Ron,

I can also use AVL data if you have a specific date time and location with a major's or DC permission.

Joe,

Over the weekend, a woman made allegations against a police officer. Part of her story is the officer checked her for warrants. CIU checked back 30 days and does not have a record of running that subject on their computers. We are doing an offline search through OLETS. CIU advised this might not tell us if the person was run on their MDC. They felt you might have the capability to check for that information.

So, I need to know if you can determine if a subject was run on MDC's during a certain time frame using only the subject's information. Is this possible?

Joe Hill said the last time our victim was run by MDC was on April 11<sup>th</sup>. Sgt. J. Sellers ran her. At the time, his AVL shows he was in the 2200 block of NE 24<sup>th</sup> St. This is not the time frame nor the location of the allegation. CIU stated they have not run her within the past 30 days on any of their computers. I am just waiting on a reply from DPS on the offline OLETS search. I will update you when I get more information.

Joe,

The off line search shows our complainant was run on May 8<sup>th</sup> at 20:55 by 2C45 (D. Holtzclaw), through CIU. Can you please check his AVL for me for this date? Thanks
