion in chambers, informally, about jury instructions before this. I participated in that willingly. I did not ask to have my client present. I do not think he was required to be present as a matter of the Sixth Amendment or the correlative

1 provisions of the Wisconsin Constitution. As far as
2 I'm concerned, it is not an issue.

3 THE COURT: All right. And as a follow-up
4 to that, I will indicate for the record that the --
5 counsel for both sides and the Court met in chambers
6 this morning to conduct an informal instruction
7 conference. Agreement was reached on some matters.
8 Some matters are still outstanding.

9 At this time the Court is conducting the
10 formal jury instruction conference. And along
11 those lines, Mr. Strang, I should ask, I don't
12 know if you had a chance to address the subject
13 of jury instructions with your client, but if you
14 would like to request some time to do that, I
15 will take a recess to permit you to do it.

16 ATTORNEY STRANG: I haven't done it. I
17 don't see a need to do it. If Mr. Avery has a
18 question, I think he knows he always can ask me.

19 THE COURT: All right. Why don't I do
20 this, I will stay here, but I will go off the record
21 for a couple minutes. I want to make sure you at
22 least have a chance to talk to him about it before
23 we proceed any further, because normally I do allow,
24 and it's true, often, that the defendant doesn't
25 choose to participate directly in the discussion

1 because it's legal concepts that perhaps aren't that
2 familiar with most defendants.

3 But I think it's important to at least
4 give the defense counsel a chance to speak with
5 the defendant. So we're going to go off the
6 record for a couple minutes.

7 (Brief recess.)

8 ATTORNEY STRANG: We have talked a little
9 bit. Mr. Avery, I think, understands why I didn't
10 suggestion he participate in the informal discussion
11 of jury instructions and he knows that we are going
12 to cover the same ground here this afternoon and
13 your Honor will make the final decisions on jury
14 instructions on the basis of what we do here in
15 court.

16 THE COURT: Very well, I will indicate at
17 this time that I distributed to each parties -- each
18 party a set of proposed jury instructions that, in
19 many cases, take into account matters on which the
20 parties indicated agreement earlier this morning.
21 Rather than read the instructions in their entirety,
22 I'm simply going to ask each counsel to acknowledge
23 on the record that they have received a copy of the
24 proposed jury instructions which, red lined is the
25 term typically used, but I have highlighted, in

1 shaded form, modifications which the Court has made
2 to the original draft of jury instructions, which
3 the Court gave to the parties. Mr. Strang, have you
4 received a copy of the latest update?

5 ATTORNEY STRANG: I have the March 13,
6 2007, red lined draft copy of jury instructions
7 which runs onto a 14th page, in my sight.

8 THE COURT: And, Mr. Fallon, have you
9 received them?

10 ATTORNEY FALLON: Yes, Judge, on behalf of
11 the State, we would acknowledge receipt of that very
12 same copy, did briefly examine it prior to going on
13 the record and it appears to conform to what our
14 preliminary discussions resulted in.

15 THE COURT: All right. And I should
16 indicate I inserted the shaded provisions in order
17 to draw attention to changes that have been made
18 from the earlier draft. Obviously, the final set of
19 jury instructions will not contain any red lining of
20 any form because a copy of the full set will be
21 given to each of the members of the jury. Let me
22 ask, at this point, on behalf of the State,
23 Mr. Fallon, are the jury instructions, as they have
24 been submitted, acceptable to the State?

25 ATTORNEY FALLON: Well, they are

1 acceptable, although, we did -- wanted to be heard
2 briefly, I think, on an argument relative to a
3 theory of defense. But in terms of the other
4 matters which are set forth in this second draft
5 of -- dated March 13th, we are in full accord.

6 THE COURT: All right. I will hear you
7 with anything you wish to say about the theory of
8 defense instruction that's found on page five of the
9 draft, at this time.

10 ATTORNEY FALLON: Thank you. In an effort
11 to succinctly get to the point, we do not believe
12 that the theory of defense instruction submitted by
13 the defense is one which is appropriate for
14 submission to the jury. We do so, not because we
15 think the defense is not entitled to such a theory
16 of defense instruction, but only in so far as the
17 theory of defense instruction submitted by the
18 defense, we do not believe is sufficiently and
19 solidly based in the evidence which was presented
20 during the course of the trial.

21 And as such, we do not believe that the
22 instruction should be given to the jury, that
23 there's not sufficient evidence in the record
24 from which a reasonable juror could come to the
25 conclusion that there has been some planting of

1 evidence, that there has been evidence of a
2 frame-up involving members of law enforcement
3 and, now, apparently some unknown other person,
4 or persons.

5 And as such, the evidence, we think, is
6 deficient and invites speculation and conjecture
7 on the part of the jurors. And we would ask that
8 the instruction not be given because we do not
9 believe it is based in the evidence presented.

10 THE COURT: Mr. Strang.

11 ATTORNEY STRANG: The Court's version of
12 the theory of defense instruction on page 5 has its
13 origins primarily in defense proposed Jury
14 Instruction No. 9, submitted on March 10. I think
15 for purposes of jury instructions, the theory of
16 defense instruction that we tendered as No. 9, meets
17 the three criteria for a Court in deciding whether
18 to instruct a jury on any point of law.

19 There is -- This is an accurate
20 statement of law and I don't hear the State to
21 contend otherwise. The matter is not otherwise
22 covered in the Court's proposed jury
23 instructions. Again, I don't hear the State to
24 contend otherwise.

25 And there is at least some evidence

1 which, if accepted by a jury, reasonably would
2 allow the inference and the conclusion that
3 Mr. Avery was not the person. If someone did, he
4 was not the person who killed Teresa Halbach, or
5 burned her body, and that others, instead, did
6 and took actions to make it appear that Mr. Avery
7 was guilty.

8 I'm don't -- I'm not going to go through
9 the entire trial, but I think the evidence more
10 than supports a reasonable jury in drawing that
11 conclusion from the evidence, if the jury wishes.
12 And that's why this is called a theory of defense
13 instruction and that's why there are also
14 theories of prosecution. A jury may or may not
15 choose to accept one side's theory or the other.

16 But there is an adequate evidentiary
17 basis for the instruction as submitted, No. 9.
18 It should be given. I agreed further to
19 modifications of No. 9, defense proposed No. 9.

20 The Court's modifications set out here
21 on page five of the red line draft of
22 instructions is acceptable to the defense. And
23 if the Court gives the theory of defense
24 instruction as now worded in this red line
25 instruction, I will accept the modification of

1 defense No. 9.

2 I also, again, on the express predicate
3 that the Court gives the theory of defense
4 instruction as set forth here, am prepared to
5 withdraw defense proposed Instruction No. 1 and
6 defense proposed Instruction No. 2. Those are
7 more specific refinements.

8 I recognize that I could not satisfy
9 this court or an appellate court that the general
10 theory of defense set forth here by the Court did
11 not otherwise cover the matters suggested in No.
12 1 and No. 2 as proposed by the defense. So I
13 would withdraw those, if the Court gives the
14 theory of defense instruction as set forth on
15 page five of today's draft.

16 THE COURT: Thank you. As I indicated to
17 counsel in chambers, the -- as a prerequisite to a
18 theory of defense instruction, there is a
19 requirement that there be evidence in the record to
20 support the giving of the instruction.

21 The case law suggests that the quantum
22 of evidence that is required in order to justify
23 the instruction is very low. There's a Seventh
24 Circuit Court of Appeals Case, *United States vs.*
25 *Bole*, B-o-l-e, Case No. 435 F 2d, 774, which I

1 believe uses the phrase, however tenuous, there
2 must be evidence to support the instruction. So
3 the quantum of evidence that the defendant must
4 demonstrate is not very high.

5 The Court believes and, again, I'm not
6 going to go over the evidence myself either, but
7 the defense has introduced circumstantial
8 evidence to support its theory of defense. The
9 defense is not required to meet the beyond a
10 reasonable doubt standard that the State must
11 meet in order to prove guilt. And the Court
12 concludes that there is sufficient evidence in
13 the record to justify the giving of a theory of
14 defense instruction. And it's my understanding
15 that if the decision is made to give such an
16 instruction, that the form on page five is
17 acceptable to both parties, recognizing the State
18 opposes the giving of the instruction in any
19 form.

20 Is that correct, Mr. Fallon?

21 ATTORNEY FALLON: That would be correct.

22 THE COURT: Okay. Does the State have any
23 other modifications to propose to the jury
24 instructions?

25 ATTORNEY FALLON: We do not.

1 THE COURT: Mr. Strang, before I ask you to
2 address your other requested instructions that are
3 still at issue, I did want to confirm that the
4 defense is requesting that the Court give
5 Instruction 315 relating to a defendant electing not
6 to testify. That's an instruction the Court is
7 directed to give if the defendant requests it.

8 ATTORNEY STRANG: I am requesting Pattern
9 Instruction 315, and as worded on page 12 of today's
10 red line draft, it is acceptable to the defense.

11 THE COURT: All right. The Court will
12 include 315, then. And it's also my understanding,
13 Mr. Strang, that although the defense has other
14 proposed instructions to offer, that there's not a
15 dispute about the instructions that are already in
16 the draft. Is that correct?

17 ATTORNEY STRANG: That's right. That's
18 right and wrong. I will be arguing that some
19 additional defense instructions should have been
20 included but, you know, subject to that argument,
21 the wording of the draft I have in front of me is
22 acceptable.

23 I will make an extemporaneous
24 suggestion, and suggestion only, that Pattern
25 Instruction 58, as modified, and that appears

1 near the bottom of page 8, might -- might be
2 better moved to either page 12 or page 13, either
3 right before or right after the 460, the closing
4 instruction, just as a matter of flow. But
5 that's -- that's a suggestion only. It also
6 could go right after 103 on page 1 or page 2. It
7 looks, to me, out of place where it is on page 8,
8 but that's, you know, a suggestion, at most.

9 THE COURT: All right. My logic in placing
10 it there, and keep in mind that it's actually part
11 of the opening instructions that the Court typically
12 gives, it's not always included in the closing
13 instructions. But since it relates to information
14 about the case that the jury might request to see, I
15 placed it right after 155, because 155 addresses a
16 somewhat similar issue as it relates to requesting
17 that exhibits be sent to the court -- or to the jury
18 room, and pointing out to the jurors that the
19 exhibit is received, whether it goes to the jury
20 room or not. But I don't have particularly strong
21 feelings about its placement. I don't know how the
22 State --

23 ATTORNEY STRANG: That's a pretty good
24 rationale and I'm going to accept placement wherever
25 the Court thinks it best. I just thought I would

1 offer the suggestion.

2 THE COURT: All right. I also think, with
3 respect to 315, which is the last instruction the
4 Court gives before the closing instruction, I think
5 its placement, as the last thing that the jury hears
6 before the closing, is deliberate, probably in
7 recognition of the importance of the defendant's
8 right not to testify. At least that's the way I
9 have always interpreted it. And I hate to take that
10 away from the defense, unless the defense feels
11 otherwise --

12 ATTORNEY STRANG: No, I'm in complete
13 agreement with the Court on that.

14 THE COURT: All right. We'll then move on
15 to the instructions that were requested by the
16 defense, that are still part of its request. And as
17 I understand it, No. 1 and 2 have been withdrawn, so
18 that takes us on to proposed Instruction No. 3,
19 relating to chain of custody.

20 ATTORNEY STRANG: Yes, your Honor, 1 and 2,
21 which are in the March 8, 2007, submission, are
22 withdrawn. No. 3 is not withdrawn, although, as I
23 suggested, informally, in chambers, I readily would
24 accept a substantial modification of this
25 instruction.

1 The nub of the legal point that I wish
2 communicated to the jury is that the Court's
3 decision to admit an exhibit, as opposed to admit
4 testimony of a witness, the Court's decision to
5 admit an exhibit says nothing about the weight
6 that the jury ought to give the exhibit, or any
7 other exhibit. And so the concept I want to
8 capture is the same one that the legislature
9 captured in Section 909.01 of the Wisconsin
10 Statutes.

11 It's the same concept that the
12 legislature drives at in Section 901.04 of the
13 Wisconsin Statutes which, you know, concerns
14 preliminary determinations of admissibility,
15 conditional admissibility; 901.03 may be another
16 Wisconsin Statute that goes to the concept that,
17 determining something admissible doesn't mean
18 that the exhibit is what the proponent claims
19 necessarily, just means that a jury so could
20 find, reasonably. And it doesn't mean anything
21 about the weight. The Court hasn't passed on the
22 weight of an exhibit by admitting an exhibit.

23 Why does it matter here? Well, we have
24 got 501 marked exhibits. Almost all of those
25 have been admitted. It's just a handful or two,

1 I don't know the precise number, but it's a small
2 number of the marked exhibits, that were not also
3 received by the Court. Much of the physical
4 evidence here is hotly disputed in terms of its
5 meaning, its importance, the weight that ought to
6 be given to it.

7 And, you know, I don't think the
8 instructions, otherwise, cover exhibits very
9 well. It is true that Pattern No. 148 refers to
10 other evidence, but there remains some ground
11 that can be covered and should be covered,
12 quickly and uncontroversially, within the scope of
13 defendant's proposed Instruction No. 3. So
14 that's my argument there.

15 I overlooked one point that I want to go
16 back to, if I may, while I'm thinking of it, in
17 the Court's red line instructions. And that is
18 at page 6. It's the last paragraph in the
19 instruction on elements of the crime of felon in
20 possession of a firearm.

21 Now, we have stipulated the truth of the
22 second element, so the State need not prove, did
23 not need to offer evidence to establish the
24 second essential element of the offense of felon
25 in possession of a firearm. It's established by

1 stipulation. I think -- and I can't cite a case,
2 because I can't call it to mind and I haven't had
3 time to look at it -- but I think there is
4 constitutional authority that, notwithstanding a
5 stipulated element, the Court still not -- may
6 not instruct a jury that it must accept an
7 essential element of an offense as conclusively
8 proved.

9 It is clear to me that the Court may
10 instruct a jury that it may accept the second
11 element in this offense as conclusively proved.
12 And, again, the element is not in dispute. But,
13 ultimately, this goes to the fundamental role of
14 the jury, as the finder of facts and the ultimate
15 arbiter of whether a person will be convicted of
16 a crime.

17 And I wish I had a case to cite or the
18 source of the authority. But I just -- I have
19 the sense that must accept a stipulation as an
20 element goes one half step too far. And I
21 just -- I wanted to alert the Court and counsel
22 to that potential constitutional infirmity in the
23 instruction, if I'm right.

24 The element remains stipulated. We're
25 not going to argue it. You know, we're not going

1 to argue to a jury that it's not proven. We're
2 not backing off the stipulation. A jury
3 certainly may and should accept that stipulation.
4 I just don't know that the jury must, as a matter
5 of the right to a jury trial.

6 THE COURT: Mr. Fallon.

7 ATTORNEY FALLON: Ordinarily, I would say
8 that counsel might have something that's worth our
9 concern here. But I think first and foremost, when
10 the issue is not in dispute, that, for all intents
11 and purposes, I think, moots out a concern regarding
12 the language choice between must and may, in terms
13 of accepting that particular element of fact.

14 Secondly, there is a common sense
15 perspective here, and that is, if the issue is
16 not in dispute, it's as if the element is not
17 there. It's not part of the crime, because it's
18 not a matter, in which case there's nothing for
19 the jury to consider on that particular point.
20 So, why create an issue with the language choice,
21 when there is no issue to be had. So I think,
22 from that common sense perspective, this is a
23 concern that we need not spend more time on than
24 it's duly noted.

25 And, by the way, and third, it is the

1 language that is the proffered choice of the Jury
2 Instruction Committee.

3 THE COURT: All right. I hesitate to speak
4 from memory about cases that I haven't read in
5 years, but I do recall that this matter came up
6 before, I think it was the **Villarreal** case or
7 **Villarreal**, however it was pronounced, where the
8 court required -- or the appeals court required that
9 a personal waiver be taken from the defendant, as
10 opposed to a stipulation by the parties, because it
11 involved an element of the offense.

12 The language that the Court is using is
13 from the form instruction and I believe it is
14 used deliberately and this is why I believe it is
15 used in that fashion. By stipulating to the
16 element, that is, the defendant personally
17 stipulating to the element, the State is
18 precluded from offering any evidence to the jury
19 as to the defendant's status as a felon.

20 If the Court gave a jury instruction
21 that said simply that the jury may accept the
22 fact that it's conclusively proved, that would
23 indicate that the jury has some discretion in the
24 matter. And if the jury had some discretion in
25 the matter, it would seem to be unfair not to

1 allow the State to introduce some evidence to try
2 to put any question the jury might have, out of
3 its mind.

4 So that the Court -- As I understand it,
5 that's the trade off. The benefit the defense
6 gets is that the State is prohibited from
7 introducing any evidence regarding the
8 defendant's status as a felon. But it would seem
9 to me that to reciprocate for that, the State
10 shouldn't be in a position where it might be
11 penalized by being prohibited, on the one hand,
12 from presenting evidence, and having permissive
13 rather than mandatory language used so that the
14 State -- that the jury could still find against
15 the State.

16 So I think the language of the Pattern
17 Instruction has been time tested and I think
18 there is a reason for it, so I'm going to leave
19 the pattern language as it is.

20 Mr. Strang, you may continue.

21 ATTORNEY STRANG: Thank you. Defense
22 proposed Instruction No. 4, I was persuaded to
23 withdraw --

24 THE COURT: Just a second. Actually, you
25 finished your argument on No. 3, but I don't know

1 that I heard back from the State. We kind of got
2 diverted by the other language.

3 ATTORNEY FALLON: Right.

4 THE COURT: So, Mr. Fallon, what's the
5 State's response to defense proposed Instruction 3?

6 ATTORNEY FALLON: Thank you. Our position,
7 in a nutshell, is that it's unnecessary. And it is
8 unnecessary because we think, if you take all of the
9 instructions in toto, it answers the questions,
10 concerns of the defense. Specifically, counsel
11 referred to Instruction 148. I would draw the
12 Court's attention to the remaining -- the last
13 couple of sentences in Instruction 148.

14 Again, you have Instruction 155, about
15 exhibits, you also have Instruction 300, about
16 credibility of witnesses. And while I may be
17 prepared to concede that I can conceive of a
18 situation in which an item of evidence, all by
19 itself, so physically significant and
20 conspicuous, such that this instruction may have
21 some -- requested instruction may have some merit
22 or some weight, the evidence in this particular
23 case, given the fact that this is a
24 circumstantial evidence case based on powerful
25 scientific evidence, that significance was all

1 presented in the context of testimony from the
2 witnesses.

3 And because of that, coupled with the
4 Instruction 148 on objections of counsel and
5 receipt of evidence over objection, the
6 definition of evidence, the definition of
7 exhibits and, finally, I think the instruction
8 that the Court gives, that you tell the jurors,
9 if I have given you any impression as to what I
10 think the results should be, or the significance
11 of the evidence, and I'm paraphrasing,
12 admittedly, then you should disregard it and
13 trust your own interpretation, your own memory
14 and come to your own conclusions in this case.

15 And I think when you we're looking at
16 something like this, you have to take the
17 instructions as a whole, and in their entirety,
18 to evaluate the evidence. Because, otherwise, we
19 could have a list of jury instructions that would
20 go a hundred pages. I mean, you could come up
21 with an instruction for virtually every
22 circumstance that occurs in a trial.

23 And I just do not believe that was the
24 intent of the drafters of the model instructions.
25 And as such, I think the instructions, as a

1 whole, deal with the issue that they raise in
2 their proposed Instruction No. 3. So it is
3 unnecessary and that's our basis -- basis for
4 denial.

5 ATTORNEY STRANG: Brief reply, because we
6 went around and around about this in chambers and
7 the Court posed a very good question on when would
8 there ever be an item of physical evidence that had
9 significance, independent of the testimony about it,
10 which I really thought was -- really -- I thought it
11 was a fascinating jurisprudential, the question in
12 the end.

13 And the thought finally occurred to me,
14 over lunch, and this goes all the way back to
15 Dean Wigmore. And I don't mean Wigmore in
16 evidence after other people took it over, I mean
17 Professor and Dean Wigmore when he was alive and
18 what he described as an autoptic proference. And
19 the classic example he gave was a knife with
20 dried blood on it, an item that was so powerful,
21 in and of itself, that its significance was
22 carried in its presence and its physical quality.

23 And we have something pretty close to
24 what Dean Wigmore would have called an autoptic
25 proference here in, for example, a flattened

1 bullet fragment found in the garage, a Toyota key
2 found in the defendant's bedroom. Again, this
3 was 1880 and 1890, when people were having these
4 arguments, but I simply think that the concepts
5 covered by the -- the three statutes I cited on
6 admissibility as a preliminary question and
7 authentication. And the basic concept that
8 admissibility does not determine weight is
9 something that the instructions don't otherwise
10 cover and should be.

11 THE COURT: All right. Well, as counsel
12 indicated, the Court and the attorneys had a
13 fascinating, academic discussion in chambers this
14 morning about whether or not there might be some
15 piece of physical evidence that would warrant some
16 instruction in addition to the standard instructions
17 that are given in all criminal cases.

18 I indicated that I did not feel that
19 this case presented that type of situation.
20 Taking exhibits, for example, such as the Toyota
21 key, certainly as it's been offered by the State,
22 the State may well argue that that's a
23 significant piece of evidence against the
24 defendant because it was found in his trailer and
25 alleged to contain his DNA.

1 On the other hand, the defense, I don't
2 think I'm anticipating too much here, will no
3 doubt argue in its closing that if the key had
4 been in the defendant's trailer some time before
5 the last time he left it, one would have expected
6 that it would have been found before it was, as
7 the trailer was searched on a number of
8 occasions.

9 So -- And all of these conclusions
10 relate to testimony that was received from
11 various witnesses. In some cases, I'm sure the
12 State -- or the defense will be relying on
13 evidence from the State's witnesses to support
14 its argument.

15 But I think that that situation
16 demonstrates that this particular case doesn't
17 seem to suggest that there is any piece of
18 physical evidence that, by itself, is capable of
19 only one conclusion and one conclusion only, and
20 that somehow by not giving further instructions,
21 which would risk appearing as though the Court
22 were commenting on specific pieces of evidence,
23 something that the Court tries to avoid, and I
24 believe I'm directed to try to avoid, I just
25 don't see that it's necessary. So the Court is

1 going to decline to give an instruction along the
2 lines of that suggested by the defense in its
3 proposed Instruction No. 3.

4 Next, we move on to defense proposed
5 Instruction No. 4. Mr. Strang.

6 ATTORNEY STRANG: Yes, thank you, your
7 Honor. That's the one I started to say, I think
8 that I was persuaded in chambers, and remain
9 persuaded, that is a topic adequately covered by
10 Wisconsin Pattern Criminal Jury Instruction 300.
11 And that Pattern Instruction 300 gives adequate
12 legal support for an argument the parties may want
13 to make. And I withdraw No. 4 for that reason.

14 No. 5 has been modified. And as
15 modified, incorporated into the Court's red line
16 draft today. The modification is acceptable to
17 the defense. And provided the modification, on
18 experts and the jury not being bound to accept an
19 expert's opinion, remains in the final
20 instructions, I'm pleased to withdraw defendant's
21 proposed Instruction No. 5.

22 Defendant's proposed Instruction No. 6,
23 also I view as having been modified and
24 incorporated into the Court's red line draft
25 today. I accept the Court's modification. And

1 assuming that remains in the final jury
2 instructions to be given in this case, I would
3 withdraw anything more from defendant's proposed
4 Instruction No. 6.

5 Defendant's proposed Instruction No. 7,
6 I understand the Court to be inclined to deny.
7 It concerns the general topic of spoliation. I
8 do not withdraw this instruction and I ask the
9 Court to reconsider its position.

10 I want to recognize, if for no other
11 reason than that one always ought to recognize
12 the obvious, that the United States Supreme Court
13 has spoken to an issue related to spoliation in
14 the due process context, though, not in the
15 context of an adverse inference that a jury might
16 be invited to draw, but not required to draw.

17 The Supreme Court decisions, the leading
18 decisions are **Arizona** against **Youngblood**, earlier
19 discussed in this trial, I think as recently as
20 yesterday. And **California** against **Trombetta**,
21 also discussed in this trial. I understand and
22 recognize, as a matter of due process, only bad
23 faith destruction of evidence material to
24 innocence or guilt results in a due process
25 remedy for the defendant, dismissal of charges,

1 or suppression of other evidence.

2 Here, I'm interested instead in an
3 adverse inference. Evidence has come in,
4 evidence can come in, consistent with the due
5 process clause, if the Court is right about
6 suppression rulings that it has made.

7 But the question here is what inferences
8 should be available to the jury and should the
9 jury be informed are in the array of choices as a
10 matter of law. And the State here, there's more
11 than adequate testimony to show that the manner
12 in which the State recovered bone fragments could
13 have led to destruction or loss of those bone
14 fragments. The failure to photograph could have
15 led to human remains not being recognized or
16 recovered at all at the scene.

17 And by volume here, Dr. Eisenberg
18 testified that she thought she only had about 40
19 percent of a complete human skeleton. So the
20 possibility that remains were not recognized and
21 recovered at all is real and reasonable on this
22 record.

23 We also had the proffered testimony of
24 Deb Kakatsch, the Manitowoc County Coroner,
25 excluded by the Court on the State's motion, and

1 over our objection, that would have gone to the
2 prospects for a more successful recovery of human
3 remains, with the assistance on the scene of a
4 forensic anthropologist and a forensic
5 pathologist.

6 So, where the record would support an
7 inference that material evidence, that is, human
8 remains, may have been destroyed or not recovered
9 at all, because of the means employed by the
10 State, an adverse inference ought to be available
11 to this jury for spoliation. And it ought to be
12 available on the same standard it would be in a
13 civil case. The criminal accused, the person
14 accused in a criminal case, surely can't be at an
15 evidentiary disadvantage when compared to a civil
16 defendant arguing over liability or money.

17 I think, here, that the actions to which
18 Special Agent Thomas Sturdivant testified, were
19 deliberate in the sense of intended actions
20 chosen as a matter of free will from the options
21 that Mr. Sturdivant saw available to him. I
22 don't contend that Special Agent Sturdivant acted
23 in bad faith. I'm not going to argue that he
24 did.

25 Although, of course, the good or bad

1 faith of any witness is for the jury to decide in
2 the end. But I don't think we have to show bad
3 faith and evil purpose, or motive, to establish
4 that actions are deliberate or intentional simply
5 in the ordinary sense of not being accidental or
6 involuntary.

7 So, for those reasons, I think the Court
8 should give something like defendant's proposed
9 Instruction No. 7. I always would consider some
10 modification, if the language is clumsy, or
11 overstates the point. But I have not heard
12 either the State or the Court suggest a
13 willingness to modify Instruction No. 7. And so
14 I advance it with the proviso that I have just
15 added.

16 THE COURT: All right. Before I turn it
17 over to the State, I do have one question. I'm
18 having trouble determining the other inference that
19 might be drawn if the bones had been collected in a
20 different manner. It's my understanding that -- I
21 don't know that any of the experts disagreed with
22 the fact that the bones were those of one human
23 being, that the forensic dental information
24 identified the human being as being the victim in
25 this case or that the -- I think that Dr. Fairgrieve

1 said something about the effect that as if it had
2 been like an intact skeleton that was just burned in
3 one place and stayed there, perhaps he could tell
4 where it was burned.

5 ATTORNEY STRANG: Now, the Court is going
6 to the point. A core point of Dr. Fairgrieve's
7 opinion is that we will never know where this body
8 was burned because of the manner in which the
9 recovery was undertaken. The absence of photographs
10 and the absence of the careful approach to the
11 recovery.

12 And he described what a proper recovery
13 approach would have been in the view of -- in his
14 own view as a forensic anthropologist. And as he
15 said, we don't know. One of the reasons we don't
16 know, and will never know, in his view, where the
17 body was burned, is because of the manner of
18 recovery.

19 Now that can cut both ways. But it's an
20 issue material to guilt or innocence. That is,
21 it is quite possible to hypothesize that, had the
22 recovery been done properly here, Dr. Fairgrieve
23 or Dr. Eisenberg would have been able to give a
24 professional opinion, to a reasonable degree of
25 certainty within the field of anthropology, that

1 the area behind Steven's garage was not the site
2 on which this body was burned, originally.

3 That clearly would suggest, it wouldn't
4 be conclusive but it would suggest, Mr. Avery's
5 innocence. Since it's a lot less likely that he
6 would have brought bones to a place more closely
7 associated with him, if he had burned them at a
8 more distant place.

9 It's also possible that a better
10 recovery would have allowed one or both of those
11 experts to conclude that the area behind
12 Mr. Avery's garage was, in their professional
13 opinion, the site of the cremation or
14 incineration. That would have tended to
15 strengthen the State's argument for guilt for the
16 reasons conversed as those I just suggested.

17 But either way, it's material to guilt
18 or innocence. And because we don't know and
19 because the recovery was the State's effort here,
20 the adverse inference should be available,
21 although, of course, not forced on the jury.

22 THE COURT: Mr. Fallon.

23 ATTORNEY FALLON: Thank you. I couldn't
24 agree -- disagree more with counsel, and I come up
25 with at least six reasons why this instruction

1 should not be given. First of all, counsel says,
2 well, we don't know where the other 60 percent of
3 the remains are. Well, that may be true, but it
4 seems to me the most logical, the most plausible,
5 the most reasonable explanation is that they were
6 consumed in the fire.

7 Secondly, Dr. Eisenberg did testify, and
8 this is uncontroverted because Dr. Fairgrieve
9 didn't bother to look at the bones. And she
10 found no evidence of breakage, spoliation, or
11 damage to those bones, after they were exposed to
12 the fire.

13 Third, the manner of recovery, counsel
14 cites, would lead one to logically infer that
15 this instruction should be given. But there's
16 another explanation as to why the remains were
17 found the way they were and why such an opinion
18 that counsel wishes could have been expressed,
19 may not have been able to be expressed, in any
20 event. And that is, the manner of recovery
21 should be juxtaposed with the manner of
22 incineration.

23 The State's theory is correct and
24 accepted by the jury. It wouldn't have mattered
25 if that was a funeral pyre which was being

1 attended to, where its fuel load was constantly
2 being adjusted and that the remains of the person
3 in the fire were constantly stirred up and
4 exposed to the heat, flame and temperatures, such
5 that we only have 40 percent, roughly, of the
6 remains. So there are plenty of plausible
7 explanations which support the theory that it
8 would not have mattered.

9 Finally, third, reference to a witness'
10 testimony is excluded offers us no help
11 whatsoever.

12 Fourth, the **Neumann** standard clearly
13 states that spoliation inference instruction
14 should not be given in the absence of clear,
15 satisfactory, and convincing evidence that the
16 party intentionally, deliberately destroyed
17 evidence, mere negligence does not suffice. And
18 on that standard, we're woefully short.

19 And, finally, there is the common sense
20 argument for rejection of this and it is also
21 based on the evidence in the trial. Is it not
22 more likely that that was the place of Teresa
23 Halbach's final remains, when it is but a few
24 feet away from the spot where she was last seen
25 alive? So for all those reasons, we think the

1 spoliation instruction must be rejected out of
2 hand. Thank you.

3 THE COURT: All right. I'm sure there can
4 be situations when a instruction such as that
5 proposed by the defense would be appropriate. I
6 believe that that's a logical reading of the stated
7 **Neumann** case cited by defense counsel in support of
8 the request. That case, which the Court read, was a
9 situation where an individual admitted that he
10 deliberately destroyed relevant evidence;
11 specifically, a gun and a suicide note, I believe.

12 In this case, the Court doesn't find --
13 there may be a question as to whether or not the
14 collection of the relevant -- collection of the
15 evidence was done negligently. I believe that
16 would be a fair characterization of what
17 Dr. Fairgrieve testified, that he felt he would
18 have done it more carefully.

19 But I don't think that there's any
20 interpretation of the evidence, that the Court
21 can see, where it was done deliberately, with an
22 intention to destroy evidence, or render its
23 value meaningless. At the time, the
24 representatives of the State thought they had
25 evidence that they -- that was helpful to them,

1 that they would want to preserve.

2 Whether they took steps that were most
3 effective in preserving the evidence may be
4 subject to doubt. But I haven't heard anything
5 really that their motivations were subject to
6 doubt, which is that they were trying to preserve
7 evidence.

8 Their people did not -- on the scene,
9 did not, perhaps, have the training of
10 Dr. Fairgrieve. But I'm simply not aware of any
11 facts that would amount to either intentional
12 expolia -- destruction of evidence, bad faith
13 actions on the part of the State, whatever the
14 standard might be, that would justify giving an
15 instruction such as the one provided, and the
16 Court is not going to give it. So that requested
17 instruction is denied.

18 ATTORNEY STRANG: The next instruction is
19 defendant's proposed Instruction No. 8, this
20 concerns prior inconsistent sworn statements. I
21 think the Court ought, at a minimum, give this jury
22 some instruction on prior inconsistent statements.
23 It readily could be appended to Pattern Instruction
24 300 on the credibility of witnesses, wouldn't have
25 to stand alone.

1 But it's odd, that in this state,
2 although Pattern Instruction 300 gives a number
3 of different considerations that a jury
4 specifically ought give the witness, the concept
5 of changing one's story, of making an
6 inconsistent earlier statement, is omitted from
7 that, and I think that's a significant omission.

8 We have at least two rules of evidence
9 that I can think of off the top of my head,
10 Section 906.13 of the Wisconsin Statutes and
11 Section 908.01(4)(a), that are addressed
12 specifically to prior inconsistent statements.
13 These are understood, at least by lawyers, to
14 bear on the credibility of witnesses.

15 And we ought to let jurors in on that
16 secret and tell them, specifically, that they can
17 consider a witness' prior inconsistent statement
18 in weighing the credibility of the witness. It
19 matters here. I don't know of any witness whose
20 credibility is more central, both to the defense
21 that Mr. Avery has presented, and to the State's
22 response, than Lieutenant James Lenk.

23 Of course, the credibility of every
24 witness is important, but he may be first among
25 equals, or close to that, in this case. And I

1 can't imagine I would get serious argument from
2 the State about the importance of both sides
3 attached to Lieutenant Lenk and Sergeant Colborn
4 here.

5 And Lieutenant Lenk was shown to have
6 made materially different statements, under oath,
7 than he made on the same topic here at trial.
8 And he was, in fact, impeached on
9 cross-examination, with two prior sworn
10 statements, that I think a jury could find are
11 materially inconsistent with his testimony on
12 direct examination on the question of, when did
13 he arrive at the Avery property on November 5,
14 2005. This jury should be told, specifically,
15 that it can consider those prior inconsistent
16 sworn statements in weighing his testimony.

17 Now, I will readily offer to accept a
18 broader statement of prior inconsistent
19 statements. Indeed, I would accept a
20 modification that removed the reference to sworn
21 statements, or remove the reference to any
22 witness by name, as a less favorite alternative,
23 to get some instruction that treats the topic of
24 prior inconsistent statements.

25 There certainly were other witnesses who

1 were impeached here with prior inconsistent
2 statements, albeit unsworn. Scott Tadych comes
3 to mind. Blaine Dassey comes to mind. Bobby
4 Dassey may have been, my memory doesn't serve me
5 entirely at the moment on that. And there may be
6 others that I'm not thinking about at all. But I
7 know it was not just Lieutenant Lenk. What made
8 him different is, I believe he is the only
9 witness who was impeached by a prior sworn
10 statement.

11 I could live without that, if -- if the
12 Court wanted to broaden the concept, because the
13 basic concept of considering credibility in the
14 light of whether someone changes his story, goes
15 beyond whether the statement is sworn or not.
16 It's important enough that it ought to be
17 addressed for the jury in considering
18 credibility.

19 I think there's no question about the
20 legal accuracy of defendant's proposed
21 Instruction No. 8. I also think that Pattern
22 Instruction 300 does not adequately cover the
23 topic and no other instruction really comes
24 close. So I do seek something like defendant's
25 proposed Instruction No. 8.

1 THE COURT: Mr. Fallon.

2 ATTORNEY FALLON: Much like a previous
3 offered instruction, our argument with this
4 instruction is that it is unnecessary and adequately
5 covered elsewhere in the instructions. And even
6 with concessions that counsel is prepared to make
7 with respect to identifying the persons who gave
8 inconsistent statements at trial, the instruction as
9 proposed still is unnecessary.

10 We disagree with counsel that the
11 Pattern Instruction 300 is not adequate; 300 has
12 several points which I think are -- directly bear
13 upon this situation. Although it did not
14 expressly mention a prior inconsistent statement.

15 But just taking, for example, the focus
16 that the defense has chosen to place on
17 Lieutenant Lenk and Sergeant Colborn, just for
18 instance. One, the first issue under 300 is
19 whether the witness has an interest or lack of
20 interest in the result of the trial.

21 The third, the clearness or lack of
22 clearness of the witness' recollection. The
23 apparent intelligence of the witness, the bias or
24 prejudice, if any, that a witness shows.
25 Possible motives for falsifying testimony.

1 And, finally, all other facts and
2 circumstances during the trial, which tend either
3 to support or to discredit the testimony. And I
4 think through the years lawyers have made a
5 living out of attempting, and sometimes on
6 occasion, successfully, discrediting witnesses
7 based on inconsistent statements.

8 And, again, there's nothing that
9 precludes the defense from arguing vigorously
10 that because Lieutenant Lenk said, in an earlier
11 proceeding this past summer, that his
12 recollection was that he arrived at the scene at
13 6:00, and it turns out, in reality, after
14 checking all the pay logs and records and
15 whatnot, he arrived on the scene somewhere around
16 2:00; defense is certainly free to argue with
17 that inconsistency, whether under oath or not.
18 Falls within one of those parameters that the
19 jurors are instructed on.

20 So I think for that reason, coupled with
21 the fact that the other authorities cited by the
22 defense; 906.13, 908.01, *Vogel vs. State*, all
23 they simply stand for is the proposition that
24 prior inconsistent statements are, or may be,
25 considered independent substantive evidence.

1 Counsel says, well, we should let the jury in on
2 that little lawyer secret.

3 Well, the reality is, there is no point
4 to it. Because if they were not independent
5 substantive evidence then we would not be able to
6 get up and argue in front of the jury the
7 significance of those statements, and as such,
8 the instruction is unnecessary. Thank you.

9 THE COURT: Anything else, Mr. Strang?

10 ATTORNEY STRANG: I think I would be
11 repeating myself.

12 THE COURT: All right. Well, we went over
13 most everything this morning, but there's a reason
14 why we have a formal instruction conference. As I
15 listen to the parties I am very uncomfortable with
16 giving an independent instruction on this issue,
17 because I think it draws undue attention to it.

18 For example, I'm not sure that -- I
19 don't think it's more important than some of the
20 other bulleted items listed in Instruction 300.
21 But I think it may be reasonable to add a bullet,
22 another bullet, to 300 that does not draw
23 attention to it, but at least lets the jurors
24 know they can consider it.

25 What I would suggest is another bullet

1 in 300 that allows the jury to consider the
2 consistency or inconsistency with any prior
3 statements of the witness. If I look at the
4 testimony of the witnesses who were questioned on
5 inconsistent prior statements, and that's not
6 limited to Mr. Lenk, as the parties indicate,
7 there's others. And in many cases their
8 testimony was consistent with what they said
9 previously and in some cases, on some elements,
10 inconsistent.

11 The comments in former Instruction 320
12 (a) suggest a separate instruction is not
13 required because of the fact the jury is allowed
14 to consider it. But I think it might be
15 worthwhile clarifying to the jury the right -- or
16 the fact that they can consider it. So that's my
17 suggestion.

18 ATTORNEY STRANG: And I said that I would
19 accept that suggestion and I do.

20 THE COURT: And I'm indicating consistency
21 as well as inconsistency.

22 ATTORNEY STRANG: I accept the suggestion.
23 And if the Court adds that bullet point, I will
24 consider No. 8 modified and I will withdraw anything
25 more from it.

1 THE COURT: Mr. Fallon, any comment from
2 the State?

3 ATTORNEY FALLON: We need a minute, Judge.
4 If you are going to do this I think it has direct
5 bearing on perhaps 180 and we want to talk about
6 that amongst ourselves. What was the language you
7 were considering, Judge?

8 THE COURT: Actually, I'm going to preface
9 it with the following, so it will read as follows:
10 The degree of consistency, or inconsistency, with
11 any prior statements of the witness.

12 ATTORNEY FALLON: If the Court is
13 contemplating that amendment to 300, then it seems
14 to me -- Well, does that apply to what we have are
15 inconsistent representations of statements made by
16 the defendant and does that then entitle the State
17 to argue same. It seems to me -- I realize he did
18 not appear as a witness, but there are a couple of
19 statements, and we're thinking primarily of the
20 statement to Sergeant Colborn and then a statement
21 elicited by the defense in the beginning of the
22 trial to Mr. -- is it Pearce -- Beach, Mr. Beach and
23 there is an inconsistency there. So what --

24 THE COURT: You have the better of me here,
25 I don't have it in my head exactly what statement

1 you are talking about or what the content was.

2 ATTORNEY FALLON: The extent of the contact
3 between the defendant and Teresa Halbach. There's
4 two different versions attributed to the defendant.

5 THE COURT: Mr. Strang.

6 ATTORNEY STRANG: I'm interested in
7 hearing -- I remember generally the testimony of the
8 two men, Beach was the last witness on the first day
9 of testimony and, of course, Colborn came later, but
10 I'm interested in hearing more since I can't
11 remember exactly what the inconsistency was.

12 THE COURT: What's the State's recollection
13 of what was said?

14 ATTORNEY FALLON: Beach basically said that
15 she -- the statement of the defendant was that she
16 was here, took a picture, left, went down the road
17 and turned left, or words to that affect. And,
18 then, I left out one, 447 --

19 ATTORNEY STRANG: Right.

20 ATTORNEY FALLON: -- which is now that we
21 know what all the evidence is, that's an interesting
22 rendition of the facts, but I will set that aside.
23 Then you have Sergeant Colborn's visit, I believe,
24 on the night of the 3rd?

25 ATTORNEY STRANG: Yes, Thursday, the 3rd, 7

1 or 7:30 in the evening, something like that.

2 ATTORNEY FALLON: And his explanation is is
3 there's more contact, other than she came, took a
4 picture, and left. And there's a brief discussion,
5 she was paid. So does that very same proviso for
6 credibility, if you're going to put that bullet in
7 for the general instructions, does it go in for
8 statements of the defendant?

9 ATTORNEY STRANG: Well, I mean I have got
10 to be -- Court's entitled to some intellectual
11 honesty here and the fact is that the answer is yes,
12 in that, you know, if an out of court declarant
13 statement is admitted, under 908.05, it may be
14 impeached or supported, as if the person had
15 testified.

16 Now, with a defendant, there's, of
17 course, a constitutional overlay here, because he
18 wasn't a witness in the sense that the jury would
19 understand that term at the trial and he has a
20 right not to testify and his silence can't be
21 considered against him. So the State would be
22 well advised to be very, very careful about how
23 it argues his earlier statements, in part,
24 because as I understand, the State has agreed not
25 to refer in argument to a statement to which

1 Detective Remiker testified and another alleged
2 statement to which Bobby Dassey testified.

3 But, here, the statements to
4 Mr. Colborn, alleged statements to Mr. Colborn,
5 the alleged statements to Mr. Beach, are
6 statements that were disclosed and that the State
7 properly can argue, if the State has not agreed
8 not to argue those two statements. There's no
9 reason the State would have to agree not to argue
10 them.

11 And if the State sees inconsistencies,
12 as a matter of intellectual honesty, it's
13 entitled to draw the jury's attention to those,
14 even though the defendant is the alleged speaker.
15 But the State also has to be very careful not to
16 run afoul of **Doyle**, or **Griffin**, or commenting on
17 a defendant's silence and decision not to testify
18 at trial.

19 So there's room for the argument, 908.05
20 would suggest that, to the extent Mr. Avery is an
21 out of court declarant, whose statements are
22 admitted, for purposes of credibility in -- at
23 least in some ways, treated like other witnesses.
24 There's room, the instruction would apply, and
25 it's just treacherous territory. And that's --

1 that's all I'm saying.

2 And I will add on this, that lest anyone
3 think I have completely taken leave of my senses,
4 the reason I so readily agreed to adding the term
5 consistency, as the Court proposed, is that there
6 is an evidentiary basis for that.

7 Prior consistent statements are treated
8 different -- differently under the rules of
9 evidence, than prior inconsistent statements.
10 But, at least one witness, Lisa Buchner, had her
11 credibility bolstered again by the introduction
12 of prior consistent statements, through Detective
13 Wiegert -- Investigator Wiegert. So there's an
14 evidentiary basis for adding the term consistency
15 and that's why I agree to it and I continue to
16 agree to it. I mean I hope that helps.

17 THE COURT: Let me -- Let me suggest this,
18 first of all, I'm going to take the words, the
19 degree of, out of there. I didn't insert them the
20 first time and as I'm thinking about it I'm not
21 comfortable with those.

22 ATTORNEY STRANG: That's fine.

23 THE COURT: What if -- So in 300 I add a
24 bullet for consistency or inconsistency with any
25 prior statements of the witness; and in 180, add a

1 bullet that says consistency or inconsistency with
2 any other statements of the defendant.

3 ATTORNEY FALLON: That's fine.

4 THE COURT: Does that do the job for both
5 parties?

6 ATTORNEY STRANG: Sure. I think that's --
7 again, I will stand on what I just said, about what
8 the perils are, for the State, in making the
9 argument and there would be perils for us in making
10 the argument, too, in opening the door on comment
11 about Mr. Avery's statements or lack of statements.
12 But with those qualifications, that's acceptable.

13 THE COURT: All right. And, obviously --
14 So it will read consistency or inconsistency with
15 any other statements of the defendant. And
16 obviously, there, statements of the defendant,
17 refers to statements of the defendant that were
18 admitted into evidence at this trial, with the
19 understanding there will be no comment on the fact
20 the defendant didn't give other statements at the
21 trial. I'm sure all of you are aware of that.

22 All right. Mr. Strang does that
23 address, then, I think the No. 9 was the theory
24 of defense instruction, which I believe has been
25 addressed; does that --

1 ATTORNEY STRANG: I have already addressed
2 it and only one remains, which I did not submit in
3 writing. It was an issue I raised briefly in
4 chambers this morning, concerns the State's
5 cross-examination of Dr. Fairgrieve. And the
6 background is this, the State was pursuing what I
7 thought was a perfectly appropriate line of
8 cross-examination of Dr. Fairgrieve on the fact that
9 he did not prepare a report.

10 In the main, Mr. Fallon's questions were
11 unobjectionable and they were good
12 cross-examination. One question, and it was the
13 last question that he asked in this area, before
14 moving on, but one of the questions, I thought,
15 crossed the line. And I had the court reporter
16 prepare just a very brief excerpt of that
17 question and the answer only, which I will read.
18 The question was:

19 Question: And that's so when the
20 gentleman who happens to be on the other side of
21 the prosecution by the Crown, so that they would
22 have fair notice of exactly what opinions you
23 were going to express so they would know what
24 they were?

25 Answer: Yes.

1 I did not object at the time. I
2 decided, at the time -- First of all, I was slow
3 on the uptake. It seemed like it crossed a line
4 to me. I wasn't as quick as I should have been
5 in articulating, to myself, the reason that
6 crossed the line. I did not object at the time.

7 Rather, at the next break, I raised the
8 issue informally with Mr. Fallon. I think I
9 probably even told him I was going to ask the
10 court reporter to read back that testimony to me
11 or prepare a short excerpt, because I could not
12 remember exactly what Mr. Fallon had said, that
13 had rubbed me wrong.

14 The court reporter did prepare the short
15 excerpt I just read, a little later. I raised
16 this informally in chambers, and I don't even
17 remember when, but it was well after
18 Dr. Fairgrieve was off the stand by that time.
19 And the problem is, the suggestion that we did
20 not give the State fair notice of
21 Dr. Fairgrieve's opinion.

22 We did. We complied with Section
23 971.23 -- well, whatever the provision is that
24 requires the defense to give notice of expert
25 opinions. It's true that we didn't give a

1 report, to the State, from Dr. Fairgrieve. But
2 we're not required to do that under the discovery
3 statute. That's one of two options.

4 We chose the second option, which was to
5 provide a summary of it, his expert opinion and
6 its basis. We also provided his curriculum
7 vitae. The State objected to the adequacy of our
8 notice. The Court directed us to provide some
9 further, more specific notice of Dr. Fairgrieve's
10 opinion. And we did that. Once we amended our
11 notice of his opinion, there was no further
12 complaint from the State. And I think our
13 discovery obligation was met and, therefore, as a
14 matter of law, there was fair notice of his
15 opinion.

16 Now, again, the fact -- the mere fact
17 that he didn't prepare a report is a fair subject
18 for cross-examination. And the questions
19 immediately preceding the question I quoted
20 today, were unobjectionable, in my view. But I
21 had no strategic reason for not objecting.

22 Indeed, I knew at the time it was a
23 problem. If my -- if my manner of handling it
24 was a waiver, then, it was a waiver without a
25 reason, without a strategic choice, or a -- or a

1 good -- a good reason on which I could defend my
2 waiver. And the intention, as I told folks off
3 the record, which doesn't count, I understand,
4 was to seek a brief curative instruction, not
5 make a terribly big deal out of it, but I thought
6 it was worth a curative instruction. I still do.

7 At this point, I think the curative
8 instruction should not refer to -- or need not
9 refer to Dr. Fairgrieve, or even to the State.
10 There's no need to scold at this point. A
11 curative instruction could be that, you know,
12 something to the effect that both parties
13 provided adequate notice, as required by law, or
14 fair notice as required by Wisconsin law, the
15 opinions of their experts, wouldn't have to be
16 anything fancier than that.

17 And I asked the Court to give, somewhere
18 in the final instructions, a curative instruction
19 along those lines. I also asked the Court forbid
20 a State argument that it was not given fair
21 notice of Dr. Fairgrieve's opinions. I think it
22 was. I think we complied with the discovery
23 statute in that respect.

24 THE COURT: Mr. Fallon.

25 ATTORNEY FALLON: Thank you. Much ado

1 about little. As counsel acknowledges, the
2 questioning and cross-examination was clearly
3 appropriate, the point simply being that
4 Dr. Fairgrieve, who at every point in the past in
5 his career had issued a report, did you issue a
6 report in this case. That's fair cross-examination,
7 nothing to apologize for.

8 This -- Every now and again, as a
9 prosecutor, we're entitled to throw a net or a
10 lifeline to counsel. I don't see his need to
11 fall on the sword here, or accept some kind of
12 reprimand from who may review this case in the
13 future. It's entirely unnecessary.

14 Again, the sole point is that he always
15 writes a report, but he didn't write a report in
16 this case, fair cross-examination.

17 The other way of looking at this --
18 because that's all that was intended by the
19 question, by the way. Another way of looking at
20 this is that, as counsel aptly noted, they have
21 two ways of complying with the provisions. One,
22 was to write a report, one is to give a summary.
23 They chose a summary.

24 Don't beat yourself up now or second
25 guess your selection, your choice, they chose a

1 summary, not a report. Doesn't mean I can't ask
2 the question, that you always wrote a report
3 every other time in the past, but you didn't
4 write one here.

5 So, again, he's saying a waiver without
6 knowledge, a waiver without strategic reason;
7 that's not true. It had already occurred. It
8 occurred back in January when the original report
9 was submitted. So for that context, the State
10 does not intend to argue that we didn't have
11 notice.

12 Although, I would note, inferentially,
13 and I still do, that the amended disclosure
14 contained an opinion which was different than the
15 opinion rendered on the stand regarding the
16 possibility of the burn barrel being the primary
17 burn location. So, for what that's worth, they
18 were different.

19 But the intent of the argument that the
20 State will make is simply that he always writes a
21 report and he didn't write a report this time.
22 That's the point of the question. And they had
23 the opportunity to choose, as I said, summary or
24 report. They chose summary, but that's their
25 right. So I don't think -- There's much ado

1 about nothing.

2 ATTORNEY STRANG: Well, I do need to be
3 heard in reply, because as I conceded, the general
4 line of questioning, cross-examination, was
5 appropriate. And if the questioning had stopped
6 where Mr. Fallon says he meant to stop, or with the
7 point he says he meant to make, it would have been
8 appropriate. If this had stopped with, so you
9 always write a report, this is the first time in
10 your career you haven't written a report. Fine,
11 unobjectionable.

12 This question went the next step. It
13 went farther. It was, you know, by not writing a
14 report, then, in essence, there is not fair
15 notice of exactly what opinions you were going to
16 express to the counsel for the other side, so
17 that they would know what they were. And I won't
18 reread this, I'm paraphrasing it, but I read
19 verbatim, the final question. And that -- the
20 implication that there was --

21 THE COURT: Read it verbatim again.

22 ATTORNEY STRANG: Sure.

23 Question: And here now I wish I had
24 gotten the preceding question, but it was -- I
25 think the preceding question probably was what

1 Mr. Fallon said, which is, this is the first time
2 you have not written a report, something like
3 that.

4 So the question in issue begins:

5 Question: And that's so when the
6 gentleman who happens to be on the other side of
7 the prosecution by the Crown, so that they would
8 have fair notice of exactly what opinions you
9 were going to express so they would know what
10 they were?

11 Answer: Yes.

12 I will give it to the Court. Now, did
13 Mr. Fallon mean to do anything wrong? No, he was
14 pursuing a fair line of questioning. He went one
15 question too far in my view. It's a slip of the
16 tongue. It happens in the heat of battle. Lord
17 knows in cross-examination I have asked one
18 question too many at various points. But this
19 was objectionable and I missed it. I didn't make
20 timely objection.

21 THE COURT: All right. Here's what I'm
22 going to do. If -- As I understand it, Mr. Fallon,
23 your point was not that you didn't get some
24 discovery in this case that you were supposed to
25 get, but rather that he always prepares a report in

1 all his other cases, but he didn't in this one.

2 ATTORNEY FALLON: That was the intent and
3 the focus of the question. And it wasn't until
4 afterwards that I gave some thought about the fact
5 that the amended disclosure held one opinion that
6 was different. But like I said, you already ruled
7 on that matter, so.

8 THE COURT: Let me ask this, do you intend
9 to make reference in your closing to the fact that,
10 not that you didn't get a report that you should
11 have gotten, but to the fact that it's significant
12 he did not prepare a report in this case.

13 Here's the -- I'm not precluding you
14 from doing that. All I'm saying, let me get to
15 the point. If you say something like that in
16 your closing, you will have to add, and let the
17 jury know, something to the effect, I'm not
18 saying we didn't get a report that we should have
19 gotten, but it's significant he didn't prepare a
20 report. Do you understand?

21 ATTORNEY FALLON: Right. Maybe we're just
22 coming at it from different angles. Our argument is
23 not that we didn't have notice, the argument we want
24 to make. The argument is, he didn't write a report.

25 THE COURT: Okay. I'm only saying that, if

1 you choose to point that out to the jury --

2 ATTORNEY FALLON: We have an obligation, I
3 see what you are saying.

4 THE COURT: And I think that addresses, Mr.
5 Strang, your concern, because you have acknowledged
6 that he was entitled to show the jury that the
7 witness usually prepared a report but did not here.

8 ATTORNEY STRANG: Yes.

9 THE COURT: As long as there's not an
10 implication that somehow the State didn't get
11 something to which it should have been entitled.

12 ATTORNEY STRANG: As long as there's no
13 implication that the State did not get fair notice,
14 which is what the question implied. And I would
15 like that cured, and it can be cured in a general
16 way.

17 THE COURT: I'm not -- I don't view it as a
18 significant part of, you know, the many weeks and
19 exhibits worth of evidence that came in in this
20 trial. I don't think it warrants its own
21 instruction, but I will caution the State that if it
22 raises that issue in any fashion in closing, that --
23 that it reference the fact that the State is not
24 claiming that it didn't get some notice it should
25 have gotten. Before we leave jury instructions, I

1 don't recall if I have asked the parties on the
2 record if the verdict forms are acceptable.

3 ATTORNEY FALLON: They are to the State.

4 ATTORNEY STRANG: Yes.

5 THE COURT: All right. I will make the --
6 the modifications in 300 and 180, that were placed
7 on the record. Otherwise, I will leave the jury
8 instructions as they were submitted to you today,
9 with the exception of removing the red lining.
10 Other than the defense requested instructions that
11 the Court has already been denied, does that resolve
12 the issue on instructions?

13 ATTORNEY STRANG: Yes.

14 ATTORNEY FALLON: Yes.

15 THE COURT: Before we break, Mr. Strang, I
16 understand you wish to ask the Court to reconsider a
17 previous motion made by the defense concerning the
18 request to excuse a juror.

19 ATTORNEY STRANG: I do. I will not name
20 the juror, but this is the juror we have discussed
21 before, who previously served on a civil jury, in a
22 lawsuit brought by a witness here. And I think I
23 can name the witness without disclosing too much.
24 The witness was Lieutenant -- I'm sorry, Detective
25 David Remiker of the Manitowoc County Sheriff's

1 Office.

2 As I understand, some years ago, it's a
3 1999 civil lawsuit, Detective Remiker sought some
4 compensation for injuries he alleged in
5 connection with an automobile accident. And our
6 juror sat as a juror at the trial of that civil
7 action. She was among those who voted for the
8 jury verdict in that case.

9 And I don't -- I didn't look here to see
10 whether that was a unanimous civil verdict, or a
11 5/6ths civil verdict. But my recollection is
12 that when she was questioned about it, she
13 acknowledged that she voted either with all the
14 other jurors or with the majority that determined
15 the verdict in the case.

16 We went back to -- Not -- Not -- I
17 shouldn't say we, that's a royal we. Mr. Buting
18 and I asked our defense investigator, who is not
19 a lawyer, to go look at the file in the earlier
20 civil case, and he did that.

21 Copied the Summons and Complaint, gave
22 us copies of the minutes from at least some of
23 the days of the trial and the special verdict
24 form. And, then, also copied an excerpt of
25 testimony from one witness. I think she -- a

1 medical doctor who testified for the plaintiff,
2 Detective Remiker.

3 And that's why I asked the Court
4 yesterday to obtain the entire file in
5 Mr. Remiker's case and bring it here so the
6 parties could look at it. The Court did that,
7 the box is in chambers. It's about the size of a
8 box of 10 girl scout cookie boxes that I got
9 recently in the mail.

10 And I flipped through it. I don't know
11 whether counsel for the State have availed
12 themselves of that opportunity, but the Court was
13 kind enough to obtain the file and it's in
14 chambers. Here's what appears, at my glance
15 through.

16 The defense that the insurance company
17 or the other -- the driver, who apparently caused
18 the accident in that case, presented to the jury,
19 was that Detective Remiker was malingering and
20 ought not be compensated, or ought not, at least,
21 obtain the full compensation that he sought. And
22 it looks to me, again, at a cursory glance, like
23 much of the trial was fought over whether
24 Detective Remiker was malingering or not, about
25 the lower back injury that he described.

1 In that sense, his credibility was
2 critically at issue. And this is -- this is just
3 a real nice tight example of that. And I'm
4 reading from pages 11 and 12 of the testimony of
5 the -- a plaintiff's expert, Dr. Diana Lamps,
6 L-a-m-p-s-a. This is a partial transcript of
7 proceedings in the civil case. Beginning at
8 line 10 on page 11 of the partial transcript:

9 Question: Do you understand that
10 Dr. Dahl, D-a-h-l, at one point in his statement
11 of opinions, used the term malingerer to refer to
12 Mr. Remiker?

13 Answer: Yes.

14 Question: Would you describe or define,
15 for the jury, what's meant by that term?

16 Answer: Well, malingering is basically
17 lying. Malingering is basically lying for
18 specific result, like a person might malingering if
19 they are lying to get out of work, or if they are
20 lying to get money in a court settlement, you
21 know, making up symptoms, or exaggerating
22 physical symptoms for a specific gain. It's a
23 specific kind of lying.

24 Question: Can everyone hear Dr. Lamps?
25 I think everyone is comfortable with your voice

1 level there.

2 Answer: Okay.

3 Question: Do you believe that
4 Mr. Remiker is a malingerer?

5 Answer: No, the kinds of comments I
6 just made a couple minutes ago, I described
7 somebody who is absolutely opposite of a
8 malingerer. He's, you know, very straight
9 forward, straight shooter, just an honest kind of
10 job, kind of guy, my impression. Likes sports.
11 Likes, you know, to me, the profile -- I can't
12 remember if he was a boy scout or not, but the
13 kind of guy who's in the boy scouts and mom and
14 apple pies, totally a straight character. So
15 nothing like that.

16 And evidently Dr. Dahl, was the defense
17 medical expert in that case, and that's what I
18 get from the context. So that, it looks to me,
19 is like -- like a large part of the trial issue
20 was Detective Remiker's credibility. Clearly,
21 when the jury returned a verdict of over
22 \$170,000, that credibility determination was
23 resolved in Detective Remiker's favor. And this
24 juror was part of that credibility determination.

25 So the argument, again, is that, because

1 of the ritual way in which we instruct jurors to
2 decide the credibility of witnesses here, and we
3 have argued this afternoon, at some length, over
4 Pattern Instruction 300, in criminal cases. And
5 what should be added and what should be
6 considered and what's fair game in determining
7 credibility.

8 Because of that ritual way in which we
9 instruct jurors, as judges of the fact -- of the
10 facts, to determine credibility, I think this
11 juror, now, is objectively biased. She's gone
12 through that ritual, that process, as a judge of
13 the facts, once, within the last seven years, as
14 to Detective Remiker.

15 His credibility matters here too. And
16 ought to be considered on the trial record here,
17 just like every other fact ought to be determined
18 on the trial record here, supplemented only by a
19 juror's common sense and experience. Her
20 experience proves this special role that we
21 occasionally ask people to fill, as a judge of
22 the facts, in a lawsuit.

23 And the determination of Detective
24 Remiker's credibility, on a whole different set
25 of facts, was not apparently an incidental issue

1 in the prior case. It's not incidental here
2 either. He's a fairly important witness. I
3 played a clip of him in the opening statement, my
4 opening statement, a clip of a dispatch
5 discussion, that went right to our theory of
6 investigative bias and tunnel vision.

7 He testified here. He offered a
8 statement of the defendant, of which neither the
9 State nor the defense had prior notice. He is
10 one of the people who met with Mr. Avery on
11 November 4. He's with the sheriff's department
12 that we accused as being the source -- of the
13 original source of the bias against Mr. Avery.
14 He was involved actively in the identification
15 and collection of evidence, not just for a week
16 in November, 2005, but again, on March 1 and
17 March 2 of 2006.

18 In fact, I think on this record, he's
19 the only Manitowoc County Sheriff's employee who
20 was actively involved in collecting or
21 identifying evidence in March, 2006, in the
22 search of Mr. Avery's garage. I don't think he
23 was involved at all in the search on the same
24 days in March, 2006, in Mr. Avery's home; that's
25 my recollection of the testimony. But I think he

1 did play a role in the garage. May have been the
2 only Manitowoc officer inside the evidence tape,
3 so to speak, in March of 2006.

4 So the juror did the right thing by
5 bringing the issue to the Court's attention. I
6 will accept, because it's for the Court to
7 decide, from her demeanor and her answers,
8 whether she's subjectively biased and the basis
9 of her prior role with Detective Remiker and
10 knowledge of him.

11 But I think there is objective bias
12 here. This isn't like a casual acquaintance. It
13 isn't like somebody we might size up because we
14 run into them at the grocery store. This is a
15 judgment the juror once has made and I think is
16 unlikely to reconsider.

17 As I noted by a loose analogy the first
18 time I argued this, even with professional
19 judges, judges of the law, when they are wrong in
20 their judgment and a higher court reverses them
21 in this state and sends the case back down,
22 there's enough of a presumption that the judge
23 will be reluctant to reconsider his or her
24 earlier judgments in the role of judge of the
25 law, that the parties are entitled to a

1 substitution, without a showing of prejudice
2 again, on remand, under Wisconsin law.

3 There are in, again, a loosely analogous
4 context, there are United States Supreme Court
5 decisions that consider the question, for
6 example, of vindictive resentencing, after a
7 reversal on appeal and a remand and the defendant
8 gets a higher sentence. There's constitutional
9 law on that, because the Supreme Court recognizes
10 the institutional bias that all of us acquire, in
11 favor of our earlier judgments once thoughtfully
12 rendered.

13 And it's asking a lot to expect a lay
14 person in -- in the special role of judge of the
15 facts, to decide credibility this time, without
16 considering the judgment she made about
17 credibility the last time she was a juror in a
18 case involving Detective Remiker.

19 So I think that's asking too much. It's
20 not reasonable to expect her to be able to do
21 that. I think she's objectively biased here,
22 without casting aspersions on her character, I
23 don't. To the contrary, she was right to raise
24 the issue. She was conscientious to raise the
25 issue. But now that it's out, and now that we

1 know something more about the 1999 civil case
2 involving Detective Remiker, I think she should
3 be relieved of further duties on the grounds of
4 objective bias.

5 THE COURT: Does the State wish to be
6 heard?

7 ATTORNEY FALLON: Yes, thank you. We would
8 oppose the excuse -- the striking for cause or the
9 excuse of this juror. We're going to begin with our
10 presentation with the law. A prospective juror is
11 objectively biased if a reasonable person in the
12 prospective juror's position, objectively, could not
13 judge the case in a fair and impartial manner.
14 That's a citation from *State vs. Mendoza*, 227 Wis.
15 2d, 838, with a citation to *State vs. Erickson*,
16 E-r-i-c-k-s-o-n, at 227 Wis. 2d, 758.

17 In *State vs. Faucher*, at 227 Wis. 2d,
18 700, Supreme Court noted, quote, The circuit
19 court is particularly well-positioned to make a
20 determination of objective bias and it has
21 special competence in this area. It is
22 intimately familiar with the voir dire proceeding
23 and is best situated to reflect upon the
24 prospective juror's subjective state of mind,
25 which is relevant, as well as to the

1 determination of objective bias.

2 Finally, as a backdrop, we ask the Court
3 to once again consider **State vs. Kiernan**,
4 K-i-e-r-n-a-n, at 227 Wis. 2d, 736. And that
5 case was -- dealt with the concept of whether a
6 veteran juror, as it was known at that time,
7 could set aside prior opinions or knowledge in
8 Judge Kiernan's case, solely on the evidence
9 presented at her trial.

10 I think those are the appropriate legal
11 standards. The most recent case on objective
12 bias is **State vs. Dale Smith**, 2006 Wisconsin 74.
13 And that was, I believe, the case of the
14 administrative employee of the District
15 Attorney's Office out in juvenile court sitting
16 as a juror in a felony case in downtown
17 Milwaukee.

18 Those are our legal standards upon which
19 the Court must make a determination of objective
20 bias. Now, let's look at the facts and apply
21 them to the law here. First and foremost, the
22 juror sent a note. The juror is the one who
23 called this matter to the attention of the
24 parties, having recognized Detective Remiker
25 after seeing him testify, and not beforehand.

1 The Court, at the request of the
2 parties, conducted a voir dire of the juror. The
3 juror reported no recollection of that case
4 whatsoever. But when pressed, all that the juror
5 could recall is something about the left lumbar
6 being the focal point of the trial. All that
7 could be recalled was the nature of the injury.

8 The juror could not recall whether
9 Detective Remiker even testified. Could not
10 recall the amount of damages awarded to Detective
11 Remiker. Did recall that he did prevail and that
12 he was awarded some money and she thought perhaps
13 \$100,000. But she could not recall any of the
14 circumstances. She could not recall the length
15 of the trial, or as I already said, the focus of
16 the trial, a trial that occurred six, to possibly
17 seven years before this trial.

18 I think it's apparent and a reasoned
19 inference could be drawn that there have been no
20 contact whatsoever between the juror and
21 Detective Remiker in the intervening years. So
22 applying the standards, then --

23 Oh, there's one other distinction.
24 While we do not diminish the significance, as it
25 were, of Detective Remiker's role in this case,

1 the case against Steven Avery will clearly not
2 rise or fall solely on the basis of the testimony
3 offered by Detective Remiker.

4 Whereas, in contrast, if everything is
5 as counsel represents, and I believe it to be the
6 case, Detective Remiker's role in his own case
7 was far greater, far more significant than this
8 case. And I say that because, then we have to
9 evaluate the fact that that's true. And the
10 juror has no recollection of that.

11 Then, let's take that reasonable juror
12 standard, a juror in this position, a juror who
13 has no memory of those facts or circumstances and
14 were somehow to conclude that she's objectively
15 biased, and as counsel would suggest, in favor of
16 Detective Remiker, because in that case 10, or
17 perhaps 12 other jurors, found his version of the
18 events credible and, thus, awarded him damages
19 for the accident in which he was injured. I
20 think not. There is no basis for that.

21 Then, you couple that fact, with the
22 representation that the prospective juror made,
23 as I recall, during the voir dire. The juror
24 reported that no other juror was aware of the
25 service previously performed. The Court asked,

1 in fact, I believe, instructed the juror, not to
2 advise any of the other jurors in this case of
3 her previous experience with respect to Detective
4 Remiker.

5 All of that, coupled with the fact that
6 this juror came forward on their own, I think
7 it's clearly a reasonable inference that if a
8 problem did develop, if circumstances did come to
9 light, that somehow the great light of memory was
10 revealed to her, the juror would tell us. But we
11 already have the assurance of this juror that
12 that would not affect deliberations in this case,
13 the assurance that that knowledge would not be
14 imparted to any other juror.

15 And this is the subjective component
16 here that counsel alluded to and is reflected in
17 the case law, the Court had the opportunity to
18 assess that juror's credibility. And under all
19 of these circumstances, the Court made a reasoned
20 determination at the time, which we ask the Court
21 to sustain now, is that the juror is not
22 objectively biased or subjectively biased. And
23 we would ask the Court to deny the request.

24 THE COURT: Mr. Strang.

25 ATTORNEY STRANG: In reply, let me -- let

1 me try this. I wouldn't be offering analogies if I
2 had something specifically on point, but I don't
3 think either Mr. Fallon or -- and I know I haven't
4 found anything directly on point. This appears to
5 be a pretty new issue.

6 But let me try this. Let's suppose,
7 instead, that this juror were a high school
8 teacher or a college professor. And when
9 Detective Remiker had walked in and testified,
10 the juror had said, oh, my gosh, I remember now,
11 six or seven years ago he was in my class. He
12 was a student of mine. I had forgotten the name,
13 but I remember the face. He was a student of
14 mine and, you know, now that I think about it, I
15 think I wrote him a letter of recommendation.
16 And the juror tells us that. And we explore and
17 we find out that it was a glowing letter of
18 recommendation.

19 Now, I don't know that I believe this
20 juror here on the issues that go to subjective
21 bias and what she does or doesn't remember, but
22 the Court gets to decide whether or not it
23 believes the juror. And that's why, primarily,
24 I'm relying on objective bias.

25 But let's suppose the Court was

1 satisfied in my example of the teacher/professor
2 who writes the letter of recommendation for the
3 student from six or seven years ago and now
4 remembers. And the Court is not to remember much
5 more than, I wrote him a letter of
6 recommendation.

7 Well, if we dug a little further into
8 the file and we found that it -- not only was it
9 a glowing letter of recommendation -- or letter
10 of recommendation, it was a glowing one. And if
11 we dug further and found that there were people
12 specifically asking the teacher, or the
13 professor, not to write the letter of
14 recommendation, urging upon the teacher the fact
15 that she ought not write a letter of
16 recommendation for this student.

17 I can't imagine that the Court wouldn't
18 find objective bias and excuse the juror. Well,
19 here, by way of analogy, a \$170,000 verdict, in
20 the face of opposition by the defense in this
21 case, is a pretty glowing letter of
22 recommendation. And is a glowing letter of
23 recommendation endorsed by this juror, in spite
24 of, evidently, you know, witnesses and arguments
25 from counsel, that the letter of recommendation,

1 so to speak, the verdict, ought not be delivered.

2 Just, again, setting aside subjective
3 bias, which the Court can judge, objectively,
4 this doesn't look reasonable for the outside
5 person to say, what you ruled for this guy once
6 as a juror and now you are here, supposed to be
7 judging him again, as a matter of his
8 credibility, but on entirely different evidence,
9 and without considering your earlier judgment on
10 his credibility.

11 It doesn't feel reasonable, objectively
12 reasonable. It doesn't look objectively
13 reasonable, I suggest. And it's not so much that
14 I'm worried that the State is depreciating
15 Detective Remiker's role in the trial. It's
16 really, I'm worried, if anything, the State is
17 depreciating the role of the juror.

18 It matters. What she did matters, in
19 the 1999 civil case. That was an important
20 function. She filled it. She filled it on,
21 presumably, the evidence she probably should
22 consider there in deciding his credibility. I
23 don't think we can ask her to set that judgment
24 aside now and to make the judgment anew on a
25 different set of factors entirely. It's just not

1 reasonable to expect that one would be able to do
2 that. And that makes her objectively biased, if
3 not more.

4 THE COURT: All right. The starting point
5 is to take a look at the standards that the Court is
6 to apply when a challenge is made to a juror on the
7 grounds of objective bias. And that is the
8 challenge that the defense is making here this
9 afternoon.

10 The law on the subject was recently
11 restated in the *Smith* case that counsel for the
12 State referred to. It's a quote taken from the
13 *Faucher*, F-a-u-c-h-e-r, case, and sets forth the
14 test as follows:

15 The focus of the inquiry into objective
16 bias is not upon the individual prospective
17 juror's mind, but rather upon whether a reason --
18 a reasonable person, in the individual
19 prospective juror's position, could be impartial.

20 When assessing whether a juror is
21 objectively biased, a circuit court must consider
22 the facts and circumstances surrounding the voir
23 dire and the facts involved in the case.

24 However, the emphasis of this assessment remains
25 on the reasonable person, in light of those facts

1 and circumstances.

2 When a prospective juror is challenged
3 on voir dire because there was some evidence
4 demonstrating that the prospective juror had
5 formed an opinion or prior knowledge, whether the
6 juror should be removed for cause turns on
7 whether a reasonable person in the prospective
8 juror's position could set aside the opinion for
9 prior knowledge.

10 And although this is termed objective
11 bias, rather than subjective, there is something
12 of a subjective component to it. The Court also
13 noted, this I believe is in **Faucher**: The circuit
14 court is particularly well-positioned to make a
15 determination of objective bias, and it has
16 special competence in this area. It is
17 intimately familiar with the voir dire
18 proceeding, and is best situated to reflect upon
19 the prospective juror's subjective state of mind,
20 which is relevant as well to the determination of
21 objective bias.

22 I think what the court is getting at
23 there is the fact that the basis for objective
24 bias is often statements made by the individual
25 juror in question and the court has to make a

1 determination as to the credibility of the juror
2 in that circumstance.

3 The Court has already ruled that the
4 juror in this case is not subjectively biased and
5 I don't understand that to be challenged today.
6 Reviewing the information that she provided when
7 the Court voir dired her earlier in the trial, I
8 will first note that this matter came to the
9 Court's attention at the instigation of this
10 juror.

11 That is, after she saw Mr. Remiker
12 testify, she connected his face with his name,
13 recognized that she had sat on a jury in a civil
14 case in which he was a plaintiff, approximately
15 seven years ago. Didn't feel that it caused her
16 to be biased in any way, but recognized it could
17 be an issue for the Court and brought it to the
18 Court's attention.

19 When I voir dired her, I asked her if
20 she remembered whether he testified in the case,
21 that was one of the first questions that I asked,
22 because it would be directly relevant on the
23 issue of whether or not she was influenced as to
24 his credibility. And she indicated that she did
25 not remember if he testified as a witness in the

1 case. She said that on more than one occasion
2 when I was questioning her.

3 She thought that the trial was
4 approximately a week long. She remembered that
5 it was a civil case and that the defendant -- or
6 the plaintiff was awarded some damages. She
7 indicated, I believe, that she thought it was
8 around a hundred thousand dollars.

9 When I asked her an open ended question
10 about what she remembered about the case, she
11 said, what I remember about it is a lot of
12 discussion about the lower left lumbar of the
13 back and that it involved an accident down on the
14 I-system, with a couple of other vehicles, that's
15 about it. She didn't remember anything about the
16 individual witnesses who testified at the trial.

17 She indicated there was nothing about
18 her experience as a juror in that case that would
19 affect, whatsoever, her service in a juror in
20 this case. And since she didn't remember whether
21 or not Mr. Remiker testified, it wasn't worth
22 asking a question about what affect -- what she
23 thought of his credibility or what affect it
24 might have, because she didn't remember him even
25 testifying in the case.

1 The Court, first of all, with respect to
2 her credibility, finds her to be a very credible
3 individual. It was her own forthrightness that
4 led to the matter coming to the Court's attention
5 in the first place. She indicated she really
6 doesn't remember much about this trial that took
7 place seven years ago; specifically, she doesn't
8 remember not only anything about Mr. Remiker's
9 testimony, if he did testify, but not even
10 whether he did testify.

11 In light of the fact -- I have trouble
12 remembering all of the testimony that took place
13 in the early stages of this case, I certainly
14 can't find that her -- her statement to the Court
15 is unreasonable in any way. I suspect most
16 people would probably be in about the position
17 she was.

18 There's no indication that she had any
19 connection with Mr. Remiker, either before or
20 after the case on which she sat as a juror. So
21 the question, then, comes down to, is a person in
22 this juror's position someone who could not
23 reasonably be expected to be fair and impartial
24 in this case, even if the Court finds that she's
25 not subjectively biased. And the Court concludes

1 that -- I don't think this is a particularly
2 close case. I don't think she's objectively
3 biased at all.

4 I took a look last evening at a number
5 of objective bias cases. The closest one that I
6 actually found, or the most analogous one on the
7 facts, I thought was the **Faucher** case itself, in
8 the sense that it involved the opinion of a juror
9 on the credibility of a witness who was expected
10 to testify at the trial in that case.

11 And during the course of voir dire in
12 that case, the issue came up before the trial
13 started. It was rather obvious that the juror
14 involved held strong opinions concerning Hayes'
15 credibility. And Hayes was a witness.

16 For example, the juror said that, I
17 believe she had been a neighbor of the witness
18 for some time. Her parents were still neighbors
19 of the witness. She indicated on voir dire, I
20 know she's a person of integrity and I know she
21 wouldn't lie. She then agreed with defense
22 counsel's restatement -- I guess it was a him,
23 the juror in that case -- that based upon his
24 knowledge of Ms Hayes as a next door neighbor, he
25 believed she would not lie about anything.

1 There was a lengthy history between the
2 juror and the witness that the juror was
3 acquainted with in that case. And the court
4 found, and I think rightfully so, that if you
5 have got a juror who says I know this person, I
6 know them well, and I know they wouldn't lie,
7 that's not a particularly close case.

8 That's what objective bias is all about.
9 Even though the juror later stated that the juror
10 could put that feeling aside and the appeals
11 court actually upheld the trial court's
12 determination that the juror was not subjectively
13 biased.

14 In this case, the Court believes there
15 are a number of contrasts between the facts in
16 this case and that case. First of all, there was
17 never any type of close relationship between the
18 juror and Mr. Remiker. It's not a case of an
19 acquaintance at school, at work, or any situation
20 where the juror would have had an extensive
21 opportunity to form an opinion about the witness'
22 credibility.

23 Even more significantly is the fact that
24 the one contact took place nearly seven years
25 ago. It's hard for the Court to say that the

1 juror objectively has an opinion of the witness'
2 credibility that she could not be expected to set
3 aside when she doesn't recall if he even
4 testified in the case. There's no -- She doesn't
5 appear to have an opinion as to the witness'
6 credibility that the Court has to ask whether or
7 not the juror could objectively set aside.

8 Let's assume -- If one assumes that she
9 remembered Mr. Remiker, or remembers him
10 testifying, the argument would have to be, that
11 because this juror found Mr. Remiker credible in
12 a civil trial that took place seven years ago,
13 that no person in this juror's position could
14 objectively evaluate Mr. Remiker's testimony in
15 this case.

16 That is, I don't think, even if she did
17 remember his testimony, unless there was some
18 reason why she couldn't set aside an opinion that
19 she was convinced he would never lie, that she
20 would be objectively biased and be forced to
21 leave the jury in this case. But we don't even
22 get to that because I find her testimony to be
23 very credible that she doesn't remember if he
24 testified in that case.

25 It's one thing to pull out a transcript

1 today that's something that a witness said seven
2 years ago at that trial that reflects on
3 Mr. Remiker's testimony, but, objectively, I
4 think most people, over seven years, would not
5 have a specific recollection of that.

6 There may be some people who could, but
7 the Court finds that this juror is not one of
8 those people. And even if there was some
9 recollection, finding that someone was credible
10 on one occasion, doesn't mean that you can never
11 judge their credibility again.

12 I know, as Mr. Strang was speaking, and
13 last evening as I was thinking about this, I was
14 trying to come up with analogies myself. I
15 recognize the fact the Court has -- I see police
16 officers testify on a regular basis, often at
17 suppression hearings, if I make a determination
18 in one hearing that they are credible, I'm not
19 sure that that disqualifies me, for the rest of
20 my judicial career, from evaluating their
21 credibility again at a later hearing.

22 Granted, I'm not a juror, I'm a judge,
23 but if the question is objective bias and I,
24 because I determine them to be credible one time,
25 could never do it again, that would leave the

1 judicial system in tough straits.

2 You know, from my own experience, I have
3 had officers testify in front of me, sometimes I
4 find their testimony credible, sometimes I don't.
5 Doesn't mean that I necessarily think they are
6 lying or not, but you can objectively evaluate
7 credibility in those situations, I believe.

8 And certainly the situation involving
9 this juror doesn't get close to that, because she
10 only had one contact with Mr. Remiker. It was
11 nearly seven years ago, and she doesn't appear to
12 remember much about it. It's a very far cry from
13 all of the other cases in which objective bias
14 has been found.

15 I don't believe there's any evidence
16 here to suggest this juror is objectively biased.

17 And, therefore, the Court is going to, again,
18 find that she should not be removed from this
19 jury, that there's no basis to remove her on the
20 grounds of either subjective or objective bias.

21 Counsel, let's take a 15 minute break
22 and, then, please meet me in chambers.

23 (Proceedings concluded.)

LAURA BARBER 3-7

INSTRUCTIONS 8

CLOSING ARGUMENTS

ATTORNEY KRATZ 31

ATTORNEY BUTING 132

PEREMPTORY STRIKES

TERRI TEMME 227

LAURA BARBER 227

1 (Individual voir dire of Juror Laura Barber.)

2 THE COURT: In a trial like this, whenever
3 the Court gets any information, the Court is
4 obligated to follow it up and that's what we're
5 doing this morning.

6 MS BARBER: Okay.

7 THE COURT: There was a report that was
8 received yesterday, that was passed on to me
9 yesterday, involving a citizen providing information
10 about a juror. And that's what I'm going to be
11 talking to you about.

12 MS BARBER: Okay.

13 THE COURT: The incident happened at the --
14 or reported was at the Manitowoc Eagle's Club on
15 Friday, March 2nd, which would be the Friday before
16 this past Friday.

17 MS BARBER: All right.

18 THE COURT: For a fish fry, I think, in the
19 evening. First, were you there?

20 MS BARBER: Yes, I was.

21 THE COURT: Okay. Can you tell me who you
22 were there with?

23 MS BARBER: My mother and my husband.

24 THE COURT: Okay. And do you know about
25 what time you were there, like from when until when,

1 say approximately?

2 MS BARBER: I'm going to guess 5:30 to
3 9.

4 THE COURT: Okay. During the time that you
5 were there, would you have said anything to anyone
6 that would have given them the impression that you
7 are a juror in this case?

8 MS BARBER: No, I didn't. A lot of
9 them, that I belong to the auxiliary with, knew I
10 was on, but they -- they don't question me about
11 things.

12 THE COURT: Okay.

13 MS BARBER: They do know I am a juror
14 and they make comments like, I wouldn't want to
15 be in your shoes.

16 THE COURT: Okay.

17 MS BARBER: And I just shrug my
18 shoulders and say, I can't say anything.

19 THE COURT: Okay. Was anything said to you
20 or was there any mention that you heard from anyone
21 at the Eagle's Club that evening involving the guilt
22 or innocence of the defendant in this case?

23 MS BARBER: I have to think about that.
24 I don't recall anybody saying something to me
25 because I -- I have my own opinions. I don't

1 want to listen to anybody else. And no matter
2 what they say, I don't listen to them.

3 THE COURT: Okay. Did you discuss the case
4 at the Eagle's Club with anyone that evening?

5 MS BARBER: No, I didn't.

6 THE COURT: Did you give any opinions or
7 say anything about your feelings about the case so
8 far?

9 MS BARBER: No. And that's -- I just
10 refuse to, because I don't -- I don't want
11 somebody telling me what to think.

12 THE COURT: Okay. Can you think of
13 anything that was said or that happened that night
14 that -- that would have led a citizen to report
15 something?

16 MS BARBER: Honestly, I don't. We go
17 for fish. I have a couple old fashions. We sit
18 upstairs in the bar afterward for a couple hours.
19 And I don't -- I don't make it a known thing that
20 this is what I'm doing.

21 THE COURT: Okay. You are saying, though,
22 that there are other -- there were other people
23 there who may have known you were a juror.

24 MS BARBER: Right.

25 THE COURT: And may have said something?

1 MS BARBER: Exactly. I don't know who
2 they were.

3 THE COURT: Okay.

4 MS BARBER: They talk amongst
5 themselves. I really don't listen. I have made
6 it a point that I don't want to have any
7 influence.

8 THE COURT: Okay.

9 MS BARBER: However, you want to take
10 that, that's fine, but I don't -- I don't want
11 somebody telling me how to think. And I have
12 always been that way.

13 THE COURT: Okay. Thank you. I'm going to
14 have you step outside with the sheriff.

15 MS BARBER: Sure.

16 THE COURT: Counsel, anything else that you
17 would like asked?

18 ATTORNEY STRANG: I think I caught this,
19 but we were clear that it was the Manitowoc Eagle's
20 Club?

21 ATTORNEY BUTING: Yes.

22 ATTORNEY STRANG: I thought so, but.

23 THE COURT: Otherwise we'll retreat to
24 chambers.

25 ATTORNEY FALLON: Did you want to ask her

1 point blank the question, it's been pointed out this
2 comment was attributed to someone meeting your
3 description. That's the only question left, if you
4 think you circumstantially have to.

5 ATTORNEY KRATZ: Does she know this woman?
6 But then you out the reporter.

7 THE COURT: I don't think the woman claimed
8 that she knew the juror.

9 ATTORNEY KRATZ: I think we can do this in
10 chambers.

11 THE COURT: All right. Let's go off the
12 record at this time.

13 (Individual voir dire concluded.)

14 (Jury not present.)

15 THE COURT: At this time the Court calls
16 State of Wisconsin vs. Steven Avery, Case No. 05 CF
17 381. We're here today for a continuation of the
18 trial, specifically, final instructions and closing
19 arguments. Will the parties state their appearances
20 for the record, please.

21 ATTORNEY KRATZ: Good morning, Judge. The
22 State of Wisconsin appears by Calumet County
23 District Attorney Ken Kratz. Also Tom Fallon and
24 Norm Gahn, all appearing as Special Prosecutors.

25 ATTORNEY STRANG: Steven Avery appears in

1 person, Jerome Buting and Dean Strang on his behalf.

2 THE COURT: Before we bring in the jury,
3 after the formal instruction conference yesterday
4 afternoon I prepared a proposed final set of jury
5 instructions. I also provided a copy of the final
6 draft to each of the attorney's before we left
7 yesterday. Mr. Kratz, are the instructions as
8 proposed acceptable to the State?

9 ATTORNEY KRATZ: They are, Judge.

10 THE COURT: And, Mr. Strang, subject to the
11 requested instructions of the defense the Court did
12 not give, do they, the instructions as submitted,
13 reflect your understanding?

14 ATTORNEY STRANG: The instructions, as
15 tendered to us this morning, do reflect our
16 understanding of the resolution, the jury
17 instruction conference, and what we understood the
18 Court would say to the jurors.

19 THE COURT: Very well. Does either party
20 have anything else before we bring the jury out?

21 ATTORNEY KRATZ: Not the State, your Honor.

22 ATTORNEY STRANG: (Shakes head negatively.)

23 THE COURT: All right. We'll bring in the
24 jurors at this time.

25 (Jury present.)

1 THE COURT: You may be seated. Members of
2 the jury, at this time the Court is going to read
3 the final instructions to you. We'll then proceed
4 to closing arguments of the parties.

5 Mr. Ward, I'm going to ask you if you
6 can take these instructions and provide one set
7 to each member of the jury.

8 ATTORNEY STRANG: Your Honor, maybe we can
9 have just a very brief side bar.

10 THE COURT: Okay.

11 (Side bar taken.)

12 THE COURT: All right. Members of the jury
13 you may follow along with the Court if you wish.
14 Members of the jury, the Court will now instruct you
15 upon the principles of law which you are to follow
16 in considering the evidence and in reaching your
17 verdict.

18 It is your duty to follow all of these
19 instructions. Regardless of any opinion you may
20 have about what the law is or ought to be, you
21 must base your verdict on the law I give you in
22 these instructions, apply that law to the facts
23 in the case which have been properly proven by
24 the evidence. Consider only the evidence
25 received during this trial and the law as given

1 to you by these instructions, and from these
2 alone, guided by your soundest reason and best
3 judgment, reach your verdict.

4 If any member of the jury has an
5 impression of my opinion as to whether the
6 defendant is guilty or not guilty, disregard that
7 impression entirely and decide the issues of fact
8 solely as you view the evidence. You the jury
9 are the sole judges of the facts and the Court is
10 the judge of the law only.

11 Evidence is, first, the sworn testimony
12 of witnesses, both on direct and
13 cross-examination, regardless of who called the
14 witness.

15 Second, the exhibits the Court has
16 received, whether or not an exhibit goes to the
17 jury room.

18 Third, any facts or testimony to which
19 the lawyers have agreed or stipulated or which
20 the Court has directed you to find.

21 Anything you may have seen or heard
22 outside the courtroom is not evidence. You are
23 to decide the case solely on the evidence offered
24 and received at trial.

25 The defendant in this case is charged

1 with three counts. A fourth count of false
2 imprisonment has been dismissed. The
3 instructions for the three remaining counts have
4 been modified somewhat from the opening
5 instructions given to you at the beginning of the
6 trial to conform to the evidence introduced at
7 trial.

8 The first count of the Information in
9 this case charges that: Steven Avery, on Monday,
10 October, 31, 2005, at 12932 Avery Road, Town of
11 Gibson, Manitowoc, Wisconsin, did cause the death
12 of Teresa M. Halbach, with intent to kill that
13 person, contrary to Section 940.01 (1)(a) of the
14 Wisconsin Statutes.

15 To this charge, the defendant has
16 entered a plea of not guilty, which means the
17 State must prove every element of the offense
18 charged beyond a reasonable doubt.

19 First degree intentional homicide, as
20 defined in Section 940.01 of the Criminal Code of
21 Wisconsin, is committed by one who causes the
22 death of another human being with intent to kill
23 that person or another.

24 Before you may find the defendant guilty
25 of first degree intentional homicide, the State

1 must prove, by evidence which satisfies you,
2 beyond a reasonable doubt, that the following two
3 elements were present:

4 One, the defendant caused the death of
5 Teresa Halbach. Cause means that the defendant's
6 act was a substantial factor in producing the
7 death.

8 Two, the defendant acted with the intent
9 to kill Teresa Halbach.

10 Intent to kill means that the defendant
11 had the mental purpose to take the life of
12 another human being or was aware that his conduct
13 was practically certain to cause the death of
14 another human being.

15 While the law requires that the
16 defendant acted with intent to kill, it does not
17 require that the intent exist for any particular
18 length of time before the act is committed. The
19 act need not be brooded over, considered, or
20 reflected upon for a week, a day, an hour, or
21 even for a minute. There need not be any
22 appreciable time between the formation of the
23 intent and the act. The intent to kill may be
24 formed at any time before the act, including the
25 instant before the act, and must continue to

1 exist at the time of the act.

2 You cannot look into a person's mind to
3 find intent. Intent to kill must be found, if
4 found at all, from the defendant's acts, words,
5 and statements, if any, and from all the facts
6 and circumstances in this case bearing upon
7 intent.

8 Intent should not be confused with
9 motive. While proof of intent is necessary to a
10 conviction, proof of motive is not. Motive
11 refers to a person's reason for doing something.
12 While motive or lack of motive is relevant and
13 may be shown as a circumstance to aid in
14 establishing the guilt or innocence of a
15 defendant, the State is not required to prove
16 motive on the part of a defendant in order to
17 convict. Evidence of motive does not by itself
18 establish guilt. You should give it the weight
19 you believe it deserves under all the
20 circumstances.

21 If you are satisfied, beyond a
22 reasonable doubt, that the defendant caused the
23 death of Teresa Halbach, with the intent to kill,
24 you should find the defendant guilty of first
25 degree intentional homicide.

1 If you are not so satisfied, you must
2 find the defendant not guilty.

3 The second count of the Information
4 charges that: Steven Avery, between Monday,
5 October 31, 2005, and Friday, November 4, 2005,
6 at a 12932 Avery Road, Manitowoc County,
7 Wisconsin, did mutilate, disfigure, or dismember
8 a corpse with the intent to conceal a crime,
9 contrary to Section 940.11 (1), 939.50 (3)((f) of
10 the Wisconsin Statutes.

11 To this charge, the defendant has also
12 entered a plea of not guilty, which means the
13 State must prove every element of the offense
14 charged beyond a reasonable doubt.

15 Mutilating a corpse, as defined in
16 Section 940.11 (1) of the Criminal Code of
17 Wisconsin, is violated by one who mutilates a
18 corpse with intent to conceal a crime or avoid
19 apprehension, prosecution, or conviction for a
20 crime.

21 Before you may find the defendant guilty
22 of this offense, the State must prove, by
23 evidence which satisfies you, beyond a reasonable
24 doubt, that the following two elements were
25 present:

1 One, Steven Avery mutilated the corpse
2 of Teresa Halbach.

3 Two, in mutilating the corpse of Teresa
4 Halbach, Steven Avery acted with the intent to
5 conceal a crime.

6 This requires that the defendant acted
7 with the purpose to conceal a crime.

8 You cannot look into a person's mind to
9 find out intent. Intent must be found, if found
10 at all, from the defendant's acts, words and
11 statements, if any, and from all the facts and
12 circumstances in this case bearing upon intent.

13 If you are satisfied, beyond a
14 reasonable doubt, that both elements of this
15 offense have been proved, you should find the
16 defendant guilty.

17 If you are not so satisfied, you must
18 find the defendant not guilty.

19 The defendant's theory of defense on the
20 charges of first degree intentional homicide and
21 mutilation of a corpse is that another person or
22 persons tried to frame him for the murder of
23 Teresa Halbach and the burning of her body. If
24 the facts introduced in support of the
25 defendant's theory raise a reasonable doubt in

1 your mind, or if you otherwise find that a
2 reasonable doubt arises from the evidence, then
3 you must find the defendant not guilty of the
4 charges.

5 The third count of the Information
6 charges that: Steven Avery, on Saturday,
7 November 5, 2005, at 12932 Avery Road, Manitowoc
8 County, Wisconsin, did possess a firearm
9 subsequent to the conviction for the felony or
10 other crime, as specified in sub. (1)(a) or (b),
11 contrary to Section 941.29 (2)(a), and 939.50
12 (3)(g) of the Wisconsin Statutes.

13 To this charge, the defendant has also
14 entered a plea of not guilty, which means the
15 State must prove every element of the offense
16 charged, beyond a reasonable doubt.

17 Section 941.29 of the Criminal Code of
18 Wisconsin is violated by a person who possesses a
19 firearm, if that person has been convicted of a
20 felony.

21 Before you may find the defendant guilty
22 of this offense, the State must prove, by
23 evidence which satisfies you, beyond a reasonable
24 doubt, that the following two elements were
25 present:

1 One, the defendant possessed a firearm.
2 Firearm means a weapon which acts by the force of
3 gun powder. It is not necessary that the firearm
4 was loaded or capable of being fired.

5 Possess means that the defendant
6 knowingly had actual physical control of a
7 firearm.

8 An item is also in a person's possession
9 if it is in an area over which the person has
10 control and the person intends to exercise
11 control over the item. It is not required that a
12 person own an item in order to possess it. What
13 is required is that the person exercise control
14 over the item.

15 Two, the defendant had been convicted of
16 a felony before November 5, 2005.

17 The parties have agreed that Steven
18 Avery was convicted of a felony before
19 November 5, 2005, and you must accept this as
20 conclusively proved.

21 If you are satisfied, beyond a
22 reasonable doubt, that both elements of this
23 offense have been proved, you should find the
24 defendant guilty.

25 If you are not so satisfied, you must

find the defendant not guilty.

In reaching your verdict, examine the evidence with care and caution. Act with judgment, reason, and prudence.

Defendants are not required to prove their innocence. The law presumes every person charged with the commission of an offense to be innocent. This presumption requires a finding of not guilty, unless in your deliberations you find it is overcome by evidence which satisfies you, beyond a reasonable doubt, that the defendant is guilty.

The burden of establishing every fact necessary to constitute guilt is upon the State. Before you can return a verdict of guilty, the evidence must satisfy you, beyond a reasonable doubt, that the defendant is guilty.

If you can reconcile the evidence upon any reasonable hypothesis, consistent with the defendant's innocence, you should do so and return a verdict of not guilty.

The term reasonable doubt means a doubt based upon reason and common sense. It is a doubt for which a reason can be given, arising from a fair and rational consideration of the

1 evidence or lack of evidence. It means such a
2 doubt as would cause a person of ordinary
3 prudence to pause or hesitate when called upon to
4 act in the most important affairs of life.

5 A reasonable doubt is not a doubt which
6 is based on mere guesswork or speculation. A
7 doubt which arises merely from sympathy or from
8 fear to return a verdict of guilt is not a
9 reasonable doubt. A reasonable doubt is not a
10 doubt such as may be used to escape the
11 responsibility of a decision.

12 While it is your duty to give the
13 defendant the benefit of every reasonable doubt,
14 you are not to search for doubt. You are to
15 search for the truth.

16 An Information is nothing more than a
17 written formal accusation against the defendant
18 charging the commission of one or more criminal
19 acts. You are not to consider it as evidence
20 against the defendant in any way. It does not
21 raise any inference of guilt.

22 Disregard entirely any question that the
23 Court did not allow to be answered. Do not guess
24 at what the witness' answer might have been. If
25 the question itself suggested that certain

1 information might be true, ignore the suggestion
2 and do not consider it as evidence.

3 Attorneys for each side have the right
4 and the duty to object to what they consider are
5 improper questions asked of witnesses and to the
6 admission of other evidence which they believe is
7 not properly admissible. You may not draw any
8 conclusions from the fact an objection was made.

9 By allowing testimony or other evidence
10 to be received over the objection of counsel, the
11 Court is not indicating any opinion about the
12 evidence. The jurors are the judges of the
13 credibility of the witnesses and the weight of
14 the evidence.

15 During the trial the Court has ordered
16 certain testimony to be stricken. Disregard all
17 stricken testimony.

18 An exhibit becomes evidence only when
19 received by the Court. An exhibit marked for
20 identification and not received is not evidence.
21 An exhibit received is evidence whether or not it
22 goes to the jury room.

23 You will not have a copy of the written
24 transcript of the trial testimony available for
25 use during your deliberations. You may ask to

1 have specific portions of the testimony read to
2 you. You must continue to rely primarily on your
3 memory of the evidence and the testimony
4 introduced during the trial.

5 Remarks of the attorneys are not
6 evidence. If the remarks suggested certain facts
7 not in evidence, disregard the suggestion.

8 Consider carefully the closing arguments
9 of the attorneys, but their arguments and
10 conclusions and opinions are not evidence. Draw
11 your own conclusions from the evidence and decide
12 upon your verdict according to the evidence,
13 under the instructions given to you by the Court.

14 It is not necessary that every fact be
15 proved directly by a witness or an exhibit. A
16 fact may be proved indirectly by circumstantial
17 evidence. Circumstantial evidence is evidence
18 from which a jury may logically find other facts,
19 according to common knowledge and experience.
20 Circumstantial evidence is not necessarily better
21 or worse than direct evidence. Either type of
22 evidence can prove a fact.

23 Whether evidence is direct or
24 circumstantial, it must satisfy you, beyond a
25 reasonable doubt, that the defendant committed

1 the offense before you may find the defendant
2 guilty.

3 The State has introduced evidence of
4 statements which it claims were made by the
5 defendant. It is for you to determine how much
6 weight, if any, to give to each statement.

7 In evaluating each statement, you must
8 determine three things:

9 Whether the statement was actually made
10 by the defendant. Only so much of a statement as
11 was actually made by a person may be considered
12 as evidence.

13 Whether the statement was accurately
14 restated here at trial.

15 Whether the statement, or any part of
16 it, ought to be believed.

17 You may also consider the consistency or
18 inconsistency with any other statements made by
19 the defendant.

20 You should consider the facts and
21 circumstances surrounding the making of each
22 statement, along with all the evidence, in
23 determining how much weight, if any, a statement
24 deserves.

25 The weight of evidence does not depend

1 on the number of witnesses on each side. You may
2 find that the testimony of one witness is
3 entitled to greater weight than that of another
4 witness or even of several other witnesses.

5 In weighing the evidence, you may take
6 into account matters of your common knowledge and
7 your observations and experience in the affairs
8 of life.

9 Ordinarily, a witness may testify only
10 about facts. However, a witness with expertise
11 in a particular field may give an opinion in that
12 field.

13 You should consider the qualifications
14 and credibility of the expert, the facts upon
15 which the opinion is based, and the reasons given
16 for the opinion.

17 Opinion evidence was received to help
18 you reach a conclusion. However, you are not
19 bound by any expert's opinion. You may give as
20 much or as little weight to the opinion of any
21 expert as you conclude it is entitled to receive.

22 In resolving conflicts in expert
23 testimony, weigh the different expert opinions
24 against each other. Also consider the
25 qualifications and credibility of the experts and

1 the facts supporting their opinions.

2 During the trial, an expert witness was
3 told to assume certain facts and then was asked
4 for an opinion, based on that assumption. This
5 is called a hypothetical question.

6 The opinion does not establish the truth
7 of the facts upon which it is based. Consider
8 the opinion only if you believe the assumed facts
9 upon which it is based have been proved. If you
10 find the facts stated in the hypothetical
11 question have not been proved, then the opinion
12 based on those facts should not be given any
13 weight.

14 It is the duty of the jury to scrutinize
15 and to weigh the testimony of the witnesses and
16 to determine the effect of the evidence as a
17 whole. You are the sole judges of the
18 credibility, that is, the believability of the
19 witnesses and of the weight to be given to their
20 testimony.

21 In determining the credibility of each
22 witness, and the weight you give to the testimony
23 of each witness, consider these factors:

24 Whether the witness has an interest or
25 lack of interest in the result of this trial.

1 The witness' conduct, appearance, and
2 demeanor on the witness stand.

3 The clearness, or lack of clearness of
4 the witness' recollections.

5 The opportunity the witness had for
6 observing and for knowing the matters the witness
7 testified about.

8 The reasonableness of the witness'
9 testimony.

10 The apparent intelligence of the
11 witness.

12 Bias or prejudice, if any has been
13 shown.

14 Consistency or inconsistency with any
15 prior statements of the witness.

16 Possible motives for falsifying
17 testimony.

18 And all other facts and circumstances
19 during the trial which tend either to support or
20 to discredit the testimony.

21 Then give to the testimony of each
22 witness the weight you believe it should receive.

23 There is no magic way for you to
24 evaluate the testimony; instead, you should use
25 your common sense and experience. In everyday

1 life, you determine for yourselves the
2 reliability of things people say to you. You
3 should do the same thing here.

4 A defendant in a criminal case has the
5 absolute constitutional right not to testify.

6 The defendant's decision not to testify
7 must not be considered by you in any manner and
8 must not influence your verdict in any manner.

9 Now, at this time the closing
10 instructions will not be given until after the
11 closing arguments have been completed.

12 We're going to take a very short break,
13 not our normal morning break, at this time, to
14 allow the parties to get ready to present their
15 closing arguments.

16 I will continue to remind you not to
17 discuss this case until you have heard all the
18 closing arguments and the Court orders that you
19 begin deliberating.

20 (Jury not present.)

21 THE COURT: You may be seated.

22 ATTORNEY BUTING: Judge, one thing that
23 might be helpful just to explain to the jury so they
24 have some idea how the day will proceed, that the
25 State goes first, then the defense, and then the

1 State, actually, has a follow-up rebuttal.

2 Otherwise they may be unclear on how that works.

3 THE COURT: Any objection from the State?

4 ATTORNEY KRATZ: No.

5 THE COURT: I should indicate during the
6 side bar, requested by the defense -- Well,
7 Mr. Strang, I will let you reiterate what you told
8 the court.

9 ATTORNEY STRANG: I asked for a side bar
10 shortly before instructions began, but after written
11 instructions had been distributed to the jurors. I
12 raised my concern simply that I did not think the
13 jurors should have written instructions in their
14 hands or with them at their chairs during closing
15 arguments; although, I certainly agree they should
16 have a copy of the written instructions during
17 deliberations.

18 As I understand, without objection from
19 Mr. Kratz on behalf of the State, the Court
20 agreed to collect the written instructions again
21 at this point, from the jurors, and redistribute
22 them again after the jury is sworn to begin
23 deliberations.

24 THE COURT: Mr. Kratz?

25 ATTORNEY KRATZ: That's fine.

1 THE COURT: I'm just -- If I understand, I
2 was told what the parties were requesting; I don't
3 remember the part about ordering them being
4 collected. My concern is this, I generally
5 instruct, before closing arguments and hand out the
6 instructions because sometimes the attorneys in
7 their closing argument wish to refer to specific
8 instructions.

9 I don't know if either of you intend to
10 do that, but if you do, I generally allow --
11 first of all, I allow the attorneys to invite the
12 jurors to flip to a page so that the jurors can
13 follow along with what the attorney is reading
14 and not have to take the attorney's word for it
15 that that is the instruction.

16 Let me suggest this, I could tell the
17 jurors, when they come back for closing
18 arguments, to set the instructions down under
19 their chair and only refer to them if one side or
20 another, in its closing argument, invites them
21 to. Does that address your concern?

22 ATTORNEY STRANG: I think it would. It had
23 been our plan simply to put an instruction up on the
24 ELMO if we intended to use much of it, but I think
25 what the Court is proposing would do the same thing.

1 The concern here is for the same reason we don't
2 allow jurors to take notes during the closing
3 arguments, we don't want divided attention.

4 THE COURT: Mr. Kratz.

5 ATTORNEY KRATZ: That's fine.

6 THE COURT: All right. Well, I also, as a
7 practical matter, don't want them to misplace
8 theirs. I don't think they have written their names
9 on them. I will do this, I will instruct them to
10 place the instructions on the floor and not pick
11 them up to look at them during closings, unless the
12 attorney making the closing invites them to.

13 ATTORNEY STRANG: I'm going to duck out for
14 two minutes, if we have two minutes.

15 THE COURT: All right. We'll do that.
16 We'll take a couple quick minutes before we start.

17 (Brief recess taken.)

18 (Jury present.)

19 THE COURT: Members of the jury, before we
20 get started, I have a couple of announcements for
21 you. First, with respect to the format, in closing
22 arguments the State, because the State has the
23 burden of proof, goes first. We will, I believe,
24 take a break sometime this morning, in the middle of
25 the State's closing argument. The defense, then,

1 gets a chance to make its closing argument. And the
2 State has a final chance to make argument in
3 rebuttal, after they have heard what the defense
4 argument is.

5 The other thing is, I'm going to ask you
6 at this time to take your copy of the closing
7 instructions -- the jury instructions, if you
8 brought them out, set them on the floor upside
9 down. We do this to make sure that everybody is
10 paying attention to the closing arguments.

11 The attorneys are permitted, if they
12 wish, to make reference to the jury instructions
13 in their closings. If they ask you to take a
14 look at any instruction, you may pick them up at
15 that point, otherwise set them down. I believe
16 nobody has pens or notebooks, correct, because
17 you are not permitted to take notes during
18 closing arguments. With that, Mr. Kratz, you may
19 proceed.

20 ATTORNEY KRATZ: Thank you, Judge. I don't
21 know how the volume is on this mike.

22 THE COURT: Do you know if you are number
23 seven or eight?

24 ATTORNEY STRANG: Eight.

25 ATTORNEY KRATZ: I guess I'm eight, Judge.

1 THE COURT: Okay.

2 ATTORNEY KRATZ: Can everybody hear me
3 okay? Is that all right? Thank you. Then, I will
4 begin. May it please the Court. Let me start
5 ladies and gentlemen by thanking you for the time
6 and attention that you have given to this very
7 important case for the last five weeks.

8 This is an important duty. It's an
9 important duty not just for the 12 of you that
10 are going to decide the case, but for really all
11 of Manitowoc County. You are representatives of
12 the citizens of Manitowoc County.

13 And I'm going to be highlighting some of
14 the facts in this case that the State believes
15 was important. The last thing I'm going to do is
16 reiterate -- or try to reiterate all of the
17 facts, all the evidence that has been presented.
18 I don't think you want to hear lawyers any more
19 talking for you incessantly or hours upon hours.
20 But there are some important parts of this case.

21 We start with why are we here. It would
22 be a natural thought process for a jury to think,
23 you know, we have been sitting here for five
24 weeks, there must be a reason. There's got to be
25 a reason why, for five weeks, we have had to

1 listen to over 500 exhibits, something
2 approaching 60 witnesses, and there must be a
3 conflict. There must be a controversy that has
4 to be tried in this case.

5 We're here because Steven Avery pled not
6 guilty. We're here because Mr. Avery has a
7 constitutionally protective right to be tried
8 when he pleads not guilty, like anybody else who
9 pleads not guilty. There hasn't been any
10 question and I don't want you to sit in that jury
11 box and think that there is any question about
12 who is responsible for the death and the
13 mutilation of Teresa Halbach.

14 The fact that we have been here five
15 weeks is because it's my duty, it's my job, to
16 prove all the elements of the offenses for which
17 Mr. Avery is charged. Not because there are
18 questions. And I start by saying that for, I
19 think, obvious reasons. Because as jurors, you
20 must be thinking, or you would naturally be
21 thinking, that there's got to be two sides to
22 this. And as the State and as we, I think, have
23 presented in this case, all of the evidence
24 points to one person. That's the one person
25 being responsible.

1 I'm going to argue at the conclusion of
2 this case who that one person is. I bet you can
3 guess who I'm going to suggest was -- was
4 responsible. But, again, please keep, before any
5 of the evidence I talk about, please keep that in
6 mind, that we're here because that man pled not
7 guilty and because that man is entitled to a
8 trial.

9 Cases are decided on facts, at least
10 from the State's perspective. We don't present
11 speculation. We don't ask you to perform
12 guesswork when deciding what happens. You know
13 the funny thing about facts is facts are
14 stubborn. Facts don't change. You can twist
15 them and you can beat them up, you can try to
16 massage, if you will, the facts, but facts don't
17 change.

18 The facts in this case, as presented,
19 and as I will present to you, are very much so
20 uncontested, uncontroverted, at least most of the
21 facts in this case are uncontroverted. But my
22 job is going to be to take you through what I
23 think are the important facts of this case, why
24 we think we have proved the case, beyond a
25 reasonable doubt, against Steven Avery. And I

1 intend do that.

2 The first fact that I would like to talk
3 about is a starting point in the case. Now,
4 every case has a starting point. When you think
5 about a case this big, and by now you realize and
6 you have heard just how big of a case this is.
7 You have heard that the Crime Lab received the
8 most submissions ever in the history of the
9 Wisconsin State Crime Lab, that more law
10 enforcement officers were used in this case, from
11 an investigative standpoint, than any other case.

12 But what does that mean. Try and put
13 that in perspective in -- in kind of an
14 historical perspective. That means that this is
15 a pretty darn big case. And when a case is that
16 big, the natural tendency is to try to look at
17 the big picture, and to try to absorb it all, if
18 you can. But I'm not going to do that.

19 I want you to pick one particular point
20 in time. I want to start the presentation that I
21 have with one moment in time. Now, we could have
22 started any number of moments. There's been what
23 we call watershed moments, real important moments
24 in the case when Teresa Halbach was shot, when
25 she was murdered. That's a particularly

1 important moment.

2 We could start with the moment or with
3 the visual or with the image of that man, Steven
4 Avery, standing outside of a big bonfire, with
5 flames over the roof, or at least over the garage
6 roof, and the silhouette of Steven Avery, with
7 the bonfire in the background and the
8 observations made by some witnesses.

9 Can you all picture that? Can you
10 picture that as a moment, as a moment in time?
11 And that moment, by the way, although dramatic
12 and although important, should tell the whole
13 story. That moment of Steven Avery, after the
14 murder was committed, of Steven Avery tending the
15 fire, of Steven Avery disposing of and mutilating
16 the body of 25 year old Teresa Halbach. That
17 would be a good place to start.

18 But I'm not going to start there. I'm
19 going to start somewhere else. I'm going to
20 start with the Toyota RAV4. The Toyota RAV4,
21 which was owned by Teresa Halbach, which was
22 discovered on the 5th of November, at the Avery
23 Salvage Property, is less dramatic, it's a less
24 dramatic place to start, than those other moments
25 in time that I talked about. But it's equally

1 important.

2 Because the discovery of that RAV4, the
3 discovery of Teresa Halbach's vehicle, changed
4 the course of not only this case, but the clues
5 and the secrets found in that vehicle changed the
6 lives of everybody in this room. Look around,
7 everybody.

8 The clues found in that vehicle, on the
9 5th of November, changed everybody's lives, yours
10 included. Your lives will never be the same,
11 ours won't, families won't. That moment is
12 particularly important. And that is where we're
13 going to begin.

14 This woman, Pam Sturm, of the 60
15 witnesses -- by the way, I'm going to be helping
16 you remember some of these faces as we go along.
17 I don't expect you to remember 60 people and what
18 they look like. And when I talk about witnesses,
19 I'm going to try to help the jury with some
20 photos to jog your memories.

21 But on the 5th of November, Pam Sturm
22 and Ryan Hillegas had a conversation. They had a
23 conversation about where should Pam search for
24 Teresa's vehicle. And, importantly, in that
25 conversation, they decided to search the Avery

1 salvage property, the last place where Teresa
2 Halbach was seen alive.

3 Now, as I mentioned, this case
4 dramatically changes at that moment. This
5 changes from a missing persons investigation to
6 where something horribly bad has happened to
7 Teresa Halbach.

8 It's also the first opportunity that we
9 hear where we talk about law enforcement bias.
10 And we have heard that a lot from the defense,
11 throughout this case. But the perception or the
12 finding of the vehicle on the Avery property, in
13 fact, the very decision to look for this vehicle
14 on the Avery property, should tell you something.
15 What should it tell you?

16 Well, if Pam Sturm and Ryan Hillegas can
17 figure it out. If Pam Sturm and Ryan Hillegas,
18 when they talk to each other, say to themselves,
19 you know what, common sense would tell us that
20 the first place that we should look for Teresa
21 was the last place that she was seen alive, that
22 should put a lot of the defense suggestion of law
23 enforcement bias by Mr. Fassbender and
24 Mr. Wiegert, into perspective.

25 Because you don't have to be Sherlock

1 Holmes to figure out that that's where the
2 investigation should start. Pam and Ryan figured
3 that out, when Pam Sturm decided, let's go look
4 at the Avery property for this particular
5 vehicle.

6 Now, we also remember that Pam's
7 daughter, Nikole, went with her. Nikole,
8 importantly, did some things at the scene. She
9 took the photograph. She realized that the doors
10 were locked. She realized that it was too dark
11 to see inside, or to see any blood inside. She
12 realized that there were no plates on the
13 vehicle. But, importantly, both ladies never
14 took their eyes off of that vehicle until the law
15 enforcements arrived.

16 Now, photographs that were taken from
17 Pam are important; they are important in this
18 case. It was a camera lent to them by Scott
19 Bloedorn, as we understand. But what we do find
20 is that there were obvious attempts to obscure
21 the view of this car. There's no question that
22 this car was found by the car crusher.

23 Doesn't take a great leap of
24 interpretation to suggest that Steven Avery
25 intended to crush this car. But you don't have

1 to make that finding in this case. I'm just
2 saying that parenthetically for you. In other
3 words, that where it was located was not an
4 accident. There was no accident where Teresa
5 Halbach's vehicle was located.

6 Think also, if you will, about how
7 important this particular event was, finding this
8 car. Pam Sturm described it as divine
9 intervention, or words to that effect, that it
10 was the hand of God, I think was the term that
11 she said, as to where we should look at the 4,000
12 cars that were on this property. Pam Sturm
13 looked in that one place. She never would have
14 gotten through all those cars.

15 But on that Saturday morning, or going
16 into that Saturday afternoon, think of what would
17 have happened if this car wouldn't have been
18 found. Think about what would have happened if
19 this car was crushed, like the other 54 crushed
20 cars that were there. Think of what would happen
21 if the law enforcement officials wouldn't have
22 known that this car was there and this car would
23 have secretly been taken off the property and the
24 blood wouldn't have been found, both Teresa's
25 blood and Steven's blood.

1 Think how close he got to getting away
2 with that. Pam Sturm doesn't find this car, this
3 case doesn't change at that moment, we may not be
4 standing here today. All right. And that's why
5 that's the important place to start in this case.
6 That's why the investigation changes so
7 dramatically upon the recovery -- excuse me --
8 and observation of this particular car. All
9 right. That's the first fact.

10 Usually, when I would talk to a jury, I
11 wouldn't be concerned with things like security
12 issues, but part of the prosecution's job, not
13 only is to present my case, but to dispel any
14 defense suggestions that they have made in this
15 case. I'm not going to identify what the defense
16 has told you is evidence in the case, because
17 evidence has a meaning. Evidence suggests that
18 there were witnesses that said things about it or
19 that there were witnesses that agreed with the
20 questions that the defense gave.

21 Remember evidence in the case -- excuse
22 me -- evidence is the answers that witnesses
23 give. Evidence aren't the questions that
24 Mr. Buting or Mr. Strang asked. I know this is a
25 little bit of a diversion, but I'm the

1 prosecutor, I get to do this. The questions of
2 witnesses, did you plant evidence in this case,
3 and when witnesses consistently indicate that,
4 no, sir, I did not, that's the evidence.

5 The evidence is the answer. The
6 evidence isn't the question. Okay. So keep that
7 in mind as not only I go through my closing
8 argument, but as the defense may stand before you
9 and may suggest to you theories, or speculation,
10 or supposition, or maybe what questions they
11 might have asked. But you are also collectively
12 going to have to remember what the answers were,
13 because it's the answers that are the evidence,
14 not the question.

15 Scene security. Scene security was
16 talked to you by several witnesses. I'm not
17 going to spend a great deal of time, but we know
18 that law enforcement early on, number one, knew
19 the significance of this SUV; number two, knew
20 the -- at least perception of Manitowoc County
21 being involved in the case. But as importantly,
22 number three, knew the importance of something
23 called scene security, of making sure that nobody
24 was allowed to have access to that car. Nobody
25 was going to tamper with the SUV after it had

1 been located.

2 We first heard from Deputy Pete
3 O'Connor. Deputy O'Connor was the perimeter
4 security guy. Deputy O'Connor, as you recall,
5 and as we come right off of Highway 147, was
6 stationed right at the entrance to the Avery
7 salvage property. Importantly, I guess, not only
8 did he note the people that were leaving and that
9 he stopped, but that Sergeant Orth was the first
10 one to arrive.

11 And as you might expect, we then called
12 those officers in order of arrival on the scene.
13 When Sergeant Orth said that he got there about
14 10:59 a.m., that he talked to both of the Sturms,
15 that they were very upset, that they were visibly
16 upset, and they should be, the Sturms knew at
17 that time the significance of what they had
18 found. They knew about their cousin. They knew
19 about where this case was going and where it was
20 going to lead.

21 And Sergeant Orth testified that his
22 job, when he was on the Avery salvage property,
23 was to protect that particular vehicle. All
24 right. It's called scene security. That's a
25 fancy word for guarding a piece of property, or

1 maintaining the integrity of a piece of evidence
2 in a case. And we heard that he was, really,
3 just a few feet, what would be to the east of the
4 SUV that was located.

5 Remember also, though, that other
6 witnesses, including the Sturms, including some
7 other supervisors, including Calumet County, when
8 they arrive, they never take their eyes off of
9 that particular vehicle. And Sergeant Orth was
10 one of those. Remember his testimony, he said, I
11 didn't take my eyes off that vehicle. Nobody
12 entered that vehicle. Nobody tampered with that
13 vehicle.

14 We even called witnesses like Lieutenant
15 Todd Hermann who, at the time, provided short
16 breaks for Sergeant Orth. We do that for
17 something called chain of custody, to make sure
18 that even for those couple of minute gaps and
19 Sergeant Orth said, even when I was taking a
20 little break in the staging area, I could
21 still -- I could still see the car. But, again,
22 under the category of lead prosecutor, crossing
23 all of my T's, I wanted you to know, and wanted
24 to make sure that you knew that all the witnesses
25 were called.

1 We heard from Detective Dave Remiker,
2 several times in the case. But Detective
3 Remiker, who was involved early on, Detective
4 Remiker was, I guess, the lead investigative
5 individual from Manitowoc County, both in the
6 missing persons part of the case, and also in
7 these early stages Detective Remiker, we heard,
8 confirmed the VIN. Remember, confirmed that this
9 was, in fact, Teresa Halbach's car. And you will
10 remember everything that Detective Remiker said
11 to you about that case.

12 But I want you to think back and I want
13 you to remember Detective Remiker looking. I
14 want you to remember how Detective Remiker told
15 you about scene security. This is a detective, a
16 young detective, but a good detective, a guy who
17 knows his job. A guy who, on the scene, knew the
18 importance of scene security.

19 Detective Remiker looked at you, without
20 apology, didn't bat an eye, and he told you,
21 nobody entered that vehicle. Remember that?
22 Remember when Detective Remiker told all of you,
23 all of the jurors, that nobody entered that
24 vehicle, because it was so important. Because
25 the integrity, the perception about this case,

1 making sure that nobody was going to tamper with,
2 at that time, his evidence, was an important
3 factor to Detective Remiker.

4 And when you look at his credibility --
5 This is the first opportunity I will have to talk
6 about credibility of witnesses. It's not
7 something -- and the judge has instructed you --
8 not something that you do just as a juror. We do
9 it everyday.

10 When we listen to lawyers, or when we
11 listen to people who are trying to sell us
12 something, car salesmen, as an example. We weigh
13 their credibility. All right. The car salesman
14 comes up and tells you that this little baby was
15 only driven on Sunday, by a little old lady to
16 church. You might weigh some of those factors
17 into that particular salesman. What's he trying
18 to sell me and why is he trying to sell me that?
19 Does he have any interest in the outcome of what
20 he's saying? Does he have some kind of a bias or
21 does he have some kind of a prejudice?

22 And, of course he does. And you weigh
23 those kind of factors, not just how they say it,
24 but whether or not they have those -- those
25 influences. You do the same thing as -- it's a

1 little more formalized, but you do the same thing
2 as a juror. It's not just what they say, it's
3 how they say it and were they in a position to
4 know the things that they are talking to you
5 about.

6 And my suggestion to you, my argument to
7 you, as the lead prosecutor, when the guy who's
8 in charge of the case points to you and looks at
9 you, without apology and emphatically says,
10 nobody, nobody entered that vehicle, and nobody
11 tampered with that vehicle, that's something that
12 you should give great credibility and great
13 weight to.

14 We finish what's called the chain of
15 custody, or the transfer of -- from Manitowoc to
16 Calumet County, with Sergeant Tyson. You have
17 heard from Sergeant Bill Tyson who completes, if
18 you will, the chain; that is, who watched the
19 vehicle and who took over. And about 3:00, and
20 at least from 3:00 on, we learned, then, that
21 Calumet County takes over.

22 Calumet County takes over, then, with
23 not just perimeter security, but takes over
24 security of the SUV, of that particular part of
25 the scene. It's the transfer of management

1 control about this case, that's why Calumet
2 County and DCI got involved. Let me just spend a
3 couple minutes about that.

4 Manitowoc County sheriff's deputies were
5 never, never, precluded from being involved in
6 this case. The resources of Manitowoc County law
7 enforcement officers was critical, was crucial.
8 Mr. Fassbender never apologized for that.

9 And think about why. Because we're in
10 Manitowoc County. It's the Manitowoc County
11 sheriff's deputies that are going to know if we
12 need a wrecker, where are we going to go. If we
13 need some tarps, where are we going to go. If we
14 need some ropes, where are we going to go. If we
15 need some bodies, to do some searching, if we
16 need trained evidence techs, it's a logical place
17 to find them. And that's why Manitowoc County
18 remained involved in this case.

19 You heard the testimony from
20 Mr. Fassbender, that it was the management
21 decisions, that it was the control decisions,
22 over this particular investigation, that was
23 removed from Manitowoc County. Never, ever,
24 ever, the resources. Never that we couldn't, or
25 shouldn't, use Manitowoc County law enforcement

1 officers. All right.

2 I hope you all understand that. I hope
3 you understand the difference, then, between
4 decision making, how a case should be directed,
5 and whether or not a Manitowoc County law
6 enforcement officer should have been used in this
7 case.

8 All right. Fact number three, the
9 vehicle is locked. We learned at this time the
10 weather is worsening, it's getting dark. The
11 Crime Lab is called in. And so our third
12 uncontested fact, my third fact that I want you
13 to consider when deciding this entire case, is
14 something called a recovery process. The SUV
15 recovery.

16 And for the first time, I guess, we
17 learn, and it's the first example of the
18 diversity of agencies that are involved in this
19 investigative effort, this largest criminal
20 investigation, that we have talked about, of the
21 resources that need to be allocated.

22 We have civilian searchers, like canine
23 handlers. We have law enforcement officers, like
24 from DCI and Calumet County. We have scientists
25 that are brought in, like people from the Crime

1 Lab. We have, as you heard, other civilians
2 brought in to help, like the wrecker operator,
3 and the tow truck driver, and the driver of the
4 trailer in this recovery effort.

5 But this is a good place to really kind
6 of get your mind around the expanse of this
7 investigation. And remember, we're an hour into
8 it. We're only an hour into the investigation
9 and already the resources are being called in,
10 because the enormity of this investigative effort
11 is so, so apparent to everybody.

12 I told you on my opening statement about
13 what I called a four legged hero. That may have
14 overstated Brutus a little bit, but Brutus is
15 certainly a qualified asset that you should be
16 considering in this case. Brutus hit on the SUV.
17 All right. And if the officers didn't have
18 enough suspicion before that particular moment,
19 all right, that should have been, and was, in
20 fact, a very important part of this case.

21 Because Brutus hitting on the SUV, told
22 the handler, told Julie Cramer, who you have
23 heard from, one very important thing, that either
24 a dead body was still in that particular SUV, or
25 a dead body had been in that SUV. This is

1 another changing moment. It's another time in
2 this investigation where very important, the
3 investigation changes and becomes much more of a
4 criminal investigation, that of a missing person
5 investigation.

6 We heard about Brutus' search that he
7 did, real methodical kind of search. As I was
8 thinking about it, even though Brutus is a dog,
9 Brutus approached that search much like our law
10 enforcement officers, very methodically, very
11 professionally, and came up with the same kinds
12 of results that our other officers have in this
13 case, as well.

14 One of the two lead investigators, Tom
15 Fassbender, from the Division of Criminal
16 Investigation, talked to you about the agencies
17 that were involved. I will talk to you about
18 that a little bit later. But mentioned something
19 called resource allocation, putting the teams
20 together for searching all the different
21 properties.

22 That first night, Mr. Fassbender clearly
23 was in charge of deciding who's going to go into
24 what house and why those people were going to do
25 that. And talked about the search plan. Talked

1 about why Steven Avery was a person of interest.
2 Gave you that obvious answer that everybody is
3 giving you, is because Steven Avery was the last
4 person to see Teresa alive.

5 And Mr. Fassbender knew, that first
6 afternoon, what an overwhelming task this was.
7 He knew what an overwhelming job the coordination
8 of this largest investigative effort was going to
9 include. And, again, without apology, without
10 apology, Mr. Fassbender told you at that early
11 stage, all the early clues pointed to one man.

12 They pointed to one person, even early
13 on. Who's the last person to see her alive?
14 Where was the vehicle that was found? Was there
15 an attempt by Mr. Avery to lure, or to invite, if
16 you want to use a more polite term, this woman
17 onto the property? It all pointed to one person.

18 And although Investigator Fassbender
19 said that, he had other irons in the fire, he was
20 looking at other individuals, he was looking at
21 other family members, he was looking at possibly
22 old boyfriends, or people that might have had
23 contact with Teresa, or who else she might have
24 seen that day, Mr. Zipperer, or Mrs. Zipperer, or
25 Mr. Schmitz, or where she might have been going.

1 And all those things are important. And
2 a law enforcement officer does all those things.
3 But law enforcement officers aren't stupid
4 either. Law enforcement officers understand that
5 when you have limited resources, when there is
6 just so many officers to go around, you better
7 direct your resources to where this thing is
8 likely going.

9 And that night the likely place that
10 this was going was towards Steven Avery. And so
11 a team was put together to search Steven Avery's
12 trailer, that very first night, on the 5th,
13 subject to a search warrant. Getting ahead of
14 myself just a little bit.

15 I apologize, because we're still talking
16 about the recovery of the SUV. The scientist,
17 Mr. Ertl, who himself is a DNA analyst, that's
18 what he does during the day. But on weekends,
19 like many other Crime Lab employees, Mr. Ertl
20 volunteers to go on field responses. He
21 volunteers to go to crime scenes and look at
22 evidence and things just like this.

23 So Mr. Ertl, gave his opinion, gave his
24 expertise to, and opinions to, Mr. Fassbender.
25 Made the decision that because the weather was

1 becoming progressively worse, I think Mr. Ertl
2 used the term dramatic weather had occurred on
3 the evening of the 5th, after he had got there.
4 Mr. Ertl verified, if you remember, and
5 importantly, verified that the vehicle was
6 locked, that all the doors were locked in the
7 vehicle. And decided that although they were
8 going to process the outside of the vehicle, that
9 the real processing of this car was going to take
10 place in Madison.

11 But the SUV was going to be transported,
12 as it was, to a more pristine type of location,
13 to a place where the climate could be controlled
14 and where they could control the processing of
15 the vehicle. Mr. Ertl also told you that this
16 vehicle was obviously obscured, or attempted to
17 be obscured, you couldn't see it from, as an
18 example, an airplane. Mr. Drumm told you that
19 they couldn't see a car like that from an
20 airplane when they did their air search a day or
21 two before.

22 Mr. Ertl also told you, and if you
23 remember, we'll go to a picture of Mr. Ertl
24 who is standing right here with Mr. Fassbender
25 and some other -- one other Crime Lab person.

1 Mr. Ertl told you that, right on the other side,
2 see this, right on the other side of the SUV,
3 running all the way along this ridge, was this
4 berm. Mr. Ertl talked about this being 15 to
5 20 feet high.

6 Remember he talked about walking over
7 that particular berm where he -- after he got to
8 the top of it, kind of slid down, or gravity kind
9 of assisted this going down the other side of
10 that berm. That is important, or it may be for
11 you, important, when deciding whether or not
12 somebody knew to put this car here.

13 It certainly couldn't be driven in from
14 the south. That's the point. All right. The
15 point is that it couldn't be driven into that
16 property unless somebody knew that property,
17 unless who ever put that car there, knew how to
18 get the car into this location. Again, it's near
19 the car crusher. It's near a place where other
20 cars are to be crushed. It's near cars that have
21 been crushed. The 54 cars that we talked about.

22 But Mr. Ertl's job, primary job, at this
23 location, is to process the outside of the
24 vehicle. But then to get a wrecker, to get a tow
25 assembly set up, and to put this on an enclosed

1 trailer and take to it Madison for processing.
2 And so we move to our next uncontested fact, fact
3 number four. We move our investigation to
4 Madison.

5 ATTORNEY STRANG: Your Honor, excuse me.
6 Excuse me, Mr. Kratz. I think it's unwise and
7 improper to be describing facts necessarily as
8 uncontested.

9 THE COURT: Mr. Kratz.

10 ATTORNEY KRATZ: Well, however unwise it
11 may be, this is argument, Judge. And if the jury
12 decides that they are, in fact, contested, they can
13 make that conclusion as well.

14 THE COURT: All right. Members of the
15 jury, I think I will simply remind you about one of
16 the instructions that you read and that is that the
17 closing arguments are just that, arguments. They
18 are not facts. You should take anything that is
19 said by either party as argument.

20 The fact, for example, that one side
21 said something is uncontested, may not
22 necessarily make it so. It depends on your
23 interpretation of the evidence. And the other
24 side will also have a chance to respond in its
25 argument. Mr. Kratz, you may proceed.

1 ATTORNEY KRATZ: Thank you, Judge. And the
2 Judge is absolutely right and Mr. Strang is
3 absolutely right. And if you remember one of them,
4 one of the defense attorneys putting on some
5 evidence that this car wasn't taken to Madison for
6 processing, then you should adopt that. You should
7 adopt your memory. I'm calling it uncontested as an
8 argument. I'm saying because we haven't heard any
9 evidence to the contrary, we haven't heard any
10 answers from a witness to the contrary, that's why
11 I'm characterizing this as uncontested. But as I
12 mentioned --

13 ATTORNEY STRANG: I would like to be heard
14 about that, at an appropriate time, as if now.

15 THE COURT: I'm sorry, I didn't hear the
16 last part of your comment.

17 ATTORNEY STRANG: I would like to be heard
18 about that at an appropriate time, as if now.

19 THE COURT: Very well. You may proceed,
20 Mr. Kratz.

21 ATTORNEY KRATZ: The evidence in this case
22 was that this particular SUV was taken to Madison,
23 that it was taken to a garage in Madison. It was
24 taken to the Crime Lab, where this vehicle could be
25 processed. And we heard from Mr. Groffy and Ms

1 Culhane, and Mr. Riddle. And, in fact, we heard and
2 we'll talk about a fourth individual, Mr. Stahlke,
3 about the processing or the looking at this vehicle
4 in a more controlled environment.

5 Mr. Groffy testified that after the
6 vehicle was initially looked at, that when the
7 vehicle was open, that Mr. Groffy started
8 photographing. But, importantly, photographing
9 from the outside of the vehicle, not from the
10 inside. And that's why his testimony included
11 that he photographed both on the 6th, that's
12 Sunday, and also on the 7th.

13 Because on the 6th, Mr. Groffy testified
14 that he photographed from the outside of the
15 vehicle, that he could photograph things where he
16 didn't have to crawl into the vehicle, because he
17 couldn't get the inside shots yet. Didn't want
18 to contaminate the inside of the vehicle and
19 waited for the vehicle to be what's called
20 processed, by the lead individual who was in
21 charge of processing the car. And that was
22 Sherry Culhane.

23 Now, Ms Culhane has lots and lots of
24 involvement in this particular case. Ms Culhane,
25 you heard, was the unit leader or the unit head

1 of the DNA Section of the Madison Crime Lab. And
2 she was chosen or she assigned herself the
3 responsibility of this case. And it was the unit
4 head, the head of the DNA section who, herself,
5 processed this particular vehicle.

6 Ms Culhane, as you heard testimony, took
7 some swabs, took some samples of the interior of
8 the vehicle. It's more than just the four
9 pictures that I'm putting up before you, but the
10 swabs of around the ignition area, the swabs of
11 the seats -- excuse me -- the cuttings, as she
12 cut out portions of the seat, I believe the
13 testimony was. Swabs of the CD case, swabs of
14 the back door, and also on the interior of the --
15 what's called the cargo area of the SUV.

16 The defense will have an opportunity to
17 present a argument in this case. We heard some
18 questions of some law enforcement officers, about
19 planting evidence. We didn't hear anything about
20 how an officer might plant a stain like this,
21 what's called by Mr. Stahlke, a contact stain,
22 which common sense would tell you requires active
23 bleeding. How stains which require gravity, that
24 is, which require dripping kinds of actions might
25 be planted, how smear or movement kinds of stains

1 might be planted as well.

2 Now, I say that, again, not for my
3 argument, not at this particular time telling you
4 what the evidence has shown, or is going to show,
5 but I am interested to hear theories of how these
6 things might have actually happened. Mr. Avery's
7 blood is in six different places in this vehicle.
8 Other DNA, that is, without blood being visible,
9 is in yet another, that would be the hood latch
10 on this particular vehicle.

11 And so the sheer volume, the sheer
12 numbers of places, made this quite a job. Made
13 this processing or the recovery of this evidence
14 quite important, indeed.

15 We heard from Mr. Riddle, who is
16 primarily a fingerprint guy. And although he
17 didn't obtain any identifiable prints, at least
18 those that were suitable for comparison,
19 Mr. Riddle also had the responsibility of
20 inventorying the car. Mr. Riddle told you about
21 what that means, to inventory a vehicle. And
22 it's the little things that he found, the little
23 things within the inventory that become so
24 important.

25 Things like the blue lanyard, that was

1 given from Katie Halbach to her sister Teresa.
2 You saw Katie, with the assistance of, I think it
3 was Mr. Wiegert, actually fitting the key
4 assembly, or what's called the fob, right onto
5 this particular lanyard that was given to Teresa.

6 And I had a sense, and I'm allowed to,
7 and I will argue to you, that that showed where
8 this case fits together. Fits together just like
9 the fob and just like the lanyard that was given.

10 Now, Nick Stahlke, I told you I was
11 going the talk about, and I'm going to add a
12 little bit of Mr. Stahlke's testimony in at this
13 point, because although an analysis was given, it
14 does fit also into the processing of the vehicle
15 when Mr. Stahlke talked about the blood that was
16 found in the back of the RAV4.

17 This area right here, where Mr. Stahlke
18 said that that was a very identifiable impression
19 to him. Sadly, this is a impression, or an
20 impression, of a individual whose head, whose
21 hair, is soaked with blood. And it leaves an
22 impression. It leaves a stamp, if you will. And
23 you can see that and you may get a chance even to
24 see some photos, close up photos, when you
25 deliberate in this case.

1 But the point of Mr. Stahlke's testimony
2 was that, how Ms Halbach was laying in the back,
3 that her hair was blood soaked, becomes real
4 important, obviously. Because what we're going
5 to hear about gunshots to the head, what we're
6 going to hear about where Ms Halbach was placed
7 thereafter, when it ties in with Brutus hitting
8 on this particular vehicle, as an individual was
9 either bleeding, or was deceased in this
10 particular SUV, again, becomes very, very
11 important.

12 Mr. Stahlke also told you the difference
13 between contact and transfer kinds of stains,
14 which Mr. Avery -- the blood attributed to
15 Mr. Avery suggests impact, or what's called
16 projected blood, as if an individual was thrown
17 into the back of the SUV. That was on the back
18 gate, that Mr Stahlke talked about. We'll show
19 you some pictures about that, as if the blood is
20 splattering, or is actually in movement as it
21 hits the side of, or the back gate of, the SUV.

22 We talked about passive bleeding.
23 Again, those attributed to Mr. Avery; that is,
24 the back passenger seat and also on the front
25 seats where there's droplets, where there's

1 active bleeding that's going on.

2 Mr. Stahlke also testified, if you
3 recall, that upon his expert opinion, his opinion
4 as a blood spatter expert, and he does this for a
5 living, that this particular stain by the
6 ignition is absolutely consistent with somebody
7 with a cut to the outside of the right hand and
8 turning an ignition, this transfer -- contact
9 transfer stain was absolutely consistent.

10 Now, the Judge promised you a break and
11 you are going to get one right after fact number
12 five. So I want you to know that I'm not just
13 going to drone on and on. I'm going to provide
14 you a break after this next section. Because you
15 probably, since you have been sitting for about
16 45 minutes now, probably not more than an hour
17 should go by before you get a break.

18 Fact number five, we go back to the
19 salvage yard. Fact number five becomes a
20 critical or critically important piece of
21 evidence, the State is referring to as
22 Mr. Avery's burn barrel. And we have heard about
23 the discovery, and the recovery, and the
24 processing of this burn barrel. But all of the
25 aspects of this particular burn barrel, again,

1 become very, very important.

2 It is important because of the obvious
3 evidentiary value that we have had. But it's
4 also obvious -- or excuse me -- it's also
5 important for what we haven't heard. What we
6 haven't heard about explanations, if you will,
7 about how some of this evidence gets in there.
8 But, again, I'm jumping ahead, I will talk about
9 that in just a moment.

10 Deputy Siders was the individual that
11 you heard found or discovered the burn barrel on
12 a sweep of an adjoining property of Mr. Avery's
13 on Monday, the 7th of November. Deputy Siders
14 finds the burn barrel with a tire, with the tire
15 rim being inside of the vehicle (sic). And he,
16 as you recall, takes the tire rim out.

17 Tires, again, you have heard by later
18 witnesses, are accelerants. They can be used to
19 keep a fire going, to keep it certainly going hot
20 enough to destroy, or what should be, destroy
21 most of the things that it comes in contact with.

22 Deputy Siders, we hear, turns over
23 responsibility for the photography and the taking
24 control of this piece of evidence to Special
25 Agent Kevin Heimerl. Mr. Heimerl takes some

1 pictures of the inside. But even Deputy Siders
2 told you, upon looking in the burn barrel, it was
3 obvious that a Motorola cellphone was inside
4 there, because you could see the M, the very
5 distinctive M from inside of the burn barrel.

6 Mr. Ertl, again, another one of his
7 responsibilities, later, I think it was at the
8 Calumet County Sheriff's Department, processed
9 the contents of this burn barrel, which was
10 anywhere between a third and a half full. But
11 Mr. Ertl didn't identify those components. He
12 doesn't identify the obvious electronics that are
13 found within. He leaves that to the FBI.

14 Now, Mr. Thomas, although a very young
15 looking individual, is in fact an expert, here to
16 provide you with expert testimony. These
17 components were sent to Virginia. And these
18 components, we heard, were all laid out and were
19 all identified by Mr. Thomas.

20 When you look at these pictures and you
21 look at the kinds of things that didn't burn, and
22 when I asked Mr. Thomas, what are we looking at
23 here, what's left over, what didn't burn,
24 Mr. Thomas mentioned that the metal didn't burn.
25 He mentioned that the glass didn't burn. And I

1 said, well, what does that leave. I asked him
2 the question, what components aren't here, what
3 aren't we looking at.

4 Mr. Thomas told you plastic. He said it
5 was the plastic components of the camera, and of
6 the cellphone, and of the PDA, the personal data
7 assistant, that we're missing from this
8 constellation of things.

9 Mr. Thomas was able to positively
10 identify three specific things, obviously, the
11 cellphone. He talked to you about the large
12 circuit board for the PDA, the Palm Pilot type
13 thing, and also the components for the digital
14 camera, the Canon A310. Didn't just say it was
15 any camera, said it was a Canon A310 digital
16 camera.

17 I showed you a blow up of this
18 particular exterior of that camera. And it says,
19 you know, PowerShot A310 on it, so you probably
20 don't have to be an expert to determine what kind
21 of camera that was. Not surprisingly, the State
22 tied this up as well, as you might expect. We
23 meticulously, I think, matched the recovered
24 items and showed you that Teresa Halbach owned
25 all of those items. So at least the three items

1 that Mr. Thomas was able to positively identify.

2 Teresa owned a Motorola V3 RAZR
3 cellphone. She owned a PowerShot A310 digital
4 camera and she owned a Palm Zire 31 PDA. We saw
5 the boxes that Teresa had kept her or had
6 purchased her Palm Pilot. The box that *Auto*
7 *Trader* had given her her digital camera in, the
8 Canon PowerShot A310. And you also heard
9 testimony about Teresa owning the Motorola RAZR
10 cellphone, which is a very common kind of cell
11 phone.

12 But Steven Avery's burn barrel becomes
13 important, not just for what is found in it, but
14 what witnesses, what other citizens, what other
15 people on the property saw on the 31st. One of
16 those people is Blaine Dassey, is the nephew of
17 Steven Avery.

18 And when considering credibility, you
19 can consider a young man like this sitting in
20 front of his uncle and having to testify against
21 his uncle, and doing the best job that he can,
22 and telling you that he is generally scared of
23 his Uncle Steve, but does the best he can in
24 telling you that he and Brendan Dassey, his
25 brother, get off the bus, sometime between 3:40

1 and 3:45, everyday.

2 That on this day, on Halloween, he
3 remembers particularly, while walking home, while
4 coming down their dirt road towards their house,
5 that he saw his Uncle Steve walking from his
6 trailer and putting a bag, a white bag is what he
7 described, a white plastic bag, into an already
8 burning burn barrel. Okay.

9 So by 3:45 or 3:50 in the afternoon, the
10 State is arguing, Mr. Avery is already getting
11 rid of Teresa Halbach's stuff. The electronics,
12 the phone, the PDA, the digital camera are
13 already being disposed of, they are already being
14 destroyed at that time.

15 Mr. Dassey, importantly, also testified,
16 and please remember this, before our break,
17 Mr. Dassey testified that the Suzuki and the
18 snowmobile that you see pictures of inside of the
19 garage, on the 31st of October, weren't in the
20 garage, remember that. They weren't inside of
21 the garage as the picture shows. But the 31st,
22 the Suzuki and the snowmobile are on the side of
23 the garage, leaving this garage opened, at least
24 opened to the point where something else can fit
25 into that particular garage.

1 Brings us to our next witness, who's
2 Mr. Fabian. Mr. Fabian is Earl Avery's friend,
3 that they were rabbit hunting. Mr. Fabian told
4 you that he parked the golf cart, that the burn
5 barrel was already burning, that he smelled the
6 distinct odor of plastic burning at the time,
7 that the smoke was so bad that, although parked
8 in a golf cart to the south or next to the burn
9 barrel, eventually he had to move this golf cart
10 because the smell of burning plastic and the
11 smoke was getting so bad.

12 Mr. Fabian also tells you, at that time,
13 just before dark, he places that just before
14 dark, when the rabbit hunt was just about
15 completed, that Mr. Avery's garage was closed.
16 He couldn't see what was inside of the garage.
17 There isn't any SUV any more. There is nothing
18 to be seen. The garage is closed, but the Suzuki
19 and the snowmobile are on the side of the garage.
20 All right.

21 So I have given you five so far, five
22 pieces of evidence, five pieces of crucial
23 evidence of the evidence that the State believes
24 is necessary to prove this case, beyond a
25 reasonable doubt.

1 When you return, after whatever break
2 the Judge may give you, I will conclude, then,
3 with the other pieces of evidence and instruct
4 you, or at least argue to you, what I believe
5 that you should do, after considering all these
6 pieces of evidence.

7 It's a good time for a break, Judge.
8 Thank you.

9 THE COURT: All right. Members of the
10 jury, what we're going to do is this, we're going to
11 take a break of 10 minutes or so, at this time, then
12 come back and have the State complete its closing
13 argument. I have informed the lunch people to bring
14 in lunch at quarter to one. So, because we will be
15 eating lunch later than normal, if you want to have
16 a snack during the break, go ahead and do so.

17 And, again, I will remind you not to
18 begin discussing anything about this case until
19 all the closing arguments have been given and
20 until I tell you to begin deliberating. You are
21 excused at this time.

22 (Jury not present.)

23 THE COURT: You may be seated. Mr. Strang,
24 you have something you wish to place on the record
25 at this time?

1 ATTORNEY STRANG: I do. Thank you. I
2 initially interrupted Mr. Kratz's argument,
3 reluctantly, and trying to be polite and somewhat
4 circumspect about my comment that it was unwise and
5 improper to describe facts as uncontested. I waited
6 until we got to the PowerPoint slide that said fact
7 number four, and by my recollection, that was the
8 fourth time that the -- counsel for the State
9 returned to the theme of an uncontested fact.

10 As I say, I was trying to be
11 circumspect, but the concern, of course, was that
12 this comes too close to commenting on the
13 decision of the defendant not to take the stand.
14 Or, for that matter, not to offer witnesses that
15 he did not.

16 Mr. Kratz, in responding to my
17 interruption and objection, I think made the
18 problem substantially worse. I don't have
19 committed to memory, we could go back to the
20 court reporter's notes if we need to, but the
21 rejoinder from counsel for the State was that,
22 you know, if you remember a witness being called,
23 or if you remember someone saying this didn't
24 happen, something to that effect, well, then
25 that's fine, but, of course, the suggestion was

1 that the witness was not called and no one did
2 speak up to contest the fact.

3 Doesn't warrant a mistrial, but comes
4 way too close to commenting on the Fifth
5 Amendment privilege not to testify and I think
6 warrants some curative step, either by counsel
7 himself, or by the Court, or both.

8 THE COURT: Mr. Kratz.

9 ATTORNEY KRATZ: That's absurd, Judge. I
10 get to, on closing argument, suggest that Mr. Strang
11 is going to place a theory of defense into play in
12 this case. There's absolutely no evidence that
13 would suggest that. If there are facts that I
14 believe have not been contested, either by
15 cross-examination, or are not contested through the
16 defense calling its own witnesses, that's fair game
17 for me to comment upon.

18 I have not, and I will not, comment on
19 Mr. Avery's decision not to take the stand. I
20 understand and the jury has been instructed that
21 the defense, or the defendant, I guess, is how
22 the instruction reads, has no burden in this
23 case, but certainly if something is not
24 contested, if there is a fact that I believe has
25 been proven and is an important part of the

1 State's theory of the prosecution and there
2 hasn't been a challenge, at least through
3 evidence in the case, I feel very much so
4 entitled to comment upon that.

5 THE COURT: Anything else, Mr. Strang?

6 ATTORNEY STRANG: Well, it's certainly fair
7 game to argue what the State, or for that matter the
8 defense, thinks the evidence shows. It's fair game
9 to argue -- a little bit more dangerous for the
10 State, I suppose -- but fair game to argue what the
11 evidence does not show, draw conclusions from the
12 evidence.

13 But describing something as uncontested
14 or, you know, we could go to other cases, this
15 word hasn't been chosen here, but we could go to
16 other cases where un-rebutted or unchallenged
17 comes, I think, way too close to commenting, not
18 on the strength of the evidence, or the
19 conclusions, affirmatively, the State wants
20 drawn, but on the decision of the defendant not
21 to testify to something himself, or not to call a
22 witness on a point. And I don't think the
23 suggestion was absurd at all. But that's at
24 least for this Court, in the first instance, to
25 decide.

1 THE COURT: All right. The note I took
2 down at the time the objection was made that the
3 specific alleged fact involved I believe had
4 something to do with the vehicle being transported
5 to Madison for inspection. Frankly, that wasn't
6 something that struck a chord in my mind that
7 somehow there was any relationship with the
8 defendant's decision not testify.

9 I appreciate the fact defense counsel
10 has alerted the Court to that possibility. I
11 agree that the -- there is the potential, when
12 you start using the approach that's been used as
13 far as undisputed facts, I can see where it could
14 lead to that. I do not know what the rest of the
15 State's argument is going to be.

16 At least based on what I have heard so
17 far, I do not believe it relates in any way to
18 any suggestion to the jury that somehow they
19 should take the defendant's failure to testify
20 into account in evaluating the State's evidence,
21 based on the facts that have been discussed.

22 ATTORNEY STRANG: And I -- I want to add, I
23 will -- I will go one step further, I agree with the
24 Court that the particular fact described, where
25 actually Mr. Kratz quite acceptably is using fact

1 number one, and fact number two, fact number three,
2 really, to describe a constellation of facts around
3 some single event, I agree that -- and I haven't
4 moved for a mistrial -- that this was not a topic on
5 which a juror would say, boy, the one who probably
6 has the best knowledge about that is Mr. Avery. And
7 that's something exclusively within Mr. Avery's
8 knowledge.

9 I agree and I will go the one step
10 further and say that facts one, two, and three,
11 similarly, were not matters that immediately
12 would suggest whether the defendant is in the
13 best position to know. I used the term,
14 initially, unwise and incorrect, because I wanted
15 to alert counsel and the Court, that if, you
16 know, we could get to a point where this would
17 become a real serious concern.

18 Unfortunately, the response made the
19 concern more immediate. Still not rising to the
20 level of requiring a mistrial, in my view, and
21 perhaps the Court's admonition now will be
22 enough, but I -- if -- if we go much further down
23 there, I will be heard again.

24 THE COURT: I'm assuming that both parties
25 are aware there are permissible and impermissible

1 ways of suggesting the same thing. If the State
2 says there's no evidence in the record to show this
3 or that, then that's generally okay. But if the
4 argument relates to something that might implicate
5 the defendant's decision not to testify, and the
6 language, whatever it may be, is construed as
7 something that somehow the defense should have
8 produced, then that danger arises.

9 I'm assuming that all counsel for the
10 State understand that. I haven't heard that yet.
11 And I'm trusting, Mr. Kratz, we're not going to
12 have to go there.

13 ATTORNEY KRATZ: Except on the planting
14 issue, Judge, where the defense has affirmatively
15 put that into play. The State didn't. And as to,
16 have we heard anything about planting, I do intend
17 to go into that. And that may be on rebuttal. I
18 may wait to see what the defense does. And with the
19 Court's comments, I may, in fact, do that.

20 But I at least want the Court to
21 understand that since the defense has asked for
22 the theory of defense, and since the defense has
23 intended, throughout this trial, to discuss
24 planting of evidence as its theory, I think my
25 comment on the lack of evidence, at least on that

1 issue, without mentioning Mr. Avery, without
2 mentioning his decision to testify or not, is
3 certainly fair game in my argument, or whether I
4 choose to do it now, or whether I choose to do it
5 in my rebuttal.

6 ATTORNEY STRANG: Well, and you'll know
7 when we get there. I simply would point out now
8 that planting and being framed is not an affirmative
9 defense. It's not something on which a defendant
10 has a burden of production or going forward, let
11 alone a burden of persuasion. So this would be
12 different if the defense here were self-defense, or
13 involuntary intoxication, something like that, it's
14 an affirmative defense.

15 I, too, trust counsel is aware of the
16 boundaries and now I have elaborated my concerns.
17 But I do want to be clear, the defense that's
18 been presented here is not an affirmative
19 defense. So we'll ...

20 THE COURT: All right. I'm sure, now that
21 the matter has been brought to the parties'
22 attention and the parties will be careful about it.
23 We'll take a break at this time. I guess we will be
24 resuming in 10 minutes. The jury gets a little
25 longer.

(Recess taken.)

THE COURT: Mr. Kratz, I understand you are now on mike seven.

ATTORNEY KRATZ: I am. I switched mikes, Judge, they couldn't hear in the back, so. I don't think the jury was having a problem hearing.

THE COURT: All right. You may resume.

ATTORNEY KRATZ: I appreciate it. Thank you, Judge.

Fact number six, we talked about the instrumentality of the murder and here we talk about the .22 caliber rifle. Remember both the felon in possession of a firearm charge, the instruction that was given to you, it's not ownership of the weapon, it is possession of. You heard the Judge give you the instruction that it is the exercise of control, especially in an area where an individual would have control of that weapon becomes important.

Mr. Johnson, although a entertaining fellow, also provided important information for the jurors that he certainly knew of the .22 caliber rifle, owned the black powder rifle as well, and knew that they were hanging just a few feet above Mr. Avery's bed. Also knew of the

1 ammunition. We have seen photographs and we have
2 actually seen these rifles.

3 Let me just tell you, and this goes to
4 Count 3, and this, interestingly, might be the
5 last time I talk about possession of a firearm by
6 a felon. You are to, and you must, consider the
7 fact that the defendant was previously convicted
8 of a felony that element has been proved and
9 we're now just responsible to prove to you
10 whether or not he possessed those firearms.

11 Either of these weapons are rifles,
12 either of these weapons qualify as weapons for
13 possession of a firearm. We were -- of course,
14 claim in this case that the .22 caliber Marlin
15 not just was, what's called constructively
16 possessed, that is, over an area of which
17 Mr. Avery had control, but we will actually be
18 arguing to you that Mr. Avery handled, held that
19 weapon in his hands, when Ms Halbach was killed.

20 Some quick testimony, or at least a
21 review of some testimony on these issues.

22 Mr. Tyson, although he didn't seize the guns,
23 observed the guns that first night, on the 5th.
24 Mr. Kucharski is the gentleman who actually
25 seized the weapons on the 6th.

1 So there was some further evidence about
2 the dogs demeanor being vicious, and that is
3 further testament as to why the burn pit, or the
4 burn area, wasn't searched before it was.

5 Mr. Austin was kind enough to provide
6 us -- the trooper reconstruction expert was kind
7 enough to provide us with some diagrams and
8 things that have helped us throughout this case.
9 And I think they have been very helpful to the
10 jury.

11 Deputy Kucharski also, however, found 11
12 shell casings in the garage on the 6th of
13 November; obviously, in plain view, obviously
14 something that you should consider.

15 When we move to March, though, when we
16 move to March 1st and 2nd, when there's been
17 additional search warrants being executed on --
18 in Mr. Avery's garage, an important discovery
19 occurs, that you heard about. And that is, two
20 separate bullets, a bullet up in front here where
21 we have tent number nine, and a bullet underneath
22 this compressor, actually having to move these
23 items by tent number 23, which is the bullet
24 which later we'll find has Teresa's DNA on it.

25 Remember the different kind of search

1 that this is in March, compared to November when
2 the agents and the officers talked about taking
3 all of this junk and moving it one by one, one
4 piece by one piece, and doing that kind of
5 search. In March, the officers, pursuant to
6 their search warrant, did, in fact, just that.

7 Mr. Newhouse, we heard from the firearms
8 expert. I think the kind of expert that you
9 might hope and expect to find, from the Crime
10 Lab, talking about shell casing matches and also
11 bullet matches, at least the bullet that had
12 Teresa's DNA on it.

13 All of these photos and all this
14 evidence is in evidence in this case. The
15 bullets that were taken from Mr. Avery's bedroom,
16 you will be able to see, no pun intended, bear
17 the same letter as those that were identified by
18 Mr. Newhouse. That is, as having been shot from
19 that specific gun, that is, the Marlin Glenfield
20 .22 hanging over Mr. Avery's bed. That's
21 important, that's important stuff, that the shell
22 casings that are found in this case are from that
23 very same weapon.

24 We heard about the bullet analysis as
25 well, the bullet with the DNA is from that very

1 same weapon. And interestingly and importantly,
2 Mr. Newhouse tells you, to the exclusion of all
3 other weapons. All right. That's the kind of
4 identification that these experts can do, at
5 least the ballistics and firearms experts. And
6 so the .22 caliber bullet is an important fact.

7 Fact number seven, some background
8 information. We will hear, or I'm sure -- I'm
9 sorry, you have heard about the prior *Auto Trader*
10 contacts, that is, prior contacts, the history
11 between Steve and Teresa. You heard from Mr.
12 Pearce, that she and Mr. Pearce had talked about
13 Ms Halbach already having gone to the Avery
14 property, something of the nature of, you are not
15 going to believe whose photos we were taking.
16 And you heard the testimony of Mr. Pearce about
17 his reminder not to -- generally, reminder not to
18 go into people's homes, or not to have that kind
19 of contact with them.

20 Ms Pliszka talked about the history,
21 knowing about the history. Ms Pliszka is from
22 *Auto Trader*; she's the receptionist. And the
23 important part, at least for this part of our
24 argument, is that that photographer, Ms Halbach,
25 had been there on a number of occasions before.

1 And when Mr. Avery called at 8:12 on the
2 31st of October, he asked for that same
3 photographer. Although, he didn't use the name
4 Teresa, asked for that same female photographer
5 that had been out there before. Again, although
6 using a different name, although using the name
7 B. Yanda, he specifically was asking for Teresa
8 to come out.

9 You heard from the supervisor of *Auto*
10 *Trader*, Ms Schuster, that Ms Halbach had taken
11 six prior photos at the Avery salvage property.
12 And we put these six photos, early on, into the
13 case, into evidence. You can note on most of the
14 photos, just how close they are in proximity to
15 Mr. Avery's trailer.

16 These photos, as you heard, were taken,
17 the first on June 20th, and the last on October
18 10th, of 2005. I think the inference that you
19 also may want to draw on as you think weeks ahead
20 from the presentation of this evidence is, after
21 these photos are taken, after a car goes into
22 *Auto Trader Magazine*, what's done with it.

23 You can actually answer that question by
24 some of the other photos that I showed you.
25 What's done with these cars doesn't do Mr. Avery

1 any good, or whoever is selling a car, any good,
2 to leave these items back by Mr. Avery's garage,
3 or back by his trailer.

4 But after the *Auto Trader* picture is
5 taken, these items are put up on the corner, what
6 is called the corner by the business property.
7 We know that because of Ms Buchner, Lisa Buchner,
8 when she testified in this case, that she
9 testified that she saw a woman taking pictures of
10 cars that were for sale. And, in fact, we
11 pointed out these two vehicles, the Grand Prix
12 and the Blazer, that Ms Halbach had earlier, or
13 just within the last month or six weeks had taken
14 photographs of.

15 And, so, when a photo is taken, when it
16 goes into the *Auto Trader*, and when it has to be
17 sold, it makes sense to put those vehicles up in
18 a place where people will see them. People that
19 are coming into the auto salvage business, people
20 that will drive by, as you remember the overall
21 view of this property, that will drive by those
22 vehicles and might naturally get out and take a
23 picture and they might want to buy that kind of
24 vehicle.

25 Now, we have also heard, and I will

1 argue, importantly, that the van that Ms Halbach
2 took a picture of, remained in exactly the same
3 location, remained there from the 31st, when Ms
4 Halbach took the picture, at least through the
5 5th, when the officers took control of the scene.

6 Now, I'm going to argue and you should
7 ask yourself why, you should ask yourself why,
8 what inference can I draw by that. I will argue
9 that the inference is that Mr. Avery knows that
10 the van is not going in the *Auto Trader Magazine*.
11 Mr. Avery knows that that picture is never going
12 to make it to *Auto Trader*, because he's taken the
13 camera and he's burned it. He's put it into the
14 burn barrel.

15 There is no reason to move the van from
16 its original location near Mr. Avery's property,
17 up towards where the other cars that are for sale
18 on this property. Again, has inferences that you
19 can draw, or that you don't have to draw, but,
20 again, I'm arguing that it's something that you
21 may want to consider, again, to reconcile Ms
22 Buchner's testimony, what she had given.

23 Fact number eight, we're able to piece
24 together some of the history of Teresa for the
25 31st. It's what's called a timeline for Teresa

1 Halbach. And we were able to do that through all
2 of these particular witnesses.

3 Ms Pliszka, of course, the 8:12 call for
4 Mr. Avery triggers Ms Pliszka's 9:46 voice
5 message call to Teresa. Remember Ms Pliszka's
6 testimony, again, this is hard, because it's five
7 weeks ago. Her testimony was, she left the voice
8 mail that there's a person who wants you to come
9 out and do a shoot. There is a phone number
10 that's been left.

11 You will hear later on in my
12 presentation, that at 11:43, Ms Halbach calls
13 that number. It's the voice message that we hear
14 to B. Yanda, to Barb Yanda's house saying, I'm
15 able to come out today and to take that -- to
16 take that call. But it's this 9:46 call, when
17 we're setting the timeline for Teresa, where was
18 she, excuse me, at all these times that become
19 important.

20 The most, probably, important thing that
21 Ms Pliszka talks about is the call at 2:27, the
22 call to Teresa, which is verified through the
23 phone records that she did receive a telephone
24 call at 2:27, from *Auto Trader Magazine*. That
25 telephone call from Ms Pliszka, to Ms Halbach, is

1 not so important for talking about
2 trick-or-treating and the things that Dawn
3 Pliszka said that they were talking about, but
4 what came from Teresa's side of that
5 conversation.

6 Remember the testimony from Dawn Pliszka
7 that Teresa said, I'm on my way to the Avery's.
8 All right. I'm on my way to the Avery's. So at
9 2:27, this is the best, at least from a timeline
10 standpoint, the best opportunity for you to put
11 these things into place and to determine what
12 time was it that Teresa arrived.

13 Mr. Remiker, an investigator in this
14 case, testified that, upon searching the
15 residence of Barb Yanda, he came across this
16 particular voice mail: Hello. This is Teresa
17 with *Auto Trader Magazine*, the photographer. And
18 I'm just giving you a call to let you know that I
19 can come out there today, in the afternoon. And
20 it will probably be around 2:00 or, you know, a
21 little later. If you could, please, give me a
22 call back and let me know if that will work for
23 you, because I don't have your address or
24 anything. So I can't stop by without getting a
25 call back from you. And my cellphone is

1 737-4731. Again, that's Teresa, 920-737-4731.

2 Thank you.

3 Other than the obvious impact that that
4 call has, it has substantial evidentiary value.
5 That call from Teresa talks about when she's
6 coming out to the property. The call from Teresa
7 says it will be some time after 2:00, or even
8 around 2:30, which turns out to be almost exactly
9 correct.

10 But she also indicates that, because of
11 the name that was given, because of the number
12 that was called, she doesn't know how to get
13 there because she hasn't been there. Well,
14 that's not true. That's not true, because if
15 Steven Avery would have given his name, Teresa
16 Halbach wouldn't have had to say, I don't know
17 how to get there, or I haven't been out to the
18 property before.

19 And so the purpose what I argued, or at
20 least what I -- the opening statement that I
21 gave, was that Mr. Avery lured Ms Halbach out to
22 the property, I think is a valid inference for
23 you to draw. But more importantly, it's the
24 timing, more importantly it's when Teresa says
25 through this voice mail message, when it is that

1 she's planning to come to that location.

2 Mr. Schmitz, at 1:30, testified, we put
3 the rest of the timeline together for you. So at
4 1:30 we know Teresa is out at the Schmitz
5 property. We know that she's wearing a light
6 colored or a white shirt, a waist length jacket.
7 We know she's wearing jeans. We know she's there
8 for 10 minutes. She leaves an *Auto Trader* book
9 and she leaves a receipt.

10 Right after she is done with Mr.
11 Schmitz, she goes to the Zipperer residence,
12 sometime between 2:00 and 2:30. In fact, you
13 will note from the calls and the testimony later
14 from the cellphone people, that at 2:12 a call is
15 made to the Zipperer residence. You heard some
16 reference to that.

17 It may have been lost in some of the
18 other testimony, about Teresa being lost and on
19 her way. But Teresa finds her way there. And we
20 know that about 2:15 or so, she does her photo
21 shoot at the Zipperer's. We also -- excuse me --
22 We also know, just like the Schmitz photo shoot,
23 just like every other photo shoot that you have
24 heard testimony about, that it lasts 10 minutes.
25 She leaves an *Auto Trader* book. She leaves a

1 receipt, which is actually called a bill of sale.
2 These things are particularly important.

3 You will see testimony later, or you
4 will see exhibits later, that were seized from
5 Mr. Avery on the 5th, that exactly the same *Auto*
6 *Trader Magazine* is found on his computer.
7 Exactly the same kind of bill of sale is found.
8 So the significance, or the habit, if you will,
9 of these contacts, become critically important.

10 Ms Schadrie, again, although providing
11 some confusing testimony that had to be cleared
12 up by a Mr. Zimmerman, later, at least provided
13 the records, at least provided what has been
14 received as Exhibit No. 361, the cellphone
15 records for Teresa Halbach.

16 Ms Schadrie provides some important
17 parts of this particular record. Specifically,
18 at 11:43, that was the call to Barb Janda's that
19 you heard about. The answering machine call that
20 was made.

21 You have heard about the call from -- at
22 2:27, from Ms Pliszka, I'm on my way to the
23 Avery's. And we have heard about -- or the
24 records reflect this last call at 2:41.

25 Now, the testimony, you have to next

1 turn to the testimony of Mr. Zimmerman, Exhibit
2 No. 372. And although that call starts at 2:41,
3 it's a voice mail. And on page two of document
4 372, page two of this exhibit, we learned,
5 importantly, this incoming call to Teresa is
6 never retrieved. It's never retrieved by Teresa.
7 All right.

8 Look at Teresa, how many times she
9 checks her voice mail. Mike Halbach talked about
10 Teresa Halbach being very conscientious about
11 checking her voice mail. And after, sometime
12 after her visit, assuming she wasn't harmed or
13 killed by Mr. Avery, you would have expected her
14 to check her voice mail.

15 Mr. Zimmerman also cleared it up and
16 said that after 2:41, on the 31st, this
17 particular cellphone, the cellphone of our
18 victim, Ms Halbach, was out of service. Wasn't
19 used after that particular point.

20 Remember the testimony that by 3:30 a
21 bag of something is being placed in the burn
22 barrel where this particular phone is later
23 found. It all starts to make sense now. It all
24 starts to be put together. Again, the
25 combination of observations of Blaine Dassey,

1 combination of phone records, combination of
2 explanation of voice mails, combination of
3 testimony from Mike Halbach.

4 You put all of that together and it
5 paints the picture for you. It provides the
6 timeline for you, for Teresa Halbach, not just
7 what happens to her phone, but by inference, what
8 happens to her, and when, when it's happening to
9 her. All right.

10 We talked more about the timeline and we
11 heard from Bobby Dassey, again, in the same kind
12 of a position to be -- his credibility to be
13 weighed by you, but is an eyewitness. Again, an
14 eyewitness without any bias. It is a individual
15 that deserves to be given a lot of credit.
16 Because sometime between 2:30 and 2:45 he sees
17 Teresa Halbach. He sees her taking photographs.
18 He sees her finishing the photo shoot. And he
19 sees her walking up towards Uncle Steve's
20 trailer.

21 Now, we heard about taking a shower.
22 And we heard about him leaving for hunting. That
23 all becomes important and becomes more important
24 when, after leaving for hunting, he sees Teresa's
25 SUV still parked next to the van, next to his

1 mom's van that's for sale, but Teresa is nowhere
2 to be found. All right.

3 If this event, if a photo shoot is only
4 supposed to take between five and 10 minutes, and
5 you see the habit, and you see that that's how
6 long that it does take, this is a longer period
7 of time. Teresa, although we don't know, that
8 is, we don't have an eyewitness seeing her going
9 into Mr. Avery's trailer, that's the inference
10 that the State is asking you to draw. She's
11 walking towards the trailer. She's walking
12 towards Mr. Avery's property, after doing the
13 photo shoot.

14 Mr. Dassey is looking out this window, a
15 clear view, sees the pictures being taken of the
16 SUV, a clear pathway, and that as she walks
17 towards Mr. Avery's, that's the last Ms Halbach
18 is seen. That's the last she's seen alive. All
19 right. So that's the timeline. That's the
20 pathway, if you will, towards what happens to Ms
21 Halbach.

22 Now, the State has done the same thing
23 with Mr. Avery's timeline; that is, through
24 conversations and through observations, the same
25 thing with Mr. Avery, from the other side of the

1 coin, if you will, what's Mr. Avery doing on the
2 31st of October.

3 We hear, at least, at 8:12, Mr. Avery is
4 making a call asking for that same female
5 photographer to come out and visit him at his
6 property; although, he uses a different -- a
7 different name. And from a timing standpoint,
8 although we don't have Mr. Avery on the phone, we
9 do have Teresa on the phone.

10 But Ms Dohrwardt helps, from that
11 perspective. Ms Dohrwardt, who is a witness for
12 Cellcom, Mr. Avery's cell provider, provided you
13 with those records and provided you with
14 testimony of those records. She's a tech support
15 person. She's a technical individual who can
16 tell you more about those calls. Told you about
17 the 8:12 call, but also these two important calls
18 to Teresa Halbach's cellphone, using what's
19 called the *67, or blocked feature, where the
20 recipient of that call can't tell who it is
21 that's calling.

22 The State is calling the 4:35 call a
23 alibi call, if you will. After her phone is
24 already burned. After Mr. Avery knows that the
25 phone is out of service, which is reflected in

1 what you saw, not only by Mr. Zimmerman's
2 testimony, but by also -- by the records there's
3 no reason to call her phone. He knows where her
4 phone is.

5 Mr. Avery knows where Teresa's phone is,
6 but Mr. Avery is also -- has the ability to think
7 ahead, has the ability to know that these phone
8 records may, in fact, be gleaned, or may, in
9 fact, be reviewed at some point in the future.
10 And so, although he doesn't block, because there
11 is no reason to block the 4:35 call, he still
12 calls Teresa Halbach. And you can see, or you
13 can ask for those records if you need to.

14 The rest of the application, or putting
15 together of Mr. Avery's timeline comes from
16 eyewitnesses, comes from people like Blaine
17 Dassey, at 3:45, seeing him in the burn barrel
18 (sic). You have to skip ahead, I guess, to about
19 11:00, when he sees that image that I talked
20 about, where he sees this large fire behind Uncle
21 Steve's garage. Again, the date of the fire, the
22 time of the fire, becomes ever so important.

23 There shouldn't be any question, at
24 least, any more, at this time, regarding the
25 place of the investigation, or the direction of

1 the investigation. Blaine certainly adds to
2 that.

3 Mr. Fabian provides nothing other than
4 around at dusk, plastic is being burned and he
5 sees that.

6 But Mr. Tadych, who at the time was the
7 boyfriend, is now the husband, of Barb Janda,
8 provides testimony that between 7:00 and
9 7:30, the fire is already going. Mr. Avery
10 already has a large fire. Again, the testimony
11 was flames above the garage roof, already has a
12 big fire going at that particular time.

13 The State will argue and we'll ask you
14 to adopt the inference, that between 7:30 and
15 7:45, Teresa Halbach is already killed. We know
16 that because Mr. Avery is planning to, or in the
17 process, after dark, which is between 7:30 and
18 7:45, of destroying, mutilating and burning her
19 body.

20 Fact number 10, although the fire is
21 included in the aspect of the timeline for
22 Mr. Avery, I have made Item No. 10 or fact number
23 10, it's own fact. These two witnesses, again, I
24 just wanted to reiterate, from Mr. Tadych, in a
25 position of where he is parked, remember his

1 testimony, that he was parked in the circle drive
2 and could clearly see the fire at the time. And
3 the same thing from Blaine Dassey at 11:00, after
4 he gets back from trick-or-treating, there isn't
5 any obstruction to the view of that particular
6 fire.

7 Remember the later evidence, as to the
8 amount of time that's necessary to destroy, or to
9 cremate a body. This is going to come later,
10 from some experts in the testimony, or at least
11 when we talk about that later. But at or about
12 1600 degrees, which actually was the defense
13 expert, Mr. Fairgrieve, when talking about BTUs
14 and 300,000 BTUs per average tire.

15 That's the amount of heat that's thrown
16 off by a tire. Plenty of fuel, plenty of solid
17 fuel to burn, or incinerate, or cremate a human
18 body, that that would take between an hour and a
19 half and two and a half hours, at that 1600
20 degree level. If it starts at, the very latest,
21 7:30 or 7:45, and it's still going at 11:00,
22 that's plenty of time. That's an amount of time,
23 through the timeline, and through the fire, and
24 through a combination of witnesses, for you, the
25 jury, to conclude that, in fact, that body was

1 incinerated, was mutilated, was cremated. As a
2 way, and for the reason, to hide a crime that had
3 already been committed. The crime is obvious,
4 it's a crime of homicide.

5 After the burning event, we ask
6 ourselves what's left, what's in the burn area.
7 And we talk now about some highly specialized
8 experts. We talked about, and we hear from,
9 Mr. Sturdivant, who's an arson investigator who
10 found the zipper, which I guess is important.

11 But more importantly, he found the
12 bones, the small bone fragments intertwined, or
13 mixed in with the steel belt from tires. All
14 right. The bones being intertwined and mixed in
15 is the State's, or one of the State's, strongest
16 argument for this being the primary burn site.

17 Mr. Sturdivant also talked about the dog
18 being vicious. This particular picture, I think
19 it's Exhibit No. 50, is probably all you need to
20 see. It's all you need to know as to why
21 officers were reluctant to kind of check out and
22 investigate this particular area.

23 This dog, whose name is Bear, we heard,
24 who's a German Shepherd, we heard being described
25 as vicious, who Deputy Kucharski said the only

1 way they could get by that dog was to destroy or
2 to kill the dog. Certainly was guarding or had
3 access to this entire area. Not only does the
4 testimony prove that, but this particular photo,
5 before any excavation, before any processing,
6 which is obvious has been done, has occurred.

7 Mr. Ertl, we heard, was the first Crime
8 Lab person with Mr. Sturdivant to get, on the
9 8th, to that burn area. And, importantly, we
10 heard about the careful processing, that he did
11 his best. Although a shovel was used, it wasn't
12 a, I think the word, the term "scoop and swoop",
13 wasn't that at all. It was very carefully done
14 to recover what the agents could at the time in
15 order to get those items to the Crime Lab, to
16 determine, first of all, are they human;
17 secondly, are they female; and, thirdly, do they
18 belong to our victim.

19 We need to know those things, obviously,
20 at the time. And photographs that were shown to
21 Mr. Ertl, and as you have seen these photographs,
22 the car seat that was used as additional fuel in
23 this case. The tires you will see, a hose, and
24 you will see rakes, and you will see shovels, and
25 other instrumentalities, what I call, at least,

1 are instrumentalities of mutilation, that is,
2 tending the fire, or without being particularly
3 insensitive, chopping up the remains of the body
4 as it's being burned, to make sure that a total
5 consumption occurs in these cases. You will be
6 able to see some of those exhibits to show that
7 that was in fact done.

8 Mr. Pevytoe, we hear later, DCR -- DCI
9 agent who, on the 10th, takes over the processing
10 of the burn area, does a more detailed
11 examination; here's where we hear the word
12 excavation, does a couple of things. First of
13 all, we hear that on the 9th and 10th he talks to
14 the anthropologist. He talks to Leslie
15 Eisenberg. He gets some information from Ms
16 Eisenberg as to the processing of the scene.

17 Mr. Pevytoe, as you heard, however, also
18 recalled that the bone fragments were intertwined
19 with the steel belts and, I believe, rendered
20 similar opinions as to the primary burn site.
21 Mr. Pevytoe also eliminates other burn locations.
22 Mr. Pevytoe's opinion about the smelter and about
23 the wood burner, whatever that may have had to do
24 with, on another part of the property, looked in
25 both, crawled up in, put his hands in, moved

1 things around. Didn't find any human remains.
2 Didn't find anything at all that would suggest
3 that that was a primary burn area.

4 And so who's involved, of the
5 individuals that law enforcement is supposed to
6 focus on, who's involved in the mutilation
7 process, who's involved in covering up the
8 homicide. Again, common sense should come into
9 play here, you don't leave that on the steps when
10 you walk into the courtroom. When the burn area
11 is directly behind Mr. Avery's garage, when it's
12 only a few feet from Mr. Avery's trailer, that's
13 the kind of common sense that you should and can
14 use in this case. Again, the evidence keeps
15 pointing only to one individual.

16 Additional processing after the fact,
17 that is, after the items are recovered, occur by
18 DCI agents and Ms Eisenberg, the anthropologist,
19 the doctor. Here is Mr. Heimerl, they find five
20 of the six Daisy Fuentes rivets.

21 Demonstratively, we had these jeans purchased for
22 you so that you can look at where the Daisy
23 Fuentes rivets are located.

24 These are rivets that hold blue jeans,
25 dress type blue jeans that Katie Halbach

1 indicated not only was the kind of blue jeans
2 that Ms Halbach owned, but after Ms Halbach's
3 death, remember, weren't there. They looked for
4 them, those are the pair of jeans, that is, the
5 Daisy Fuentes jeans, are the ones that are gone.

6 So what does that mean, five rivets are
7 found that say Daisy Fuentes on it. They are
8 mixed in with the human fragments. The
9 inference, of course, is that those jeans, the
10 clothing of Ms Halbach, are burned at exactly the
11 same time. There is a picture of Katie.

12 And, again, the credibility that her
13 testimony should be given, I think, is very, very
14 high. They are sisters. Katie knows the kind of
15 clothes. She knew, in fact, made fun of these
16 being old person jeans that her sister had
17 purchased, showed them when she purchased the
18 Daisy Fuentes jeans, would know, and, in fact,
19 was asked to and did look for those jeans, they
20 were missing.

21 We also need to identify the remains.
22 We need to identify who is the person that was
23 burned, who is this individual. We have heard
24 testimony that it was just one person, that it's
25 only talking about one person. But we still have

1 to, although, we can guess I suppose, or
2 speculate, that it's Teresa Halbach. We have to
3 show you, through evidence, that it's Teresa
4 Halbach.

5 We first do that through Dr. Donald
6 Simley. Mr. Simley, although unwilling because
7 of his scientist nature, make 100 percent match,
8 used these words, it's as close to a positive
9 match as you can get, using one tooth.

10 Dr. Simley talked about tooth No. 31, from Ms
11 Halbach's dentist, Dr. Krupka, having been
12 received.

13 Here's a blow up of that particular
14 tooth. And here is an x-ray of this particular
15 structure that was recovered from the burn area,
16 the fragmented and delicate, what Dr. Eisenberg
17 talked about were, dental structures. You can
18 look for yourself as to the similarities,
19 Dr. Simley's used in disaster relief efforts and
20 disaster kind of identifications and I think can
21 help you with that particular process.

22 The charred remains, one piece of bone
23 and tissue was recovered. One piece. One piece
24 was not completely burned up, was not completely
25 charred, to the point where a nuclear

1 identification by Ms Culhane could be made.

2 And although she made a partial profile,
3 that is, in 7 -- they are called loci -- 7 of the
4 13 areas that all labs look for to make a
5 positive match, 7 out of 7 match was made. She
6 gave you the frequency number, if you recall,
7 that being one in a billion, that's with a B,
8 that an individual would randomly have this --
9 this DNA.

10 So the State believes, and the State
11 argues, that there isn't any question that it is,
12 in fact, Teresa Halbach, and her bones, and her
13 remains, and her teeth, that are recovered just a
14 few feet behind Mr. Avery's garage and trailer.

15 Leslie Eisenberg, the State argues, is
16 an amazing expert, an amazing person, one of only
17 a handful of Board Certified Forensic
18 Anthropologists in the entire country. She
19 happens to live here in Wisconsin.

20 Leslie Eisenberg, you heard, was brought
21 on early in the case. And she says a lot about
22 this case and says a lot about what is important.
23 Her expertise, again, she talks about being one
24 of these people that goes to disaster scenes and
25 helps make these identifications.

1 But she didn't just look at some
2 pictures or some reports, she was actually
3 involved in the sifting and the sorting of these
4 bones. She was handling these bones. You could
5 tell how fragile they were, how very delicate
6 some of the dental structures was.

7 She was able to identify these bones as
8 having come from an adult female, no older than
9 age 35, believing -- or excuse me, finds these
10 entrance wounds, that we'll talk about in just a
11 minute, that happened before the burning episode.

12 Dr. Eisenberg testified there was a
13 clear attempt to obscure the identity of an
14 individual. By the way, that's evidence, that's
15 an opinion, that's important to the mutilation
16 count. All right.

17 Obstructing or obscuring the identity
18 for the purpose of covering up a crime, is the
19 essence of mutilation of a corpse. And that was
20 the testimony of Dr. Eisenberg.

21 Importantly, though, Dr. Eisenberg,
22 because she saw all of these bones, because she
23 was involved for such a long period of time, was
24 able to render the opinion that the primary burn
25 area, the primary burn site was behind

1 Mr. Avery's garage. And, again, talked about, or
2 commented on the great take -- care taken by
3 arson agents in the recovery of these bones.

4 Dr. Eisenberg goes through the labor
5 intensive method of the recovery of these
6 particles and pieces of bone, puts them together
7 again, as to the face, as to some of the other
8 areas of Ms Halbach and then able, again, with
9 the assistance of Mr. Austin, is able to show you
10 just from where those pieces come, on diagrams,
11 or on skeletons, or on diagrams -- excuse me --
12 of human skeletons.

13 What she also tells you, is that every
14 bone, at least a part of every major bone group
15 has been recovered from the burn area, from that
16 which is behind Steven Avery's garage. And
17 that's this exhibit up on -- up on the right.
18 All of those bones, or at least portions of
19 everyone of those bones identified, comes from
20 Mr. Avery's burn area. We hear about the -- what
21 she calls defects or damage to an area, just
22 above Ms Halbach's left ear, to that just behind
23 and to the left of Ms Halbach's skull as well.

24 Judge, I will have to alert you that I
25 do probably have perhaps a half an hour or so of

1 my closing left to give. I know that we got a
2 late start. I know that lunch was being brought
3 at this time. I'm happy to give it afterwards, I
4 don't have any problem with that, but I wanted to
5 give the Court at least an opportunity --

6 THE COURT: All right. I don't want it to
7 go too long, after all, it is supposed to be lunch
8 and I think we're going to keep it that way.

9 So, members of the jury, we're going to
10 take a break at this time. We'll resume at 1:30.
11 We're going to take a little shorter than normal
12 lunch break. We'll come back, have the State
13 finish its closing argument and then hear from
14 the defense.

15 Again, I will remind you, the case is
16 not over, do not begin discussing the case at
17 this time. You are excused.

18 (Jury not present.)

19 THE COURT: You may be seated. Counsel,
20 let's prepare to resume promptly, then, at 1:30
21 because I don't want to keep the jury too late with
22 closing argument.

23 ATTORNEY BUTING: Judge, just so you know,
24 after Mr. Kratz finishes, I'm going to need a little
25 bit of time to set up some exhibits.

1 THE COURT: I'm sure you will, and you will
2 get it.

3 ATTORNEY BUTING: All right.

4 (Noon recess taken.)

5 (Jury present.)

6 THE COURT: And, Mr. Kratz, at this time
7 you may resume.

8 ATTORNEY KRATZ: Thank you, Judge. Is the
9 volume okay with the Court; I assume it's okay.

10 We're going to break one rule today
11 never give an important speech after lunch it's a
12 difficult thing to do. I will try to get through
13 the rest of my closing in a manner that makes the
14 most sense. And I beg your indulgence as to how
15 important this is, to allow me to talk about our
16 remaining several facts.

17 Dr. Eisenberg, just to review our
18 transition, talked about two gunshot wounds to
19 the head of Teresa Halbach. Remember her
20 testimony, that it was before burning, that this
21 was a pre-burning event, gunshot events. She
22 knows exactly where. That speaks to
23 Dr. Eisenberg's quality, as far as an
24 anthropologist, forensic anthropologist, at that,
25 and to something I think that you should give,

1 obviously, great weight to. Our next important
2 fact, what I believe, although Dr. Eisenberg was
3 a extremely important witness, may well be the
4 State's most important scientific evidence.

5 And that's the DNA part of the case.
6 Sherry Culhane from the Crime Lab was the State's
7 DNA expert. And you learned what DNA was. You
8 learned that it was a genetic fingerprint and,
9 importantly, you learned that it is in every
10 fluid in our bodies, in every tissue in our
11 bodies.

12 And it's the same, that is, it never
13 changes. Never changes, not only throughout our
14 body, but never changes throughout our lives and
15 so DNA is stubborn as well. I talked about the
16 fact that it's stubborn; DNA is stubborn in that
17 sense in that it doesn't change.

18 Sherry Culhane, the Crime Lab analyst, a
19 great deal was said about her. And, again, you
20 are going to have to weigh the credibility of Ms
21 Culhane. Either Ms Culhane doesn't know what
22 she's talking about, or Ms Culhane is a very
23 talented scientist, very talented DNA expert.

24 Ms Culhane, I will remind you her
25 testimony, was in 2003, the analyst that tested

1 the single sample, the single hair that
2 exonerated Mr. Avery. That Ms Culhane's talent
3 in examining one hair was able, quite properly
4 to, through DNA evidence, because it's so
5 stubborn, because it's so reliable, was able to,
6 this woman was able to have Mr. Avery released,
7 with the other parts of that case as well. But
8 the analyst was, in fact, Ms Culhane.

9 She testified in this case, however,
10 that she received samples, that it was the most
11 samples ever sent to the Crime Lab for analysis.
12 It was the most DNA requests, 180, ever made to a
13 single analyst, on a single case.

14 And despite their backlog, you heard how
15 Ms analyst -- excuse me, how Ms Culhane set aside
16 her other work and got results, quality results,
17 to the State, to the investigators, in a time
18 when it mattered; in a time when the officers
19 needed to know whose DNA matched; whether we're
20 talking about female blood or male blood; and in
21 a time when Mr. Fassbender and Mr. Wiegert could
22 refocus or direct their investigation. That's
23 important.

24 It's important in a case like this and,
25 actually, it's reassuring to know that our Crime

1 Lab, our Wisconsin Crime Lab, we can take pride
2 in. We can take pride in the fact that such an
3 important case and an important investigative
4 responsibility and need was met, by Ms Culhane.

5 Again, she processed the vehicle,
6 starting on the 7th, developed DNA profiles, as
7 you heard on, not all 180 samples, I don't mean
8 to mislead at all. But she received 180 and
9 developed many, many, many profiles, all the
10 exemplars, all of the evidence samples in this
11 case, and then compared the profiles of the
12 evidence samples to what are called known
13 samples, or exemplars. We're going to go through
14 her findings because they are so critically
15 important in this case and, again, the State will
16 argue that this is a very talented lab analyst.

17 Again, she's the head of the unit.
18 She's the head of the DNA Unit for the Wisconsin
19 Crime Lab in Madison. Her experience should
20 speak for itself and, certainly, the quality work
21 that she had done within human boundaries should
22 speak as well.

23 We first start with Teresa, start with
24 Teresa Halbach's DNA. And what we start with is
25 a known sample, her Pap smear. You heard about,

1 at Bellin Health, that Ms Halbach, a couple years
2 ago, had a Pap smear done and that was used as
3 the standard they need because we don't have a
4 live person to take a cheek, or a buccal swab
5 from, or even a blood sample from. We need
6 something that we know is Teresa Halbach. And
7 the best sample, you heard, was this Pap smear
8 and this analysis and profile is developed.

9 All of these different markers, as you
10 heard, are different places on a strand of DNA
11 that analysts are trained to look. And they, in
12 fact, do look for and assign values, or actually
13 the machine that's used assigns values at each of
14 those places. And what's important, and what you
15 heard Mr. Gahn ask Ms Culhane to explain for you,
16 as best that we can understand, is that all of
17 these different locations, there are a whole
18 bunch of different profiles that are possible.
19 You heard, at least some examples of, at the
20 D3S13 location, you know, how many variations.
21 This is a 16/18 profile, but how many
22 possibilities are there.

23 And I'm not going to reiterate all of
24 that testimony because you took good notes about
25 that, I'm sure. But what's important is that

1 each of these is different. They are unique to
2 an individual, or at least this entire profile is
3 unique to an individual. In other words, there's
4 one, absent identical twins, which didn't come up
5 in this case and isn't part of this case, I add
6 that just out of intellectual integrity, but
7 other than identical twins, no two people share
8 the same DNA profile.

9 No two people, not brothers, not son and
10 daughter, nobody shares the same nuclear DNA
11 profile. And that's why it's so important.
12 That's why it is so discriminating, as far as who
13 does this belong to. You can take known samples,
14 then, and you can test them about -- or with
15 evidence samples. All right.

16 So the evidence samples of, in this
17 case, Exhibit A, those are all of the different
18 evidence samples, including the swabs that were
19 taken from the back of the RAV4, the back
20 tailgate, and the actual door itself that
21 Mr. Stahlke talked about the flying blood, the
22 blood spatter analysis, the saliva or the swab
23 taken from the Pepsi can. That's all evidence
24 that Ms Culhane developed and, again, compared to
25 this known -- excuse me, this known sample.

1 And so all of those blood samples, and
2 A-14 is the Pepsi can, they all developed exactly
3 the same. It's called a full profile, this isn't
4 the seven out of seven partial profile. At all
5 15 different locations a pattern, a analysis, is
6 developed for these unknown -- these unknown
7 samples.

8 And as Ms Culhane talked about, for all
9 the different bloodstains and Pepsi can, she was
10 able to compare, as you can, the results from the
11 RAV4 samples, to the known Pap smear, to Teresa
12 Halbach. And it is a perfect match, 15 out of 15
13 exactly, exactly a perfect match.

14 The blood or bullet fragment, which is
15 recovered on the 2nd, same thing is done with
16 that, you heard about the extraction process of
17 having to wash the DNA off of the bullet, but it
18 was able to provide a profile by which a match
19 can be made, or an attempted match can be made.

20 Remember that bullet that was found by
21 Mr. Heimerl, later processed and later developed.
22 And Ms Culhane, then, is able to make that
23 comparison. And although the item has, in two
24 separate locations, one of the values or the
25 spikes, it is not at all inconsistent with the

1 results. And so Ms Culhane says that is
2 insignificant as far as -- as the match.

3 Now, as you have heard, there is, not in
4 the bullet, not in the bullet extract itself, not
5 in the evidence, but in a control sample, in a --
6 what I understand to be a tube of some solution,
7 water, some saline, something, that's supposed to
8 have nothing on it, Ms Culhane's own DNA shows up
9 on that particular run, on that particular
10 sample. And she called that, quite
11 appropriately, contamination.

12 And that's a hard word for jurors, I
13 believe, at least I argue, to understand. But as
14 Mr. Gahn and Ms Culhane talked about
15 contamination, that that's expected, especially
16 in cases with this kind of volume. It's happened
17 89 separate times, unfortunately. This is one of
18 the cases that it happened.

19 But because it wasn't on the bullet,
20 because it wasn't on the piece of evidence
21 itself, Ms Culhane testified, and you can believe
22 her or not, but this expert witness testified
23 that it does nothing for the comparison purposes.
24 It does nothing to diminish whether or not Teresa
25 Halbach's DNA is on that bullet.

1 And stated another way, the fact that
2 Sherry's DNA is on some water or some control
3 somewhere should not, and in fact in this case,
4 did not, keep from you, the jurors, the fact
5 finders in the case, whether or not Teresa
6 Halbach's DNA is on the bullet. All right.

7 That's important evidence. You would
8 want to know that. You would want to know
9 whether or not Teresa Halbach's DNA is on this
10 bullet, this bullet that's found in the garage,
11 in Steven Avery's garage, is Teresa's DNA.

12 And as Ms Culhane said, there isn't
13 anything that can change one person's DNA into
14 another. There is no process, there is no
15 trickery, there's nothing that can go on that can
16 convert, if you will, somebody else's, in this
17 case Sherry's, DNA, into Teresa's. Teresa's DNA
18 is on the bullet.

19 It is your decision and your duty to
20 decide how much, how little, weight, to give to
21 the contamination on the control sample, again, a
22 sample that has nothing to do with this
23 particular bullet. Again, another match.

24 And the frequency, and what we're
25 talking about with all of these matches, and not

1 just these, but also the seven out of seven that
2 we talked about before, although one in a
3 billion, the frequency of all of these blood and
4 saliva matches for our victim, for Teresa, is you
5 would expect to find that DNA profile that we
6 just saw, at random, one time in every 416
7 quadrillion times in the Caucasian population.

8 Well, that's a number that's so big that
9 many of us, most of us, don't really have a good
10 concept about. It's a lot, it's a lot of zeros.
11 Okay. And it is a number that you can call that
12 an exact match. All right. An exact match.

13 When we talked about 6 billion people or
14 so in the world, 6 billion only, and this is a
15 quadrillion, lots and lots more. We're going to
16 talk about quintillions next. But we're talking
17 about such big numbers that it is absolutely --
18 has no impact on the results.

19 But more than that, what does this mean?
20 What does -- what does finding Teresa Halbach's
21 DNA mean, in this case? And where was it found?
22 Because DNA can't change, because DNA is so
23 stubborn, because DNA is what DNA is, I told you
24 at the opening statement, that I'm going to
25 reiterate now, that Teresa Halbach cries out to

1 you, the jurors, at this case. And it tells you
2 to listen and to look.

3 Teresa Halbach, by her DNA and where
4 it's found, is telling you a story. She's
5 telling you, this is where I was. She's telling
6 you, this is what happened to me. She's telling
7 you, this is how I was killed. She's telling
8 you, this is how this person tried to hide me and
9 where they tried to hide me.

10 And it's the kind of evidence, it's the
11 kind of powerful evidence that you can't ignore.
12 I told you at the opening statement and I'm
13 telling you now, that Teresa Halbach left this
14 evidence for you to see, and left this evidence
15 for you to hear, to hear about this evidence.
16 And I simply hope that this evidence has that
17 impact, that you can see where she was; you can
18 see where her body was placed; you can see how
19 she was killed, in this case; not through
20 speculation, not through guesswork, but by
21 scientific evidence.

22 Mr. Avery's DNA is also collected. And
23 the stubbornness about DNA applies to Mr. Avery's
24 DNA, just like it does to a victim of a crime.
25 Blood that's left behind, in this case, is

1 evidence; it's evidence against Mr. Avery. It's
2 important evidence, very, very important evidence
3 because DNA doesn't forget.

4 DNA kinds of evidence can't be confused,
5 it can't be tricked on cross-examination. DNA
6 evidence is what it is. And only through human
7 failure, failure to collect it properly, or
8 failure to analyze it properly, or failure on my
9 part to explain it properly to the jury, is the
10 limitation of DNA evidence.

11 Because the DNA evidence in this case is
12 incredibly powerful. You heard testimony that
13 Mr. Avery had a cut to his hand. Had a cut to
14 the outside of his right hand, what we're calling
15 the source of Mr. Avery's blood. This is how
16 Mr. Avery leaves those six different blood
17 samples within the SUV.

18 And from a prosecutor's standpoint, it's
19 fortunate to have that kind of evidence. It's
20 fortunate to be able to stand up here and tell a
21 story, to be able to tell you that story from
22 Steven Avery. Because just like the victim, just
23 like Ms Halbach's DNA telling you, here is where
24 I was, and here's what happened to me, and here's
25 how I was killed, Mr. Avery's blood tells a story

1 as well.

2 Now, we don't have the same kind of
3 standards used for Mr. Avery. We have what's
4 called a buccal swab, a cheek -- kind of a Q-tip
5 that's placed in his cheek. By the way, this is
6 the same kind of test Ms Culhane said was used in
7 Mr. Avery's exoneration, a buccal swab. You saw
8 that they were still sealed in the Manitowoc
9 County Sheriff's Department, after they were
10 used, analyzed and sent back.

11 But the Crime Lab never had Mr. Avery's
12 blood sample, it was all used through, as you
13 hear it is now days, through buccal swabs,
14 through standards. And the standard for
15 Mr. Avery, just like for Ms Halbach, is developed
16 at all 15 of these different locations that are
17 called loci, for Mr. Avery.

18 So what Ms Halbach (sic) does, then, is
19 she does test samples of different swabs, or
20 different swatches, or different things that
21 there are to analyze. She develops DNA profiles
22 for the hood latch. And you are able to see,
23 then, that the -- although not blood, no visible
24 blood available, you heard about from handling a
25 hood latch or a piece of metal, that depending

1 how much your hands sweat, skin cells and other
2 manners of DNA can be transferred onto a hood
3 latch.

4 Well, it was, in this case. On this
5 hood latch, Mr. Avery's DNA, on the Teresa
6 Halbach SUV. Reaching underneath the hood, is
7 Mr. Avery's DNA; an exact, perfect profile of
8 Mr. Avery's DNA, that does not include, at least
9 visibly, his blood.

10 Well, the same kind of analysis is done
11 on this Toyota key. And you will see the
12 analysis, the Toyota key, the evidence is
13 analyzed. And you will see that right down the
14 line, all 15 places, it's a perfect match for
15 that of Steven Avery. And, again, you heard that
16 by handling a key and, importantly, the last
17 person to handle the key is the most likely
18 source of the DNA that's going to be found on
19 that particular piece of evidence.

20 That was the testimony, that was the
21 testimony in this case. Mr. Avery was the last
22 person to handle this key. This key is the key
23 for Teresa Halbach's vehicle. This key, found in
24 Mr. Avery's bedroom, has a full, a complete, a 15
25 out of 15 match for Mr. Avery's DNA. That is

1 significant evidence.

2 We then talk about the blood and the
3 other stains that are found within the SUV. The
4 other five places in the front part: The
5 driver's seat; front console; the ignition area;
6 which is perhaps the most damning of all of the
7 DNA that's found; passenger seat; and the CD
8 case.

9 Now, each of these locations, Ms Culhane
10 is able to develop a profile on, a full 15 out of
11 15 profile, on these bloodstains. So these
12 aren't small bloodstains. These aren't one
13 microliter as you heard later in the trial about.
14 These are large bloodstains, a drop, as you
15 heard, one droplet of blood is 50 microliters.
16 And so these stains, although we do have a one
17 droplet stain of Teresa's, all of these stains
18 are much, much larger than that.

19 So, in the front, that is, from the
20 front seats forward, five different bloodstains
21 left by Mr. Avery in Teresa Halbach's vehicle.
22 Again, we're pointing to one person being
23 responsible for Ms Halbach's death.

24 In the rear, that is, on the rear
25 passenger door, that bloodstain is left. And we

1 hear that it is, in fact, Steven Avery's; again,
2 a perfect match for Steven Avery.

3 Now, each stain, Ms Culhane testified,
4 she's able to develop a frequency. Again, how
5 likely is it in the Caucasian population that you
6 would find, randomly, that exact DNA profile.
7 And she said one in four quintillion. Okay.

8 This is a number that is absolutely
9 huge. People can't even really picture how much
10 a billion is, finding a billion, one thing in a
11 billion. Finding one thing in a billion is -- is
12 hard enough, but I'm going to take 45 seconds and
13 I'm going to tell you what a billion is. All
14 right.

15 To get to a billion, you first have to
16 know what one out of a hundred is. Pick up 1
17 white marble and think of 99 black marbles. Can
18 you picture that? You put them together, and if
19 you randomly drew the one white marble out, it
20 would be one out of a hundred. Well, if you take
21 five times that, you're 1 out of 500, 1 white
22 marble in 5 -- 499, 500, if you will, black
23 marbles.

24 Would be like a shovelful or a coal
25 shovelful of marbles and you kind of throw them

1 out onto the floor. One of them is going to be
2 white and the other 500 are going to be black.
3 And that's 1 out of 500 black marbles. Okay.
4 You can kind of picture 1 out of 500.

5 A billion is such a big number, that if
6 every day, let's say you had a reservoir of black
7 marbles and you had one white marble in there.
8 All right. And every hour, every hour, of every
9 day, you took your coal shovel and you got out
10 500 marbles and you threw them onto the floor and
11 you said, is there a white marble there. To
12 randomly look for that match. And you don't see
13 it.

14 And then the next hour comes and you do
15 the same thing. Every hour of every day. Let's
16 say that you had the time to do that and you had
17 a big enough reservoir, here's how big a billion
18 is. To find one white marble out of a billion,
19 you would have to do this 500 marble exercise
20 every hour, of every day. And you would expect,
21 at random, you would expect, at random, to find
22 that white marble -- are you ready for this --
23 right about the time that Thomas Jefferson was
24 signing the Declaration of Independence. If you
25 did it every hour, of every day, 500 marbles

1 each, that's how often you would have to go to
2 get to a billion, to get to one out of a billion,
3 one white marble out of a billion black marbles.

4 That's a partial profile that we're
5 talking about. That's the numbers that we're
6 talking about, you need to visualize something.
7 Well, four quintillion, four quintillion, a
8 quintillion -- I hope you get this -- a
9 quintillion is a million billion, it's a million
10 times more than what I just talked about. A
11 million times you would have to do that with the
12 black marbles going back to the time of the late
13 1700s. So one in four quintillion, I need you to
14 appreciate the size that we're talking about, the
15 frequency that we're talking about here. All
16 right.

17 So when Sherry Culhane talks about when
18 we randomly see that same profile, one out of
19 four quintillion times, I hope that at least is a
20 way, something that you can visualize, as to how
21 big of a number that we're talking about.

22 That leads me to beyond a reasonable
23 doubt. Beyond a reasonable doubt is what do we,
24 the State of Wisconsin, have the obligation to
25 prove in this case. The judge has already

1 instructed you that a reasonable doubt is a doubt
2 for which a reason can be given, from a fair and
3 rational consideration of the evidence.

4 That means, a fair and rational
5 consideration of all of the evidence. Not just
6 some of it, but considering all of the evidence,
7 do we have a reasonable doubt in this case.
8 Doesn't mean beyond all doubt, in other words,
9 from a percentage standpoint, doesn't mean a
10 hundred percent, because the human system that we
11 have, it's a human justice system. My burden,
12 which I fully accept, in proving the defendant
13 guilty, beyond a reasonable doubt, is something
14 that I think, clearly, all of the evidence points
15 to in the case.

16 I told you at the beginning of the case
17 that there were agencies that were involved.
18 Mr. Fassbender talked about DCI and Calumet
19 County Sheriff's Department and Manitowoc County
20 Sheriff's Department and Manitowoc Police
21 Department, Marinette County, and Two Rivers
22 Police Department, New Holstein Police
23 Department, Brillion Police Department, Kiel
24 Police Department, Manitowoc Sheriff, and FBI,
25 and State Patrol, and all the volunteer

1 firefighters and everybody else pitched in in
2 this case, who did their professional job to find
3 out what happened to Teresa Halbach.

4 Law enforcement looked at the
5 possibilities, looked at all of the possibilities
6 that were presented to them, submitted results.
7 They didn't know what the results were going to
8 be. They didn't know the evidence was going to
9 come back to Steven Avery, but it did.

10 They didn't know that the bones were
11 going to come back as matching Teresa Halbach's
12 DNA, but it did. And so when they submit
13 evidence, again, they are not looking for a
14 particular answer, they are just seeing where the
15 answers come. And in this case, as I mentioned,
16 it's all been directed towards one person.

17 This 25 year old person that I called an
18 amazing young lady, this 25 year old lady was
19 murdered. That's real. All right. That's real
20 for family, and it's real for friends, and it's
21 real for Teresa Halbach. And I'm able to argue
22 to you what that means.

23 I'm able to argue to you that that means
24 that Teresa Halbach's dreams, and that her
25 potential and her future aspirations were snuffed

1 out by one act, and by one act from one person;
2 her chance to be loved and her chance to love,
3 and -- on the 31st of October.

4 Tom Pearce described this young woman as
5 somebody that he saw great potential in. I think
6 he said the words that she was really going to be
7 someone. I think there's a lot of people in this
8 room who might argue that she already was
9 someone. She already was someone that was very
10 accomplished and somebody that obviously is very
11 missed.

12 And that brings me to my last fact,
13 brings me to fact number 13, how was Teresa
14 Halbach killed. The manner and cause of death
15 was provided to you by three witnesses.
16 Dr. Eisenberg, Mr. Olson, and Dr. Jentzen. And
17 they all are in concert, they all agree, with how
18 this 25 year old woman was killed.

19 Dr. Eisenberg testified about those
20 cranial fragments showing entrance defects,
21 again, suggesting gunshot wounds to the parietal
22 and the occipital region -- regions. The
23 beveling was prior to the burning. The manner of
24 death she described as homicidal violence. I
25 think Dr. Eisenberg, in her own anthropological

1 way, explained to all of you, well, she didn't
2 just jump into the fire, it was homicidal
3 violence that caused her death.

4 Dr. Eisenberg was able to show you and
5 tell you, through photographs, that the -- this
6 particular bone piece, we wouldn't know it was
7 right above the left ear, but this is a piece of
8 the parietal bone that's right above the left
9 ear, that shows the characteristic sign of an
10 entrance bullet wound. And this particular
11 defect that is shown, again, that we wouldn't
12 know, is the occipital region of the skull, that
13 Teresa was also shot in the back of the head with
14 a .22 caliber gun.

15 Mr. Olson, our trace metals expert,
16 talks about instrumentality. That is, what are
17 these defects caused by. And Mr. Olson,
18 importantly, talked about lead deposits, talked
19 about bullets, and bullets having 99 percent
20 lead, but was able to show you x-rays of these
21 defects that we talked about, the x-rays of the
22 parietal region, where these things that light up
23 are actually particles of lead, which are
24 characteristic of a bullet, a bullet entering the
25 skull of an individual. And there's many more of

1 them, actually, back in the occipital area, many
2 more of these lead particles that he -- the
3 elemental analysis, and found, in fact, that
4 these were lead.

5 And, finally, Dr. Jeffrey Jentzen, an
6 expert, perhaps the expert, in the State of
7 Wisconsin, the medical examiner for Milwaukee
8 County Wisconsin, hundreds of gunshot wounds he
9 reviews. He was asked by Mr. Gahn to review this
10 case and see if he could render an opinion as to
11 both the manner and the cause of death.

12 Dr. Jentzen didn't have any question at
13 all about either one, that there was a gunshot
14 wound to the parietal region, agreeing with
15 Dr. Eisenberg it was a gunshot wound to the back
16 of the head. Manner of death is homicide. Cause
17 of death is gunshot.

18 There's three charges that you are going
19 to need to consider in this case: Homicide,
20 first-degree intentional homicide; mutilation of
21 a corpse; and the felon in possession. And it's
22 the State's obligation to prove to you several
23 things with those. They are called elements, but
24 what we really have to prove is what, and when,
25 and how, and, finally, who.

1 What is clear, that a homicide and
2 mutilation occurred. When, the 31st of October,
3 sometime after 2:45 p.m., when Ms Halbach makes
4 contact at the Avery salvage property. How, the
5 doctors and the trace metals and other experts
6 tell you, by gunshot.

7 And, so, when it comes down to the role
8 of the jury, when it comes down to you as the
9 trier of fact, searching for the truth, not
10 speculating, not searching for doubt, but
11 searching for the truth, it's that last answer.
12 It's the who, that you have to decide.

13 And you have got to decide whether or
14 not the State has satisfied you, beyond a
15 reasonable doubt, who killed Teresa Halbach.
16 Again, based upon the facts, based upon the
17 evidence, not based upon speculation.

18 I told you when I first stood up before
19 you this morning, there was no question, no
20 question at least from the State's perspective,
21 who was responsible. And despite having been
22 here for five weeks, I'm hopeful at this time
23 that you are able to agree with the State of
24 Wisconsin that all of the evidence, all of the
25 evidence, points to only one person. All the

1 circumstantial evidence, all the scientific
2 evidence, all the direct evidence, points to one
3 individual.

4 The law enforcement officers have done
5 their duty. All of the citizen searchers and
6 citizens that helped have done theirs. The
7 prosecution team, I believe, has set forth a very
8 methodical, very compelling case. And so we're
9 finally asking you, the citizens -- the jurors in
10 this case, the citizens of Manitowoc County, to
11 return verdicts of guilty, as it is your duty to
12 do so.

13 That's all I have, Judge, thank you.

14 THE COURT: Members of the jury, we're
15 going to take a 10 minute break at this time to give
16 the defense a chance to get ready for its closing
17 argument. Again, do not begin your deliberations at
18 this time. We'll call you back in as soon as we're
19 ready. I anticipate it being about 10 minutes.

20 (Jury not present.)

21 THE COURT: You may be seated.

22 ATTORNEY BUTING: Maybe a little bit longer
23 than 10 minutes, I have to get these exhibits
24 together.

25 THE COURT: All right. I will come back at

1 2:25 and see how you are doing.

2 (Recess taken.)

3 (Jury present.)

4 THE COURT: Mr. Buting, at this time you
5 may begin the defense closing.

6 ATTORNEY BUTING: Thank you, Judge. Good
7 afternoon, ladies and gentlemen. This is the first
8 time I have actually had a chance to talk to you. I
9 have sort of been talking at you as we walk by the
10 witnesses for 6, 5 weeks, whatever. And I'm
11 really -- I feel honored and privileged to do so,
12 just as I am honored and privileged to defend
13 Mr. Steven Avery here, in this very, very serious
14 case.

15 Let me make one thing very clear, right
16 here at the outset. We do not and have never
17 claimed that the police killed Teresa Halbach.
18 But in that respect they have that in common with
19 Steven Avery. However, the person or persons who
20 did kill Teresa, knew exactly who the police
21 would really want to blame for this crime.

22 And they were aided in that respect, by
23 widespread media publicity as early as Friday
24 morning, November 4th, the very morning after the
25 day she was first reported. Widespread publicity

1 that identified Mr. Steven Avery as one of the
2 last people known to have seen her. And because
3 of who he is, that drew even more media attention
4 than perhaps it might other wise have. And the
5 focus was on Mr. Avery, rather than one of the
6 other customers that she saw that day.

7 And this was the very same Steven Avery
8 who was suing the Manitowoc County and the
9 Sheriff's Department, with a lawsuit asking for a
10 whole lot of money, for the wrongful conviction
11 and all the years in prison that he spent, from a
12 1985 wrongful conviction.

13 I believe that when the Manitowoc
14 officers saw this, they very badly wanted to
15 believe that he was guilty and that this was
16 their way out. And that from that point forward,
17 that they had this investigative bias, focused on
18 Steven Avery, that was, then, skillfully
19 exploited by the real perpetrator of this crime.

20 Now, from the very beginning, Steven
21 Avery has proclaimed his innocence in this case.
22 He told that -- everybody that had a camera,
23 anybody who talked to him, that he was not
24 guilty, and that he was being framed. That the
25 police planted his blood.

1 And I want you to think for just a
2 moment how difficult a situation you would be in
3 if that had occurred to you. How, after all of
4 this evidence comes out, and police, who better
5 than anyone else would know how to plant
6 evidence, how you would get back the presumption
7 of innocence. How do you go about trying to get
8 the community, and ultimately a jury such as you,
9 to believe in our system of justice, to believe
10 that in America you are presumed innocent, unless
11 the State, which has the entire burden of proof,
12 can prove you guilty, beyond a reasonable doubt.

13 What would you do? Remember, this
14 morning and five weeks ago, you promised that you
15 would do that, despite all of the pre-trial
16 publicity you may have been exposed to and may or
17 may not have retained. You promised each of us
18 and the Court, and the Judge instructed you
19 today, that you must presume Mr. Avery innocent,
20 and that you must hold the State to the burden of
21 proof, beyond a reasonable doubt. We will talk a
22 little bit more about that later, but I want you
23 to keep that in mind. Because as you go through
24 this evidence, you have to apply that, because
25 that is your sworn duty.

1 Now, we have offered a theory of
2 defense. And that's what it is, it's a theory.
3 Because if someone frames you, you are obviously
4 not there to see how, exactly, it happened;
5 where, how, when, the kinds of things that
6 Mr. Kratz is going to argue we haven't presented.
7 There is no videotape showing how this was done.
8 There's no cop who, in a *Perry Mason* moment,
9 breaks down on the witness stand and says, yes, I
10 did it, I did it, you got me. This is real life,
11 that doesn't happen.

12 You are entitled to reasonable
13 inferences, however, and we're entitled to the
14 inferences that can be drawn from circumstantial
15 evidence, just as much as they are. And so you
16 ask yourself, what would it look like, what would
17 it look like, what would a case look like if
18 somebody was being framed.

19 And we're going to do that for a little
20 bit now. And I think when you do, you are going
21 to see that it would look a lot like this case.
22 You would look first and you would see, well,
23 what about the lack of evidence, in areas that
24 you would expect there to be evidence. And,
25 then, you would look at the areas where there

1 appears to be evidence linking the person to the
2 crime and ask yourself why does all of that
3 evidence appear suspicious or unreliable.

4 And we're going to go back and forth on
5 that a little bit, but those are the two main
6 areas I want to talk about first. Evidence
7 that's not there, that should be. And evidence
8 that is there that appears suspicious or
9 unexplained. And let me turn to that first.

10 In fact, let me turn to what probably
11 is, at least on its face, the most damning piece
12 of evidence in this case, and that is, Teresa
13 Halbach's remains, found in the burn pit, outside
14 Mr. Avery's garage, trailer, whatever.

15 We'll look at the -- what the evidence
16 shows first. We know that not all of her remains
17 have ever been found. I believe Dr. Eisenberg
18 said only 40 percent of her skeletal remains.
19 We're not talking the rest, obviously, that you
20 would expect might be gone, but skeletal remains,
21 only 40 percent. Not because the other 60
22 percent gets burned up. No expert has ever come
23 into this court and said fire would consume bone
24 completely.

25 What fire does, according to these

1 experts, is it goes through these phases of
2 charred to ultimately calcined -- calcinated, I
3 believe the word was. Sixty percent of it is
4 missing. All right. That's -- That's peculiar
5 to begin with. But, then --

6 Well, before I move off that, there's
7 something else that's missing and that is,
8 Mr. Kratz points out, well, the jeans, we found
9 these rivets in this pair of jeans here. But
10 they only found five of six, assuming that these
11 are the same jeans, and these are just a
12 representative example. But what did they not
13 find, the biggest item of all, the button that
14 closes the waist.

15 They have got magnets they are using
16 through all this dirt. They are the sifting
17 through every thing and they don't find this
18 button anywhere. They don't find her house keys
19 anywhere, her work keys anywhere. They find one
20 single key, which we'll certainly talk about.

21 But most importantly, all the experts
22 agree, these bones were moved. And I have got to
23 tell you, we have been here, now, for five weeks
24 and we have still not heard any explanation from
25 this side about how that happens.

1 In fact, we haven't heard any
2 explanation about a lot of things. We have heard
3 manner and cause of death, but that's not really
4 how Teresa Halbach was killed, or even where
5 Teresa Halbach was killed.

6 Unfortunately, from my standpoint on
7 this point anyway, the State gets to go last.
8 This is called sandbagging. This is where we
9 don't get to respond to the theory or the
10 argument that they have been harboring all this
11 time and haven't told you folks either. So they
12 are going to get up here after Mr. Strang and I
13 are done and they are going to say, hey, this is
14 the explanation, take our word for it. And we
15 don't -- of course, don't have a chance to
16 respond.

17 Well, I'm going to trust that between
18 the 12 of you, ultimately 12, you will be able to
19 answer those questions that they raise. You will
20 be able to pick apart, as well as I can, whatever
21 theory they come up with, because we have not
22 heard any yet.

23 The bones were moved. The question is,
24 were they moved to Mr. Avery's burn pit, or were
25 they moved from Mr. Avery's burn pit. The State

1 would have you believe that the original site of
2 burning was the burn pit, behind his garage. But
3 they have offered no explanation for why bones,
4 human bones, would be found in the Janda burn
5 barrel, some 150 feet, or whatever it is, away,
6 in the other yard.

7 And Dr. Eisenberg told you -- By the
8 way -- I can't believe I forgot this -- there's a
9 third site. There's actually three different
10 sites where human, or possible suspected human
11 bones were found. Clearly identified human bones
12 were found in the burn pit. And clearly
13 undisputed human bones were found in the burn
14 barrel.

15 But there's also this mysterious quarry
16 site, a quarter mile or so away that -- You will
17 have to forgive me, but I'm not as
18 technologically savvy as Mr. Kratz, and so we're
19 going to be using the ELMO instead of a laptop.
20 But this is -- this is the map that was shown to
21 you. This is the diagram that was created by
22 Mr. Austin, with the assistance of Dr. Eisenberg.

23 This flag down here, is the third site,
24 where pelvic bones were found, according to
25 Dr. Eisenberg. They were sent to the FBI to do

1 mito-typing (phonetic). We did a stipulation
2 that nothing could be determined from them. But
3 what she said was, all three locations where
4 bones were found, or possible human bones in the
5 case of the quarry, were all burned to the same
6 degree, same amount of calcination.

7 So there is a similarity here that
8 continues forward through all of them. And, very
9 important, no evidence of more than one body. I
10 don't even know if there are other bodies missing
11 in Manitowoc County, or people missing, but in
12 this instance, Dr. Eisenberg concluded, and
13 Dr. Fairgrieve agreed, no evidence of more than
14 one body. So we have got these bones in three
15 different locations.

16 Now, curiously, you have never seen a
17 photograph of what this site looks like, or what
18 the bones looked like, and neither have I. And
19 neither has, I assume, any of the prosecution
20 team because, for some curious reason, no
21 photographs were taken of that site.

22 The method of recovery in this case was
23 not skillfully done, as Mr. Kratz tried to argue,
24 by these experienced arson experts. This
25 investigation needed a forensic anthropologist to

1 be called to that scene, before anything was
2 touched. And Dr. Fairgrieve explained why.

3 Dr. Eisenberg admitted that by the time
4 she got the bones, she was unable to determine
5 some important information about its location,
6 how it was sited. And not only was nobody called
7 to the scene, but no photographs.

8 Have you seen one photograph of any of
9 those bones in the burn pit, in this location,
10 before it's picked up? One photograph? No, you
11 see boxes of bones, tables where they are thrown
12 out. You don't see them in their site. And
13 Dr. Fairgrieve explained to you why that's
14 important, especially important, if you're going
15 to try and answer the question of, was that the
16 burn site.

17 Dr. Fairgrieve is probably the expert in
18 the world, or at least in this North America, on
19 the forensic identification and interpretation of
20 cremains, much more experienced than
21 Dr. Eisenberg in this area. I don't have a
22 problem with Dr. Eisenberg; she's a fine person,
23 and a fine anthropologist.

24 But Dr. Fairgrieve has much more
25 experience in the field, dealing with cremains.

1 He's written a book that's coming out soon. He's
2 worked for the Crown all of his life. This is
3 the first case he's ever testified for the
4 defense. So this is not some paid defense expert
5 that we have just brought in here to try and --
6 try and do a smoke screen or something.

7 This is a world renown expert. And what
8 he says is, he's had a lot of cases, or he's been
9 called in and that very question has been
10 presented, the bones were moved, where is the
11 original site. Was it over here, or was it where
12 the bones were found.

13 Dr. Eisenberg says, you have to listen
14 carefully to her opinion, she concluded -- First
15 of all, she could not rule out other possible
16 burn sites, but her opinion was that it was most
17 likely the original site was behind the garage.
18 And that was based on the fact that most of the
19 bones that were recovered were found in that
20 location, that she would have expected more
21 breakage, and that she found a lot of small
22 delicate type of bones in that area, and so,
23 therefore, she concludes this must be where the
24 burn took place.

25 But Dr. Fairgrieve told you, that from

1 his own case experience, real world case
2 experiences, he has found the tiniest bones in
3 the human body, the little bones in your middle
4 ear. He has found those moved into the secondary
5 site, not at the original burn site.

6 And he told you something else that,
7 frankly, just makes common sense. In his
8 experience, where the majority of the bones are
9 found, that's the location where the bones were
10 moved to. Why? Why does that make common sense?
11 Because if you're -- if for whatever reason you
12 are trying to disguise the original site where
13 the burn took place, and you are going to plant
14 them, or put them some place else, of course you
15 are going to move as many of them as you can to
16 the second location. That makes common sense.
17 It would make perfect sense. And it fits with
18 Dr. Fairgrieve's own real case experience.

19 The other thing Dr. Fairgrieve said is
20 that, had an expert been called to the scene, a
21 real forensic anthropologist, you can determine
22 things about that. I believe he talked about a
23 case where he was able to tell that this was the
24 first, the original spot of burning, because
25 there was some anatomically connected bones.

1 Even though burned, they are close together,
2 anatomically, so you can tell that's where they
3 were burned. If you moved them, they would fall
4 apart and they would be rearranged.

5 Unfortunately, Dr. Fairgrieve, again, he
6 didn't go out on a limb. He said, I cannot tell
7 you for certain, where the original burn site is,
8 nobody can, because of the collection effort.

9 And I'm not faulting these officers,
10 there's nothing deliberate going on here. They
11 probably never encountered a case like this
12 before. And what they should have probably done
13 is just put a tarp over it. Instead, Agent
14 Sturdivant recalls -- I think it took five hours
15 before Mr. Ertl to come to the scene. And it's
16 already starting to get towards dark, 3:00, 3:30
17 or something. So they're hurriedly trying to get
18 as much as they can, working up to dark, until it
19 gets too dark, without light.

20 It's not that they deliberately
21 destroyed the evidence at the scene, but by
22 moving it without the kind of knowledge -- Well,
23 you have seen archaeologists on TV and in movies,
24 you know how they do it, how they move very
25 carefully with brushes. They want to make sure

1 that they can determine exactly where the
2 location of these bones are. Because, if they
3 are not in any kind of anatomical connection,
4 that tells you something.

5 So, Dr. Fairgrieve -- I'm sorry --
6 Dr. Eisenberg tells us that these bones were
7 found in the burn barrel. Zoom in first so you
8 can read the top. This is Exhibit 401. Evidence
9 Tag 7964, she told you was bones recovered from
10 one of the four Janda burn barrels that were
11 located.

12 She finds long bone shafts, metacarpal
13 fragments, vertebral -- vertebral fragments, and
14 a scapula fragment. And the helpful little
15 diagram here describes where you would find these
16 in your body. Now, obviously these are scattered
17 all over ones skeleton. It's not like somebody
18 dismembers an arm and burns that in the burn
19 barrel and you would expect to find only those
20 items. These were scattered and we'll talk about
21 why in just one second.

22 I think this was -- This is Exhibit 402,
23 the pelvic bones that were found in the quarry.
24 Now, again, possible, I'm not going to overstate
25 here. She was not conclusively able to determine

1 that they were human, but they were all burned to
2 the same degree. And she certainly could not
3 rule it out.

4 What explanation is there for finding
5 scattered bones of Teresa Halbach in the burn
6 barrel and in the burn pit. I'm going to propose
7 one possible theory, there could be others. You
8 may come up with others on your own. But I want
9 to show you, first, one of the instructions the
10 judge read you that's in your packet.

11 Focusing here on the reasonable
12 hypothesis. If you can reconcile the evidence
13 upon any reasonable hypothesis, consistent with
14 the defendant's innocence, you should do so and
15 return a verdict of not guilty.

16 I suggest that a reasonable hypothesis
17 is that somebody else burned Teresa Halbach's
18 body elsewhere, maybe in the quarry, maybe
19 somewhere else. And then they used that burn
20 barrel that was found on the Janda's property as
21 a container to transport the remains, as many as
22 they could scoop in, to Mr. Avery's backyard.

23 And they dump it in the burn pit, or
24 scatter it about, whichever, think that they've
25 got it all, turn it back over. And think about

1 how heavy these burn barrels are, you are not
2 going to be able to lift them up and turn them
3 upside down as easily as you would be tipping
4 them over. And they inadvertently leave a few
5 behind. This is most likely happening in the
6 dark.

7 And the barrel gets, then, placed over
8 on the Janda property, along with the other three
9 that were there, and so there's four barrels
10 found. That explains why there's scattered bones
11 from all over, skeleton, found in the barrel.
12 Explains why most of them are there in
13 Mr. Avery's. And explains why any would be found
14 in the burn barrel at all.

15 If Mr. Avery wanted to get rid of the
16 bones, from his burn area, he would not put a
17 scattered few in someone else's burn barrel and
18 leave all the rest behind. That's not making
19 sense. It doesn't make sense. No one would do
20 that.

21 One other little interesting bit of
22 testimony that almost slid by me, actually, was
23 Mr. Dassey, Bobby Dassey's testimony. Sometimes
24 the truth comes out in little dribs and drabs
25 when people aren't expecting it. And on direct

1 examination, as Mr. Kratz, I believe it was, was
2 trying to lead Mr. Dassey through a number of
3 photographs.

4 He asks him about the burn barrels that
5 your mom has out back. And Bobby says, we have
6 three. And then they try to correct him, and
7 he's like, I thought we had three. And yet four
8 are found on November 5th.

9 Where did that fourth one come from? I
10 submit it was the transport item used, perhaps
11 picked up, used to transport the bones and then
12 placed over where the others would -- where the
13 others were.

14 Let me tell you something about who
15 another possible suspect is. It may not, but
16 it's a reasonable hypothesis to explain the bones
17 the way they are. Now, when you realize -- The
18 reason I'm spending some time on this, is when
19 you realize that this is what may have happened
20 here, then you realize why it's so important.

21 Because if that body was burned
22 elsewhere and then moved and dumped on
23 Mr. Avery's burn pit, then Steven Avery is not
24 guilty, plain and simple. Because no one would
25 burn a body somewhere else and then move the

1 remains and dump them in your own backyard. No
2 one would do that.

3 Now, that's why the State has gone to
4 such trouble avoiding the fact that the bones
5 were moved, that's why you heard nothing about it
6 here. Because it does not fit with their theory
7 that Avery is guilty. They know that if you come
8 to believe that there is reasonable doubt about
9 whether those bones were moved to Mr. Avery's
10 backyard, then you are going to find him not
11 guilty.

12 You have to find him not guilty. Even
13 if, in the end, you aren't completely satisfied
14 how it occurred. Because although we offer you a
15 theory of defense, that does not mean that we
16 take on the burden of proof. The State has the
17 burden of proof. They have to answer the
18 questions that come to your mind, beyond a
19 reasonable doubt.

20 If someone is framed, they are not going
21 to be there. They are not going to see how
22 exactly it is done, but this is consistent with
23 the evidence, I submit.

24 Now, let's turn from the evidence that
25 appears to be incriminating, but is suspicious.

1 Let me turn for a moment to some of the evidence
2 that is lacking, that you would expect to find,
3 if Mr. Avery was really guilty.

4 There was blood identified in the RAV4,
5 that is, Mr. Avery's. And I don't know why,
6 frankly, we went through this exercise in
7 statistics in figuring out what a billion means,
8 when we're not, we've never challenged that. We
9 don't challenge that -- whether his profile --
10 when they come in and they say this is his blood,
11 this is not his blood, or whatever, there is no
12 dispute on that.

13 The question is, how did that blood get
14 there. And as you think, again, what a case
15 would look like if someone is framed, this is
16 very important as well. Because in the RAV4,
17 they find five, ultimately six stains, I believe,
18 which they theorize must have come from an
19 actively bleeding person, which means, the person
20 was not wearing gloves, and yet, they find no
21 fingerprints.

22 Why, because fingerprints are very
23 difficult to plant. Can't say it's never been
24 done, but it's extremely difficult to plant
25 someone's fingerprints. Much easier to plant

1 someone's blood, if you can get ahold of some.

2 So that right there is peculiar.

3 Now, is it because he wiped off his
4 fingerprints, took the time to wipe off all his
5 fingerprints, but missed the blood. Come on,
6 that doesn't make sense at all. Besides, we know
7 that there are eight unidentified fingerprints,
8 at this moment, that were found on that vehicle,
9 including some very incriminating locations.

10 I went through it with Mr. Riddle.
11 Right on the back rear cargo door of the RAV4 --
12 which of course I don't have -- right where you
13 would expect, if somebody is opening that door to
14 put a body in, they are going to find your
15 fingerprints, if you're not wearing gloves. And
16 if you're bleeding you're not wearing gloves.
17 You can't be. You can't have it both ways.

18 I would also point out, Dr. --
19 Mr. Riddle, I asked him, well, you took the
20 fingerprint standards of Lieutenant Lenk and
21 Sergeant Colborn. You know what the defense here
22 is. You know what we have been accusing them of
23 for the last month or more. Did they ask you to
24 compare these unidentified latents that were
25 found on Teresa Halbach's vehicle with Sergeant

1 Colborn or Lieutenant Lenk's standards, to see if
2 you could rule them out, or match. The answer,
3 no. Why, because they don't want you to know.

4 You cannot open this vehicle without
5 touching that latch. And this is where he said
6 he found them, the fingerprints. There, there,
7 and there. Riddle also found them on the hood.
8 Isn't that interesting. He says the lifting up
9 of the hood has been a big part of the State's
10 case. No one has compared those to Lenk and
11 Colborn.

12 The other thing that's kind of curious
13 is that no one at the scene sees any blood in the
14 vehicle. Granted it's -- part of the windows are
15 tinted, and it's -- but it's not dark. This
16 vehicle was found at 10:30, 11:00 a.m. in the
17 morning, on a Saturday.

18 And I believe Mr. -- or Special Agent
19 Fassbender, I believe he was the one, that says
20 he came with his flashlight. Maybe that was
21 Ertl. Was looking 5 or 10 minutes inside that
22 vehicle and didn't see any blood. Now, maybe you
23 won't see the blood on the black CD case, but if
24 indeed the vehicle is locked, you might want to
25 be looking inside to see if there's a key,

1 wouldn't you think.

2 You are going to be shining your
3 flashlight right there to see if maybe the key is
4 in the ignition, no one sees this rather peculiar
5 looking bloodstain that looks sort of like you
6 might get if you take a Q-tip and dab it.
7 Doesn't look consistent with the State's theory,
8 as I understand it.

9 And then you look at maybe the most
10 obvious lack of evidence. And that is the
11 complete lack of any blood or DNA of Teresa
12 Halbach anywhere inside Mr. Avery's entire
13 trailer and you heard what the police did with
14 that trailer. They peeled off the paneling, they
15 ripped up the carpeting.

16 You heard Mr. Ertl talk about how in one
17 instance he was familiar with, the suspect had
18 cleaned up the carpet with carpet cleaner and it
19 wasn't noticeable. When they peeled the carpet
20 back, it had soaked through to the pad. Well,
21 the police were at least smart enough to look for
22 that.

23 Here no blood on that pad. No blood on
24 the carpet. No bloody bedding. Admittedly, you
25 could burn the bedding, sure. You could get rid

1 of the bedding. But no blood on the mattress.
2 And there's no evidence that there was any change
3 in the mattress. And there's no evidence that
4 any mattress or box springs or any of that was
5 burned.

6 No blood spatter on the walls or the
7 ceiling. No bloody trail of a body being carried
8 out of that bedroom into the garage or into the
9 burn pit. Nothing on the carpet. Nothing on the
10 back stoop, the deck, anywhere. No scratches on
11 the headboard. No rope fibers on the headboard.
12 Nothing that would indicate somebody restrained,
13 struggling for their life, was murdered in that
14 bedroom.

15 Why am I telling you this? The State is
16 now saying he was -- I believe they are trying to
17 argue that she was killed in the garage, although
18 that's still not clear either. Why do I care
19 about the bedroom, because the Judge has told you
20 that you bring your common experiences too, you
21 can rely on those common experiences. And one of
22 the common experiences that you have all,
23 unfortunately, been exposed to, was the pre-trial
24 publicity in this case.

25 ATTORNEY KRATZ: Judge, I'm going to

1 interpose an objection. He is commenting on
2 pre-trial or out of court statements, whether by
3 counsel or by other witnesses. That is absolutely
4 improper. That is not a common experience that they
5 bring to the courtroom.

6 THE COURT: All right. Just a second, I'm
7 going to excuse the jury for a couple minutes.

8 (Jury not present.)

9 THE COURT: You may be seated.

10 ATTORNEY BUTING: Judge, I'm actually
11 bringing this up only to show them, and my next
12 explanation would be how important it is not to leap
13 to a quick judgment and why it's so important that
14 they disregard all of that kind of information they
15 may have heard before and focus on the evidence in
16 this case. That's where I'm going with this.

17 THE COURT: Okay. I wasn't sure from the
18 introduction comment if you were going to refer to
19 any information that was not introduced as evidence.
20 As I understand it, you are telling me you are not.

21 ATTORNEY BUTING: That's correct. That's
22 all I intend to say about it.

23 THE COURT: Mr. Kratz.

24 ATTORNEY KRATZ: When he starts with,
25 unfortunately, you were exposed to information, he

1 is pre-supposing, first of all, that they know that.

2 Secondly, Mr. Strang and Mr. Buting, in
3 jury selection, referred in great detail to out
4 of court statements in this particular case.

5 But, third, and most importantly, the
6 jury has already been instructed not to consider
7 anything that was outside the courtroom. So to
8 highlight some -- something they may have heard
9 on the news, or something earlier, is absolutely
10 improper and I'm suggesting that Mr. Buting knows
11 that.

12 ATTORNEY BUTING: I disagree. This jury
13 was exposed to false, misleading information for
14 months. And it's not until they came into this
15 courtroom that they heard the other side. That's
16 the point -- this is the best example I can think of
17 on why a case has to be decided and tried in the
18 courtroom.

19 The Court's instructed them. We talked
20 about it in voir dire. We couldn't ignore the
21 fact that at least three of these jurors who are
22 sitting here today came in saying, I think he's
23 guilty. They promised to put it aside, but
24 that's all I'm doing is reminding them of that.

25 THE COURT: One of the problems, as I

1 recall, is that the jurors, and I don't have each
2 individual juror's answer committed to memory, but
3 it's my understanding that they were exposed to
4 pre-trial publicity in varying degrees. For the
5 most part we wound up with jurors who weren't as
6 exposed to the publicity as some others. But I also
7 agree that we do not have a jury composed completely
8 of people who were not exposed to any pre-trial
9 publicity.

10 I'm a little concerned that, even the
11 reference to publicity, for the same reasons I
12 expressed as one of the reasons for dismissing
13 the false imprisonment charge is, references to
14 it could possibly lead the jurors to talking
15 about it in deliberations and that's something
16 that I don't think we want.

17 ATTORNEY BUTING: I agree. And that's as
18 far as I was going with it. I wasn't going to draw
19 any more references to it, other than to remind them
20 how I think this is the best example, now that they
21 have been through the process, to understand why it
22 is so important for them to only judge the case on
23 the facts, not speculating.

24 THE COURT: All right. I'm going to ask
25 you -- you can refer to speculation, but I'm going

1 to ask you to phrase it in some other way that
2 doesn't involve referring to pre-trial publicity, in
3 order to avoid the problems with it.

4 ATTORNEY BUTING: That's fine. I will just
5 finish by saying, that this case is an example of
6 why you can't leap to quick judgments and why you
7 should base your decision on the evidence in court.

8 THE COURT: That's fine. Anything else,
9 Mr. Kratz?

10 ATTORNEY KRATZ: I'm not sure how to
11 un-ring that bell, Judge.

12 ATTORNEY BUTING: Well, I wish I could
13 un-ring it too.

14 THE COURT: Both parties have made
15 arguments about un-ringing bells. I don't think the
16 comments that have been made thus far get us
17 significantly into that problem to require
18 corrective action. So as long as there's not going
19 to be a reference -- any further reference to any
20 pre-trial publicity, lets bring the jurors back and
21 allow Mr. Buting to continue.

22 ATTORNEY BUTING: Thank you.

23 (Jury present.)

24 THE COURT: You may be seated. Members of
25 the jury, we're hoping that our sound problems are

1 related to a bad battery, so the battery is being
2 replaced. In a minute, we'll resume.

3 ATTORNEY BUTING: All right. Where were
4 we. What I think this case is, is a good example of
5 why it is so important that people not leap to quick
6 judgments about a case, maybe decide something
7 that's based -- that's not based on the evidence you
8 hear in court. You promised, and I'm confident you
9 all will decide this case based only on the evidence
10 you have heard in court, and this case is a good
11 example why.

12 Let's look at what else evidence -- what
13 other evidence is lacking. Now, if the State's
14 theory is that she was shot in the garage, where
15 is her blood? None of her blood is found in that
16 garage.

17 We have heard testimony about high
18 velocity blood spatter that comes when someone is
19 shot from a bullet. There's none on the floor.
20 Maybe even more important, there's none on any of
21 all that -- any of that clutter that you saw.
22 When it's high velocity spatter, it can go
23 anywhere.

24 How would Mr. Avery be able to clean up
25 everything, not just on a floor, but every little

1 item. Because, remember, at least in March, they
2 picked up and handled every single, and examined
3 every piece of evidence. Every cooler, every
4 box, every can, every piece of junk that we all
5 have in our garage, they looked at. And that's
6 where you would expect to find spatter that no
7 one would be able to clean up, even if they tried
8 to clean up.

9 Now, is there evidence that he did clean
10 up at all? Well, his blood was found in the
11 garage. Why is that? If he's cleaning up, how
12 is it that his blood is found there. Is he able
13 to see a blood spot and say, oh, that's Teresa
14 Halbach's blood. Oh, that's mine, I can leave
15 mine, I will just clean up hers. Come on.

16 They have you believe that -- I'm
17 assuming he's going to get up here and say, this
18 is what happened because, of course, we haven't
19 heard it yet, that the bottle of bleach is so
20 incriminating. I don't know anybody who doesn't
21 have a bottle of a bleach somewhere in their
22 house. And an important part is, it was in his
23 house. They say it's in his bathroom, what they
24 didn't tell you until I got up and cross-examined
25 them, is that the bathroom is the laundry room.

1 So even there they try and mislead you into
2 thinking something means more than it does. A
3 bottle of bleach found in ones laundry room means
4 nothing. And it means nothing in this case.

5 And, by the way, if the theory is that
6 there's no blood of Teresa Halbach anywhere on
7 the floor of that garage, is that because he is
8 such a good cleaner, then why are there 10, 11
9 .22 shells laying all over the floor right in the
10 open. Don't you think if they are going to go to
11 the trouble of cleaning up the blood, after you
12 kill somebody, that maybe you might pick up the
13 shells that are right out there in plain view for
14 the police to find. Don't you think that would
15 be what you would do?

16 So those are some examples of the kind
17 of evidence, that if someone is being framed, you
18 might expect to find -- you might expect to find
19 lacking, because it doesn't fit with the reality
20 of what would have happened if the crime actually
21 occurred as the State apparently alleges.

22 We talked about one piece of
23 incriminating evidence and how that looked
24 suspicious. Let's look at maybe the biggest,
25 most glaring suspicious piece of evidence in this

1 case. The magic key, Exhibit A, in this theory
2 that the police planted evidence in this case.

3 Because if you believe that those police
4 officers put that key in his room, that they are
5 capable of planting that kind of evidence to try
6 and link him, then why not plant -- why couldn't
7 they have also planted blood. If they go to that
8 extent that they -- that they plant Teresa
9 Halbach's key in his bedroom to try and convict
10 him, then that's it, it's over, case over,
11 because you can't rely on anything else they have
12 given you.

13 Now, let's look at this key. First of
14 all, why would he bring the key in his house and
15 put it in his own bedroom. Why would you do
16 that? If you still got the vehicle, and you
17 still wanted somehow to use the key, to drive it
18 some place -- by the way, why would you want to
19 disconnect the battery, if you're still going to
20 use the key? What good does the key do if the
21 battery is disconnected? So that's a disconnect,
22 no pun intended here.

23 But why wouldn't you just leave the key
24 in the car? Why wouldn't you hide the key under
25 the -- neath the car, or somewhere where you know

1 it is? Why would you bring an incriminating item
2 like that into your own bedroom, especially since
3 you know, as of November 3rd, when Sergeant
4 Colborn comes to visit him, and November 4th,
5 when Lieutenant Lenk and Detective Remiker come
6 to visit him and all the television cameras are
7 there, that you are a person of interest, right?
8 You are not going to put the key in your bedroom.
9 Doesn't make sense.

10 And, then, the key is not found until
11 the 7th search of that trailer. You already had
12 four grown men in that little trailer. I'm
13 sorry, in that little bedroom they had four men,
14 for three hours, on Saturday night, November 5th.
15 And they come in here and they try to tell you
16 that's not really a thorough search. Three hours
17 in a little bedroom with four men, is not enough
18 time to do a thorough search? Who are they
19 trying to kid here.

20 And, then, it's not until November 8th,
21 when they have been in the bedroom, again, with
22 three men: Lenk, and Colborn, and Kucharski,
23 it's another hour or more before they find it
24 then. There's a common theme, by the way, that
25 we've been hearing in this case, whenever

1 something is mysteriously found much, much later
2 when it should have been, but earlier searches
3 didn't count, those were just cursory searches,
4 three hours cursory searches.

5 This computer rendering of the bedroom
6 is helpful just to show you how small this
7 bedroom is. How long does it take four men to go
8 through a closet, a dresser that's over here, a
9 desk and a bookcase, or World War II record album
10 holder, whatever it is. Seven entries.

11 Now, I submit that the reason it wasn't
12 found in the first entry is because there was a
13 watchdog along, Sergeant Tyson. The one thing
14 that they did was, they say it's okay to use
15 these Manitowoc officers for searches because
16 we're going to have a Calumet person there with
17 them to make sure nothing goes wrong.

18 Sergeant Tyson admitted he had never
19 been in a situation before where he had been told
20 to keep an eye on those guys, your fellow cops,
21 keep an eye on them. What are you doing putting
22 those three men into the person of interest, he's
23 a suspect in their eyes, what are you doing
24 putting three cops who have that kind of
25 potential conflict in that person's bedroom, that

1 you need to have another officer from another
2 agency watching over them, babysitting them.
3 That is absurd.

4 Lenk and Colborn volunteered for that
5 duty and they volunteered for a reason. But in
6 the first search Sergeant Tyson did his job. I
7 believe it when he says that he watched them. He
8 looked like a watchdog. He was watching them
9 like a hawk and he wasn't searching. That's
10 important too. They were doing the searching and
11 he was just doing the collecting. So the
12 opportunity wasn't there for Lenk or Colborn to
13 plant the key.

14 And then they are in there again, very
15 briefly the next day, again, with Tyson. Note
16 that each entry they are -- they are -- each time
17 they go in there, they were with Tyson, except
18 for November 8th and they go in with Deputy
19 Kucharski, who tried to make light of it by
20 saying that, you know, the possibility of
21 planting is about as likely as aliens coming down
22 and planting it.

23 But he had to admit, he was not told to
24 watch those officers. He was there with Lenk and
25 Colborn. He's told to search and that's what

1 he's doing, he's doing his job. And he's sitting
2 on the bed, after one hour. In fact, I think he
3 said he was getting almost done and took off his
4 gloves. He's sitting here, going through this
5 drawer.

6 Lieutenant Lenk is right here with his
7 back to him, like this, crouched down on the
8 floor, so he's not going see what's going on.
9 Lenk gets up, walks out the door, comes back in a
10 minute later, oh, my gosh, look at that, there's
11 a key. Low and behold, it's in plain view.

12 And so they come up with this theory,
13 this absolutely preposterous theory on how this
14 magic key, that no one ever finds before,
15 suddenly appears in plain view, out of this
16 bookcase. They find it right there, where those
17 slippers are. Right like that.

18 And how does it happen, well, they
19 decide, maybe they help the back of this cabinet
20 a little bit, but they decide that somehow this
21 key must be secreted in this cabinet, by Mr.
22 Avery, in his own bedroom, with everybody looking
23 at him, and that it somehow magically fell out
24 this -- this gap, bounces off the wall. And by
25 the way, we're talking about key, fob, and

1 plastic clip. Somehow bounces off the wall,
2 turns around the corner and lands, what is it 90
3 degrees from where it should be, where it would
4 have fallen.

5 Now, here is something else. I want you
6 to contrast what the State -- what kind of
7 evidence the State has given you. In this case,
8 we have been presented with a wooden gun rack, as
9 an Exhibit No. 196. This has really been
10 important in this case, hasn't it, this wooden
11 gun rack. It's meaningless. They have got --
12 And we have a got a photograph of it too. We
13 have the real thing and the photograph. What do
14 you need this for? Why do need this for? Why is
15 this in evidence. This is totally irrelevant.
16 They have pictures to show the guns are on the
17 wall, okay.

18 We have got a photograph of an empty
19 box. And we have got the box right here. We
20 have got a photograph of another empty box, and
21 we have got the empty box here too. What did
22 they give you on this bookcase, that, a
23 photograph. Where is the bookcase? Where is the
24 bookcase? Don't you think that's a little more
25 important in this case than that wooden gun rack.

1 They don't want you experimenting with
2 that bookcase and this key, because they know you
3 will see that it is incredibly improbable that
4 this key is going to find it's way out, the key,
5 the ring, the cloth fob, the plastic clip, and
6 not get hung up on anything. It's going to
7 bounce around like they say it will. So you ask
8 yourself why you haven't seen that, right there
9 in the property room. Nice picture of it.

10 ATTORNEY KRATZ: Judge, I'm going to
11 interpose an objection. Counsel is suggesting that
12 only the State could have introduced that, instead
13 of the defense.

14 ATTORNEY BUTING: State's burden.

15 THE COURT: I'm over --

16 ATTORNEY KRATZ: He's suggesting only the
17 State.

18 THE COURT: This is closing argument, the
19 objection is overruled.

20 ATTORNEY BUTING: While we're at it, while
21 we're talking about candor with the jury, I don't
22 know if you recall, but I do, in the opening
23 statements, these nice PowerPoint presentations that
24 Mr. Kratz has prepared, one of them he puts up there
25 in his opening statement and he shows this tailgate.

1 Puts up a nice PowerPoint slide showing the rear of
2 the vehicle like this.

3 And he's going through where Mr. Avery's
4 blood, DNA, was found on Teresa Halbach's
5 vehicle. And he's got one of his nice slick
6 arrows pointing right here with a circle. I see
7 that and I think, my gosh, I have been working on
8 this case for months, did I miss that; how could
9 I miss that the client's blood is supposedly on
10 the back tailgate. Well, when I looked more
11 carefully, and as we heard from Sherry Culhane,
12 he was wrong. There was no blood of Mr. Avery
13 ever found on the rear of that vehicle on the
14 tailgate. Now, Mr. Kratz is human, we all make
15 mistakes; I have certainly made plenty here. But
16 that's a pretty big mistake.

17 The key, also, by the way, has no blood.
18 Remember, she swabbed it and the stains were
19 clean and it only has his DNA. And, frankly,
20 counsel misspoke when he said, it's always the
21 last person -- when you are talking about trace
22 DNA from the fingers, it's always the last person
23 that touches it that's going to be on there, not
24 what the testimony was as I recall it. Testimony
25 was, the last person may have more of it, but you

1 are going to find a multiple, most likely, at
2 least two people. Particularly when it's an item
3 like a key that someone handles every day and
4 deposits their own DNA on.

5 And, finally, before we take a break
6 here, the source of Mr. Avery's DNA in his house
7 is plentiful. Toothbrushes, razors, all kind of
8 personal items in ones home, if Mr. Lenk and
9 Mr. Colborn wanted to put Mr. Avery's DNA on that
10 key, that was easily available. It doesn't have
11 Mr. Avery's fingerprints on the key; doesn't have
12 any of Teresa Halbach's DNA on the key.

13 Keep in mind, also, when you think about
14 the evidence that's lacking and evidence that's
15 suspicious, you came into this case, and as I
16 recall seeing up there on the PowerPoint slides,
17 there were four charges, now there's three.
18 Think about that, while we take our break. Is
19 this okay, your Honor?

20 THE COURT: Yes. All right. Members of
21 the jury, we'll take a break at this time. Again,
22 do not begin your discussions of the case until all
23 the arguments have been completed and the Court
24 submits the case to you. You are excused.

25 (Jury not present.)

1 THE COURT: Counsel, can I see you briefly
2 in chambers at the start of the break.

3 ATTORNEY BUTING: Sure.

4 (Recess taken.)

5 (Jury present.)

6 THE COURT: Members of the jury, before we
7 resume, I can report to you that I met with counsel
8 during the break. I just wanted to give you some
9 idea about where we were going from here. But we
10 are probably going to go late today in order to
11 finish the closing arguments of the parties. There
12 isn't going to be any time to begin deliberations
13 today.

14 After the closings are finished, we will
15 take a brief break to identify the alternate
16 jurors who will not be deliberating and then we
17 will adjourn for the day and begin deliberations
18 tomorrow morning. We are going to take breaks,
19 probably at faster intervals than normal, to keep
20 you fresh enough to follow the closing arguments,
21 but closing arguments will be what we will
22 complete today. Mr. Buting, you may resume.

23 ATTORNEY BUTING: Thank you, Judge. Before
24 I leave the magic key for a minute, I just want to
25 make sure I was clear enough that, again, this is

1 her car key, that obviously she used every single
2 day. It was Teresa Halbach's key.

3 And I believe Ms Culhane said she
4 swabbed all the way around that whole plastic
5 holder, all the way around it. Not just along
6 one edge of it. And yet she found none of Teresa
7 Halbach's DNA, not a shred of it. And found only
8 Mr. Avery's DNA, as if somehow the key had been
9 wiped clean and his DNA was placed on it. He
10 certainly is not going to do that. He's not
11 going to wipe off her DNA and leave his behind.

12 And as to the bookcase, why it's not
13 here, think about, again, it's their theory, that
14 this key could have found it's way magically out
15 of that bookcase and into its position. Their
16 burden of proof in the entire case, and also
17 their theory to explain to you how this very
18 unusual key materializes out of nowhere and yet
19 it is not here.

20 All right. Now, let's look at another
21 piece of evidence that initially appears,
22 certainly incriminating, but as you look more
23 closely, looks more and more suspicious. And
24 that is, Mr. Avery's blood in the RAV4.

25 Keep in mind that we're talking about a

1 very little amount of blood here. Mr. Kratz
2 maybe confused you when he made it seem like
3 there was a lot. Yeah, there's not one
4 microliter, but we're talking very small amounts
5 of blood. As a matter of fact, the photographs
6 that were taken by Mr. Groffy, before any swabs
7 were taken, before any of the blood is wiped off.
8 This is the front seat, I can barely see
9 anything, unless that -- if that's the spot of
10 blood, right there, that's awfully small,
11 particularly when you are talking about fabric.

12 The CD case, can't even find any blood,
13 can't see any blood. I believe Mr. Stahlke must
14 have misspoke when he said it seemed like it was
15 covered, that there was lots of blood on it.

16 The FBI guy who looked at it, the swabs,
17 we'll talk about that, Mr. -- Dr. LeBeau, later.
18 But he showed you pictures of those swabs and
19 there was hardly any blood on it. In fact, they
20 looked gray, like fingerprint dust, or something.

21 So, really, we have this and this, which
22 Mr. Stahlke says is consistent with active
23 bleeding. It is also consistent with active
24 planting. So when I first saw this, I thought,
25 you know, what is the source of Mr. Avery's

1 blood.

2 Well, we have heard about how his -- he
3 had blood in the bathroom. And so I looked at
4 these pictures, these were pictures that I
5 believe either Detective Remiker or Sergeant
6 Colborn testified that they went around and took
7 on Saturday night, at the apartment, before there
8 was any kind of seizures of swabs.

9 The first thing you do when you go in is
10 you take pictures and then you start collecting
11 evidence. Well, you look at this particular
12 swab, we'll do a close up on it. It's an awful
13 odd looking blood drop, with a little whole in
14 the middle, as if somebody would dab a Q-tip in
15 it, that was my first thought.

16 And, then, the blood vial. And I offer
17 that -- and we have offered that as a possible
18 source of the blood that's found, Mr. Avery's
19 blood that's found in the RAV4. It was in a
20 public office, in an unsecured area; not in a
21 vault where they keep locked up exhibits only;
22 not down in the basement where they normally keep
23 old files; but in that battered old cardboard box
24 that we saw sitting in the Clerk's Office,
25 because it was -- there were so many requests to

1 see it, from the media and the public, that that
2 made it more convenient.

3 They kept no good log back then, of
4 people who were asking to see files, see any
5 file, that one not withstanding. The clerk, Ms
6 Zigmunt, later tightened that up in, I think it
7 was October of '06, this past year. Now
8 everybody has to sign in before they can look at
9 any file. But back then she admitted that the
10 deputy clerks would be more casual about it. And
11 who would you be more casual about making someone
12 sign in than a police officer, who you would
13 normally trust.

14 So there would certainly be no reason
15 for these clerks to take note or think that some
16 police officer, Lieutenant Colborn, or Sergeant
17 Colborn, I'm sorry, Lieutenant Lenk or Sergeant
18 Colborn, would have any nefarious intent by
19 looking at Mr. Avery's file. And that area of
20 the file where it's kept is sort of screened off
21 from the rest of the unit.

22 And probably more likely, though, is the
23 after hours access that the deputies have. The
24 Manitowoc Sheriff's Department is responsible for
25 security in the courthouse so, understandably,

1 they have master keys that fit all the doors.
2 And how difficult, really, would it be for
3 someone like Lieutenant Lenk or Sergeant Colborn,
4 veteran officers, to come in after hours, or on
5 Saturday morning, and get what they needed. I
6 submit it would be not difficult at all.

7 Now, Mr. Kratz, I can hear him now, he's
8 going to get up here and say, where is the
9 evidence. This is all speculation. Where is the
10 evidence. As if he would expect anybody who was
11 being framed to have a videotape of the officer
12 taking the vial of blood and planting it.

13 Or as if he expects one of these police
14 officers, in front of everybody, under oath, on
15 streaming video on the internet, to admit, oh,
16 yes, of course, I took the blood and planted it.
17 Yes, I would admit that if I did it. Sure, I
18 would go away to federal prison probably but,
19 yeah, rather than lie under oath, I would rather
20 go to prison than admit that.

21 Come on. This is real life. It's not
22 TV. You can't expect a *Perry Mason* moment where
23 you're going to get somebody to admit, to you
24 guys, and everyone else in the world, that they
25 did this.

1 So what do we have, though. We have
2 reasonable inferences that can be drawn and
3 circumstantial evidence, just like they do.

4 The box, you have seen the video, I'm
5 not going to go through all that again, but I
6 want to just remind you, show you the box.
7 Evidence tape is very clearly cut, opened, and
8 the box is resealed with nothing but a piece of
9 scotch tape.

10 This one may show up a little better.
11 Inside the box was the styrofoam container, and
12 it was opened by all of us together, which also
13 had -- which also had evidence tape sealing it,
14 right along here. And on the video, you could
15 see very clearly that that was slit, as if by a
16 razor or scissors, or something sharp. So that
17 one would easily open this sort of clam shell
18 styrofoam container, and there is the vial of
19 blood.

20 The vial of blood has a hole, what
21 appeared to be any way, a hole in the middle,
22 right there, which is where professionals would
23 gain access to the blood, if they need it. But
24 this vial has something more, as even Dr. LeBeau
25 admitted. This vial has blood in between the

1 rubber stopper and the glass, so that the experts
2 who use these things all time, could say, even
3 Dr. LeBeau, I believe is the one, who said this
4 vial, clearly the top had clearly been taken off.

5 So, there's evidence that the box was
6 unsecured and the top had been removed at some
7 point. And the blood is still liquid. Can't
8 really show you it in there, the way they have
9 got it encapsulated in yet another glass tube.
10 You can't really see it, but you did see, I
11 think, in the video, as it was rocked back and
12 forth, the blood was still liquid and, therefore,
13 easily available to plant. And we're only
14 talking about a few drops. That's all that's
15 necessary to leave the amount of blood that they
16 found in that RAV4, a few drops, that's all.

17 Now, Lieutenant Lenk, whose name keeps
18 coming up at every important part of this case,
19 had reason to know that that blood of Mr. Avery's
20 was sitting in the courthouse. Because he was
21 the evidence tech -- the whole head of the
22 evidence department for Manitowoc. And he signs,
23 in 2000 -- what's the date here -- 2002,
24 September, he signed Exhibit 214, as the
25 transmitting, or submitting officer to submit

1 these items to the Crime Lab.

2 Now, I'm not trying to mislead you here,
3 these items do not include the vial that we're
4 talking about. But they clearly show that these
5 came from exhibits held by the court since the
6 end of the trial. And yet Lieutenant Lenk would
7 have you believe, in his testimony, that he had
8 no idea that that 1985 court file had any kind of
9 exhibits like that in there.

10 The one thing they did look for
11 fingerprints on, they looked for Lenk and
12 Colborn's fingerprints on the blood vial. No
13 surprise there. Second nature with cops when
14 they handle anything like that, a biological
15 piece of evidence, they are going to put their
16 gloves on. So, okay, they look there, don't find
17 any. But, again, they're looking for something
18 that they know isn't going to be there in the
19 first place, and trying to present that as if it
20 means something.

21 So then there's the question of the
22 opportunity to plant blood. And that's why we
23 heard all this testimony about the scene and
24 whether it was secure or not secure. Well, keep
25 in mind that that sheriff's department, even

1 though their bosses said, within 45 minutes of
2 getting there, that we're turning over this
3 investigation to Calumet, the one item, the one
4 item on that 40 acre property that they knew was
5 important, the main piece of evidence, was that
6 RAV4.

7 And they kept their officers in control
8 of it for four hours. Talk about the fox
9 guarding the hen house here, ladies and
10 gentlemen. Come on. Is that just a coincidence,
11 or is that Lenk and Colborn having some influence
12 here?

13 How carefully was it being watched?
14 Mr. Kratz told you that it was being maintained
15 very securely and carefully. Well, we heard that
16 until Special Agent Fassbender arrived at 2:25,
17 there was no log at all of who was coming and
18 going, looking at this main piece of evidence
19 that they knew about.

20 They rely on two civilians, Nikole and
21 Pamela Sturm, to be their watch dogs, so they can
22 see from this crusher, distance 369 feet, I think
23 it was, Mr. Austin measured. And, you know, I
24 don't fault the Sturms. I mean, its revision is
25 history, for them to say that they were watching

1 that carefully the whole time they were there,
2 that far away, to make sure nobody, even a police
3 officer, approached.

4 Why would they care. Once they knew it
5 was Teresa's vehicle, you know, the sad news that
6 it was, that's where their attention would be
7 drawn. They weren't watching this to see who
8 approached the RAV4.

9 And there was a tarp over the RAV4, for,
10 now, we find out, for an hour apparently,
11 according to the digital signatures that we can
12 find on digital photographs. And a tarp that's
13 built up in such a way that it's practically a
14 tent. That's not the best picture, but from a
15 distance, this large tented over object, being
16 very careful not to have the tarp touch the
17 sides, with a nice little opening here.

18 Now, maybe that's not when it was
19 planted, but it's certainly an opportunity.
20 Probably more likely is that it's getting dark,
21 and while the officer -- I don't believe, by the
22 way, that there was any testimony that Mr. -- or
23 Sergeant Orth was seated where Mr. Kratz said he
24 was. But even not withstanding that, what we did
25 hear was that there's other means of ingress and

1 egress to that property.

2 Sergeant Orth testified that while the
3 officers were somewhere in this area, remember
4 this picture was taken after the vehicle had been
5 removed, but that there's -- there's ways in and
6 out from the west. I will show you in a moment,
7 if I can find the overhead.

8 A little farther up, one can see the --
9 how the roads down here, we have lots of ways to
10 get in and put that -- First of all, for someone
11 to plant the vehicle. And, secondly, for anyone
12 to approach it while it's there. And an even
13 more distant shot that shows all the ways in to
14 this plot of land.

15 So while maybe directly to the south of
16 that berm it is not immediately accessible,
17 there's all these other ways in from here, or
18 from here. When somebody who knows the area,
19 perhaps someone who's been a patrol sergeant for
20 many years, knows the county like the back of his
21 hand, is going to know how to get to that RAV4.

22 Then we have this whole question of
23 whether the vehicle is locked or not. Well, the
24 Sturms said they thought it was locked, but then
25 when they were questioned more carefully it turns

1 out that Nikole didn't check the rear tailgate.
2 She checked it with her sleeve, the other four
3 doors, but not the rear tailgate.

4 If it was locked, by the way, who do you
5 go to when you lock your keys out. Most of the
6 time you go to call the cops. Who better knows
7 how to open up a car, quickly, than police? So
8 the fact that it was or wasn't locked isn't
9 crucial in this case, in my estimation.

10 But on this evidence, it's not entirely
11 clear, when it gets to the Crime Lab, it really
12 is locked. You will have to rely on your memory
13 for that, but I think the record is unclear,
14 frankly.

15 There is also, I want to point out, all
16 you would have to open, by the way, are two
17 doors, to put the blood where it was found. The
18 driver's side, you can reach everything in that
19 front seat and that one rear passenger door. So
20 you wouldn't have to have them all open and
21 sitting in the car in order to do this.

22 And then we have the interesting
23 circumstance of Lieutenant Lenk and his behavior
24 on November 5th and since then, in which he
25 testified, in a prior hearing in this case.

1 Lieutenant Lenk is the only officer, the only
2 witness in this case who was -- who has lied
3 under oath. He gave sworn testimony one day that
4 he didn't get to this site until 6:30 or 7:00,
5 when it is getting dark, but came in front of you
6 today and says, again, under oath, that it was
7 2:00.

8 Well, what happened in the interim? He
9 forgot about the logs. And when you look at the
10 logs, he signs out, but he never signs in.
11 Fassbender had those logs starting at 2:25. So
12 lo and behold, Lenk now appears on the scene at
13 2:00, to explain why he never logged in. Because
14 otherwise the alternative is, he comes at 6:30 or
15 7:00 and evades the guard that's doing the log.
16 That doesn't look good either.

17 So ask yourself, what evidence there is,
18 what inferences you can draw from a witness who
19 gives two different versions, under oath, about a
20 critical point like this. His whereabouts, by
21 the way, that entire day, he never writes a
22 report.

23 So, I also expect, again, because they
24 get to go last, I'm having to anticipate, and you
25 may have to answer some other questions that they

1 raise. But I expect that they are going to say
2 this would have to be this complicated wide
3 ranging conspiracy in order to frame Mr. Avery.
4 Not true. Not true at all. This could be done
5 by two officers, really one officer, the one
6 officer who keeps coming up, Lieutenant Lenk,
7 whose name is on the evidence transmittal from
8 the 1985 case, just a couple years earlier.

9 Lieutenant Lenk, who shows up on
10 November 5th without logging in. Lieutenant
11 Lenk, who finds the magic key. Lieutenant Lenk,
12 who four months later, four months after
13 Manitowoc no longer is needed, with no legitimate
14 reason, is back at that scene on March 1st and
15 what's found the next day, the magic bullet,
16 which we'll talk about in a moment.

17 Actually, let's talk about it now.
18 Again, every time they try and -- Every time they
19 find something that they should have found
20 before, it was because, oh, that prior search was
21 just for a missing person. We signed a search
22 warrant affidavit in which we said we were
23 looking for evidence of a homicide. But, oh, we
24 were just looking for a missing person, we didn't
25 know what we were looking for.

1 They are in that garage on November 6th,
2 for an hour and 47 minutes, three officers. They
3 find 10 or 11 shell casings, but they found -- if
4 they saw a bullet, don't you think they would
5 pick up that bullet? Don't you think that might
6 be important?

7 Now, where was it found? Right smack
8 dab in the middle, one of them. This is the
9 March 1st photo, but No. 9, right as you walk in
10 the door, the main overhead door, it's sitting
11 right there in a crack. Now, to you and I, that
12 may not look like much, but to an officer who's
13 looking for -- if they found .22 shell
14 cartridges, is going to be looking for a bullet,
15 that's going to be pretty obvious. But it's not
16 found until March 1st. And then the other, most
17 important one, is found back here, up against the
18 wall.

19 Now, one or two things had to happen,
20 either they missed it, during the first search,
21 or the scene had been altered between the first
22 search and March 1st. And, in fact, we know
23 that's what happened. We had the officers
24 identify, look at this, there's a different car
25 in there, there's this big engine hoist.

1 Mr. Avery wasn't altering it, but other people in
2 his family obviously had access, someone's car
3 was parked in there. Things probably moved
4 around, who knows.

5 But then we have testimony from Rollie
6 Johnson, about his many gofer hunts. He says
7 that if you go out there now, when the snow
8 melts, you will find his .22 shells all over the
9 place, including right -- most likely in that
10 garage. His gun, his .22 and, yeah, those shell
11 casings were fired in that .22, from that .22,
12 you can tell that because of the way the pin
13 hits.

14 But, according to Mr. Johnson, his --
15 the remnants of his firings, even years from now,
16 are probably still there. Especially if you
17 think about that, the Item FL, No. 23 that's
18 under the air compressor. That probably hasn't
19 been moved in years. Who knows how long that
20 bullet had been there.

21 It didn't have Teresa Halbach's DNA on
22 it, which we will talk about it in a moment. And
23 that bullet is probably totally irrelevant to
24 this case. Just one of many residues left over
25 from Mr. Johnson's target practices and whatnot.

1 I'm not sure it was entirely clear, so I
2 just want to go over with you and make sure it's
3 clear. The shell casings, we have two bullets
4 and 11 shell casings. The shell casings,
5 Mr. Newhouse was able to identify, came from that
6 gun, but he can't say that the bullet, the
7 ultimate bullet, FL, came from any of those shell
8 casings. And he can't say that Mr. Avery, for
9 that matter, ever handled any of them because
10 nobody did any fingerprints of them.

11 And, then, the second bullet, the one
12 they showed you that's down in the crack, that
13 was designated as Item FK, Mr. Newhouse said he
14 could not match to the gun, the .22 caliber
15 Glenfield Marlin that was found in Mr. Avery's
16 bedroom. He said that all he could say was that
17 it would come from a class -- gun of a similar
18 class, which I think included even a pistol that
19 we talked about, with a different brand name.

20 But we know, that on that very property,
21 the Avery 40 acre salvage yard area, there were
22 other, at least one other, maybe two, .22
23 Glenfield Marlin rifles. In Bobby Dassey's
24 bedroom, is one of them, exactly the same model,
25 one of the most common models in the world.

1 So, even Mr. Newhouse couldn't say
2 whether that bullet had any connection at all to
3 this case, or to Teresa Halbach, or even to the
4 gun that was found in Mr. Avery's bedroom, Rollie
5 Johnson's gun. He did say, however, that that
6 one item, under the air compressor, came from
7 that gun and no other.

8 And when I questioned that, how reliable
9 is that degree of science anyway. We're talking
10 about these eyeball comparisons to these --
11 comparison microscopes. It sounds very much like
12 the hair comparison analysis that had been
13 discredited years ago. And I predict this
14 so-called science is the next to go.

15 But at any rate, he was very defensive
16 about his field, perhaps understandably, but when
17 he wouldn't even admit that DNA is more objective
18 than this comparison thing he does, you got to
19 wonder. And, you also got to wonder why he
20 didn't show you the photos of the comparison of
21 the bullets, side by side, and neither did the
22 State.

23 He didn't want you to see those
24 comparison's, Mr. Newhouse, because he was afraid
25 when you looked at them you would see what I saw,

1 which is there's a lot of differences between
2 those two fields of view. And that his opinion,
3 that it came -- that they are one in the same,
4 they came from the same rifle, is questionable.

5 But, putting all that aside for a
6 second, even if he is correct, that that Item FL
7 that was fired from the .22 rifle that was
8 found -- Rollie Johnson's rifle, found in
9 Mr. Avery's bedroom, that still doesn't mean it's
10 connected to this case with any relevance.

11 Look at first, Mr. Olson, who does the
12 lead analysis from the fragments of the cranium
13 bones that he found. He said it's 99 percent
14 lead. Well, Mr. Newhouse, in his notes, and I
15 talked to him about this as well, he made a point
16 that this -- Remember he talked about the two
17 kind of bullets, some which are lead and some
18 which were coated.

19 And this one, I believe he said, was
20 coated with copper coating. Both of these
21 bullets -- fragments that he found, were coated
22 with copper. Where's the copper? I asked
23 Newhouse, did you -- did you try and compare that
24 -- the lead, little pieces of lead that he saw in
25 those x-rays, with the type of lead that's in

1 Item FL. And he said, no, he wasn't asked to.

2 So without some kind of connection
3 between Teresa Halbach and that bullet, the
4 bullet has no relevance in this case. It's just
5 a random fragment, that's found in an old garage,
6 that means nothing.

7 And so we come to Sherry Culhane. Now,
8 you know, one of the odd things about trying a
9 case with this kind of publicity, where other
10 people can watch at home, or wherever, is that
11 you get some feedback about how you do. Some of
12 it not so good. And some people told me maybe I
13 was a little hard on Sherry Culhane.

14 And if you think that, you know, I
15 apologize if I offended anybody with my
16 cross-examination of her, but I ask you not to
17 hold it against Mr. Avery. Because I have a job
18 to do and as an advocate, I need to point out, if
19 someone goes over the line and goes too far, you
20 have to understand it.

21 Now, I don't have a problem with almost
22 everything that Sherry Culhane did in this case,
23 and I said so. I haven't been up here disputing
24 her statistical calculation. I haven't disputed
25 any of her -- the Power Points where she's lining

1 up the profile of one to the next.

2 And it's true that she did help
3 exonerate Mr. Avery in 2003, although she sat on
4 it for a year and he spent an extra year in
5 prison, she did exonerate him by finding an
6 exclusion and then a match to Mr. Gregory Allen.
7 And we appreciate that. And I didn't mean to not
8 appreciate that.

9 But I also pointed out, it's not like
10 she's a defense witness either. She helped
11 convict him in 1985, with this now discredited
12 science of hair comparison analysis, where she
13 rendered opinions to jurors just like yourself.
14 So most of what she did in this case was fine; in
15 fact, it was more than fine. Because it really
16 excluded Mr. Avery from -- either Teresa Halbach
17 from all these items, or Mr. Avery from the other
18 items. Really the other way around, she's
19 looking for Teresa Halbach's DNA in incriminating
20 places. And she doesn't find it.

21 So I can imagine how frustrating it
22 might be when you get a phone message that tells
23 you this, early on, try to put her in his house
24 or garage. Now, this is not blind testing, by
25 any means. These agents are telling Ms Culhane

1 what they want. And this is November 11th.

2 Well, here it is, she's working on this
3 bullet fragment now, in March. And she still has
4 not found one item that links Teresa Halbach to
5 Mr. Avery's house or garage. So she's got to
6 feel some pressure. This is the biggest case of
7 her career. The biggest case the Crime Lab has
8 ever had: 380 items, 180, I think, submitted just
9 to her unit.

10 It's almost five months late and nothing
11 has been found. So when she gets this last
12 bullet fragment, she recognizes, I think she
13 said, it's a probative piece of evidence. She
14 knew what it was. And when she gets this
15 contaminated test, the pressure is on for her to
16 go way out on a limb, farther than she's ever
17 gone in her life. Never before has she ever
18 asked to deviate from a protocol to make an
19 inclusion, until this case.

20 Now, she probably convinced herself that
21 it's okay because it's just in the control, who
22 cares. There's no evidence that the bullet is
23 contaminated, right? Well, we talked about that,
24 what controls are, and why they have them, and
25 how you can find contamination in controls very

1 easily, because if a control has anything but
2 zero DNA, it's been contaminated.

3 What you can't tell is when a piece of
4 evidence shows up with someone's DNA, you can't
5 tell whether it's there because it has been
6 contaminated or not. And so what you do is, you
7 run a control. And the protocol says, if that
8 control is contaminated, you toss it out, and
9 that's the end of it. Because they know, from
10 their own tests, that there's cross contamination
11 that can occur from one evidence item to the
12 next. And they can never rule it out if there's
13 a contaminated control.

14 So where is Teresa Halbach's DNA coming
15 from? Ms Culhane says, she's theorizing and she
16 thinks, well, maybe -- maybe I'm talking too much
17 or I'm too close to the bench and that that's how
18 her DNA got on there. But in truth, she doesn't
19 know how her DNA got on there.

20 And what we do know is, that Teresa
21 Halbach's DNA was right there at her bench, right
22 underneath the same bench that she's working on,
23 is her storage area. We talked about the central
24 storage area for evidence. She checked it out in
25 November. She never put it back until mid April,

1 I think it was.

2 And all that while, she's got Teresa
3 Halbach's DNA, from the RAV4, in the cargo area,
4 sitting right there on her bench. That's a bad
5 practice right there. But when you get a
6 contaminated control, you can't tell how and
7 whether Teresa Halbach's DNA ended up there in
8 the same extraction mechanism that she's doing or
9 not. You just can't tell.

10 And their own logs, their own
11 contamination logs that I introduced, talk about
12 how difficult it is. We went through it. I
13 won't go through it again with you. But there
14 are instances in here where it specifically says,
15 evidence from one case has been contaminated into
16 another.

17 And they look and they try and figure
18 out why, corrective measures. And they can't
19 figure it out. They can't figure it out. So how
20 are we supposed to figure it out? How are you
21 supposed to figure it out? You can't. And
22 that's why the protocol says, you toss it out and
23 you do it over.

24 Only she had a problem, because she had
25 used it all up. She took a chance, rather than

1 trying to swab it, to put it in this buffer and
2 dissolve it all. And she had a one shot, one
3 chance with this DNA test. And when it came back
4 contaminated, she was kind of stuck, you know,
5 this was probative.

6 And so she went out on that limb and
7 said, I'm asking for a deviation from the
8 protocol. We're going to call this Teresa
9 Halbach's DNA. And why is that so important?
10 Why -- Why do we know that it's unreliable? What
11 else is there to tell us, maybe, that it's an
12 unreliable conclusion? It's the only place. All
13 these other items, it's the only thing that's
14 ever come up with Teresa Halbach's DNA.

15 You people look a little bit tired,
16 anybody want to stretch for a moment? Would you
17 like to get up and stretch? Is that okay, Judge?

18 THE COURT: That's a good idea.

19 ATTORNEY BUTING: All right. Let me --
20 There's one other area, though, where -- that we
21 have to talk about, that Mr. Avery's DNA is found
22 on. And that's the hood latch. But that's the most
23 easy -- easiest to understand, really, because --
24 First of all, note that it's not found until month's
25 later, which means that it wasn't found in the first

1 sweep of the car that Sherry Culhane does.

2 And who followed Sherry Culhane into
3 that vehicle, who's the next person? The first
4 thing they do is DNA, so that no one is
5 contaminating anything. Next one to come in is
6 Mr. Stahlke, the blood spatter guy.

7 He admits he is leaning in, he's got his
8 hands in there. He's touching. And I think he's
9 even -- I don't remember if he admits actually
10 touching the blood itself, but he's certainly all
11 over the area where it was, with his gloves.

12 And then someone asked him to get the
13 odometer reading. So he turns the key and
14 there's nothing. So he realizes maybe the
15 battery is dead. He comes around to the hood,
16 and he said, he didn't change his gloves. And he
17 opens the hood and, then, of course, sees the
18 battery is disconnected. And they have to do
19 something else to get the odometer reading.

20 But that's -- that's the problem with
21 DNA, it's so easily translated -- or transferred
22 in the environment. That's why you are supposed
23 to peel off your gloves. And he didn't.

24 Let's move on to some of the other
25 aspects of this case that are really peculiar.

1 How about a complete lack of any motive for
2 Mr. Avery to kill Teresa Halbach. Why would he
3 kill Teresa Halbach? It's a man who's wrongly
4 incarcerated, spent years in prison. Gets out,
5 has a good lawsuit pending; he's going to get a
6 whole lot of money, in all likelihood. Why would
7 he kill somebody? That makes no sense.

8 First thing that leaps out at you when
9 you heard about this charge, maybe more peculiar,
10 is why Teresa Halbach? Why kill some woman that
11 just comes over and takes pictures of your car
12 four or five times? Why her?

13 And just quickly, this theory that
14 somehow he was luring her over by using the name
15 B. Janda, is completely bogus, because the very
16 same day, one of the other customers did the same
17 thing. You give the name of the owner. Mr. -- I
18 may have it backyards, Mr. Schmitz, I believe,
19 called for -- Mr. Sippel called and left
20 Mr. Schmitz's name because he's the owner and he
21 was the one who was going to be there when the
22 car was looked at.

23 If he is really going to plan to kill
24 Teresa Halbach, specifically, why not just call
25 her on the cell phone? Why leave a paper trail?

1 Why call the office, you know, leave your
2 address, Avery Road? I mean, hello, Avery Road,
3 doesn't take a rocket scientist to trace it back
4 to him.

5 And where was she killed? In the
6 garage? We still don't know, from the State's
7 theory. But think about this, maybe he's got
8 some explanation he's going to come up with here,
9 but if she's killed in the garage and she's
10 burned in the burn pit, what's she doing in the
11 back of the RAV4?

12 He put's her into the cargo area of the
13 RAV4 so he can drive 20 feet around the other
14 side of the building to take her out and put her
15 into the burn pit? Makes no sense at all. It's
16 another reason to suspect that that burn pit is
17 not the original site of burning, because her
18 body was very clearly inside that rear of that
19 RAV4.

20 Why burn the phone, and the camcorder,
21 and the -- or I'm sorry, the camera, and the palm
22 pilot? Why burn those items in your own burn
23 barrel? You are surrounded by quarries. You are
24 out in a rural area. You have got 4,000 junk
25 cars. You have crushed cars you can put it in.

1 Why do you burn it? What's the point?
2 Get rid of it. It's easy to get rid of. Toss it
3 in one of the ponds. Bury it. No one is going
4 to find pieces of metal. Especially, again, if
5 after November 3rd and 4th, it's obvious, the
6 police are looking at you.

7 Mr. Kratz says, the location of that car
8 tells us it was going to be crushed. And think
9 what would have happened if that car -- if
10 Patricia Sturm had not found that car on Saturday
11 afternoon, that car would have been crushed and
12 we would have lost that evidence forever.

13 Well, ask yourself, why wasn't it
14 crushed, already? You got a crusher, I mean, you
15 got a crusher on your property. You got -- 54
16 cars are crushed there. It's obviously used all
17 the time. Why isn't it already crushed on
18 November 5th, especially if you know the cops are
19 looking at you? Common sense.

20 And why try and build this complicated
21 outdoor fire to get rid of a body, when you have
22 got something like this on your property, that
23 can melt aluminum to liquid. Big enough, easily,
24 to do the job you need, if that's what you are
25 going to do. You would use that. But, of

1 course, that doesn't fit with the State's theory,
2 because if you did use the smelter, you wouldn't
3 move the bones back on your property.

4 All right. Let me talk about the FBI,
5 Dr. LeBeau. I suggest he is not a credible
6 witness. And more importantly, the test, for
7 what it was used, for the opinions that were
8 given, is not credible for that.

9 He gets the award for the most absurd
10 expert opinion of anybody that's come into this
11 courtroom and this trial. When he says, I can
12 conclude to a reasonable degree of scientific
13 evidence, that when I test those three items, and
14 don't find EDTA, these other three items that I
15 never bothered to test, they don't have EDTA
16 either.

17 How can you ever make that kind of
18 conclusion? That tells you how sloppy he is with
19 his opinions, how willing he is to give them what
20 they want.

21 Compare his testimony to Dr. Janine
22 Arvizu, who was forthright, not dogmatic. She
23 gave Mr. -- Dr. LeBeau his due. She agreed with
24 him when he was right and pointed out where he
25 was wrong.

1 She said that this protocol is fine,
2 perhaps, the test, if EDTA is, in fact, present.
3 But to then use it beyond that and say that the
4 absence of it, the absence of EDTA by doing this
5 test proves it's not there, goes too far. It
6 even goes beyond the scope of the protocol
7 itself.

8 Because the protocol says that this
9 procedure allows for the screening and
10 confirmation of EDTA in the suspected bloodstain.
11 Doesn't say that you can then conclude, if you
12 don't get it, that's it's not there. And the
13 reason why is -- it took Dr. Arvizu to figure
14 out, I certainly couldn't -- it's this whole idea
15 of limit of detection.

16 The test that he did, injecting
17 something right into the -- into this instrument,
18 this whatever it was, MS/MS thing, that's easy.
19 I mean, yeah, you are going to get a low -- you
20 know, you are going to be able to get a low limit
21 of detection because it's pure, put right into
22 there.

23 It's the extraction process, where you
24 are taking something out of the fabric or a swab,
25 diluting it, extracting it and going through that

1 whole process of filtering, that it becomes more
2 difficult. Your level of detection is now much
3 higher.

4 In addition, the protocol was rushed.
5 Think about that. Think about how this whole
6 thing came about. The FBI has not tested for
7 EDTA in 10 years, since the O.J. Simpson case.
8 His explanation is, because no one asked. Think
9 about that. Why do you think no one asked?

10 First of all, we can't ask for it, as
11 the defense, the defense bar. Only the
12 prosecution can ask for it. What did they do in
13 that case? They screwed it up. They found EDTA
14 and later argued, whether they were right or
15 wrong, we will never know, later claimed, oh,
16 that was just a carryover from a different
17 sample. Well, the jury was told that there was
18 EDTA in that case, look what happened.

19 What prosecutor is going to trust them
20 to do this same kind of test and not screw up
21 their case? This prosecution team. Because they
22 were desperate to try and do something to
23 discredit the defense of planting, whatever it
24 took.

25 And, so, when it normally takes three to

1 four months to develop one of these protocols,
2 they suddenly come up with one in two weeks. And
3 they are testing it and validating it and
4 actually doing the test samples before, as
5 Dr. Arvizu said, before they even got their
6 results of their own competency tests from this
7 procedure.

8 So why is the FBI involved in this case
9 at all? Again, this shows credibility, a lack of
10 it. They try to say, oh, we're concerned about
11 police misconduct. We want our public officials
12 to be truthful. And if there's some officer who
13 is planting, we want to know about it.

14 Well, I asked them, what investigation
15 did you start? Where is the grand jury? What's
16 the U.S. attorney doing? Is there even any
17 investigator on the case from the whole FBI,
18 that's talked to any witness? No.

19 All they have got is this lab that's
20 asked to do this new protocol and here's what
21 they are told. Purpose of this request is to
22 establish the presence of EDTA in the vial of
23 blood, thereby eliminating the allegation that
24 this vial was used to plant evidence. That's it.
25 It's not to find out whether these cops are

1 corrupt. It's to eliminate the defense. So are
2 we surprised at the results? I'm certainly not.

3 The real reason the FBI got involved in
4 this case is because Mr. Avery had the audacity,
5 and, you know, this is what I'm going to hear,
6 probably, how dare he accuse these fine officers
7 and besmirch their reputations.

8 And when that happens, they circle the
9 wagons. Cops, when they get accused of
10 misconduct, they circle the wagons. That's the
11 code of silence, or that's the bond they have.
12 And that's why Calumet and DCI were so quick to
13 jump on the bandwagon, when Lenk and Colborn were
14 professing they did nothing wrong. They had
15 nothing to do with this. And Lenk and Colborn
16 probably counted on that.

17 Quickly, a couple of other peculiar
18 things about the timeline. The -- Bobby Dassey
19 says that he sees Teresa Halbach at 2:45, he
20 leaves at three, and the vehicle is still there,
21 something like that. He has no good way of
22 verifying the time, but he tells the officer,
23 talk to Scott Tadych -- Tadych, he can tell you
24 precisely, is the word he used, precisely what
25 time it was.

1 Well, how does he know that Tadych can
2 tell precisely what time it was that he
3 supposedly is being seen, unless the two of them
4 maybe got together, talked about a story they had
5 come up with.

6 Remember, those two people, unlike
7 anybody else that was asked about an alibi and
8 maybe weren't, but those two people alibied
9 themselves. Without each other, there is no
10 alibi for either one of them. Nobody sees Dassey
11 go hunting in the woods. Taking a shower, by the
12 way, before he goes off hunting, like his Irish
13 Spring soap is going to help attract deer. Come
14 on.

15 And he goes there so that -- he wants to
16 get there before dusk, because that's when the
17 deer feed. I'm not a hunter, but we know what
18 time he left and came home. It was well before
19 dusk, he is home at 5. That doesn't make sense.

20 More importantly, Lisa Buchner, the
21 school bus driver, is a completely disinterested
22 party and she does have a reason to know the
23 time, precisely, because she has got a regular
24 route that she drives, 3:30 to 3:40 every day.
25 School lets out 3:05. She's drives, drops the

1 people off. She's dropping those Dassey boys off
2 at that time.

3 What does she say? She says she saw a
4 woman taking pictures of a van. Now, how many
5 women are out there taking pictures of a van at
6 that same time period. She's honest and says I
7 don't remember if it was Monday, the 31st,
8 Tuesday, the 1st, or Wednesday, November 2nd.
9 That's what she tells Investigator Wiegert on
10 November 7th, just one week afterwards now, when
11 it's fresh in mind.

12 And she's so concerned about it, she
13 went to the barricades on November 5th and said,
14 hey, I think I saw her. I think I saw her. I
15 don't remember what day but, you know. That's
16 what she describes, this woman taking pictures.
17 The State, 16, 17 months later, is able to
18 confuse her, and say, well, yeah, maybe it was a
19 week earlier, maybe it was a couple weeks
20 earlier, but that's not what she said when it was
21 fresh in her mind.

22 The State will argue that the location
23 wasn't right. She said she saw someone taking --
24 she saw her taking the pictures of something down
25 around the turn around circle. And it's true,

1 that's not where Barb Janda's car was, or this
2 van was. It was up the road a ways. Well,
3 either she's mistaken about that or -- and I
4 submit this is a very real possibility -- she is
5 doing a hustle shot, because she's been flagged
6 down on her way out and asked to take another
7 picture. By who?

8 We know it's happened before. We have
9 evidence. Angela Schuster said, just a few weeks
10 earlier, Tom Janda had flagged her down and taken
11 a hustle shot, on the way out.

12 And John Leurquin, the propane driver,
13 yeah, he's not as certain, but he does
14 corroborate Lisa Buchner in that he sees this
15 green SUV around the same time. He doesn't know
16 who's driving, and maybe it wasn't Teresa Halbach
17 at that point. This person who was hustling a
18 shot perhaps, was driving away with. But he
19 recalled it because it was different, wasn't the
20 usual regular vehicles that he always sees.

21 So when the State tells you that Bobby
22 Dassey is this credible witness, who's the last
23 person to see Teresa Halbach alive, maybe he's
24 right, if he's the killer. Or Scott Tadych, his
25 only alibi. He tells him --

1 ATTORNEY KRATZ: Judge, I'm sorry, I'm
2 going to interpose an objection on third party
3 liability. I would like to be heard.

4 ATTORNEY BUTING: I will rephrase that. I
5 will withdraw that.

6 ATTORNEY KRATZ: I don't want it rephrased,
7 I want to be heard.

8 THE COURT: I'm going to let Mr. Buting
9 finish up, then I will hear your objection.

10 ATTORNEY KRATZ: Thank you, Judge.

11 ATTORNEY BUTING: Police, when they
12 interview Mr. Dassey, just accept his story,
13 unquestioning -- unquestioningly. And they accept
14 Mr. Tadych's story. They don't go check out his
15 alibi for later, where he says he is visiting his
16 mother at the hospital. Well, where is the proof of
17 that?

18 Why do you believe him, especially when
19 he tells you that, when he comes back, he sees
20 this fire, and then he knows what time it is
21 because he leaves around 7:45, he wants to get
22 home so he can watch *Prison Break*. *Prison Break*,
23 at 8:00, in Wisconsin. Did they check that out
24 to see what time it comes on?

25 Do you still want to be heard or?

1 THE COURT: You can continue.

2 ATTORNEY BUTING: All right. I will talk
3 briefly about the other, since Mr. Kratz said that
4 these -- Mr. Fassbender and Wiegert were
5 investigating, parallel, these other suspects,
6 including the boyfriends, ex-boyfriends, whatever,
7 but look at what they did. They admit that, yeah,
8 sure, Mr. Avery may be a suspect or a person of
9 interest because we know he was one of the people
10 who saw her on the last day.

11 But who else saw her on the last day,
12 George Zipperer, and look how he behaved. Mr.
13 Avery says, come on in, very cooperative.
14 Zipperer is belligerent. But we didn't know
15 that.

16 Hillegas, former boyfriend, no alibi,
17 didn't even ask him.

18 Male roommate, Mr. Bloedorn, who doesn't
19 report her missing for four days. What's up with
20 that? Don't ask him for an alibi. Where was he?

21 Bradley Czech, male friend with a little
22 bit more personal relationship with her, perhaps.
23 Again, no alibis checked.

24 Mr. Pearce, an employer who never
25 bothers to report her missing, for four days.

1 All of these roles that these people
2 play, the officers admitted would normally, in a
3 normal missing person or homicide investigation,
4 be considered possible suspects that you would at
5 least look at and check out, but not here.

6 And what about all the other people on
7 the Avery property on October 31st? What's up
8 with that? Where are their alibis? Customers
9 and other people who work and live there.

10 And, interestingly, going quickly back
11 to this hustle shot for a minute, I asked, you
12 know, you think maybe -- well, of course, if she
13 was flagged down, there wouldn't be any record in
14 her palm pilot.

15 But if it was a different kind of hustle
16 shot that she was on her way to go do, the FBI
17 technician, or whatever, that came here and
18 talked about the electronics, said that he might
19 have been able to recover that kind of data from
20 the palm pilot, but wasn't asked to. They were
21 concerned about him trying to prove that it was
22 Teresa Halbach's palm pilot, not what was on it.

23 And, then, there's what I consider the
24 mysterious part of Teresa Halbach's life. And I
25 mean no disrespect to the Halbach's family,

1 whatsoever, when I say this. But Teresa had her
2 own private life. We know that. She had at
3 least three circles of friends, I think it was
4 described: Her family, people that she worked
5 with in the community, marketing and whatnot, and
6 the Green Bay friends.

7 And apparently they didn't intersect
8 very much. Because she's missing for four days
9 before anyone reports it. And maybe most
10 interestingly is, we know that on Saturday night
11 she was out, with somebody, or she was -- I can't
12 say she was out with somebody, but we know that
13 she went out, some Halloween party somewhere,
14 bar, wherever, in Green Bay area is what
15 Mr. Hillegas, I think, said he thought, or maybe
16 Mike Halbach.

17 And yet, despite all those fliers that
18 were sent around, all over the state, thousands
19 of them, not one person has come forward to say I
20 was with her Saturday night. Something is weird
21 about that. Especially when you combine it -- I
22 believe Mr. Pearce, I may be misquoting him, but
23 I believe he, at one point, had some thought that
24 maybe she had met somebody on the weekend and
25 that's where she was and why she wasn't showing

1 up.

2 But then we have the weird thing about
3 the voice mail. Why did the police not follow up
4 on this. We were not confused about these
5 records, but I'm glad that Mr. Zimmerman was able
6 to enlighten us, that the messages that are on
7 this exhibit, 372, 18 of them, would not
8 constitute a full mailbox. He said that very
9 clearly.

10 And what he said was, when I asked him
11 if this -- if this persons account was sending
12 out a message when you called, that said mailbox
13 is full, would something more have to be on it
14 than what's on these records. And he said, yes.
15 And he said that, yes, that meant something had
16 to have been erased. Something on her voice mail
17 was erased by somebody.

18 And to do that, you would have to have
19 her password. And I'm not at all accusing the
20 Halbachs of that. But somebody else close, that
21 had her password, and for some reason thought it
22 necessary to erase a message. What was so
23 important on her voice mail, or perhaps so
24 incriminating on her voice mail, that would
25 necessitate somebody, close enough to her that

1 has her password, erasing one or more messages.

2 These are all reasonable doubts, ladies
3 and gentlemen. These are all questions that
4 police and law enforcement ignored, because it
5 points away from Steven Avery, who wouldn't have
6 had her password and points to someone else.

7 Mr. Strang will finish up and give you a
8 little bigger picture in a moment, but I'm
9 confident that you are going to find more than
10 reasonable doubt and find Mr. Avery not guilty.
11 Thank you.

12 THE COURT: All right. Members of the
13 jury, we're going to take a break at this time. I'm
14 going to talk to the attorneys about scheduling.
15 Again, do not discuss this matter during the break.
16 We'll call you back shortly.

17 (Jury not present.)

18 THE COURT: You may be seated. First of
19 all, Mr. Kratz, I will hear your objection at this
20 time.

21 ATTORNEY KRATZ: Thank you, Judge. This
22 Court has entered numerous pre-trial rulings for
23 which Mr. Buting was a party. One of those
24 pre-trial rulings prohibited any reference to a
25 possible third party, that is, a killer, other than

1 Brendan Dassey, without advance ruling of the Court.
2 This Court entered a written order, as I recall, as
3 to that matter.

4 Mr. Buting, in front of this jury,
5 indicated that maybe Bobby Dassey is the killer.
6 There's two things that I ask the Court to
7 entertain: First of all, inquire of Mr. Buting
8 whether that was an intentional violation of the
9 Court's previous ruling; that is, whether he
10 recalled the Court's previous ruling as to third
11 party liability and whether or not Mr. Buting was
12 fishing for a mistrial.

13 And if not, that is, if the Court is
14 unwilling or otherwise able to make its own
15 ruling as to intentional versus negligent
16 reference to Bobby Dassey, we are asking for an
17 admonishment in front of the jury as to the
18 nature; that is, that it intentionally or
19 purposely violated a pre-trial ruling of this
20 Court.

21 Certainly earlier, in Mr. Buting's
22 testimony, when referring to the burn barrels
23 with Bobby Dassey, he had referred to Bobby
24 Dassey as a possible other suspect. However, it
25 wasn't as blatant in calling Bobby Dassey the

1 killer.

2 And I don't know whether Mr. Buting
3 thinks that he's entitled, because he's
4 representing Mr. Avery, to play by a separate set
5 of rules, or to ignore pre-trial rulings of the
6 Court, and it certainly does call for an
7 admonishment and I would suggest it calls for a
8 colloquy, with the Court, as to whether this was
9 an intentional violation of a previous Court
10 order.

11 I would note that, Judge, both Dassey
12 and Tadych were specifically ruled out in the
13 pre-trial rule or the pre-trial order.

14 THE COURT: Mr. Buting.

15 ATTORNEY BUTING: Judge, I'm aware of the
16 pre-trial ruling. I don't believe I exceeded the
17 Court's ruling. When you are doing closing
18 arguments, of course, sometimes you say things
19 differently than you intend. If I did, I certainly,
20 I think, brought it back within the realm of
21 investigative bias, which was the primary point that
22 we're trying to make and throughout this case.

23 But maybe more importantly, the Court's
24 ruling was that we were not allowed to present
25 any evidence, extrinsic evidence, of a third

1 party. But I don't know that that included that
2 we couldn't argue reasonable inferences from what
3 the evidence presented.

4 I don't think I was -- I wasn't even
5 intending to go that far, quite frankly. I was
6 trying to keep a little farther back from that.
7 But I don't think that under *Denny* there's --
8 what they're talking about is presenting evidence
9 trying to point the finger at somebody else.
10 Reasonable inferences, I think, is another matter
11 and I think it's reasonable inference from the
12 evidence.

13 THE COURT: Mr. Kratz.

14 ATTORNEY KRATZ: No further argument,
15 Judge.

16 THE COURT: All right. I'm taking a look
17 at my order, after a 14 page decision, the order is
18 that the defense is precluded from offering any
19 direct evidence to a third party, other than Brendan
20 Dassey participated in the commission of the crimes
21 as charged in the Amended Information. I don't
22 recall that I was asked to place a limit on closing
23 argument. I think there is a differentiation
24 between the two.

25 I don't know how I would have ruled on

1 it, frankly, had I had one, because I don't know
2 that the *Denny* case specifically addresses the
3 issue. I don't know that another case
4 specifically addresses the issue.

5 But my recollection is, and the wording
6 of my order is, that it was directed to the
7 introduction of evidence. I'm not sure that the
8 Court can prevent the defense from arguing
9 inferences on the evidence as it was presented.
10 The State gets a chance to respond in rebuttal.

11 I don't know. I will hear further from
12 the State if you wish, Mr. Kratz, but I'm looking
13 at my order and it only relates to direct
14 evidence. I don't know that I can rely on that
15 order to address your concerns.

16 ATTORNEY KRATZ: If the Court excludes
17 evidence of third party liability, and there's no
18 evidence in the record, how does Mr. Buting think
19 that he can comment on that evidence, or lack of
20 evidence. He can't. I mean, it absolutely flies in
21 the face of the third party liability court order.

22 In other words, Judge, to be precluded
23 from presenting any evidence, but then to be
24 allowed to stand up in front of this jury and say
25 maybe Bobby Dassey is the killer, how could we

1 possibly have notice to either predict that, or
2 to present evidence that -- that might suggest
3 differently. That absolutely flies in the face
4 of the -- if not the words of the order,
5 certainly the intent of that order.

6 THE COURT: Mr. Buting.

7 ATTORNEY BUTING: Well, Judge, as the Court
8 I think has made clear, Mr. Avery, by his not guilty
9 plea, means he isn't the killer, so somebody else
10 has to be. What I was trying to do was simply point
11 out all of the other avenues that the police could
12 have examined and didn't.

13 And I think in the context, overall, of
14 every -- everything else that I have argued in
15 the argument, I think I'm within that. And I
16 don't think there is anything close to a
17 violation of the Court's order barring any kind
18 of direct evidence.

19 Again, it wasn't even my intent to go
20 outside the realm of investigative bias, failure
21 to look at suspects. But if I did, I think in
22 the overall context of the whole argument we have
23 been making throughout this case, I think the
24 jury is not going to be confused and it's going
25 to be clear that that's the purpose for which

1 it's being offered.

2 THE COURT: I -- I don't know, without
3 doing some research, the answer to the question the
4 State is raising here; that is, whether the logical
5 inference from a **Denny** decision that denies the
6 right to introduce evidence provide -- or prevents
7 the defense from arguing on the basis of evidence
8 that was presented, that there's third party
9 liability.

10 Let me suggest this, as I understand
11 what Mr. Buting is saying, he is saying, I may
12 have gotten carried away in the way I worded it.
13 My purpose in making the references was not to
14 suggest that there was evidence in the record
15 that any of these parties committed the crime,
16 but rather that the State did not sufficiently
17 investigate other parties.

18 We're still going to be hearing from
19 Mr. Strang. If Mr. Strang, at the beginning of
20 his argument, clarifies that point for the jury,
21 is that sufficient to address the State's
22 concerns?

23 ATTORNEY KRATZ: We would ask for an
24 admonishment. If that's the Court's ruling,
25 however, that the Court believes that that is a more

1 appropriate resolution of the case, I understand
2 that that's the Court's order.

3 THE COURT: Here's what I am going to do.
4 I'm going to give Mr. Strang a chance to do that
5 when he makes his argument, to clarify it, assuming,
6 Mr. Strang, that you feel the way your co-counsel
7 does about what the intention was.

8 ATTORNEY STRANG: Yeah, I -- More to the
9 point, I have to apologize, I was shortening my
10 closing argument --

11 THE COURT: Don't worry about it, because
12 that's something I'm going to discuss with the
13 parties in chambers. The juror's eyes are starting
14 to glass over. We're looking at your closing, plus
15 rebuttal from the State, I don't think it's fair to
16 the jurors to keep them here as long as that may
17 take.

18 I think both parties will be better
19 served if we come back tomorrow, when the jurors
20 are fresh. I do think, however, it's necessary
21 to address the alternate juror issue, and I'm
22 going to talk with the parties about that, in
23 chambers, before we come back.

24 ATTORNEY STRANG: Do we want to just
25 address, in chambers, what it is I should say, or

1 consider saying? I'm sorry, I just missed that.

2 THE COURT: You will have the evening to
3 think about that.

4 ATTORNEY STRANG: Okay.

5 THE COURT: I'm going to go off the record
6 right now. I will see counsel in chambers for a
7 short conference.

8 (Recess taken.)

9 THE COURT: I will indicate for the record,
10 I met with counsel in chambers and I indicated that,
11 based on the time of day and the fact we have got
12 part of defense argument, plus State rebuttal left,
13 I was concerned that the jurors, certainly by the
14 time we got to the State's rebuttal, would be too
15 tired to appreciate what was being said.

16 The Court has an interest in making sure
17 that the jurors have an opportunity to digest,
18 understand and comprehend the arguments that are
19 given. And while at the start of today, it would
20 have been my preference to complete closing
21 arguments today, sometimes justice takes more
22 time than we plan on in the morning.

23 So what I'm going to do, when the jurors
24 come back, is adjourn for the day. The Court is
25 going to begin the -- because we're as far into

1 closing arguments as we are, I'm going to begin
2 the sequestration process and the jurors will be
3 staying in a hotel tonight. It's my
4 understanding that the parties have a stipulation
5 to propose to the Court concerning the -- at
6 least two of the three alternate jurors.
7 Mr. Strang.

8 ATTORNEY STRANG: We do, your Honor. And I
9 would be happy to take a first stab at the
10 agreement, as I understand it, between the parties.
11 I will preface that by saying that I have explained
12 this agreement to Mr. Avery and I think it's
13 entirely acceptable to him. It's not complicated.
14 We had enough time to talk about it. And I'm
15 satisfied that he both understands and approves the
16 agreement that I will try to articulate now, late in
17 the day.

18 In short, the parties have agreed that
19 each will have an extra peremptory strike, in
20 effect, to be exercised here in the ordinary
21 manner of exercising peremptory strikes. That
22 will remove 2 of the 15 jurors that we presently
23 have, leaving 13, which would be 12 and 1
24 alternate.

25 And, of course, whether the Court keeps

1 an alternate, or how to handle the designation of
2 an alternate, and then what to do with an
3 alternate, is the Court's prerogative and not the
4 parties. But as I understand the agreement here,
5 for purposes of the record, it does encompass one
6 extra peremptory strike for each party, to be
7 exercised now.

8 THE COURT: Mr. Kratz.

9 ATTORNEY KRATZ: For today's purposes,
10 Judge, that is the scope of our agreement, that each
11 party intends to exercise an additional peremptory
12 strike this afternoon.

13 THE COURT: Okay. And this is in lieu of
14 drawing the names of the jurors out by lot, which
15 would be the process contemplated by the statute, in
16 the absence of agreement by the parties.

17 ATTORNEY STRANG: It is, your Honor, from
18 the defense advantage point.

19 THE COURT: Mr. Kratz.

20 ATTORNEY KRATZ: That's my understanding,
21 Judge.

22 THE COURT: And, Mr. Avery, it's correct
23 that you have discussed this with your counsel and
24 you are in agreement with this procedure.

25 THE DEFENDANT: Yes, I am.

1 THE COURT: Thank you. Anything else
2 before we bring the jurors back in?

3 ATTORNEY KRATZ: If I could have just a
4 moment with counsel, your Honor.

5 THE COURT: Go ahead.

6 ATTORNEY KRATZ: We're all set, Judge.

7 THE COURT: All right. You can bring the
8 jury in.

9 (Jury present.)

10 THE COURT: You may be seated. Members of
11 the jury, I understand I told you an hour and a half
12 or two hours ago or so, I don't remember when, that
13 we were going to attempt to complete closing
14 arguments this evening. In light of the point that
15 we're at in the proceedings now, I am concerned that
16 fatigue might be a factor that prevents you, as
17 jurors, from giving the attention that is deserved
18 for the closing arguments.

19 So what we're going to do is adjourn for
20 today and resume the completion of closing
21 arguments tomorrow morning. As I told you at the
22 beginning of the trial, we started out, initially
23 we had four extra jurors, we are now down to
24 three. Because of the fact we're this close to
25 the end of the trial, and I don't want to require

1 the extra jurors to participate longer than is
2 necessary, we have decided that we're going to
3 excuse two of the three extra jurors today.

4 The parties have agreed to a procedure
5 whereby each of the parties will exercise one --
6 will exercise a peremptory strike. If you recall
7 back at the time of initial jury selection,
8 that's how we got from 30 down to 16. So they
9 are going to do that today.

10 When they are done, the strikes will be
11 shown to me. I will identify the two jurors that
12 the parties have selected. I will meet with
13 those two jurors before excusing you today, as is
14 my practice any time alternate jurors are
15 excused.

16 For the 13 of you who are remaining,
17 because of the fact we are well into closing
18 arguments, we are going to begin sequestration
19 this evening. We have hotel accommodations for
20 you. We have dinner arranged for you. And you
21 can decide, when you get on the bus, I guess,
22 whether you want to check in at the hotel first
23 or go to dinner first. But because of the fact
24 we're at this late stage of the proceedings,
25 that's how we're going to handle things.

1 At this time I think the Clerk has a
2 sheet and we will allow the parties to make their
3 stipulated peremptory strike.

4 ATTORNEY KRATZ: Judge, could Mr. Strang
5 and I approach, just very briefly.

6 THE COURT: Yes.

7 (Side bar taken.)

8 THE COURT: Counsel, raised an issue for me
9 that I believe has been dealt with through the media
10 coordinator, but I will address it on the record,
11 since it was raised. And that is, there was some
12 conversation about whether the excused jurors would
13 be available to the media.

14 I'm not going to allow that at this time
15 until a verdict is reached at this case. It is
16 unlikely, but not impossible, that the jurors
17 could be called back. And for that reason I'm
18 not going to have the excused jurors available to
19 the media until a verdict is reached in this
20 case.

21 All right. Based on the information on
22 the sheet, the excused jurors are Terri Temme and
23 Laura Barber. I will meet with Ms Barber and Ms
24 Temme before we leave today. And I am going to
25 excuse the remainder of the jury at this time.

1 I will remind the rest of you, again,
2 that as usual, you are not to discuss the case.
3 It's especially important, even though you have
4 heard some of the closing arguments, you cannot
5 begin your deliberations until all the closing
6 arguments have been made. So make sure you do
7 not discuss the case.

8 The televisions and radios have already
9 been disconnected in your hotel room, so
10 hopefully between the lack of available media and
11 supervision by the sheriff's deputies, that won't
12 be a problem. But, again, do not discuss the
13 case, in any fashion, until the Court excuses you
14 to begin deliberations tomorrow. The 13 people
15 who are still on the jury are excused at this
16 time.

17 (Jury not present.)

18 ATTORNEY STRANG: Your Honor, maybe just
19 one -- another quick moment at side bar.

20 THE COURT: Okay.

21 (Side bar taken.)

22 (Proceedings concluded.)

1 STATE OF WISCONSIN : CIRCUIT COURT : MANITOWOC COUNTY
2 BRANCH 1

3 STATE OF WISCONSIN,

4 PLAINTIFF, JURY TRIAL - DAY 24
5 vs. CLOSING ARGUMENTS, CONTD.
Case No. 05 CF 381

6 STEVEN A. AVERY,
7 DEFENDANT.

8 **DATE:** MARCH 15, 2007

9 **BEFORE:** Hon. Patrick L. Willis
10 Circuit Court Judge

11 **APPEARANCES:** KENNETH R. KRATZ
Special Prosecutor
12 On behalf of the State of Wisconsin.

13 THOMAS J. FALLON
Special Prosecutor
14 On behalf of the State of Wisconsin.

15 NORMAN A. GAHN
Special Prosecutor
16 On behalf of the State of Wisconsin.

17 DEAN A. STRANG
Attorney at Law
18 On behalf of the Defendant.

19 JEROME F. BUTING
Attorney at Law
20 On behalf of the Defendant.

21 STEVEN A. AVERY
Defendant
22 Appeared in person.

23 **TRANSCRIPT OF PROCEEDINGS**

(Jury not present.)

THE COURT: At this time we're back on the record in the case of State of Wisconsin vs. Steven Avery, Case No. 05 CF 381. We're here for a continuation of closing arguments this morning. Will the parties present state their appearances for the record.

ATTORNEY KRATZ: Good morning, Judge. The State appears by Calumet County D.A. Ken Kratz, Assistant Attorney General Tom Fallon, Assistant D.A. Norm Gahn appearing as Special Prosecutors.

ATTORNEY STRANG: Good morning as well. Steven Avery is present, again. And Jerome Buting and Dean Strang standing for him.

THE COURT: All right. Before we bring in the jury and continue with closing arguments there was one matter I wanted to clarify for the record. During the course of these proceedings we have had some individual voir dire with the jurors. And I wanted to clarify the Court's understanding that neither party is asking that any of the jurors be excused for cause, based on any of the information adduced at the voir dire. Mr. Kratz.

ATTORNEY KRATZ: That's correct, Judge.

THE COURT: Mr. Strang.

1 ATTORNEY STRANG: That is also correct.

2 THE COURT: Very well. Is there anything
3 else the parties wish to take up outside the
4 presence of the jury before we resume with closings.

5 ATTORNEY KRATZ: No, Judge.

6 ATTORNEY STRANG: No, sir.

7 THE COURT: All right. We'll bring the
8 jurors in at this time.

9 (Jury present.)

10 THE COURT: You may be seated. Good
11 morning, again, members of the jury. At this time
12 we're ready to resume closing arguments. Mr. Strang
13 will be speaking first on behalf of the defendant.

14 ATTORNEY STRANG: Thank you. Good morning.

15 JURORS: Good morning.

16 ATTORNEY STRANG: You know, I -- what's it
17 been, five weeks, or six weeks, or whatever it's
18 been, and the rules within which we operate
19 fundamentally allow me only to speak at you. At
20 this point, I would be ready to speak with you. I
21 can't exactly. But I do want to do my best to talk
22 with you this morning. Can't hear?

23 JUROR: It's kind of soft.

24 ATTORNEY STRANG: Kind of soft.

25 THE COURT: Which number is that?

1 ATTORNEY STRANG: I'm No. 7. I'm getting
2 nods, you hear me, whether you want to or not.

3 I want -- I want you to step back just a
4 little bit here and let's try to work at
5 assembling a bit what you might do in approaching
6 your task. And you have got such a mass of
7 information, really, over the last five weeks,
8 let's call it. There are some things you are not
9 going to be able to do, I think. But there are
10 also some things you can do. And I want to talk
11 about what I see as the line between those
12 things.

13 You, unfortunately, are not going to be
14 able to solve the murder here. And I say that
15 for this reason, if Steven Avery did it, if -- if
16 he's the guy who murdered Teresa Halbach, then --
17 then, in a sense you are not going to solve that.
18 They already think that.

19 This is the person they think all the
20 evidence points to, the person they have
21 identified as doing it. You can agree or
22 disagree with that, with that -- that theory of
23 prosecution. But, fundamentally, you and I
24 aren't solving a murder, because if Steven Avery
25 didn't do it, we can't tell you who did.

1 You know, Jerry Buting, Jerome Buting,
2 in Court, you know, is not going to tell you --
3 doesn't mean to tell you that, for instance,
4 Bobby Dassey murdered Teresa Halbach. We don't
5 mean to tell you that someone else murdered
6 Teresa Halbach. It's really kind of a point, we
7 don't have a police department, you don't have a
8 police department.

9 We're not going to be able to solve the
10 murder, if Steven Avery did not do it. So, you
11 know, you can agree with the State, you can agree
12 with the defense, but at some level you are not
13 solving the murder, as much as it's natural for
14 all of us to want do that.

15 Second thing I think you are not going
16 to be able to do, I'm quite certain you are not
17 going to be able to do, is bring Teresa Halbach
18 back through that door, or better yet, back
19 through the door of her mom's house. We are not
20 going to be able to do that. Convicting a guilty
21 guy, convicting the person who killed her,
22 wouldn't do it. Convicting someone who didn't
23 kill her, certainly won't do it.

24 The life that was before October 31,
25 2005, never will be lost. It's etched in mom's

1 heart. It's etched in her brother's, and her
2 sister's minds, in their memories, in the people
3 they are. That life is not lost. The life that
4 could have been, going forward beginning
5 November 1, 2005 is forever lost, not forgotten,
6 but lost.

7 This is human tragedy, and if you or I
8 understood why people have been killing each
9 other since we crawled out of caves, we would
10 stop it. But somebody killed this woman and that
11 life going forward is lost. You can't get it
12 back. I can't get it back. The gentleman at
13 this table can't get it back.

14 The other thing I think that you are not
15 going to be able to do, you can't do, 13 people,
16 12 people, can't do, is we can't provide closure
17 here in any real meaningful way. It's not what
18 courtrooms are good for. You would like to be
19 able to do that for Teresa Halbach's family.

20 I think you would like to be able to do
21 that for Steven Avery's family, provide some
22 closure. Provide it for him, for crying out
23 loud. You would probably like to do that, too,
24 if you could. But there again, the time since
25 November of 2005 really, fundamentally, is lost,

1 as a matter of closure for Steven Avery.

2 He's never really, in the broader
3 public, been presumed innocent. He's never
4 really had the presumption to which he was
5 entitled as an American, as a citizen accused.
6 You folks may be the only people in the world,
7 other than those of us at my table, who do
8 presume him innocent.

9 You can't do anything about it. We
10 can't do anything about that, for the rest of the
11 world. And as I say, courtrooms are pitiful,
12 pathetic places to try and provide closure for
13 Delores, closure for the Halbach family. Not
14 that it's not important that the system not work,
15 it is important that the system work. Because
16 when it works, we can provide justice, or some
17 semblance of justice. But justice and closure
18 are -- are two different things.

19 Nobody is always happy with justice, or
20 at peace necessarily with justice. And in that
21 sense, closure would be something more.
22 Something more personal for that family, and for
23 this family, and for Steven. You'd provide it if
24 you could, I know you would. You won't be able
25 to do it.

1 And in some ways you are going to be
2 told that you ought not try to do any of these
3 things. Because I think Judge Willis will tell
4 you, after the lawyers are done speaking at long
5 last, I think he will tell you that you have got
6 to decide this case, as finders of fact, without
7 sympathy, without prejudice, without passion,
8 without all the things that might go into solving
9 murders or providing closure. You will be told
10 instead that you won't, you can't, be swayed by
11 sympathy, or prejudice, or passion.

12 But there are some very important things
13 that you can do here, now that I have identified
14 the things you can't. There are some very
15 important things you can do. You can honor your
16 oath. You can keep a promise that you made
17 before the world, more importantly, that you made
18 for yourself. You put your own conscience on the
19 line. You can honor the oath that you have taken
20 and that you will take, as jurors. You can obey
21 the oath.

22 That's no small thing. You are under an
23 enormous amount of pressure, internally and
24 externally. This table, my table, a courtroom
25 full of people, a community at large, terribly

1 serious issues for everybody. So when I say you
2 can honor and obey your oath, it's a big deal.

3 You also can apply the law, honestly and
4 courageously, part of what you are duty bound to
5 do, as the Judge delivers the law to you in the
6 form of those jury instructions. You can apply
7 that. You can decide this case, if you choose,
8 on the evidence in the courtroom and only the
9 evidence in the courtroom.

10 You have the power to do that. You have
11 a duty to do it, but more importantly you have
12 the power to do it. You get to make the choice
13 to do that. It's something you can do. You can
14 decide whether allegations have been proved,
15 beyond a reasonable doubt, in considering all of
16 the evidence.

17 I don't take it for granted that jurors
18 do that, in the end. Because jurors are all
19 human, just like I am. But if you choose to do
20 that, you can. It's within your grasp. And I
21 think, finally, you can, if you choose, you can
22 get it right.

23 In the limited parameters available to
24 you, you can get it right. You can go home,
25 whenever you are done, and say, I know in my

1 head, because I used my head, I know in my heart,
2 because I used my heart, I know in my conscience,
3 because I listened to my conscience, that I got
4 it right. You can do that. And if you do, you
5 will also have set it right.

6 Just as I said I was going to ask you,
7 when I spoke in opening statement, when it was
8 about 19 below zero outside, or whatever it was
9 that day, you will set a lot of things right, if
10 you get it right, here. The 1985 case won't
11 matter so much any more, if justice is done this
12 time.

13 Will that ever go away? No, but it just
14 won't matter so much any more, the injustice that
15 was done to Steven then, because there is --
16 there is something redemptive in human beings
17 going back and trying again and getting it right
18 eventually.

19 So I want to ask you simply to commit to
20 doing the things you can do, and to living with,
21 reconciling yourself to the things you can't do.
22 You are not going to solve a murder -- a murder,
23 but you may spare someone who's not a murderer.
24 You are not going to bring Teresa Halbach back to
25 her family, but at some level, just by this trial

1 ending, you can give her back to her family.

2 What I mean by that, I mean for crying
3 out loud, what an artificial thing we do -- and I
4 love this, I love being a lawyer, I love it --
5 but what an artificial strange thing it is that
6 we do here, rules of evidence, formal procedures.
7 And for crying out loud, right down to taking
8 body parts and putting exhibit numbers on them,
9 explain a person's phone records on a screen for
10 a room full of strangers to look at.

11 It is what we do. It's what we have to
12 do here, at some level. Clinical discussions of
13 death, dry discussions of who you are calling, or
14 who's calling you, on your cell phone, just for
15 example. It's important. It's necessary.

16 But, when this trial ends, with a just
17 verdict, although you can't bring her back, in
18 some ways you can give her back, you know. We
19 can be past that and remember the Teresa Halbach
20 who was, rather than the 15 loci of her DNA.

21 You won't give closure, but maybe,
22 maybe, you can create an opening; if not closure,
23 an opening when we finish this trial, for people
24 to get out of these pews, out of these
25 uncomfortable pews, go back about their lives,

1 and in church, and in community, and wherever --
2 wherever the heck people hang out, in family
3 rooms, there pursue closure.

4 And the sense of restoration or
5 reconciliation that we find, or seek, in places
6 other than courtrooms, with uncomfortable pews to
7 sit in. So maybe, as you finish this case,
8 although you can't give closure, maybe you can
9 give the opening for it.

10 How do you undertake then, to do the
11 things that you can do. It's witnesses, it was
12 helpful for Mr. Kratz to give you pictures of the
13 witnesses so you can associate the face with the
14 name again. But much more fundamentally, how do
15 you -- how do you assemble and assimilate this
16 mass of information and approach it in a
17 practical way.

18 You can't do it by hoping the DNA will
19 tell you a story. You know, unfortunately, for
20 example, DNA, doesn't tell stories. People tell
21 stories. People have stories. DNA is
22 submicroscopic bits of protein. Mine's a little
23 different than yours, but, you know,
24 fundamentally we're all about 99.9 percent the
25 same, probably. Doesn't tell a story. It

1 doesn't tell why someone did something, doesn't
2 tell when it got where it got.

3 If a human being made a mistake with the
4 DNA, it doesn't tell you anything at all about
5 whether -- whether it should have been here, or
6 wasn't here, or whatnot. It doesn't -- It
7 doesn't tell you a story, unfortunately, although
8 it makes good rhetoric, in a closing argument.

9 So what you have to do in the end is,
10 you have to look and listen to people here. Even
11 when they are talking about science, or filling
12 their -- with the propane truck, or whatever. In
13 this process, to do your job, to do the thing you
14 can, you have got to look at real intently on the
15 witness stand and listen to people. And you have
16 got to sort out who you believe and who you
17 don't, in the end.

18 So I want to at least suggest that you
19 ask two very basic questions here as -- as a
20 framework, a possible framework for getting at
21 the things you can do here, if you choose. First
22 question, you know, he says he is innocent.
23 Anybody can say they are innocent.

24 Back at the time before you were around,
25 before anybody was really looking at him, you

1 might ask first, was he doing the things that an
2 innocent person might do. As you look back at
3 it, was he acting and was he behaving like an
4 innocent man. That's one question you could ask,
5 sort of approaching this whole mass of evidence.

6 A second question you might ask yourself
7 is, for the law enforcement professionals and the
8 prosecutors, primarily the state employees and
9 state witnesses, call them law enforcement people
10 generally, the ones who are so convinced he is
11 guilty, back before they got here, were -- were
12 they behaving as honest people acting in good
13 faith do.

14 You could ask yourself that question,
15 again, as sort of a framework for approaching
16 this mass of evidence. Back before they knew you
17 were going to look at them, as you see it now,
18 were they behaving honestly, were they acting in
19 good faith. Now, these -- these are just two
20 suggestions, just some lawyer's idea. You can go
21 about this whatever way you want. But this might
22 be helpful.

23 And ask yourself, as to the folks who
24 think Steven Avery is guilty, do you believe them
25 in the end, and believe them to a level that you

1 would not even pause or hesitate, when called
2 upon to act in the most important affairs of
3 life. That's language right out of this
4 reasonable doubt instruction that you got.

5 And just taking a part of it, and it's
6 sitting under your chairs, or wherever your
7 instructions are, you don't have to pick it up
8 and look at it now, but you will find that. I
9 think it's a helpful practical guide in deciding
10 whether something is proven, whether you believe
11 it, beyond a reasonable doubt. It's, you know,
12 would you -- given the information you have in
13 the end, would you pause or hesitate in the most
14 important affairs of life.

15 There's no getting around that this is
16 one of the most important affairs of your life,
17 of your lives. A young woman is dead, for no
18 conceivable good reason. And a man is on trial
19 for doing it. Enormous consequences.

20 And Mrs. Halbach, and everybody who
21 loved and cared about this young woman, brothers,
22 sisters, friends, uncles, aunts, you name it.
23 And to Mrs. Avery, whose own story is tragic.
24 You know, and to the people who fought for his
25 innocence, the handful of people who believed

1 him, before the rest of the world finally got it
2 right, who went through all that, Mrs. Avery, and
3 then two years later to have this come crashing
4 down on her. This is an important affair. And
5 it is for you now, too.

6 So, I start with my first question, did
7 he behave as an innocent man might behave. Let's
8 go back, let's go back to roughly October, 2005.
9 What's he doing? What's Steven Avery doing?
10 Well, he is living in a trailer that he borrowed
11 from Rollie Johnson. That's pretty modest.
12 That's a damn sight better than a prison cell,
13 that he had been in. He's got himself a
14 girlfriend. He's working in the family business.
15 This is all honest stuff. So far.

16 He has a lawsuit started, for a whole
17 lot of money, based on he's got two indisputable
18 points on his side in that lawsuit. One, he was
19 innocent of the earlier case, but, you know, he
20 rotted in prison for a while anyway. So, you
21 know, he is innocent, but he went to prison.
22 He's got two pretty good starting points in a
23 lawsuit, in getting some money. And that's what
24 he's got two other lawyers pursuing for him, back
25 in 2005. He's got his mom and dad back. I don't

1 mean to be ignoring Allen, but when I speak of
2 Delores and anybody else, he's got his family
3 back, is the point.

4 And as this -- as this case starts to
5 take shape, you know, as Teresa gets reported
6 missing, and they find out that she had a photo
7 shoot out at the Avery property. The very night,
8 November 3, she's reported missing, Sergeant
9 Colborn comes out to the property, bumps into
10 Steven Avery.

11 Steven is not expecting the police.
12 There's no way he would have even known she had
13 been reported missing at this point. Bumps into
14 Sergeant Colborn and he is cooperative. By
15 Sergeant Colborn's own account, he is
16 cooperative, open, talks to Sergeant Colborn.
17 Doesn't say I'm not talking to you, you know.

18 The next morning, same thing. Detective
19 Remiker and Lieutenant Lenk come out to visit
20 him. He's cooperative, cooperative to the point
21 of saying you can come into my house, when they
22 ask, go ahead, come in my house.

23 I think it's later on Friday,
24 November 4, when David Beach comes and, you know,
25 has the poster. He wants to put the poster up.

1 This is Teresa's relative, nice younger guy who
2 testified, I think the first day of testimony.
3 And David Beach has a conversation with Steve
4 Avery and Steve is forthright. He's calm. He
5 appears concerned, according to Mr. Beach.

6 To me, this is useful, because at that
7 point he is not posing. He is not in a
8 courtroom. He doesn't know how this is all going
9 to play out. These -- These are people who are
10 seeing him real, if you will, just having, you
11 know, encounters with him. And this is their
12 take on what -- on what they are getting from his
13 behavior and what he says.

14 Is he behaving like an innocent man?
15 Well, he has Teresa Halbach's cell phone number.
16 We get a glimpse of her, she's obviously willing
17 to give this out. She says so in the voice mail
18 message. She leaves her cell phone number on the
19 voice mail message. They caught that, that she
20 leaves on the Janda voice -- or answering
21 machine.

22 And Steve has her cell phone number. He
23 has got it written down in two places in his
24 house. They are on his computer desk somewhere.
25 They are there on November 5 when the police

1 descend and the -- the Avery people get excluded
2 from the property. And the police have it for a
3 week. They are there. He hasn't destroyed her
4 cell phone number, hasn't tried to get rid of it,
5 you know. It is there in not one, but two
6 places.

7 So, you know, I don't know, if you can
8 burn a cell phone, and if you can burn an A310
9 Digital Power Shot Camera, I don't know why you
10 can't burn two pieces of paper that have a cell
11 phone number on it. That's not what he does,
12 obviously.

13 There was a van for sale. Heaven knows
14 there was a van, you saw about 10 pictures of
15 this silly maroon van sitting out there. Why --
16 Why do I, you know, why do I suggest that's
17 evidence, if you will, of Steve behaving like an
18 innocent guy would behave? Well, you know, if
19 you're -- if you are going to lure the
20 photographer to your property so you can have
21 your evil way with her, and kill her, you don't
22 need a car, you don't need anything for sale.
23 You just lie and say, you know, I want you to
24 come out and take a picture of a '73 Eldorado,
25 or, you know, whatever it is.

1 There's a van. It's the van he tells
2 *Auto Trader*. It's owned by Barb Janda, just like
3 he tells *Auto Trader*, B. Janda. And gives B.
4 Janda's telephone number. Turns out there is no
5 dispute, of which I'm aware. The Dassey boys,
6 you know, Scott Tadych, the people who know about
7 this, who testified, yeah, there's a van. It's
8 sitting there. She's trying to sell it. It's
9 hers.

10 I think that's suggestive of innocent
11 behavior. Not of, you know, luring, or
12 concocting some scheme so that you can murder
13 somebody.

14 Look, again, what he's doing in October
15 and early November, 2005, while he's still in his
16 house. The gun's over the bed. Are they hidden?
17 Has he -- you know, has he run off and burned
18 them, or asked his nephew to take them and thrown
19 them in the bottom of a pond or something, or
20 even moved them to the spare bedroom? No, the
21 guns are where they are. They are right where
22 Rollie Johnson left them.

23 Did he crush the car, no. Did he empty
24 the burn barrel, try to hide, you know, whatever
25 is in the burn barrel? Did he melt the license

1 plates? Did he get rid of the key that
2 supposedly is found, you know, next to the foot
3 of his bed, or across the way from the foot of
4 his bed, next to his desk? No, you know, he
5 doesn't do any of that. I don't think the key is
6 there. But if you believe that it's -- that it's
7 there, you know, if you believe it's there, then
8 it's awfully incriminating, if you believe he put
9 it there.

10 But, you know, I don't know why he would
11 keep the key, and that key alone, of all of
12 Teresa Halbach's possessions, if he has
13 previously disconnected the battery so that the
14 key won't work, unless he reconnect the battery
15 for some reason. And he's got a junkyard, for
16 crying out loud. Leave the key in the trunk
17 where the keys are for all the other junk
18 vehicles. Leave it in the ignition, put it in
19 the grass, I don't know. Bring that, and that
20 alone, to your bedroom.

21 But you know, in general, the behavior
22 you are seeing from Steven Avery on November 3
23 and November 4 is open, cooperative, sure you can
24 search my house, contrasted to the behavior of a
25 George Zipperer, who is one of the other

1 appointments Teresa has that afternoon.

2 Uncooperative, hostile, dishonest with the
3 police, won't let him in the house for a long
4 time, even after he knows this young woman is
5 missing. You get this from -- some of it from
6 JoEllen Zipperer and some of it from Detective
7 Remiker.

8 How about burning trash, plastic smell,
9 burning trash at about, give or take, 3:45 on
10 Monday afternoon, how about. Well, that really
11 sort of takes you to Bobby Dassey, and Blaine
12 Dassey, and Lisa Buchner, and John Leurquin, to
13 decide what burning trash means.

14 If Bobby Dassey is right and Teresa
15 Halbach has been there at 2:45, then burning
16 trash at 3:45 with a plastic smell is potentially
17 incriminating. Bob Fabian sees this, smells the
18 plastic burning as well. That's potentially
19 incriminating if Bobby is right.

20 I'm wondering why Bob Fabian doesn't
21 smell the quite distinctive odor of a burning
22 tire. You know, rubber burning, with black smoke
23 pouring thickly out of the burning barrel, if
24 supposedly the tire is being used to burn the
25 cell phone, the camera, and the palm pilot.

1 But setting that aside, to me there is a
2 more fundamental problem with that. I don't
3 think Bobby Dassey is right. You know, Blaine
4 Dassey has a good reason to know when he gets off
5 the bus every day, it's 3:30 to 3:40. He comes
6 home, Bobby is sleeping. Bobby is there and he's
7 sleeping. This is what his own brother
8 remembers.

9 More, the bus driver has a pretty good
10 reason to know what time. She's driving the same
11 route every afternoon, dropping off the same
12 kids, in the same place, at about the same time,
13 every afternoon.

14 She's no friend of Steven Avery. She's
15 not connected to Steven Avery. She's not
16 coached. She's not trying to oversell what she
17 remembers. But that's when she drops the Dassey
18 boys off. And one of the days that week, either
19 Halloween, or Tuesday, the 1st, or Wednesday,
20 November 2nd, she remembers seeing a female
21 photographer taking pictures of a van.

22 If facts are stubborn, as counsel says,
23 then that -- then that's a pretty stubborn fact.
24 Just because she's not overselling it, and she
25 has no reason to want -- to care how this case

1 comes out, you know.

2 So is it possible that some other female
3 photographer was there on Tuesday, November 2nd,
4 taking a picture of a van? Well, is it possible?
5 Sure, it's possible. But even Investigator
6 Wiegert concedes, when pushed a little bit about
7 that, that he doesn't have any information about
8 another female photographer coming to take a
9 picture of another van.

10 So this is pretty reliable stuff, that
11 Teresa is there at more like 3:30 or 3:40, not
12 2:45. John Leurquin sees a green SUV leaving.
13 What does he care about Steven Avery? For that
14 matter, what does he really care about Teresa
15 Halbach. And he doesn't have -- he doesn't have
16 a dog in this fight.

17 What he has to do is sit and stare out
18 the front windshield of his truck, every day for
19 half an hour, 3:30 to 4, quitting time, as he
20 fills the LP truck. He has got nothing to do
21 except look at the world. Filters out the school
22 bus, filters out, you know, the cars he sees
23 coming and going every day. That's common sense,
24 that makes sense.

25 When something new goes by, it's not a

1 heavily traveled road, he notices. Is he
2 overselling the point, no. Can't say it's that
3 SUV, can't say it's a Toyota RAV4. Looks
4 similar, can't say who is driving it. Didn't see
5 whether it turned right or left at the stop sign
6 on Highway 147. You know, he's not gilding the
7 lily, so to speak. He's not overselling what he
8 saw.

9 So, to me -- you guys are the ones that
10 matter -- but to me, that's fairly reliable
11 stuff. It's reported to the police, candidly,
12 when they ask. Lisa Buchner for that matter goes
13 up to the barricade, that Saturday, says I have
14 some information maybe you want. They interview
15 her two days later, you know, the following
16 Monday, when it's fresh in mind. And she tells
17 them what she knows. Tells them what she doesn't
18 know, for that matter.

19 So, you know, you got Bobby stacked up
20 against Blaine, Lisa Buchner and John Leurquin,
21 and it looks to me like the more probable time
22 frame is 3:30ish that she's there. And if that's
23 so, then burning garbage in your burn barrel at
24 3:45 is just burning garbage in your burn barrel.
25 It's innocent. Bob Fabian smells plastic, so

1 what. It's a white plastic garbage bag that, you
2 know, Blaine sees.

3 And you got plastic in your garbage, you
4 know, I'll bet you do, unless you live in town
5 where you've got a nice blue recycling tub or
6 something, and you separate that stuff out. But
7 this doesn't look like much, if the time frame is
8 different than Bobby Dassey has it.

9 So how about -- how about the 4:35 p.m.
10 phone call to Teresa's cell phone, what my
11 colleague referred to as the alibi phone call.
12 And the State argues he is doing that to create
13 an alibi, because he knows that will create a
14 record on the cell phone bills, cell phone
15 company records.

16 Okay. All right. I mean, first of all,
17 it makes the *67 calls not very important,
18 because they are going to create a record too.
19 And if he knows a 4:35 call is going to create a
20 record, then he also knows that the 2:24 and 2:33
21 call are going to create a record. But maybe
22 more importantly than that, this isn't much of a
23 alibi.

24 It's a cell phone, calling a cell phone,
25 you can be anywhere, doesn't place you in any

1 particular, you know, spot on the planet. It's
2 not like you are at home in your kitchen, because
3 you called on your land line, you know, with a 6
4 foot cord keeping you from going any further.
5 It's a cell phone. It's not a good alibi, you
6 know, it doesn't get you anywhere, or suggest
7 that it's guilty behavior.

8 This call, also, draws more attention to
9 you, not less. I mean, you are going to show up
10 on the cell phone records. It is your cell phone
11 you are using. It's not -- This isn't something
12 you do if you are trying to alibi yourself.

13 But if, while we're looking at phone
14 calls and moving through Steve's behavior on
15 October 31, you know, hey, there are two
16 telephone calls the State hasn't talked much
17 about yet, if at all, but they stipulate on this.
18 They agreed. There are two phone calls from the
19 Manitowoc County Jail to Steven Avery's land
20 line.

21 He's got a cordless phone, it may even
22 be in one of the pictures in the bedroom, so he
23 can wander around. But it is, you know, it is a
24 cordless land line phone, they have stipulated.
25 These phone calls come in from his girlfriend,

1 Jodi, from the jail. First one is at 5:36 in the
2 afternoon, 15 minutes of talking, tape recorded.
3 Investigator Wiegert has listened to it. And
4 then another one at 8:57 p.m., tape recorded,
5 then listened to by the police, 15 minutes long,
6 talking to his girlfriend.

7 This is what somebody who's in the
8 process of burning a body is going to be doing?
9 Are you kidding me? You know, I mean, you think
10 maybe you would have heard those tapes played if
11 there had been something incriminating, or out of
12 the ordinary about the 15 minute conversations
13 with the girlfriend, that night, Halloween night?
14 It's more just evidence of every day life, doing
15 what an innocent person might well be doing. And
16 that's how October 31 comes to an end.

17 Later that week -- and I, you know,
18 Blaine Dassey tells you this, he didn't make a
19 big point out of it, but he told you, and I want
20 to remind you about that, later that week Steve
21 Avery suggests to Blaine, maybe he wants to
22 invite some of his friends over for a bonfire, at
23 Steve's place. Blaine's in high school, high
24 school kids, bonfire, he makes the suggestion.
25 It never happens, for whatever -- I don't even

1 know that Blaine explained why, but it just --
2 the bonfire never happens later in the week.

3 But, you know, if you had burned a body
4 in your burn pit, or you even knew that there
5 were bones in your burn pit, spread around, human
6 remains, you are going to invite some high school
7 kids over to have a bonfire and sit around the
8 same burn area? I'm not. That doesn't seem to
9 me that somebody who's guilty, that that's
10 something he would do, an invitation he would
11 extend to his nephew. A bunch of random high
12 school kids, come on over to my make shift
13 crematorium for a bonfire and stand around.

14 What does he do here, in terms of
15 behaving like an innocent guy, or not. Well,
16 look at the witnesses we called on his behalf.
17 Now, all walks of life, many fewer witnesses than
18 the State called, but as I say, all walks of
19 life. And what struck me, at least, about the
20 folks who testified for you, because we called
21 them, is I thought to a person, these folks were
22 natural, they were real.

23 They weren't swiveling in their chair to
24 look at you and give you a talk, as if they were
25 an old friend of yours every time they are asked

1 a question. They are not advocating anything, as
2 far as I could pick up. Or as I say, sort of
3 selling you something, overselling something.
4 They are candid on cross-examination, just as
5 they were on direct examination. I thought, at
6 least, that's what this group of people shared.

7 Was I surprised that we had to call the
8 bus driver, rather than the State calling, to
9 help you with the time frame that afternoon,
10 yeah, I was surprised. But we did it, since they
11 didn't. And now you have got that information.

12 But, you know, these -- these people
13 rang true to my ear, at least. And it's your
14 ears that matter.

15 So let me move to my second question:
16 Can you believe the police? Can you believe the
17 law enforcement folks who are so sure that Steven
18 Avery's guilty? What do you see about their
19 behavior before they are on the stage here?
20 Well, look at what they say and do when they
21 don't know that you are going to be listening and
22 seeing.

23 Let's start with Andy Colborn, since I
24 sort of started with him on November 3. He calls
25 in, does a license check on Teresa Halbach's car.

1 He says he thinks it was probably on November 3,
2 not sure, but probably November 3, that he did
3 that. But remember he's working on November 3,
4 so he would have had his radio.

5 And it's Detective Remiker who says
6 ordinarily you would use your radio when you are
7 calling in a license check to dispatch. He uses
8 his cell phone instead. The tape you hear is
9 clearly a phone call, not a radio in. So I think
10 it's probably more likely that this license check
11 is November 4, when Sergeant Colborn acknowledges
12 he was off.

13 Didn't work on November 4. And you may
14 remember, Mr. Kratz asked him, do you remember
15 what you were doing on November 4, 2005. He
16 says, yes, I do. I was off. I remember what I
17 was doing. Doesn't tell you what he was doing,
18 other than to deny he went to the Avery Salvage
19 yard, or denied he had anything to do with
20 planting evidence. But he is off.

21 And I'm not going to play it for you
22 again, it's in evidence, but -- Let's see if this
23 comes up. That's -- That's what you hear on the
24 tape that we played.

25 SERGEANT COLBORN: Lynn.

1 DISPATCHER: Hi Andy.

2 SERGEANT COLBORN: Can you run Sam,
3 William, Henry, 582, see if it comes back to that
4 da da da da da -- then they start talking over
5 each other. I can't make it out. You can listen
6 to it if you want. Then she goes off on talking
7 about needing a Spanish interpreter, chitty
8 chatting while she's doing the license check.

9 She's comes back and she confirms it's
10 Teresa Halbach's license plate, the missing
11 person.

12 Sergeant Colborn says, '99 Toyota, and
13 so on.

14 Why is he doing that? Why is he doing
15 that? Why is he calling in a license check on
16 November 3, or November 4, which ever day it is?
17 You can get that information from Investigator
18 Wiegert, or if you want to call your dispatcher,
19 ask your dispatcher.

20 This sounds a lot like what road patrol
21 officers do when they come across a stalled car,
22 an abandoned car, a car where it shouldn't be.
23 That's what this sounds like. Draw your own
24 conclusions, obviously look at it like from any
25 other piece of evidence. But what's important is

1 he is doing this, not on a witness stand, he is
2 doing this when he doesn't know anybody is going
3 to be seeing, or hearing, or evaluating it later.

4 Stay -- Move off Sergeant Colborn, but
5 stay in the Manitowoc County Sheriff's Department
6 for the moment. Mr. Kratz argued to you
7 yesterday that Special Agent Fassbender, starting
8 November 5, devoted his resources where this
9 thing was likely going. Where this thing was
10 likely going.

11 True, I guess he did, in the sense that
12 it was certainly clear pretty quickly where this
13 thing, this investigation, was going. In my
14 opening, and with Detective Remiker, we had a
15 chance to hear, at 11:30 in the morning, on
16 November 5, half an hour after the first police
17 officers arrived at the Avery property, there to,
18 you know, see the concealed Toyota that the
19 Sturm's had found. Half an hour later, for you
20 to hear, at a time when he, you know, he wouldn't
21 have known it, Manitowoc detective, Dennis
22 Jacobs, talking to his dispatcher:

23 Can you tell me, do we have a body or
24 anything yet?

25 DISPATCHER: I don't believe so.

1 Very next thing he says:

2 Do we have Steven Avery in custody,
3 though?

4 Yeah, it's pretty clear where this is
5 going. By the time Special Agent Fassbender
6 arrives, you know, at 2:25, 3 hours later that
7 afternoon almost, it's pretty clear where it's
8 going. And five minutes after this one
9 conversation --

10 THE COURT: Mr. Strang, I'm getting a
11 signal for a break, so we're going to take a short
12 break and then we'll resume in 10 minutes.

13 (Jury not present.)

14 THE COURT: You may be seated. Let's
15 report back at 10:15.

16 (Recess taken.)

17 (Jury present.)

18 THE COURT: Mr. Strang, you may resume.

19 ATTORNEY STRANG: Thank you.

20 So five minutes later, five minutes
21 after Detective Jacobs called with the
22 dispatcher, he is on the phone with Detective
23 Remiker, or the radio, I don't remember now, but
24 you got the tape in evidence. Of course,
25 Detective Remiker does testify, and you may

1 remember him, kind of presented himself as
2 someone who thought they were barking up the
3 wrong tree, that Steve didn't do this, when he
4 testifies. That morning, just about an hour
5 after the Sturms have first found the Toyota.

6 Okay. Other than the car, do we have
7 anything else?

8 Not yet.

9 Okay. Is he in custody?

10 ATTORNEY STRANG: It's not who are you
11 talking about, who do you mean by he.

12 Negative, nothing yet.

13 One pronoun, he, and these guys know who
14 they are talking about at 11:35 in the morning.
15 Are these folks acting in a way that seems good
16 faith and honest to you, back then? Six days
17 after this, Special Agent Fassbender makes the
18 telephone call to Sherry Culhane at the Crime
19 Lab, try to give her some direction. And, you
20 know, she's holding herself out as a scientist,
21 that's how she holds herself out.

22 Is Special Agent Fassbender asking for
23 science, on the exhibit that Mr. Buting showed
24 you? Is he asking for science there, for a good
25 cautious, objective, let's see where the science

1 leads us kind of thing, when he's asking, try to
2 put her -- put her in his house or garage.
3 That's not a very good fit, in my view, with the
4 State's, counsel's argument here, when they
5 submit evidence, they are not looking for a
6 specific answer. Oh, really.

7 The memo belies that. The phone memo
8 does. And Sherry Culhane, on the stand, herself,
9 tells you, that by the time these buccal swabs
10 are taken in November, 2005, from all kinds of
11 people other than Steven Avery, members of his
12 family, these are elimination samples.

13 Elimination samples. We have already decided
14 they didn't do it, we're just trying to eliminate
15 if we find their DA -- their DNA anywhere.

16 Sherry Culhane, for that matter, had she
17 followed the protocol on her testing, the bottom
18 line folks, had she followed her protocol on the
19 testing of that bullet found in March. She can't
20 say it's Teresa Halbach's DNA. First time in her
21 career, 23 years, first time, on the last chance
22 to put Teresa Halbach in his house or garage, she
23 deviates from the protocol and includes Teresa
24 Halbach.

25 Now, it was just the control that was

1 contaminated. It was just Sherry Culhane's DNA.
2 That doesn't turn the evidentiary sample into
3 having Teresa Halbach's DNA. Okay. All right.
4 Fine. But the protocol presumably is there for a
5 reason. Protocols are the foundation of good
6 science. And the protocol says, if you have got
7 contamination, you set that experiment aside and
8 you do it again, you don't rely on that one.

9 Science ought to be reliable. It ought
10 to be consistent. And it ought to be cautious,
11 otherwise, it's not science. And the results
12 simply aren't reliable. That's why you have a
13 control. And when you get contamination, you now
14 know that something has gone wrong with this.

15 And to say that the contamination is
16 over here, but not over here, is a little like
17 saying, I don't know, maybe no one even eats TV
18 dinners any more, maybe they're microwave dinners
19 now, I guess, from what I see in the grocery
20 store. But whatever, however you heat this stuff
21 up, when you pull off the plastic, or the tin, or
22 whatever covers the meal, you know, and the
23 little peach cobbler has a fly in it, in that
24 little compartment, you don't eat the Salisbury
25 steak either, okay. You know, this is -- this is

1 not fancy stuff in the end. It's -- It is and
2 should be common sense, at some level, in the
3 end. But she deviates, for the first time in 23
4 years.

5 The end -- This continues, the end of
6 January, 2007, bringing us up to six weeks ago.
7 Now, the State goes all the way to Virginia, to
8 Quantico, to get the FBI. Are they trying -- Is
9 the FBI trying to root out possible police
10 corruption? Are they concerned about the
11 integrity, of policing in northeastern Wisconsin?
12 Trying to find out if there's a bad cop or not?
13 I think the decision is already made.

14 You have this, too, Special Agent Gerald
15 Mullen of the FBI, memo to the FBI laboratory,
16 this January 30th --

17 ATTORNEY KRATZ: Judge, I'm sorry, I don't
18 mean to interrupt. I believe the defense is
19 entitled to one closing. Mr. Buting covered exactly
20 the same territory yesterday. I understood they
21 were going to split and talk about different items.
22 I simply wanted to interpose an objection. My
23 apologies to counsel, but that was my understanding
24 from the Court.

25 ATTORNEY STRANG: I would be more concerned

1 about boring you. Mr. Buting did cover it. It's
2 there.

3 But I want to say something about EDTA
4 that Mr. Buting did not. Janine Arvizu, who is
5 not a doctor, Mr. Buting misspoke, she didn't
6 complete her dissertation. She did the other
7 Ph.D. work. I want to make sure you got out of
8 that what she had to tell you. And it's this,
9 the FBI protocol that they put together in a
10 couple of weeks here, is good for identifying and
11 confirming the presence of EDTA. It is not
12 designed for confirming the absence of EDTA. It
13 has to do with the detection limits. The
14 instrument has a detection limit and the method
15 has a detection limit.

16 So, look, if you were interested in
17 finding out whether your friend is at home, and
18 the instrument you chose was a telephone, call
19 him at his house, ring his telephone number, if
20 he answers the phone, you have confirmed his
21 presence with your instrument. He is there, you
22 have called his home, not his cell phone, he is
23 there. He's got to be, if he's answering his
24 phone. You have confirmed his presence.

25 However, if your instrument is your

1 telephone and you call his home and it just rings
2 and rings, and it's not answered, you have not
3 confirmed his absence. He could be in the
4 shower. He could be in the basement folding the
5 laundry, he could be in bed sleeping. He could
6 be pouting and just not answering the phone
7 because he sees it's you calling on the caller ID
8 and he doesn't want to talk to you today.
9 Whatever it is, you haven't confirmed his absence
10 with the telephone. You haven't designed a
11 protocol to get you to that.

12 Your method, in other words, of
13 detection, isn't suited to confirming absence,
14 only presence. If you like fresh baked hot apple
15 pie, and I put you in a room and I blindfold you
16 and we walk in, a fresh baked hot apple pie, your
17 nose is the instrument. It has a detection
18 limit.

19 A dog has a better instrument, lower
20 detection limit, fancier instrument. He can
21 detect less of the smell of apple pie than you
22 can, but you have got this instrument to use. If
23 it's within your detection limits, and the pie
24 is, you know, slid on the table under you while
25 you are blindfolded, you will detect it with your

1 instrument.

2 However, if the method is no good,
3 because we have got to consider that, you are not
4 smelling an apple pie. Well, is the room too
5 big, are the windows open, is the pie too far
6 away, does the room smell badly of something else
7 that's interfering with your instrument detecting
8 the fresh baked apple pie? We have method
9 detection problems and limits. Or is the apple
10 pie, not fresh baked, but it's an 11 year old
11 apple pie? You may not detect that either, with
12 your instrument. I don't think Janine Arvizu was
13 really telling you more than that. And,
14 unfortunately, Dr. LeBeau was trying to tell you
15 more than that and overselling his case.

16 Now, others who matter, in the law
17 enforcement group who think Steve is guilty.
18 Mr. Lenk and Mr. Colborn. They denied here, of
19 course, but what are they doing, in 2002, when
20 the evidence slip has to be signed for
21 transmission of the hair sample and fingernail
22 clippings, or whatever it is, to the Crime Lab,
23 and the evidence custodian at the time, Detective
24 Sergeant James Lenk, signs off.

25 Is he really, as he claims here, simply

1 signing the form, giving it to Sergeant Shallue
2 and allowing Sergeant Shallue to fill out the
3 otherwise blank form? You are entitled to
4 disbelieve that. Or at least to say he's not an
5 honest evidence custodian if he is doing that at
6 the time. He is begging to be fired, because he
7 is not documenting what's going where. Or if
8 he's just telling you here, to distance himself
9 from that file in the Clerk's Office, you are
10 entitled to consider that too.

11 Would Lieutenant Lenk lie, in the end?
12 Would he lie, as a sworn law enforcement officer?
13 Well, all I can tell you is, he did, twice, and
14 you heard it. I have the transcript from the
15 earlier hearing. Here he says he arrives at
16 2:00. When he's asked under oath before, it's
17 6:30 or 7, once when he's asked, and the other
18 time he's asked, it's late afternoon. This isn't
19 15 minutes off, folks. It's under oath and it's
20 a difference of four and a half or five hours.

21 At that time of year, November, 2005,
22 it's the difference between broad daylight and
23 pitch black. He was under oath, and he gave two
24 very different answers to the same question, at
25 two different times, under oath. He was the only

1 witness, in five weeks, shown to have made
2 inconsistent statements, under oath.

3 Others made inconsistent statements and
4 were shown to have. Blaine Dassey comes to mind.
5 Scott Tadych comes to mind. Both of them are
6 asked, at first, by the police, was there a
7 bonfire, on Halloween, no, no bonfire. Later
8 they get asked again, now there is a bonfire. In
9 fact, Scott Tadych comes here and says big
10 bonfire, flames to the top of the roof. Same
11 guy, again, I showed, when first asked by the
12 police, no bonfire. Closer in time to October
13 31, no, didn't see a bonfire that night.

14 That's inconsistent statements, but they
15 are not under oath. They still, as the Judge
16 instructed you yesterday, are something you can
17 consider, consistency or inconsistency of a
18 witness' statements, over time. Still you can
19 consider those when you decide who you believe,
20 and not under oath.

21 Blaine explained that a little bit.
22 Explained his changes of his story. Well, the
23 police kept asking him. They didn't like the
24 answer, they asked him again. Got angry with him
25 and his mother, at the restaurant, when they

1 wouldn't reject Uncle Steve. Is that because
2 Blaine is scared of Uncle Steve?

3 My recollection, yours will govern,
4 there's 12 of you and one of me, but my
5 recollection of that testimony is that the
6 question was whether Blaine Dassey was scared,
7 and the answer was something like, no, not
8 really, but he used to boss us around. You will
9 decide that.

10 But in any event, Lieutenant Lenk, by
11 the time he gets to you folks, is telling you
12 some really implausible things. Like, I had
13 never been to Steven Avery's house. I have never
14 been on the Avery property, but somehow, just out
15 of habit, I turned right at the end of Avery
16 Road, and I -- I -- I just happened to drive
17 straight to Steven Avery's trailer. Okay.

18 So this -- You know, what they are doing
19 and whether -- whether you think you can trust
20 them back when they are not aware they are going
21 to be observed or revealed later, is important in
22 the same way what he does, back before he knows
23 it's going to be played out to you, is important
24 in assessing who you believe. Are they acting
25 honestly? Is he acting like an innocent person

1 would act, or might act?

2 It is important because it comes down to
3 the bias in the end. You know, would, in the
4 end, police officers plant evidence? And that's
5 a hard one, you know. That's why it's helpful to
6 say, boy, are they behaving honestly and in good
7 faith up to then. Because in the end, would they
8 plant evidence against someone. Now, you will
9 have to decide whether you have a reasonable
10 doubt about that, or whether, you know, we have
11 shown that to you at any level, or not.

12 But, look, it is a matter of bias, if it
13 happened. And what you critically, I think, need
14 to understand, that if and when police officers
15 plant evidence, they are not doing it to frame an
16 innocent man. They are doing it because they
17 believe the man guilty. They are not doing it to
18 frame an innocent man. They are doing it to
19 ensure the conviction of someone they have
20 decided is guilty.

21 That's why you plant evidence. Other
22 than in the strangest, you know, most abandoned
23 of conscience sort of police officer, they aren't
24 after framing an innocent person, they are after
25 ensuring the conviction of someone they just

1 believe is guilty.

2 So as you approach the whole concept of
3 planting you have got to understand the bias that
4 would drive it, not, you know, boy, they are out
5 to get an innocent guy. It's just the opposite.
6 It's just the opposite. But it's also just as
7 corrosive to do it. Because juries decide guilt,
8 not police officers who are involved in the hunt.
9 You know, they get invested too, in the outcome,
10 and in whom they suspect, who they think is good
11 for something.

12 And, you know, the State pooh-poohs the
13 idea that a civil lawsuit, for a whole lot of
14 money, against the Manitowoc Sheriff's
15 Department, would have caused anyone to so
16 dislike Steven Avery that they would plant
17 evidence against him. Well, look what the mere
18 suggestion that they did plant evidence has done,
19 in terms of a reaction here.

20 The defensiveness of the case that the
21 State presented to you, the anger about the mere
22 suggestion of planting evidence, the
23 self-righteousness, the hostility, the trying to
24 have it both ways with you. We trusted the
25 Manitowoc people, they were skilled. They were

1 honest. They were the best available evidence
2 technicians.

3 But we also had somebody watching. We
4 were short of manpower. We needed them. But, in
5 the first search of Steven Avery's -- first
6 lengthy search of Steven Avery's house, on the
7 evening of November 5, we got enough people that
8 two of them can be taking photos. Two of them
9 can be taking photos, in this little trailer, as
10 you heard. You hear the State trying to have it
11 both ways, here.

12 And in sort of getting at the bias that
13 would drive a police officer, potentially, to
14 plant evidence, it's this -- it's this need, this
15 belief that he is not really innocent. He's
16 guilty, he's got to be guilty. It's what you
17 hear from Detective Jacobs and Detective Remiker,
18 it's that quality. It's the sense that this is
19 where this is going, three hours in, when all we
20 have got is the car, on a big property with a
21 whole lot of other people there.

22 It's the -- After five weeks of evidence
23 and 501 exhibits, it's the State standing up and
24 telling you it's clear. What in the world is
25 clear and simple when it takes five weeks and 501

1 exhibits to try to show. And whatever this is,
2 whatever, whichever way you come out, this case
3 isn't clear and simple.

4 And that's where the civil lawsuit feeds
5 in. It's not that it feeds in with bad cops. It
6 feeds in with good cops, in the sense that it
7 erodes, fundamentally, the sense of identity, we
8 get the bad guys, we don't get the good guys.

9 And here it is, they got it wrong, that
10 department got it wrong. Not only do they get it
11 wrong, but the right guy is still out there and
12 he commits another rape, Gregory Allen. This
13 goes to my identity, if I wear that same uniform.
14 Even if I'm aligned with these people, as you
15 hear the sort of reaction from the prosecutors to
16 this.

17 And now, you know, since -- since he
18 really couldn't have been that innocent, he's got
19 to be guilty of this one. He must be the right
20 guy this time. So you -- you know, nobody means
21 to do this, but you start looking around things
22 that are inconvenient, that don't quite square up
23 with the theory that he did it.

24 One example, and one example only, from
25 the blood, Teresa Halbach's blood in her own car.

1 If it were true, as the State now says, that
2 Steven Avery shot Teresa Halbach in his own
3 garage, killed her there, and if it were true
4 that he then burned her in the area immediately
5 behind the garage, why, why is her bloody head
6 ever in the Toyota at all. It's farther to take
7 her back to her car than it is to take her around
8 the corner of your garage, to the burn site, if
9 that's what it is.

10 So the State sort of ignore's the fact
11 that if Steve Avery had done it, and done it in
12 the way they say, her blood wouldn't be in the
13 car. The bloody hair stain wouldn't be there.
14 It is there, of course, so it suggests that
15 somebody did have to use the car as a transport.
16 She wasn't burned there -- or wasn't killed
17 there, but that's inconvenient. You guys have to
18 be, in the end, if you're going to do what you
19 can do here, more objective than that.

20 You can't overlook the inconvenient,
21 because it doesn't fit. You can't overlook, for
22 example, in deciding whether Lieutenant Lenk
23 dropped the key on the floor, rather than finding
24 it honestly.

25 You can't overlook the fact that all her

1 other keys are gone, the three or four other keys
2 that Tom Pearce described, and which common sense
3 would tell you would be on your key ring, and
4 they are not there. It's the kind of thing
5 that's inconvenient, but you can't overlook it,
6 even if they do.

7 The overlooking of the inconvenient,
8 really, I think, reaches its peak, if you will,
9 here in the State's opening statement, where
10 knowing that human bone fragments are found, at
11 least in the burn barrel, a long way from the
12 burn area behind Steve's garage. And maybe, in
13 the quarry, to the south.

14 Knowing, in other words, that their own
15 experts will say, yeah, bones were moved here,
16 the State never tells you in its opening
17 statement, there's a second place, and maybe even
18 a third, where human bone fragments, burnt human
19 bone fragments, are found. And we have no
20 evidence that it's more than one person. You
21 don't get told that, it's inconvenient.

22 But it also is true. And that's why, in
23 the end, it does become so important to decide,
24 burned here and a few moved elsewhere, or burned
25 somewhere else and most of them dumped here,

1 behind Avery's garage. That's why that says so
2 much about his guilt or innocence, in the end.

3 Look, I have got to sit down. Which no
4 defense lawyer ever likes to do because, in the
5 closing argument, because the prosecution gets to
6 stand back up. In a sense, they get the last
7 word, in closing argument.

8 I'm not going to get to answer the
9 passion, or the anger, or the replies that will
10 come, when I sit down. I got to turn him over to
11 you and let them have the last word. And as hard
12 as that is on me, the greater burden is on you.
13 The greater burden is on you. Because you have
14 got to try to do the things you can do here, and
15 you have got to find a way to live with the
16 things you can't do, but would like to do here.

17 You have got the great burden of
18 reaching a just, fair, and conscientious
19 decision. And so, in a sense, I'm -- in a sense
20 I'm going to rely on Judge Willis to give my
21 rebuttal to their rebuttal, in a sense. Because
22 I think he will tell you, when all is said and
23 done, that you won't be swayed by sympathy,
24 prejudice, or passion.

25 And I think that will be an answer to

1 what's about to come. I think he will, Judge
2 Willis will, I think, in the end, tell you,
3 charge you, to be very careful and deliberate --
4 deliberate in weighing the evidence, and to keep
5 your duty steadfastly. And that will be
6 sufficient answer, for me, to what's about to
7 come.

8 So I ask you, please, give it your full
9 and fair consideration. Do that critically here,
10 as citizens of Manitowoc County, where we stayed
11 to pick a jury, where we stayed to pick the 12 of
12 you, the 13 of you. And get it right. Get it
13 right.

14 Steven Avery has not been proved guilty
15 of murdering or mutilating the corpse of Teresa
16 Halbach. He's not been proved guilty of that,
17 beyond a reasonable doubt. It's because he is
18 not guilty. And that's what I'm asking you to
19 say in getting it right.

20 THE COURT: Members of the jury, there
21 is -- as counsel indicated, there's one more
22 argument, the State gets a chance for rebuttal. I'm
23 going to take a 10 minute break at this time, then
24 we'll come back to hear the State's argument and I
25 will give you final instructions.

1 Again, as I reminded you yesterday,
2 because the arguments are not complete yet, do
3 not begin your deliberations until all the
4 arguments have been made and I give you final
5 instructions.

6 (Jury not present.)

7 THE COURT: You may be seated. Counsel, I
8 will see you back at 11.

9 (Recess taken.)

10 (Jury present.)

11 THE COURT: And, Mr. Kratz, you may begin.

12 ATTORNEY KRATZ: Thank you, Judge.

13 This part of the case is the shortest
14 part, that is, the shortest argument, thankfully,
15 but it's also the most difficult, because I have
16 to limit my comments to what the defense has
17 argued. And it's also the part that it's a
18 little bit out of my comfort zone.

19 As you may have noticed throughout this
20 trial, I have tried to be courteous. I have
21 tried to examine witnesses with the fairness, and
22 the dignity, and the respect for which they
23 deserve in the courtroom. I have tried never to
24 cut off a juror (sic). When a juror (sic) wanted
25 to explain an answer, I tried never to say, stop,

1 I don't want to hear it, or the jury doesn't want
2 to hear what the answer might be. And so this
3 argument is different than that. It's
4 necessarily not as civil. It's necessarily not
5 my style, so I want to say that upfront.

6 Highly charged statements have been
7 given by the defense in their closing arguments.
8 And it's my responsibility to meet those,
9 hopefully, with compelling argument, the things
10 that you will find important when dismissing or
11 discarding some of what the defense has tried to
12 have you believe here.

13 I may personally like Mr. Strang, and I
14 may personally like Mr. Buting, but their
15 arguments I most certainly do not like. I think
16 they are unfair. I think they are unfair to you.
17 I think in many instances they have been what's
18 called disingenuous, which means that I don't
19 think that they have been totally truthful. And
20 in all candor towards you, I think they have
21 tried to fool you on a number of occasions.

22 I have got a job to do. I have got a
23 job to do as the lead prosecutor in this case, to
24 make sure that you are not fooled, to make sure
25 that you aren't sold something that isn't true.

1 And that's what this argument is all about.

2 The very first argument that Mr. Strang
3 made in the beginning of his opening statement,
4 he made it again in the beginning of his closing
5 statement, and at the end of his closing
6 statement, referenced the 1985 wrongful
7 conviction of that man, Steven Avery.

8 Steven Avery was wrongfully convicted in
9 1985. We all understand that. We all believe
10 that. But don't one of you consider anything
11 about that case when deciding the facts of Teresa
12 Halbach. Teresa Halbach, the Halbach family, and
13 the interests of justice deserve that you decide
14 it on this case, not on whether or not Mr. Avery
15 deserves some sympathy, or whether or not
16 Mr. Avery deserves to set it right. That's
17 something for civil lawsuits. That's something
18 for other jurisdictions to deal with and to
19 handle.

20 It is absolutely improper for Mr. Strang
21 to ask you to, in any way, consider that 1985
22 lawsuit, when finally coming to a decision in
23 this case, and in Mr. Strang's statement, in his
24 opening statement, to send him home. Sending
25 Mr. Avery home, if that is going to happen, is

1 going to be because the State, the prosecution
2 team, all of the agencies that you heard about,
3 didn't meet its burden, we didn't meet our burden
4 of proof on this case, not because Mr. Avery was
5 convicted in 1985.

6 Let me also suggest to you that any case
7 this big, especially what we have called the
8 largest criminal investigation. I don't know if
9 it is the largest in state history, but it is
10 certainly the largest that anybody that you have
11 heard of has ever talked about. Any case that
12 big, with that many witnesses, and you have just
13 gotten a sliver of the number of witnesses, and a
14 sliver of the number of exhibits that are
15 available in this case.

16 Five or six weeks may seem like a long
17 trial. Let me assure you, it could have been a
18 lot, lot longer, if we would have done the kinds
19 of things that Mr. Strang asked us to do. As an
20 example, if we would have followed every what's
21 called "blind alley", if we would have put in
22 what's called "negative evidence"; that is,
23 eliminate everybody who's not even a suspect in
24 this case, which is what law enforcement did.
25 That's their job. That's law enforcement's job.

1 And then, once we get to the prosecution
2 stage, it is our job to present evidence on who
3 we believe committed the crime. Does everybody
4 understand that? So, if we put in the entire
5 case, if you will, that would certainly be
6 something more than what would be relevant for
7 State of Wisconsin vs. Steven Avery. That's what
8 this case is about, not the '85 case.

9 The very first issue that I want to talk
10 about is perhaps the most problematic for the
11 jurors. I want to address this upfront, because
12 I believe that there were misrepresentations made
13 in the defense closing. I believe they tried to
14 fool you in their closing when they indicate that
15 Mr. Lenk comes in and all of a sudden there's a
16 key there.

17 Well, that's part of the story, and
18 that, of course, is a true statement. But what
19 the defense neglected, in their closing, to tell
20 you, was everything that Sergeant Colborn told
21 you about this particular investigation. I put
22 these two photos up because I'm calling them the
23 before and the after shot. And I put them next
24 to each other for a very, very important reason,
25 because they say a picture states a thousand

1 words.

2 This should do that for you, the before
3 and the after picture. These are taken just a
4 couple of minutes apart from each other, but
5 importantly, they are taken before the search,
6 before what Mr. Colborn talked about, not so
7 gently, or never so gently manipulating the
8 cabinet, and then after that had already been
9 accomplished.

10 A couple of important things to note.
11 First of all, we talked, I think in my closing or
12 in my opening perhaps even, about the slippers,
13 about how you, through your common sense, can
14 reconcile those slippers, that piece of evidence,
15 not just where they are situated with the wall
16 socket there, but you can understand how both
17 this cabinet was pushed to the left, pushing the
18 left slipper over to the left, and pushing the
19 right slipper over and actually flipping the left
20 slipper over. All right.

21 And then after jostling, and after
22 pushing, and after removing all the books, and
23 after Sergeant Colborn talked about putting those
24 books back in, and I want to get a correct
25 verbiage, "handled them none too gently", a key

1 comes out the back end of this particular
2 cabinet. Now, what hasn't been pointed out to
3 you yet, many of you being observant, may have
4 already noticed the before and the after.

5 This is the book that they were talking
6 about, that particular binder that was slammed
7 back into the cabinet. The before picture has
8 the binder virtually adjacent, or next to the
9 cabinet itself. The after picture has it several
10 inches back in. Why is that important? Why does
11 that one fact corroborate or lend credence to
12 Sergeant Colborn?

13 Sergeant Colborn said he slammed that
14 book back, none too gently. You have to kind of
15 envision this cabinet cocked, and the back of the
16 cabinet opened, the book slamming back, and the
17 key falling through that particular cabinet. And
18 so the testimony in connection with all of the
19 physical evidence, and not just what Mr. Strang
20 or Buting might tell you some of the evidence is,
21 where Lieutenant Lenk comes in and says, oh,
22 there's a key, which did happen, but the
23 explanation is absolutely plausible.

24 But more than that, we're going to need
25 to delve into this key and into this planting

1 issue, whether or not the key was planted. Was
2 the key planted. All right. To get to that
3 supposition, or to get to that conclusion, which
4 really is a supposition, because you are going to
5 have to guess, you have to know some things about
6 Sergeant Lenk -- excuse me -- Lieutenant Lenk,
7 and Sergeant Colborn. You have to know if they
8 are good, honest, decent cops, or if they are
9 not.

10 Now, we asked some questions, and you
11 can weigh their credibility. And they both
12 appeared indignant about this. They both
13 appeared upset about even being accused of such a
14 thing. And that demeanor, that credibility, is
15 something that you can and you should take into
16 consideration, in fact, when each of them said
17 absolutely not, absolutely not would I ever plant
18 evidence in this case.

19 But as importantly than that is the lack
20 of evidence. Mr. Strang was allowed, quite
21 properly, to talk about the lack of evidence that
22 the State would have presented. Wouldn't you
23 have expected evidence, is I think the way
24 Mr. Strang had placed it. Well, that works both
25 ways. And subpoena power and power to bring in

1 physical evidence applies equally to the State as
2 it does to the defense.

3 We know that because the defense has
4 subpoenaed some witnesses. They have brought
5 some witnesses in here. They have subpoenaed
6 some documents, and you have seen those
7 subpoenaed documents in this case.

8 Well, don't you think, folks, that if
9 either Sergeant Colborn or Lieutenant Lenk had a
10 pimple, had a blemish on their record for
11 truthfulness, or for honesty, or for planting
12 evidence, or for doing anything that was opposed
13 to the oath that they took to uphold the law in
14 Manitowoc County, don't you think you would have
15 heard about that. Don't you think that those two
16 good lawyers, excellent, in fact, defense
17 attorneys, would have presented that to you.

18 So when Mr. Strang tells you to look at
19 the big picture, and when he talks about, let's
20 see how they acted beforehand, beforehand you
21 didn't hear any evidence at all about Mr. Lenk or
22 Mr. Colborn. That is significant. But as
23 significant is the facts and circumstances
24 surrounding this particular bedroom.

25 And when Mr. Kucharski, Deputy

1 Kucharski, talked about sitting on this bed, and
2 actually facing towards the door, his feet, I
3 think the testimony was, were facing where the
4 key ends up when Lieutenant Lenk exits the room
5 and comes back. Don't you have to kind of ask
6 yourself the question, how did the key get there?

7 If it was planted, how did that key get
8 there? Did Lieutenant Lenk, as he's walking
9 here, throw it? Did he kind of lob it over
10 Mr. Kucharski. Well, that's ridiculous.

11 Absolutely ridiculous. And although all three of
12 these officers, and in fact the prosecution team,
13 would have preferred, obviously, that the key
14 wouldn't have been found in this way, it was.
15 All right.

16 Cases come to you how they are. And
17 again, under the microscope of a case of this
18 magnitude, there is going to be some human
19 factors. And there's going to be some things
20 that you are going to have to wrestle with. And
21 this is one of those things. I'm not going to
22 short change you on that particular case.

23 And you may take a long time in deciding
24 whether or not that key is significant, or
25 whether the key is not significant. But let me

1 ask you, just kind of for the sake of talking, as
2 Mr. Strang wanted to talk with you rather than at
3 you, I certainly have a style that I would prefer
4 that as well. Let's assume they never found the
5 key. Let's assume this key isn't part of this
6 case at all.

7 Let's assume Mr. Strang's theory is
8 correct, that these cops aren't trying to plant
9 an innocent person, but trying to make sure that
10 a guilty person is found guilty. Well, can't you
11 then, with that argument, set the key aside? Do
12 you have the ability, as a jury, to set that key
13 aside, if in fact it doesn't matter whether or
14 not Mr. Avery is guilty or not guilty in this
15 analysis? Can you set that aside and decide is
16 there enough other evidence, or is the key the
17 only thing that points to Mr. Avery?

18 Well, if this was a CSI case, one of
19 those cases on TV where sometimes that key, or
20 sometimes one little piece of evidence like that
21 may decide the guilt or innocence, it would make
22 a difference. But that key, in the big picture,
23 in the big scheme of things here, means very
24 little. All right.

25 Now, I'm telling you that not because I

1 don't want you to consider it, not because I
2 think that it's not important, or not because the
3 credibility of these officers is in question to
4 the State at all. What I am suggesting, though,
5 is that if you buy Mr. Strang's argument, if you
6 buy Mr. Strang's argument that they were trying
7 to make sure that a guilty person was found
8 guilty, then assigning accountability to the
9 murder for Teresa Halbach, shouldn't matter
10 whether or not that key was planted.

11 In other words, it shouldn't matter to
12 the Halbach family. You shouldn't be punishing
13 the police officers, in other words, the other
14 officers that were involved in this
15 investigation, if you come to that conclusion.
16 You are not going to. You are not going to come
17 to that conclusion because you have heard nothing
18 about these police officers that they would do
19 such a thing. But my suggestion is simply not to
20 focus all your attention.

21 In the law, that's called searching for
22 doubt. The Judge has told you, and may even tell
23 you again in your closing instruction, that you
24 are to search for the truth, you are not to
25 search for doubt. In other words, you don't go

1 into this case saying, well, let's look at where
2 all the discrepancies are first. That's the
3 place maybe that we should start, because as my
4 closing argument suggested to you, there's got to
5 be a reason, right. There's got to be a reason
6 that we have been here for five weeks.

7 No, there doesn't. There doesn't have
8 to be a reason why you have been here for five
9 weeks, other than the defendant's constitutional
10 right to a trial. And so the Judge will tell you
11 not to start there. The Judge will tell you not
12 to start at searching for doubt.

13 The Judge will tell you that the whole
14 process, the beginning of the process, the
15 middle, and the end, is to search for the truth.
16 To search for the truth in this case is who
17 killed Teresa Halbach, not whether or not we can
18 find some discrepancies.

19 More about the key. Mr. Buting, I
20 believe it was, had the imagination, let's call
21 it, to suggest to you that maybe officers were
22 taking a toothbrush and were kind of rubbing Mr.
23 Avery's toothbrush on the key and that's how the
24 DNA got on the key. Common sense should tell you
25 that these kind of motions, what are called

1 furtive motions, or for lay people, for people
2 like you, it's called suspicious looking things,
3 is something that you should probably discard.
4 Because if they take Mr. Avery's toothbrush and
5 start rubbing it on the key, you know, and then
6 kind of hold it behind their back, that becomes
7 almost cartoonish, that becomes something that is
8 not at all plausible.

9 But as important, when did that happen,
10 when did they plant the DNA on Mr. Avery's key.
11 Because we're not just talking about planting a
12 key. If it was planting a key, that's damning
13 enough. It's damning enough to have this
14 particular key found in Mr. Avery's bedroom. But
15 what makes it irrefutable is that Mr. Avery's
16 DNA, positive, hundred percent match, is on that
17 key. Right?

18 And you heard the testimony from Ms
19 Culhane, and perhaps others, that the last person
20 to handle a key or an object is most likely to
21 leave the DNA on the key. Now, Mr. Strang and
22 Mr. Buting have asked you to just discard that,
23 ignore it, ignore that expert opinion. I don't
24 know why they are asking you to do that, because
25 it doesn't fit with their theory of defense. But

1 it's the DNA on the key that has to be planted
2 too. Please understand that. It's not just
3 planting the key, it's planting the DNI -- the
4 DNA on the key as well.

5 If they planted the key, where did they
6 get the key? Now, that leads to an interesting
7 series of questions as well. There are only two
8 ways that law enforcement can get this key. All
9 right. Because the vehicle was locked, and
10 because on the 5th of November officers don't
11 really have access, as you have seen by the scene
12 security. They had to have access to the key
13 before the 5th.

14 And so there's only two ways to do that.
15 One, they can kind of stumble across it in a
16 scenario that Mr. Strang suggests, maybe off duty
17 or something like that. Or the last person to
18 hold that key, other than Teresa Halbach, is the
19 person who killed her.

20 Now, you heard that testimony in this
21 case. It may have drawn an objection, I don't
22 remember right now, use your own collective
23 knowledge as to whether it did. But that makes
24 sense, that the last person, other than Teresa,
25 to hold this key, is the person who killed her.

1 And if that's the case, then you hold these two
2 gentlemen responsible for suggesting that to you.

3 In other words, despite Mr. Buting
4 standing up here, I think it was the beginning of
5 yesterday, saying, look, folks, we're not saying
6 that the cops killed Teresa Halbach, what we're
7 saying is that somebody else, I think his words
8 were, "skillfully exploited law enforcement
9 bias", as if there's somebody smart enough out
10 there that could do that. We're going to talk
11 about that in just a minute.

12 But when you go down one layer, when you
13 scrape one layer of this manure off of the
14 topsoil, which is what it is, you scrape one
15 layer, you will realize that the cops had to kill
16 her. The cops had to be involved in killing
17 Teresa Halbach.

18 Now, are you prepared to say that? Are
19 you, as the jury, in order to find Mr. Avery not
20 guilty, willing to say that your cops, that your
21 Manitowoc County Sheriff's deputies, Lieutenant
22 Lenk, Sergeant Colborn, because of Mr. Avery's
23 lawsuit, that Sergeant Colborn and Lieutenant
24 Lenk didn't have a dime of stake in, at least
25 financially, that they weren't involved in in

1 1985, that they gave a deposition in about
2 receiving a phone call and transferring the phone
3 call, and that's the extent to it, but because of
4 that involvement, are you willing to say that
5 these two otherwise honest cops came across a 25
6 year old photographer, killed her, mutilated her,
7 burned her bones, all to set up and to frame
8 Mr. Avery. You have got to be willing to say
9 that. You have got to make that leap. Because
10 of this question right there, where did they get
11 the key.

12 The key isn't alone. The key is
13 attached, at least at some point, to something
14 called a lanyard, something that's around the
15 neck, similar to what you all are wearing as
16 juror badges. We know that that comes from Katie
17 Halbach. We know that that is found inside of
18 Teresa's SUV. And so where one is the other one
19 is. All right.

20 So I hope that makes sense. I hope you
21 understand that, at least for the first time in
22 my rebuttal, I'm going to be suggesting that you
23 dig down that one further step and understand
24 exactly what these two gentlemen are suggesting
25 to you. Despite Mr. Buting trying to sell you on

1 the fact that we're not saying the cops did it,
2 that's exactly what they are saying. That's
3 exactly what they are arguing to you, and you
4 have to be prepared to go there.

5 The next time that Mr. Buting tried to
6 fool you was when he told you that the police
7 never checked out other suspects in this case.
8 Well, you heard from Mr. Wiegert, you heard from
9 Mr. Fassbender, more particularly, that other
10 suspects were checked out. But let's think about
11 other suspects. Who were the other suspects in
12 this case? Where was the evidence pointing so
13 strongly, other than to Mr. Avery? Where was it?
14 Where was the evidence pointing?

15 Well, one choice was, Mr. Schmitz was
16 one of the people that saw Ms Halbach. Mr.
17 Schmitz, as you heard, was interviewed, was
18 checked out, but guess what, folks, Teresa
19 Halbach left that photo shoot alive. That kind
20 of eliminates Mr. Schmitz, doesn't it, from being
21 a suspect in this case.

22 Number two, was JoEllen Zipperer. And
23 although a nice little old lady like that
24 probably could have killed and mutilated Teresa
25 Halbach, guess what, folks, Teresa Halbach left

1 Mrs. Zipperer alive at about 2:27 p.m.

2 The third suspect then, or the third
3 logical person, was Mr. Avery, that's the third
4 customer that Teresa sees that day. That's the
5 only person that Teresa Halbach doesn't leave
6 alive, or at least isn't seen alive, after
7 meeting with Mr. Avery. So Schmitz and Zipperer
8 can be and were, early on, I will admit that,
9 were early on, eliminated as suspects in the
10 case.

11 As the case develops though, you heard
12 from Mr. Fassbender, that all the clues started
13 pointing towards one person. All right. So when
14 we talk about roommates and we talk about old
15 boyfriends, what you would think about as typical
16 suspects that may in fact be investigated,
17 doesn't make a whole lot of sense in devoting a
18 lot of resources in investigating those people
19 when the car is found in a different location.
20 When blood is found in that car, that turns out
21 to be that of Mr. Avery.

22 But I guess most importantly, when the
23 bones of the victim are found 20 feet or so
24 behind the property belonging to Mr. Avery, you
25 stop looking. You stop looking for people like

1 boyfriends, or other customers, or this kind of a
2 search. And you narrow it to who had access to
3 Teresa Halbach at that particular time. So it's
4 disingenuous, it's what I'm calling fooling you,
5 to suggest that other suspects in this case were
6 not ever checked out.

7 Mr. Strang talked about this phone call.
8 Now, this is going to take a really, really good
9 memory. And I hope one of you, and the 12 of you
10 collectively, we call it collective memory, which
11 means that when you deliberate in this case you
12 can talk about those kinds of -- those kinds of
13 things. When Mr. Strang first played this, or
14 attempted to play this particular tape, for
15 Mr. Colborn, I wonder if anybody remembers the
16 very next thing that happened.

17 I raised my hand and I said, objection,
18 your Honor. I said, I want some authentication.
19 Before Mr. Strang can play this tape, I objected
20 and said, I want to know the date and the time of
21 the tape. Because it's unfair to play this tape
22 for the jury without telling them the date and
23 the time that it's played. All right.

24 So it's foreseeing this very argument
25 that Mr. Strang made about a half an hour ago, or

1 an hour ago; that is, the tape could have been
2 the 3rd, but I think it was the 4th. Okay.
3 That's what Mr. Strang said to you, that
4 Mr. Colborn, the answer by Mr. Colborn was it was
5 on the third, but I think it was the 4th.

6 What the heck do I care, Mr. Strang,
7 what you think. What do I care if you think that
8 it was the 4th, or that it fits into your theory
9 of defense. This case is about evidence. It's
10 not about what Mr. Strang thinks. The answer
11 given on the witness stand was, it was the 3rd,
12 while on duty.

13 And the explanation about why it was a
14 phone call rather than a radio transmission, or a
15 dispatch kind of call, is because Mr. Wiegert had
16 called Mr. Colborn, if you remember, on the
17 phone. All right. He called him on the phone
18 and said can you check this out.

19 So in turn, Mr. Colborn called dispatch
20 and said I want to verify this particular plate.
21 Nothing sinister about that. Nothing unusual
22 about that. This isn't a traffic stop. It's not
23 a stop where you would radio it in, where your
24 time and your date become important and you want
25 to log in that kind of thing. It's not a traffic

1 stop at all. It's simply verifying Mr. Wiegert's
2 information, verifying the year, the license
3 plate, the make and model of the vehicle, nothing
4 sinister.

5 Now, I'm going to ask you to reject what
6 Mr. Strang said because that's not evidence. In
7 fact, what I'm saying to you right now is not
8 evidence. Evidence comes from the witness stand.
9 All right.

10 The answer to that question was the 3rd
11 of November. That is important. It's important
12 whether it was the 3rd, or whether it was the
13 4th. Now, when Mr. Strang answered my objection
14 by saying, well, we'll let the witness tell the
15 jury when it is. And the Judge allowed that, and
16 the witness did tell the jury when that was, that
17 it was the 3rd.

18 Mr. Strang still today, still today,
19 fools you, and stands before you and says, don't
20 believe Mr. Colborn, I think it was the 4th. All
21 right. That's the difference between evidence
22 and speculation. That's the difference between
23 the State's case and what the defense is trying
24 to sell you in their arguments.

25 Bones were moved in this case. There's

1 no question of that. Who moved the bones, to the
2 State, or for the theory of the prosecution is
3 easy. Mr. Avery moved the bones. He moved the
4 big bones. He moved the big bones, the ones he
5 could identify as human bones, from his burn pit,
6 over to his sister's burn barrel. All right.
7 That's a couple hundred feet away.

8 If you think about the selfishness
9 involved in that particular act, that I think
10 is -- is one factor. But I guess more
11 importantly is directing attention away from
12 himself. Might be that first night, might be the
13 31st, might be the 1st or the 2nd, because he has
14 got a couple of days, as it turns out, before the
15 police officers actually start the investigation.

16 But let's also remember this,
17 collectively, I want the 12 of you to remember
18 this when you deliberate. I want at least one of
19 you to say this when you are back in the jury
20 room. Although now we know that the cops didn't
21 get the search warrant, and they didn't come on
22 the property until the 5th of November, okay. We
23 know that now. Steven Avery didn't know that.

24 Steven Avery didn't know that Teresa
25 Halbach wasn't going to be reported missing until

1 the third, or that the flyover search wasn't
2 going to find the car, or that Ms Sturm even was
3 going to find the car on the 5th. For all Steven
4 Avery knows, the cops are on their way. Right
5 away. On their way, right away, the afternoon,
6 the late afternoon or early evening of the 31st.

7 Why is that important? Because as it
8 goes through some of this evidence and your
9 collective memories, and as you deliberate this
10 case, please remember that. Because there are
11 things that Mr. Avery does that the defense is
12 saying, well, why would he do all of those kind
13 of things.

14 Mr. Avery did all of those things on the
15 31st because he didn't know that the cops weren't
16 going to be knocking on his door, that very
17 night. They didn't know that -- Mr. Avery didn't
18 know that Teresa wasn't meeting a friend for
19 dinner, or that she wasn't going to be missed, or
20 that she didn't have another appointment, after
21 she was killed by Mr. Avery.

22 And so that's why he starts burning
23 things right away. That's why at 3:45 the
24 electronics are already being burned. That's
25 why, as we will be arguing and showing you,

1 Mr. Avery disposes of the body at the earliest
2 possible moment, that he moves the SUV at the
3 earliest possible moment, that he removes the
4 license plates.

5 He does all of those things, again, with
6 the benefit, as you saw in the photograph that
7 Mr. Remiker put in, of a police scanner, that's
8 inside and on top of the bar in Mr. Avery's. The
9 police scanner, so that Mr. Avery can hear, are
10 the cops on their way. Which, again, should
11 bolster, or should tell you why Sergeant Colborn
12 uses the telephone rather than using the radio,
13 it's because of things just like that, things
14 like officer's safety. But, again, I'm advancing
15 a little bit, and I want to make sure that I get
16 to those points.

17 The bones were moved, but they were
18 moved by Mr. Avery. These bones in the quarry,
19 I'm going to take about 20 seconds to talk about,
20 because the best anybody can say is that they are
21 possible human. What does possible human mean?
22 Well, it means we don't know what it is. All
23 right.

24 The best anthropologists in the world
25 don't know what these bones are. Dr. Eisenberg

1 didn't know what they were. Dr. Fairgrieve
2 didn't know what they were, he agreed with that.

3 And you heard a stipulation being read
4 to you by a person by the name of Les McCurdy.
5 Stipulation just means an agreement between the
6 parties, that these bones, we felt it important
7 enough, were sent out to the FBI. And Les
8 McCurdy from the FBI determined that these bones
9 were so degraded, that they were in such a shape
10 that even through testing, what's called
11 mitochondrial DNA testing, whether they are human
12 or not, could not, even by the FBI, be
13 determined.

14 So the bones in the quarry are really
15 not evidence in this case. And so Mr. Strang has
16 made a big deal out of showing you maps, and a
17 little flag, and things like that about a
18 possible bones. Again, speculation, conjecture,
19 is not part of this case. Facts are going to be
20 what decides this case.

21 ATTORNEY STRANG: Your Honor, I'm going to
22 interpose an objection. Like the 1985 case, there
23 is evidence here concerning the bones from the
24 quarry, possible human bones. It is proper for any
25 lawyer to argue all of the evidence, or any of the

1 evidence, in the case, including the 1985 case, or
2 the quarry bones, and I would like the jury so
3 instructed.

4 THE COURT: What I will instruct the jurors
5 is, remind you again, what you are hearing at this
6 time are arguments, not evidence. Your job, when
7 you are deliberating, is to remember the evidence as
8 it's been submitted, and draw your own conclusions
9 from that evidence. Mr. Kratz, you may proceed.

10 ATTORNEY KRATZ: Thank you, Judge.

11 The primary burn site, that is, where
12 the bones started burning, are important in a
13 sense and they are not important in a sense. All
14 right. It seems obvious what the answer is, but
15 if, again, you drag that first layer off of the
16 defense argument, it isn't going to make any
17 difference. But, of course, the primary burn
18 location is in Mr. Avery's pit. This is the
19 primary burn location.

20 And why do we say that? Dr. Fairgrieve,
21 I'm going to start from the other side,
22 Dr. Fairgrieve, the defense expert in this case,
23 said that he's had a case where bones were moved
24 from one location to the other, and that in that
25 case the bones moved to -- to the location had

1 more bones than were actually there. But what
2 Dr. Fairgrieve didn't do, and what he doesn't
3 know, are all the things that Dr. Eisenberg did,
4 and all the things that Dr. Eisenberg knows.

5 Dr. Eisenberg, of course, looked at the
6 bones. I guess that's the most important factor.
7 But this is one of those things that's common
8 sense. This is one of those things that
9 shouldn't take you a long time collectively.
10 Shouldn't take the 12 of you very long to decide
11 where the primary burn location is. It is the
12 pit. It's not most likely the burn pit, it is
13 this location.

14 How do we know that? Well, Teresa was
15 invited, or lured, whatever term you want to use,
16 on to that property. Her vehicle is there.
17 That's the last place that she is seen alive, is
18 just several feet from this location. Her burned
19 affects are on that particular property, just a
20 few feet away. Importantly though, her bone, her
21 tissue, especially her skull fragments, all of
22 them, all of them, are in this location.

23 Her clothes are there, at least what's
24 left of her clothes, are mixed in with those
25 bones, the rivets for her jeans are there. And

1 common sense, her bones and her jeans are in the
2 same place, because she's burned their. She's
3 burned in that location.

4 She was called there by Mr. Avery. And
5 the number one, if we're doing -- I'm going to
6 switch them around. The number one reason why
7 this is the primary burn location is that on
8 October 31st, Mr. Avery had a big whopping fire
9 there, on the 31st of October. And we haven't
10 heard any evidence of a big whopping fire, the
11 kind that would consume, fully consume a human
12 body, anywhere else on that property. That's the
13 primary burn location, ladies and gentlemen. You
14 can find that, and you should find that, beyond a
15 reasonable doubt. That shouldn't be a question
16 for you.

17 Mr. Buting said that there were no
18 fingerprints found on the SUV. I will just,
19 again, in 20 seconds, tell you that the
20 testimony, that perhaps Mr. Buting is ignoring,
21 from Mr. Riddle, or at least didn't tell you
22 about, from Mr. Riddle, the fingerprint guy, was
23 that of the eight latent prints that were lifted
24 in the case, none of them were suitable for
25 identification. All right.

1 So what Mr. Riddle also told you is
2 that, if you took your hand right now and placed
3 it onto an object, it's very likely that you
4 wouldn't leave fingerprints. That's why DNA
5 evidence is so much more powerful than
6 fingerprint evidence, at least nowadays, because
7 of those dynamics that are involved. Because of
8 the amount of sweat in your hands, and the oils,
9 and all of those kind of things, all are called
10 into question. I just mention that because I am
11 obligated to because Mr. Buting had mentioned
12 that.

13 They also, they meaning the defense,
14 talked about Teresa's body in the SUV. Once
15 again, expert testimony was that a 5 foot 6 inch
16 person could, in fact, fit in this particular
17 compartment of the RAV 4. And I guess you need
18 look no further than this area, the stamp, as I
19 talked about, the hair impression 25 year old
20 Teresa has left in that location. You can almost
21 see Teresa being pushed in, or shoved in, or
22 stuck in that location, which brings me, or will
23 bring me, to a point in just a moment.

24 Mr. Strang -- excuse me -- Mr. Buting,
25 actually asked you whether or not it would be

1 reasonable for police, by use of flashlights, to
2 see the stain that was by the ignition. When I
3 heard that I just about dropped my pen. All
4 right. There's the location, and that's the
5 stain that Mr. Buting is saying, why didn't the
6 cops see this.

7 Somebody want to tell me where a
8 flashlight has to be shined -- shown, from the
9 outside, to see that stain. You can see that
10 through the front window? You can see that
11 through one of the side windows? Are you going
12 to see that through the very back? Where are you
13 going to shine a flashlight that you are going to
14 be able to see that particular stain. All right.
15 That's disingenuous. It's the kind of argument
16 that you should be discarding, that you should be
17 saying it doesn't make any sense at all.

18 Mr. Buting also asked, well, if this
19 piece of evidence is -- excuse me -- if the
20 cabinet, the bookcase, is so important, why
21 didn't the State bring it into the courtroom. I
22 mentioned before, I think it's obvious, the State
23 doesn't have exclusive control over any evidence
24 in this particular case, at least as is presented
25 in court. The defense has just as much right to

1 bring that up here as the State did. All right.

2 We have taken photos, and I'm not going
3 to apologize for that. I'm not going to
4 apologize for what Mr. Buting calls my slick
5 PowerPoints. My God, a second grader can do a
6 PowerPoint examination. And the fact that
7 Mr. Buting wants to fumble around, he can do
8 that. I'm not going to do that to the jury.

9 But what we did do, is we took
10 photographs of all of the evidence to make it
11 easier to present, so that you could see all the
12 evidence. We brought in boxes of items like the
13 Palm Zire palm pilot box. We have the item
14 itself, but we also have a picture of it. We
15 have a picture of everything, as you have seen.
16 And so we're using pictures instead of the thing
17 itself.

18 And you can see, and at least
19 understand, with big clumsy kinds of items, the
20 reasons that we're doing that, for ease for the
21 jury. So that you can see big things, and you
22 can see small things, so we can zoom into areas,
23 and sometimes we don't need to do that.

24 Defense also suggested that there was no
25 blood on the CD case. Are you kidding me?

1 Mr. Buting may have showed you a picture, and I
2 didn't know where he got his picture from, but
3 the blood is obvious on the CD case. By the way,
4 I believe you are going to be getting the
5 photographs back into the jury room. That's
6 something the Judge will decide, not me. But you
7 can look at the picture itself and determine
8 whether or not there is blood on the CD case.
9 Again, another example of being disingenuous,
10 another example of trying to fool you.

11 Next time this happened in Mr. Buting's
12 argument yesterday was when he talked about this
13 stain, on the bathroom floor. Mr. Buting
14 actually walked up to this particular exhibit and
15 said, well, it looks like somebody took a Q-tip
16 and put it right into that sample of blood.
17 Which you heard some of the blood from
18 Mr. Avery's bathroom was analyzed, that it was in
19 fact Mr. Avery's blood, there isn't any question
20 about that.

21 But what Mr. Buting didn't tell you,
22 and what you heard testimony of, is when this
23 blood sample was collected. Do you remember? Do
24 you remember when this blood sample was
25 collected? Remember Detective Remiker and

1 Mr. Tyson, on the first night, talking about
2 going through the entire trailer and collecting
3 all the blood, and that they finished sometime
4 after 10:00 p.m., as it was approaching
5 11:00 p.m., it was pouring rain outside. You all
6 remember that, you remember that from the 5th of
7 November.

8 Mr. Buting is trying to sell you, he is
9 trying to fool you into thinking that maybe this
10 is the source of the blood in the SUV. Folks,
11 the SUV was already in an enclosed and locked
12 trailer, on its way to Madison, with Crime Lab
13 personnel and law enforcement personnel all
14 surrounding it.

15 To suggest to you that this might be the
16 source of any of all of that blood that you saw
17 in the SUV is, again, disingenuous. It's trying
18 to fool you. And it's my job, as the prosecutor,
19 to point those things out to you. It's my job to
20 show you just how absurd and ridiculous some of
21 those arguments are.

22 Mr. Buting then talked about the bullet,
23 and about the DNA, and suggested that, well, they
24 are both in the same room with Sherry Culhane, Ms
25 Culhane, the analyst in this particular case.

1 What Mr. Buting doesn't tell you, though, doesn't
2 remind you, though, when Mr. Gahn made this point
3 very clear, because of what's called the
4 contamination issue with the bullet in this case,
5 is that the extract for a sample of evidence is
6 done separately, and at a separate time than the
7 extract or the control is done.

8 Remember Ms Culhane telling you that the
9 samples are locked away in a cabinet. She was
10 talking about her bench, and how it's cleaned
11 off, and those kind of things. And I don't know
12 if Mr. Buting, I suspect he wants you to believe,
13 if you remember collectively, if you remember
14 about Ms Culhane, if he's suggesting that the Pap
15 smear, or the DNA from Teresa Halbach, somehow
16 got out of the sealed envelope that it was in,
17 the standard, somehow maybe walked across her
18 desk, somehow it jumped into the vial, or onto
19 the bullet. And that's the kind of thing that
20 Mr. Buting wants you to believe. That's
21 disingenuous, doesn't happen that way.

22 Mr. Gahn knew that was an important
23 point and he took time, meticulous time with Ms
24 Culhane, to explain that process for you. It's
25 Teresa Halbach's DNA on that bullet because,

1 unfortunately, it went through her body. Not
2 because the DNA from her Pap smear or from other
3 standard that was within the Crime Lab somehow
4 transmitted itself or made its way onto that
5 bullet.

6 There are areas of agreement and this
7 is, I guess, a positive part of the trial. There
8 are some areas of agreement between expert
9 witnesses in this case. Ms Arvizu, and I'm so
10 happy that Mr. Strang cleared that up, it's not
11 Dr. Arvizu. Mr. Strang called it a mistake that
12 Mr. Buting made, calling her, or raising her to
13 the level of doctor. She doesn't have her Ph.D.,
14 like Dr. LeBeau does, the Ph.D., the head of the
15 toxicology unit at the FBI lab.

16 But Ms Arvizu, even the defense expert
17 conceded on cross-examination, from Mr. Gahn, a
18 couple of things. Number one, that a qualitative
19 procedure is a solid scientific procedure. Don't
20 have to do quantitative. In fact, in this case,
21 when there's nothing there; in other words, when
22 three of the samples don't have any EDTA, you
23 can't quantitate it. How do you quantitate
24 nothing? All right. You can't do that.

25 And so for your purposes, when these

1 tests had to be done at the last minute, you
2 heard why, you heard why we didn't get these to
3 the FBI until the last minute. You heard from
4 Mr. Wiegert, that Mr. Wiegert and the State
5 didn't even know about this vial of blood until
6 sometime in December. And you heard that on
7 February 5th, the 5th of February, when you were
8 being selected is when this was sent out to the
9 FBI.

10 Back to Ms Arvizu, though, she
11 recognized that the protocol that was developed
12 was a good protocol, that it was based upon
13 scientific articles, that Dr. LeBeau had made,
14 what she called, significant improvements to any
15 prior protocols that the FBI had done, based upon
16 those articles, and was no question at all that
17 Dr. LeBeau was able to find several things.

18 First of all, that there was EDTA in the
19 vial of blood. Number two, that there was no
20 detectable EDTA on the three blood samples. Now
21 what Ms Arvizu did have some concern was about is
22 that this expert only tested three of the
23 samples. All right. Three of the swabs that --
24 that we're talking about. And I think -- I don't
25 think that's the next slide, it is not. I will

1 show those in just a minute, when we get to the
2 EDTA part of this case. But there wasn't any
3 question that EDTA was present in the vial and no
4 EDTA was detectable on the samples.

5 We also heard agreement between
6 Dr. Fairgrieve and Dr. Eisenberg. The agreement
7 that we have heard. In fact, we liked
8 Dr. Fairgrieve very much, from Canada, and
9 although he is not board certified, you should
10 not hold that against him. Dr. Eisenberg is, and
11 that is only a handful of anthropologists that
12 reach that level. But we actually thought
13 Dr. Fairgrieve was a very, very nice man and a
14 very good expert.

15 And he testifies mostly for -- in
16 Canada, for -- for the prosecution. And I
17 suspect that's why he conceded several things
18 about his colleague, Dr. Eisenberg. First of
19 all, that the gunshot wounds were present. That
20 there were gunshot wounds that were found in this
21 case, two of them, one in the left parietal, one
22 in the occipital region.

23 He called them peri-mortem, meaning that
24 they were about or around the time of death. He
25 agreed that there was only one person, the bones

1 of one person that we're talking about, which
2 makes sense, and that the gunshot wounds were
3 inflicted in this case before this burning
4 process. All right. So Dr. Fairgrieve and
5 Dr. Eisenberg had many -- and other than the
6 primary burn site, which Dr. Eisenberg rendered
7 an opinion about, and Dr. Fairgrieve was
8 unwilling to do that -- most other areas were, in
9 fact, something that -- that they had agreed
10 upon.

11 Judge, should we take just a couple
12 minutes for a stretch break?

13 THE COURT: Very well, we can do that.

14 ATTORNEY KRATZ: I know it's been about 45,
15 50 minutes. Let's do that and then I will conclude
16 my remarks.

17 THE COURT: Let's take five minutes, at the
18 request of one of the jurors.

19 ATTORNEY KRATZ: We'll do that judge.

20 (Recess taken.)

21 (Jury present.)

22 THE COURT: Mr. Kratz, you may continue.

23 ATTORNEY KRATZ: I appreciate it, Judge,
24 thank you.

25 Defense argued that there was no blood

1 found in the trailer. Since Teresa wasn't killed
2 in the trailer, there shouldn't be. But what was
3 found in the trailer is extremely important.
4 Remember the testimony early on in this case,
5 that on the 5th, on the very first search of
6 Mr. Avery's trailer, they found the very same
7 *Auto Trader Magazine*, the very same type of bill
8 of sale that we put in this exhibit, that's from
9 Mrs. Zipperer, the very same *Auto Trader*
10 *Magazine*, very same bill of sale. Teresa was in
11 that trailer. She was in the trailer, but she
12 was not killed in that trailer.

13 Defense has a hard decision to make
14 regarding Ms Culhane, is she competent, or is she
15 incompetent. And you guys already know why that
16 question has arisen and why it is such a pointed
17 question. Because if she's talented enough with
18 one hair, with one piece of evidence, to
19 exonerate Mr. Avery, why isn't she talented
20 enough with 180 items of physical evidence to
21 contribute to his conviction.

22 So it's a hard argument to make that in
23 one case, and in one circumstance, a couple years
24 ago, she was very talented, she knew exactly what
25 she was doing, but all of a sudden, she's

1 bumbling, some mill worker, some person on a line
2 type person, who really doesn't have any
3 expertise. Well, you don't get it both ways.
4 She's either talented, she either knows what
5 she's doing, as the head of the DNA Unit at the
6 Madison Crime Lab, or she's incompetent.

7 You already know the State's opinion
8 regarding Ms Culhane. We have heard a lot about
9 the Crime Lab Contamination Logs, 89 out of the
10 50,000 or so cases. I will let you guys do the
11 math, as far as what the rate of error, or the
12 contamination rate is.

13 Mr. Buting mentioned yesterday that
14 perhaps the hood latch, perhaps the DNA that is
15 found here was caused by that of Mr. Stahlke,
16 because Mr. Stahlke reached up under and opened
17 up and found that the battery cable was
18 disconnected. Well, so what. Mr. Stahlke talked
19 about he was rummaging around, he was actually
20 touching all kinds of DNA and touching all kinds
21 of blood, or any of those kind of things?
22 Absolutely not.

23 These are professionals. These are
24 people that process evidence for a living.
25 Mr. Stahlke had gloves on when he opened -- latex

1 gloves when he opened this particular vehicle.
2 So it is not Mr. Stahlke's, it was Mr. Avery's
3 DNA that is on the hood latch.

4 Now, the defense also asked why would
5 Mr. Avery disconnect the battery. You heard them
6 asking for speculation, guessing why Mr. Avery
7 would disconnect a battery. I have got an answer
8 and I'm going to tell you right now, right now,
9 that this is speculation. This is guessing. All
10 right. This isn't evidence. It's not even close
11 to it. It's kind of what the defense has been
12 doing through at least their closing arguments.

13 But I am going to speculate and I'm
14 going to guess that a man who hid the SUV and
15 knew that people were going to come looking for
16 that SUV, thought a little bit ahead, not just to
17 crush the car, and taking -- or in unhooking the
18 battery. But when citizen searchers looked at
19 40 acres of cars, and they looked and they go,
20 oh, my goodness gracious, how am I going to find
21 that. Mr. Avery may have thought about those
22 little devices that most of us have on our newer
23 cars. Where we're able to press a button and our
24 lights go on, or an alarm goes on, or something
25 flashes, where you can find your car in a parking

1 lot, if you are like me sometimes and I forget
2 where I have parked my car.

3 Is that why Mr. Avery unhooked the
4 battery, so that the citizen searchers that he
5 knew were coming couldn't just press a button and
6 of the 40,000 (sic) cars, could walk right to
7 that. That's possible. All right. That's an
8 inference, a logical inference, that could be
9 drawn. But that's speculating, and that's not
10 what I'm going to do. That's not what I'm asking
11 you to do. I'm not asking you at all in this
12 case to speculate. I'm simply answering
13 Mr. Buting's question.

14 Where was Teresa killed. This is a easy
15 answer, or at least it is an answer that is
16 directed by all of the physical evidence in this
17 case. Teresa Halbach, as we know, came to the
18 trailer of Steven Avery. We know that they
19 completed their transaction. How do we know
20 that, because the book and the bill of sale was
21 given to Mr. Avery. That's something that, as
22 you heard, happens at the end of the transaction.
23 That's sitting on Mr. Avery's computer desk.

24 We know sometime later, that is, we know
25 sometime in the future, a bullet is found in this

1 exact area, has Teresa Halbach's DNA on it. All
2 right. The inference, and this is an inference
3 that I'm asking you to draw, is that Teresa
4 Halbach was killed in the garage. She was killed
5 in Steven Avery's garage.

6 Now, we have heard testimony about
7 luminal finding blood, that is a reagent, a
8 chemical that is used by the Crime Lab is spread
9 out. There's two things that are most reactive
10 with luminal, one is human blood and the other is
11 bleach. Bleach coincidentally is the one thing
12 that eats up or destroys DNA.

13 We have heard about just to the left and
14 just to the back of this tractor, about a three
15 to 4 foot area, large area that lit up or glowed
16 very brightly. Mr. Ertl testified about that.
17 He was the person who processed that area. I'm
18 asking you to infer that Mr. Avery cleaned up
19 this area with bleach.

20 Now, you knew that inference, or that
21 suggestion from the State, I think, was coming.
22 We have put in the bleach. We have talked about
23 the luminal. We have gotten expert testimony
24 from Mr. Ertl that the two things that light up,
25 it wasn't blood, but it was, in fact, bleach.

1 You heard from Blaine Dassey,
2 importantly, that the garage, other than the junk
3 on the surrounding edges of this garage, looked
4 pretty much like this, from the sense of the
5 Suzuki and the snowmobile, which were in there
6 later on that week, were on the side of the
7 garage at the time. So Teresa Halbach's vehicle
8 is backed in, backed into the garage.

9 Teresa Halbach is killed. She's laying
10 down. She's shot twice, once in the left side of
11 her head, once in the back of her head, or I
12 guess I should more accurately say she's shot at
13 least twice. Because two bullet's were found,
14 two entrance wounds were found to her head. We
15 do have the 11 shell casings on the 6th that were
16 recovered. How many times Mr. Avery actually
17 shot this poor girl, you probably aren't going to
18 be able to determine, but it's at least twice,
19 and it's at least twice to the head.

20 What does he do though, later, with
21 Teresa Halbach. It's the State's theory in this
22 case, and we're entitled to a theory, just like
23 the defense, that after backing in the SUV, into
24 the garage, which was, again, empty at the time,
25 after closing the garage door, which Mr. Fabian

1 testified is how he saw it at around dusk,
2 Mr. Avery does a couple of things.

3 Remember he doesn't know if the cops or
4 somebody is coming looking for Teresa. He has
5 got lots to do. He has got lots of things in the
6 next several hours to do in this case. He has to
7 get rid of all of Teresa's stuff, her camera, her
8 cell phone, her PDA, which very well may be in a
9 purse or something, in the vehicle, which he
10 burns. We know that those are in the burn
11 barrel. We're going to talk about that in just a
12 minute.

13 And he places Teresa Halbach in the
14 back, or the cargo area of her own SUV. Now, in
15 doing that, Mr. Avery does a couple of things.
16 He doesn't do it very gently, because we know
17 that there's motion involved. He throws, if you
18 will, Teresa, in the back, because of the blood
19 spatter across the back of the open gate. But
20 Teresa is laying at rest; she is resting at
21 peace, having been killed by Mr. Avery, kind of
22 diagonally in the back of that SUV.

23 And because of her hair imprint, you are
24 able to deduce that. You are able to know that.
25 Again, remember my closing argument, those are

1 more indications of Teresa telling you this is
2 where I was. All right. This is where he put
3 me. And those are inferences, again, that you
4 should and can adopt. Why, because it's not dark
5 yet, and he needs a big rip roaring fire before
6 he can dispose of and mutilate this body.

7 Again, he has got to do all of this
8 stuff quickly, because he doesn't know if the
9 police are coming. So we hear then, at at least
10 7:30, perhaps before then, but at 7:30 there's
11 already a fire, a big fire in the back. Although
12 it's dark out, there's a big fire in the back of
13 his garage. And we'll talk about some of the
14 more details there. But as long as Mr. Buting
15 asked about the theory of prosecution, again,
16 which we are entitled, that is, in fact, the
17 theory of the State's prosecution.

18 Mr. Buting then asked, why would you
19 build a fire when you have a smelter. The
20 smelter, as we know, or at least this is from the
21 top of the smelter, which kind of melts aluminum
22 as I understand it, is, if you heard the
23 testimony, or if you saw the business buildings,
24 the out buildings, much closer to the residences
25 of the parents, of Delores and Allen. Much

1 closer to the residence of Charles Avery, the
2 brother. Early on in this case we identified
3 what all those buildings were and what were in
4 all of those separate buildings.

5 But what Mr. Avery had to do required
6 some alone time. Mr. Avery needed some privacy.
7 And so Mr. Avery chose his burn area. He chose
8 the place where somebody wouldn't happen upon
9 him, or ask him what he was doing. He was
10 building a fire like he had done many times
11 before.

12 It's an area over which he had control.
13 No other family members would be. And,
14 importantly, Mr. Pevytoe, the arson investigator,
15 remember he went through the smelter, eliminates
16 the smelter as a possible burn location for the
17 body.

18 Mr. Buting asked yesterday did we
19 confuse Lisa Buchner in the case. When she
20 originally testified, Mr. Strang, I believe,
21 questioned her. Mr. Strang provided the answer.
22 Again, this takes a good memory. This takes a
23 lot of you to remember Lisa Buchner's question
24 and answer. But the question was that -- I'm
25 paraphrasing but -- directing your attention to

1 the 31st of October, what did you see? Well,
2 what that does, when you ask a question like
3 that, as a skilled lawyer, and Mr. Strang
4 certainly is a skilled lawyer, Mr. Strang can
5 then come up here and can say, well, she said it
6 was the 31st of October.

7 But she didn't, did she. She never said
8 that it was the 31st of October. When
9 questioned, very courteously by Mr. Gahn, again,
10 about what date really was it, she said, I don't
11 know. When Mr. Gahn asked her, where was the
12 location, that she was clear about. Wasn't down
13 by Mr. Avery's trailer at all. It was one of
14 these cars that's parked at the corner that are
15 for sale.

16 Well, importantly, that excludes,
17 excludes, Teresa Halbach as the person taking
18 this picture. Not only is the time wrong,
19 because we have Bobby Dassey who doesn't have any
20 questions about what this person looks like, or
21 the time this happened, or that it was before he
22 went deer hunting and knew and was able to
23 recognize that that was Teresa Halbach.

24 But we have the defense own witness
25 saying, I don't know. I don't know the date that

1 this happened. Could have been the 1st, could
2 have been the 2nd. Mr. Gahn said, could it have
3 been a week ago, yeah, a week before. Could it
4 have been two weeks before, yeah, it could have
5 been two weeks before.

6 What does that do, how does that help?
7 As Mr. Strang argued in his closing, do you
8 believe that that's the truth, or do you believe
9 that that's disingenuous, again? Is that a
10 misrepresentation of what Ms Buchner actually
11 said? In other words, how does it help? How
12 does it help you? Between Bobby Dassey and Lisa
13 Buchner, who has the better memory? Who was in a
14 position to see what was going on that day? And
15 those kinds of questions you are going to need to
16 answer.

17 Same kind of thing with the other lay
18 witness that was called in this case, some
19 gentleman who was a propane employee, as I
20 understand, who talked about seeing a green
21 mid-sized SUV. Well, ask yourselves, is that a
22 green, mid-sized SUV? I will argue, no, that
23 that's not a green mid-size SUV.

24 But there's interpretations and there
25 are things that may or may not be important about

1 that. However, it hardly helps the equation. It
2 hardly helps you decide in this case whether or
3 not that was Ms Halbach. In fact, we know it
4 wasn't, because Ms Halbach never did leave that
5 property.

6 All right. You need to buckle up here.
7 Because here's where the absurdity starts.
8 Mr. Buting wants you to believe that some unknown
9 person, somebody that Mr. Buting can't identify,
10 somebody that the defense cannot identify,
11 actually undetected, took one of the four burn
12 barrels belonging to Barb Janda.

13 Suggested that that theory also
14 includes -- By the way, that would take more than
15 one person if you think about it, 55 gallon drum,
16 carrying this, we're talking about more than one
17 person. But we're going to go just for now with
18 Mr. Buting's theory in this case, and that at
19 some remote location, Teresa's burned, that the
20 bones are dumped, and that the burn barrel is put
21 back.

22 Mr. Buting doesn't tell you, though, are
23 the eight or nine steps in between that you as a
24 jury have to find as facts, in order to kind of
25 buy this. Okay. When somebody is trying to sell

1 you something, and when you decide whether or not
2 you are going to buy that, you should understand
3 all of the steps that you have to buy.

4 You have to buy that they could first of
5 all take one of these barrels undetected. All
6 right. Next, that they have Teresa Halbach lying
7 dead somewhere. Whoever this is, has Teresa
8 already lying dead in some remote location. And
9 rather, rather than dispose of Teresa Halbach, if
10 they were inclined to do so, at that remote
11 location, Mr. Buting is asking you to believe
12 that she's burned, that her body is mutilated,
13 that her body is then loaded, apparently, into
14 this 55 gallon drum of Barb Janda, that has been
15 stolen, it's a theft, that's been somehow
16 secreted off of the property.

17 What you are then being asked to believe
18 is that they loaded back on whatever vehicle it
19 is that they are able to transport Ms Halbach,
20 after, remember, the at least hour and a half to
21 2 and a half hours at 1600 degrees that it takes
22 to fully cremate a body, that they load all of
23 these remains. And rather than dumping them
24 someplace else, they bring them back to the very
25 place that Steven Avery, on the day that Teresa

1 Halbach was killed, had a big fire.

2 And they decide to dump the bones. Now,
3 they don't decide to dump all the bones,
4 Mr. Buting's theory goes. They only dump the
5 bones, some of them, and they leave some of them.
6 But interestingly, the ones they dump are the
7 little ones, and the ones they leave in the
8 barrel are the big ones.

9 Undetected. But they are able to do
10 this, undetected, just a couple of feet from
11 Mr. Avery's trailer. Then Mr. Buting wants you
12 to believe that they are able to put back the
13 barrel that has been taken off of the property,
14 again, undetected, and leave.

15 Now, Mr. Buting called that a plausible
16 explanation, one theory as to how these bones can
17 be in two different places. I hope you agree
18 with me as to the plausibility of that defense
19 theory.

20 Coupled with that theory, what you have
21 to buy into, what you have to believe, is that
22 there is somebody else out there, that there is
23 somebody, not a police officer. All right. So
24 that narrows the scope of people that are able to
25 do this. Somebody who's not a police officer,

1 who skillfully exploited the law enforcement
2 bias. That the real killer knew about,
3 apparently, the lawsuit, or the animosity, or the
4 embarrassment, or something about the 1985 case
5 enough, where it was important enough to them to
6 kill some innocent 25 year old victim and plant
7 it on Mr. Avery's property.

8 That's absurd. If this wasn't such a
9 important decision that you had to make, it would
10 be laughable. It would be something that if
11 somebody told you at a party, or somebody told
12 you at your home, you would say nobody would
13 believe that. And nobody should. Nobody should
14 believe this series of situations or coincidences
15 that would necessarily lead you to find Mr. Avery
16 not guilty.

17 The SUV was planted in this case, or at
18 least the defense will have you believe that the
19 SUV was planted, that somebody planted the SUV.
20 The fact of the matter is that this SUV was
21 concealed. It was obscured. Somebody didn't
22 want it to be found. Let me say that again.
23 What you are looking at right here, how the SUV
24 was found by Ms Sturm, was by somebody who didn't
25 want this SUV to be found. All right. That

1 makes sense.

2 Well, if you are going to plant
3 evidence, you have to want it to be found.
4 Because if Mr. Avery is going to be accused of
5 some murder that he didn't do in this case, you
6 would expect to find this vehicle, if it was
7 planted, in the Avery parking lot, or by
8 Mr. Avery's trailer, or in some location where it
9 would be found.

10 Again, it was only through happenstance
11 and by very fortuitous intervention that vehicle
12 was ever found. Very important, collectively
13 again, and using your common sense to understand
14 that concept, that this vehicle was obscured in
15 such a way that whoever put it there, like this,
16 didn't want it to be found.

17 Defense wants you to ignore this, and
18 for good reason. The defense wants you to ignore
19 the electronics that were found in the burn
20 barrel. Why, because there's no explanation for
21 it. Because it doesn't fit in any, in any theory
22 that the defense has advanced in this case. All
23 right. No law enforcement planting theory, no
24 civilian planting theory, no individual who
25 skillfully exploited the law enforcement bias

1 theory, explains why these things are burned in
2 Mr. Avery's burn barrel.

3 And so apparently the defense wants you
4 to ignore that. Well, remember the instruction,
5 and reasonable doubt is not -- is a doubt based
6 upon reason and common sense, but in
7 consideration of the evidence, which means all of
8 the evidence in this case, not just some of it.

9 So my point, ladies and gentlemen, is if
10 you are going to buy into one of these theories,
11 you have got to ask yourself, collectively, what
12 the heck is this. Her phone, her PDA, her
13 camera, are all found about 20 feet from
14 Mr. Avery's door, and he is found, that day,
15 burning in that particular barrel. If Mr. Avery
16 is not involved in the death and mutilation of
17 Teresa Halbach, then why are these things in that
18 barrel.

19 Also, you can't ignore the fact, please,
20 collectively remember, that after 2:41 p.m.,
21 after 2:41 p.m. on the 31st, Teresa Halbach's
22 phone is never used again. Never used again.
23 Her phone is in that burn barrel. Her phone is
24 being burned. And you, as the jury, have to
25 decide why. There's a couple of explanations,

1 one is that the defendant killed her and burned
2 it, and the other one, I guess, the defense wants
3 you to just come up with on your own.

4 That brings me to the conclusion, or the
5 last question, and that's, did the cops kill
6 Teresa Halbach. Again, the defense says no. But
7 if the cops had her blood, if the cops had her
8 bones, and before the 5th, if the cops knew she
9 was dead, let me say that again, if before the
10 5th the cops knew that Teresa Halbach was dead,
11 they were either told that by the real killer, or
12 they killed Teresa Halbach.

13 You have got to be willing to accept one
14 of those scenarios. And I don't think you can.
15 And I don't think you should. And I don't think
16 that the evidence points to that at all.

17 Mr. Strang, in his opening statement,
18 promised you what the defense was going to be.
19 Mr. Strang told you that it's no surprise that
20 the blood from an unsecured vial in the box in
21 the Clerk's Office, that Lieutenant Lenk examined
22 in 2002, ends up in the Toyota. At the start of
23 the case, that was what the defense was. That's
24 what the defense theory was. That's what the
25 defense said their theory of defense and what the

1 evidence was going to show in this case.

2 Vial planting, though, causes some
3 risks, risks to, what I'm characterizing as risks
4 to the defense. Because when you announce that
5 defense, the State gets to meet that defense. We
6 get an opportunity to tell you, the jury, through
7 witnesses, whether or not that's plausible,
8 whether or not that could happen, or whether or
9 not that's implausible.

10 And there's two ways to do that. First,
11 is the common sense way to do that. The vial
12 planting defense for Mr. Avery, and for the
13 defense team, is that either Mr. Lenk or
14 Mr. Colborn got through this door. All right.
15 They got through a door that they didn't have a
16 key to, and they got through a door that they
17 didn't have the code to. That's the first part
18 of this.

19 The next thing that they are asking you
20 to buy is that they knew that there was a file
21 someplace in the Clerk of Court's Office,
22 sometime between the 3rd and the 5th of November.
23 Now, why do I say the 3rd and the 5th, because
24 the 3rd is when Teresa is reported missing,
25 doesn't pay to plant evidence and to steal a vial

1 of blood before we know that it's going to do any
2 good. And the 5th is when Pam Sturm finds her.
3 So between the 3rd and the 5th they have to know
4 that this box actually exists.

5 They also need you to buy that they know
6 that there is a box within the box. That there
7 is a vial of blood inside of that particular box
8 in the Clerk's Office. They need you to
9 believe -- They need you to believe that they get
10 through a door they have no key, that they have
11 no code, they find a box that they don't know the
12 existence of, they find the vial that they don't
13 know the existence of, and then they are able to
14 get their hands on that vial of blood.

15 They also need you to believe that
16 nobody sees them do this, that they are able to
17 do that undetected, to secret it, again, to
18 remove it from the Clerk of Court's Office in
19 Manitowoc, to plant the blood, assuming they know
20 how to do that, in six different places.

21 I'm stopping right here, because I need
22 to. Because for the defense version to hold any
23 water at all, the van -- excuse me -- the SUV
24 can't be found yet. They have to plant the blood
25 before it's found. Again, there's only two ways

1 that they can do that. Either they kill this 25
2 year old girl, or they found her murdered
3 somewhere else.

4 And if they found her murdered somewhere
5 else, then weren't they taking quite a chance,
6 weren't Mr. Lenk and Colborn, if you admit or buy
7 what it is that these two gentlemen are selling,
8 wouldn't you have to agree that they took a
9 chance that this very 25 year old photographer
10 was also last seen alive by that man.

11 My God, they got lucky, didn't they. To
12 go and find the vial of blood, even assuming they
13 knew where it was, that the dead woman that they
14 had in their possession, theoretically, was also
15 the last person to have seen Mr. Avery. It
16 doesn't make sense. All right.

17 That's the common sense way to deal with
18 the vial of blood planting. By the way, because
19 the vial of blood is still in the Clerk's Office,
20 you have to reverse this process. You have got
21 to get the blood back after we do the planting.
22 We have to get through, again, the door that we
23 have no key to, and we have no code to, and into
24 the box, and get this thing secreted back in
25 there, undetected, with nobody seeing.

1 That's not reasonable. That's not a
2 reasonable doubt. Reasonable doubts are for
3 innocent people. Reasonable doubts are things
4 that juries adopt when all the evidence points to
5 that. And this planting, this vial planting
6 defense, even from a common sense standpoint, is
7 absolutely ludicrous.

8 But what we were able to do, what you
9 heard, is scientifically exclude that vial of
10 blood. You heard from Dr. LeBeau, who testified
11 that this blood is loaded with EDTA and this
12 blood, and this blood, and this blood, have no
13 detectable levels of EDTA. And so instead of
14 calling all of the people with keys and with
15 codes, and people in the Clerk's Office, and who
16 might have seen Lieutenant Lenk or Colborn, or
17 all those kinds of things, instead of doing it
18 that way, we only had to call one witness, who
19 scientifically could tell you that there is
20 absolutely no way that that vial of blood was
21 used to plant.

22 In fact, that very question was asked of
23 Dr. LeBeau, the head of the toxicology section,
24 or the unit at the FBI. And he said, by a
25 reasonable degree of scientific certainty, this

1 vial of blood is excluded, that means it's not
2 it, it's excluded as the source of those three
3 bloodstains.

4 Now, why is that important. Lieutenant
5 Lenk and Sergeant Colborn, as I mentioned
6 earlier, are good, decent, honest cops, sworn to
7 uphold the law. Kinds of officers Manitowoc
8 citizens should be proud to have on your police
9 force. They are the kinds of guys that you want
10 investigating cases for you, for Manitowoc
11 County. And again, they are not just some cops,
12 they are your cops, that's why a Manitowoc jury
13 decides this case.

14 This isn't just two guys, it's Jim Lenk
15 and it's Andy Colborn. And when you accuse
16 police officers of official misconduct, that's
17 serious business. Mr. Strang correctly predicted
18 that there would be some anger about this issue,
19 coming from the prosecution side, and there is.

20 Let me tell you why. Their livelihood,
21 their reputations, their families, everything in
22 their 20 plus years of law enforcement are on the
23 line, when some lawyer accuses them of
24 misconduct. Not just any misconduct, but
25 planting evidence in a murder case. All right.

1 Serious, serious business.

2 And as a representative of the State, as
3 the prosecutor in this case, I'm here to tell you
4 folks, that if you are going to allege that some
5 Manitowoc cop is crooked, that some Manitowoc cop
6 committed a crime, you better have something to
7 back it up. And when you don't, and when there
8 is a witness from the FBI who says that didn't
9 happen, and when common sense said, that didn't
10 happen, these men are owed an apology. Their
11 good name, their reputations, need to be restored
12 to them.

13 And Mr. Strang talked about what a
14 guilty verdict, or a not guilty verdict, may do
15 in this case. A guilty verdict is most
16 importantly attributed to whether or not
17 Mr. Avery committed these horrific acts in these
18 cases. But also the issue of official or police
19 misconduct should be something that angers you,
20 just as it angers me.

21 Mr. Buting said that he might have been
22 a little rough on Ms Culhane, that he owed her an
23 apology. I'm hoping that the comments that have
24 been directed towards Jim Lenk and towards Andy
25 Colborn, at the conclusion of this case, are also

1 met with an apology.

2 But what I heard yesterday, what I heard
3 yesterday, from Mr. Buting, when he suggested
4 that perhaps it was Teresa's lifestyle that
5 contributed to her homicide, I'm paraphrasing,
6 but he said, because she was at some party, what
7 do we know about this party that she was at on
8 Saturday, or what do we know about some phone
9 calls that she had gotten, or what do we know
10 about her living arrangements.

11 Do you blame a 25 year old homicide
12 victim? And when you suggest that that victim
13 had some responsibility, or something to do with
14 her own demise, you need to be held accountable
15 for that. You need to be taken to task for that.
16 And, again, as the prosecutor, I'm expressing my
17 indignance about that.

18 Any suggestion that these good people of
19 the Halbach family have to endure in listening to
20 Mr. Buting stand before you and say, what about
21 this woman's lifestyle, or what about this party,
22 or what about who she's living with, is
23 absolutely out of bounds, absolutely improper,
24 has no place in this case.

25 What does have a place in this case is

1 the facts. And now I have come full circle. And
2 at the conclusion of this, my final argument
3 before you, the jurors, you have seen, and should
4 see by now, the stark difference between the
5 State's facts, between our reliance on the facts,
6 and the defense necessarily relying upon
7 speculation.

8 Physical evidence, the DNA evidence, the
9 eyewitness testimony, the scientific evidence,
10 the big fire that Mr. Avery had, common sense all
11 point to one person and there's a reason for
12 that. As the jury in this case, you have a duty.
13 You have a duty to return what's called a true
14 verdict. You have a duty to search for the
15 truth.

16 I agree with Mr. Strang that you do have
17 a duty in this case, but I disagree when Mr.
18 Strang tells you that your finding of guilt in
19 this case is not going to solve the crime. It
20 is. It's going to solve the crime.

21 And I'm here to tell you, also, as the
22 prosecutor, and collectively, the three of us
23 prosecutors, with lots and lots of years of
24 experience, are also going to tell you that it
25 will provide closure. It will provide closure

1 for the Halbach family, at least in the legal
2 sense. And it's in the sense for what you are
3 charged to do, and that is to assign
4 responsibility. It's to assign accountability
5 for the death of Teresa Halbach.

6 I don't believe it is a difficult
7 decision. It's a complex series of facts. And
8 it is a very, very serious case. But it's not a
9 difficult case. It's not a difficult decision
10 that you have to make, because everything in this
11 case pointed towards one person, towards one
12 defendant.

13 I'm thanking you, at the conclusion of
14 this case, on behalf of the State of Wisconsin.
15 And urging you, urging you, to follow the Court's
16 instructions, to follow the evidence in the case,
17 and return verdicts of guilty. Thank you. Thank
18 you, Judge.

19 THE COURT: Now, members of the jury, the
20 duties of counsel and the Court have been performed.
21 The case has been argued by counsel. The Court has
22 instructed you regarding the rules of law which
23 should govern you in your deliberations. The time
24 has now come when the great burden of reaching a
25 just, fair, and conscientious decision of this case

1 is to be thrown wholly upon you, the jurors selected
2 for this important duty.

3 You will not be swayed by sympathy,
4 prejudice, or passion. You will be very careful
5 and deliberate in weighing the evidence. I
6 charge you to keep your duty steadfastly in mind
7 and, as upright citizens, to render a just and
8 true verdict, or in this case, just and true
9 verdicts.

10 The following six forms of verdict will
11 be submitted to you concerning the charges
12 against the defendant, Steven A. Avery.

13 One reading: We, the jury, find the
14 defendant, Steven A. Avery, guilty of first
15 degree intentional homicide, as charged in the
16 first count of the Information.

17 A second reading: We, the jury, find
18 the defendant, Steven A. Avery, not guilty of
19 first degree intentional homicide, as charged in
20 the first count of the Information.

21 A third reading: We, the jury, find the
22 defendant, Steven A. Avery, guilty of mutilating
23 a corpse, as charged in the second count of the
24 Information.

25 And a fourth reading: We, the jury,

1 find the defendant, Steven A. Avery, not guilty
2 of mutilating a corpse, as charged in the second
3 count of the Information.

4 A fifth reading: We, the jury, find the
5 defendant, Steven A. Avery, guilty of possession
6 of a firearm, as charged in the third count of
7 the Information.

8 And a sixth reading: We, the jury, find
9 the defendant, Steven A. Avery, not guilty of
10 possession of a firearm, as charged in the third
11 count of the information.

12 It is for you to determine whether the
13 defendant is guilty, or not guilty, of each of
14 the offenses charged. You must make a finding as
15 to each count of the Information.

16 Each count charges a separate crime and
17 you must consider each one separately. Your
18 verdict for the crime charged in one count must
19 not affect your verdict on any other count.

20 This is a criminal, not a civil case,
21 therefore, before the jury may return a verdict
22 which may legally be received, the verdict must
23 be reached unanimously. In a criminal case, all
24 12 jurors must agree in order to arrive at a
25 verdict.

1 When you return to the jury room, select
2 one of your members to preside over your
3 deliberations. That person's vote is entitled to
4 no greater weight than the vote of any other
5 juror.

6 When you have agreed upon your verdicts,
7 have them signed and dated by the person you have
8 selected to preside. I ask that you return the
9 unsigned verdict forms as well.

10 At this point, I'm going to ask the
11 media folks to shut the audio down because the
12 Court is going to be identifying one of the
13 jurors by name. I believe somebody is supposed
14 to signal me once that's been done. Thank you.

15 Members of the jury, as I previously
16 indicated, just before the beginning of
17 deliberations, any remaining alternate jurors
18 would be selected. We are now at that point in
19 the trial.

20 The alternate juror will be sequestered
21 separately from the other jurors until
22 deliberations are completed, to be available in
23 the event one of the other 12 jurors becomes
24 unable to complete deliberations.

25 The alternate juror in this case has

1 been determined to be Nancy Stienmetz. Ms
2 Stienmetz, with the consent of counsel for both
3 parties, I will be meeting with you shortly, in
4 chambers, to explain your remaining role in this
5 case.

6 At this time I will ask the Clerk to
7 swear the officer.

8 (Jury bailiff sworn.)

9 THE COURT: The jury is excused. Ms
10 Stienmetz, you'll be waiting in the hallway to meet
11 with me.

12 (Jury not present.)

13 THE COURT: You may be seated. Counsel, if
14 you should leave the courtroom area, I ask you to
15 keep the Clerk's Office informed of your
16 whereabouts.

17 ATTORNEY STRANG: The remaining task to
18 tend to is that we had agreed, I think, that all
19 photographs would go to the jury without a request.
20 But since then, I don't remember if I did this on
21 the record or not, but had moved to exclude some of
22 the exhibits already admitted, and photographs of
23 those.

24 I have numbers of them in my brief case,
25 but they are the handcuffs, leg irons, electrical

1 cords, and as I say, related pictures. So the
2 Court would need to rule on those, because if to
3 be excluded, of course, those photographs ought
4 not go.

5 THE COURT: I recall being informed that I
6 could anticipate the receipt of such a motion; I
7 don't know that I have received it yet. But I was
8 notified of it and my recollection is that the
9 parties were going to discuss the potentially
10 disputed items of evidence in order to determine
11 whether there would be a stipulation proposed.

12 ATTORNEY STRANG: I don't know that we had
13 much further conversation, so the question may be
14 best put to the State.

15 ATTORNEY KRATZ: If I could just have a
16 moment, Judge, I will be happy to identify those for
17 the Court. Exhibit 173, Exhibit 174.

18 ATTORNEY STRANG: 228 and 229.

19 ATTORNEY KRATZ: Thank you, counsel. 228,
20 and 229, although those are items themselves.

21 ATTORNEY STRANG: Yes, some of these are
22 photographs and some are the items themselves. And
23 I don't have which is which.

24 ATTORNEY KRATZ: All right. 228 -- 229 has
25 already been withdrawn, I think, as an exhibit. 228

1 is the other photo that is at issue in the case.
2 And those three photos, then, that have been
3 identified, we have no objection they be removed
4 from the binder of photos, and that the balance of
5 the photos be tendered to the jury at this time.

6 THE COURT: All right. Can you give me the
7 numbers of the photos again.

8 ATTORNEY STRANG: 173, 174, 228, and
9 Mr. Kratz says that 229 already was withdrawn.

10 ATTORNEY KRATZ: Right. Those are the
11 three exhibits.

12 ATTORNEY STRANG: Then the items themselves
13 are Exhibits 203, 204, and 249. Those are the
14 actual items.

15 ATTORNEY KRATZ: They wouldn't be going
16 back anyway, Judge.

17 THE COURT: Pardon me?

18 ATTORNEY KRATZ: The items wouldn't be
19 going back anyway.

20 THE COURT: I understand the motion to be
21 going beyond that.

22 ATTORNEY STRANG: Right. But they -- I'm
23 asking that they be excluded, that is, that the
24 Court reconsider the ruling admitting them, exclude
25 those things as exhibits. I agree, of course, with

1 Mr. Kratz, that these things wouldn't be going to
2 the jury anyway, absent a request, but I'm looking
3 to have them excluded as evidence altogether.

4 THE COURT: My only hesitation there is,
5 given the stage of the trial at which this is being
6 raised. I take it you are not asking for some type
7 of further instruction to the jury that they have
8 been withdrawn.

9 ATTORNEY STRANG: I'm not, no. I mean, we
10 would have addressed that before closing arguments.

11 THE COURT: Does the State have any
12 objection?

13 ATTORNEY KRATZ: The only issue, Judge, is
14 if they would ask to see those items, I think that
15 could be addressed at that time. I don't believe
16 that the items themselves, that is the physical
17 items themselves, need to be addressed at this time.
18 Certainly an argument could be made as to the
19 relevance, they are part of the record. And up and
20 until the time that those may be asked for, I
21 believe that request by counsel is premature.

22 THE COURT: Let me ask this. Is the
23 defense, with the understanding that both parties
24 agree that these six exhibits that have been
25 identified, that is, three photos and three physical

1 items, with the understanding that they will not be
2 sent to the jury, and I believe there's a
3 stipulation that the three photos can simply be
4 withdrawn, is the defense willing to postpone
5 further consideration of its request to withdraw the
6 other exhibits to such time as the jury requests to
7 see them?

8 ATTORNEY STRANG: Sure, because there is --
9 it's true, there is no practical effect other than
10 cleaning up the record, and that can be done any
11 time.

12 THE COURT: So, based on the stipulation of
13 the parties then, items -- Exhibits 173, 174 and 228
14 that are photos, are withdrawn, and items 203, 204,
15 and 249, will not be sent to the jury room if
16 requested.

17 ATTORNEY STRANG: That's right. Now, I
18 have to say, I had -- our exhibit shows 229.

19 THE COURT: I have been told -- my
20 understanding was that's already been withdrawn.

21 ATTORNEY STRANG: Let's just confirm that
22 with the clerk, I probably am wrong, but 229, Janet.

23 THE CLERK: I didn't show that as
24 withdrawn.

25 ATTORNEY KRATZ: It should be, I have no

1 problem with that.

2 THE COURT: All right. 229, then, is also
3 withdrawn.

4 ATTORNEY STRANG: Very well.

5 ATTORNEY KRATZ: Thank you.

6 THE COURT: Very well, we're in recess.

7 ATTORNEY BUTING: Judge, one other matter.

8 THE COURT: Yes.

9 ATTORNEY BUTING: I don't know what other
10 exhibits you intend to send back to the jury, other
11 than the photographs, but certainly we would object
12 to the expert's reports going back.

13 THE COURT: Let me clarify my understanding
14 further. If I understand what the parties are
15 telling me, and I want to make sure I'm not reading
16 too much in, I'm glad, Mr. Buting, that you brought
17 this up. If the jury requests permission to see any
18 of the other photos, are the parties saying I can
19 send them back, or the parties wish to be heard
20 before they are sent back?

21 ATTORNEY STRANG: Photos can be sent
22 without jury request.

23 ATTORNEY KRATZ: Right now.

24 ATTORNEY STRANG: That's what we agreed.

25 THE COURT: You are asking the Court to

1 send them back.

2 ATTORNEY KRATZ: Right now, yes.

3 THE COURT: Okay.

4 ATTORNEY KRATZ: But any other exhibits, if
5 they ask to be seen, we would all like to be heard
6 on that.

7 ATTORNEY STRANG: And maybe we didn't have
8 an agreement on this, I expressed the view to
9 counsel that we also could send CV's for all experts
10 back, without request. If they are not in
11 agreement --

12 ATTORNEY KRATZ: No, that--

13 THE COURT: I'm a little concerned if we're
14 sending all photos, that's one thing. I hate to
15 send back nothing but all CV's and nothing else, for
16 fear that it might draw undue attention to them. So
17 I'm going to wait, and if the jury requests to see
18 anything other than the remaining photos, I will
19 notify the parties, just as I would if I receive a
20 question from the jury, and the parties will have a
21 chance to be heard before they go back.

22 ATTORNEY KRATZ: That sounds good.

23 THE COURT: Fair enough?

24 ATTORNEY KRATZ: Thank you, Judge.

25 ATTORNEY STRANG: Yes.

16 DEAN A. STRANG
Attorney at Law
17 On behalf of the Defendant.

18 JEROME F. BUTING
Attorney at Law
19 On behalf of the Defendant.

20 STEVEN A. AVERY
Defendant
21 Appeared in person.

22 * * * * *

23 **TRANSCRIPT OF PROCEEDINGS**

24 Reported by Diane Tesheneck, RPR

25 Official Court Reporter

1 THE COURT: At this time the Court, again,
2 calls State of Wisconsin vs. Steven Avery, Case No.
3 05 CF 381. I will indicate that we are on the
4 record at this time, outside of the presence of the
5 jurors. Will the parties present state their
6 appearances for the record, please.

7 ATTORNEY KRATZ: Good morning, Judge, the
8 State appears by Calumet County District Attorney
9 Ken Kratz and Assistant Attorney General Tom Fallon
10 as Special Prosecutors.

11 ATTORNEY STRANG: And good morning as well,
12 Steven Avery in person and Jerome Buting and Dean
13 Strang on his behalf.

14 THE COURT: All right. Before I get to the
15 specific reason that we're going on the record this
16 morning, I wanted to address an item that came to
17 the Court's attention yesterday, after the jurors
18 began deliberations. There were a couple of
19 requests from the jury for accessories, if you will,
20 to assist them in their deliberations.

21 Specifically, at about 1:20 in the
22 afternoon the jurors requested a magnifying
23 glass, because of the size of the photos that
24 they received. And at 2:30, the jurors request a
25 dry board, a flip chart, or something along those

1 lines, that they could use in the course of their
2 deliberations.

3 When requests like this are typically
4 received, the Court generally will, informally,
5 discuss with counsel if any of them have any
6 problem, but normally the Court simply sends the
7 items back. It's practice and, in fact, it's
8 required to go on the record whenever a question
9 is received from the jury, but normally it's this
10 Court's practice and counsel confirmed yesterday
11 that they did not see a need to go on the record
12 for the requests that were made by the jury.

13 One difference in this case is that the
14 Court has been alerted that the media interest in
15 the juror deliberations extends to the request of
16 the nature of those that were made yesterday.
17 And the Court was, frankly, simply not thinking
18 about that yesterday afternoon.

19 But it would be my proposal, if there's
20 any requests like that received in the future,
21 although we may not go on the record for them, if
22 either party feels the need to do so, I will,
23 after any such requests are acted on, simply pass
24 information to the media coordinator and alert
25 all the media of what happened. Is that

1 procedure acceptable to both parties?

2 ATTORNEY KRATZ: Yes, judge.

3 ATTORNEY STRANG: Yes.

4 THE COURT: The next item has do with one
5 of the jurors in this case. Last evening, sometime
6 around 9 p.m., the Court received a telephone call
7 from Sheriff Pagel indicating that one of the jurors
8 had presented a request to a -- one of the
9 supervising deputies over at the hotel, to be
10 excused because of an unforeseen family emergency.

11 The Court, mindful of its duty to
12 exercise reasonable efforts to void the discharge
13 of a juror, once deliberations have begun,
14 nevertheless, concluded that based on the
15 information provided, the request appeared to
16 have merit and warranted further consideration.

17 After I received the information, I
18 contacted Attorney Kratz and both defense counsel
19 by telephone conference call to inform them of
20 the request. Counsel agreed that if the
21 information that had been presented to the Court
22 was correct, excusing the juror was appropriate
23 in this case.

24 Counsel further authorized the Court to
25 speak with the juror individually and excuse the

1 juror if the information provided to the Court
2 was verified. The Court did verify that
3 information with the juror and excused the juror
4 last evening.

5 Case law in Wisconsin provides three
6 alternatives in a situation now before the Court.
7 One alternative is that the parties can stipulate
8 to proceed with 11 jurors.

9 The second alternative is that the
10 parties can stipulate to substitute an alternate
11 juror. In this case the Court has previously
12 sequestered one of the alternate jurors to be
13 available for that purpose, if it became
14 necessary.

15 The third alternative is to declare a
16 mistrial in the absence of a stipulation by the
17 parties to proceed with one of the other two
18 alternatives.

19 It's my understanding that at this time
20 the parties do have a stipulation to present to
21 the Court. Mr. Strang.

22 ATTORNEY STRANG: Your Honor, thank you.
23 Mr. Avery and his counsel are willing to offer their
24 agreement to pursue the following course: One, if
25 the Court gives a proper instruction that jury

1 deliberations must begin entirely anew. And, two,
2 if each of the 11 presently deliberating jurors
3 provides satisfactory assurance that they can and
4 will follow an instruction to begin deliberations
5 anew, then, three, the defense will agree that the
6 person who has been the alternate to date should
7 join the ranks of the 11, becoming the 12th regular
8 juror and the deliberations may begin anew with this
9 newly composed group of 12.

10 If the State thinks the three aspects of
11 this agreement acceptable, the defense, too, will
12 be bound by it. And we have discussed that with
13 Mr. Avery. It has his concurrence and he
14 understands that the Court will want to make
15 brief personal inquiry of him as well.

16 THE COURT: Thank you. Mr. Kratz.

17 ATTORNEY KRATZ: Judge, the State joins in
18 the stipulation. After our conversation last
19 evening where the Court discussed the options, and
20 after hearing, this morning, of the defense
21 willingness to enter the stipulation, the State
22 agrees that the alternate juror, who was reserved
23 just for this unusual circumstance or occasion,
24 that -- that the Court do just that. And so we join
25 in Mr. Strang's request that the Court adopt and

1 approve this stipulation.

2 THE COURT: All right. As a supplement to
3 Mr. Strang's request, I should indicate for the
4 record that I did meet with counsel in chambers
5 before we began today and went over a proposed
6 instruction to the jury and question for the jurors
7 to make sure that they could follow the Court's
8 instruction.

9 The Court prepared that instruction with
10 input from both of the parties. And Mr. Strang
11 when you refer to an appropriate instruction, I'm
12 assuming you are referring to the one that was
13 discussed in chambers today.

14 ATTORNEY STRANG: The instruction that the
15 Court read to us in chambers this morning, after
16 hearing input from both sides, we think a proper
17 instruction.

18 THE COURT: Thank you. All right. Then,
19 Mr. Avery, I do have a few questions to ask of you
20 at this point. First of all, have you heard the
21 discussion that we just had, on the record, and the
22 proposal of how to address the issue of the excused
23 juror?

24 THE DEFENDANT: Yes, sir.

25 THE COURT: Have you taken some time this

1 morning to discuss this matter with your attorneys?

2 THE DEFENDANT: Yes, sir.

3 THE COURT: Are you aware that you are
4 under no obligation to join in the stipulation, that
5 is, you have the right to require a jury of 12 and
6 the right to request a mistrial if the juror is
7 excused.

8 THE DEFENDANT: Yes, sir.

9 THE COURT: Do you feel that you need any
10 more time to consider your decision on this issue?

11 THE DEFENDANT: No, sir.

12 THE COURT: Are you in agreement with the
13 stipulation that has just been placed on the record
14 by your attorney, Mr. Strang?

15 THE DEFENDANT: Yes, sir.

16 THE COURT: Very well, the Court finds that
17 the parties have jointly stipulated, and the defense
18 has stipulated with the knowing and voluntary
19 consent of the defendant, to recall the alternate
20 juror in this case and allow the jurors to begin
21 deliberating anew, following an instruction from the
22 Court as to how those deliberations are to proceed.

23 Is there anything else that either party
24 wishes to bring up on the record before we bring
25 in the jurors?

1 ATTORNEY KRATZ: No, your Honor.

2 ATTORNEY STRANG: No, thank you, your
3 Honor.

4 THE COURT: And I believe it's the
5 understanding and agreement of both parties that,
6 when the jurors are brought in, we'll be bringing in
7 the remaining 11 original jurors and the alternate
8 to take the seat she normally takes.

9 ATTORNEY STRANG: Yes, and, that because
10 this procedure, very soon, will require naming
11 jurors, that arrangements have been made with the
12 media to preserve the Court's requirement that
13 jurors not be named publicly.

14 THE COURT: All right. I will cue the
15 media, the camera operators, when that time comes in
16 the instructions. At this time, then, we can bring
17 in the jurors.

18 (Jury present.)

19 THE COURT: You may be seated. We're going
20 to wait a minute for Ms Stienmetz to join us.

21 Members of the jury, one of your members
22 has been excused from jury deliberations in this
23 case, because of an unforeseen family emergency.
24 Although excusing a juror during deliberations
25 rarely occurs, it is sometimes necessary.

1 The Court has brought back the last
2 alternate juror excused, to participate in the
3 deliberations in this case. Before those
4 deliberations begin, I have an important further
5 instruction for all of you.

6 The law requires that, during
7 deliberations, 12 people must have the
8 opportunity to review the evidence in light of
9 each juror's perception, memory, and reaction.
10 It is important that the jury reach its consensus
11 through deliberations, which are the common
12 experience of all 12 jurors.

13 Each of the 12, must have the
14 opportunity to persuade the other members of the
15 jury and to be persuaded by them. If you have
16 formed any views about the evidence up until now,
17 you must set those views aside and start over.

18 To assure that these requirements are
19 followed in this case, you are instructed that
20 you must commence your deliberations anew. That
21 means that you should begin by electing a
22 foreperson and then proceed to evaluate all the
23 evidence as though you are just beginning to
24 deliberate. This is necessary to assure the full
25 participation of all 12 jurors in the

1 deliberation process.

2 Before I excuse you to begin
3 deliberating, it is necessary that I be assured
4 that each of you will be able to deliberate on
5 this basis. Therefore, I'm going to individually
6 ask each of you one more question. At this time
7 I will ask the media to cut the audio portion.
8 Thank you.

9 Each of you must accept this juror as an
10 equal member of this jury, giving her the full
11 respect and authority that you would give to any
12 other juror.

13 Mr. Slaby, will you be able to follow
14 this instruction I have just given you and begin
15 your deliberations anew?

16 MR. SLABY: Yes.

17 THE COURT: Ms Free, will you follow this
18 instruction I have just given you and begin your
19 deliberations anew?

20 MS FREE: Yes.

21 THE COURT: Ms Schmidt, will you follow the
22 instruction I have just given you and begin your
23 deliberations anew?

24 MS SCHMIDT: Yes.

25 THE COURT: Ms Thorne, will you follow this

1 instruction I have just given you and begin your
2 deliberations anew?

3 MS THORNE: Yes.

4 THE COURT: Ms Dorn, will you follow the
5 instruction I have just given you and begin your
6 deliberations anew?

7 MS DORN: Yes.

8 THE COURT: Mr. Nelesen, will you follow
9 the instruction I have just given you and begin your
10 deliberations anew?

11 MR. NELESEN: Yes, sir.

12 THE COURT: Mr. Klein, will you follow the
13 instruction I have just given you and begin your
14 deliberations anew?

15 MR. KLEIN: Yes.

16 THE COURT: Mr. Schuette, will you follow
17 the instruction I have just given you and begin your
18 deliberations anew?

19 MR. SCHUETTE: Yes.

20 THE COURT: Ms Flint, will you follow the
21 instruction I have just given you and begin your
22 deliberations anew?

23 MS FLINT: Yes.

24 THE COURT: Mr. Mohr, will you follow this
25 instruction I have just given you and begin your

1 deliberations anew?

2 MR. MOHR: Yes, your Honor.

3 THE COURT: And, Mr. Wardman, will you
4 follow the instruction I have just given you and
5 begin your deliberations anew?

6 MR. WARDMAN: Yes.

7 THE COURT: Last, Ms Stienmetz, have you
8 heard the instructions that I have given to the jury
9 and are you willing to resume your role as a juror
10 under those instructions in this case?

11 MS STIENMETZ: Yes, I am.

12 THE COURT: Thank you. Members of the
13 jury, the Court will prepare a written copy of the
14 instruction that I have just given you to send back
15 so that you will have it with your other
16 instructions in this case. Ms Stienmetz, do you
17 still have your original instructions or do you need
18 another set sent back?

19 MS STIENMETZ: It was left in the room.

20 THE COURT: All right. I will see to it
21 that another set of full instructions gets sent back
22 for you. At this time, then, members of the jury,
23 you are excused and you may begin your
24 deliberations.

25 (Jury not present.)

1 THE COURT: You may be seated. Counsel, I
2 will ask you to stop back, then, in about 10 minutes
3 so that I can prepare a written version of this
4 instruction, sent back to the jury, and each of you
5 can sign off on it.

6 ATTORNEY BUTING: All right.

7 THE COURT: Anything else while we're on
8 the record?

9 ATTORNEY KRATZ: No, Judge. Thank you.

10 ATTORNEY STRANG: No. Thanks.

11 THE COURT: Very well. Counsel, I'm going
12 to ask you to stop back right away.

13 ATTORNEY BUTING: Okay.

14 (Court in recess, jury deliberating.)

15 *****

16 (Question from the jury and the Judge's reply.)

17 THE COURT: At this time we are on the
18 record, outside the presence of the jury. All
19 counsel, except Mr. Gahn, are present, and the
20 defendant is also present, in person.

21 I can indicate for the record that the
22 Court has received a written question from the
23 jury dated today, at 1:29 p.m. Following receipt
24 of the question, I met with counsel in chambers
25 and discussed a proposed answer to the question.

1 I believe the parties are in agreement
2 with that answer. I will read the question and
3 the answer at this time and then ask the parties
4 if the answer is acceptable. The question from
5 the jury reads: Could we please read or hear a
6 transcript of Bobby Dassey's testimony. It is
7 signed by Daniel Slaby, who I presume to be the
8 foreperson, dated today at 1:29 p.m.

9 The proposed answer is the following:

10 Dear Jury Members, this is in response to your
11 request for a transcript of Bobby Dassey's
12 testimony. As the Court has instructed you, you
13 will not have a copy of the written transcript of
14 the trial testimony available for use during your
15 deliberations. You may ask to have specific
16 portions of the testimony read to you. You must
17 continue to rely primarily on your memory of the
18 evidence and the testimony introduced during the
19 trial.

20 The Court does not have and cannot
21 provide you with a transcript of Bobby Dassey's
22 entire testimony. If you can identify a specific
23 portion of his testimony, the Court will attempt
24 to address your request. Please do not disclose
25 the state of your deliberations in any such

request. Signed by me. Mr. Kratz, is that answer acceptable to the State?

ATTORNEY KRATZ: Yes.

THE COURT: Mr. Strang, Mr. Buting, I don't know if you discussed this matter with your client, I will give you an opportunity to do so if you wish.

ATTORNEY STRANG: Mr. Buting did, briefly. The answer is acceptable both to defense counsel and to Mr. Avery.

THE COURT: Very well, if there's nothing further, I will send the original copy of the answer back to the jury and then keep the jurors question and a copy of the answer for the court file.

ATTORNEY FALLON: Do you want us to wait here in case there is a quick reply?

THE COURT: Actually, I have got another matter I would like to talk to you in chambers about, so let's meet back there.

1 STATE OF WISCONSIN : CIRCUIT COURT : MANITOWOC COUNTY
2 BRANCH 1

3 STATE OF WISCONSIN,

4 PLAINTIFF,

JURY TRIAL

TRIAL - DAY 26

5 vs.

Case No. 05 CF 381

6 STEVEN A. AVERY,

7 DEFENDANT.

8 **DATE:** MARCH 17, 2007

9 **BEFORE:** Hon. Patrick L. Willis
10 Circuit Court Judge

11 **APPEARANCES:**

12 KENNETH R. KRATZ
Special Prosecutor
13 On behalf of the State of Wisconsin.

14 THOMAS J. FALLON
Special Prosecutor
15 On behalf of the State of Wisconsin.

16 DEAN A. STRANG
Attorney at Law
17 On behalf of the Defendant.

18 JEROME F. BUTING
Attorney at Law
19 On behalf of the Defendant.

20 STEVEN A. AVERY
Defendant
21 Appeared in person.

22 * * * * *

23 **TRANSCRIPT OF PROCEEDINGS**

24 Reported by Diane Tesheneck, RPR

25 Official Court Reporter

1 THE COURT: At this time we're on the
2 record, outside the presence of the jury, in the
3 case of State of Wisconsin vs. Steven Avery, Case
4 No. 05 CF 381. Will the parties present please
5 identify themselves for the record.

6 ATTORNEY KRATZ: The State appears by Ken
7 Kratz and Tom Fallon as Special Prosecutors, Judge.

8 ATTORNEY BUTING: Steven Avery is here in
9 person, your Honor, Jerome Buting and Dean Strang on
10 his behalf.

11 THE COURT: All right. I will indicate
12 we're in the courtroom, outside the presence of the
13 jury at this time to address a written request that
14 was received from the jury; specifically, the
15 request reads as follows:

16 Your Honor, we would like to have the
17 testimony shown or read to us from Sherry Culhane
18 on Monday, February 26, on her DNA results on
19 Exhibit 164. Exhibit 154 (sic) is a .22 caliber
20 rifle. After the Court received that request, I
21 first summoned the attorneys for both sides to
22 chambers, to have a look at it.

23 We, then, had the court reporter
24 research the minutes or her testimony that was
25 taken down on Monday, February 26, from Ms

1 Culhane. I have received pieces of her testimony
2 in three separate parts from that day, listed as
3 pages -- or part of page 32, part of page 34, of
4 what I believe is the morning transcript. And
5 then page 8 and part of page 9 from the afternoon
6 transcript.

7 (Court reporter note: After completing
8 the transcription of February 26, 2007, Trial Day
9 11, the page numbers are 33, 34, 115, 116, 117.)

10 Those portions of the transcript have
11 been shared with counsel. And it's my
12 understanding that counsel for both parties are
13 asking that I read to the jury all of the
14 testimony from the pages I have just referred to.

15 Mr. Strang, is that correct, on behalf
16 of the defendant?

17 ATTORNEY STRANG: Yes.

18 THE COURT: And, Mr. Kratz?

19 ATTORNEY KRATZ: Judge, it's Exhibit 164, I
20 believe you said 154. But 164 is a photograph of
21 the .22 caliber rifle. We have all assumed that the
22 testing, which results find its way in Exhibit 313,
23 that the jury is asking about the testing of the
24 item itself.

25 The rifle itself is Exhibit 247, but we

1 have been able, I think the Court and counsel, to
2 ascertain that they are asking about the results
3 from the item itself, since the exhibit number is
4 the photograph and wouldn't, of course, have DNA
5 results. But we do agree with the Court that
6 those portions of those four pages should be
7 read.

8 THE COURT: Actually, the distinction you
9 may have just made raises a question in the Court's
10 mind. And that is, I'm wondering if we shouldn't,
11 before we bring the juror in -- the jurors in and
12 read this to them, ask them for a clarification to
13 make sure that the exhibit we're talking about is
14 the exhibit they are referencing in their note,
15 since they reference it by a number rather than an
16 exhibit.

17 ATTORNEY STRANG: They just have
18 photographs, your Honor, back there, so --

19 THE COURT: Okay.

20 ATTORNEY STRANG: -- I think it's pretty
21 clear.

22 THE COURT: Well, does the State feel
23 there's a need?

24 ATTORNEY KRATZ: I think they want the item
25 itself, Judge.

1 THE COURT: All right. Well, let me ask
2 this, should I clarify, before we begin, that the
3 Court and the parties assume that they are referring
4 to a photograph of a .22 caliber rifle?

5 ATTORNEY STRANG: Sure.

6 ATTORNEY KRATZ: And perhaps, Judge, that
7 the item itself is Exhibit 247. They are certainly
8 always free, then, to ask additional questions.

9 THE COURT: Mr. Strang.

10 ATTORNEY STRANG: That's fine.

11 THE COURT: Okay.

12 ATTORNEY STRANG: Just clarify or make
13 certain.

14 THE COURT: All right. Anything else
15 before we bring the jurors in? We'll bring the jury
16 in at this time?

17 (Jury present.)

18 THE COURT: You may be seated. Members of
19 the jury, the Court has received your written
20 request to have some testimony read to you,
21 specifically, the request for testimony from Sherry
22 Culhane on Monday, February 26, on her DNA results
23 on Exhibit 164.

24 It's the Court's understanding that you
25 are referring to the rifle that was introduced as

1 Exhibit 247 that is pictured in Exhibit 164. The
2 testimony has been transcribed; it's in,
3 actually, three separate portions of testimony
4 that was given by Ms Culhane on that date and I
5 will read each of those excerpts to you at this
6 time. The answers are all given as part of
7 cross-examination by Attorney Buting, for the
8 defense.

9 The first excerpt reads as follows:

10 Question: As well as the license plates
11 from the RAV4 and to check the .22 caliber gun,
12 Item DD, for any indication of the victim's blood
13 on the barrel, right?

14 Answer: Yes.

15 Question: And also to swab the trigger
16 guard area to compare with Steven Avery?

17 Answer: Correct.

18 And shortly thereafter, the following
19 exchange:

20 Question: And you checked the Item DD,
21 .22 caliber gun; that's a rifle, right?

22 Answer: Yes.

23 Question: You looked for any blood of
24 the victim on the barrel, right?

25 Answer: Correct.

1 Question: You found no DNA of Teresa
2 Halbach on that barrel?

3 Answer: Correct.

4 Question: You looked at the trigger
5 guard as well, not just the trigger guard, but
6 the trigger itself?

7 Answer: Yes.

8 Question: You swabbed both, right?

9 Answer: Yes.

10 Question: And you found no DNA of
11 Mr. Avery, right?

12 Answer: Correct.

13 Then a bit later, the following exchange
14 took place.

15 Question: Now, you also looked, or
16 asked to look, we saw that message earlier, at
17 the -- at .22 rifle swabs that were taken from
18 it, right?

19 Answer: Yes.

20 Question: And the purpose there was not
21 to see if you would find Teresa Halbach's DNA,
22 but to see if you would find Mr. Avery's DNA,
23 right?

24 Answer: Was that item DD?

25 Question: Yes.

1 Answer: I believe I was requested to
2 look for possible blood on the barrel part and
3 DNA from the trigger area.

4 Question: And you found neither,
5 correct?

6 Answer: That's correct.

7 Question: You did not find Mr. Avery's
8 DNA on that weapon anywhere, did you?

9 Answer: On the trigger guard is the
10 only place I swabbed, but, no, I didn't.

11 Question: And you did not find Teresa
12 Halbach's DNA anywhere on the barrel either?

13 Answer: Correct.

14 Question: Are you familiar with
15 close -- close, almost contact-type shootings?

16 Answer: I don't know what you mean by
17 that.

18 Question: Are you familiar with the
19 term blow back?

20 Answer: Yes.

21 Question: You know that if someone
22 shoots another human being with a gun, that's
23 very close to them, there may be blow back
24 spatter of blood onto that weapon?

25 Answer: I assume that's possible.

Question: Well, that's what you were looking for?

Answer: I was simply looking for bloodstains, yes.

Question: On the barrel?

Answer: Correct.

Question: And you found none?

Answer: Correct.

THE COURT: And that represents the testimony in response to your question. At this time the Court will excuse you to resume your deliberations.

(Jury not present.)

THE COURT: Counsel, you may be seated. Anything else while we're on the record?

ATTORNEY STRANG: No, your Honor.

ATTORNEY KRATZ: No.

THE COURT: Very well.

(Court in recess, jury deliberating.)

23 **TRANSCRIPT OF PROCEEDINGS**

24 Reported by Diane Tesheneck, RPR

25 Official Court Reporter

1 THE COURT: At this time we are on the
2 record outside the presence of the jury. The Court
3 has been informed that the jury has reached verdicts
4 in this matter. Will the parties present state
5 their appearances for the record.

6 ATTORNEY KRATZ: Your Honor, the State of
7 Wisconsin appears by Calumet County District
8 Attorney Ken Kratz, Assistant Attorney General Tom
9 Fallon, both appearing as Special Prosecutors.

10 ATTORNEY STRANG: Good afternoon, Steven
11 Avery is in person. Jerome Buting and Dean Strang
12 on his behalf.

13 THE COURT: Before the Court brings the
14 jury in and receives the verdicts, I want to remind
15 all those present in the courtroom that this is a
16 court of law. The Court recognizes the emotional
17 nature of this case and its importance to all
18 parties involved. However, vocal outbursts or
19 displays of emotion will not be tolerated. Any
20 violation will result in removal from the courtroom.
21 At this time I will ask that the jury be brought in.

22 (Jury present.)

23 THE COURT: You may be seated. Members of
24 the jury, the Court has been informed that the jury
25 has reached its verdicts in this case. At this time

1 I will ask the foreperson to present the verdicts to
2 the bailiff so that they may be brought forward.

3 At this time the Court will read the
4 verdicts. On Count 1, the verdict reads as
5 follows: We, the jury, find the defendant,
6 Steven A. Avery, guilty of first degree
7 intentional homicide as charged in the first
8 count of the Information.

9 On Count 2, the verdict reads: We, the
10 jury, find the defendant, Steven A. Avery, not
11 guilty of mutilating a corpse as charged in the
12 second count of the Information.

13 On Count 3, the verdict reads: We, the
14 jury, find the defendant, Steven Avery, guilty of
15 possession of a firearm as charged in the third
16 count of the Information.

17 The verdict on Count 1 is signed by the
18 foreperson of the jury, dated today. The other
19 verdicts are also signed by the foreperson of the
20 jury.

21 At this time the Court is going to poll
22 the jurors. I will ask the media folks to cut
23 the audio at this time.

24 Mr. Slaby, were the verdicts as read by
25 the Court, and are they still now, your verdicts

1 in this case?

2 MR. SLABY: Yes, your Honor.

3 THE COURT: Ms Free, were the verdicts as
4 read by the Court, and are they still now, your
5 verdicts in this case?

6 MS FREE: Yes, sir.

7 THE COURT: Ms Schmidt, were the verdicts
8 as read by the Court, and are they still now, your
9 verdicts in this case?

10 MS SCHMIDT: Yes, sir.

11 THE COURT: Ms Thorne, were the verdicts as
12 read by the Court, and are they still now, your
13 verdicts in this case?

14 MS THORNE: Yes, sir.

15 THE COURT: Ms Dorn, were the verdicts as
16 read by the Court, and are they still now, your
17 verdicts in this case?

18 MS DORN: Yes, sir.

19 THE COURT: Mr. Nelesen, were the verdicts
20 as read by the Court, and are they still now, your
21 verdicts in this case?

22 MR. NELESEN: Yes, sir.

23 THE COURT: Mr. Klein, were the verdicts as
24 read by the Court, and are they still now, your
25 verdicts in this case?

1 MR. KLEIN: Yes, your Honor.

2 THE COURT: Mr. Schuette, were the verdicts
3 as read by the Court, and are they still now, your
4 verdicts in this case?

5 MR. SCHUETTE: Yes, your Honor.

6 THE COURT: Ms Flint, were the verdicts as
7 read by the Court, and are they still now, your
8 verdicts in this case?

9 MS FLINT: Yes, your Honor.

10 THE COURT: Mr. Mohr, were the verdicts as
11 read by the Court, and are they still now, your
12 verdicts in this case?

13 MR. MOHR: Yes, your Honor.

14 THE COURT: Ms Stienmetz, were the verdicts
15 as read by the Court, and are they still now, your
16 verdicts in this case?

17 MS STIENMETZ: Yes, your Honor.

18 THE COURT: Mr. Wardman, were the verdicts
19 as read by the Court, and are they still now, your
20 verdicts in this case?

21 MR. WARDMAN: Yes, your Honor.

22 THE COURT: Members of the jury, on behalf
23 of Manitowoc County, I would like to express my
24 sincerest gratitude and appreciation for your
25 service in this case. I recognize the personal

1 sacrifice in terms of time and restrictions on your
2 normal activities that the Court has required of you
3 during this trial. That sacrifice is a necessary
4 part of the price we pay for the judicial system
5 every citizen enjoys. I hope that you found the
6 experience a rewarding one.

7 Before discharging you, I have one final
8 instruction. Now that your service in this case
9 is completed, some of you may have questions
10 about the confidentiality of the proceedings.
11 Many jurors ask if they are at liberty to discuss
12 the case with anyone after receipt of the
13 verdicts.

14 Because your role in this case is over,
15 you are free to discuss it with any person you
16 choose, if you wish. However, you should know
17 that you do not have to discuss the case with
18 anyone or answer any questions about it from
19 anyone other than the Court.

20 If you do decide to discuss the case
21 with anyone, I would suggest that you treat any
22 discussion with a degree of solemnity such that
23 whatever you do say, you would be willing to say
24 in the presence of your fellow jurors, or under
25 oath, here in open court, in the presence of the

1 parties.

2 Also, keep in mind, if you do decide to
3 discuss the case, that your fellow jurors freely
4 and fully stated their opinions with the
5 understanding that they were being expressed in
6 confidence. Please respect the privacy of the
7 views of your fellow jurors.

8 If any members of the jury wish to
9 discuss the case today with representatives of
10 the media, arrangements have been made to permit
11 you to do so before you leave. Should anyone,
12 whether from the media or otherwise, persist in
13 attempting to question you, over your objection,
14 you should contact the Court.

15 Finally, should any of you have any
16 questions for the Court before leaving today,
17 please, let the bailiff know before you leave the
18 jury room. At this time you are excused.

19 (Jurors excused.)

20 THE COURT: You may be seated. At this
21 time the Court will entertain any motions for
22 judgment on the verdicts.

23 ATTORNEY KRATZ: At this time, Judge, I
24 would ask the Court enter judgment on each of the
25 three verdicts.

1 THE COURT: Anything from the defense?

2 ATTORNEY STRANG: Your Honor, I ask that
3 the Court enter judgment of acquittal on Count 2 of
4 the second Amended Information. And I ask that the
5 Court withhold judgment on Counts 1 and 3, set a
6 schedule for post-verdict motions, in part,
7 inconsistent verdicts, and anything else we might
8 want to address.

9 THE COURT: The Court is going to, at this
10 time, enter a judgment on the three verdicts that
11 have been received, subject to further rulings from
12 the Court after full consideration of any post-trial
13 motions; that is, a judgment of conviction on Counts
14 1 and 3 and a judgment of acquittal on Count 2. I
15 do not have my calendar here today; it's in
16 Manitowoc.

17 I am going to, at this time, order a
18 Presentence Investigation Report. The Court will
19 schedule a hearing on any motions after they are
20 received and schedule a sentencing date after
21 conversing with counsel later, contingent on any
22 rulings on any post-trial motions.

23 ATTORNEY STRANG: Would 30 days for filing
24 the motions be acceptable?

25 THE COURT: Any objection from the State?

ATTORNEY KRATZ: Are we setting those
before the sentencing hearing?

ATTORNEY STRANG: Yes.

THE COURT: Well, I will decide that when I
get them, if and when I get them. I don't have any
motions in front of me. I'm not going to speculate
about hearing dates at this time. The Court is
going to, however, order that bail be revoked in
this case. Is there anything further from either
party on the record today?

ATTORNEY KRATZ: Nothing for today, Judge.
Thank you.

ATTORNEY STRANG: No, your Honor.

THE COURT: Very well, we are adjourned.

(Proceedings concluded.)
