I'm not sure which details you need. Here is what I can tell you. She claims to have been approached by an officer on either May 20 or May 21st in the downtown area. We do not have a specific time of day. She can't give a name, badge number, or a good description. She says she was placed in the back seat of his patrol vehicle and checked for warrants. We were wanting to expand that time frame by going back 2 or 3 weeks from today.

Joe,

Over the weekend, a woman made allegations against a police officer. Part of her story is the officer checked her for warrants. CIU checked back 30 days and does not have a record of running that subject on their computers. We are doing an offline search through OLETS. CIU advised this might not tell us if the person was run on their MDC. They felt you might have the capability to check for that information.

So, I need to know if you can determine if a subject was run on MDC's during a certain time frame using only the subject's information. Is this possible?

Joe,

The off line search shows our complainant was run on May 8th at 20:55 by 2C45 (D. Holtzclaw), through CIU. Can you please check his AVL for me for this date? Thanks

Major,

I ran it from 2032 to 2130. I attached both the map and raw data.

Ron,
I can also use AVL data if you have a specific date time and location with a major's or DC permission.

Joe Hill said the last time our victim was run by MDC was on April 11th. Sgt. J. Sellers ran her. At the time, his AVL shows he was in the 2200 block of NE 24th St. This is not the time frame nor the location of the allegation. CIU stated they have not run her within the past 30 days on any of their computers. I am just waiting on a reply from DPS on the offline OLETS search. I will update you when I get more information.
